

End to End Warhead Monitoring

Enabling future arms control initiatives through the development and evaluation of monitoring technologies

By 2016, develop warhead monitoring and chain-of-custody capabilities for end-to-end field demonstrations in support of new arms control commitments.

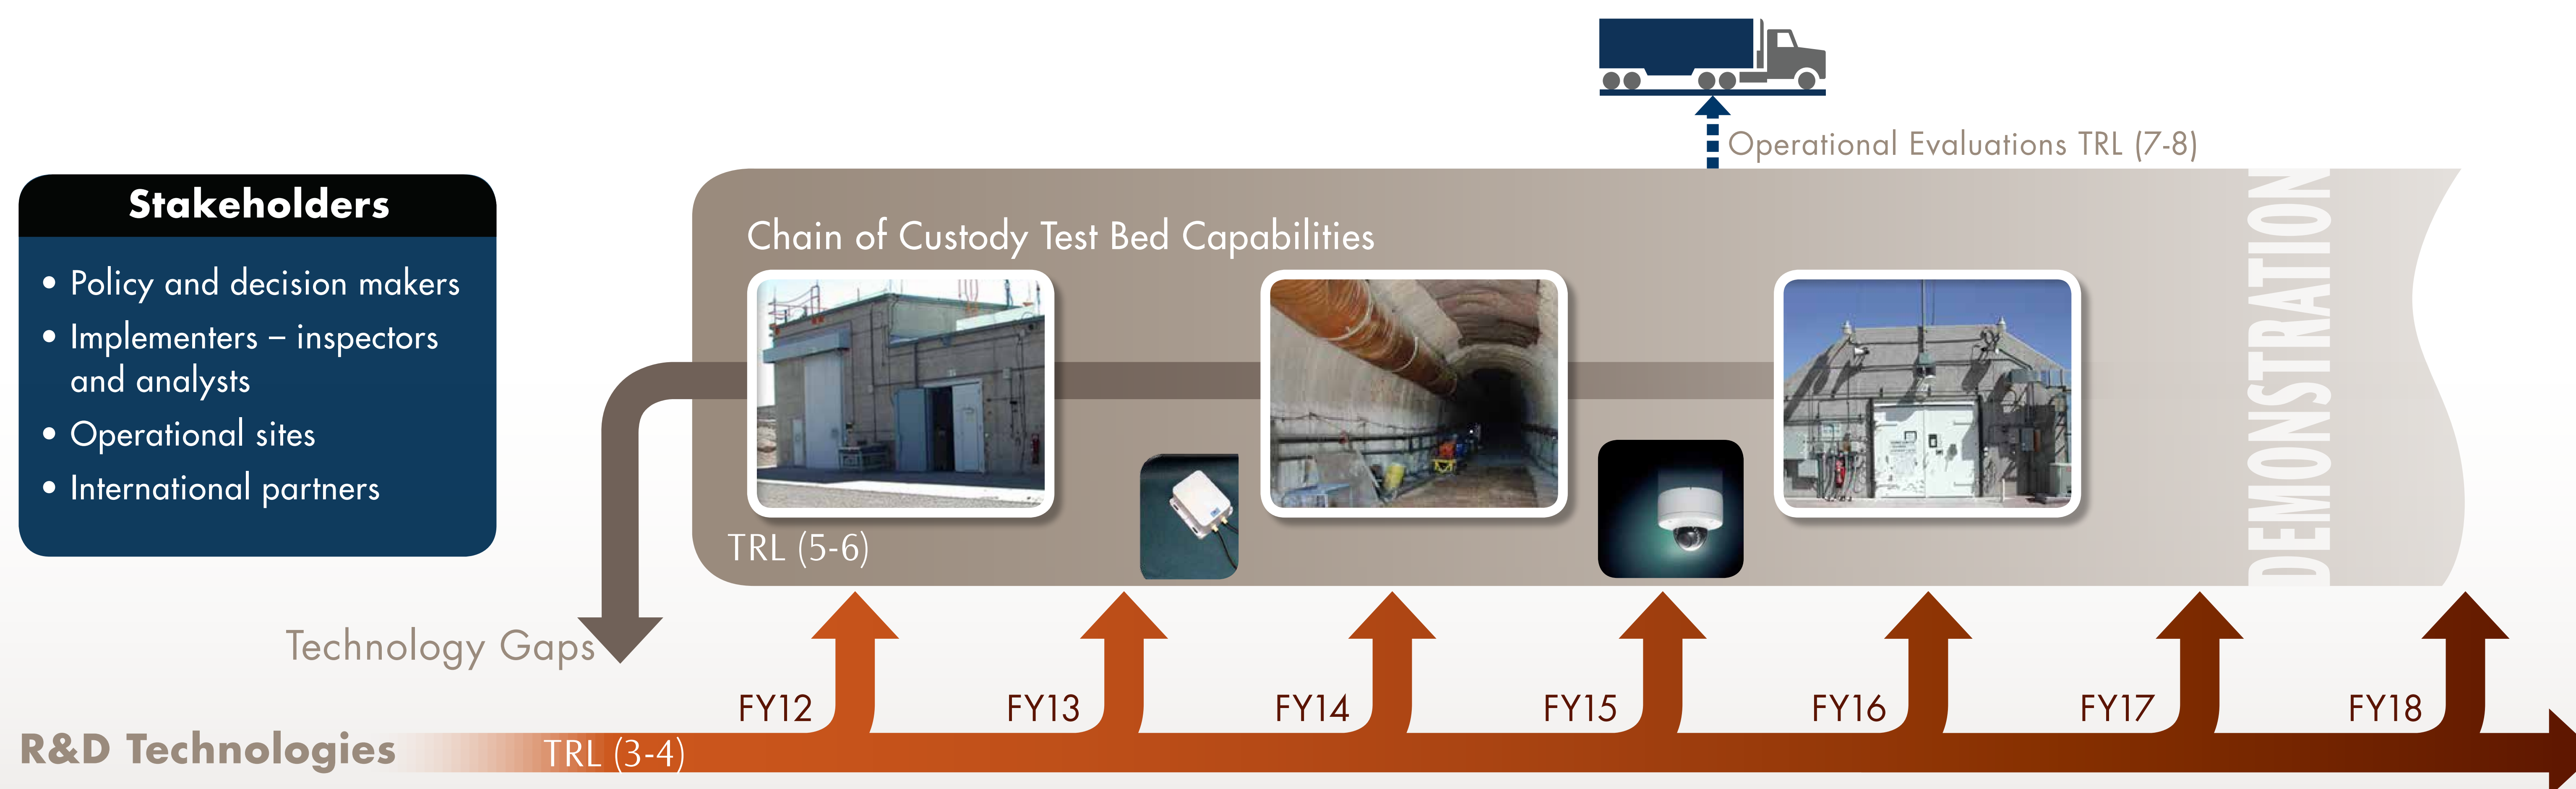

- NNSA Strategic Plan

Potential limits on non-deployed and/or non-strategic nuclear warheads may require new monitoring and verification measures

Challenges:

- Authenticating potential treaty accountable items
- Maintaining accountability while minimizing impact on stockpile sustainment activities
- Protecting sensitive information

Sandia National Laboratories is a multi-program laboratory managed and operated by Sandia Corporation, a wholly owned subsidiary of Lockheed Martin Corporation, for the U.S. Department of Energy's National Nuclear Security Administration under contract DE-AC04-94AL85000. SAND 2012-0000x
