

Sandia National Labs: Excerpts from the Mk2 I Fuze Replacement Program, and Techno- Economic Analysis with ParaChoice.

Camron Proctor

April 26, 2019

Sandia National Laboratories is a multi-mission laboratory managed and operated by National Technology and Engineering Solutions of Sandia, LLC., a wholly owned subsidiary of Honeywell International, Inc., for the U.S. Department of Energy's National Nuclear Security Administration under contract DE-NA-0003525. Fulfilling Our National Security Mission

Nuclear Deterrence

*Defense Nuclear
Nonproliferation*

*National Security
Programs*

*Energy & Homeland
Security*

*Advanced Science &
Technology*

The Department of Energy is committed to the
 development of a secure and resilient energy
 system that is safe, clean, and
 affordable. We are investing in research and
 development to advance the science and
 technology of energy production,
 distribution, and use. Our mission is to
 ensure a secure and resilient energy
 system that meets the needs of the
 American people and the world.

Sandia's Impact

As a multi-faceted national security laboratory, Sandia develops advanced technologies to ensure global peace.

Sandia is often called upon to respond to high-profile events, including 9/11 and the Ebola outbreak.

Ebola Outbreak

Sandia contributes to global response of Ebola outbreak by developing a sample delivery system cutting the wait time and potentially fatal exposure.

Cleanroom invented 1963

\$50 billion worth of cleanrooms built worldwide. They're used in hospitals, laboratories and manufacturing plants today.

9/11

Sandia sets contingency plans for release of materials and aircraft attacks on critical facilities immediately after 9/11. Search dogs are equipped with cameras for search and rescue K-9 handlers. The capability allowed search efforts to be carried out in spaces inaccessible to humans.

Detecting IEDs

Combat personnel now have a new tool for uncovering improvised explosive devices: Sandia's highly modified miniature synthetic aperture radar system, which is being transferred to the U.S. Army.

Internships

Encourages qualified students to develop interests in critical skills areas related to our mission, with the ultimate objective of developing our pipeline for our future. Available for Summer, Year Round and Co-op.

Eligibility Criteria

- Min. cumulative GPA (3.0 Undergrad/Grad)
- Have U.S. citizenship for positions that require clearance or as stated in the job posting
- Full-time enrollment status at an accredited college, university, or local high school
- At least 16 years of age

6 Postdoc Opportunities

Key areas for post-docs at Sandia:

- Computer science/Computer Engineering
- Electrical Engineering
- Mechanical Engineering
- High-performance computing
- Microelectronics and microfluidics
- Nanotechnology
- Physics
- Chemistry/ Electro Chem
- Biosciences and biotechnology
- Radiation & electrical sciences
- Engineering sciences
- Pulsed power sciences
- Materials science & engineering

Eligibility Criteria

- A recent PhD (conferred 5 years prior to employment) or the ability to complete all PhD requirements before hire date.

