Dr. Patricia W. Durbin
Lawrence Radiation Laboratory
University of California
Berkeley, California 94720

Dear Pat:

I was delighted to hear from you after all these years. I often wondered what became of the various people in our group and around the R. L. in general.

That is quite a request you have made --to rack my memory back some 23 years! I am surprised that Ken Scott can't come up with the information on the patient.

I will certainly be happy to come up some day and go over the material with you. I can't promise much help, but then again perhaps back in familiar surroundings some recall may occur.

As you can see from the letterhead I am working at the City of Hope. After about 8 years of loafing at home I went back to work. I've been working with George Rouser whose specialty is lipids of normal organs and in pathological states.

Let me know if you would like me to come up, and I am sure we can arrange some convenient time.

Sincerely,

Dorothy
