Biology and Medicine, Washington
Merril Eisenbud, Director, Health and Safety Division
New York Operations
SPECIAL RADIATION STUDIES

May 2, 1950

SYMBOL: HS:JC

Dr. H. A. Blair of the Atomic Energy Project, University of Rochester, has informed me that Dr. Franklin McLean of the Toxicity Laboratory, University of Chicago, has asked Dr. John Hursh to submit an estimate of the cost of doing a special radiation study on dogs. It is our understanding that Dr. McLean will seek approval from the Division of Biology and Medicine, Washington for this work. I have obtained a copy of the proposed budget from Dr. Blair and it is enclosed. We will incorporate this work in the Rochester contract if you authorize it.

Enclosure:
Proposal
