

Exceptional service in the national interest

2016 IRI Conference

Jason Martinez J.D., M.B.A

Lead CRADA Specialist, Sandia National Laboratories

Mechanisms to Partner with DOE Labs

- **Strategic Partnership Project:** Fee for service contract that enables non-federal entities to pay DOE laboratories to perform a defined scope of work or tasks
- **License Agreement:** DOE laboratories' Intellectual Property may be licensed for commercial use, test and evaluation, or execution of a government contract
- **Cooperative Research and Development Agreement (CRADA):** Facilitates collaborative R&D
- **User Facility Agreements:** Specialized agreements to expedite user access to DOE Designated Use Facilities
- **Funding Opportunity Announcements:** Federal agencies (including DOE) post funding opportunities and other solicitations

Collaborative Success Story

Red and White Fleet

Sandia executed a CRADA with Red & White of the San Francisco Bay

Hydrogen fuel cells

- No harmful exhaust emissions
- Higher energy efficiency
- Quiet operation and no risk of fuel spills

The hydrogen refueling station

- Planned to be the largest in the world
- Serve fuel cell electric cars/buses
- Other maritime vehicles.
