Battle for nuclear power, 1874 (RHO-SA--170)
Capsule calorimeter development report, 378 (ARH--2619)
Chemical stratigraphy of Grande Ronde Basalt, Pasco Basin, south-central Washington, 1836 (RHO-BWI-SA--32)
Closure weld development for spent fuel canisters. Interim report, 252 (RHO-LD--95)
Columbia River Basalt reference sample, 3562 (RHO-SA--93)
Commercial Waste and Spent Fuel Packaging Program. Quarterly technical progress report, April-June 1979, 251 (RHO-LD--79-83-3Q)
Comparison of the microstructure of Hanford Type II concrete structures and test specimens, 1847 (RHO-C--39)
Continuous-flow apparatus for determination of ^{90}Sr in mixtures of fission products, 75 (RHO-SA--122)
Double shell slurry process test evaluation, 977 (RHO-CD--394)
Dry Well Storage Facility conceptual design study: environmental assessment. Report No. 79-8-R, 250 (RHO-C--25(Vol.2)(Draft))
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
Functional design criteria additional high-level waste handling and storage facilities, 1399 (ARH-CD--549)
Functional design criteria for EBR-II - spent fuel cask, 3010 (RHO-CD--864)
Geology of the Separation Areas, Hanford site, South-Central Washington, 1875 (RHO-ST--23)
Granulometric data 216-B Crib Facilities monitoring well sediments, 1859 (RHO-LD--45)
Hanford radioactive tank cleanout and sludge processing, 991 (RHO-ST--30)
Heat transfer analysis for a loss of institutional control event at the Waste Encapsulation and Storage Facility, 1865 (RHO-LD--100)
Identification of key radionuclides in a nuclear waste repository in basalt, 1844 (RHO-BWI-ST--9)
Inspection and evaluation of Nuclear Fuel Services high-level waste storage system. Program plan, 1856 (RHO-CD--882)
Instrument for determining viscosities and electrical resistivities of molten glass candidates for immobilizing Hanford nuclear defense wastes, 526 (RHO-SA--50)
Interactions between candidate melter electrode materals and defense waste glass melts, 989 (RHO-SA--173)
Laboratory evaluation of an ion exchange process for removing cesium from Purex acid waste solutions, 978 (RHO-CD--739)
Long-term high-level defense waste technology. Progress report, July-September 1979, 525 (RHO-LD--79-101-D)
Long-term high-level defense waste technology progress report, October-December 1979, 982 (RHO-LD--80-101-A)
Microstructural characterization of glass and ceramic simulated waste forms, 531 (SAND--79-1667C)
Nuclear fuel services waste characterization and waste removal system, 524 (RHO-CD--883)
Nuclear waste repository in basalt: preconceptual design guidelines, 1823 (RHO-BWI-CD--2(Rev.1))
Ozonation of Hanford nuclear defense waste, 985 (RHO-SA--98)
Parametric study of glass formulations, 1868 (RHO-SA--117)
Preconceptual design management plan basalt waste isolation program basalt repository, 1824 (RHO-BWI-CD--22(Rev.1))
Preliminary criteria for shallow-land storage/disposal of low-level radioactive solid waste in an arid environment, 1855 (RHO-CD--810)
Process technology and process development. Rockwell Hanford Operations semiannual report, October 1978-March 1979, 73 (RHO-LD--79-3A)
Project plan for inspection and evaluation of Nuclear Fuel Services high-level waste storage system, 1863 (RHO-LD--97)
Radioactive liquid waste discharged to ground in the 200 Areas during 1977, 1848 (RHO-CD--34-4Q)
Radioactive liquid wastes discharged to ground in the 200 Areas during 1978, 1849 (RHO-CD--78-34-4Q)
Radioactive liquid wastes discharged to ground in the 200 areas during 1979, 1851 (RHO-CD--79-34-4Q)
Radioactive waste package acceptance criteria, 522 (RHO-CD--568)
Radioactivity in gaseous waste discharged from the separations facilities during 1978, 1850 (RHO-CD--78-35-4Q)
Radioactivity in gaseous waste discharged from the separations facilities during fourth quarter of 1979, 3245 (RHO-CD--79-35-4Q)
Rapid petrographic differentiation of the major crystalline components of synthetic Hanford evaporator slurry, 986 (RHO-SA--116)
Rate of deformation in the Pasco Basin during the Miocene as determined by distribution of Columbia River basalt flows, 1834 (RHO-BWI-SA--29)
Real-time monitoring of Hanford nuclear waste, 1871 (RHO-SA--143)
Regional basalt hydrology of the Columbia Plateau in Washington, 1816 (RHO-BWI-C--60)
Removal of radionuclides from Hanford defense waste solutions, 983 (RHO-SA--51)
Review of classification of nine Hanford single-shell questionable integrity tanks, 1857 (RHO-CD--896)
Risk perspectives in waste management, 1870 (RHO-SA--142)
Sealing a nuclear waste repository in Columbia River basalt: preliminary results, 1839 (RHO-BWI-SA--50)
Site identification presentation: Basalt Waste Isolation Project, 1828 (RHO-BWI-LD--22)
Soil (sediment) properties of twelve Hanford wells with geologic interpretation, 1862 (RHO-LD--82)
Spent fuel Receiving and Packaging Facility conceptual design, 253 (RHO-SA--136)
Standardized experimental package for spent fuel, 254 (RHO-SA--141)
Status report on studies to assess the feasibility of storing nuclear waste in Columbia Plateau basalts, 1833 (RHO-BWI-SA--25)
Strain distribution and model for formation of eastern Umtanum Ridge anticline, south-central Washington, 1835 (RHO-BWI-SA--30)
Stratigraphy of the late Cenozoic sediments beneath the 216-A Crib Facilities, 1860 (RHO-LD--71)
Structural evaluations of existing underground reinforced concrete tanks for radioactive waste storage, 1867 (RHO-SA--108)
Surface hydrologic investigations of the Columbia Plateau region, Washington, 3520 (RHO-BWI-ST--6)
Surface hydrologic investigations of the Columbia Plateau Region, Washington, 3496 (RHO-BWI-ST--6)
Technical approach to resolving issues on rock mechanics as applied to development of a nuclear waste repository in a crystalline rock formation, 1840 (RHO-BWI-SA--51)
Technical program plan, Basalt Waste Isolation Project, 1852 (RHO-CD--132(Rev.4))
Technical program plan, Basalt Waste Isolation Project, 1853 (RHO-CD--132(Rev.5))
Theoretical considerations in solid bowl centrifugation, 979 (RHO-CD--783)
Transmutation of radwaste using accelerators, 990 (RHO-SA--174)
Transuranic distribution beneath a retired underground disposal facility, Hanford Site, 1869 (RHO-SA--131)
Use of a decommissioning cost/risk/benefit analysis to identify beneficial design features, 527 (RHO-SA--148)
Volume reduction of metallic waste, 984 (RHO-SA--91)
Waste tank core drilling demonstration results, 1858 (RHO-CD--980)

AUTHOR INDEX

Authors' surnames are indexed in the form appearing in the abstracted publication; given names are reduced to initials. Each author entry gives the publication title and the citation number. Report numbers, if applicable, are given in parentheses at the end of the entry. For publications with multiple authors, an author entry is provided for each. Entries for the second and succeeding authors give references to the first author.

Because of problems involved in the mechanical preparation of this index, all accent marks are omitted. Changes in spelling introduced as a result of accent omission follow standard conventions.

SUBJECT INDEX

The subject index is based on the use of subject descriptors selected from a controlled thesaurus of terms. Subject descriptors and qualifiers (subheadings) are selected and presented in the following format:

SUBJECT DESCRIPTOR/QUALIFIER
Title, (supplementary information), citation number, (report number)

The title may be supplemented with additional words, or a phrase, if it appears additional information would be helpful. In cases for which the title contains little or no information related to the subject entry, it may be replaced entirely by the supplementary information. A qualifier is not always required, and in such cases the title will follow the unqualified subject descriptor.

The descriptors selected for use as subject terms are generally the names of specific materials, things, or processes. To the extent possible, a qualifier is selected to describe the properties of, or processes applied to, the subject term.

Index entries are selected to indicate the important ideas and concepts presented in the report, rather than words that may appear in the text. Within the available thesaurus terms, the most probable or logical place to look for typical information is selected. "See references" are included to guide users from synonymous terms or phrases to the descriptor selected as a subject heading for the concept. (e.g. Pipeline Quality Gas see HIGH BTU GAS). "See also references" are used to indicate where to find references to subject concepts that are narrower, broader, or related to a particular subject heading. to complete an exhaustive search of a given subject, all such headings should be reviewed.

A

A-1 REACTOR (BOHUNICE)
See BOHUNICE A-1 REACTOR
AAEC/RADIATION MONITORING
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
AAEC/RESEARCH PROGRAMS
Nuclear Science and Technology Branch report 1977. Divisional research, 3588 (AAEC/PR--44D)
ABANDONED SITES/DECOMMISSIONING
ORNL decontamination and decommissioning program, 676 (CONF-800416--4)
ABANDONED SITES/DECONTAMINATION
ORNL decontamination and decommissioning program, 676 (CONF-800416--4)
ABANDONED SITES/INVENTORIES
Spent fuel and waste inventories and projections, 495 (ORO--778)
ABANDONED SITES/MAINTENANCE
Continued care of uranium mill sites: some economic considerations, 2447 (PB--299754)
ABANDONED SITES/RADIATION MONITORING
Description of the Formerly Utilized Sites Remedial Action Program, 919 (ORO--777)
ABANDONED SITES/RISK ASSESSMENT
Description of the Formerly Utilized Sites Remedial Action Program, 919 (ORO--777)
A-BOMB SURVIVORS/DELAYED RADIATION EFFECTS
Late radiobiological effects of A-bombing in Japan. A report on the international investigation carried out in July 1977, 3690
ACCELERATOR BREEDERS
APEX accelerator cycle for transmutation of long-lived fission wastes, 622 (BNL--28282)
ACCELERATOR FACILITIES/DECOMMISSIONING
Decommisioning plan for particle accelerators, 3596 (CONF-790923--8)
ACCELERATOR FACILITIES/ENVIRONMENTAL IMPACTS
Radiological impact of high-energy accelerators on the environment, 3216 (KEK--78-20)
ACCELERATOR FACILITIES/RADIOACTIVE EFFLUENTS
Radiological impact of high-energy accelerators on the environment, 3216 (KEK--78-20)
ACCELERATORS
See also BETATRONS
CAMBRIDGE ELECTRON ACCELERATOR
COSMOTRON
CYCLOTRONS
FERMILAB ACCELERATOR
LINEAR ACCELERATORS
ORSAY CYCLOTRON
VAN DE GRAAFF ACCELERATORS
ACCELERATORS/DECOMMISSIONING
Decommisioning plan for particle accelerators, 3596 (CONF-790923--8)
Health physics considerations in accelerator decommissioning and disposal, 1725 (PB--296947)
ACCELERATORS/ENVIRONMENTAL IMPACTS
Radiological environmental impact of high-energy accelerators, 3267
ACCELERATORS/RADIATION HAZARDS
Radiological environmental impact of high-energy accelerators, 3267
ACCIDENTS
See also LOSS OF COOLANT
MELTDOWN
RADIATION ACCIDENTS
REACTOR ACCIDENTS
REACTOR CORE DISRUPTION
ACCIDENTS/MATHEMATICAL MODELS
Meteorology and demography models for risk assessments of accidental atmospheric releases of nuclear waste. Phase 2 methodology, 2558 (UCID--17930)
ACCIDENTS/RADIATION DOSES
Hanford high-level waste, 3376 (PNL--3300(Pt.2))
ACCIDENTS/RADIATION HAZARDS
Effect of emergency discharge of nuclear facilities effluents on hydrosphere, 3466 (CS-INIS--258)
ACIDS (ORGANIC)
See ORGANIC ACIDS
ACTINIDE BURNER REACTORS
Power production and actinide elimination by fast reactor recycle, 2795
ACTINIDE COMPOUNDS/CHEMICAL PROPERTIES
Long term chemical and physical integrity and stability of condensed phases of actinides, 2400
ACTINIDE COMPOUNDS/PHYSICAL PROPERTIES
Long term chemical and physical integrity and stability of condensed phases of actinides, 2400
ACTINIDES/ABSORPTION SPECTROSCOPY
Analysis of the concentrate of liquid HAW in the WAK, 2630
ACTINIDES/ADSORPTION
Chemical factors controlling actinide sorption in the environment, 2188
Interaction of actinides and humic acid, 2190
Mineral-contributed anion effects on the retention of trivalent actinides in the environment, 2192
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
ACTINIDES/AFTER-HEAT
Decay heat, 2847
ACTINIDES/ALPHA SPECTROSCOPY
Analysis of the concentrate of liquid HAW in the WAK, 2630
ACTINIDES/BUILDUP
Theoretical and experimental analyses of actinide build-up and α-wastes for nuclear disposal, 552
ACTINIDES/CHEMICAL BONDS
X-ray photoemission spectroscopy (XPS) and extended x-ray absorption fine structure (EXAFS) studies of silicate based glasses, 1796 (PNL-SA--7992)
ACTINIDES/CHEMICAL REACTIONS
Chemical compatibility of HLW borosilicate glasses with actinides. Solubilities and segregation processes, 1540 (KFK--2552)
ACTINIDES/CHEMICAL STATE
Radiolytic oxidation and reduction of plutonium, 1431 (CONF-791112--49)
ACTINIDES/COST
Actinide partitioning-transmutation program. V. Preconceptual designs and costs of partitioning

