

Dear reviewers.

All the files are on the location indicated by the hyperlink below in the dropzone

<\\dropzone\public\Guadalajara>

IMPORTANT: only 4 files are new: Chapter 1, MEPV overview , SAMPLES, and Fundamentals of MEMS. The rest of the power point files have been updated for typos only. These files (videos, PowerPoint files, AutoCAD files) have been presented several times for the last 8 years to a diverse audience of researchers (including foreign nationals) as part of the MEMS shorcourse which is already copyrighted.

The file "MEPV overview" is the only one that is associated with TA's 11511, 11984 and LDRD funding. SD11984 will be filed on September 1st, 2011 and the information on this presentation has already been disclosed in a Journal Article.

If you have any questions about the content of the documents please contact us:
