

This Maximo Calibration Special Interest Group (McSIG) working session will address and share information related to common Maximo calibration processes, best practices, issues, and concerns as determined by the interest of the attendees. Attendees have been experienced Maximo calibration users as well as users considering a Maximo Calibration implementation. The results of these sessions have helped companies learn different ways to use Maximo Calibration and helped shape enhancements of the calibration product. Topics from the previous sessions will be briefly reviewed before new topics are selected and addressed
