

SAND2008-3318P

## miniSAR 2008 Overview

*Quadrature digital waveform synthesizer and digital receiver  
-- another facet  
of MiniSAR technology development*

*Crevasses located with AntarcticaSAR remote sensing radar  
were barely visible to the naked eye*

*"AntarcticaSAR" is one of several versions  
of MiniSAR that have been developed  
for various applications*

Sandia National Laboratories

Sandia is a multiprogram laboratory operated by Sandia Corporation, a Lockheed Martin Company,  
for the United States Department of Energy's National Nuclear Security Administration under Contract DE-AC04-94AL85000.
