

# North Slope Alaska Research Facilities

## Unmanned Aerial Systems & Tethered Balloon Operations

Jasper(Joe) Hardesty • Mark Ivey • Darielle Dexheimer • Fred Helsel • Erika Roesler • Dan Lucero • Todd Houchens • Casey Longbottom • Al Bendure

US High Arctic Research Center (USHARC) is to **partners stakeholders** from science, safety and security to **develop comprehensive solutions**. The Center will offer **year-round use**, logistic support; access to **varied ecological settings**; **testing of technologies** such as **autonomous platforms, renewable energies, microgrids, and sensors**.

### Alaska Arctic Stations and Oliktok Point Controlled Airspaces

### 2017 = 20 years for ARM at Barrow/Utqiagvik !!

#### Key North Slope Alaska Partners

##### • Oliktok Science Team

Gijs de Boer, Matt Shupe, Allison McComiskey, Amy Solomon, Sergey Matrosov, Jessie Creamean, Dave Turner, Chris Williams, Max Maahn, Carl Schmitt, Hagen Telg

##### • ARM UAS Advisory Group

Tim Bates, Gijs de Boer, Matt Fladeland, Jerry Herrington

##### • USGS, NOAA, NASA, USAF, BLM

##### • CU-Boulder, Univ. of AK Fairbanks (UAF)

#### Future Plans and Capabilities:

- ARM Arctic Shark UAV (PNNL)
- Routine TBS data collection
- Routine joint TBS-UAV flights
- WMO Year of Polar Prediction (YOPP) 2017-19
- Expanded collaboration (e.g. NGEE) and outreach (e.g. STEM)

### 2015-16; Barrow + Oliktok: ICARUS

### TBS Instrumentation:

#### Aerosols:

- POPS: Printed Optical Particle Spectrometer for aerosol concentrations and size distributions
- Mini-SASP Miniature Scanning Aerosol Solar Photometer for AOD profiles
- CPC: Condensation Particle Counter for aerosol size distribution

