Laboratories

DoD/SNL CompSim Capabilities Workshop

Sandia National Laboratories
October 21st-23rd, Albuquerque, NM

Please join us in Albuquerque this fall to initiate a continuing collaboration supporting Sandia code use in the DoD mechanical analysis community. We welcome participation from DoD staff, management, and contractors on all topics of computer-aided engineering for DoD national security needs. This is a great opportunity for DoD customers to inform Sandia code group representatives of near-term and long-term needs, and to meet and learn from DoD personnel who are now using Sandia computational simulation tools.

Contact us if you are interested in attending or in giving a presentation

Proposed Schedule:

Oct 21st: DoD Analysis Presentations
Oct 22nd: Sandia Code Presentations
Oct 23rd: Collaborative Opportunities
