# CarbonSAFE North Dakota – Early Successes

DOE Award DE-FE0031889

2021 AIChE Annual Meeting

Virtual

November 18, 2021

Wes Peck

Assistant Director for Subsurface Strategies

# North Dakota CarbonSAFE Project Overview

- Performance dates:
  - BP1: September 2020 – August 2022
  - BP2: September 2022 – August 2023

Industrial Commission of North Dakota  
Lignite Research, Development and  
Marketing Program

**Schlumberger**

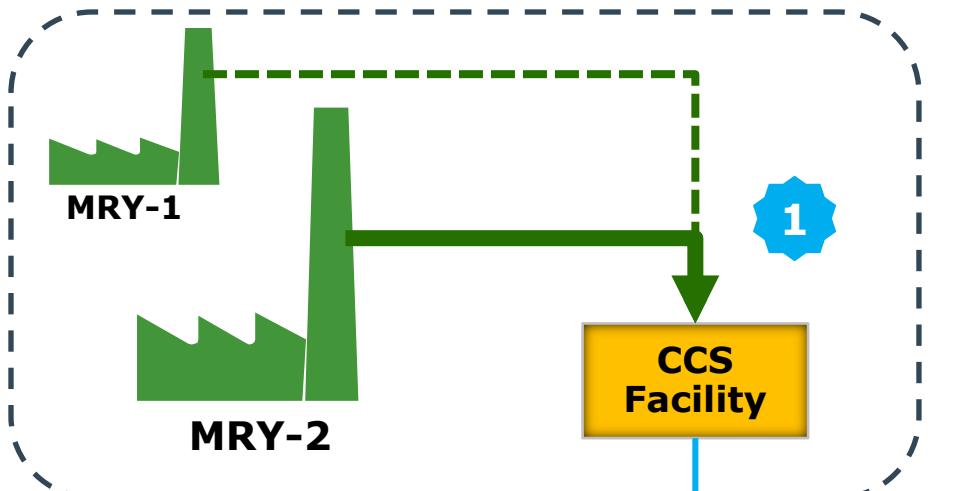

# North Dakota CarbonSAFE Phase III: Site Characterization and Permitting

3-year Project

- Geologic characterization
- Lab analysis of rock and fluids
- Geophysical surveying and modeling
- Baseline monitoring (water and soil)
- North Dakota storage facility permit development

# Project Tundra Overview

## Two Projects in One

- 1. Divert flue gas then separate CO<sub>2</sub>** in a carbon capture system that strips out the CO<sub>2</sub> then liquifies under pressure.
- 2. Inject CO<sub>2</sub> into storage formation** over a mile below lignite mine.

**No impact on the power plant  
and no impact on its costs.**

# Technical Approach

Major NDIC Permitting Requirements	Major Proposed Characterization Activities										
	Core	Logging	Downhole Testing	Lab Testing	Modeling	Simulation	Seismic	Collection	Baseline	Sampling	New Fox
Determine Plume Extent	X	X	X	X	X	X	X				
Determine Pore Space Amalgamation	X	X	X		X	X	X				
Geologic Properties of Injection and Confining Zones	X	X	X	X							
Regional Faulting Assessment	X							X			
Potential for Seismic Activity			X		X		X				
Geologic Maps and Cross Sections		X			X		X			X	
Geomechanics of Confining Zones(s)		X	X	X	X						
Identify and Characterize Secondary Confining Zones		X	X		X		X				
Determine Area of Review		X	X	X	X	X	X	X	X	X	
Baseline Geochemical Data	X			X				X		X	
Baseline Water and Soil Data				X				X		X	

Center, ND

J-LOC1 Well

CarbonSAFE  
Well

# BNI-1 Well (CARBONSafe Phase II)

- Drilled through to base of the Broom Creek Formation
- ~300 feet of core
  - Broom Creek (target) and Opeche Formations (seal)
- Geophysical logging and fracture test

# J-LOC1 Well

- Drilled to the Precambrian basement (10,300 feet)
- 1344 feet of core from three reservoir/seal intervals
- Tied to complementary 6-mi<sup>2</sup> seismic survey

