Approved for public release; distribution is unlimited.

Title: Los Alamos National Laboratory 4D Database

Author(s): Atencio, Julian J.

Intended for: Human Reliability Workshop, 2014-05-19/2014-05-22 (Tel Aviv, Israel)

Issued: 2014-05-02

Disclaimer:

Los Alamos National Laboratory, an affirmative action/equal opportunity employer, is operated by the Los Alamos National Security, LLC for the National Nuclear Security Administration of the U.S. Department of Energy under contract DE-AC52-06NA25396. By approving this article, the publisher recognizes that the U.S. Government retains nonexclusive, royalty-free license to publish or reproduce the published form of this contribution, or to allow others to do so, for U.S. Government purposes. Los Alamos National Laboratory requests that the publisher identify this article as work performed under the auspices of the U.S. Department of Energy. Los Alamos National Laboratory strongly supports academic freedom and a researcher's right to publish; as an institution, however, the Laboratory does not endorse the viewpoint of a publication or guarantee its technical correctness.

Los Alamos National Laboratory 4D Database

Julian Atencio

4D in a Few Words

4D is an integrated development platform
- a single product comprised of the components you need to create and distribute professional applications.

You get a graphical design environment, SQL database, a programming language, integrated PHP execution, HTTP server, application server, executable generator, and much more.

4D offers multi-platform development and deployment, meaning whatever you create on a Mac can be used on Windows, and vice-versa.

Beyond productive development, 4D is renowned for its great flexibility in maintenance and modification of existing applications, and its extreme ease of implementation in its numerous deployment options.

Your professional application can be put into production more quickly, at a lower cost, and will always be instantly scalable.

4D makes it easy, whether you're looking to create a classic desktop application, a client-server system, a distributed solution for Web or mobile clients - or all of the above !

A partial list of standards supported by 4D

<i>Data Transfer</i> DOC HTTP RPC SOAP SQL Pass-through TCP/IP	<i>Database Interfaces</i> OCI ODBC SQL MySQL	<i>Data Formats (Text & Binary)</i> XML DOM SVG BLOBs JPEG/GIF/PNG/B MP EXIF Unicode

Subject Driving Restriction

Attachment Path

MessageText IN CONFIDENCE

JULIAN ATENCIO, Z# 207492, PS-3, is being restricted from driving all government vehicles or private vehicles on official business until further notice. This action is being taken due to a DWI arrest or criminal summons that occurred on 09/23/2010.

This restriction will be reviewed by Personnel Security (PS-3) when proof of an unrestricted driver's license is provided to PS-3.

IN CONFIDENCE

This memo is intended ONLY for the use of the individuals addressed above and may contain information that is IN CONFIDENCE and prohibited from further disclosure. If you are not the intended recipient, you are hereby notified that any dissemination or copying of this message is strictly prohibited. If you have received this message in error, please IMMEDIATELY notify the original sender by telephone or by return email and delete this message from your computer.

A nudge is any small feature of the environment that captures our attention and, in so doing, alters our behavior. My favorite example of a nudge is in the Amsterdam Airport. A clever guy had the idea of etching the image of a housefly in the urinals, right near the drain. When guys are doing their business, they're not paying a lot of attention. But if you give them a target, they aim. By etching that image of the housefly in the urinal, he claims it has decreased spillage by 80 percent. It's something that in theory shouldn't matter, but it seems to matter.

-Richard Thaler
