Dr. Paul C. Aebersold  
Chief, Isotopes Division  
Oak Ridge Operations  
P. O. Box E  
Oak Ridge, Tennessee

Dear Dr. Aebersold:

Thank you for the copy of your letter of October 5 to W. E. Kelley, concerning "Use of Isotopes in Human Subjects." Up to the present, the only use of isotopes at Brookhaven in human subjects has been in the treatment of patients with thyroid cancer from Memorial Hospital, the radioactive iodine used being that which had been approved to Memorial Hospital for use with these patients.

In applications for future use of isotopes in human subjects, we will endeavor to follow completely the instructions in your letter.

Yours sincerely,

Donald D. Van Slyke  
Assistant Director -  
Biology & Medicine
