Table - Industry Geographic Distribution

Source: Prepared by U.S. Department of Commerce, Economic Development Administration from Census tapes.

Notes: The U.S. totals are taken from the County Business Patterns published by the Census Bureau. The residual can be attributed to data withheld to avoid disclosure of individual companies or withheld to assure statistical consistency with other published series.

Zeros are printed when any of the following criteria occur:

- Not applicable
- Not available
- Negligible amount
- Withheld from publication due to consistency review
- Withheld to avoid disclosing figure for individual companies.

Subtotals for SIC - number indicate the sum of the records listed above. The same applies to subtotals for regions and divisions.

Subtotals for Region, Division, and SIC occur at the bottom of the series being summed.

Table Title - Summary Statistics for U.S. by Industry

Notes: County Business Patterns not issued for 1963.

- (-1) Not applicable
- (-2) Negligible
- (-3) Withheld from publication due to consistency review
- (-4) Withheld to avoid disclosing data for individual companies
- (-5) Not available

Data for number of employees are collected at mid-March. Taxable payrolls relate to the first quarter of the year only; they do not represent annual averages.

For manufacturing industries "reporting units" are conceptually the same as "establishments". In non-manufacturing industries, employers are counted once in each county for each industry in which they operate, regardless of the number of establishments operated.

Notes: Aggregates at the two and three digit level of SIC are unavailable for this series.

1/ Value added by manufacture is shown for this industry rather than value of shipments because the latter contains a substantial and unmeasurable amount of duplication. The calculations for the 4, 8, and 20 largest companies also are based on value added.

2/ Value of production shown for this industry rather than value of shipments. For 1963 and subsequent years, the figure includes value of primary and secondary products made, miscellaneous receipts..., scrap and other saleable refuse, and the value of products bought and resold in the same condition.

Definition: A "company" is defined as the total of the individual establishments under one ownership within an industry. Consequently the same company may appear in several industries if it has diversified activities. For a few industries, as indicated by footnotes, value added by manufacture rather than value of shipments has been used to determine the size of companies. This is considered necessary for industries in which the aggregate value of shipments contains a large amount of duplication because of shipments of semifinished products between establishments.

Labor: Total Payroll by Industry

Source: Industry Profiles, Annual Survey of Manufactures, 1971. U.S.
Department of Commerce.

1972 Census of Manufactures, Industry Series, Advance Report.
U.S. Department of Commerce.

Total payroll represents gross wages and salaries paid in the calendar year to all employees on the payroll of operating manufacturing establishments. The total includes salaries of officers of these establishments, if a corporation; it excludes payments to the proprietor or partners, if an unincorporated concern.

Labor Industry Employment, Hours and Earnings Profile

Source: Employment and Earnings, United States, 1909-72, and monthly supplements. U.S. Department of Labor, Bureau of Labor Statistics. Certain tables were drawn from unpublished sources at the Department of Labor.

Note: (-5) indicates not available. Tables are given at the most detailed level collected by the Department of Labor. Data for December, 1973, and the 1973 annual average are preliminary. Where a service sector is given, rather than a production industry, production workers should be translated as non-supervisory workers (e.g. Ground Freight Transportation). Detailed explanations of definitions and methodology are available in Employment and Earnings, United States, 1909-72 (Bulletin 1312-9), U.S. Department of Labor, Bureau of Labor Statistics.

Table - Industry Transportation Statistics

1. Means of Transport
2. Distance of Shipment
3. Shipments Distribution - Division of Origin/Destination

Transportation data cover the 48 coterminous states and the District of Columbia.

Transportation commodity classifications differ in certain areas from the SIC classification. Sub-categories under the SIC numbers reflect this difference.

SICs 2026, Fluid Milk; 2097, Manufactured Ice; and 241, Primary Forest Products are excluded because these industries primarily serve local markets.

The source of the Transportation Commodity Classification/Standard Industrial Classification concordance is the publication, Commodity Classification for Transportation Statistics, Executive Office of the President, Bureau of the Budget, 1967.

SOURCE:

Employment and Shipments, 1971 and 1972 from 1972 Census of Manufactures (Industry Series) Advance Report, and the Annual Survey of Manufactures, U. S. Department of Commerce. 1973 and 1974 estimates were drawn from the U. S. Industrial Outlook, 1974, or were provided by industry analysts, OBRA, U. S. Department of Commerce.

FOOTNOTES:

- SIC No. 2094* -- Dropping of sperm whale oil accounted for employment decline from 1971 level. Worldwide shortage of fats and oils caused climb in value of shipments.
- SIC No. 3031* -- Associated standard error = 17%
- SIC No. 3031** -- Not consistent with other Census series or related data.
- SIC No. 3212* -- Shipments include interplant transfers. There could be a modest increase in output if pollution standards are relaxed and if some bottlenecks in facilities are corrected. A new steel labor contract will be negotiated in 1974.
