Attached is a draft of a staff paper entitled, "Policy Regarding Special Beryllium Hazards," as submitted by the Manager of the New York Operations Office, a copy of which I believe you have already had an opportunity to examine.

I understand this paper does not represent the views of the Division of Production and Biology and Medicine. Therefore, I am referring this matter to your Division, with the request that you arrange for the preparation of a staff paper on this subject, representing the judgment of the Washington Divisions, for action by the Commission. You may wish to take this opportunity to prepare a study which will cover the entire field of medical hazards of non-radioactive materials, rather than beryllium alone.
