

[\[SLAC\]](#) [\[Publications from SLAC\]](#) [\[Document Types\]](#)

Sorry, slac-r-528.pdf was not found on the main SLAC server.

Why?

Your file request may have failed for any of the following reasons:

1. It's not yet published by SLAC.

The title you are looking for may not yet be published because:

- The author has not yet [submitted](#) it to the SLAC Technical Publications Department for publication.
- It has been submitted for publication at SLAC, but has not yet cleared patent review. (SLAC Pubs, Reports, Accelerator Physics Notes (AP), Technical Notes (TN), and Working Papers (WP) are now made available on the SLAC server the same day they clear patent review.)
- The document number for the file you requested has not yet been assigned to a SLAC manuscript.

2. It is published, but hasn't yet been made available on the SLAC Web.

If published as a SLAC Pub, Report, AP, TN, or WP the electronic version may not yet have been posted on SLAC's server. (All legacy SLAC Pubs, Reports, and Translation (Trans) documents dating back to **1962** have been published to the SLAC server). Legacy documents in the AP, TN, and WP series are being added as resources permit. To expedite posting of one of these document types, submit a [posting request](#).

3. It is available on the SLAC Web, but in a different format.

A document may be posted in one or more of the following formats:

- Adobe Portable Document Format (.pdf)
- "Gzip" Compressed PostScript (.ps.gz)
- "UNIX Compress" Compressed PostScript (.ps.Z)

4. The filename is incorrect.

Filenames are case sensitive (.ps.z is not the same as .ps.Z) and must be exact and complete (just the name, no path). Also, the filename may have changed due to the splitting or joining of document sections.

What Now?

Please try our [FastFind](#) page to search by document number, or go directly to the file's [pub page](#).

This page generated by script developed by the [SLAC Technical Publications Department](#).