#### Meteorology & Thermodynamics:

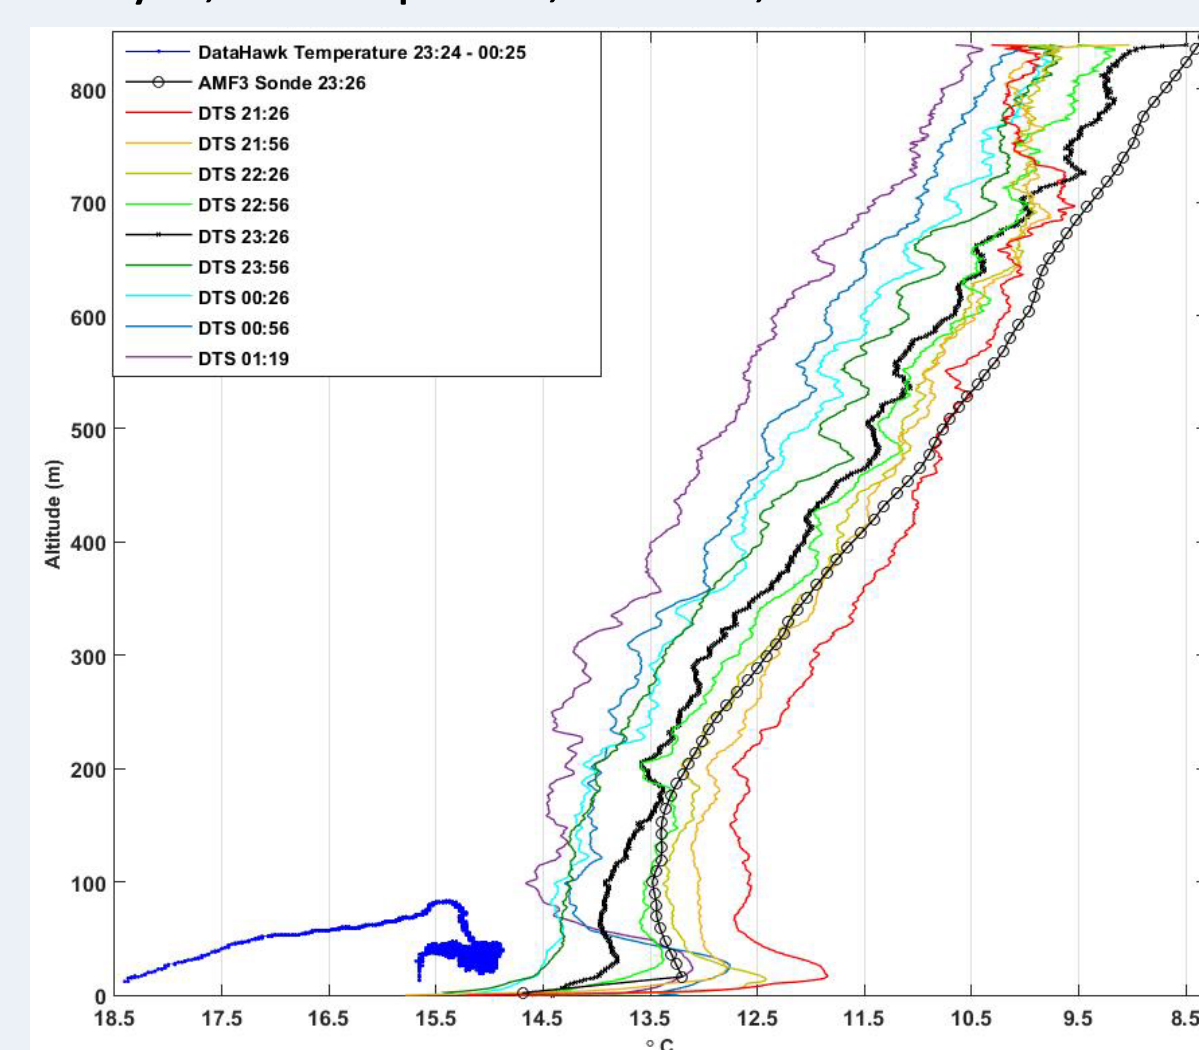

- Tethersondes: for pressure, RH, temp., wind speed/direction, altitude, lat/long
- DTS: Distributed Temperature System for temperature profiles

#### Ice and Liquid in clouds:

- SLWCs: supercooled liquid water content sensors for cloud liquid water content
- VIPS: Video Ice Particle Sampler for ice microphysics observations

#### • Tethered Balloon systems (TBS)

- Can operate in clouds
- Enclosed winch or launch platform
- 35 m<sup>3</sup> helikites
  - 30 lb payload, up to 2,000' AGL
- Aerostat
  - 80 lb payload, up to 6,000' AGL
- Distributed Temperature Sensing:
  - Fiber-optic system hi-res measurements of permafrost, active layer, atmosphere, sea ice, and ocean interfaces

	DH Temp	DTS	Sonde
DataHawk Temp		0.30	0.23
DTS	0.30		0.97
Sondes	0.23	0.97	

#### DTS data correlate well with sondes

- Currently measure only when TBS is stationary
- testing fiber optic rotary joint in 2017 for continuous measurements

#### 2015; Oliktok:

First concurrent TBS and DH flights  
with CIRES/UC-Boulder

#### 2016-17; Oliktok:

PNNL-DataHawk2 flights  
with PNNL

#### 2015-16; Oliktok:

Evaluation of Routine Atmospheric Sounding  
Measurements with Unmanned Systems (ERASMUS-I,-II)  
using DataHawk and Pilatus platforms  
with CIRES/UC-Boulder

#### 2015; Oliktok:

Arctic Shield Search & Rescue exercise  
using ScanEagle platform  
with USCG, C-P, Insitu, NOAA, FAA, NSB and Era

#### 2016-17; Oliktok:

Radar calibration  
sphere on TBS  
with PNNL

#### 2014; Oliktok:

Coordinated observations of the  
Arctic lower atmosphere (COALA)  
using DataHawk platform  
with CIRES/UC-Boulder

#### 2010; Oliktok:

Arctic Lower Troposphere  
Observed Structure (ALTOS)  
using SPEC He-filled balloon;  
with SPEC, PSU, Scripps and UAF

#### 2012; Oliktok:

UAS Test Maneuvers  
using BAT-3 + Aeryon Scout  
with NMSU

#### 2013; Oliktok:

Marginal Ice Zone Observation  
& Process Experiment (MIZOPEX)  
using Sierra, Datahawk and ScanEagle  
with NASA, UAF and CU

**2002; Barrow:**  
Simultaneous Aerosonde-Radiosondes  
with ANL and NSF

#### Oliktok: Flight Days

(2016: 104 flights, 129 hours)

#### 2004; Barrow, Atkasuk, Oliktok, Toolik Lake:

Mixed-Phase Arctic Cloud Experiment (M-PACE)  
using Vaisala sondes and ARM-Proteus UAV  
with UAF, PSU, UIUC, UND, UWisc, PNNL and NOAA

#### 2001; Barrow:

First UAV flights on  
North Slope AK  
Aerosonde with NSF
