

Ryanne Daily, Linn Thrane, Robin Gerlach, Sarah Codd, Adrienne Phillips, "Biomineralization at High Pressures" Subsurface Biotechnology Workshop, Interdisciplinary Centre for Environmental Microbiology at Aberystwyth University in Wales, UK, June 5-7, 2018.

In subsurface application of mineral precipitation that may involve the presence of carbon dioxide pose challenges including the potential dissolution of mineral and impacts to microbial activity. This presentation focused on work to study biomineral formation and the resistance to different subsurface physical and chemical conditions.