facilities and shipping casks, Appendix 4. Final report, 65 (ORNL/Sub--79/31056/1/A4)
ACTINIDES/ELECTROPHORESIS
Separation of actinides from high active waste by means of counter current ion migration, 1048
ACTINIDES/EMISSION SPECTROSCOPY
Analysis of the concentrate of liquid HAW in the WAK, 2630
ACTINIDES/ENVIRONMENTAL EXPOSURE PATHWAY
Effect of a long-term release of plutonium and americium into an estuarine-coastal sea ecosystem. 1. Development of an assessment methodology, 3484
Geochemistry of radioactive waste disposal, 2135
ACTINIDES/ENVIRONMENTAL TRANSPORT
Assessment of effectiveness of geologic isolation systems. Test case release consequence analysis for a spent fuel repository in bedded salt, 1730 (PNL--2782)
ACTINIDES/GAMMA SPECTROSCOPY
Analysis of the concentrate of liquid HAW in the WAK, 2630
ACTINIDES/GEOCHEMISTRY
Geochemistry of radioactive waste disposal, 2135
ACTINIDES/LEACHING
Actinide recovery from combustible waste: the Ce(IV)-NHO_3 system. Final report, 969 (RFP--2907)
Leaching characteristics of actinides from simulated reactor waste glass, 1790 (PNL-SA--7992)
Waste management analysis for the nuclear fuel cycle: actinide recovery from combustible waste, October 1977-March 1978, 967 (RFP--2798)
ACTINIDES/MASS SPECTROSCOPY
Analysis of the concentrate of liquid HAW in the WAK, 2630
ACTINIDES/MATERIALS RECOVERY
Overall assessment of actinide partitioning and transmutation for waste management purposes, 413 (CONF-800444--1)
ACTINIDES/MEETINGS
Actinide separations, 82
ACTINIDES/PARTITION
Actinide partitioning-transmutation program final report. I. Overall assessment, 63 (ORNL--5566)
Actinide Partitioning-Transmutation Program Final Report. V. Preconceptual designs and costs of partitioning facilities and shipping casks (appendix 3), 64 (ORNL/Sub--79/31056/1/A3)
Actinide partitioning-transmutation program. V. Preconceptual designs and costs of partitioning facilities and shipping casks, Appendix 4. Final report, 65 (ORNL/Sub--79/31056/1/A4)
Actinide partitioning-transmutation program final report. VII. Long-term risk analysis of the geologic repository, 1674 (ORNL/TM--6987)
ACTINIDES/RADIOACTIVE WASTE PROCESSING
Recovering actinide values (Patent), 1028
ACTINIDES/RADIONUCLIDE KINETICS
Radioecology of nuclear fuel cycles, 3477 (PNL--3300(Pt. 2))
ACTINIDES/RADIONUCLIDE MIGRATION
Radioecology of nuclear fuel cycles, 3477 (PNL--3300(Pt. 2))
ACTINIDES/RECOVERY
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Recovery of actinides from TBP-Na_2Co_3 scrub-waste solutions: the ARALEX process, 616 (ANL--79-74)
Recovery of plutonium from HEPA filters by Ce(IV): promoted dissolution of PuO_2 and recycle of the cerium promoter, 911 (ORNL/TM--6802)
Recovery of plutonium from HEPA filters by Ce(IV)-promoted dissolution of PuO_2 and recycle of the cerium promoter, 38 (CONF-800743--1)
ACTINIDES/RECYCLING
Actinide partitioning-transmutation program final report. VI. Short-term risk analysis of reprocessing, refabrication, and transportation: appendix, 2537 (ORNL/Sub--80/31048/1)
ACTINIDES/REMOVAL
Removal of radionuclides from Hanford defense waste solutions, 983 (RHO-SA--51)
Removal of actinides from nuclear fuel reprocessing wastes: engineering studies, 679 (CONF-800743--12)
ACTINIDES/SCINTILLATION COUNTING
Analysis of the concentrate of liquid HAW in the WAK, 2630
ACTINIDES/SEPARATION PROCESSES
Actinide separations, 82
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Current views on the importance of separating long-lived alpha emitters from high-level wastes from spent fuel reprocessing, 1105
Methods for separating actinides from reprocessing and refabrication plant wastes, 668 (CONF-791112--63)
Separation of actinides from Purex-type high active waste raffinates: development of experimental studies at JRC-ISPRA establishment, 1047
Studies on actinides separation in JAERI, 83
ACTINIDES/SOLVENT EXTRACTION
Distribution ratios and empirical equations for the extraction of elements in Purex high level waste solution. 1. TBP, 1242
Method for the recovery of actinide elements from nuclear reactor waste (Patent), 1114
Recovering actinide values (Patent), 1028
Recovery process (Patent), 562
Removal of actinides from selected nuclear fuel reprocessing wastes, 1179
Removal of actinides from nuclear fuel reprocessing wastes using an organophosphorous extractant (OHDECMP), 37 (CONF-800610--2)
Removal of actinides from nuclear reprocessing wastes: a pilot plant study using non-radioactive simulants, 1440 (CONF-800918--3)
Removal of actinides from nuclear fuel reprocessing wastes: engineering studies, 675 (CONF-800743--12)
ACTINIDES/TRANSMUTATION
Actinide partitioning-transmutation program final report. I. Overall assessment, 63 (ORNL--5566)
Actinide Partitioning-Transmutation Program Final Report. V. Preconceptual designs and costs of partitioning facilities and shipping casks (appendix 3), 64 (ORNL/Sub--79/31056/1/A3)
Actinide partitioning-transmutation program. V. Preconceptual designs and costs of partitioning facilities and shipping casks, Appendix 4. Final report, 65 (ORNL/Sub--79/31056/1/A4)
Actinide partitioning-transmutation program final report. VI. Short-term risk analysis of reprocessing, refabrication, and transportation: appendix, 2537 (ORNL/Sub--80/31048/1)
Actinide partitioning-transmutation program final report. III. Transmutation studies, 912 (ORNL/TM--6983)
Actinide partitioning-transmutation program final report. VII. Long-term risk analysis of the geologic repository, 1674 (ORNL/TM--6987)
Actinide recycle in LMFBRs as a waste management alternative, 774 (GEFR-SP--215)
Critique of rationale for transmutation of nuclear waste, 1009 (UCRL--84356)
Reactor physical investigations of actinide production and transmutation in HTR reactors, 2766
Transmutation of waste actinides in thermal reactors, 2207
Transmutation of radwaste using accelerators, 990 (RHO-SA--174)
ACTINIUM/ADSORPTION
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
ACTINIUM 227/RADIOECOLOGICAL CONCENTRATION
Assessment of two-filter technique for correlating actinium-227 concentrations in soils, 3343 (ORNL/MIT--299)
ACTIVATED CARBON/SORPTIVE PROPERTIES
Adsorption of radionuclides in waste water on oxine-impregnated activated charcoal. Adsorption characteristics of manganese-54 ion, 1197
Effects of various carrier gases, temperature and intraparticle diffusivity on breakthrough characteristics of krypton in charcoal bed, 1196
Elimination of manganese-54 in waste water by oxine-impregnated activated charcoal, 1168
Radionuclide sorption and migration studies of getters for backfill barriers, 1918 (SAND--79-1110)
ACTIVITY LEVELS
Measurements of radionuclide concentrations in liquid and gaseous streams in PWR's, 2717 (CONF-791118--6)
Radioactive inventory of a decommissioned Magnox power station structure. 1. Measurements of neutron induced activity in samples from the reactor island, 2758 (CEGB-RD/B/N--4231)
ADSORBENTS
See also ACTIVATED CARBON
BIOADSORBENTS
CHARCOAL
ADSORBENTS/CATALOGS
Development of the catalog for ordinary sorption agents for low activity sewage purification, 807 (INIS-mf--5570)
ADSORBENTS/CHEMICAL PREPARATION
Method of preparing a sorbent (Patent), 3697
ADSORBENTS/EVALUATION
Development of ultrafiltration and adsorbents: April-September 1979, 889 (MLM--2684)
ADSORBENTS/RESEARCH PROGRAMS
Development of ultrafiltration and adsorbents: October 1979-March 1980, 896 (MLM--2735)
ADSORBENTS/SPECIFIC HEAT
Studying thermophysical properties of high-active secondary products of reprocessing of the BOR-60 reactor spent fuel elements by fluoride gaseous method, 54 (INIS-mf--5564)
ADSORBENTS/THERMAL CONDUCTIVITY
Studying thermophysical properties of high-active secondary products of reprocessing of the BOR-60 reactor spent fuel elements by fluoride gaseous method, 54 (INIS-mf--5564)
ADSORPTION/MEASURING METHODS
Methods for determining radionuclide retardation factors: status report, 1759 (PNL--3349)
ADVANCED THERMAL REACTOR FUGEN
See JATR REACTOR
AEROSOL MONITORING/LI-DRIFTED GE DETECTORS
Comparison of gamma-spectrometric techniques for environmental monitoring of nuclear installations, 3629

AEROSOL MONITORING/SOLID SCINTILLATION DETECTORS
Comparison of gamma-spectrometric techniques for environmental monitoring of nuclear installations, 3629
AEROSOLS
See also RADIOACTIVE AEROSOLS
AEROSOLS/ENVIRONMENTAL TRANSPORT
Use of the indicator activation method in studies of the propagation of pollutants in the atmosphere, 3185
AEROSOLS/LABELLING
Use of the indicator activation method in studies of the propagation of pollutants in the atmosphere, 3185
AFR STORAGE
See AWAY-FROM-REACTOR STORAGE
AGRICULTURAL WASTES/PRODUCTION
Overview of solid waste generation in the United States, 3100 (LA--8172-MS)
AGRICULTURAL WASTES/WASTE DISPOSAL
Disposal of hazardous wastes, 592
AGRICULTURE
See also SOIL CHEMISTRY
AGRICULTURE/TRACER TECHNIQUES
Application of atomic energy in agriculture. Annual Report 1978, 3371 (INIS-mf--5349)
AIR
See also EARTH ATMOSPHERE
SURFACE AIR
AIR/RADIATION MONITORING
1978 annual environmental report. Volume 2. Radiological, 3195 (DOE/PNRO--0292-T1)
Measurement of environmental radioactivity. Ispra 1977, 3207 (EUR--6180)
AIR/RADIOACTIVITY
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
AIR CLEANING/SHIELDING
Gas scrubber, installation and process to make use of it, 3289
AIR FILTERS
Plant for separating gaseous hydrocarbons and radioactive iodine isotopes from waste air (Patent), 1191
AIR FILTERS/DESIGN
Device for filtering gaseous media (Patent), 3674
AIR FILTERS/EFFICIENCY
Assessment of the acceptability of performance of installed iodine trapping plant, 3225 (ND-R--52(W))
Determination of the aerosol filters efficiency by means of the tracer techniques, 845 (INIS-mf--5574)
Isotope composition of iodine in gaseous effluents of nuclear facilities and iodine filter efficiency, 2927 (INIS-mf--4637)
Reduction of iodine emissions from nuclear facilities, 851 (INKA-Conf--78-156-000)
AIR FILTERS/ELECTRIC CHARGES
Investigation on electrostatic interaction of aerosols particles and aerosol filters materials, 846 (INIS-mf--5574)
AIR FILTERS/PERFORMANCE TESTING
Comparison of HEPA filter test methods in corrosive environments, 765 (ENICO--1037)
AIR FILTERS/RADIOACTIVE WASTE DISPOSAL
Method and equipment to exchange and remove the waste from aerosol filter elements for nuclear plants in a sealed casing (Patent), 3290
AIR FILTERS/SPECIFICATIONS
Improvements in particle-in-gas filtering (Patent), 3693
AIR FILTERS/TESTING
Experimental devices for standard testing of filters design in the State board for nuclear safety and radiation protection of the German Democratic Republic, 459 (INIS-mf--5574)
AIR FILTERS/WASTE MANAGEMENT
Active carbon filters for waste gas decontamination in nuclear power stations, and exchange of contaminated carbon, 2682
AIR POLLUTION/AEROSOLS
Use of the indicator activation method in studies of the propagation of pollutants in the atmosphere, 3185
AIR POLLUTION/ENVIRONMENTAL TRANSPORT
Accuracy estimation of the Gauss model for pollution spreading on discharge from elevated source and classification of the atmosphere states for modeling of impurities spreading, 3182 (INIS-mf--5574)
AIR POLLUTION/MONITORING
Determination of pollution spreading areas from nuclear power plants by means of the post-irradiation analysis method, 3181 (INIS-mf--5574)
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
ALABAMA/GEOMORPHOLOGY
Assessment of effectiveness of geologic isolation systems. Geologic factors in the isolation of nuclear waste: evaluation of long-term geomorphic processes and catastrophic events, 1734 (PNL--2854)
ALAP
See RADIATION PROTECTION
ALARA
See RADIATION PROTECTION
ALARM DOSEMETERS
See RADIATION MONITORS
ALBITE/SORPTIVE PROPERTIES
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Chemical reactions in the bedrock-groundwater system of importance for the sorption of actinides, 1433 (CONF-791112--58)
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
ALCOHOLS/CHEMICAL REACTIONS
Organic compounds identified in trench leachates from low-level radioactive waste disposal sites, 3449
ALCOHOLS/LEACHING
Organic compounds identified in trench leachates from low-level radioactive waste disposal sites, 3449
ALFALFA/PLANT GROWTH
Emergence and growth of plant species in coal mine soil, 3301
ALGAE
See also FUCUS
ALGAE/CONTAMINATION
Preliminary results on accumulation and loss of artificial radionuclides in marine benthic algae, 3492
ALGAE/RADIONUCLIDE KINETICS
Preliminary results on accumulation and loss of artificial radionuclides in marine benthic algae, 3492
ALKALI METALS
See also CESIUM
POTASSIUM
RUBIDIUM
SODIUM
ALKALI METALS/ADSORPTION
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
ALKALI METALS/DISTRIBUTION FUNCTIONS
Ion-exchange equilibria between montmorillonite and solutions of moderate-to-high ionic strength, 3579
ALKALI METALS/ION EXCHANGE
Ion-exchange equilibria between montmorillonite and solutions of moderate-to-high ionic strength, 3579
ALKALINE EARTH METALS

ALLOY-MA-754
See NICKEL BASE ALLOYS
ALLOY-WAZ-16
See NICKEL BASE ALLOYS
ALLUVIAL DEPOSITS/ADSORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
ALLUVIAL DEPOSITS/DESORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
ALPHA SOURCES/MATERIALS HANDLING
Handling of alpha active material, 2557 (STUDSVIK/K1/4--78/9)
ALUMINA
See ALUMINIUM OXIDES
ALUMINIUM/ACTIVATION ANALYSIS
Trace elements retained in washed nuclear fuel reprocessing solvents, 43 (DP--1527)
ALUMINIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
ALUMINIUM/ION IMPLANTATION
Krypton entrapment in pulse biased sputter-deposited metals, 1762 (PNL-SA--6698)
ALUMINIUM OXIDES/CHEMICAL ANALYSIS
Al_2O_3 samples exposed to simulated underground water have been investigated by Electron Spectroscopy for Chemical Analysis (ESCA), 1534 (KBS-TR--113)
ALUMINIUM OXIDES/CHEMICAL PROPERTIES
Characterization of pollucite as a material for long-term storage of cesium-137, 2161
ALUMINIUM OXIDES/CORROSION RESISTANCE
Corrosion resistance of canisters for final disposal of spent nuclear fuel, 2262
ALUMINIUM OXIDES/MICROSTRUCTURE
Characterization of pollucite as a material for long-term storage of cesium-137, 2161
Other projects, 474 (LBL--10000)
ALUMINIUM OXIDES/PHYSICAL PROPERTIES
Characterization of pollucite as a material for long-term storage of cesium-137, 2161

