FOREWORD

The purpose of this inventory of power plants is to provide a ready reference for planners whose focus is on the state, standard Federal region, and/or national level. Thus the inventory is compiled alphabetically by state within standard Federal regions. The units are listed alphabetically within electric utility systems which in turn are listed alphabetically within states. The locations are identified to county level according to the Federal Information Processing Standards Publication, FIPS PUB 6-2, Counties and County Equivalents of the States of the United States, published by the U.S. Department of Commerce.

The base data in this report were obtained from the Form 12E-2 submission to the Federal Power Commission (now Federal Energy Regulatory Commission (FERC)) and were supplemented by information from the Department of Energy's regional offices, the various state energy offices and public utility commissions, appropriate Federal agencies, direct query of some of the electric utilities, and other industry/media sources.

Particular effort was made to improve the projected unit data base for this report. However, it must be recognized that the planning cycle is dynamic. Therefore, the available data varies with the degree to which utility planning and decisionmaking have been completed on any given facility. Because of the vast differential in construction lead times between large baseload units and small peaking units, the data on peaking units beyond the 3-5 year time frame is sparse.

Any comments and/or corrections on the inventory should be addressed to the Office of Utility Project Operations, Department of Energy, Washington, D.C. 20461; Attention: Karen Marshall or Randy Pennington. The telephone number is (202) 566-9511.

DEFINITIONS

I. HEADINGS

A. ALL SECTIONS

1. COUNTY CODE - National Bureau of Standards, Federal Information Processing Standards Publication (FIPS Pub 6-2, September 15, 1973).

2. COMPANY NAME - Self-explanatory

3. UNIT IDENTIFICATION AND NUMBER - Self-explanatory.

4. NPLT RATE - The rating assigned by the generator manufacturer appearing on the unit nameplate.

5. TYP UN - Type of unit

6. PRIM FUEL - Primary Fuel

B. TOTAL INVENTORY AND JOINT OWNERSHIP SECTIONS ONLY

1. ALT FUEL - Alternate Fuel

2. STATUS - Existing or Projected

3. DATE - For an existing unit, the date the unit commenced operation. For a projected unit, the current best estimate of the date operation will begin. The symbol "???" here means the unit has been indefinitely postponed.

4. LAST UPDATE - The date the data entry for each unit was last changed or checked for accuracy.

C. TOTAL INVENTORY SECTION ONLY

Jointly owned - yes or no to indicate whether a unit is owned by more than one utility.

D. PROJECTED CONSTRUCTION SECTION ONLY

1. EIS STATUS - A two-part code separated by a slash mark indicating the status of the Environmental Impact Statement. One letter code to the left of the slash:

   P - In Preparation
   D - In Draft Form
   F - In Final Form
   I - Not yet determined if an EIS is required.
   N/A - Not applicable

   Three or four letter code to the right of slash (see Agency Acronym Section) indicating the agency responsible for preparation of the EIS.

2. PRIME COMPONENT ORDER - Coded as Follows:

   a. Four Integer Date - The actual known primary component order date.

   b. YES - It is known that an order has been placed for the primary component but the date is unknown.

   c. NO - It is known that an order has not been placed for the primary component.

   d. BLANK - Indicates no information available.

3. PRIME COMPONENT DELIVERY - Coded as Follows:

   a. Four Integer Date - The actual known delivery date or the projected future delivery date of primary unit component; e.g., boiler of a steam turbine unit.

   b. YES - It is known that delivery has been made but the date of delivery is not known.

   c. NO - It is known that primary component delivery has not been made.

   d. BLANK - Indicates no information available.

4. DELAY: CAUSE/EFFECT. A two part code separated by a slash mark indicating by the code left of the slash the cause of any construction delay and by the code right of the slash the effect this delay has had. The cause and effect codes are as follows.

CAUSE:

A - Equipment problems: e.g., late delivery, failure, faulty installation.

B - Rescheduling of associated facilities: e.g., other transmission lines.

