

*Exceptional service in the national interest*

**Sandia  
National  
Laboratories**

## CREATE

*A new facility for public-private collaborations to improve U.S. competitiveness and security*

### **CREATE—A Cornerstone of the LVOC Vision**

Aware of the immense benefits of collaborating with partners from industry, government, and academia, Lawrence Livermore National Laboratory (LLNL) and Sandia National Laboratories (SNL) in 2009 launched the Livermore Valley Open Campus (LVOC). Situated on a 110-acre site next to the two labs and central to the innovative hub of the San Francisco Bay Area, LVOC is home to over two hundred lab researchers who are working with visiting collaborators on projects in combustion, cybersecurity, advanced computing, and other key areas.

Modern facilities that can attract an array of new partners are needed to realize the vision of LVOC.

CREATE—Collaboration in Research and Engineering for Advanced Technology and Education—is a cornerstone of these plans. Equipped with over 86,000 gross square feet of contemporary office, light laboratory, and