ALUMINIUM OXIDES/SORPTIVE PROPERTIES
Systematic study of nuclide adsorption on selected geologic media. Annual progress report, October 1, 1978-September 17, 1979, 2463 (PNL-SA--8571(Vol.2))
ALUMINIUM OXIDES/STABILITY
Al_2O_3 samples exposed to simulated underground water have been investigated by Electron Spectroscopy for Chemical Analysis (ESCA), 1534 (KBS-TR--113)
ALUMINIUM SILICATES
See also KAOLINITE
SMECTITE
VERMICULITE
Pollucite and its alteration in geological occurrences and in deep-burial radioactive waste disposal, 2257
ALUMINIUM SILICATES/RAMAN SPECTRA
Raman spectra of cesium aluminosilicate waste forms, 1224
AMBERLITE
See ORGANIC ION EXCHANGERS
AMERICIUM/ACTIVATION ANALYSIS
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
AMERICIUM/ADSORPTION
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1978, 1774 (PNL-SA--7352(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1979, 2468 (PNL-SA--8571(Vol.2))
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Nuclear waste chemistry, 488 (ORNL--5665)
Nuclide transport by groundwater in Swedish bedrock, 2581
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0988C)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, July 1-September 30, 1979, 1550 (LA--8152-PR)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, October 1-December 31, 1979, 2435 (LA--8309-PR)
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
Sorption of americium on major rock-forming minerals, 2191
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
Systematic study of nuclide adsorption on selected geologic media. Annual progress report, October 1, 1978-September 17, 1979, 2463 (PNL-SA--8571(Vol.2))
Theoretical and experimental evaluation of waste transport in selected rocks, 1768 (PNL-SA--7352(Vol.1))
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
AMERICIUM/AUTORADIOGRAPHY
Autoradiographic studies of actinide sorption in groundwater systems, 3432 (CONF-800433--4)
Autoradiographic study of actinide sorption on climax stock granite, 1662 (ORNL--5617)
AMERICIUM/CALORIMETRY
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
AMERICIUM/CHEMICAL PROPERTIES
Chemistry of protactinium, neptunium, americium, and curium in the nuclear fuel cycle, 24
AMERICIUM/DESORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
AMERICIUM/DISTRIBUTION FUNCTIONS
Methods for solvent extraction of strontium 90 with carboxylic acids and separation of americium and curium by quaternary ammonium compounds, 791 (INIS-mf--5564)
AMERICIUM/ENVIRONMENTAL EXPOSURE PATHWAY
Effect of a long-term release of plutonium and americium into an estuarine-coastal sea ecosystem. 1. Development of an assessment methodology, 3484
AMERICIUM/ENVIRONMENTAL TRANSPORT
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
Transuranic distribution beneath a retired underground disposal facility, Hanford Site, 1869 (RHO-SA--131)
AMERICIUM/EXTRACTION CHROMATOGRAPHY
Recovery and purification of americium from molten salt extraction residues, 976 (RFP--3079)
AMERICIUM/FISSION PRODUCTS
Development of ultrafiltration and adsorbents: April-September 1979, 889 (MLM--2684)
AMERICIUM/ION EXCHANGE
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Chemistry research and development. Progress report, November 1978-April 1979, 971 (RFP--2952)
Kilogram-scale purification of americium by ion exchange, 72 (PNL-SA--7844)
Recovery, purification, and concentration of plutonium and americium from the aqueous wastes discharged in the reprocessing studies, 1020 (LA-tr--80-17)
Recovery and purification of americium from molten salt extraction residues, 976 (RFP--3079)
Removal of plutonium and americium from alkaline waste solutions (Patent), 1156
Separation of americium, curium, and rare earths from high-level wastes by oxalate precipitation: experiments with synthetic waste solutions, 910 (ORNL/TM--6445)
AMERICIUM/LEACHING
Leaching of actinides and technetium from simulated high-level waste glass, 513 (PNL--3152)
AMERICIUM/METABOLISM
Metabolism and biological effects of the transplutonium elements, 3700
AMERICIUM/PRECIPITATION
Recovery, purification, and concentration of plutonium and americium from the aqueous wastes discharged in the reprocessing studies, 1020 (LA-tr--80-17)
Separation of americium, curium, and rare earths from high-level wastes by oxalate precipitation: experiments with synthetic waste solutions, 910 (ORNL/TM--6445)
AMERICIUM/PURIFICATION
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Chemistry research and development. Progress report, November 1978-April 1979, 971 (RFP--2952)
AMERICIUM/RADIOACTIVE WASTE PROCESSING
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
Recovery of actinide values (Patent), 1124
AMERICIUM/RADIONUCLIDE MIGRATION
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0988C)
AMERICIUM/RECOVERY
Bidentate organophosphorus extraction of americium and plutonium from Hanford Plutonium Reclamation Facility waste, 618 (ARH-SA--203)
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Chemistry research and development. Progress report, November 1978-April 1979, 971 (RFP--2952)
Recovery of Am-Cm from high-activity waste concentrate by in-canyon-tank precipitation as oxalates, 737 (DP-MS--80-35)
AMERICIUM/SEPARATION PROCESSES
Recovery of actinoids from waste solutions of fuel reprocessing. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, 2, 859 (JAERI-M--8339)
Separation methods used for large-scale production of transplutonium elements. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, (1), 858 (JAERI-M--8240)
AMERICIUM/SOLVENT EXTRACTION
Bidentate organophosphorus solvent extraction process for actinide recovery and partition, 1085
Chemistry research and development. Progress report, November 1978-April 1979, 971 (RFP--2952)
Extraction of americium, curium, strontium and rare earths from aqua-tail solutions of WWER spent fuel element reprocessing, 58 (INIS-mf--5567)
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
Radiation effects on the separation of lanthanides and transplutonides by the TALSPEAK-type extraction, 1244
Recovery of actinide values (Patent), 1124
Recovery process (Patent), 562
Reducing the long-term hazard of reactor waste through actinide removal and destruction in nuclear reactors, 1024
Removal of actinides from selected nuclear fuel reprocessing wastes, 1179
AMERICIUM/SORPTION
Autoradiographic studies of actinide sorption in groundwater systems, 3432 (CONF-800433--4)
Autoradiographic study of actinide sorption on climax stock granite, 1662 (ORNL--5617)
Chemical reactions in the bedrock-groundwater system of importance for the sorption of actinides, 1433 (CONF-791112--58)
Microautoradiographic studies of the sorption of U and

Am on natural rock samples, 2100
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
Radionuclide sorption and migration studies of getters for backfill barriers, 1918 (SAND--79-1110)
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
AMERICIUM/TOXICITY
Metabolism and biological effects of the transplutonium elements, 3700
AMERICIUM 241/ADSORPTION
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
Evaluation of isotope migration: land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Quarterly progress report, October-December 1979, 1613 (NUREG/CR--1325)
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
AMERICIUM 241/DISTRIBUTION
Anion effects on the retention of selected actinides on geologic media, 1683 (ORO--4447-102)
AMERICIUM 241/ENVIRONMENTAL TRANSPORT
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
Leaching technique for studying actinide-contaminated Hanford sediments, 1864 (RHO-LD--98)
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
AMERICIUM 241/EXTRACTION CHROMATOGRAPHY
Application of extraction chromatography to the recovery of neptunium, plutonium and americium from an industrial waste, 1023
AMERICIUM 241/GAMMA SPECTROSCOPY
Nondestructive assay system for use in decommissioning a plutonium-handling facility, 29
AMERICIUM 241/ISOTOPE PRODUCTION
Recovery of by-product actinides from power reactor fuels and production of heat source isotopes, 1046
AMERICIUM 241/LEACHING
Leaching technique for studying actinide-contaminated Hanford sediments, 1864 (RHO-LD--98)
AMERICIUM 241/PURIFICATION
Kilogram-scale purification of americium by ion exchange, 72 (PNL-SA--7844)
AMERICIUM 241/RADIATION MONITORING
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
AMERICIUM 241/RADIOCHEMICAL ANALYSIS
Radiochemical analyses of samples from beneath a solid radioactive waste disposal pit at Los Alamos, New Mexico, 1558 (LA--8422-MS)
AMERICIUM 241/RADIOECOLOGICAL CONCENTRATION
Concentrations of the transuranic radionuclides ^{238}Pu, ^{239,240}Pu, ^{241}Am, ^{242}Cm, and ^{244}Cm in abiotic and biotic components of the Test Reactor Area radioactive leaching ponds, 3472 (IDO--12088)
Ecology studies at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3365 (IDO--12088)
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
Transfer of actinides from the English Channel into the southern North Sea, 3453
AMERICIUM 241/RADIONUCLIDE MIGRATION
Evaluation of isotope migration, land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
Transfer of actinides from the English Channel into the southern North Sea, 3453
AMERICIUM 241/SORPTION
Anion effects on the retention of selected actinides on geologic media, 1683 (ORO--4447-102)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
AMERICIUM 243/ADSORPTION
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
AMERICIUM 243/DISTRIBUTION FUNCTIONS
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
AMERICIUM 243/PURIFICATION
Kilogram-scale purification of americium by ion exchange, 72 (PNL-SA--7844)
AMERICIUM COMPOUNDS/RADIOACTIVE WASTE PROCESSING
Apparatus to filter, dry, and fill radioactive suspensions in particular (Patent), 1078
AMERICIUM ISOTOPES/ENVIRONMENTAL TRANSPORT
Chemical migration of radionuclides in soil, 3350
Radioactive waste/soil interactions-migration potential of radionuclides through four soils, 2309
Transuranic distribution beneath a retired underground disposal facility at the Hanford Site, 2506
AMERICIUM ISOTOPES/LEACHING
Chemical migration of radionuclides in soil, 3350
AMERICIUM ISOTOPES/MIGRATION
Chemical migration of radionuclides in soil, 3350
AMERICIUM ISOTOPES/SPATIAL DISTRIBUTION
Transuranic distribution beneath a retired underground disposal facility at the Hanford Site, 2506
AMERICIUM OXIDES/RECOVERY
Chemistry research and development. Progress report, November 1978-April 1979, 971 (RFP--2952)
AMES LABORATORY/RADIATION MONITORING
Aerial radiological survey of US Department of Energy sites in Ames, Iowa. Date of survey: May 1977, 3318 (EGG--1183-1686)
Environmental monitoring at Ames Laboratory: Calendar year 1979, 3214 (IS--4734)
AMMONIUM NITRATES/HEALTH HAZARDS
Uranium waste as fertilizer, 2149
AMMONIUM NITRATES/PYROLYSIS
Contribution to the treatment of low level radioactive waste solutions from the fabrication or refabrication of nuclear fuel containing ammonium nitrate, 860 (Juel--1593)
AMPHIBOLE
See also HORNBLENDE
AMPHIBOLE/SORPTIVE PROPERTIES
Sorption of americium on major rock-forming minerals, 2191
ANAEROBIC DIGESTION/OPTIMIZATION
Effect of gamma radiation on yields of methane gas from the anaerobic bacterial digestion of sewage sludge, 1348
ANDCO-TORRAX SLAGGING PYROLYSIS SYSTEM
See SLAGGING PYROLYSIS PROCESS
ANGIOGRAPHY
See BIOMEDICAL RADIOGRAPHY
ANHYDRITE/SOLUBILITY
P-T-X relations of anhydrite and brine and their implications for the suitability of anhydrite as a nuclear waste repository medium, 2266
ANHYDRITE/SORPTIVE PROPERTIES
Chemical reactions in the bedrock-groundwater system of importance for the sorption of actinides, 1433 (CONF-791112--58)
Mineral-contributed anion effects on the retention of trivalent actinides in the environment, 2192
ANIMAL FEEDS/RESEARCH PROGRAMS
Beneficial Uses Program. Progress report for period ending June 30, 1978 (Irradiated sewage sludge), 3619 (SAND--78-1951)
ANIMALS
(See also specific animal names.)
See also AQUATIC ORGANISMS
LABORATORY ANIMALS
WILD ANIMALS
ANIMALS/IRRADIATION PLANTS
Conception design for experimental facility of the research on internal emitters, 1599 (NIRS-R--7)
ANL
(Argonne National Laboratory.)
ANL/ENVIRONMENTAL IMPACTS
Environmental monitoring at Argonne National Laboratory. Annual report for 1979, 3304 (ANL--80-29)
ANL/RADIATION MONITORING
Environmental monitoring at Argonne National Laboratory. Annual report for 1979, 3304 (ANL--80-29)
ANL/WATER POLLUTION
Environmental monitoring at Argonne National Laboratory. Annual report for 1979, 3304 (ANL--80-29)
ANNULAR SPACE/NATURAL CONVECTION
Experimental study of the steady natural convection in a horizontal annulus with irregular boundaries, 3620 (SAND--79-2354C)
ANORTHOSITES/SORPTIVE PROPERTIES
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
ANTARCTICA/CONTAMINATION
The story of nukey poo, 1309
ANTELOPES/BIOLOGICAL RADIATION EFFECTS
^{129}I in thyroids of herbivores on the Idaho National Engineering Laboratory Site, 3369 (IDO--12088)
ANTELOPES/BODY BURDEN
Plutonium in the lungs of pronghorn antelope near a nuclear fuel reprocessing plant, 3379
ANTENNAS/DESIGN
Design of a miniature directional antenna for geophysical probing from boreholes, 3679
ANTIMONY/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
ANTIMONY/SORPTION
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
ANTIMONY 125/ENVIRONMENTAL EXPOSURE PATHWAY
Determination of safe radioactive releases to the atmosphere from the nuclear power site, Duynefontein, 3360 (CONF-7604154--)

ANTIMONY 125/RADIATION MONITORING
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
APATITES/SORPTIVE PROPERTIES
Anion effects on the retention of selected actinides on geologic media, 1683 (ORO--4447-102)
Chemical reactions in the bedrock-groundwater system of importance for the sorption of actinides, 1433 (CONF-791112--58)
Mineral-contributed anion effects on the retention of trivalent actinides in the environment, 2192
APPARATUS
See EQUIPMENT
AQUATIC ECOSYSTEMS/CONTAMINATION
Analysis of the 1957-58 Soviet nuclear accident, 3233 (ORNL--5613)
Panel summary report, 3488
AQUATIC ECOSYSTEMS/NATURAL RADIOACTIVITY
Some aspects of the accumulation of natural radionuclides in aquatic products and vegetation around a uranium complex, 3322 (INIS-mf--5372)
AQUATIC ECOSYSTEMS/RADIATION MONITORING
Detection and measurement of curium in the marine environment, 3414 (COO--3563-78)
In situ data on various sites of radioactive releases into the marine environment, 2503
AQUATIC ECOSYSTEMS/RADIOECOLOGICAL CONCENTRATION
Bibliography of marine radiation ecology prepared for the Seabed Program, 1965 (SAND--79-7102)
Marine radioecology. A study of the fate of radionuclides released into the marine environment and applications to radiation protection, 3456
Radiological aspects of sea bed dumping in the deep oceans, 1798 (PNL-SA--8011)
AQUATIC ECOSYSTEMS/RADIOECOLOGY
Nuclear waste ponds and streams on the Hanford site: an ecological search for radiation effects, 3480
Radioactivity in the marine environment. Chapter 15, 3430
AQUATIC ECOSYSTEMS/RADIONUCLIDE KINETICS
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1949 (SAND--79-2117C)
AQUATIC ECOSYSTEMS/RADIONUCLIDE MIGRATION
Analysis of the 1957-58 Soviet nuclear accident, 3233 (ORNL--5613)
Concentrations of the transuranic radionuclides ^{238}Pu, $^{239,240}Pu$, ^{241}Am, ^{242}Cm, and ^{244}Cm in abiotic and biotic components of the Test Reactor Area radioactive leaching ponds, 3472 (IDO--12088)
Distribution and avian export of gamma emitting radionuclides at the Test Reactor Area leaching ponds, 3471 (IDO--12088)
In situ data on various sites of radioactive releases into the marine environment, 2503
Marine example of a site protection study, 2422 (IAEA--212)
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
Relative potential hazards of radioactive waste in various water systems, 2559 (UCRL--15121)
AQUATIC ORGANISMS
(Unspecified biota characteristic of aquatic ecosystems.)

