Instructions: Please try and answer all of the questions. However, you may select three questions from #1 - #25 that you do not wish to be graded on. Indicate which of the three you do not wish to be graded by circling the number.

1. If you see the following symbol in the IATA regulations, what does it mean?

2. What does the ★ star symbol at the end of a proper shipping name indicate?
3. What does "n.o.s." stand for?
4. Which classes have no divisions?
5. What are the seven steps of shipping a dangerous good? Briefly (only one or two sentences) describe each.

Step 1 –

Step 2 –

Step 3 –

Step 4 –

Step 5 –

Step 6 –

Step 7 –

6. If column F from the List of Dangerous Goods contains “E0” what does that mean?
7. If you saw the number UN1744, what is the proper shipping name for that dangerous good?  
(Which section of the regulations would you turn to, to find it?)
8. What does the “4G” mean on the UN Specification mark?
9. What is the difference between “shipping” and “transport”
10. If someone brought a test tube of a biological substance to you and asked you to ship it. What kind of information would you need to collect from them in order to “classify” it.
11. What are the six things that must be marked/labeled on an infectious substance package?

12. Write the three UN ID numbers and proper shipping names considered “infectious substances”

13. What is the difference between IATA and ICAO

14. Why is the training we teach focused on the IATA regulations?

15. What is an “Operator”?

16. How often must an instructor teach or attend a dangerous goods training program in order to remain eligible to continue teaching?

17. TRUE or FALSE. You **must** have the Name and Telephone number of a person responsible marked on the outside of a category A package?

18. TRUE or FALSE. You **must** have the Name and Telephone number of a person responsible marked on the outside of a category B package?

19. TRUE or FALSE. You **must** have the Name and Telephone number of a person responsible marked on the outside of an “Exempt Human Specimen” package?

20. How many copies of the shipper's declaration do you need to prepare for a shipment of Category B infectious substances?

