Laboratories**

*Exceptional service
in the national interest*

Sandia

National Laboratories

Sandia grew out of America's World War II atomic bomb development effort. Today, keeping the U.S. nuclear stockpile safe, secure, and reliable remains a major part of Sandia's work. But Sandia's role has evolved to address the more complex national security threats facing our country. Sandia carries out research and development in:

Nuclear Weapons

Supporting U.S. deterrence policy by helping sustain, modernize, and protect the nuclear arsenal.

Defense Systems & Assessments

Supplying new capabilities to our defense and national security communities.

Energy, Climate & Infrastructure Security

Ensuring the stable supply of energy and resources and protection of infrastructure.

International, Homeland, & Nuclear Security

Focusing on the protection of nuclear assets and nuclear materials, and addressing nuclear emergency response and nonproliferation worldwide.

Sandia's Science, Technology, and Engineering foundation enables Sandia's mission through a capable research staff working at the forefront of innovation, collaborative research with universities and companies, and discretionary research projects with significant impact.

Sandia National Laboratories An Overview

Sandia
National
Laboratories

Sandia National Laboratories is a multi-program laboratory managed and operated by Sandia Corporation, a wholly owned subsidiary of Lockheed Martin Corporation, for the U.S. Department of Energy's National Nuclear Security Administration under contract DE-AC04-94AL85000. SAND 2011-????P.
