David L. Narver, Jr. Surveys

February 2, 1953

Present Home Office thinking is the following for combination of base line and triangulation surveys:

One man, namely, Glade Barry, will be sent TDY to the Jobsite to handle physical field operation of the base line and triangulation.

The calibrated tapes will arrive at the Jobsite around Mid-February. About March 1, we will send Glade Barry to the Jobsite, unless we indicate some other scheme of operation.
