

Border Management Systems Model

**INTERNATIONAL BORDER
MANAGEMENT SYSTEMS**

Sandia is a multiprogram laboratory operated by Sandia Corporation, a Lockheed Martin Company,
for the United States Department of Energy's National Nuclear Security Administration
under contract DE-AC04-94AL85000.

Why utilize a systems model?

- All levels of border security policy, planning, and operations need to be considered as an integrated, interactive whole
- What happens in one area inevitably impacts another
- No person or organization operates in a vacuum
- The systems model provides an integrated framework by which we can consider all of the components of border management

Model Mission Statement

Strategically deploy a system of personnel, physical elements, and information systems to implement border policies regulating the flow of people and goods across national boundaries, and defending against national security threats.

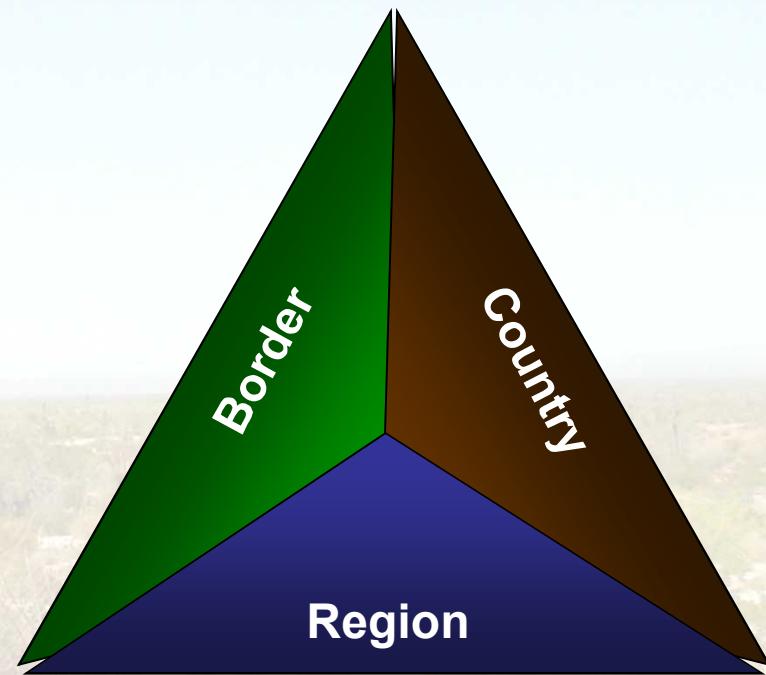

Model Principles

- **Command Structure Clarity**
Clear top-down articulation of policies, postures, and priorities
- **Information-Driven Operations**
Operators should be informed by timely intelligence and event analysis
- **Deterrence through Enforcement and Defense-in-Depth**
Enforcement and defensive measure send a message to challengers and adversaries
- **Technology Deployment as a Force Multiplier**
Technology is not a substitute for human resources, but can enhance capabilities
- **Flexibility to Address Dynamic Challenges**
The system must respond and adapt to ever growing and adapting challenges

