

Exceptional service in the national interest

Affects of Single Ion Strikes into Si on the 3D Reciprocal Space

Manuel Franco, Remi Dingreville, Khalid Hattar, Wei Ji

Sandia National Laboratories is a multi-mission laboratory managed and operated by Sandia Corporation, a wholly owned subsidiary of Lockheed Martin Corporation, for the U.S. Department of Energy's National Nuclear Security Administration under contract DE-AC04-94AL85000. SAND NO. 2011-XXXXP

SAND2016-8607 PE

Updates/ Next Steps

1. Still setting up software
2. Awaiting availability for control Si to be imaged by TEM
3. Currently setting up and filling in an outline of thesis to be updated as time goes on

Acknowledgements

This research was partially funded by the U.S. Department of Energy, Office of Science, Office of Basic Energy Sciences, Division of Materials Sciences and Engineering. Sandia National Laboratories is a multi-program laboratory operated by the Sandia Corporation, a wholly owned subsidiary of Lockheed Martin company, for the U.S. Department of Energy's National Nuclear Security Administration under contract DE-AC04-94AL85000.