Postdoctoral Fellowships

- Harry S. Truman Fellowship
- Jill Hruby Fellowship
- John Von Neumann

ParaChoice

- What is ParaChoice
- Why do we trust it?
- How is it used

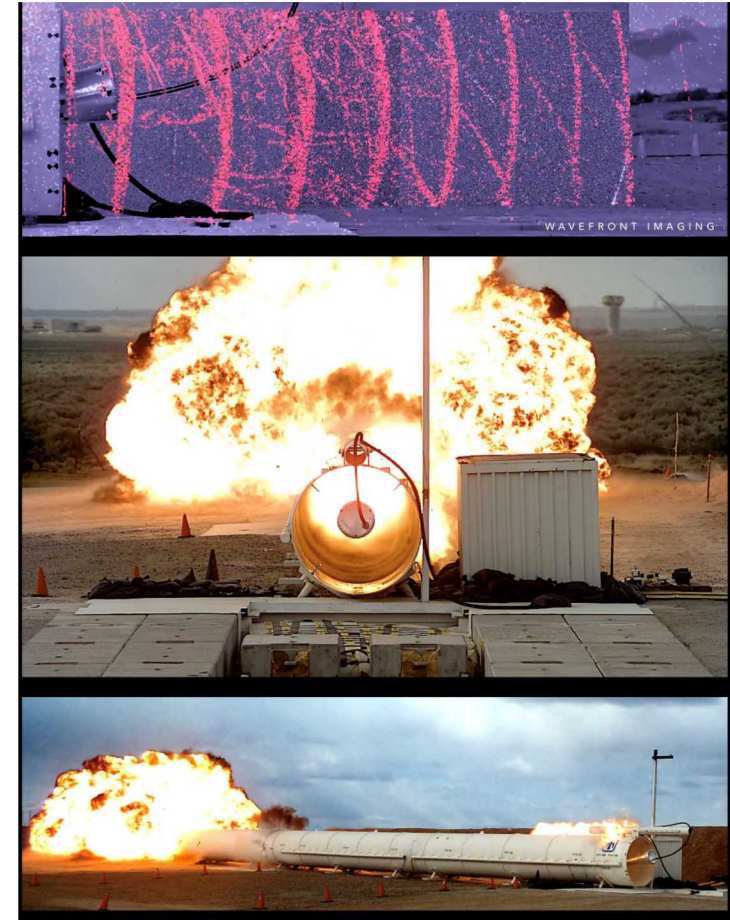

As the nation's NNSA Engineering Lab, Sandia is responsible for a large portion of Stockpile Management

- ❑ NNSA Core mission is to ensure safe secure & reliable nuclear stockpile.
- ❑ Most weapons were produced during 1950s & 1960s
- ❑ The United States Voluntarily ended underground nuclear explosive testing

Sandia provides an opportunity to work on complex multidisciplinary projects, like the Mk21 Fuze.

- ❑ Fuzing means sending the signal to detonate
- ❑ DOD has responsibility of Arming and Fuzing
- ❑ For Safety, Security and Reliability Reasons a drop in replacement is being designed for the Mk21/W87

ParaChoice

- What is ParaChoice
- Why do we trust it?
- How is it used

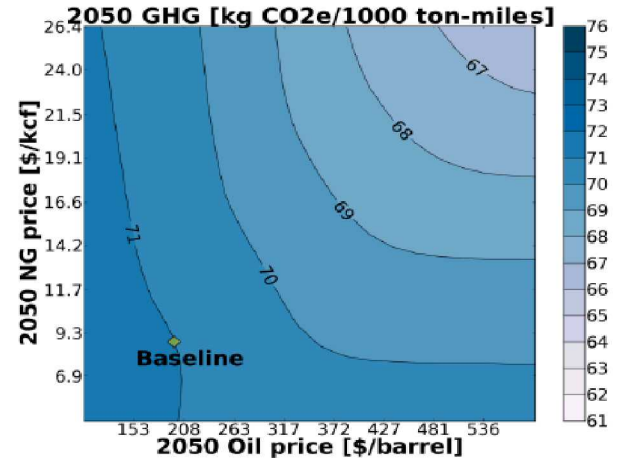

ParaChoice Projects the adoption of new technologies, emissions, and petroleum consumption out to 2050

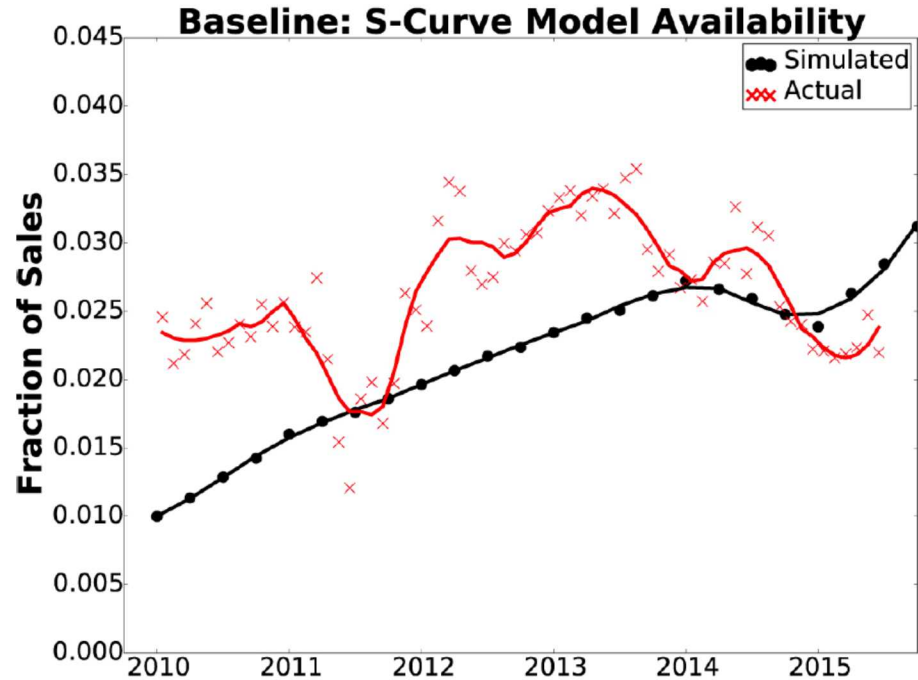

Takes a full system model approach leveraging the interrelated nature and complexity of the transportation space

