INTRODUCTION

This census represents an updating of a similar census conducted during November, 1969, and issued as AEC Research and Development Report BNWL-1242 UC-48. The prime reason for the initial census was to serve as a guide for use in radiation ecology studies that involved whole-body counting of Anaktuvuk Pass residents, where age was an important consideration.

Over the years 1962-1972 during which the studies were conducted, several records have been consulted for the information contained herein. Most important were those of the late Homer Mekiana, who maintained the census as a part of his several duties in the village until December, 1968. His records were updated in 1962 by Mrs. Susan Lockwood, State schoolteacher in the village at that time. Since 1962, I have kept the census current with the help of several village residents, especially Mr. Bob Ahgook, the current medical aide.

These records are not final, because the composition of the village constantly changes; however, the information is as current and as accurate as possible. They are presented here for the use of several scientists and laymen who recognize the unique qualities of the Anaktuvuk Pass people and wish to know them better.
