HANDBOOK FOR PREPARATION OF INDIVIDUAL PROCUREMENT ACTION REPORT (IPAR)

INTRODUCTION

The Procurement and Assistance Data System (PADS) provides a mechanism for collecting, assembling, organizing, and presenting acquisition and assistance data for the Department of Energy (DOE). This handbook and associated documents establish a uniform system to report acquisition/assistance data to PADS for the collection, processing, and dissemination of official statistical data on the Department's acquisition and assistance actions. The data provides, based on information available at the time of request, a basis for any recurring and special reports to the senior procurement executive, Congress, General Accounting Office (GAO), Federal executive agencies, Office of Management and Budget (OMB), and the general public. It provides information for measuring and assessing the extent to which small business firms and small disadvantaged business enterprises are sharing in DOE placement, and for other acquisition and assistance policy and management control purposes.

GENERAL INFORMATION

The Individual Procurement Action Report consists of two data collection forms, one for collecting information on procurement actions (DOE F 4200.40) and another for collecting information on financial assistance actions (DOE F 4200.40A). The IPAR Supplement (DOE F 4200.41) may be used for data collection on both types of actions.

The Handbook for the Preparation of the Individual Procurement Action Report (IPAR) has been designed in two sections; Procurement and Financial Assistance to support the individual forms.

Requirements

In accordance with the instruction set forth in the DOE Order 1331.1D, dated 5-18-92, entitled "Procurement and Assistance Data System," awarding office managers are responsible for collection and submission of data to PADS on the receipt/acceptance of procurement requests, and the award/modification of procurement and financial assistance actions. This includes contract administration from execution of an award (acceptance) through award completion, closeout and retirement. All data shall be submitted to PADS within five (5) working days after the action date.

ITEM 5 **MOD NUMBER BEING DEFINITIZED**

Enter the modification number (A---or M---) being definitized that was previously awarded as an undefinitized action, a unilateral change order, letter modification, or letter contract.

If this award action definitizes more than one modification, enter all modifications that are being definitized by this one action. If additional space is required, see DOE Form 4200.41, Item 7.

ITEM 6 **PROCUREMENT REQUEST NUMBER**

- A. Enter the 16-character number of the PR that authorized this award (e.g., 01-95FE12345.000) from block 3 of the DOE Form 4200.33.
- B. This number is also found in block 3, Requisition/Purchase Request No. on the Standard Form 26, Award/Contract, and on Standard Form 30, Modification.
- C. The basic portion of a procurement request number is twelve characters long in a format exemplified by 01-95FE12345. This is identical to the last 12 characters of the award business instrument number, with the following exception: for a procurement request number, the fiscal year portion reflects the fiscal year of the anticipated award date. For example, the basic portion of a procurement request number which initiated a procurement action for a new award in FY 1995 would be in the form of 01-95FE12345. Subsequent actions in FY 1995 would have the same basic portion for their procurement request numbers. For actions related to this award in FY 1996, the procurement request number would be in the form of 01-96FE12345.

With regard to the award business instrument number, however, the fiscal year portion of this number remains the same as the year in which the instrument was initially awarded, in this example, FY 1995. Therefore, regardless of the fiscal year of the procurement request, the fiscal year portion of the award business instrument number does not change.

The supplementary portion of the procurement request number consists of a decimal point followed by a three-digit number added to the right of the basic portion of the procurement request number. The number identifies the sequence of procurement requests initiated for a fiscal year. The number is assigned sequentially starting with "000" and is used to represent funding actions or any other action that involves procurement activity; e.g., a no-cost extension.

To continue with the previous example, the procurement request number that initiated the basic award would be 01-95FE12345.000. The next action in FY 1995 would be a modification with a procurement request number 01-95FE12345.001. This supplemental portion does not become part of the award business instrument. Each fiscal year a new sequence begins with "001." The "000" is used only once during the life of the award.

Sometimes the awarding office will initiate a modification action under an award where the initiating office need not issue a procurement request. To provide for this case, the three-character sequence has been divided to have the awarding office use "501" through "599". If, in the above example, the awarding office were to initiate its own first procurement request under award in FY 1995 to change the cognizant contracting officer, it would be coded as 01-95FE12345.501.

The use of a different series prevents duplication of procurement request numbers that might occur when two separate offices are issuing procurement requests.