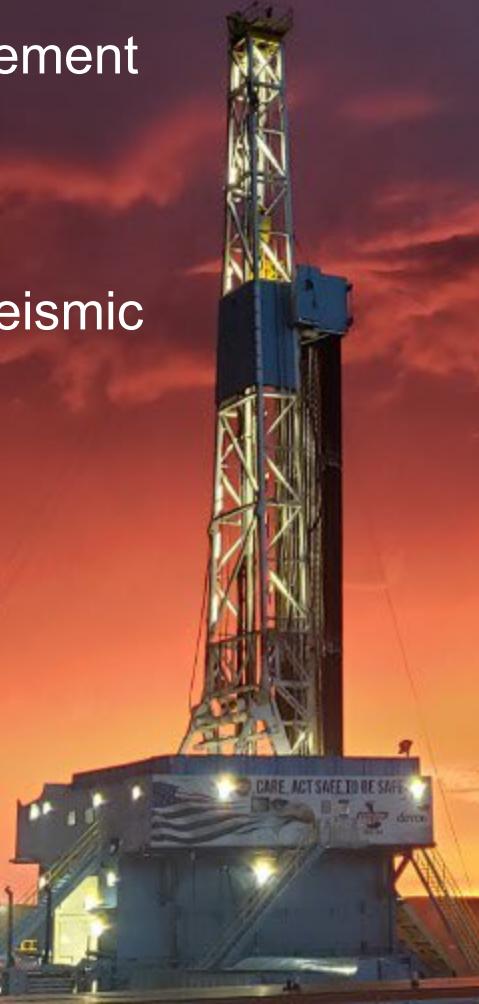

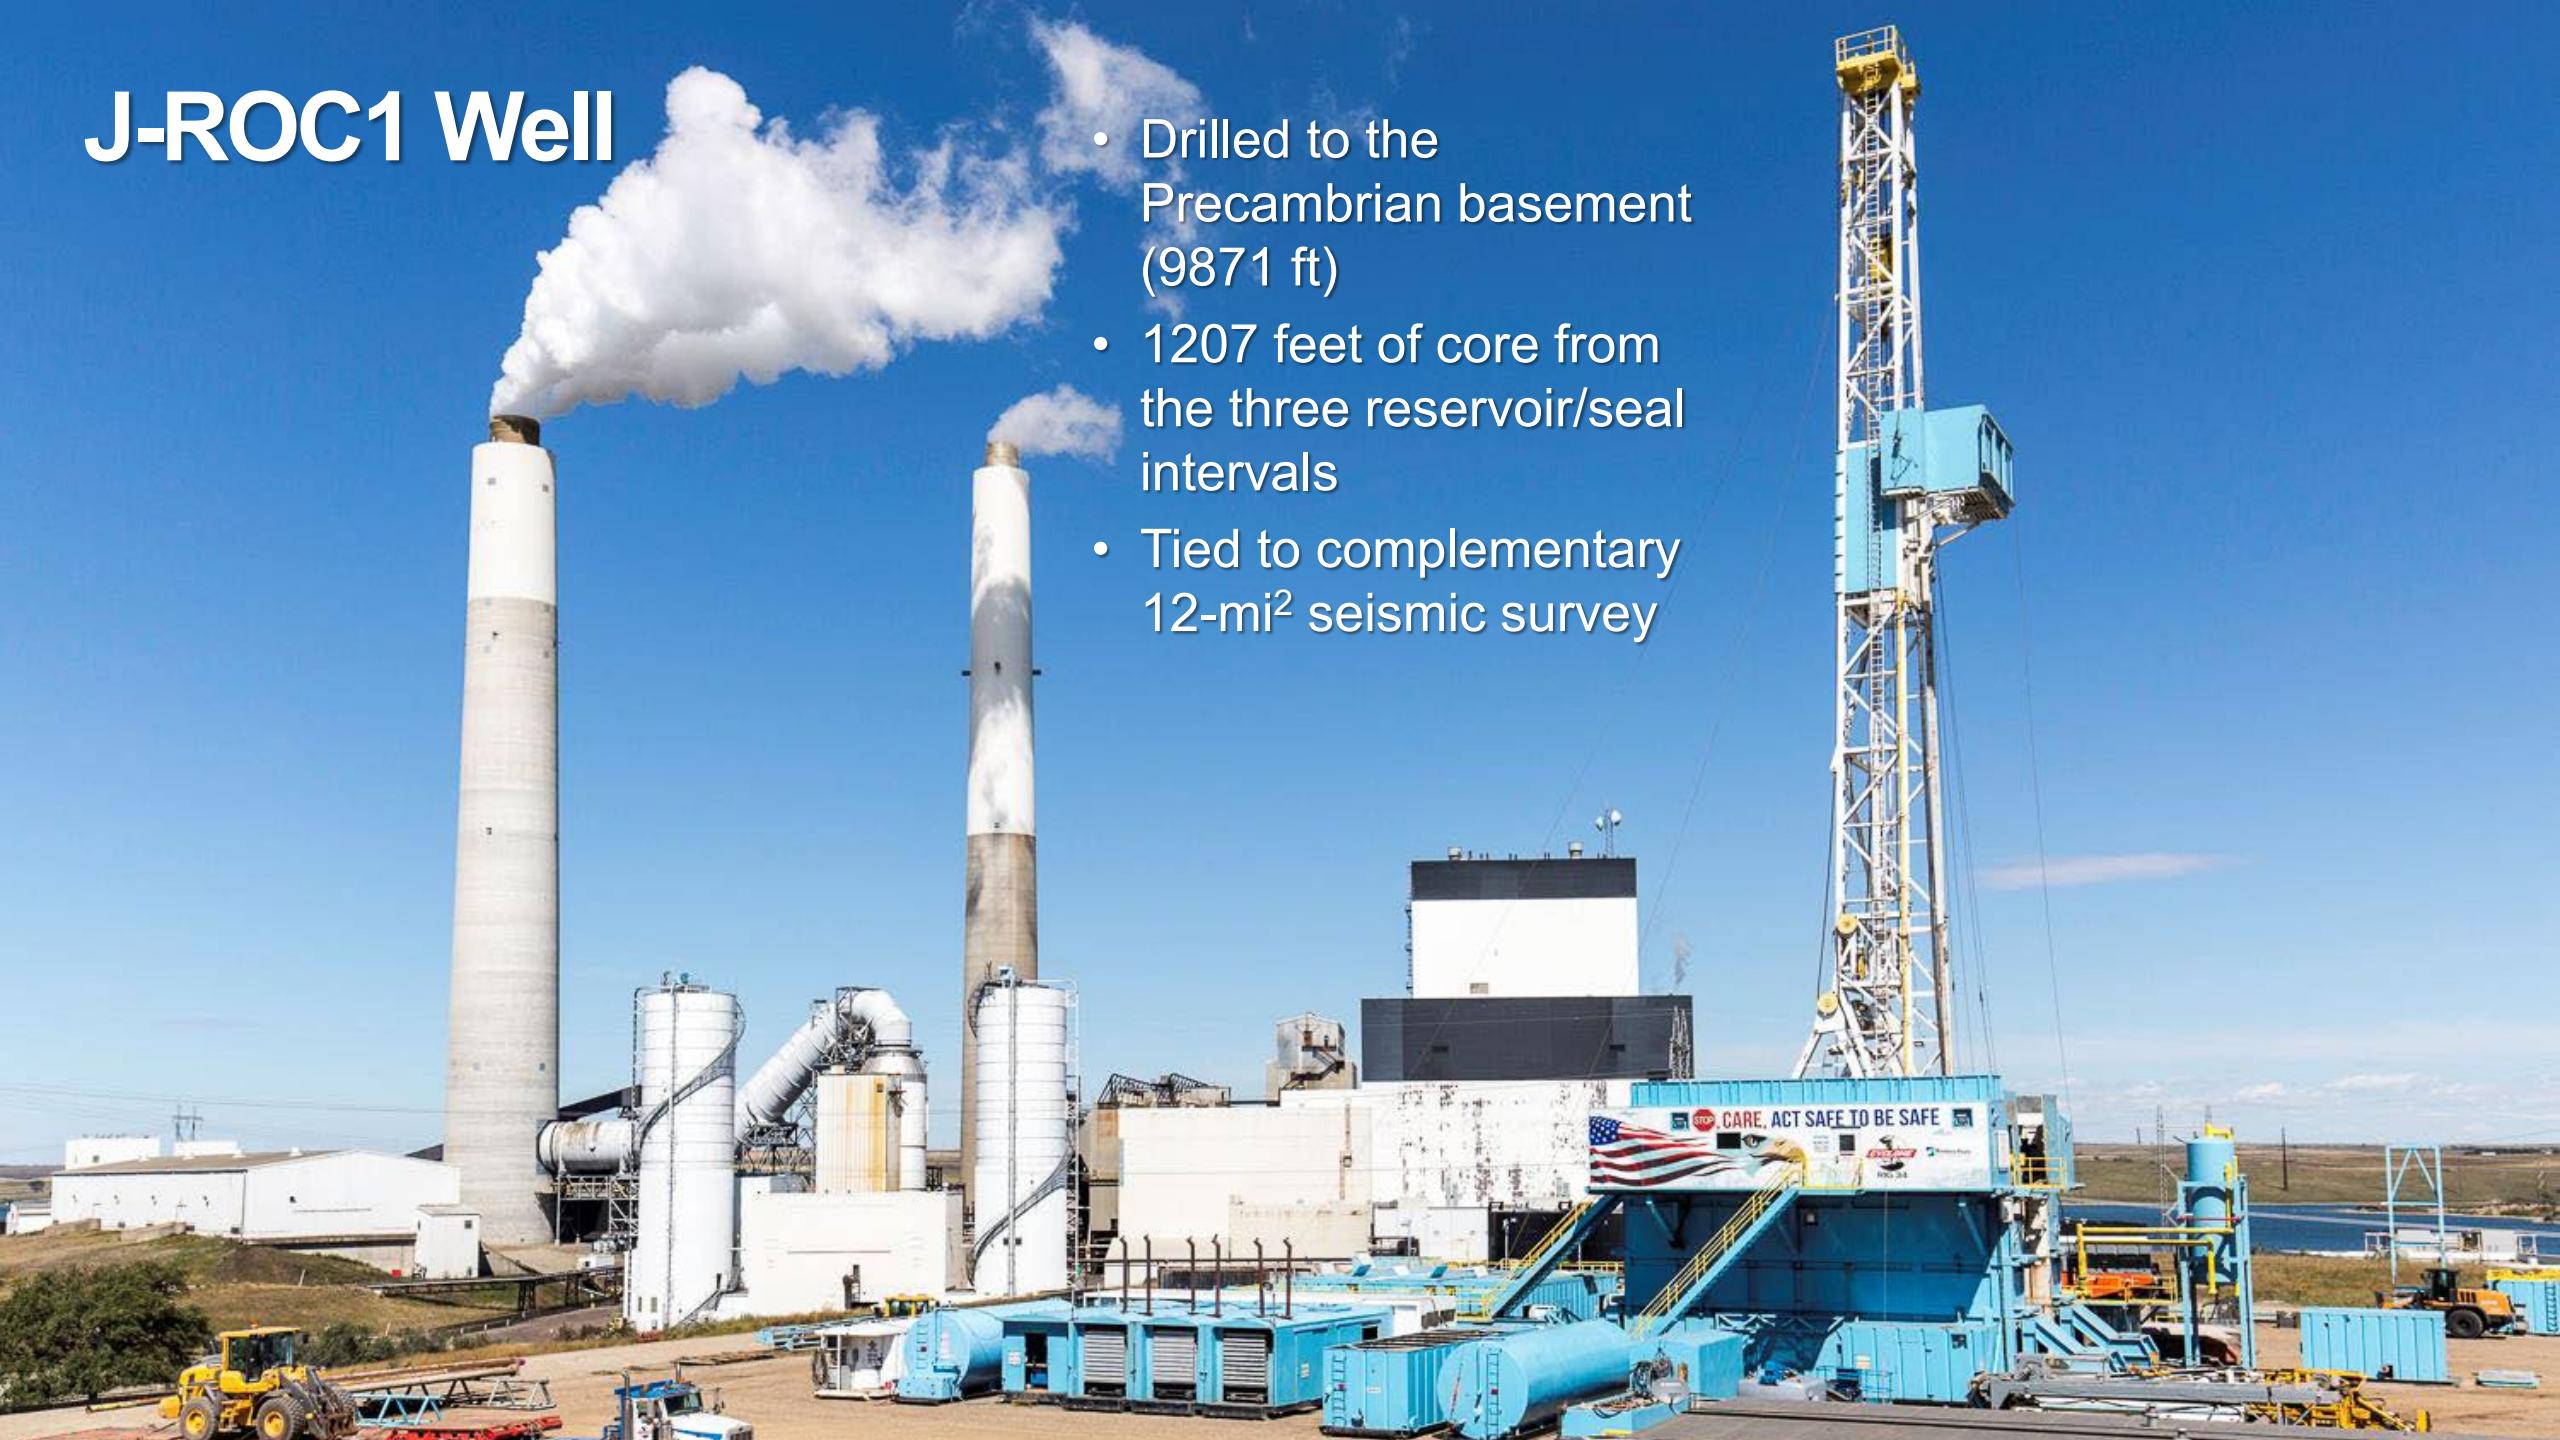

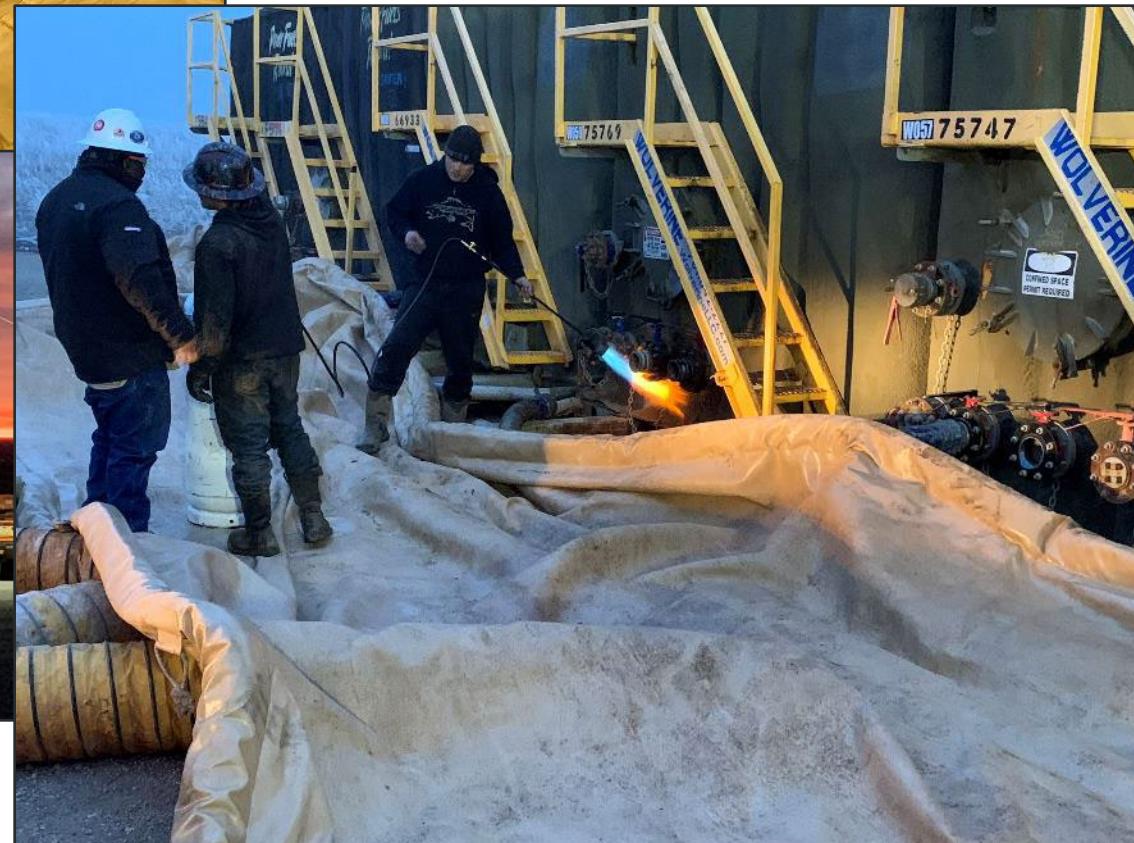

