4528 Ellicott Street, N.W.
Washington, D. C.

Dear Berni:

Thank you very much for your letter of May 20. We are very glad to hear that you are joining the Argonne National Laboratory on July 1; personally, however, I regret that you won't be in Berkeley.

A salary raise for Bob San Souci is being considered by the Radiation Laboratory here, and I believe that John Lawrence has approved it and recommended it. However, technically San Souci is part of the business administrative setup with W. B. Reynolds in charge, and in the past it has been difficult to get a raise for him since they have several junior executives on the Hill who are in about the same class and receive approximately the same salary. We have hopes, however, that the raise will go through in the near future.

Bob is doing a very fine job and is completely devoted to the cause of the lab here. It actually would be helpful to him if he would receive some outside offers or at least inquiries.

A report on the first twelve patients treated is now completed and is waiting the final typing. I am sorry to be delayed with this, but the pressure of work was just too great.

I certainly hope to maintain a friendly relationship with you even after you have left the Washington area.

Sincerely yours,

Cornelius A. Tobias