21. What does the phrase "All packed in one" mean?

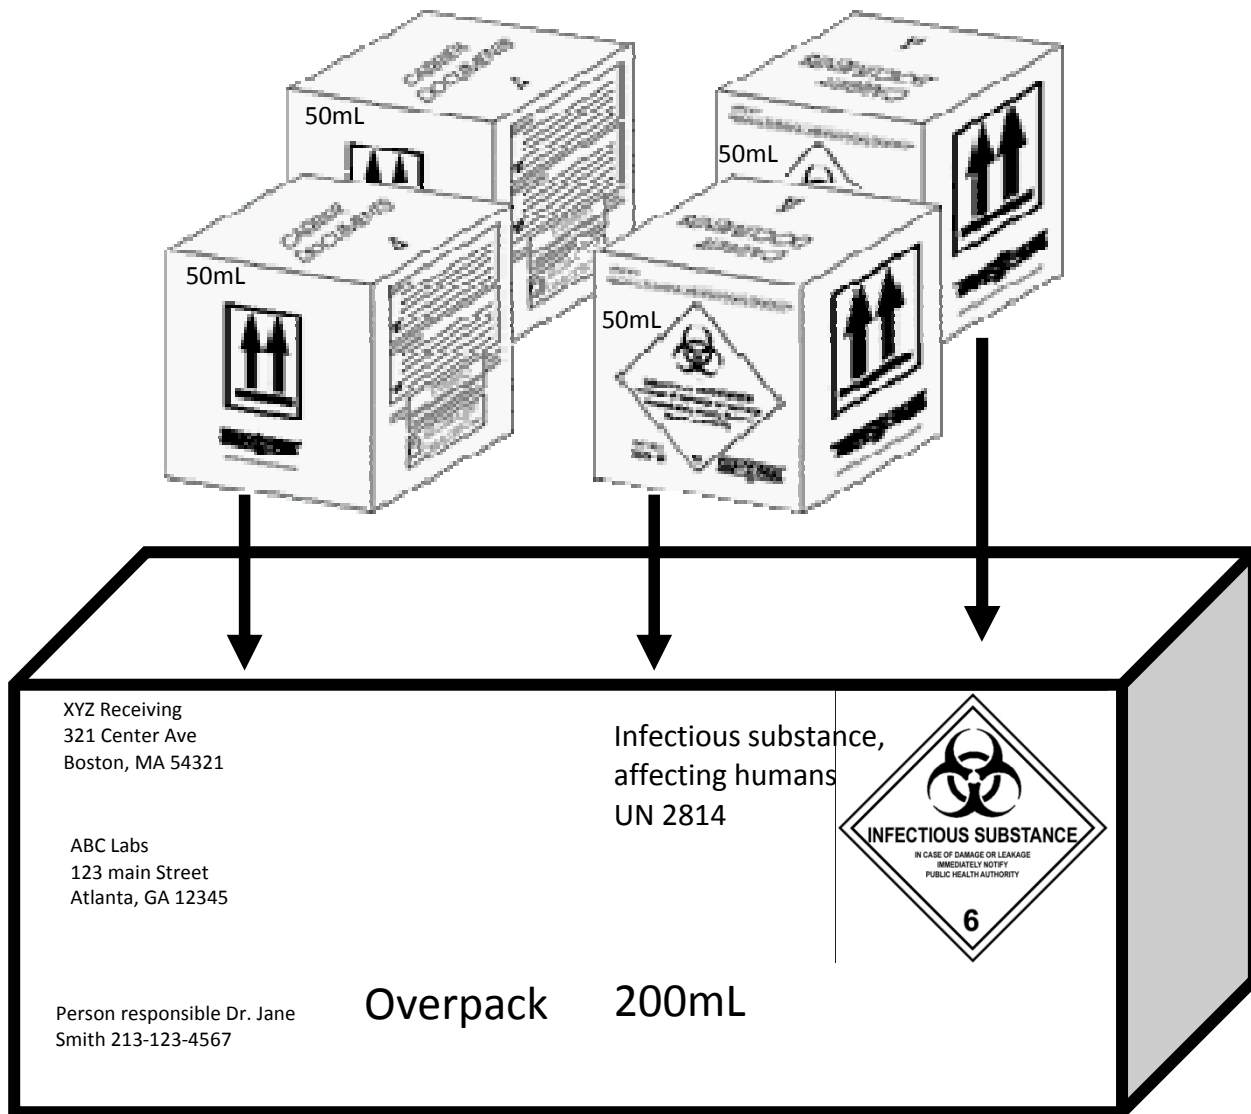

22. How many **hazard labels** will be necessary for the following shipment? Explain your decision:

Two packages containing B. anthracis cultures, one package containing a culture of Foot and Mouth disease virus and one package containing category B infectious substance. These four packages are placed into a single refrigerated overpack filled with dry ice.

23. What is a UN Specification mark and what does it signify?

24. What three requirements must the 24 hour emergency number meet?

25. Study the picture below. Is this shipment allowed on a passenger aircraft?

**Check the following proper shipping names. If they are correct, leave it be. If there are errors, fix them.**

UN 2841 INFECTIOUS SUBSTANCE, AFFECTING HUMANS

Infectious substances affecting animals only – UN2900

UN 3373 Biological substance, cat. B

UN1845 Solid Carbon Dioxide

UN 3373 Infectious substances, category B

Infectious substances, effecting humans – UN2814

UN2900 Infectious substance, affecting animal

Un 1845 Dry ice, Solid

UN 3245 Genetically modified Escherichia coli

Infectious substances Affecting human – UN2900

un 3733 – Biological substance, affecting humans

**The following pages came from shipping exams completed by students. Grade these exams. Find and highlight any mistakes and subtract points from these exams for incorrect answers. The shipper's dec is worth 20 points and the marking/labeling exercise is worth 15 points.**
