Quality at Sandia National Laboratories

J. Stephen Rottler

Vice President, California Laboratory

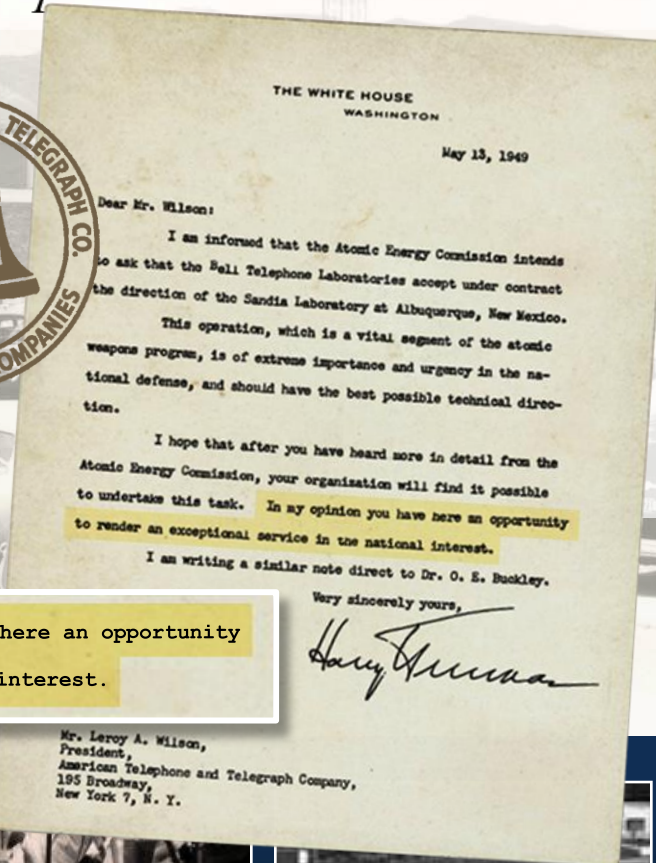

Vice President, Energy and Climate Strategic Management Unit

24-26 Feb 2014

International Conference on Software Quality - ICSQ 2014

Sandia's history

Exceptional service in the national interest

- **July 1945:** Los Alamos creates Z Division
- Nonnuclear component engineering
- **November 1, 1949:** Sandia Laboratory established

to undertake this task. In my opinion you have here an opportunity to render an exceptional service in the national interest.

Sandia's mission work reflects national security challenges

1950s

A mission failure can have unimaginable consequences

Nuclear weapon safety
and security

Operational safety

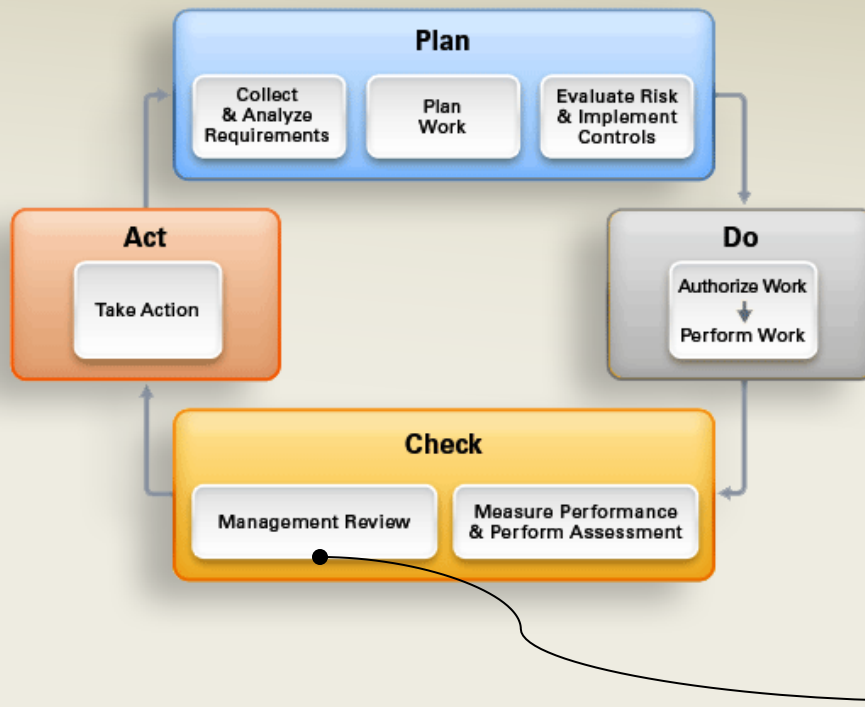

Chemical munitions destruction

Engineering, ethics, and quality

- Engineering is a profession and ethics is a defining element of all professions
- We have an ethical obligation to take positive steps to prevent unwanted outcomes
- Defect or error prevention is the cornerstone of quality at Sandia
- Quality is:
 - Driven by a culture that values defect prevention ...
 - Supported by an appropriate and reinforcing set of processes and tools

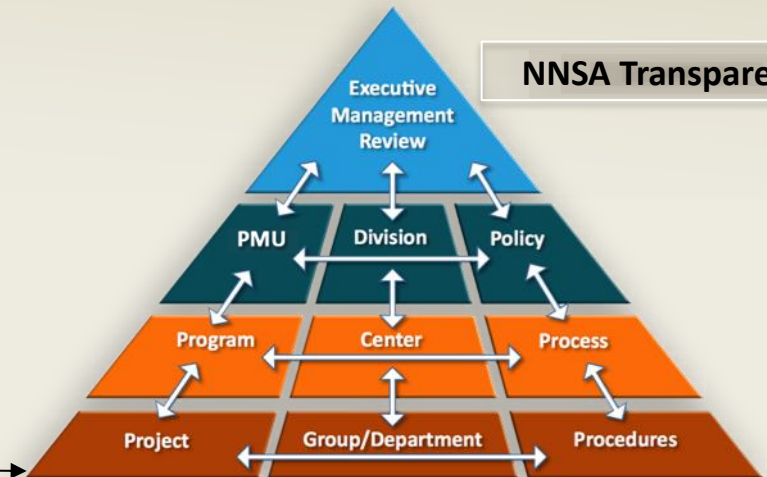

Sandia's quality framework

Performance Assurance System (PAS)

External and internal audits
independently validate performance

Management Reviews

NNSA Transparency

Quality is meeting customer and Sandia expectations consistently and predictably through flawless execution of personal and collective responsibilities

Quality at Sandia: Examples

Nuclear weapon safety and quality

Quality standards for research

Critical software applications

Operational safety

Summary

- Sandia is driven by the need to prevent the **unimaginable** and **unacceptable consequences** of a failure in our mission
- We have evolved from emphasis on control and inspection to an emphasis on **defect prevention** as the **cornerstone** for our approach to quality
- Our culture is built on **values** and **principle-based behaviors and attitudes**
 - We align through our **vision and mission** and use **policies and standards** to enable **quality mission results**
 - We adopt or develop techniques and practices that enable a **disciplined approach** for the **engineering of products and services** with **assured quality**

Questions?

“Excellence is an art won by training and habituation. We do not act rightly because we have virtue or excellence, but we rather have those because we have acted rightly. We are what we repeatedly do. Excellence, then, is not an act but a habit.”

Nichomachean Ethics, Aristotle (384-322 BC)
