refinle@sandia.gov; acsun@sandia.gov
<http://www.sandia.gov>**

Sandia is a multiprogram laboratory operated by Sandia Corporation, a Lockheed Martin Company, for the United States Department of Energy's National Nuclear Security Administration under contract DE-AC04-94AL85000.

Who Are We? <http://www.sandia.gov>

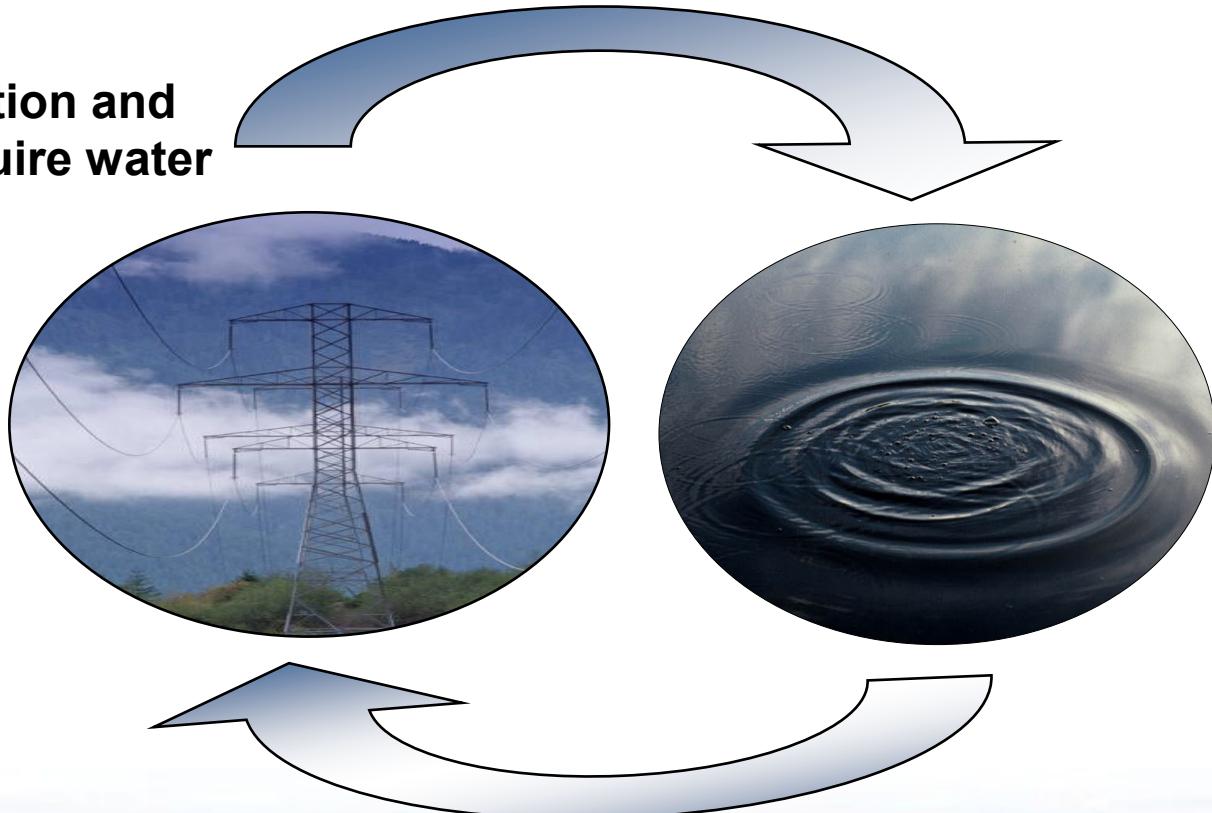

Sandia National Laboratories serve the US Government with:

- Security and reliability of US nuclear weapons
- Advance defense systems
- Nonproliferation
- Homeland security
- Advanced technologies to assure energy security, safety and sustainability
- Advanced technologies to assess infrastructure safety, security, and sustainability.

Energy and Water are Coupled

Energy production and generation require water

Water pumping, treatment, and distribution require energy

Sandia Water Initiative <http://www.sandia.gov/water>

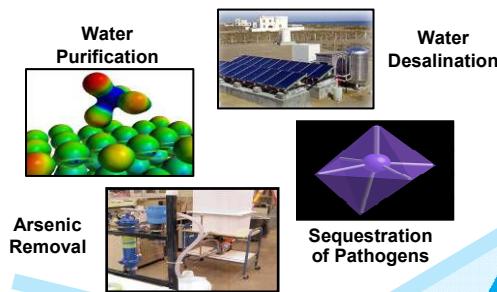

- Increase the safety, security and sustainability of water infrastructure through the development of advanced technologies that create new water supplies.
- Decrease demand through water-use efficiency.
- Provide decision-informing tools to the institutions responsible for balancing supply and demand.

