Dear Dr. Wright:

In reply to your letter of April 12, 1951, subject as above, there is enclosed a copy of a shipping list recently received from our New York Operations Office listing gross, tare and net weights of your recent shipment of P-43.

In reference to our recent telephone conversation, we have been informed that Baker & Company receive charcoal on a maximum moisture content basis and under their contract produce the catalyst at a given amount per troy ounce of metal used and, therefore, not having any moisture specifications to meet on the finished product.

On your last shipment the New York Operations Office has informed us that the metal content is 0.882% as analyzed on a basis the metal content is 1.03% plus.

It is hoped that this information may enable you to establish an inventory figure and if not, we shall try to provide further information for you.

Very truly yours,

- Distribution:

Subject: SPECIAL HEAVY WATER SAMPLES

Gentlemen:

With reference to the special heavy water samples received recently from Chalk River, you are authorized to proceed with analyses for these samples.

Results of the analyses should be furnished to this office for transmittal to Mr. F. E. Wolfe, Division of Research, Washington, D. C.

If there is any further information you would like concerning these samples, please advise us.

Very truly yours,

CG - NMP - 1