C - Strikes: e.g., equipment manufacturer, construction or transportation labor.

D - Labor problems: e.g., shortage of construction labor, poor productivity.

E - Prolonged procedures to obtain necessary certificate or approvals from government agencies: e.g., Federal, State, local.

F - Changes in regulatory requirement.

G - Legal challenges: e.g., environmental, site, etc.

H - Financial or economic problems or conditions.

I - Revised load forecast.

J - Natural disaster.

EFFECT:

A - None

B - Affects system reliability because of resultant decrease in system reserve capability.

C - Limits intra-system power transfers.

D - Limits inter-system power transfers.

E - Limits economic or operationally preferred loading of generating units.

F - Reduces ability of system to withstand design contingency.

G - Affects ultimate customers, such as marginal voltage level at peak times.

H - Affects power transfer commitments to other systems or industrials.

5. CONST START - Construction start coded as follows:

a. Four integer actual construction start date.

b. YES - Construction started but date unknown.

c. NO - It is known that construction has not started.

d. BLANK - No information available.

6. SCHEDULED COMPLETION CURR/ORIG - For projected units the estimated on-line date, both the current and the original.

II. FUEL CODES

A. WH - Waste Heat

COL - Coal (general)

BIT - Bituminous Coal

SUB - Sub-bituminous Coal

ANT - Anthracite Coal

LIG - Lignite

PC - Petroleum Coke

LNG - Liquified Natural Gas

MTH - Methanol

GAS - Gas (general)

NG - Natural Gas

RG - Refinery Gas

BFG - Blast Furnace Gas

COG - Coke Oven Gas

UNK - Unknown at this time

GST - Geothermal Steam

MUL - Multi-fueled

REF - Refuse (solid waste)

OIL - Oil (general)

FO2 - No. 2 Fuel Oil

FO4 - No. 4 Fuel Oil

FO5 - No. 5 Fuel Oil

FO6 - No. 6 Fuel Oil

CRU - Crude Oil

TOP - Top Crude Oil

JF - Jet Fuel

KER - Kerosene

LPG - Liquid Propane Gas

RRO - Re-refined Motor Oil

SNG - Synthetic Natural Gas

UR - Uranium

PL - Plutonium

NON - None

WAT - Water

B. For purposes of the summary tables at the beginning of each regional part of the total inventory, section, fuel types are grouped as follows:

1. Nuclear - UR, PL
2. Hydro - WAT
3. Oil - FO2, FO4, FO5, FO6, CRU, TOP, OIL, MUL
4. Coal - COL, BIT, SUB, ANT, LIG
5. Gas - LNG, GAS, NG, SNG
6. Unknown - UNK
7. Other - All other fuels not specified in 1 through 6 above.

III. UNIT TYPE CODES

ST - Steam Turbine (boiler)

GE - Steam Turbine (geothermal)

IC - Internal Combustion (diesel)

GT - Combustion Turbine (gas turbine)

HY - Conventional Hydro

PS - Pumped Storage Hydro

NB - Nuclear BWR

NP - Nuclear PWR

NH - Nuclear HTGR

FC - Fuel Cell

JE - Jet Engine

NU - Nuclear unknown type at this time

UN - Unknown at this time

CT - Combined Cycle Turbine Part

CA - Combined Cycle Reheat Part with Auxiliary Heating Capability

CW - Combined Cycle Reheat Part with Only Waste Heat Capability

CC - Combined Cycle either unknown Part or Total Unit

IV. AGENCY ACRONYM SECTION

BLM - Bureau of Land Management, U.S. Department of the Interior

CAL - State of California

DRBC - Delaware River Basin Commission

EPA - Environmental Protection Agency

FERC - Federal Energy Regulatory Commission

IWBC - International Water and Boundary Commission

NRC - Nuclear Regulatory Commission

REA - Rural Electrification Administration

TVA - Tennessee Valley Authority

USBR - U.S. Brueau of Reclamation, U.S. Department of the Interior

USCE - U.S. Army Corps of Engineers, Department of Defense
