

Balloon at Night

Tony Ohlhausen
Sandia National Laboratories[†]

This picture was created by performing a positive secondary ion stage-scanned ToF-SIMS image acquisition of the residue of a silicone-based replicating compound on a polished Al coupon. Shown above are the actual, untouched, multivariate analysis results which consist of the substrate (blue), silicones (green) and other surface contamination (red).

[†]Sandia National Laboratories is a multi-program laboratory managed and operated by Sandia Corporation, a wholly owned subsidiary of Lockheed Martin Corporation, for the U.S. Department of Energy's National Nuclear Security Administration under contract DE-AC04-94AL85000.
