

Sandia National Laboratories¹
Proposed Definition for Intrinsic Security
Excerpted from SAND2009-7582

Intrinsic Security – Security that is an integral part of a system from the earliest conceptual design phases, and is included as a top-tier requirement in system design and performance that is considered at the same level as mission functionality, safety, and reliability.

¹ Sandia National Laboratories is a multi-program laboratory managed and operated by Sandia Corporation, a wholly owned subsidiary of Lockheed Martin Corporation, for the U.S. Department of Energy's National Nuclear Security Administration under contract DE-AC04-94AL85000.