The following examples further explain the supplementary portion of the procurement request number:

- 01-95FE12345.000 - New award initiation.
- 01-95FE12345.001 - First subsequent action in FY 1995.
- 01-96FE12345.001 - First subsequent action FY 1996.
- 01-96FE12345.002 - Second subsequent action in FY 1996.
- 01-96FE12345.501 - First awarding office action.

- D. There are four types of processing which do not require a procurement request number in order to process an award. They are AN-NOPR, WPAS-NOPR, UTIL-NOPR, and PRFY-NOPR. (See PADS System Reference Manual for additional information)

1. AN-NOPR Processing

This is the procedure in some awarding offices to award zero dollar mods to a contract without entering any Procurement Request forms. This process may be used for current year actions only. The following step is necessary to process AN-NOPR transactions.

Fill out an IPAR form with a Mod Number (Item 3) beginning with "M" and followed by a mod number greater than "000" that has not been used previously for that contract. No financial information is allowed on this action. The PR Number (Item 6) must contain AN-NOPR to identify this type of action.

2. WPAS-NOPR Processing

WPAS-NOPR processing may only be used to report award actions against contracts whose funding is controlled through the Work Authorization System (WAS). It is unique in that funds are not committed through the use of Procurement Requests (PR's). In order to use the WPAS-NOPR process in PADS, the contract cited in the Award Bin (Item 2) must be designated as a WAS contract.

The initial new award for a WAS contract must have been previously reported to PADS through the use of normal PR processing.

Fill out an IPAR as follows: The Mod number (Item 3) must be greater than "000"; the PR Number (Item 6) must contain WPAS-NOPR.

3. UTIL-NOPR Processing

UTIL-NOPR processing is used to report, as contract mods, payments made for the purchase of power and other utilities from specified utility contractors.

Procurement Requests may not necessarily be used to commit funds for the utilities in these cases. Instead, as invoices are received on a regular basis from the utility, these invoices are paid and the payments reported to PADS using the IPAR. To use the UTIL-NOPR process to report invoice payments into PADS, the contract cited in the Award BIN (Item 2) must be designated as a utility contract in PADS miscellaneous table UTIL.

Fill out an IPAR as follows: The first position of the Mod number (Item 3) must contain an "A"; the second through fourth positions of the mod must contain "500" for the first mod reporting a utility payment. Continue using consecutively higher numbers to "999" for all future mods of this type. This is done so that these special mods may be differentiated from the standard mods to the basic utility contract itself. The PR Number (Item 6) must contain UTIL-NOPR.

4. PRFY-NOPR Processing

PRFY-NOPR processing is used to report awards from previous fiscal years. This special process is allowed so actions that have not been entered due to oversight do not require the entry of a PR.

Enter PRFY-NOPR in Item 6 on the IPAR. This may be used for new awards and modifications from previous fiscal years.

ITEM 7 **PR COMPLETION CODE**

Check the block indicating whether the PR referenced in Item 6 is completed or still open for further action.

DOE Master Bin numbers begin with DE-AI, DE-AK, DE-AM, or DE-GI. For orders against other agencies, see miscellaneous table AWAG, Awarding Agency.

GSA schedule numbers will be verified for accuracy with numbers provided by GSA.

This item refers to the contractor's final manufacturing assembly point, processing plant, construction site, place where a service is performed, location of mines, or where the product is grown.

If the items are supplied parts shipped from stock by a regular dealer, the place of performance is the regular dealer's location. If the items are shipped for the regular dealer by a subcontractor who produces the items, the place of performance is the subcontractor's location.

If more than one location is involved, report only the location involving the largest dollar share of the contract.

For construction and architect/engineer contracts, report the construction site location. If the contract is for architect/engineer design work, the place of performance is where the design work is being done.

If the place of performance cannot be determined (e.g., if the contractor has multiple location sites performing the same volume of work), or commercial item acquisition procedures were used, report the contractor's billing or home office location.

FINANCIAL DATA GUIDANCE:

- a. For a "funds in" or sales transaction, government share, awardee share and total are not entered into PADS.
- b. Dollars are entered as whole dollars, no cents, no decimals, no commas.
- c. Decreases in dollars should be preceded by a minus "-". (Example: -25000).
- d. Corrections to previously entered financial data on modifications will replace current dollar values. Changes may be made by any of three methods:
 - (1) Government share, awardee share, and total (Items 26, 27 and 28). A change to any one of these fields requires re-entry of data in all three. To leave dollars as they are on the data base, the same values must be re-entered.