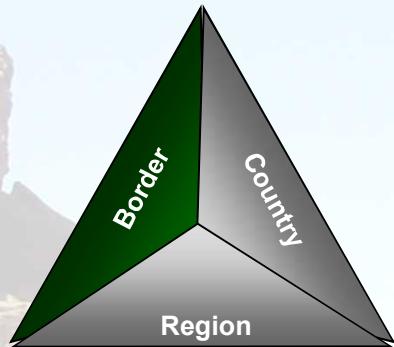

INTERNATIONAL BORDER
MANAGEMENT SYSTEMS

Border Management Systems Model

Border System Elements

Points of Entry
and areas in
between in the
domains of

- Land
- Water
- Air

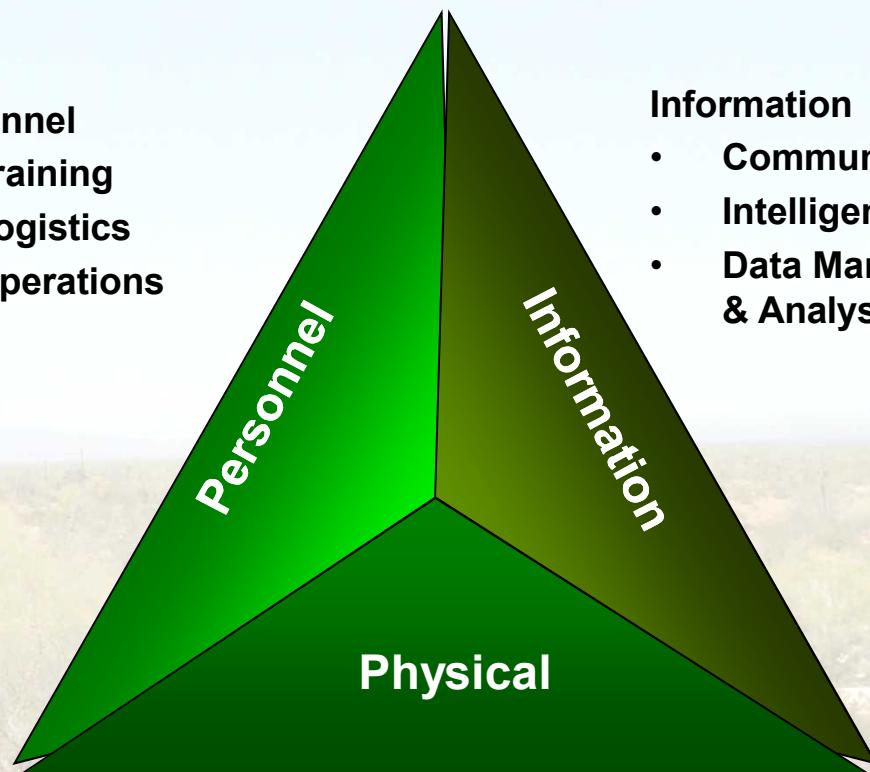

Personnel

- Training
- Logistics
- Operations

Information

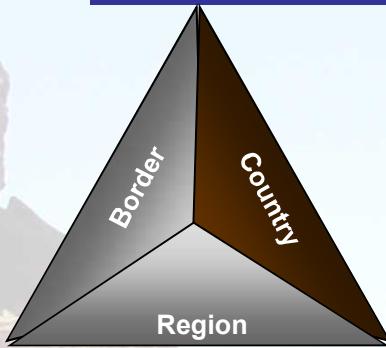

- Communications
- Intelligence
- Data Management & Analysis

Physical

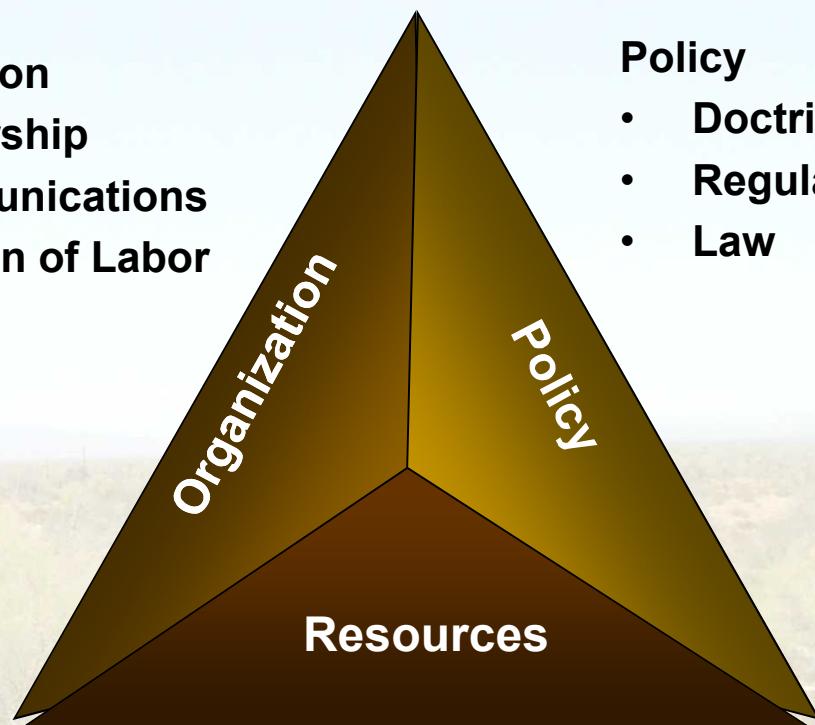

- Infrastructure
- Equipment & Technology
- Logistics

Country System Elements

Organization

- Leadership
- Communications
- Division of Labor

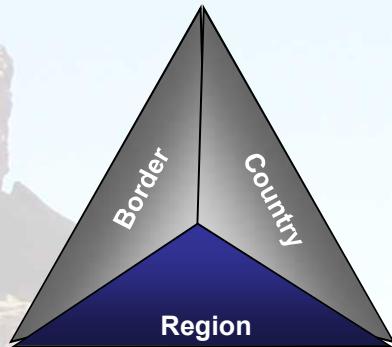

Policy

- Doctrine
- Regulations
- Law

Resources

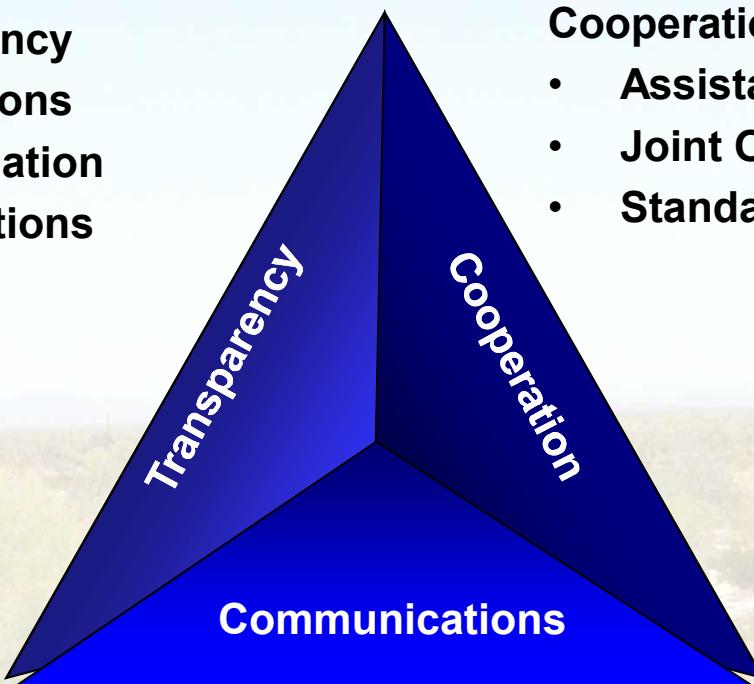

- Financial
- Technical
- Human

Regional System Elements

Transparency

- Intentions
- Information
- Operations

- Communications
- Operational
- Bilateral
- Multilateral

- Cooperation
- Assistance
- Joint Operations
- Standards

Discussion

- What defines your border management system?
Civilian, Military, Both?
- What, in your opinion, would you like to do more of, better, or differently to get the outcomes you desire at the border?
