IMPORTANT NOTICE

This forecast of prime and subcontracting opportunities with the U.S. Department of Energy and its management and operating contractors and environmental restoration and waste management contractors, is the Department's best estimate of small, small disadvantaged and women-owned small business procurement opportunities for fiscal year 1996. The information contained in the forecast is published in compliance with Public Law 100-656, "Business Opportunity Development Reform Act of 1988." It is not an invitation for bids, a request for proposals, or a commitment by this department to purchase products or services. Each procurement opportunity is based on the best information available at the time of publication and may be revised or canceled.

FORECAST OF CONTRACTING AND SUBCONTRACTING OPPORTUNITIES

INTRO

Welcome to the U.S. Department of Energy's Forecast of Contracting and Subcontracting Opportunities. This forecast, which is published pursuant to Public Law 100-656, "Business Opportunity Development Reform Act of 1988," is intended to inform small business concerns, including those owned and controlled by socially and economically disadvantaged individuals, and women-owned small business concerns, of the anticipated fiscal year 1996 contracting and subcontracting opportunities with the Department of Energy and its management and operating contractors as well as with its environmental restoration and waste management contractors. This document will provide the small business contractor with advance notice of the Department's procurement plans as they pertain to small, small disadvantaged and women-owned small business concerns.

Opportunities contained in the forecast support the mission of the Department, to serve as advocate for the nation's energy production, regulation, demonstration, conservation, reserve maintenance, nuclear weapons and defense research, development and testing, when it is a national priority. The Department's responsibilities include long-term, high-risk research and development of energy technology, the marketing of Federal power, and maintenance of a central energy data collection and analysis program. Each fiscal year, the Department establishes contracting goals to increase contracts to these concerns and meet our mission objectives.

The Office of Small and Disadvantaged Business Utilization (OSDBU), organizationally located in the Office of Economic Impact and Diversity, develops the forecast each fiscal year to facilitate small business marketing to the Department and to comply with the law. For additional information on marketing to the Department and to provide suggestions for future forecasts, interested small businesses should contact the OSDBU at (202) 586-7377.

HOW TO USE THE FORECAST

The Forecast has four sections:

- 1) Procurement Opportunities by Standard Industrial Classification (SIC) Code;
- 2) Prime Contracting Opportunities with Headquarters and Field Offices;
- 3) Subcontracting Opportunities with Management and Operating Contractors and Environmental Restoration and Waste Management Contractors; and the
- 4) Directory of Small Business Program Managers.

Procurement opportunities are arranged both numerically by SIC code, as well as by office, for the convenience of the small business concern.

Prime contracting opportunities are those anticipated contracts which will be awarded by a departmental (Federal Government) office. Subcontracting opportunities represent anticipated contracts which will be awarded by a major departmental contractor—a management and operating contractor, referred to as M&O, or an environmental restoration and waste management contractor (ERMC). A substantial amount of the Department's funds is awarded by its M&Os. As such, inclusion of M&O and ERMC subcontracting opportunities in this forecast presents a more comprehensive display of business opportunities with the Department.

Each contracting and subcontracting opportunity contained in this document provides the following information to the reader:

Office: name of the departmental office initiating the procurement.

Procurement Method: one of several procurement methods available to small, small disadvantaged and women-owned small business contractors. A listing of procurement methods can be found in the section entitled "Forecast Features."

SIC Description: Industry description listed in the Standard Industrial Classification Manual. (See next page for a discussion of the SIC codes).

Description of Work: a brief description of the service or product being procured. Some descriptions may contain the abbreviation "N.E.C." which means "Not Elsewhere Classified."

Dollar Range Minimum/Maximum: estimated dollar range of the procurement, which generally is based on past procurement records and/or current cost data. Since it is a projection, it is subject to revision.

M&O/ERMC: name of the M&O or ERMC contractor initiating the subcontracting opportunity.

Contact: name of a point of contact is provided for discussion about a particular contracting or subcontracting opportunity.

Address and telephone number: address and telephone number for the point of contact.

