

2015 INFORMS FRANZ EDELMAN PRIZE COMPETITION

Finalist

HON Heidi Shyu, Army Acquisition Executive

“CPAT has provided great insight into [the Army’s modernization] challenges, and has helped us achieve significant improvements and billions of dollars in cost avoidance this team has developed an analytical framework that can be used by our entire acquisition community.”

BG David Bassett, PEO Ground Combat Systems

“CPAT [is] the Army’s – and we think the Department of Defense’s – preeminent analysis tool for acquisition investment ... [it] has transformed the way we think about acquisition and our long range planning strategies.”

As a finalist for the 2015 Edelman Prize, the **Capability Portfolio Analysis Tool (CPAT)** project was recognized as one of the leading examples internationally of Operations Research projects of outstanding quality and impact. The joint Army-Sandia team responsible for CPAT was awarded an Edelman Trophy and inducted into the Edelman Academy for their accomplishments.