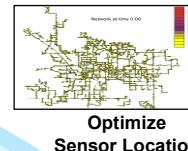

Safety, Security, and Sustainability achieved through **Advanced Technologies**

WATER TREATMENT

Volatile Compounds Sensor

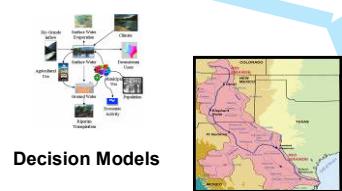

REAL-TIME MONITORING

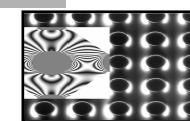

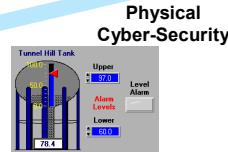

Preconcentrator for Live Bacteria

WATER MANAGEMENT MODELING

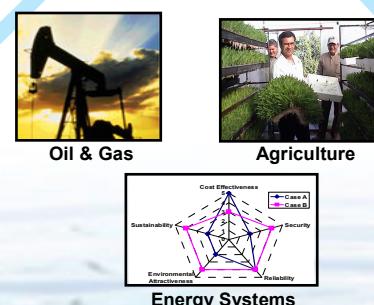

Safety
Sustainability
Security

WATER INFRASTRUCTURE SECURITY

Water-Borne Pathogens

Contaminant Transport Simulation

CRITICAL WATER INTERDEPENDENCIES

Saudi Arabia Water Program

*Saudi Arabia is a
recognized world
leader in desalination
technologies.*

*Sandia National Laboratories is
a recognized leader in
delivering advanced technology
solutions to serve US National
Security Interests.*