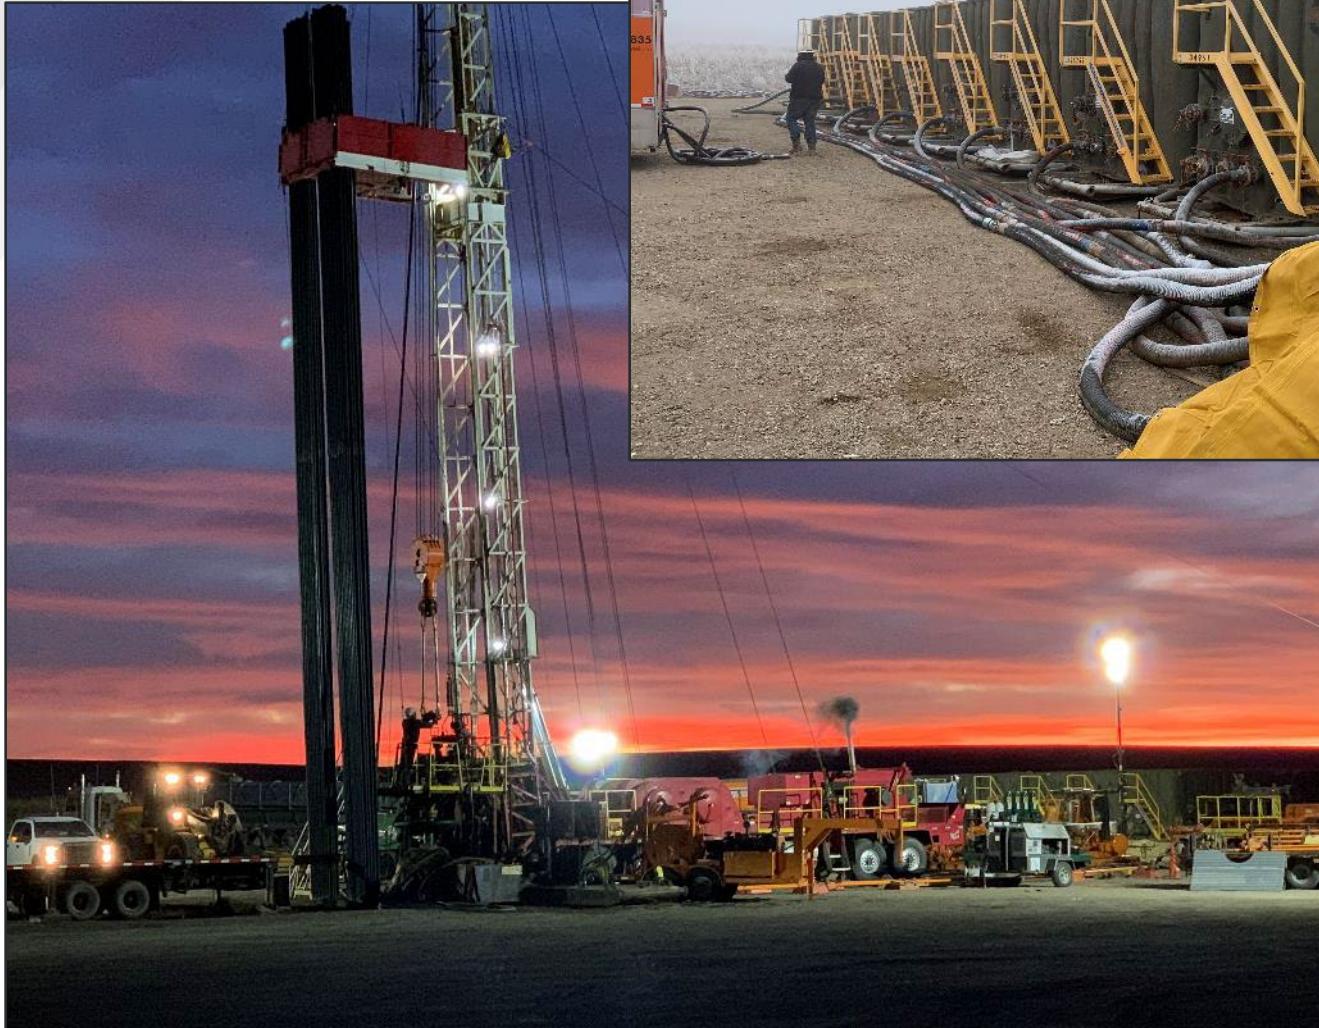

Photo courtesy of John Oleksik, EERC

# J-ROC1 Well

- Drilled to the Precambrian basement (9871 ft)
- 1207 feet of core from the three reservoir/seal intervals
- Tied to complementary 12-mi<sup>2</sup> seismic survey

