Dr. W. T. Gooch, Dean
The Graduate School
Baylor University
Waco, Texas

S.G.O.

Dear Doctor Gooch:

Reference is made to Contract No. DA-49-007-MD-427, which provides funds for the development of a radioactive isotope gamma ray therapy machine. This contract, as presently written, expires on 31 January 1954.

In view of our agreement to support this work for at least two years, we would greatly appreciate an estimate of the amount of money required for the period ending 31 January 1955. Our records indicate that approximately \$1,650 remained unexpended under this contract as of July 1953. If these funds have not been used, they may be obligated for the work during the coming year.

We would be very interested to learn of any progress on the development of this machine.

Sincerely yours,

JOHN R. WOOD
Colonel, Medical Corps
Chief, Research and
Development Division