If B&R numbers and B&R dollars (Items 29 and 30) are not entered, they will be left as they currently exist on the data base.

- (2) B&R numbers and/or B&R dollars (Items 29 and 30). A change made to any B&R number or B&R dollar amount requires re-entry of all B&R numbers and their corresponding B&R dollars.

If government share, awardee share, and total (Item 26, 27 and 28) are not entered, they will remain as they currently exist on the data base.

GUIDANCE ON COMPETITION

The competition data elements are required on a mod-by-mod-basis. The following guidance is provided to assist you in filling out the IPAR for modifications.

- (1) Modifications within the scope of an existing contract shall carry the same competitive/noncompetitive designation as the original contract award. Therefore, data reported in Items 32, 35, 38, 41, and 44 for modifications within scope must be the same as the basic award.

If the modification being executed is for new work, i.e., outside the scope of the original contract, the modification should be reported as noncompetitive in Items 32, 35, 38, 41 and 44.

The competitive/noncompetitive coding of a modification issued subsequent to a new work modification (outside the original scope) should

be judged on the basis of predominance of the work being modified, i.e. original scope of work or the new work; whichever is the predominant work being modified or changed.

EXAMPLE:

Original Award is Competitive

<u>MODS</u>		<u>OBS</u>		
A000	Contract Value	\$2,500,000	\$500,000	COMP
A001	Original Scope		\$200,000	COMP
A002	Original Scope		\$300,000	COMP
A003	Original Scope		\$400,000	COMP
A004	Outside Original Scope	\$ 50,000		N/COMP
A005	Original Scope	\$100,000		COMP
A006	Original Scope	\$300,000		COMP
A007	Outside Original Scope	\$35,000		N/COMP

- (2) For orders against indefinite delivery contracts, GSA contracts, basic ordering agreements, and other agency contracts, data reported in Items 32, 35, 38, 41 and 44 should follow the same competitive designation as the original award or other agency contract. (GSA has stated that close to 100% of their Federal Supply Schedule awards are competitively awarded.)

ITEM 3MODIFICATION NUMBER

Award Modification Numbers. All new basic awards and modifications to an award are identified by a modification number assigned by the awarding office. These modification numbers are not part to the award business instrument number.

- (1) The basic award and modifications to each business instrument shall be sequentially numbered by use of a four position alphanumeric code.
 - (a) The first position shall be a capital letter identifying the type of action as follows:

A - (Amount). An action adding, changing, or deleting financial data that is collected on the IPAR, but not administrative corrections to financial data.

M - (Miscellaneous). An action having no effect on financial data that is collected on the IPAR, including administrative corrections.
 - (b) The second through fourth positions shall contain a sequential serial number of the modification. For basic awards, enter 000. The next assigned modification number would be 001, 002, etc. These numbers continue in sequence throughout the life of the award.
- (2) Examples of modifications:
 - (a) M001 - first modification to basic award, no effect on financial data in this example since it is a miscellaneous mod.
 - (b) A002 - second modification to basic award, changes in financial data in this example since it is an amount mod.
 - (c) M003 - third modification to basic award, no effect on financial data in this example since it is also a miscellaneous mod.

NOTE: The mods are numbered sequentially without regard to the "A" or "M" prefix.

ITEM 5 PROCUREMENT REQUEST NUMBER

- A. Enter the 16-character number of the PR that authorized this award (e.g., 01-95FE12345.000) from block 3 of the DOE Form 4200.33. (Only one PR number allowed in Item 3).
- B. The basic portion of a procurement request number is twelve characters long in a format exemplified by 01-95FE12345. This is identical to the last 12 characters of the award business instrument number, with the following exception: for a procurement request number, the fiscal year portion reflects the fiscal year of the anticipated award date. For example, the basic portion of a procurement request number which initiated a procurement action for a new award in FY 1995 would be in the form of

01-95FE12345. Subsequent actions in FY 1995 would have the same basic portion for their procurement request numbers. For actions related to this award in FY 1996, the procurement request number would be in the form of 01-96FE12345.

With regard to the award business instrument number, however the fiscal year portion of this number remains the same as the year in which the instrument was initially awarded, this example, FY 1995. Therefore, regardless of the fiscal year of the procurement request, the fiscal year portion of the award business instrument number does not change.