Quarter Firm Identified: This number refers to the Federal Government's fiscal year quarters. (The Federal Government fiscal year begins October 1.) Quarter Firm Identified pertains only to noncompetitive procurement methods, e.g. 8(a) set-aside. This category informs the prospective contractor of the quarter the Department will begin identifying firms technically capable of performing the work.

Quarter PR Issued: This category also refers to the Federal Government's fiscal year quarter in which the Department will issue the procurement request (PR). Such information should be helpful to small firms seeking competitive procurements that are set aside for small businesses, as it provides a time frame for requesting a copy of the solicitation or for perusing the Commerce Business Daily.

SIC CODES

The SIC code is the industry designation proposed by the program or contracting office, or the Small Business Administration (SBA). It is a statistical classification, compiled by the Office of Management and Budget, which defines industries in accordance with the composition and structure of the economy. Each SIC code has a corresponding small business size standard.

Agencies also use SIC codes to determine the eligibility of firms to be considered for procurements set-aside exclusively for small businesses. Inclusion of SICs in this publication is intended to be helpful to small business concerns, particularly 8(a) firms as they are restricted to performing work in specific SIC codes. However, small business concerns are advised that the SIC codes contained in this forecast are proposed and may not represent the final SIC determination. Final SIC determinations are made by the contracting officer, and in the case of an 8(a) procurement, by the contracting officer and the SBA.

Additional Information

For additional copies of the Forecast, locations of departmental offices and M&O and ERMC contractors, as well as additional information on the Department's small business programs, contact the:

**Office of Small and Disadvantaged
Business Utilization (ED-3)
Department of Energy
Washington, DC 20585
(202) 586-7377**

FORECAST FEATURES

Electronic Bulletin Board

The fiscal year 1995 Forecast is available via an on-line information data base, the Minority Energy Information Clearinghouse Bulletin System (MIBBS). Firms interested in accessing the data base can do so by dialing (800) 543-2325, or (202) 586-1561 in the Washington, DC metropolitan area. Other requirements are a PC compatible software package, e.g. PRO COMM PLUS and a modem. Contractors needing assistance in accessing and downloading the bulletin board should contact the Department at (202) 586-7898 or contact the Office of Small and Disadvantaged Business Utilization.

Internet

The forecast can be accessed on the Internet approximately one month following the publishing and distribution of the printed forecast, i.e. by November 30. The Department Home Page address is: <http://www/doe.gov/html>

Procuring Methods

The fiscal year 1996 forecast offers small disadvantaged and women-owned small business concerns several procurement methods by which contracts may be awarded. Procurement opportunities utilizing the following methods may be found in this forecast.

- Section 8(a) set-aside
- Small business set-aside
- Small disadvantaged business set-aside
- Small disadvantaged/women-owned small business set-aside (M&Os and ERMCS only)
- 8(a) Pilot Program set-aside (M&Os and ERMCS only)
- EPACT small disadvantaged business procurement (in accordance with the National Energy Policy Act of 1992; 10 percent to be awarded to small disadvantaged businesses, women-owned small businesses, Historically Black Colleges and Universities, and colleges and universities with 20 percent or more Hispanic or Native American student population.
- Program Research and Development Announcement (PRDA)
- Grant to small or small disadvantaged business concern

Note: Procuring officials may also include procurement opportunities which will be awarded in fiscal year 1997 but will be initiated in fiscal year 1996, e.g. the selection of an 8(a) contractor.

Simplified Acquisitions (Small Purchases)

Public Law 103-355, The Federal Acquisition Streamlining Act (FASA) of 1994, increased the small purchase threshold for acquisition of supplies, services, and construction to \$50,000 or less, and refer to it as "simplified acquisition" rather than "small purchase." This threshold is expected to increase to \$100,000 or less in the next two years. All proposed acquisitions of supplies or services with an anticipated dollar value of more than \$2,500 but less than \$100,000, and subject to simplified acquisition procedures, are reserved for exclusive participation by small business concerns. M&O contractors already apply the \$100,000 threshold. A small firm interested in being considered for simplified acquisitions should contact the appropriate contracting office listed in the directory located in the last section of this forecast.