# Step Rate Injection Tests

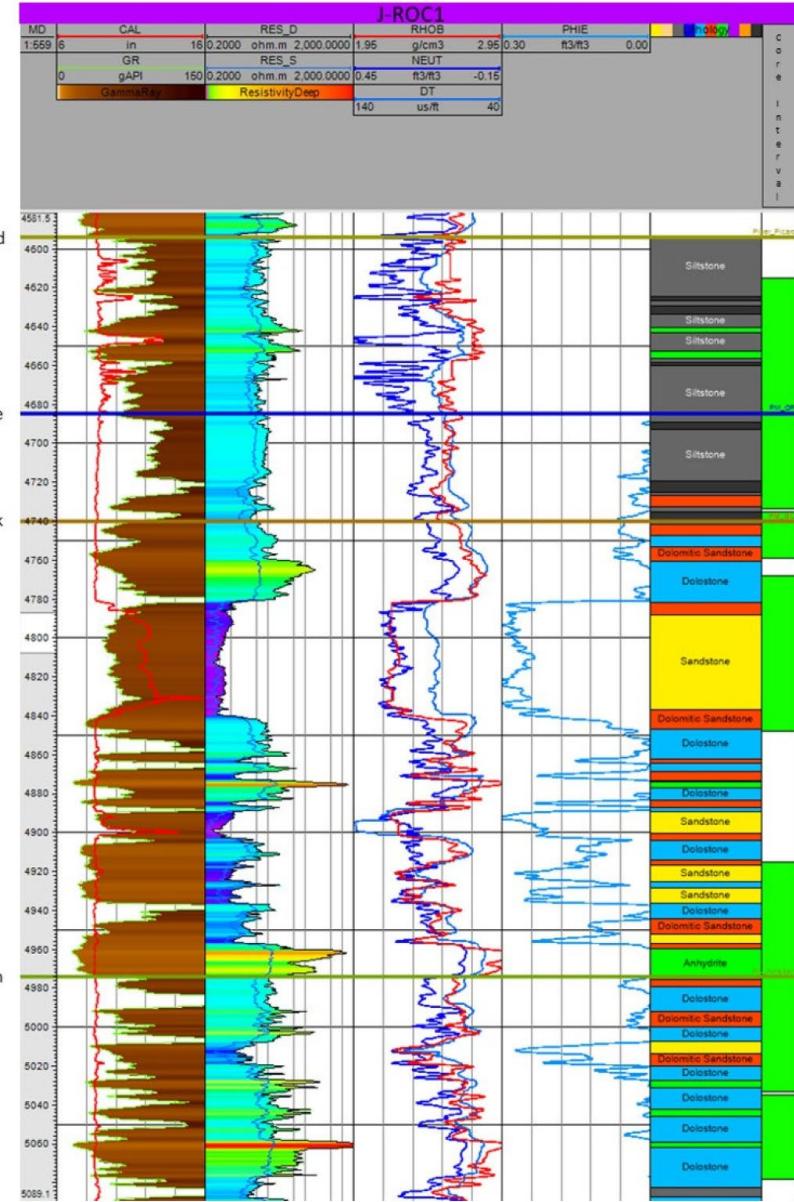

#### Geologic Properties

Formation	Property	Simulation Model	
		Laboratory Analysis	Property Distribution
Broom Creek (sandstone)	Porosity, %*	19.51 (2.46–27.38)	21.4 (1.0–36.0)
Broom Creek (dolostone)	Permeability, mD**	69.29 (0.06–2.690)	168.8 (0.0–8.601.1)
	Porosity, %	8.11 (5.48–8.97)	5.8 (0.0–18.0)
	Permeability, mD	0.03 (0.02–0.05)	0.13 (0.0–2,259.6)

\* Porosity values are reported as the arithmetic mean followed by the range of values in parentheses.

\*\* Permeability values are reported as the geometric mean followed by the range of values in parentheses.

