The views and opinions of authors expressed herein do not necessarily state or reflect those of the United States Government or any agency thereof.

DISCLAIMER

Portions of this document may be illegible in electronic image products. Images are produced from the best available original document.

INTRODUCTION

Each report processed by the Technical Information Center is identified by a unique report number consisting of a code plus a sequential number. In most cases, the code identifies the originating installation. In some cases it identifies a specific program or a type of publication.

Listed in this publication are all codes that have been used by DOE in cataloging reports. In recent years, it has been the policy of DOE, insofar as possible, to limit the assignment of report codes to one per installation. The majority of the codes listed herein originated before this code control was established, and are no longer in use. We continue to list them, however, because most of the reports to which they are assigned are still in existence.

This compilation consists of two parts. Part I is an alphabetical listing of report codes identified with the issuing installations which have used the codes. Part II is an alphabetical listing of installations identified with codes each has used.

When more than one code has been assigned to a report, one has been selected as the primary identifier and is so listed in Part I herein (prefixed by a plus sign). All other codes are listed in Part II as secondary (without a footnote symbol).

In both Parts I and II, the names of issuing installations appear for the most part in the form used at the time the reports were issued. For some of the more prolific installations which have had name changes, however, all entries have been merged under the current name.

Part I. List of Report Number Codes	1
Part II. List of Issuing Installations	132

PART I

LIST OF REPORT NUMBER CODES

This section includes report codes that have been used by the Technical Information Center in identifying and cataloging reports. The report codes are listed alphabetically and are identified in each case with the appropriate corporate author or agency which has used the code.

Codes are listed according to the following rules: (1) Codes beginning with numbers are ahead of those beginning with letters. (2) Hyphens, spaces between letters or numbers, and periods between numbers are considered as breaks, similar to the spaces between words observed in word-by-word filing. (3) Slashes and parentheses are not considered as breaks. (4) The terminal dash, slash, or period indicates that a sequence number will follow. (5) If a sequence number, year, month, or initials are given in the middle of a series, they are put in parentheses, e.g., CF-(yr.)-(no.)-(ANL)-(initials)-.

All non-DOE report codes are identified with an asterisk (*), and also with a plus (+), when used as prime numbers.

Only prime DOE report codes are identified with a plus. Secondary codes have no identifying symbol.

Harwell, Berks, England. These reports are numbered in three series, Reports are denoted by the letter R before the number, Memoranda by the letter M before the number and Lectures by the letter L before the number. In the Report series the numbers run on irrespective of the various letters before the R. The letter before the R indicated the Division producing the report, e.g., AERE-C/R-1, AERE-C/R-3, AERE-M/R-2. In the Memoranda and Lecture series, each Division has its own set of numbers, e.g., AERE-C/M-1, AERE-C/M-2, AERE-M/M-1, AERE-M/M-2, AERE-T/L-1, AERE-T/L-2. The same system of numbering reports was continued after the change of corporate name to United Kingdom Atomic Energy Authority. Research Group. Atomic Energy Research Establishment, Harwell, Berks, England, which see also; In March, 1959, a new system of numbering was adopted for this series as follows: Reports AERE-RMemoranda AERE-MLectures AE-LBibliographies AERE-BibTranslations AE-TransAnalytical Methods AERE-AM

+AERE-Catalogue no.
Gt. Brit. Atomic Energy Research Establishment,
Harwell, Berks, England

****AERE-A/M-**
United Kingdom Atomic Energy Authority. Research Group.

+GAT-

Goodyear Atomic Corp., Portsmouth, OH
The series GAT followed by a serial number is used to
identify formal reports prepared by this agency.
Prior to April, 1958, there were two divisions concerned
with technical activity--- The Laboratory Division and
the Engineering Development Division. Informal reports
from these groups were numbered in the GAT-L and
GAT-DR series. These groups were combined in the
Technical Division and the series GAT-T replaces the
GAT-L and GAT-DR series. The GAT-T series starts
with GAT-T-501, a continuation of the GAT-L series.
GAT-DR series ceased with GAT-DR-300.

- *IFYGL-TMS-
International Hydrological Decade, Ottawa, Ontario,
Canada
- *IG- (see CAL-IG-(no)-(letter)
Cornell Aeronautical Lab., Inc., Buffalo, NY

**IG-
United Kingdom Atomic Energy Authority. Risley, Lancs,
England

IG is the common serial prefix for
the Industrial Group Reports. The letter following
the IG refers to main functional Branch. The
letters following the dash indicates the type of
report. The letters following the stroke
indicate the establishment at which the report
was written.

For example:

IGE-AM/C-1

IGE equals Industrial Group, Engineering
Branch series
AM equals Analytical Method
/C equals Culcheth Laboratories
1 means first report in the series.

There are three series numbered
straight through from number one, i.e.,
Reports, Memoranda, and Information series
identified as:

Information Series-IG-Inf.-Ser.-1,2,3, etc.
Memoranda-Memo-1,2,3, etc.
Reports-IG-Report-1,2,3, etc.

The letters following the serial number
represent the Branch and the Establishment
which issued the document. They may be
disregarded in filing.

*+PG-
United Kingdom Atomic Energy Authority. Production
Group. Risley, Lancs, England
This Group was established July 1, 1959. It
issues three series: Reports, Memoranda, and
Information Series. Each series is numbered
consecutively as follows:

Information Series PG-Inf.-Ser.-1,2,3, etc.

Memoranda PG-Memo-1,2,3, etc

Reports PG-Report-1,2,3, etc

The code following the serial number
represents the establishment which issued the
document, and has no effect on numbering or
filing.

Gt. Brit. Atomic Energy Research Establishment, Harwell,
Berks, England. These reports are numbered in three
series, Reports are denoted by the letter R before the
number, Memoranda by the letter M before the number and
Lectures by the letter L before the number. In the Report
series the numbers run on irrespective of the various
letters before the R. The letter before the R indicated
the Division producing the report, e.g.,
AERE-C/R-1, AERE-C/R-3, AERE-M/R-2.
In the Memoranda and Lecture series, each Division has its
own set of numbers, e.g.,
AERE-C/M-1, AERE-C/M-2, AERE-M/M-1, AERE-M/M-2, AERE-T/L-1,
AERE-T/L-2.

The same system of numbering reports was continued after
the change of corporate name to United Kingdom Atomic
Energy Authority. Research Group. Atomic Energy Research
Establishment, Harwell, Berks, England, which see also;
In March, 1959, a new system of numbering was adopted for
this series as follows:

Reports AERE-R
Memoranda AERE-M
Lectures AERE-L
Bibliographies AERE-Bib
Translations AERE-Trans
Analytical Methods AERE-AM