Understand and Mitigate the inherent uncertainty from data sources and simplifying assumptions

Identifies Trade Spaces Tipping Points and Sensitivities

ParaChoice provides projections not predictions.

Data shown for hybrid LDV.

- Left is S-Curve adoption assumption
- Right is based on historical data

Dip in 2011 attributed to Japanese Tsunami

Simulation under predicts this segment

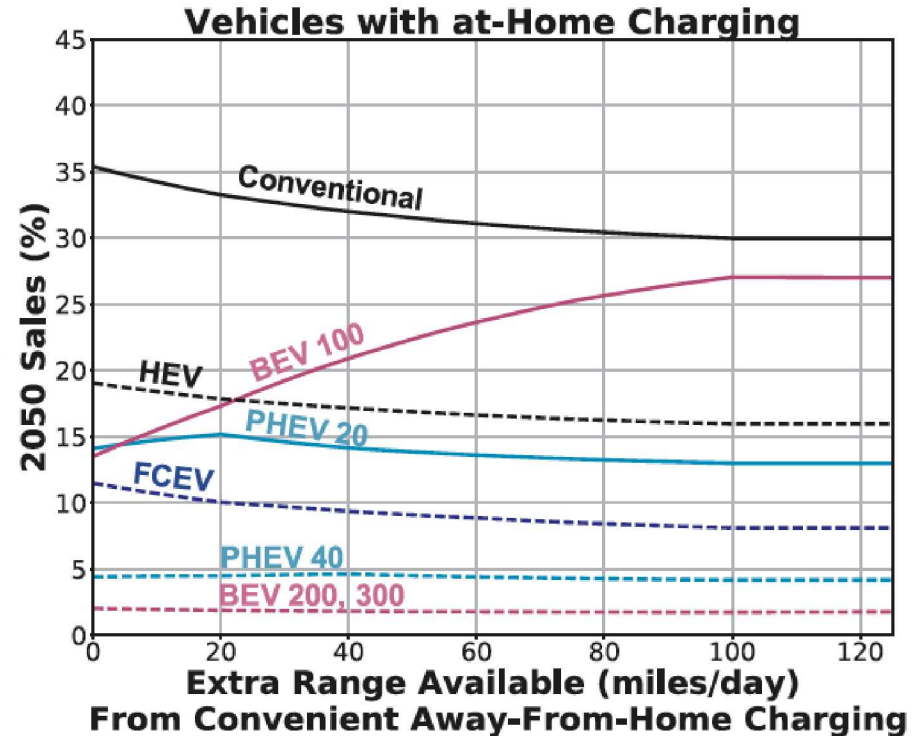

We investigated the effects of Convenient away-from-home charging (CAFHC) to understand the investment opportunity.

