

Sandia National Laboratories

Ongoing Strategic Relationships Help Meet Evolving Challenges

Enhancing National Security

Miniature synthetic aperture surveillance radar flies on a Lockheed Martin unmanned vehicle.

Customers and partners invest to leverage development of Sandia technologies, information, and products for national security and commercial applications.

Regional Economic Development

Advent Solar's 25MW production facility in Albuquerque will employ approximately 300 people.

Support for Small Business

Tom Swann, president of E M Optomechanical, Inc., demonstrating the OPTOPro 3D MEMS Profiler.

Technology at Work

Mike Dinallo and Larry Schneider use the PASD diagnostic on a wiring bundle in the cockpit of a retired Boeing 737 at Sandia's FAA Airworthiness Assurance Nondestructive Inspection facility.
