10. WATER-LEVEL DATA

During first quarter 1991, water-level measurements were obtained for a continuing project in the A/M Areas. Site custodians use these data, obtained by special request and as concurrently as possible, in hydrogeologic interpretation. Some wells not routinely monitored for the EPD/EMS groundwater monitoring program are included in these data, as well as some wells outside the A/M Areas. Only water levels were measured for this project; no field tests of water characteristics are done. Ge-Hy Environmental Sampling of New Ellenton, SC, collected these data.