CRUSTACEANS
FISHES
MOLLUSCS
AQUATIC ORGANISMS/BIOLOGICAL RADIATION EFFECTS
Bibliography of marine radiation ecology prepared for the Seabed Program, 1965 (SAND--79-7102)
AQUATIC ORGANISMS/CONTAMINATION
Distribution of cobalt 60 in a mollusc, a crustacean and a freshwater teleost: variations as a function of the source of pollution and during elimination, 3483
AQUATIC ORGANISMS/ENVIRONMENTAL EXPOSURE PATHWAY
Distribution of cobalt 60 in a mollusc, a crustacean and a freshwater teleost: variations as a function of the source of pollution and during elimination, 3483
AQUEOUS SOLUTIONS/DECONTAMINATION
Removing radionuclides from water (Patent), 1174
AQUEOUS SOLUTIONS/OSMOSIS
Process for treating waste water containing radioactive substances (Patent), 1118
AQUIFERS/CONTAMINATION
Numerical analysis of radionuclide movement from a hypothetical nuclear waste repository (Ground-water mediated migration to river and subsequent population doses are modeled), 3450
Tatum Dome Project, Lamar County, Mississippi, 3329 (NVO--225)
AQUIFERS/FLOW MODELS
Variable thickness transient ground-water flow model. Volume 1. Formulation, 3441 (PNL--3160-1)
AQUIFERS/HEATING
Far field thermal calculations for the WIPP site in SENM, 1912 (SAND--79-1013C)
AQUIFERS/MATHEMATICAL MODELS
Dispersive processes in models of regional radionuclide migration. Technical memorandum, 2065 (UCRL--15251)
Two-dimensional finite element solution for the simultaneous transport of water and solutes through a nonhomogeneous aquifer under transient saturated unsaturated flow conditions, 3506 (CONF-7906121--1)
AQUIFERS/RADIATION MONITORING
Tatum Dome Project, Lamar County, Mississippi, 3329 (NVO--225)
AQUIFERS/RADIONUCLIDE MIGRATION
Dispersive processes in models of regional radionuclide migration. Technical memorandum, 2065 (UCRL--15251)
Long-term subsurface migration of radionuclides from buried INEL transuranic waste, 1437 (CONF-800607--6)
Mobility and sorption processes of radioactive waste materials in subsurface migration, 1775 (PNL-SA--7352(Vol.2))
AQUIFERS/STRUCTURAL MODELS
Preliminary subsurface hydrologic considerations: Columbia River Plateau Physiographic Province. Assessment of effectiveness of geologic isolation systems, 1736 (PNL--2859)
AQUIFERS/TRACER TECHNIQUES
Tracer tests performed in the field for WIPP in southeastern New Mexico, 1907 (SAND--79-0981C)
AQUIFERS/WATER POLLUTION
Recharge and pollution of the English Chalk: some possible mechanisms, 3528
ARALEX PROCESS
Recovery of actinides from TBP-Na_2CO_3 scrub-waste solutions: the ARALEX process, 616 (ANL--79-74)
ARBEITSGEMEINSCH. VERSUCHS REACTOR
See AVR REACTOR
ARCHAEOLOGICAL SPECIMENS/WEATHERING
Durability of metals from archaeological objects, metal meteorites, and native metals, 3516 (PNL--3198)
ARDENNES REACTOR/RADIOACTIVE WASTE MANAGEMENT
Waste management at the Ardennes power plant, 2747
ARGENTINA/RADIOACTIVE WASTE MANAGEMENT
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)
ARGILLITE/CHEMICAL REACTIONS
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
ARGILLITE/FLUID FLOW
Status of SHAFT 78 with respect to modeling radioactive waste burial in Eleana argillite, including calculations to date, 1931 (SAND--79-1484)
ARGILLITE/GEOCHEMISTRY
Geotechnical assessment and instrumentation needs for nuclear waste isolation in crystalline and argillaceous rocks, 1571 (LBL--8648)
ARGILLITE/HEATING
Material properties of Eleana argillite: extrapolation to other argillaceous rocks, and implications for waste management, 2408 (ALO--0789-T14)
Test results and supporting analysis of a near surface heater experiment in the Eleana Argillite, 1938 (SAND--79-1746C)
ARGILLITE/INVENTORIES
Preliminary inventory of pre-Cenozoic clay shales and argillites of the conterminous United States, 1944 (SAND--79-2015)
ARGILLITE/MATHEMATICAL MODELS
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
ARGILLITE/MECHANICAL PROPERTIES
Material properties of Eleana argillite: extrapolation to other argillaceous rocks, and implications for waste management, 2408 (ALO--0789-T14)
Mechanical modeling of nuclear waste disposal in argillite at the Nevada Test Site, 1915 (SAND--79-1047C)
Test results and supporting analysis of a near-surface heater experiment in the Eleana argillite, 1393 (ALO--0789-T12)
ARGILLITE/RADIONUCLIDE MIGRATION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Quarterly technical progress report, April 1-June 30, 1980, 1559 (LA--8472-PR)
Preliminary rate expressions for analysis of radionuclide migration resulting from fluid flow through jointed media, 1909 (SAND--79-0989C)
ARGILLITE/RESPONSE FUNCTIONS
Small scale heater tests in argillite of the Eleana Formation at the Nevada Test Site, 1899 (SAND--79-0344)
ARGILLITE/ROCK MECHANICS
Geotechnical assessment and instrumentation needs for nuclear waste isolation in crystalline and argillaceous rocks, 1571 (LBL--8648)
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
ARGILLITE/ROCK-FLUID INTERACTIONS
Assessment of potential radionuclide transport in site-specific geologic formations, 1962 (SAND--79-2468)
ARGILLITE/SORPTIVE PROPERTIES
Assessment of potential radionuclide transport in site-

specific geologic formations, 1962 (SAND--79-2468)
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1978, 1774 (PNL-SA--7352(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1979, 2468 (PNL-SA--8571(Vol.2))
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
Microautoradiographic studies of the sorption of U and Am on natural rock samples, 2100
Parameters affecting radionuclide migration in geologic media, 1560 (LA-UR--79-2992)
Preliminary rate expressions for analysis of radionuclide migration resulting from fluid flow through jointed media, 1909 (SAND--79-0989C)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))

ARGILLITE/SPECIFIC HEAT
Test results and supporting analysis of a near-surface heater experiment in the Eleana argillite, 1393 (ALO--0789-T12)

ARGILLITE/THERMAL CONDUCTIVITY
Near-surface heater experiments in argillaceous rocks, 2655
Test results and supporting analysis of a near-surface heater experiment in the Eleana argillite, 1393 (ALO--0789-T12)

ARGILLITE/THERMAL EXPANSION
Material properties of Eleana argillite: extrapolation to other argillaceous rocks, and implications for waste management, 3564 (SAND--79-1546C)
Near-surface heater experiments in argillaceous rocks, 2655

ARGILLITE/THERMODYNAMIC PROPERTIES
Far-field thermomechanical response of argillaceous rock to emplacement of a nuclear-waste repository, 3567 (SAND--79-2230)
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
Status of SHAFT 78 with respect to modeling radioactive waste burial in Eleana argillite, including calculations to date, 1931 (SAND--79-1484)
Test results and supporting analysis of a near-surface heater experiment in the Eleana argillite, 1393 (ALO--0789-T12)

ARGON 41/RADIATION MONITORING
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)

ARGONNE NATIONAL LABORATORY
See ANL

ARID LANDS/BASELINE ECOLOGY
Report of biological investigations at the Los Medanos Waste Isolation Pilot Plant (WIPP) area of New Mexico during FY 1978, 3299 (SAND--79-0368)

ARIZONA/ENERGY CONSUMPTION
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)

ARIZONA/ENERGY SOURCE DEVELOPMENT
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)

ARIZONA/GEOLOGICAL SURVEYS
Precipitation and lake-level changes in the West and Midwest over the past 10,000 to 24,000 years. Final report, 2044 (UCRL--15173)

ARIZONA/GEOMORPHOLOGY
Assessment of effectiveness of geologic isolation systems. Geologic factors in the isolation of nuclear waste: evaluation of long-term geomorphic processes and catastrophic events, 1734 (PNL--2854)

ARIZONA/POLLUTION REGULATIONS
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)

ARIZONA/POPULATION DYNAMICS
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)

ARIZONA/RADIATION MONITORING
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
Assessment of the radiological impact of the inactive uranium-mill tailings at Monument Valley, Arizona, 2445 (ORNL--5449)
Radiological survey of the inactive uranium-mill tailings at Tuba City, Arizona, 3331 (ORNL--5450)

ARMY PERSONNEL

See NUCLEAR WEAPONS

ATTAPULGITE/SORPTIVE PROPERTIES
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))

ATUCHA REACTOR/RADIOACTIVE WASTE PROCESSING
Operative experience in radioactive waste treatment in Atucha nuclear power plant, 2984

ATUCHA REACTOR/SPENT FUEL STORAGE
Spent fuel shipping and storage system for Atucha Nuclear Power Station, 157 (CONF-780506--(Vol.1))

AUSTRALIA
See also NORTHERN TERRITORY

AUSTRALIA/RADIOACTIVE WASTE MANAGEMENT
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)

AUSTRALITES
See TEKTITES

AUSTRIA/RADIOACTIVE WASTE MANAGEMENT
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)

AVR REACTOR/FUEL CYCLE
Recoverable test storage of spent fuel elemments from

the AVR Asse - Concept and measuring programme, 286
AVR REACTOR/FUEL MANAGEMENT
Spent-fuel management in the AVR and investigations on spent fuel elements for dry intermediate storage, 2767
AVR REACTOR/RADIOACTIVE EFFLUENTS
AVR's application for release of tritium and carbon-14 approved, 2958
AVR REACTOR/REACTOR SAFETY
Some important safety experiences made during operation of the AVR reactor, 3038 (INIS-mf--5302)
AVR REACTOR/SPENT FUEL STORAGE
Spent-fuel management in the AVR and investigations on spent fuel elements for dry intermediate storage, 2767
AWAY-FROM-REACTOR STORAGE
Away-from reactor fuel element storage and transportation of nuclear waste, 296
Spent fuel integrity during transportation, 212 (HEDL-TME--78-58)
Status of Away From Reactor spent fuel storage program, 203 (DPSP-AFR--79-6-3)
AWAY-FROM-REACTOR STORAGE/COMPARATIVE EVALUATIONS
Economics of spent LWR fuel storage, 182 (CONF-800943--(Summ.))
Spent nuclear fuel: a comparison of at-reactor basin storage and away-from-reactor storage (Macro-economic comparison), 190 (DOE/NE--0010)
AWAY-FROM-REACTOR STORAGE/ECONOMICS
Economics of spent LWR fuel storage, 182 (CONF-800943--(Summ.))
AWAY-FROM-REACTOR STORAGE/FEASIBILITY STUDIES
Spent LWR fuel encapsulation and dry storage demonstration, 677 (CONF-800607--79)
AWAY-FROM-REACTOR STORAGE/FUEL POOLS
External fuel element pool as temporary storage facility and permanent repository, 348
AWAY-FROM-REACTOR STORAGE/FUEL RACKS
High-density rack concepts for AFR fuel storage pools, 186 (CONF-800943--(Summ.))
AWAY-FROM-REACTOR STORAGE/GASEOUS WASTES
Effects of gaseous radioactive nuclides on the design and operation of repositories for spent LWR fuel in rock salt, 1660 (ORNL--5578)
AWAY-FROM-REACTOR STORAGE/GOVERNMENT POLICIES
DOE's spent fuel program talk, 181 (CONF-800943--(Summ.))
AWAY-FROM-REACTOR STORAGE/HEARINGS
Discussion date for the planned fuel element intermediate storage site at Ahaus on February 4 and 7, 1979, 334
AWAY-FROM-REACTOR STORAGE/LICENSING
Licensing of away-from-reactor (AFR) installations, 184 (CONF-800943--(Summ.))
Licensing of away-from-reactor (AFR) installations, 202 (DP-MS--80-31)
AWAY-FROM-REACTOR STORAGE/MANAGEMENT
Monthly away-from-reactor spent fuel storage report: AFR program, 199 (DOE/SR-SF--2005-9)
AWAY-FROM-REACTOR STORAGE/PLANNING
Determination of away-from-reactor storage requirements, 183 (CONF-800943--(Summ.))
Monthly away-from-reactor spent fuel storage report: AFR program, 199 (DOE/SR-SF--2005-9)
Spent fuel storage requirements: the need for away-from-reactor storage, 189 (DOE/NE--0002)
AWAY-FROM-REACTOR STORAGE/RESEARCH PROGRAMS
AFR spent fuel storage program. Technical progress report, July 1980-September 1980, 135 (AGNS--47921-TPR-5)
Monthly away-from reactor spent fuel storage reort AFR program, 200 (DOE/SR-SF--20005-5)
Monthly away-from-reactor spent fuel storage report: AFR program, 199 (DOE/SR-SF--2005-9)
AWAY-FROM-REACTOR STORAGE/SAFEGUARDS
Nondestructive measurements on spent fuel for away-from-reactor storage facilities, 2617 (CONF-800943--(Summ.))
Spent-Fuel Storage Facility Project. Progress report, June 1-September 30, 1979, 223 (LA--8237-PR)
AWAY-FROM-REACTOR STORAGE/SITE SELECTION
Effects of AFR storage location on spent-fuel transportation, 304
AWAY-FROM-REACTOR STORAGE/STORAGE FACILITIES
AFR spent fuel storage program. Technical progress report, July 1980-September 1980, 135 (AGNS--47921-TPR-5)
Studies and research concerning BNFP: assistance to Department of Energy. Final report, 130 (AGNS--35900-1.5-37)