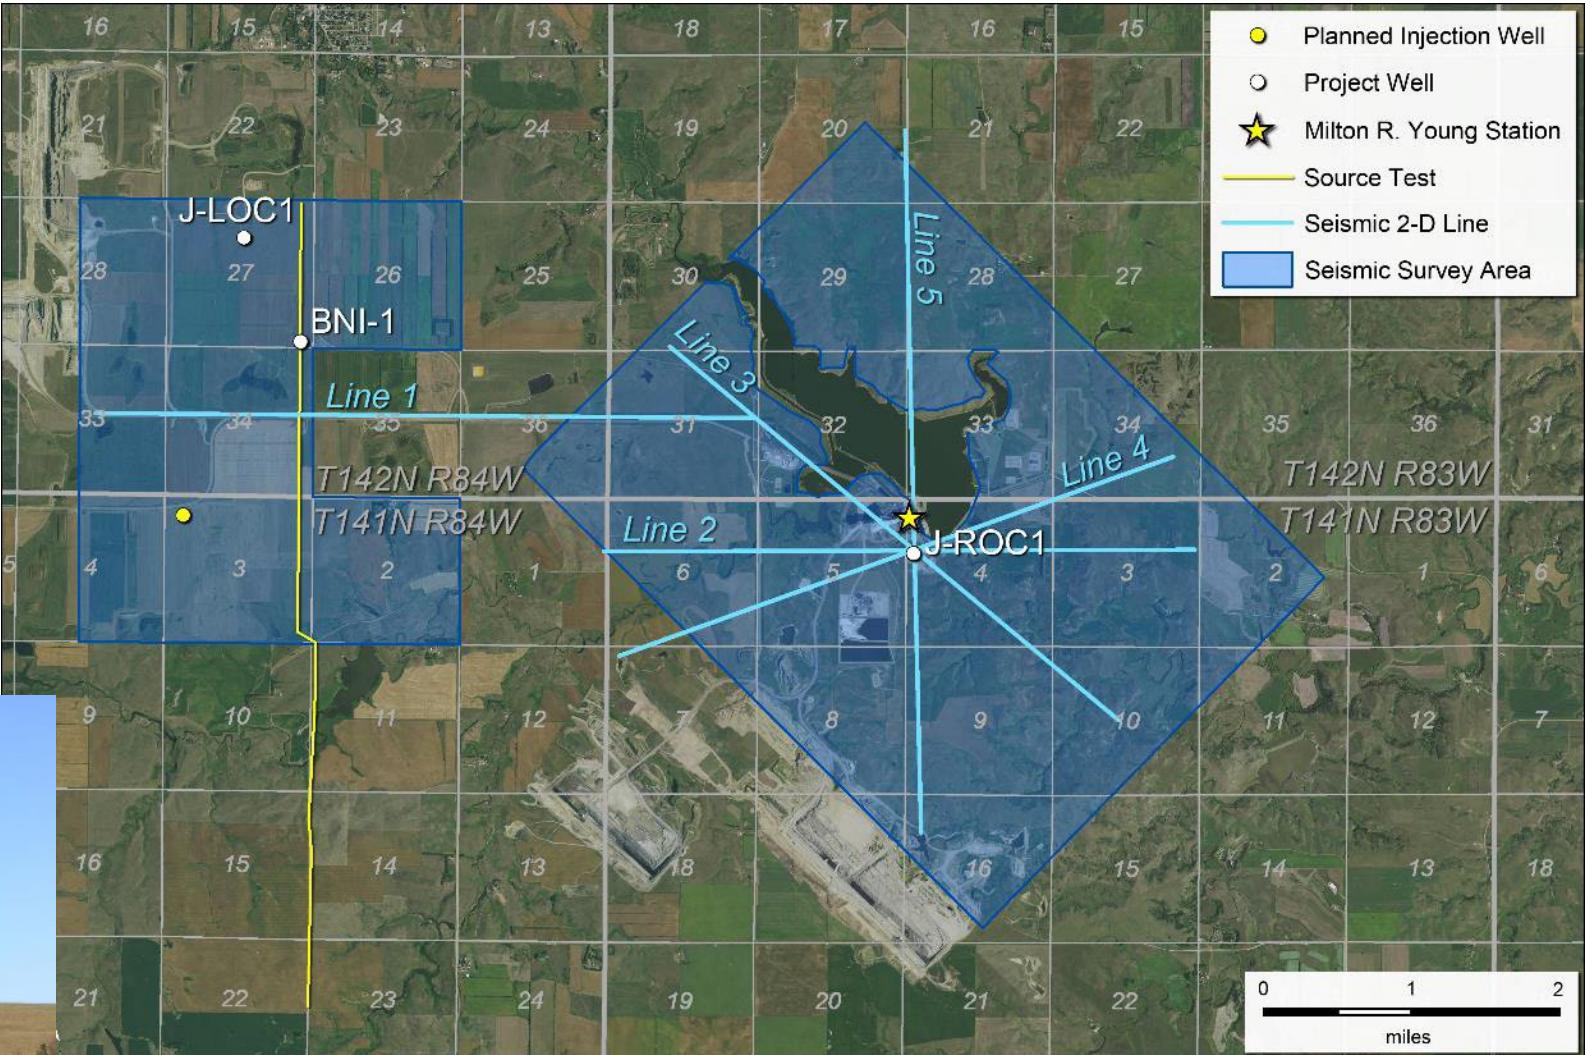

# Seismic Surveys

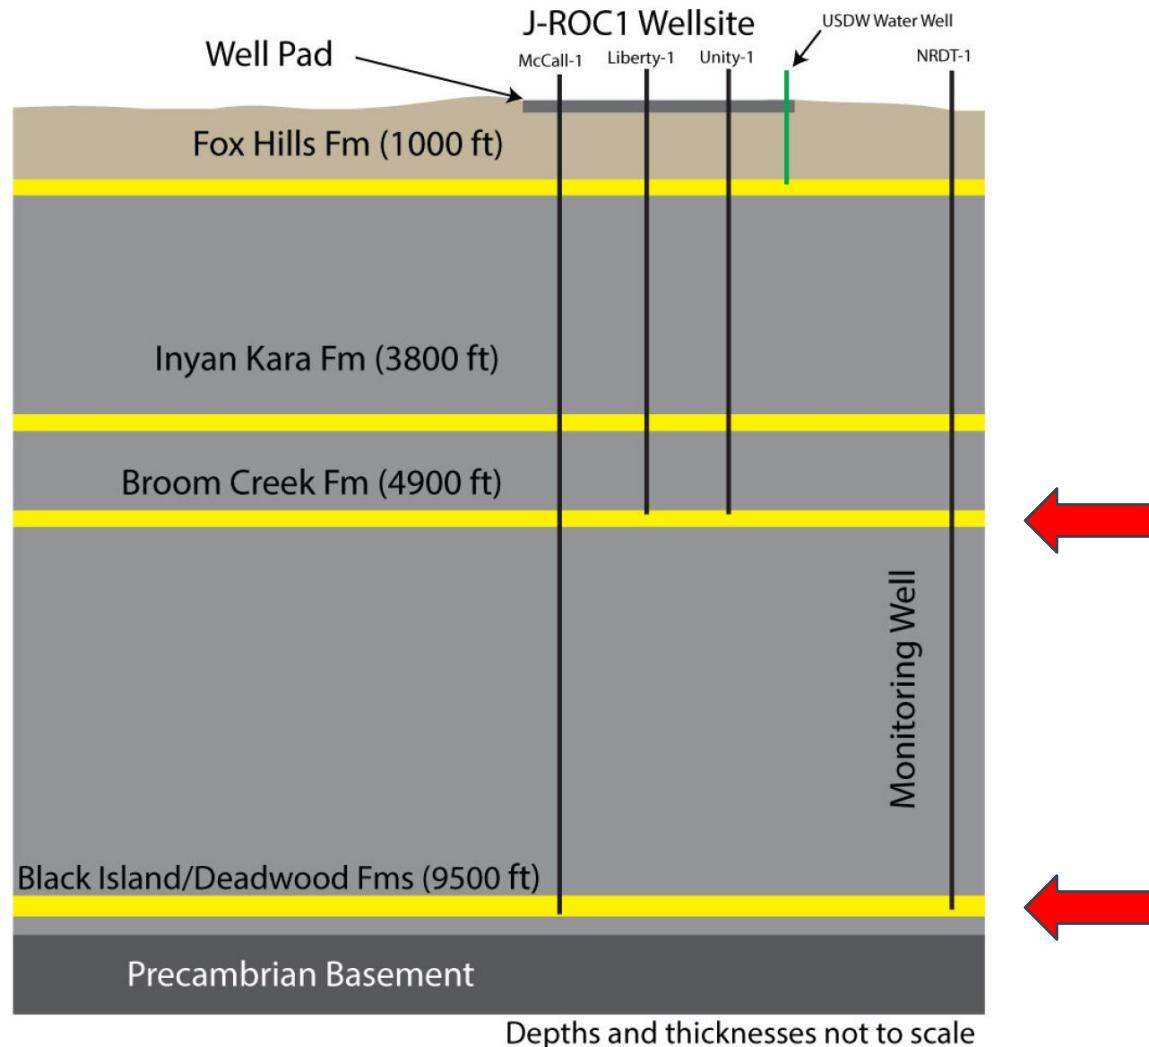

# Seismic Data

- 2019
  - 5-mi source test line
  - 6.7 mi<sup>2</sup> of 3D seismic data
- 2020
  - 12 mi<sup>2</sup> of 3D seismic data
  - 20 mi of 2D seismic data

