Lt. Col. H. E. Ratcliffe
Project Officer
Medical Research and Development Board
Department of the Army
Office of the Surgeon General
Washington 25, D. C.

Dear Colonel Ratcliffe:

Dr. Peter F. Salisbury, who has requested a grant from the National Research Council (Ref: MEDDH 004 (Cedars of Lebanon Hospital - Los Angeles)F) for the support of his work on an analysis of the indirect effect of radiation, has shown me your letter of December 7, 1951, in which you state that I, as Director of the Research Institute, am requested to assume responsibility for the work to be conducted in the laboratory. As Director of the Institute, I consider myself responsible for all work being conducted in the institution. I do supervise all the work and am completely familiar with all the work that is going on. No paper is published without my approval. I cannot undertake to participate actively in the work, although I am always willing, from time to time, to do anything I can to help, if such help is needed. In the circumstances, I am certainly willing to consider myself responsible for the work in the sense in which I have stated above. I hope this will be considered satisfactory.

Yours sincerely,

Harry Goldblatt, M.D.,
Director

HG:M