B

BACKFILLING/EFFICIENCY
Backfill barrier as a component in a multiple barrier nuclear waste isolation system, 1917 (SAND--79-1109)
BARIUM/ACTIVATION ANALYSIS
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
BARIUM/ADSORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Parameters affecting radionuclide migration in geologic media, 1560 (LA-UR--79-2992)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, July 1-September 30, 1979, 1550 (LA--8152-PR)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, October 1-December 31, 1979, 2435 (LA--8309-PR)
BARIUM/DESORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
BARIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
BARIUM/LEACHING
Preliminary mini experiments on leaching of glass. A report of the situation 1979-03-15, 2016 (STUDSVIK/E2--79/38)
BARIUM/SORPTION
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
BARIUM 140/RADIOECOLOGICAL CONCENTRATION
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
BARIUM HYDROXIDES/SORPTIVE PROPERTIES
Method of immobilizing carbon dioxide from gas streams (Patent), 1113
BARLEY/PLANT GROWTH
Emergence and growth of plant species in coal mine soil, 3301
BARNWELL FUEL PROCESSING PLANT/AWAY-FROM-REACTOR STORAGE
Studies and research concerning BNFP: assistance to Department of Energy. Final report, 130 (AGNS--35900-1.5-37)
BARNWELL FUEL PROCESSING PLANT/MODIFICATIONS
AFR spent fuel storage program. Technical progress report, July 1980-September 1980, 135 (AGNS--47921-TPR-5)
BARNWELL FUEL PROCESSING PLANT/RADIATION MONITORING
Aerial radiological survey of the area surrounding the Chem-Nuclear Disposal Facility and Allied General Nuclear Services Facility, Barnwell, South Carolina, 3200 (EGG--1183-1747)
BARNWELL FUEL PROCESSING PLANT/REMOTE HANDLING EQUIPMENT
Remote handling systems at the Barnwell Nuclear Fuel Plant: an overview, 106
BARNWELL FUEL PROCESSING PLANT/USES
Study of the potential uses of the Barnwell Nuclear Fuel Plant (BNFP). Final report, 42 (DOE/ET/34036--T1)
BARRIERS
See DIFFUSION BARRIERS
BARSEBAECK-1 REACTOR/RADIOACTIVE WASTE PROCESSING
Properties of bituminous-embedded radioactive wastes from Barseback Nuclear Power Station, Sweden, 963 (PRAV--1.22)
Solidification of low and medium level wastes in bitumen at Barsebaeck nuclear power station, 964 (PRAV--1.22)
Solidification of low and medium level wastes in bitumen at Barsebeck nuclear power station, 2976
BARSEBAECK-1 REACTOR/REACTOR OPERATION
Quarterly report from the Swedish Nuclear Power Inspectorate Jul - Sep 1979, 2675 (INIS-mf--5666)
BARSEBAECK-1 REACTOR/STATISTICS
Experience in operation of nuclear power plant. Positive results for Bardebaeck, 2702
BARSEBAECK-2 REACTOR/RADIOACTIVE WASTE PROCESSING
Properties of bituminous-embedded radioactive wastes from Barseback Nuclear Power Station, Sweden, 963 (PRAV--1.22)
Solidification of low and medium level wastes in bitumen at Barsebaeck nuclear power station, 964 (PRAV--1.22)
Solidification of low and medium level wastes in bitumen at Barsebeck nuclear power station, 2976
BARSEBAECK-2 REACTOR/REACTOR OPERATION
Quarterly report from the Swedish Nuclear Power Inspectorate Jul - Sep 1979, 2675 (INIS-mf--5666)
BARSEBAECK-2 REACTOR/STATISTICS
Experience in operation of nuclear power plant. Positive results for Bardebaeck, 2702
BASALT
BWIP - another step on the way to a waste repository, 2112
Recommended new criteria for the selection of nuclear waste repository sites in Columbia River basalt and US

Gulf Coast domed salt, 2070 (UCRL--52749)
Review of Y/OWI/TM-36: repository design performance in salt, granite, shale or basalt (Underground disposal of radioactive wastes), 2046 (UCRL--15177)
BASALT/BIBLIOGRAPHIES
Hydrologic bibliography of the Columbia River basalts in Washington with selected annotations, 1812 (RHO-BWI-C--45)
BASALT/BOREHOLES
Drilling history core hole DC-6 Hanford, Washington, 1809 (RHO-BWI-C--13)
Drilling history core hole DC-8, 1810 (RHO-BWI-C--29)
Drilling history core hole DC-4, 1811 (RHO-BWI-C--40)
BASALT/CHEMICAL COMPOSITION
Columbia River Basalt reference sample, 3562 (RHO-SA--93)
BASALT/CHEMICAL PROPERTIES
Thermal property measurements of Pomona member basalt from core holes DB-5 and DB-15, Hanford site, southeastern Washington, 1822 (RHO-BWI-C--76)
BASALT/CHEMICAL REACTIONS
Hydrothermal reactivity of simulated nuclear waste forms and water-catalysed waste-rock interactions, 2267
Hydrothermal interactions of cesium and strontium phases from spent unreprocessed fuel with basalt phases and basalts, 1821 (RHO-BWI-C--70)
Radioactive waste-form and rock interactions: a discussion, 2311
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
BASALT/COMPARATIVE EVALUATIONS
Hazardous high-level radioactive waste disposal in geologic formations, 2126
BASALT/CREEP
Basalt Waste Isolation Project. Quarterly report, January 1-March 31, 1980, 1806 (RHO-BWI--80-100-2Q)
BASALT/CRYSTALLIZATION
Study of rock-water-nuclear waste interactions in the Pasco Basin, Washington. Part I. Distribution and composition of secondary and primary mineral phases in basalts of the Pasco Basin, Washington, 1581 (LBL--9677)
BASALT/DEPTH
Geophysical surveys for buried waste detection at the Idaho National Engineering Laboratory, 1755 (PNL--3227)
BASALT/DIAGENESIS
Study of rock-water-nuclear waste interactions in the Pasco Basin, Washington: Part II. Preliminary equilibrium-step simulations of basalt diagenesis, 3511 (LBL--9677-2/2)
BASALT/DISSOLUTION
Nature and distribution of secondary minerals in the basalts of the Pasco Basin, Washington, and their relation to the disposal of nuclear wastes, 3550 (LBL--8648)
BASALT/EVALUATION
Evaluation of basalt flows as a waste isolation medium, 2198
BASALT/FLOW RATE
Rate of deformation in the Pasco Basin during the Miocene as determined by distribution of Columbia River basalt flows, 1834 (RHO-BWI-SA--29)
BASALT/GEOCHEMICAL SURVEYS
Chemical stratigraphy of Grande Ronde Basalt, Pasco Basin, south-central Washington, 1836 (RHO-BWI-SA--32)
BASALT/GEOLOGY
Basalt Waste Isolation Project. Quarterly report, July 1, 1979-September 30, 1979, 1805 (RHO-BWI--79-100-4Q)
Geoscience parameter data base handbook: granites and basalts, 2039 (UCRL--15152)
Geoscience data base handbook for modeling a nuclear waste repository, 1609 (NUREG/CR--0912(Vol.2))
Report on geologic exploration activities, 1458 (DOE/RL/01830--14)
BASALT/GEOPHYSICS
Geoscience data base handbook for modeling a nuclear waste repository, 1609 (NUREG/CR--0912(Vol.2))
BASALT/HYDRAULICS
Basalt Waste Isolation Project. Quarterly report, January 1-March 31, 1980, 1806 (RHO-BWI--80-100-2Q)
Laboratory investigations on the hydraulic and thermomechanical properties of fractured crystalline rocks, 1580 (LBL--9582)
BASALT/HYDROLOGY
Geoscience parameter data base handbook: granites and basalts, 2039 (UCRL--15152)
Geoscience data base handbook for modeling a nuclear waste repository, 1609 (NUREG/CR--0912(Vol.2))
Regional basalt hydrology of the Columbia Plateau in Washington, 1816 (RHO-BWI-C--60)
BASALT/ION EXCHANGE
Tabulation and evaluation of ion exchange data on smectites, certain zeolites and basalt, 1590 (LBL--10541)
BASALT/LEACHING
Correlation of leachant analyses and weight loss measurements in the leaching of high-iron synthetic basalts, 690 (CONF-801206--2)
BASALT/MASS TRANSFER
Nature and distribution of secondary minerals in the basalts of the Pasco Basin, Washington, and their relation to the disposal of nuclear wastes, 3550 (LBL--8648)
BASALT/MATHEMATICAL MODELS
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
BASALT/MINERALIZATION
Secondary minerals found in the cores DC2 A1 and DC2 A2 taken from the Grande Ronde Basalt Formation, Pasco Basin, Washington, 1587 (LBL--10387)
BASALT/MINERALOGY
Nature and distribution of secondary minerals in the basalts of the Pasco Basin, Washington, and their relation to the disposal of nuclear wastes, 3550 (LBL--8648)
Study of rock-water-nuclear waste interactions in the Pasco Basin, Washington. Part I. Distribution and composition of secondary and primary mineral phases in basalts of the Pasco Basin, Washington, 1581 (LBL--9677)
BASALT/PHYSICAL PROPERTIES
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. First progress report, fiscal year 1979, 3559 (RHO-BWI-C--50)
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. Second progress report, fiscal year 1979, 3560 (RHO-BWI-C--54)
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. Third progress report, fiscal year 1979, 3561 (RHO-BWI-C--55)
Thermal property measurements of Pomona member basalt from core holes DB-5 and DB-15, Hanford site, southeastern Washington, 1822 (RHO-BWI-C--76)
BASALT/RADIONUCLIDE MIGRATION
Conceptual model for regional radionuclide transport from a basalt repository site. Final draft, technical memorandum, 2066 (UCRL--15252)
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
BASALT/RESEARCH PROGRAMS
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. Second progress report, fiscal year 1979, 3560 (RHO-BWI-C--54)
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. Third progress report, fiscal year 1979, 3561 (RHO-BWI-C--55)
BASALT/REVIEWS
Geoscience parameter data base handbook: granites and basalts, 2039 (UCRL--15152)
BASALT/ROCK MECHANICS
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. Second progress report, fiscal year 1979, 3560 (RHO-BWI-C--54)
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. Third progress report, fiscal year 1979, 3561 (RHO-BWI-C--55)
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
Strain distribution and model for formation of eastern Umtanum Ridge anticline, south-central Washington, 1835 (RHO-BWI-SA--30)
Technical approach to resolving issues on rock mechanics as applied to development of a nuclear waste repository in a crystalline rock formation, 1840 (RHO-BWI-SA--51)
BASALT/ROCK-FLUID INTERACTIONS
Waste Isolation Safety Assessment Program, 1573 (LBL--8648)
BASALT/SIMULATION
Study of rock-water-nuclear waste interactions in the Pasco Basin, Washington: Part II. Preliminary equilibrium-step simulations of basalt diagenesis, 3511 (LBL--9677-2/2)
BASALT/SORPTIVE PROPERTIES
Chromatographic K/sub d/ values of radionuclides and the effect of redox potentials on sorption of radionuclides by geologic media, 2459 (PNL-SA--7352(Vol.1))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1978, 1774 (PNL-SA--7352(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1979, 2468 (PNL-SA--8571(Vol.2))
Preliminary results on comparison of adsorption-desorption methods and statistical techniques to generate Kd predictor equations, 2458 (PNL-SA--7245)
Sorption-desorption of long-lived radionuclide species on geologic media. Annual report, 2466 (PNL-SA--8571(Vol.2))
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Studies of radionuclide availability and migration at the Nevada Test Site relevant to radioactive waste disposal, 1769 (PNL-SA--7352(Vol.1))
Theoretical and experimental evaluation of waste transport in selected rocks, 1768 (PNL-SA--7352(Vol.1))

Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
BASALT/STANDARDS
Columbia River Basalt reference sample, 3562 (RHO-SA--93)
BASALT/STRAINS
Strain distribution and model for formation of eastern Umtanum Ridge anticline, south-central Washington, 1835 (RHO-BWI-SA--30)
BASALT/STRATIGRAPHY
Chemical stratigraphy of Grande Ronde Basalt, Pasco Basin, south-central Washington, 1836 (RHO-BWI-SA--32)
BASALT/TEMPERATURE EFFECTS
Near-surface test facility. Phase I. Geologic site characterization report, 1843 (RHO-BWI-ST--8)
Technical approach to resolving issues on rock mechanics as applied to development of a nuclear waste repository in a crystalline rock formation, 1840 (RHO-BWI-SA--51)
BASALT/THERMAL CONDUCTIVITY
Thermal conductivity of the rocks in the Bureau of Mines Standard Rock Suite, 3557 (ORNL/TM--7052)
BASALT/THERMODYNAMIC PROPERTIES
Annular air space effects on nuclear waste canister temperatures in a deep geologic waste repository, 2028 (UCID--18662)
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. First progress report, fiscal year 1979, 3559 (RHO-BWI-C--50)
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. Second progress report, fiscal year 1979, 3560 (RHO-BWI-C--54)
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. Third progress report, fiscal year 1979, 3561 (RHO-BWI-C--55)
Geoscience parameter data base handbook: granites and basalts, 2039 (UCRL--15152)
Laboratory investigations on the hydraulic and thermomechanical properties of fractured crystalline rocks, 1580 (LBL--9582)
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
Thermal property measurements of Pomona member basalt from core holes DB-5 and DB-15, Hanford site, southeastern Washington, 1822 (RHO-BWI-C--76)
BATTELLE COLUMBUS LABORATORY/RADIATION MONITORING
Environmental report for calendar year 1978 on radiological and nonradiological parameters, 3196 (DOE/TIC--11148)
BATTELLE COLUMBUS LABORATORY/RADIOACTIVE EFFLUENTS
Environmental report for calendar year 1978 on radiological and nonradiological parameters, 3196 (DOE/TIC--11148)
BATTELLE PACIFIC NORTHWEST LABORATORIES/ENVIRONMENTAL EFFECTS
Perspective on Hanford safety and environmental protection, 3396 (RLO-SA--79-1)
BATTELLE PACIFIC NORTHWEST LABORATORIES/RADIATION MONITORING
Field test facility for monitoring water/radionuclide transport through partially saturated geologic media: design, construction, and preliminary description, 1753 (PNL--3226)
BEAVER VALLEY-1 REACTOR/RADIATION MONITORING
1978 annual environmental report. Volume 2. Radiological, 3195 (DOE/PNRO--0292-T1)
BEAVER VALLEY-2 REACTOR/RADIATION MONITORING
1978 annual environmental report. Volume 2. Radiological, 3195 (DOE/PNRO--0292-T1)
BELGIAN REACTOR 2
See BR-2 REACTOR
BELGIUM/RADIOACTIVE WASTE MANAGEMENT
Prospects for the back-end of the fuel cycle in Belgium, 41 (CONF-800943--(Summ.))
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)
BELGIUM/RADIOACTIVE WASTE PROCESSING
Nuclear energy and the fuel circuit, 1160
BELGIUM/REPROCESSING
Prospects for the back-end of the fuel cycle in Belgium, 41 (CONF-800943--(Summ.))
BELGIUM/WASTE MANAGEMENT
Position of the European Communities and Belgium concerning the problems raised by radioactive waste, 571
BENTHOS/ECOLOGY
Biological studies of the US Subseabed Disposal Program, 1947 (SAND--79-2073)
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1948 (SAND--79-2117)
BENTHOS/METABOLISM
Biological studies of the US Subseabed Disposal Program, 1947 (SAND--79-2073)
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1948 (SAND--79-2117)
BENTONITE/EROSION
Clay particle redistribution and piping phenomena in bentonite/quartz buffer material due to high hydraulic gradients, 2010 (SKBF-KBS-TR--79-01)
BENTONITE/PERMEABILITY
Highly compacted sodium bentonite for isolating rock-deposited radioactive waste products, 2159
Water percolation effects on clay-poor bentonite/quartz buffer material at high hydraulic gradients, 3405 (SKBF/KBS-TR--79-17)
BENTONITE/RADIONUCLIDE MIGRATION
In situ experiments on nuclide migration in fractured crystalline rocks, 1531 (KBS-TR--110)
BENTONITE/SORPTIVE PROPERTIES
Backfill as an engineered barrier for nuclear waste management, 1910 (SAND--79-0990C)
In-situ stabilization of radioactively contaminated low-level solid wastes buried in shallow trenches: an assessment, 915 (ORNL/TM--7130)
Nuclide transport by groundwater in Swedish bedrock, 2581
Particle size distribution analysis and cesium sorption capacity of some bentonites, 2391
Radionuclide sorption and migration studies of getters for backfill barriers, 1918 (SAND--79-1110)
BENTONITE/SWELLING
Highly compacted sodium bentonite for isolating rock-deposited radioactive waste products, 2159
BERYLLIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
BERYLLIUM 7/RADIATION MONITORING
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
BERYLLIUM ALLOYS/CORROSION RESISTANCE
Corrosion resistance of magnesium-beryllium alloys in potassium bichromate and carbon dioxide aqueous solutions at different temperatures and pressures, 3684
BERYLLIUM MODERATORS
See BERYLLIUM
BETA DETECTION/IONIZATION CHAMBERS
The monitoring system of the Tritium Research Laboratory, Sandia Laboratories, Livermore, California, 3594 (CONF-780110--)
BETA SOURCES/DOSE RATES
Effects of chronic low-level irradiation on Gambusia affinis (White Oak Lake), 3465 (CONF-790562--2)
BETATRONS/RADIOACTIVE EFFLUENTS
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
BEVERAGES/RADIOACTIVITY
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
BEZNAU-1 REACTOR/RADIOACTIVE WASTE PROCESSING
Treatment of low radioactive liquid waste by compounds having an enhanced affinity for the contaminants, 1271
BF3 COUNTERS/SENSITIVITY
Neutron well counter for plutonium assay in 200 l waste drums, 1543 (KFK--2798)
BIBLIOGRAPHIES
Bibliography of AECL publications on environmental research, 3188 (AECL--6319)
BIBLIOGRAPHIES/BASALT
Hydrologic bibliography of the Columbia River basalts in Washington with selected annotations, 1812 (RHO-BWI-C--45)
BIBLIOGRAPHIES/BIOLOGICAL RADIATION EFFECTS
Bibliography of marine radiation ecology prepared for the Seabed Program, 1965 (SAND--79-7102)
BIBLIOGRAPHIES/COLUMBIA RIVER BASIN
Additions and corrections to the bibliography of geologic studies, Columbia Plateau (Columbia River Besalt) and adjacent Areas, in Idaho, 1980, 1820 (RHO-BWI-C--78)
Bibliography of the geology of the Columbia Basin and surrounding areas of Washington, 1815 (RHO-BWI-C--59)
BIBLIOGRAPHIES/DECOMMISSIONING
Nuclear facility decommissioning and site remedial actions. Volume 1. A selected bibliography, 907 (ORNL/EIS--154/V1)
BIBLIOGRAPHIES/DECONTAMINATION
Nuclear facility decommissioning and site remedial actions. Volume 1. A selected bibliography, 907 (ORNL/EIS--154/V1)
BIBLIOGRAPHIES/FEED MATERIALS PLANTS
Uranium mining and milling environmental studies (citations from the NTIS data base). Report for 1964-January 1979, 2437 (NTIS/PS--79/0139)
Uranium mining and milling environmental studies (citations from the Engineering Index data base). Report for 1970-January 1979, 2438 (NTIS/PS--79/0140)
BIBLIOGRAPHIES/HANFORD RESERVATION
Site locality identification study: Hanford Site. Volume II. Data cataloging, 1818 (RHO-BWI-C--62(Vol.2)
BIBLIOGRAPHIES/HYDROLOGY
Hydrologic bibliography of the Columbia River basalts in Washington with selected annotations, 1812 (RHO-BWI-C--45)
BIBLIOGRAPHIES/LOW-LEVEL RADIOACTIVE WASTES
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
BIBLIOGRAPHIES/NUCLEAR MEDICINE
Nuclear medicine: a bibliography, 3622 (TID--3319-S8-P1)
Nuclear medicine: a bibliography, 3623 (TID--3319-S8-P2)

Hazardous materials transportation. part 2. radioactive materials and wastes (citations from the NTIS data

base). Report for 1964-Apr 1979, 226 (NTIS/PS--79/0704)
BIBLIOGRAPHIES/RADIOACTIVE WASTE DISPOSAL
Geoscience data base handbook for modeling a nuclear waste repository. Volume 1, 1608 (NUREG/CR--0912(Vol.1))
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
Radioactive waste processing and disposal (4144 citations), 899 (NUREG--0643)
Radioactive waste processing and disposal, 478 (NUREG--0644)
Radioactive waste disposal in salt deposits (a bibliography with abstracts). Report for 1964-November 1979, 1695 (PB--80-801772)
Radioactive waste management integrated data base: a bibliography, 494 (ORNL/TM--7385/V2)
Selected, annotated bibliography of studies relevant to the isolation of nuclear wastes (705 references), 1665 (ORNL/EIS--156/V1)
Site locality identification study: Hanford Site. Volume II. Data cataloging, 1818 (RHO-BWI-C--62(Vol.2))
BIBLIOGRAPHIES/RADIOACTIVE WASTE FACILITIES
Site locality identification study: Hanford Site. Volume II. Data cataloging, 1818 (RHO-BWI-C--62(Vol.2))
BIBLIOGRAPHIES/RADIOACTIVE WASTE MANAGEMENT
Abstracts: NRC Waste Management Program reports, 2023 (UCID--18133(Rev.1))
Bibliography of reports by US Geological Survey personnel pertaining to underground nuclear testing and radioactive waste disposal at the Nevada Test Site, and radioactive waste disposal at the WIPP Site, New Mexico, January 1, 1979-December 31, 1979, 539 (USGS-OFR--80-817)
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
Radioactive waste management integrated data base: a bibliography, 494 (ORNL/TM--7385/V2)
Radioactive waste management integrated data base: a bibliography (Approximately 1100 references), 493 (ORNL/TM--7385/V1)
BIBLIOGRAPHIES/RADIOACTIVE WASTE PROCESSING
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
Radioactive waste processing and disposal (4144 citations), 899 (NUREG--0643)
Radioactive waste processing and disposal, 478 (NUREG--0644)
Radioactive waste management integrated data base: a bibliography, 494 (ORNL/TM--7385/V2)
Recovery of actinoids from waste solutions of fuel reprocessing. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, 2, 859 (JAERI-M--8339)
Selected, annotated bibliography of studies relevant to the isolation of nuclear wastes (705 references), 1665 (ORNL/EIS--156/V1)
BIBLIOGRAPHIES/RADIOACTIVE WASTE STORAGE
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
BIBLIOGRAPHIES/RADIOACTIVE WASTES
Bibliography of articles on radioactive waste from 1973-1978, 490 (ORNL/OIAPA--14)
Hazardous materials transportation. part 2. radioactive materials and wastes (citations from the NTIS data base). Report for 1964-Apr 1979, 226 (NTIS/PS--79/0704)
Radioactive waste processing and disposal, 478 (NUREG--0644)
Radioactive waste management integrated data base: a bibliography, 494 (ORNL/TM--7385/V2)
BIBLIOGRAPHIES/RADIOECOLOGY
Bibliography of marine radiation ecology prepared for the Seabed Program, 1965 (SAND--79-7102)
BIBLIOGRAPHIES/REACTOR ACCIDENTS
Accident risks in nuclear facilities (a bibliography with abstracts). Report for 1964-November 1979, 3043 (PB--801269)
BIBLIOGRAPHIES/SALT DEPOSITS
Geoscience data base handbook for modeling a nuclear waste repository. Volume 1, 1608 (NUREG/CR--0912(Vol.1))
BIBLIOGRAPHIES/SOLID WASTES
Coal mine waste (a bibliography with abstracts). Report for 1964-January 1979, 3611 (NTIS/PS--79/0080)
BIBLIOGRAPHIES/UNDERGROUND EXPLOSIONS
Bibliography of reports by US Geological Survey personnel pertaining to underground nuclear testing and radioactive waste disposal at the Nevada Test Site, and radioactive waste disposal at the WIPP Site, New Mexico, January 1, 1979-December 31, 1979, 539 (USGS-OFR--80-817)
BIBLIOGRAPHIES/URANIUM MINES
Uranium mining and milling environmental studies (citations from the NTIS data base). Report for 1964-January 1979, 2437 (NTIS/PS--79/0139)
Uranium mining and milling environmental studies (citations from the Engineering Index data base). Report for 1970-January 1979, 2438 (NTIS/PS--79/0140)
BIBLIS-3 REACTOR/RADIOACTIVE WASTE PROCESSING
Technology of two-stage waste water evaporation with mixing condenser, 2957
BIBLIS-4 REACTOR/RADIOACTIVE WASTE PROCESSING
Technology of two-stage waste water evaporation with mixing condenser, 2957
BIBLIS-A REACTOR/FUEL POOLS
Publication of the project of Rheinisch-Westfaelische Elektrizitaetswerk AG, Essen, to increase the capacity of the fuel storage pool of units A and B of Biblis nuclear power plant from five thirds of one core charge each to nine thirds of one core charge each, 2737
BIBLIS-A REACTOR/RADIOACTIVE WASTE PROCESSING
Technology of two-stage waste water evaporation with mixing condenser, 2957
BIBLIS-A REACTOR/RADIOACTIVE WASTES
Radioactive waste at Biblis nuclear power plant, 2727
BIBLIS-A REACTOR/REACTOR OPERATION
Results of German nuclear power plant operation in 1978. Pt. 1. Industrial nuclear power stations. Data from the annual report by the ABE committee, 2833
BIBLIS-A REACTOR/SPENT FUEL STORAGE
Publication of one partial license each for an increase of the spent fuel storage capacity from five thirds of a core charge to nine thirds of a core charge in the Biblis A and B units, 2726
BIBLIS-B REACTOR/FUEL POOLS
Publication of the project of Rheinisch-Westfaelische Elektrizitaetswerk AG, Essen, to increase the capacity of the fuel storage pool of units A and B of Biblis nuclear power plant from five thirds of one core charge each to nine thirds of one core charge each, 2737
BIBLIS-B REACTOR/RADIOACTIVE EFFLUENTS
Stock-taking of the safety design of the nuclear power plant with PWR type Biblis B and the radiation exposure connected with its operation. Phase 1, 2928 (INIS-mf--4698)
BIBLIS-B REACTOR/RADIOACTIVE WASTE PROCESSING
Technology of two-stage waste water evaporation with mixing condenser, 2957
BIBLIS-B REACTOR/RADIOACTIVE WASTES
Radioactive waste at Biblis nuclear power plant, 2727
BIBLIS-B REACTOR/REACTOR OPERATION
Results of German nuclear power plant operation in 1978. Pt. 1. Industrial nuclear power stations. Data from the annual report by the ABE committee, 2833
BIBLIS-B REACTOR/SAFETY ENGINEERING
Stock-taking of the safety design of the nuclear power plant with PWR type Biblis B and the radiation exposure connected with its operation. Phase 1, 2928 (INIS-mf--4698)
BIBLIS-B REACTOR/SPENT FUEL STORAGE
Publication of one partial license each for an increase of the spent fuel storage capacity from five thirds of a core charge to nine thirds of a core charge in the Biblis A and B units, 2726
BIBLIS-C REACTOR
See BIBLIS-3 REACTOR
BIBLIS-D REACTOR
See BIBLIS-4 REACTOR
BIKINI/RADIATION MONITORING
Plutonium in the marine environment of the Marshall Islands, 3444 (UCRL--52000-80-10)
BILLITONITES
See TEKTITES
BIOADSORBENTS
Uranium sorption from aqueous solutions by biological absorbent, 788 (INIS-mf--5320)
BIOLOGICAL RADIATION EFFECTS/BIBLIOGRAPHIES
Bibliography of marine radiation ecology prepared for the Seabed Program, 1965 (SAND--79-7102)
BIOLOGICAL RADIATION EFFECTS/MEDICAL SURVEILLANCE
Environmental protection, 3358 (3NL--51066)
BIOLOGICAL RADIATION EFFECTS/MYELOID LEUKEMIA
Incidence of myeloid leukaemia in Lancashire, 3666
BIOLOGICAL REPAIR/MOLECULAR BIOLOGY
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
BIOLOGICAL WASTES/SOLIDIFICATION
High-density graphite with anorganic binders as possible matrix material for radioactive and biological waste, 1055
BIOMASS
(All growing organic matter such as plants, trees, grasses, and algae.)
See also AGRICULTURAL WASTES
ALGAE
PLANTS
TREES
Ocean energy: forms and prospects, 3105
BIOMEDICAL RADIOGRAPHY/RADIATION DOSES
Radiation protection activities - 1977. Annual report, 2941 (PB--290215)
BIOSPHERE/RADIOACTIVITY
Data on radioactive contamination of the biosphere, 3311
BIOTITE/SORPTIVE PROPERTIES
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Chemical reactions in the bedrock-groundwater system of importance for the sorption of actinides, 1433 (CONF-791112--58)
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))

