

Securing America's Energy Future

Impacting America's energy security through discovery, innovation and delivery of resilient energy systems.

Renewable Resource Development

Reducing dependence on foreign oil through renewable resources

Climate Change

Mitigating and adapting to changes in climate

Infrastructure Protection

Protecting infrastructure against terrorists and natural disasters

Science and Discovery

Assuring energy security through innovative technologies

Sandia National Laboratories

Sandia is a multiprogram laboratory operated by Sandia Corporation, a Lockheed Martin Company, for the United States Department of Energy's National Nuclear Security Administration under contract DE-AC04-94AL85000. SAND No. 2009-xxxxP
