

Andrew Deiters, BA, MA Visual Researcher, adeiters@cinelflix.com, T: 416 531 2500 (ext. 359)  
F: 416 531 6033, www.cinelflix.com, Cinelflix (AS2) Inc., #400- 110 Spadina Avenue, Toronto, SAND2011-5363P  
M5V 2K4, CANADA, has requested an image of a "Bhangmeter" used in the Vela Satellite for a television  
program: William Shatner's "*Weird or What*". Ed Boucheron (5732) has identified two images from  
Sandia's Corporate Image collection—Csandia--that include the Bhangmeter. The bhangmeter is  
discussed on p. 112 of the general history book , Sandia National Laboratories: A History of Exceptional  
Service in the National Interest . The second photo included in this powerpoint (the one with two  
individuals ) is included on p. 111 of the general history book; I do not know if the second image has  
been previously published although it is likely that it appeared in the *Lab News* at some point. Please  
review to confirm that the images and captions can be provided to Dieters and that we can state that a  
bhangmeter is included in the shots. Thank you.

The images/captions to be reviewed  
are on the following 2 powerpoint  
slides:

In the early 1960s, an unidentified individual posed with an artist's rendering of a VELA satellite in space in front of the Vela payload.

In the early 1960's, Robert House and Simon Steely tested the payload for the first VELA Satellite.