The supplementary portion of the procurement request number consists of a decimal point followed by a three-digit number added to the right of the basic portion of the procurement request number. The number identifies the sequence of procurement requests initiated for a fiscal year. The number is assigned sequentially starting with "000" and is used to represent funding actions or any other action that involves procurement activity; e.g., a no-cost extension.

To continue with the previous example, the procurement request number that initiated the basic award would be 01-95FE12345.000. The next action in FY 1995 would be a modification with a procurement request number 01-95FE12345.001. This supplemental portion does not become part of the award business instrument. Each fiscal year a new sequence begins with "001". The "000" is used only once during the life of the award.

Sometimes the awarding office will initiate a modification action under an award where the initiating office need not issue a procurement request. To provide for this case, the three-character sequence has been divided to have the awarding office use "501" through "599". If, in the above example, the awarding office were to initiate its own first procurement request under the award in FY 1995 to change the cognizant contracting officer, it would be coded as 01-95FE12345.501.

The use of a different series prevents duplication of procurement request numbers that might occur when two separate offices are issuing procurement requests.

The following examples further explain the supplementary portion of the procurement request number:

- 01-95FE12345.000 - New award initiation.
- 01-95FE12345.001 - First subsequent action in FY 1995.
- 01-95FE12345.002 - Second subsequent action in FY 1995.
- 01-96FE12345.001 - First subsequent action in FY 1996.
- 01-96FE12345.002 - Second subsequent action in FY 1996
- 01-96FE12345.501 - First awarding office action in FY 1996.

- C. There are three types of financial assistance processing which do not require a procurement request number in order to process an award. They are AN-NOPR, SH-NOPR and PRFY-NOPR.

(1) AN-NOPR Processing

It is the procedure in some awarding offices to award zero dollar mods to an award without entering any procurement request forms. This process may be used for current year actions only. The following step is necessary to process AN-NOPR transactions.

Fill out an IPAR form with a Mod Number (Item 3) beginning with "M" and followed by a mod number greater than "000" that has not been used previously for that award. No financial information is allowed on this action. The PR Number (Item 5) must contain AN-NOPR to identify this type of action.

(2) SH-NOPR Processing

SH-NOPR processing is used to report grants and grant modifications on schools and hospitals awards (CFDA 81.052) that do not have procurement requests.

Fill out an IPAR as follows: The PR number, Item 5, must contain SH-NOPR.

(3) PRFY-NOPR Processing

PRFY-NOPR processing is used to report awards from previous fiscal years. This special process is allowed so actions that have not been entered due to oversight do not require the entry of a PR.

Enter PRFY-NOPR in Item 5 on the IPAR. This may be used for dollar or no dollar new awards and modifications from previous fiscal years.

ITEM 6

PR COMPLETION CODE

Check the block indicating whether the PR referenced in Item 5 is completed or still open for further action.

<u>CODE</u>	<u>DESCRIPTION</u>
-------------	--------------------

O FINANCIAL DATA

=====

GUIDANCE:

- a. Dollars are entered as whole dollars, no cents, no decimals, no comma .
- b. Decreases in dollars should be preceded by "-". (Example: -2500).
- c. Corrections to the previously entered financial data on modifications will replace current dollar values. There are three ways of making changes to the existing data:
 1. Government share, awardee share and total (Items 22, 23, and 24). A change to any one of these fields requires re-entry of data in all three. To leave dollars as they are on the data base, the same values must be re-entered.

If B&R numbers and B&R dollars (Items 25 and 26) are not entered, they will be left as they currently exist on the data base.
 2. B&R numbers and/or B&R dollars (Items 25 and 26). A change made to any B&R number or B&R dollar amount requires re-entry of all B&R numbers and their corresponding B&R dollars.

If government share, awardee share, and total (Items 22, 23 and 24) are not entered, they will remain as they currently exist on the data base.
 3. All five fields - government share, awardee share, total, B&R number, and B&R dollars (Items 22, 23, 24, 25 and 26).

Introduction

The instructions are intended to aid procurement personnel who prepare IPAR forms in entering the name(s) of new awardees in a standardized format. Instruction is also provided for the abbreviation of those names which exceed 30 characters.

Use these instructions whenever the name of the awardee does not appear in the current "Directory of Awardee Names" or its supplement as issued by DOE Headquarters and the Office of Scientific and Technical Information (OSTI).

Attachment 1 to this Appendix contains permissible abbreviations for use in PADS.

GENERAL
