Physical Examinations Re FEA 57029, Troop  
Acceptability of TTP Foods  
Capt Bierman 13 August 1958  
Surgeon General's Rep. Capt Bierman/js/1147

Physical examinations, chest X-rays, complete blood count, and urinalysis were performed on all subjects prior to their inclusion in the test group. Follow up physical examinations, blood count, and urinalysis were performed approximately three (3) months after the ingestion of irradiated pork and/or bacon on all those subjects who were available at the time of examination. These examinations revealed no effects attributable to the ingestion of irradiated food.
