Chicago 14, Illinois

Dear Joe:

I was happy to receive your letter of 18 June, including the information regarding your current series and the additional information that you are culturing something from the Korean hepatitis patients.

As you know, I will be happy to come any time to perform the gut biopsies. I have sent a copy of this letter to Don Howie and have given one to Dr. Smetana. It will not go beyond this point.

Hoping to hear from you in the near future, I remain,

Sincerely,

MARCEL E. CONRAD, JR.  
Major, MC  
Dept. of Hematology
