February 23, 1988

TO: Paul Meyer

FROM: Barton L. Gledhill, Chairman, Institutional Review Board

SUBJECT: Your Project "Human Subjects Experiments with Air Tagged with Radioisotopes N-13 and Ar-41," IRB Approval No. 80R-109

Your request for renewal of this project was submitted to the IRB at its meetings of 11/30/87 and 1/26/88. Before the Committee brings this protocol to a vote, it asks that you submit additional information to (1) clarify why the experiment is being done; (2) clarify dose calculations; (3) clarify questions raised in your collaborator's letter; (4) indicate extent of the U.S. Navy's interest in this project; and (5) provide documentation on why this research should involve LLNL people (our expertise, equipment, etc.) Also, the Committee would like you to provide statistics on decompression sickness risks. You should provide this information in letter form addressed to me and submitted through Gerry Wyman (L-452).