Studies of radionuclide availability and migration at the Nevada Test Site relevant to radioactive waste disposal, 1769 (PNL-SA--7352(Vol.1))
BIRDS/BIOLOGICAL RADIATION EFFECTS
Distribution and avian export of gamma emitting radionuclides at the Test Reactor Area leaching ponds, 3471 (IDO--12088)
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
BIRDS/RADIONUCLIDE KINETICS
Cesium-137 in coots (Fulica americana) on Hanford waste ponds: contribution to population dose and offsite transport estimates, 3614 (PB--296947)
Use of Hanford waste water ponds by waterfowl, 3475 (PB--296947)
BIS(2-ETHYLHEXYL)PHOSPHORIC ACID
See HDEHP
BISMUTH/ADSORPTION
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
BISMUTH/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
BITTER SPAR
See DOLOMITE
BITUMENS
See also ASPHALTS
BITUMENS/COMBUSTION
Burning test on a storage drum filled with a mixture of sodium nitrate and bitumen, 2555 (SGAE--3023)
BITUMENS/LEACHING
Description of the R + D-work and the inactive and active test period of the Eurobitum/Eurostorage facility, 873 (KFK--2765)
Survey on product properties of bituminized waste concentrates from reprocessing, nuclear installations and nuclear power plants, 874 (KFK--2796)
BITUMENS/RADIOLYSIS
Investigation of hydrogen and methane production when irradiation of bitumen B45 and bitumen B45 mixed with solid substances, 457 (INIS-mf--5571)
Survey on product properties of bituminized waste concentrates from reprocessing, nuclear installations and nuclear power plants, 874 (KFK--2796)
BITUMENS/SORPTIVE PROPERTIES
Isolation of radionuclides from waste solutions using bituminous sorbents, 789 (INIS-mf--5450)
BITUMENS/STABILITY
Studies on the stability of bitumen salt mixtures. 3. Mixtures of bitumen and simulated steel corrosion products, 1000 (SGAE--3006)
Survey on product properties of bituminized waste concentrates from reprocessing, nuclear installations and nuclear power plants, 874 (KFK--2796)
BLANKETS (BREEDING)
See BREEDING BLANKETS
BLENDING
See MIXING
BLOOD DISEASES
See HEMIC DISEASES
BNFL/RADIOACTIVE EFFLUENTS
Annual report on radioactive discharges and monitoring of the environment 1978, 3258
BNFL/RADIOACTIVE WASTE DISPOSAL
Annual report on radioactive discharges and monitoring of the environment 1978, 3258
BNL
(Brookhaven National Laboratory.)
BNL/RADIATION MONITORING
1978 environmental monitoring report, 3190 (BNL--51031)
BOHUNICE A-1 REACTOR/ENVIRONMENTAL IMPACTS
Radioactivity in the hydrosphere due to A-1 nuclear power plant operation, 3437 (INIS-mf--5319)
BOHUNICE A-1 REACTOR/LEAKS
Gaseous and liquid radioactive leaks from A-1 nuclear power plant, 2761 (INIS-mf--5319)
BOHUNICE A-1 REACTOR/RADIOACTIVE EFFLUENTS
^{137}Cs - contamination indicator of waste water discharged from A-1 nuclear power plant, 3474 (INIS-mf--4637)
Fission product determination in A-1 nuclear power plant waste waters, 2774 (CS-INIS--206)
Surface water contamination with radionuclides caused by nuclear power engineering, 3438 (INIS-mf--5319)
BOHUNICE A-1 REACTOR/RADIOACTIVE WASTE PROCESSING
Treatment of radioactive wastes at the Czechoslovak nuclear power station, 2981
BOHUNICE A-1 REACTOR/RADIOACTIVE WASTES
Processing radioactive wastes from nuclear power plants in Czechoslovakia, 1369
BOILING WATER REACTORS
See BWR TYPE REACTORS
BONES
See SKELETON
BOR-60 REACTOR/RADIOACTIVE WASTE STORAGE
Development of a stand-depository for storage and investigation of high-activity solid wastes behaviour, 1511 (INIS-mf--5571)
BORATES/RADIATION EFFECTS
Application of borate glasses and various boron bearing glasses to the management of French radioactive wastes, 625 (CEA-CONF--4435)
BOREHOLES/ACOUSTIC TESTING
Basic data report for drillhole WIPP 19 (Waste Isolation Pilot Plant-WIPP), 3521 (SAND--79-0276)
BOREHOLES/CLOSURES
Basalt Waste Isolation Project borehole plugging studies: an overview, 1838 (RHO-BWI-SA--49)
Bell Canyon Test (BCT): cement development report, 1978 (SAND--80-0358C)
Borehole Plugging Program. Status report, October 1, 1978-September 30, 1979, 1950 (SAND--79-2141)
Borehole plugging of man-made accesses to a basalt repository: a preliminary study, 1814 (RHO-BWI-C--49)
Downhole television (DHTV) applications in borehole plugging, 1984 (SAND--80-0459)
Recommended analysis plan for the borehole plugging program potash core test, 1993 (SAND--80-0812)
Role of borehole plugging in the evaluation of the Waste Isolation Pilot Plant, 1986 (SAND--80-0502C)
Sealing a nuclear waste repository in Columbia River basalt: preliminary results, 1839 (RHO-BWI-SA--50)
Strategy for evaluating the long-term stability of hole-plugging materials in their geological environments, 1979 (SAND--80-0359C)
Test plan: Potash Core Test. WIPP experimental program borehole plugging, 1927 (SAND--79-1306)
BOREHOLES/DRILLING
Research borehole drilling activity for boreholes DH-18, DH-19, DC-12, DC-13, DC-14, DC-15, and deepening of existing borehole DC-7, 1826 (RHO-BWI-CD--42)
BOREHOLES/ELECTRIC LOGGING
Design of a miniature directional antenna for geophysical probing from boreholes, 3679
BOREHOLES/ELECTRICAL SURVEYS
Preliminary interpretations of geologic results obtained from boreholes UE25a-4, -5, -6, and -7, Yucca Mountain, Nevada Test Site, 2093 (USGS-OFR--80-929)
BOREHOLES/ENVIRONMENTAL IMPACTS
Research borehole drilling activity for boreholes DH-18, DH-19, DC-12, DC-13, DC-14, DC-15, and deepening of existing borehole DC-7, 1826 (RHO-BWI-CD--42)
BOREHOLES/FRACTURES
Geology and fracture system at Stripa. Technical information report No. 21, 1574 (LBL--8907)
BOREHOLES/GAMMA LOGGING
Basic data report for drillhole WIPP 18 (Waste Isolation Pilot Plant - WIPP), 1891 (SAND--79-0275)
Basic data report for drillhole WIPP 21 (Waste Isolation Pilot Plant - WIPP), 1892 (SAND--79-0277)
BOREHOLES/GEOCHEMISTRY
Borehole plugging of man-made accesses to a basalt repository: a preliminary study, 1814 (RHO-BWI-C--49)
BOREHOLES/HYDRAULICS
Basalt Waste Isolation Project. Quarterly report, January 1-March 31, 1980, 1806 (RHO-BWI--80-100-2Q)
BOREHOLES/LITHOLOGY
Basic data report for drillhole WIPP 18 (Waste Isolation Pilot Plant - WIPP), 1891 (SAND--79-0275)
Basic data report for drillhole WIPP 21 (Waste Isolation Pilot Plant - WIPP), 1892 (SAND--79-0277)
Basic data report for drillhole WIPP 19 (Waste Isolation Pilot Plant-WIPP), 3521 (SAND--79-0276)
BOREHOLES/MASS TRANSFER
Investigation of salt transport in vertical boreholes in brine invasion into freshwater aquifers. Technical report, 1634 (ONWI--77)
BOREHOLES/PLUGGING
Bell Canyon test and results, 2007 (SAND--80-2414C)
Borehole plugging materials development program, report 2, 1932 (SAND--79-1514)
Cement technology for borehole plugging: an interim report on permeability measurements of cementitious solids, 1675 (ORNL/TM--7092)
Cement technology for borehole plugging: interim report on the effects of fly ash and salt on the physical properties of cementitious solids, 1676 (ORNL/TM--7106)
BOREHOLES/SEALS
Information base for waste repository design. Volume 1. Borehole and shaft sealing. Technical report, 1697 (PB--293401)
BOREHOLES/STRATIGRAPHY
Basic data report for drillhole WIPP 18 (Waste Isolation Pilot Plant - WIPP), 1891 (SAND--79-0275)
Basic data report for drillhole WIPP 21 (Waste Isolation Pilot Plant - WIPP), 1892 (SAND--79-0277)
Preliminary interpretations of geologic results obtained from boreholes UE25a-4, -5, -6, and -7, Yucca Mountain, Nevada Test Site, 2093 (USGS-OFR--80-929)
BOREHOLES/STRESS ANALYSIS
Borehole-inclusion stressmeter measurements in bedded salt, 1900 (SAND--79-0377)
BOREHOLES/WELL LOGGING
Basic data report for drillhole WIPP 29 (Waste Isolation Pilot Plant-WIPP), 1897 (SAND--79-0283)
Basic data report for Drillhole WIPP 22 (Waste Isolation Pilot Plant, WIPP), 1893 (SAND--79-0278)
BORIC ACID/REGENERATION
Removal of fission and corrosion products from alkaline solutions of boric acid by the ion exchange method, 805 (INIS-mf--5570)
BORIC ACID/SORPTIVE PROPERTIES
Iodine absorption in mixed solution of sodium hydroxide-boric acid, 1329

