

Sandia's Electronics Stewardship

Another Year of Progress

Ralph Wrons, P.E.
Pollution Prevention (P2) Program
Sandia National Laboratories

Sandia is a multiprogram laboratory operated by Sandia Corporation, a Lockheed Martin Company,
for the United States Department of Energy under contract DE-AC04-94AL85000.

Credit to Northeast Recycling Council

Overview

- Federal Electronics Challenge (FEC)
- Operations
- What is EPEAT?
- FEC Goals for FY08

Federal Drivers

- Executive Order 13423 (January 2007)
 - Requires 95% of applicable computers purchased to be \geq EPEAT-Bronze
 - Enable Energy Star features on 100% of applicable equipment
 - Recycle 100% of electronics equipment
- DOE Order 450.1a
 - Specifies electronics stewardship and adopted the language in E.O. 13423

Federal Electronics Challenge

- EPA administered program

- Applies to procurement, operations and end-of-life disposition
 - Set goals annually
 - Submit annual report
 - Can apply for awards (bronze, silver, gold)
-

FEC participation

- SNL/NM Joined February 2006
 - First year goals:
 - ❌ – Vendors supply equipment with “Sleep” feature enabled
 - ✅ – “Sleep” features enabled on 100% of existing monitors
 - Default to 2-side printing at copiers and network printers (ongoing)
 - ✅ – Recycle 100% of non-reusable computers
-

FEC participation

- 
- Second year goals:
 - ❌ – Evaluate total cost of ownership for new purchases
 - ❌ – Establish & promote policy to power off PCs when employees go home (carry over to FY08)
 - ❌ – Reuse or refurbish 25% of equipment (carry over to FY08)
-

Operations

- 
- Network-based enterprise delivery of Common Operating Environment (COE) software programs
 - Immense paper and plastic savings on reduction of boxed manuals and software.
 - At end of FY06, deployed new program to activate “sleep” features on network-connected monitors
 - Within first week, 9300 computer stations impacted
 - Periodic checks (September & November 2007, February 2008) – almost 20,000 monitors enabled, with ~99% success rate.
 - Estimated annual energy savings of \$41,000
-

What is EPEAT[®]?

Electronic Product Environmental Assessment Tool

A comparison purchasing tool for computer desktops, laptops and monitors based on their environmental attributes.

What is EPEAT[®]?

EPEAT was developed over an intensive three year, EPA-funded process that included the following participants:

- Purchasers
- NGOs
- Governments
- Recyclers
- Academia
- **Manufacturers** – Dell, HP, IBM, Apple, Panasonic, Sharp, EIA

What is EPEAT[®]?

- 
- 1) Set of voluntary environmental performance criteria
 - IEEE 1680 American National Standard for the Environmental Assessment of Personal Computer Products
 - 2) System for identifying and verifying products meeting the criteria
 - 3) Only applies to desktops, monitors and laptops
 - www.epeat.net
-

What is EPEAT[®]?

Environmental Performance Categories

- Environmentally Sensitive Materials
 - Materials Selection
 - Design for End of Life
 - Product Longevity/Life Cycle Extension
 - Energy Conservation
 - End of Life Management
 - Corporate Performance
 - Packaging
-

What is EPEAT[®]?

EPEAT Performance Tiers:

Product meets all required criteria.

Product meets all required criteria plus at least **50%** of the optional criteria that apply to the product type being registered.

Product meets all required criteria plus at least **75%** of the optional criteria that apply to the product type being registered.

What is EPEAT[®]?

Re: Environmentally Sensitive Materials

Mandatory

- Comply with European RoHS Directive, restricting:
 - Cadmium, Mercury, Lead, Hexavalent chromium
 - Selected brominated flame retardants

Optional

- Additional limits on mercury for light sources
- Batteries free of lead, cadmium & mercury
- Large plastic parts free of PVC

RoHS = Restriction of Hazardous Substances in electrical and electronic equipment
(www.rohs.gov.uk)

What is EPEAT[®]?

Re: Materials Selection

Mandatory

- Declare post-consumer recycled plastic content
- Declare renewable/biobased plastic materials content

Optional

- Meet minimum post-consumer recycled plastic content
 $\geq 10\%$ or $\geq 25\%$
 - Meet minimum renewable/biobased plastic content
 $\geq 10\%$
-

What is EPEAT[®]?

Re: Design for End of Life

Mandatory

- Design case to be easily disassembled
- Label plastic components by type
- Make it easy to identify & remove components with hazardous materials

Optional

- Reduce number of plastic types used
 - Ensure 90% of product is reusable or recyclable
-

Pitch to the Preferred Systems Administrator

- 
- SNL has a huge environmental impact through computer purchasing
 - SNL's money (combined with all Federal money) can drive economic change
(Send "green is good" message to manufacturers)
 - Specifying EPEAT can result in:
 - Less hazardous materials coming onsite
 - Less lifetime energy consumption
 - Improved end-of-life disposition
 - Little to no price premium for EPEAT
-

Silver is the new Standard

- 
- EPEAT Silver is now minimum for all models approved by PSA for JIT supplied computers & monitors.
 - Including EPEAT preference in contracts:
 - TIG (Dell) Contract - *Complete 12/06*
 - Holmans (HP & Apple) Contract
-

E-scrap generation

Reuse and Recycling

- 
- Our documentation on reuse indicated only 1%
 - Pursuing the data from NWIS & Reapp
 - Recycled 136.3 mT in FY07
 - Recycled ~70 mT thus far in FY08
 - Last shipment of 66,000 pounds 50% greater than previous
-

Imaging Equipment

- 
- Working on the concept of “green” printer attributes
 - Met with JIT buyers last fall, and subsequently two of the suppliers
 - Analysis of purchases indicates majority of models available on JIT:
 - Energy Star compliant and
 - could have duplexing capability
-

Instructions to Save Energy and Paper

- Fact sheet distributed to department secretaries
 - Energy Star
 - Duplexing
 - Recycling of consumables

ENVIRONMENTAL COPIER OPTIONS

*Automatically Save
Energy and Paper*

These steps are based on the Konica 7145. While every model is different, the buttons and options are generally similar between models.

Save Energy ...by activating <i>Energy Star features</i>	Save Paper ...by activating <i>duplex copying features</i>
<p><i>Press:</i></p> <ol style="list-style-type: none">1. Help2. Key-Op mode3. "1. System/copier"4. Down Arrow5. "11. Power Save"6. Under "Auto Low Power"<ul style="list-style-type: none">▪ Press "30 Min"7. Under "Auto Shut off"<ul style="list-style-type: none">▪ Press "60 Min"8. OK9. Return10. Return	<p><i>Press:</i></p> <ol style="list-style-type: none">1. Help2. Key-Op mode3. "1. System/copier"4. "2. Copier Initial"5. "1. Copy mode"6. 1-27. OK8. Return9. Return10. Return

Please recycle spent copier toner bottles in the nearest plastic beverage recycling bin and the cardboard packaging at the nearest site for cardboard.

FEC participation

FY08 goals:

- Pursue 98% EPEAT compliance with purchases of applicable office electronics products
- Develop and maintain a system for tracking the percentage of existing electronic equipment that is reused internally
- Conduct at least one employee training activity on energy conservation for office equipment
- Establish & promote a policy or guidance addressing the use of duplex printing & copying

Have applied for FEC Bronze
