

Abstract for NIRMA Conference 2018

Presentation title: Down the Digital Rabbit Hole

Presentation topic:

Down the digital rabbit hole is a presentation that discusses a simple yet efficient way to build a records migration plan. The presentation shows how to identify migration needs and the core concepts of project management. In streamlining these needs and concepts, identifying pre-project needs, records inventory management and identifying the collections holdings, a simple migration plan can be created. Taking a simplistic approach to execute what is usually a complex project can move migration along at a faster pace saving time and money.

Sandia National Laboratories is a multimission laboratory managed and operated by National Technology and Engineering Solutions of Sandia LLC, a wholly owned subsidiary of Honeywell International Inc., for the U.S. Department of Energy's National Nuclear Security Administration under contract DE-NA0003525.