Close correlation between being able to charge a PHEV/BEV and purchasing

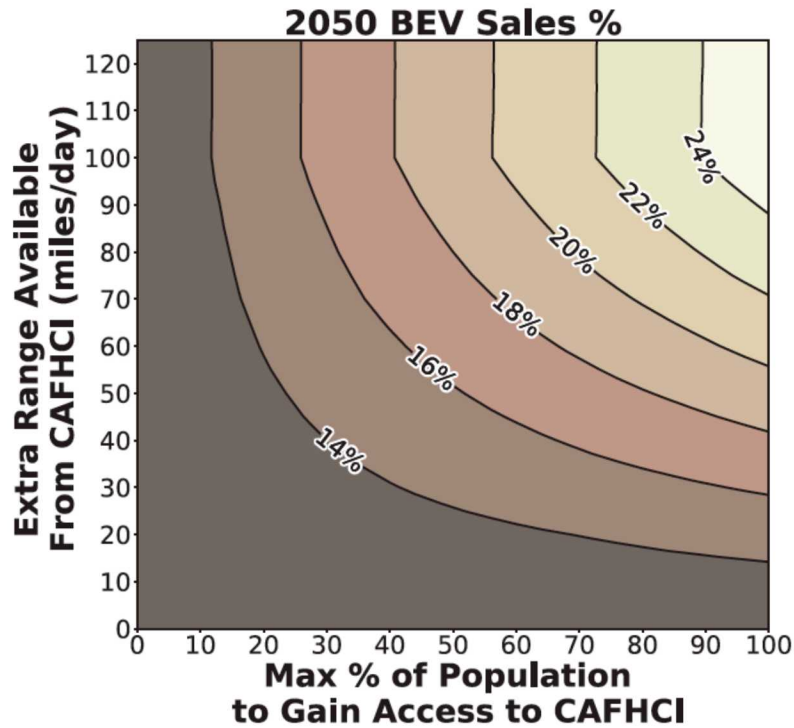

Enabling new infrastructure will therefore need to precede adoption

Infrastructure is a significant financial investment

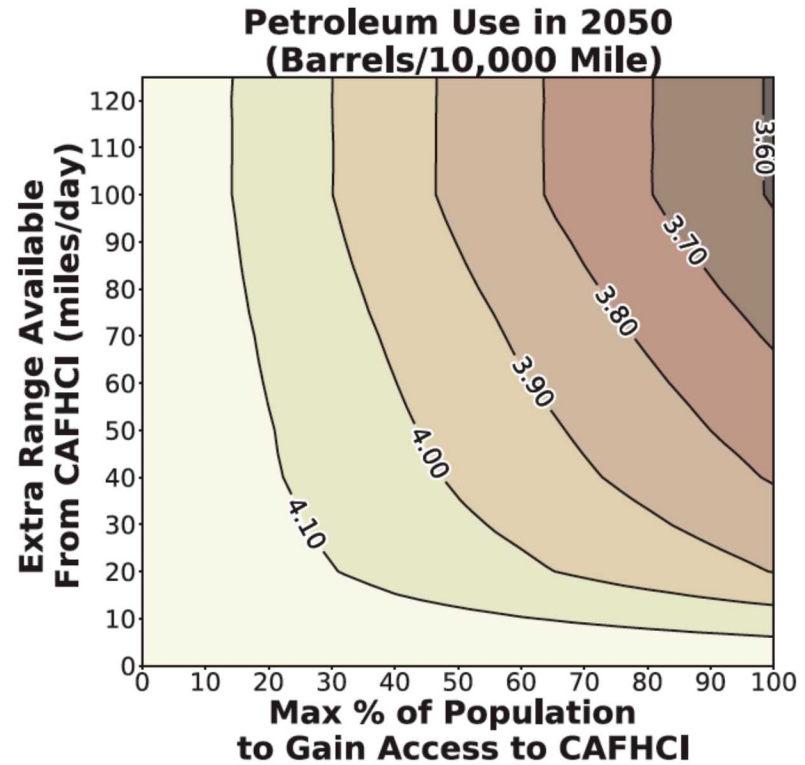

- How much is enough?
- Is there a point of diminishing returns?

ParaChoice captures the value of investments through different metrics.

(a) BEV Sales

(b) Petroleum Use

We have built a stable and respected LDV capability and we have set our sights on doing the same in the HDV segment.

- ❑ Adding Capabilities to an existing framework
- ❑ Taking a deep dive into HDV to find opportunities for analysis

Average annual ton-mileage per vehicle by vocation

Row Categories*

- Energy Sources
- Vehicles
- Fuel Production
- Infrastructure
- Consumers
- Economics

*Total of ~100 data types

Column Headers

- Electricity (Biomass)

Powertrains

- Conventional
- Biodiesel
- CNG
- LNG
- FC
- BE

Vehicles (Class 7 & 8)

- TT- Van Basic
- TT- Van refrigerated
- TT- Dump
- TT- Flatbed/stake /platform
- TT- Tank
- SUT- Van Basic
- SUT- Van Refrigerated
- SUT- Refuse
- SUT- Construction
- SUT- Dump
- SUT- Flatbed/platf orm/stake
- SUT- Tank
- Motorhome
- Bus- School
- Bus- Transit

Summary

National Security mission encompasses nearly all STEM fields

Numerous openings for graduate students and Postdocs

Sandia is hiring for Nuclear Deterrence work like the Mk21 Fuze

Non-nuclear work is available on projects like ParaChoice.

Thank You!