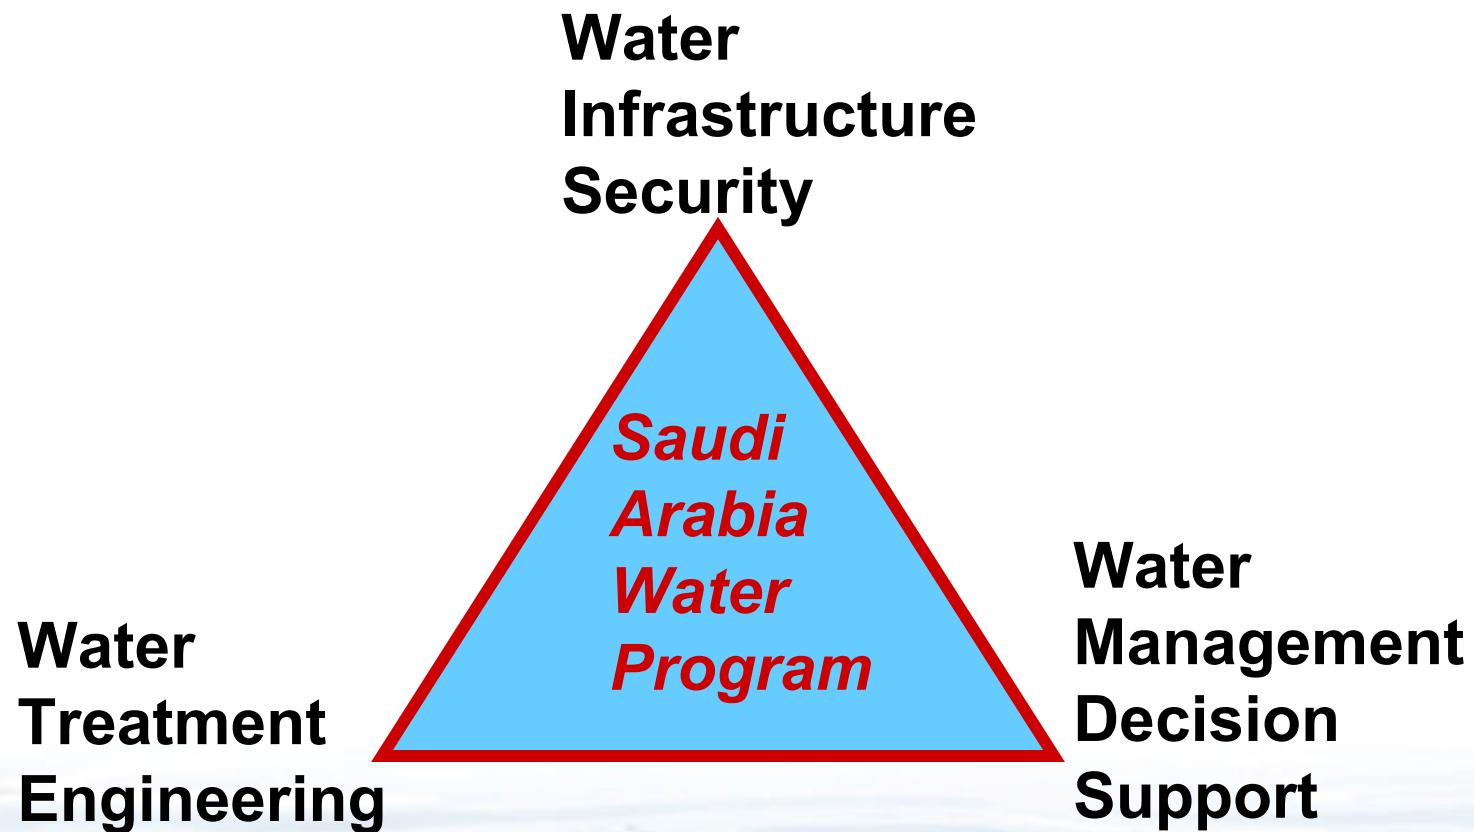

Objective: Achieve security and sustainability of
Saudi Arabia's water supply while maintaining
leadership in advanced desalination technologies.

Program Themes

Water Infrastructure Security

- **Assessment of critical water infrastructure.**
- **Robust water design of future water infrastructure.**
- **Contaminant warning system design and sensor distribution.**

Water Treatment Engineering

- Develop advanced technologies for pretreatment to reduce membrane fouling.
- Concentrate minimization through electrodialysis to maximize water reuse.
- Boron removal technology for impaired water.

Water Management Decision Support

- **Use of computer tools to shorten design-to-delivery water treatment cycle.**
- **System dynamics to economize groundwater consumptive use for agriculture.**
- **System dynamics to optimize interdependencies between energy and water infrastructure.**

Implementation Grid – Water Security

Task	Duration	Education	Assessment/Calibration	Technology Transfer
Infrastructure Assessment	3 yrs	SA Trains Sandia on Existing IF. Sandia Trains SA Engineers & Scientists on Algorithms.	Sandia Builds Prototype and Calibrates.	SA Owns and Operates
Infrastructure Design	3 yrs	Sandia Trains SA Engineers & Scientists	Sandia/SA Assesse Demand, Sandia Builds Prototype and Calibrates.	SA Owns and Operates
Warning Systems	3 yrs	Sandia Trains SA Engineers & Scientists.	SA and Sandia build, test, calibrate.	SA Owns and Operates

Implementation Grid – Water Treatment

Task	Duration	Education	Assessment/Calibration	Technology Transfer
Advanced Technology	3 yrs	Sandia Surveys options. Sandia Trains SA Engineers & Scientists	Sandia/SA Build Prototype and Test.	SA Owns and Operates
Concentrate Minimization	2 yrs	Sandia Trains SA Engineers & Scientists	Sandia/SA Build Prototype and Test.	SA Owns and Operates
Boron Removal	2 yrs	Sandia Trains SA Engineers & Scientists.	Sandia/SA Build Prototype and Test.	SA Owns and Operates

Implementation Grid – Decision Support

Task	Duration	Education	Assessment/Calibration	Technology Transfer
Treatment Options	3 yrs	SA trains Sandia on existing process flow. Sandia Trains SA Engineers & Scientists. SA collects data.	Sandia Builds and Calibrates Tool.	SA Owns and Operates
SD for Agriculture	2 yrs	SA presents historical data. Sandia Trains SA Engineers & Scientists	Sandia Builds and Calibrates Tool.	SA Owns and Operates
SD for Energy-Water	2 yrs	SA presents historical data. Sandia Trains SA Engineers & Scientists	Sandia Builds and Calibrates Tool.	SA Owns and Operates

Why Us?

- **Sandia has world-class scientists and engineers (over half of staff have advance degree).**
- **Sandia is a multi-disciplinary laboratory that maintains world-class facilities and computers.**
- **Sandia is located in New Mexico and in California, heart of Arid Region of Southwestern United States.**

Thank You
