

Exceptional service in the national interest

Supply Chain Management

Innovative approaches to contracting and sourcing strategies

*“...In my opinion,
you have here an opportunity
to render an **exceptional service in the
national interest.**”*

– **President Harry S. Truman**

in a letter to AT&T President
Leroy A. Wilson, asking Bell Labs to
“accept under contract the direction of
Sandia Laboratory,” May 18, 1949

SUPPORTING OUR MISSION

Sandia was born out of the World War II Manhattan Project that built the first atomic bombs. Its original mission as an ordnance design, testing, and assembly facility quickly grew to include engineering design for nonnuclear components and weapon system integration of the nation’s nuclear weapons. As national security requirements have evolved, so has Sandia’s mission.

While keeping your U.S. nuclear stockpile safe, secure, and effective remains a major element of Sandia’s work, the Labs help solve a broad spectrum of other security issues: preventing the spread of weapons of mass destruction, protecting infrastructure, defending against terrorism, keeping U.S. soldiers safe, and ensuring the stability of energy supplies and other resources.

To help accomplish this, Sandia is dedicated to purchasing products and services that adhere to high quality standards and meet national security missions. We seek to work with companies that share our value of doing business ethically and safely while providing products and services on time and within budget.

Sandia seeks highly motivated, self reliant and collaborative people to work in the cross-functional teams to secure the goods and services we need to effeciently and effectively support our mission.

■ Supply Chain Management

Solving the world's most challenging technical problems requires the support of business and operations professionals.

Our Commitment

Supply Chain Management works to deliver the right thing, to the right place, at the right time, at the right cost, in the right way. We strive to provide innovative, efficient, and sustainable solutions for service delivery, life cycle management, and safety performance.

Our commitment to creating and sustaining a competitive advantage while continuously improving performance supports Sandia's mission to provide exceptional service in the national interest. Supply Chain Management is dedicated to the highest standards of service, conduct, and continuous improvement of our operations.

An Effective Partnership

The Supply Chain Management team partners closely with members of Sandia's scientific, engineering, supply, legal, and financial communities to identify opportunities and challenges that can or should be addressed through the acquisition process. We oversee the administration of high-value and complex contracts from their placement through final closeout. Members of our team create and lead cross-functional teams to plan acquisitions that optimize value to external customers while appropriately allocating and managing risk.

Procurement

Sandia spends more than \$1 billion a year on purchases, with about half of that from small and disadvantaged businesses. We are dedicated to purchasing high quality products and services that meet national security missions.

Logistics

Sandia's Logistic Operations plays a critical role in getting the right thing to the right place. We provide:

- Shipping, packing, storage, and mail service

Exceptional service in the national interest

- Transportation and receiving
- Property management and material reapplication
- Fleet services
- Integrated support to assist internal and external customers

Dedicated members of Sandia’s Supply Chain Management have the opportunity to:

- Develop lasting and meaningful relationships with stakeholders, customers, and members of Sandia’s workforce.
- Manage risks and improve quality through use of our management assurance system.
- Provide excellent customer service that is reliable, predictable and repeatable.

Key skills needed for Supply Chain Management at Sandia

Sandia is rich in opportunities for business support and operations professionals to use their education and experience to build flexible solutions in a dynamic research-and-development environment. Our support and operations personnel partner with internationally recognized scientists and engineers to solve the most difficult problems that threaten the peace and freedom of our nation and the globe. If you are a professional with the following key skills, consider joining Sandia’s Supply Chain Management team.

- Demonstrated skill in conducting research, investigating alternative solutions, and recommending solutions to problems affecting acquisition and business issues
- Strong business acumen and negotiation skills
- Outstanding oral and written communication skills
- Excellent presentation, teambuilding and leadership skills
- Willingness to engage in and resolve conflict
- Ability and willingness to lean into adversity and solve problems
- Ability to use independent judgment and creativity to solve complex business issues
- Ability to organize, prioritize and follow through to completion on multiple tasks
- Ability to successfully manage and complete multiple competing programs and projects
- Ability to influence, motivate and lead others to action with whom you have little or no organizational control; Ability to guide multidisciplinary teams
- Global perspective of business environment and technology.
