Medical R&D Command
Office of The Surgeon General
Washington 25, D.C.

Dear Don:

I am inclosing several copies of a proposal from Dr. Rennie which we are most interested in and hope can be supported. I am also sending you a copy of their cover letter to me and of my reply. Both Dr. Davis and George Clark know Dr. Rennie and his group and have encouraged him to submit the proposal.

We recently had the opportunity of hearing Dr. Suk Ki Hong present here for us his studies to date on the Diving Women. He was most impressive, and his studies quite interesting. I don't really know whether their request for a grant is made with understanding of the rarity with which these are available or not. I will leave it with you to clarify this with them unless you would prefer that we do so. Meanwhile we will open a file here on the proposal and will appreciate information copies of your correspondence.

Sincerely yours,

WILLIAM H. HALL
Lt. Colonel, MC