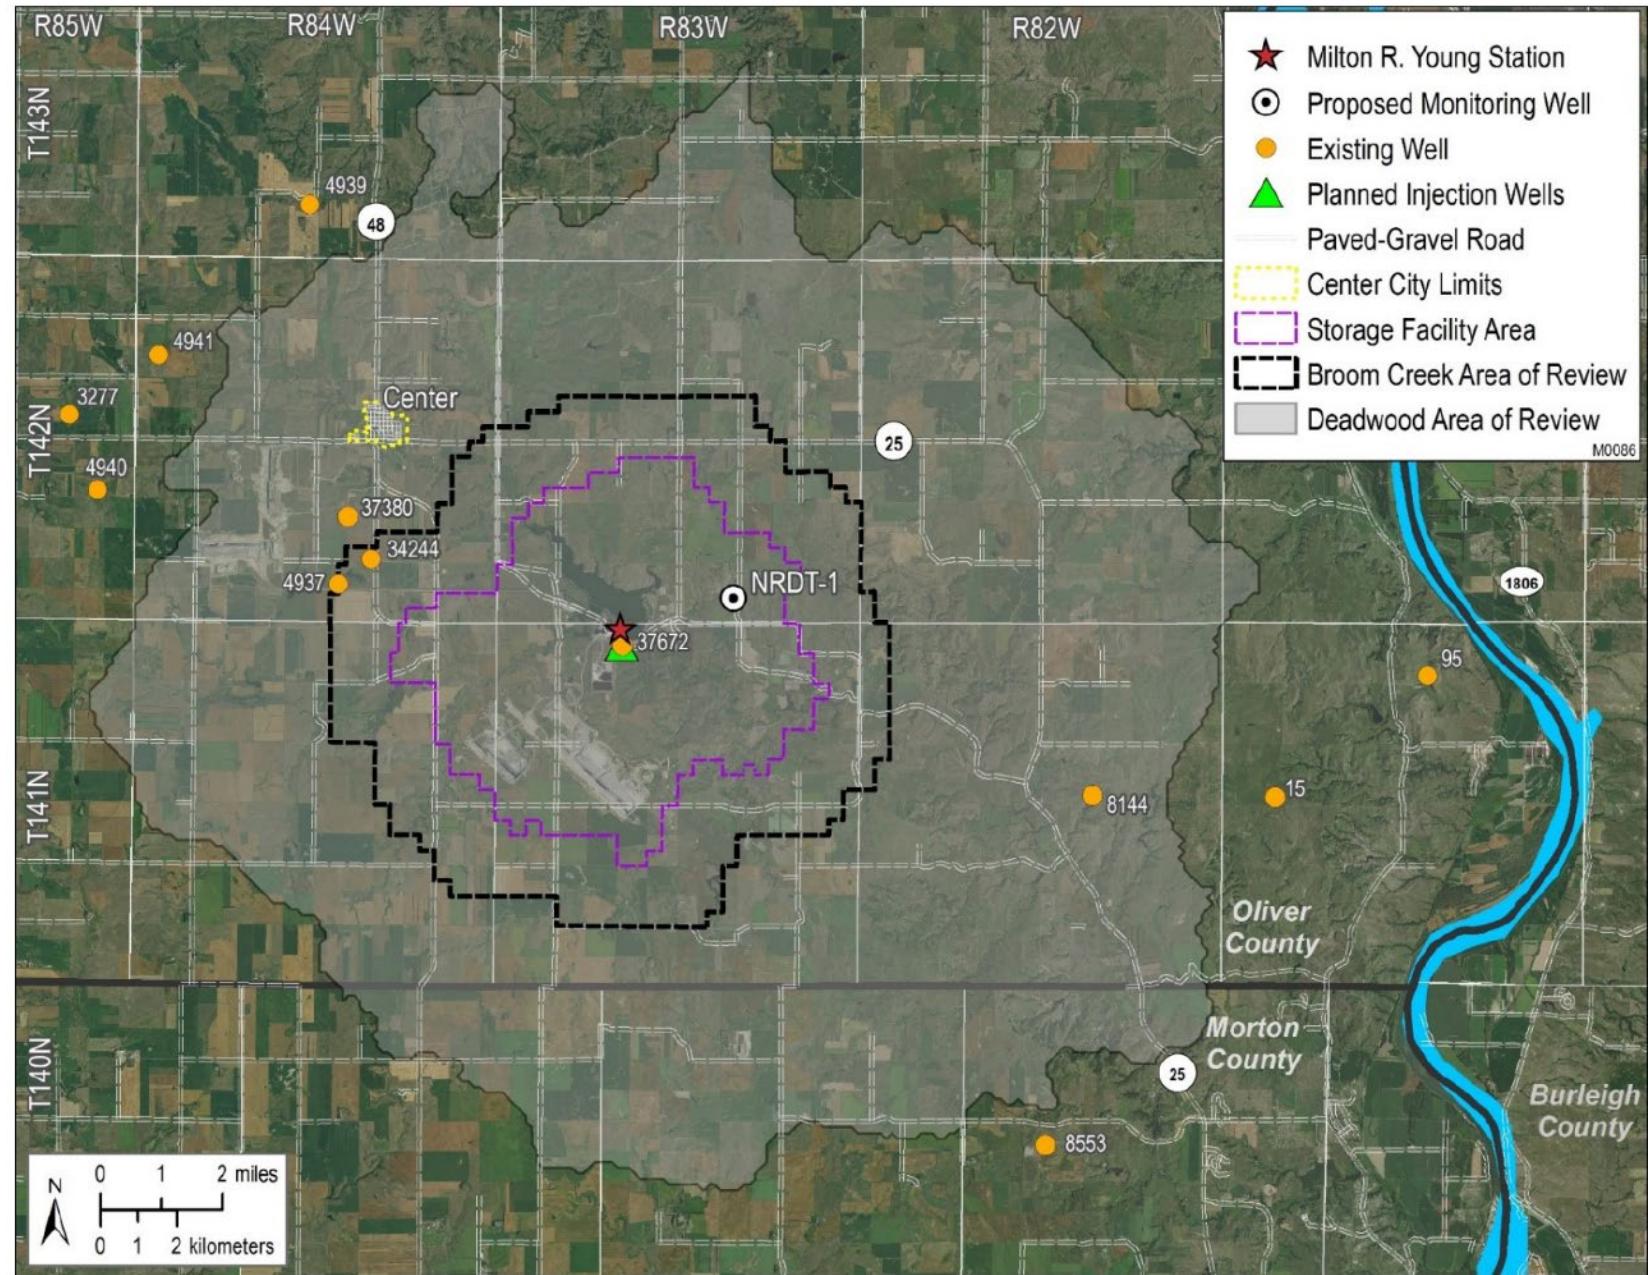

# General Project Configuration

- Stacked storage beneath the power plant
- Very short pipeline
- Storage facility permit application for each target horizon

# Project Tundra CO<sub>2</sub> Storage Area Map

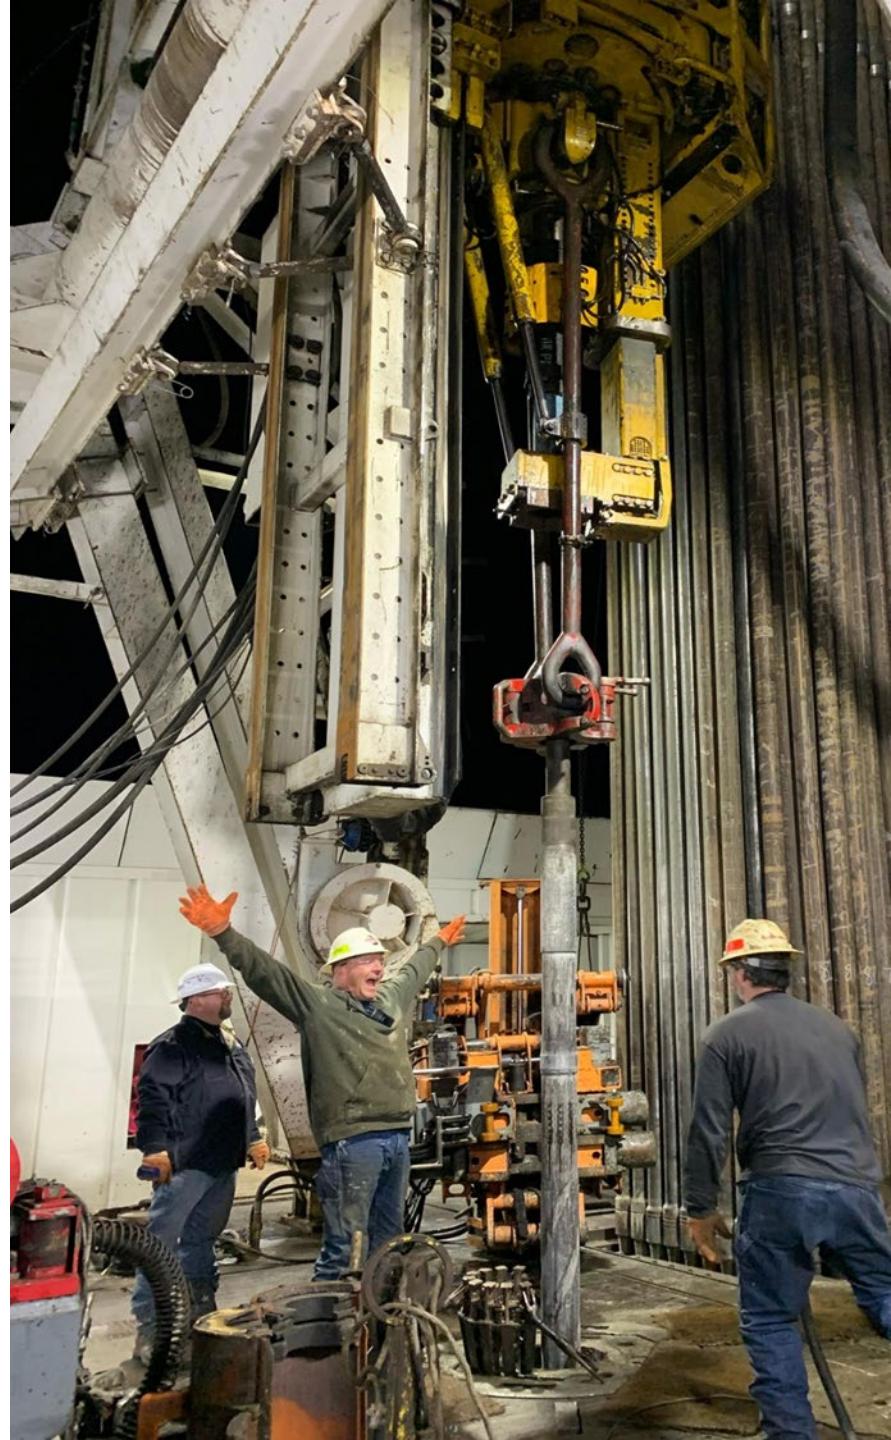

# North Dakota Administrative Code for CO<sub>2</sub> Storage

- Defined timeline for issuing a final decision on a storage facility permit application
- Amalgamation of pore space and procedure to include nonconsenting owners
- Postinjection title transfer (long-term liability)
- Establishment of trust funds to manage the long-term liability

# Latest Successes!

- May 28: Two storage facility permit applications submitted (600 pages each).
- September 23: Two draft storage facility permits established (North Dakota permit applications deemed to be complete).
- November 4: 7.5 hours of testimony in front of the North Dakota Industrial Commission to address the permit requests.
- November 16: Requested supplemental material submitted.
- Fingers crossed...final North Dakota permit approval before mid-February.