BORON/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
BORON CARBIDES/FABRICATION
Development of boron carbide-copper cermets. Status report, 2792 (SAND--78-2317)
BORON CARBIDES/NEUTRON ABSORBERS
Method of storing fuel assemblies (Patent), 2879
BORON CARBIDES/PHYSICAL RADIATION EFFECTS
Behavior of B_4C materials in spent-fuel storage pools, 2854
Method of storing fuel assemblies (Patent), 2879
BORON OXIDES/PHASE STUDIES
Phase separation in the glass containing high level radioactive waste, 1152
BORON SILICATES/CHEMICAL COMPOSITION
Preparation and characterization of an improved borosilicate glass matrix for the incorporation of high level radioactive waste (HAW). Pt. 1. Analysis of 25 boron silicate glass products for the selection of an improved boron silicate glass, 871 (KFK--2721)
BORON SILICATES/CHEMICAL PREPARATION
Preparation and characterization of an improved borosilicate glass matrix for the incorporation of high level radioactive waste (HAW). Pt. 1. Analysis of 25 boron silicate glass products for the selection of an improved boron silicate glass, 871 (KFK--2721)
BORON SILICATES/CHEMICAL PROPERTIES
Preparation and characterization of an improved borosilicate glass matrix for the incorporation of high level radioactive waste (HAW). Pt. 1. Analysis of 25 boron silicate glass products for the selection of an improved boron silicate glass, 871 (KFK--2721)
BORON SILICATES/CRYSTALLIZATION
Characterization of borosilicate glasses containing simulated high-level radioactive wastes, 2222
BORON SILICATES/ELECTRIC CONDUCTIVITY
Characterization of borosilicate glasses containing simulated high-level radioactive wastes, 2222
BORON SILICATES/LEACHING
Leach rates of high activity waste from borosilicate glass, 2226
BORON SILICATES/PHYSICAL PROPERTIES
Preparation and characterization of an improved borosilicate glass matrix for the incorporation of high level radioactive waste (HAW). Pt. 1. Analysis of 25 boron silicate glass products for the selection of an improved boron silicate glass, 871 (KFK--2721)
BORON SILICATES/SORPTIVE PROPERTIES
Actinide diffusion in waste glasses, 853 (INKA-Conf--79-003-004)
BOROPHOSPHATE GLASS/LEACHING
Characterization of vitrified ICPP alumina waste calcine, 769 (ENICO--1048)
BOROPHOSPHATE GLASS/PHYSICAL PROPERTIES
Characterization of vitrified ICPP alumina waste calcine, 769 (ENICO--1048)
BOROPHOSPHATE GLASS/VISCOSITY
Characterization of vitrified ICPP alumina waste calcine, 769 (ENICO--1048)
BOROSILICATE GLASS
Further developments of borosilicate glass for the nitrification of high-level fission product solutions, 1032
BOROSILICATE GLASS/CHEMICAL COMPOSITION
Development of suitable vitrified radioactive waste products with low formation temperatures and improved leach resistance - a practical approach, 619 (BARC--1028)
BOROSILICATE GLASS/FRACTURES
Effects of processing variables on the product quality of large-scale glass forms containing simulated SRP waste, 741 (DP-MS--80-50)
BOROSILICATE GLASS/LEACHING
Characterization of vitrified ICPP alumina waste calcine, 769 (ENICO--1048)
Development of suitable vitrified radioactive waste products with low formation temperatures and improved leach resistance - a practical approach, 619 (BARC--1028)
Effects of processing variables on the product quality of large-scale glass forms containing simulated SRP waste, 741 (DP-MS--80-50)
High level waste properties, 959 (PNL-SA--8085)
Status report on LWR spent fuel IAEA leach tests, 1751 (PNL--3173)
BOROSILICATE GLASS/MATERIALS TESTING
High-temperature vitrification of Hanford residual-liquid waste in a continuous melter, 948 (PNL--3343)
BOROSILICATE GLASS/PHYSICAL PROPERTIES
Characterization of vitrified ICPP alumina waste calcine, 769 (ENICO--1048)
BOROSILICATE GLASS/POROSITY
Effects of processing variables on the product quality of large-scale glass forms containing simulated SRP waste, 741 (DP-MS--80-50)
BOROSILICATE GLASS/RADIATION EFFECTS
Significance of radiation effects in solid radioactive waste, 736 (DP-MS--80-27)
BOROSILICATE GLASS/VISCOSITY
Characterization of vitrified ICPP alumina waste calcine, 769 (ENICO--1048)
BOROSILICATES
Prior to July 1980 this was a valid term and older information is so indexed.
See BOROSILICATE GLASS
BOROSILICATES/CHEMICAL PREPARATION
Preparation and characterization of an improved high level radioactive waste (HAW) borosilicate glass, 1226
BOROSILICATES/CHEMICAL REACTIONS
Chemical compatibility of HLW borosilicate glasses with actinides. Solubilities and segregation processes, 1540 (KFK--2552)
BOROSILICATES/EVALUATION
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
BOROSILICATES/LEACHING
Calculations of radioactivity release due to leaching of vitrified high level waste, 2256
Corrosion behavior of zinc borosilicate simulated nuclear waste glass, 1416 (CONF-790420--)
ESCA studies on leached glass forms, 2526 (DP-MS--79-21)
Evaluation of long-term leaching of borosilicate glass in pure water, 1413 (CONF-790420--)
Glass as a matrix for SRP high-level defense waste, 745 (DPST--79-294)
Leach rate characterization of solid radioactive waste forms, 2255
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
BOROSILICATES/PERFORMANCE TESTING
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
BOROSILICATES/PHYSICAL PROPERTIES
Preparation and characterization of an improved high level radioactive waste (HAW) borosilicate glass, 1226
BOROSILICATES/PHYSICAL RADIATION EFFECTS
Simulations of radiation damage in glasses, 394 (CONF-790420--)
BORSSELE REACTOR/RADIOACTIVE WASTES
Atomic waste forever, 2734
BOTTOM-HOLE PRESSURE
See WELL PRESSURE
BR-2 REACTOR/RESEARCH PROGRAMS
Annual scientific report 1977, 2672 (BLG--524)
BRADWELL REACTOR/RADIOACTIVE EFFLUENTS
In situ data on various sites of radioactive releases into the marine environment, 2503
BRADWELL REACTOR/RADIOACTIVE WASTE DISPOSAL
In situ data on various sites of radioactive releases into the marine environment, 2503
BRAZIL/RADIOACTIVE WASTE MANAGEMENT
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)
BREEDING BLANKETS/RADIOACTIVITY
Induced activities of fusion reactor structural materials, 3584 (JAERI-M--7582)
BRINES/CHEMICAL COMPOSITION
Application of physical chemistry of fluids in rock salt at elevated temperature and pressure to repositories for radioactive waste, 2264
Expected environments in high-level nuclear waste and spent fuel repositories in salt, 1679 (ORNL/TM--7201)
BRINES/CHEMICAL REACTIONS
Application of physical chemistry of fluids in rock salt at elevated temperature and pressure to repositories for radioactive waste, 2264
BRINES/DIFFUSION
Modeling of brine migration in halite, 2484 (UCRL--82228)
Modeling of brine migration in halite, 2072 (UCRL--82228(Rev.1))
BRINES/FLUID FLOW
Brine: a computer program to compute brine migration adjacent to a nuclear waste canister in a salt repository, 2031 (UCID--18666)
Environmental chemistry, 1659 (ORNL--5485)
BRINES/FLUID MECHANICS
Expected environments in high-level nuclear waste and spent fuel repositories in salt, 1679 (ORNL/TM--7201)
BRINES/MASS TRANSFER
Investigation of salt transport in vertical boreholes in brine invasion into freshwater aquifers. Technical report, 1634 (ONWI--77)
BRINES/PHYSICAL PROPERTIES
Application of physical chemistry of fluids in rock salt at elevated temperature and pressure to repositories for radioactive waste, 2264
BRINES/RADIONUCLIDE MIGRATION
Brine: a computer program to compute brine migration adjacent to a nuclear waste canister in a salt repository, 2031 (UCID--18666)
Radiolytic oxidation and reduction of plutonium, 1431 (CONF-791112--49)
BRINES/SALTS
Nuclear waste chemistry, 488 (ORNL--5665)
BRINES/SOLVENT PROPERTIES
Brine chemistry effects on the durability of a simulated nuclear waste glass, 2474 (SAND--79-0900C)
BROMINE/ACTIVATION ANALYSIS
Trace elements retained in washed nuclear fuel reprocessing solvents, 43 (DP--1527)

TARAPUR-2 REACTOR
TSURUGA REACTOR
WUERGASSEN REACTOR
BWR TYPE REACTORS/AIR FILTERS
Active carbon filters for waste gas decontamination in nuclear power stations, and exchange of contaminated carbon, 2682
BWR TYPE REACTORS/CONTAINMENT SYSTEMS
Natural removal of particulate radioactivity in an LWR-containment during core meltdown accidents, 3028 (CONF-800403--(Vol.2))
Radioactive release following a LOCA with an initially breached containment, 3071
BWR TYPE REACTORS/CONTROL ROOMS
Recent improvement of Toshiba BWR instrumentation and control system, 2889
BWR TYPE REACTORS/DECONTAMINATION
Impact of LWR decontamination on radwaste systems, 2676 (PNL-SA--7381)
BWR TYPE REACTORS/EMERGENCY PLANS
Planning basis for the development of state and local government Radiological Emergency Response Plans in support of light water nuclear power plants, 2936 (NUREG--0396)
BWR TYPE REACTORS/FISSION PRODUCT RELEASE
Measuring and monitoring of gaseous releases and aerosol-bound radioactive material. Pt. 1. Measuring and monitoring of radioactive material released together with the stack exhaust air in regular operation. KTA safety regulation, 2730
BWR TYPE REACTORS/FORECASTING
Commercial US nuclear reactors and waste: the current status, 373 (PNL--3317-2)
BWR TYPE REACTORS/FUEL CYCLE
Chapter 3. Reprocessing. Paper 5. Proliferation risks associated with different back-end fuel cycles for light water reactors, 2842
Descriptions of reference LWR facilities for analysis of nuclear fuel cycles, 2449 (PNL--2286)
Descriptions of reference LWR facilities for analysis of nuclear fuel cycles. Appendixes, 2945 (PNL--2286(App.))
Ex-reactor fuel cycle nuclear safety, 2840
Generic waste management concepts for six LWR fuel cycles (Three recycle and three no-recycle options), 617 (ANL/EIS--11)
Neutron physical aspects of the storage of BWR fuel elements, 287
Nuclear fuel supply for countries embarking on a nuclear power programme, and aspects of developing a domestic nuclear fuel industry, 25
Wastes from selected activities in two light-water reactor fuel cycles, 518 (PNL--3425)
BWR TYPE REACTORS/FUEL ELEMENTS
Fission gas release in LWR fuel rods exhibiting very high burn-up, 2683
Mechanistic prediction of transient fission-gas release from LWR fuel, 2684
BWR TYPE REACTORS/FUEL POOLS
Application of partial failure analysis to an accident involving loss of cooling in a spent fuel storage pool, 3026 (CONF-800403--(Vol.2))
Neutron analysis of spent fuel pools, 2707
Status of spent-fuel storage pool applications, 2814
BWR TYPE REACTORS/FUEL RACKS
Rack for storing fuel elements (Patent; PWR; BWR), 2706
Status of spent-fuel storage pool applications, 2814
Storage rack for spent fuel elements (Patent), 331
BWR TYPE REACTORS/FUEL RODS
Nondestructive verification of relative burnup values and cooling times of irradiated MTR fuel elements, 3009 (LA--7949-MS)
BWR TYPE REACTORS/LOSS OF COOLANT
Radioactive release following a LOCA with an initially breached containment, 3071
BWR TYPE REACTORS/LOWLEVEL RADIOACTIVE WASTES
Activity levels of transuranic nuclides in low-level solid wastse from US power reactors. Final report, 446 (EPRI-NP--1496)
BWR TYPE REACTORS/MELTDOWN
Natural removal of particulate radioactivity in an LWR-containment during core meltdown accidents, 3028 (CONF-800403--(Vol.2))
BWR TYPE REACTORS/NUCLEAR MATERIALS MANAGEMENT
Nondestructive verification of relative burnup values and cooling times of irradiated MTR fuel elements, 3009 (LA--7949-MS)
BWR TYPE REACTORS/OFFGAS SYSTEMS
Technical quarterly progress report, January 1-March 31, 1979, 443 (ENICO--1012)
BWR TYPE REACTORS/OFFSHORE NUCLEAR POWER PLANTS
Liquid pathways generic studies; results, interpretation, and design implications, 3027 (CONF-800403--(Vol.2))
BWR TYPE REACTORS/PLUTONIUM RECYCLE
Experience with the use of recycle plutonium in mixed-oxide fuel in light water reactors in the Federal Republic of Germany, 1180
Report of the technological study working group of the AEC Committee on Development of Advanced Power Reactors, 2778
BWR TYPE REACTORS/POWER GENERATION
Consideration in upgrading a nuclear powr plant, 2696
BWR TYPE REACTORS/RADIOACTIVE EFFLUENTS
Airborne ^{131}I releases from operating BWRs, 2691
Beta dose in skin from gaseous radioactive reactor effluents, 2964
Guideline concerning the measurement of emitted radioactive substances in light water power reactor facilities, 3285
Iodine species in reactor effluents and in the environment. Final report, 2922 (EPRI-NP--1269)
Measurement and monitoring of gaseous and aerosol-bound radioactive discharges. 1. Measurement and monitoring of radioactive substance releases via the vent stack during routine operation. Draft, 2993
Measurement of liquid radioactive materials for the monitoring of radioactive emissions. UTA safety regulation, 2694
Methods for demonstrating LWR compliance with the EPA uranium fuel cycle standard: 40 CFR Part 190, 2937 (NUREG--0543)
Planning basis for the development of state and local government Radiological Emergency Response Plans in support of light water nuclear power plants, 2936 (NUREG--0396)
Publication of the safety regulation KTA 3603 of the Committee for Nuclear Technology (KTA). From March 12, 1980, 2898
Radioactivity release to the environment by thermal power stations using coal as a fuel, 2955
Radioactivity releases in boiling water reactors reported in the LER file, 2697
BWR TYPE REACTORS/RADIOACTIVE WASTE FACILITIES
Proceedings of the symposium on the on-site management of power reactor wastes, 2695
BWR TYPE REACTORS/RADIOACTIVE WASTE MANAGEMENT
Management of radioactive wastes at power reactor sites in India, 2699
Reactor waste management practices in the Federal Republic of Germany, 2700
BWR TYPE REACTORS/RADIOACTIVE WASTE PROCESSING
Impact of LWR decontamination on radwaste systems, 2676 (PNL-SA--7381)
Membrane filter applications for crud separation from radioactive waste water generated in LWR power plants, 2977
BWR TYPE REACTORS/RADIOACTIVE WASTES
Results of an analysis of the quantities of radioactive wastes developing during the decommissioning of nuclear power plants, 3074
Wastes arising from nuclear power plants, 2698

Wastes from selected activities in two light-water reactor fuel cycles, 518 (PNL--3425)
BWR TYPE REACTORS/REACTOR CONTROL SYSTEMS
Recent improvement of Toshiba BWR instrumentation and control system, 2889
BWR TYPE REACTORS/REACTOR DECOMMISSIONING
Boiling water reactor, 2808 (NUREG/CP--0008)
Development of United States policy and standards for decommissioning nuclear facilities, 3075
Results of an analysis of the quantities of radioactive wastes developing during the decommissioning of nuclear power plants, 3074
BWR TYPE REACTORS/REACTOR FUELING
Optimum fuel loading and operation planning for light water reactor power stations. Part II: boiling water reactor case study, 2680
BWR TYPE REACTORS/REACTOR OPERATION
Operating experience with West European light-water reactors, 2703
BWR TYPE REACTORS/SPENT FUEL CASKS
Basket for storing nuclear fuels in a cooling pool (Patent), 2716
BWR TYPE REACTORS/SPENT FUEL ELEMENTS
Spent fuel data base: commercial light water reactors, 2678 (UCRL--15186)
BWR TYPE REACTORS/SPENT FUEL STORAGE
Behavior of spent LWR fuel assemblies, 2709
Economics of spent LWR fuel storage, 2674 (DP-MS--80-24)
Method and device for storing irradiated respectively spent fuel assemblies from pressurized and boiling water reactors (Patent), 2704
Neutron analysis of spent fuel pools, 2707
Normal and compact spent fuel storage in light water reactor power plants, 2708
Spent fuel data base: commercial light water reactors, 2678 (UCRL--15186)
Spent fuel storage - Philosophies and experience, 2712
Spent Nuclear Fuel Storage Program user's guide (SNFSM Code), 2838 (DOE/EIA/8589--2)
BWR TYPE REACTORS/WATER
Treatment of radioactive contaminated water in nuclear power plants. Safety requirements. Draft, 2701
BWR TYPE REACTORS/WATER TREATMENT
Device for purifying water stored in pressure suppression chamber (Patent), 2689

C

CADMIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
CADMIUM/PHOTOMETRY
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
CADMIUM COMPLEXES/STABILITY
Other projects, 474 (LBL--10000)
CALCIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
CALCIUM/LEACHING
Preliminary mini experiments on leaching of glass. A report of the situation 1979-03-15, 2016 (STUDSVIK/E2--79/38)
CALCIUM OXIDES/CRYSTAL STRUCTURE
Zirconolite - a fluorite-related superstructure, 2662
CALIFORNIA/ELECTRIC POWER
Environmental implications of electric-utility supply plans, 1978-2000, 3179 (P--300-80-005)
CALIFORNIA/NUCLEAR FACILITIES
Radioactive materials in California, 2817
CALIFORNIA/NUCLEAR POWER PLANTS
Radioactive materials in Californie, 2817
CALIFORNIA/RADIOACTIVE MATERIALS
Radioactive materials in California, 2818
CALIFORNIA/RADIOACTIVE WASTE MANAGEMENT
Low-level radioactive waste management. Volume IV. Radioactive waste solidification and handling practices, 900 (NUS--3245)
CALIFORNIUM/ADSORPTION
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
CALIFORNIUM/SEPARATION PROCESSES
Separation methods used for large-scale production of transplutonium elements. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, (1), 858 (JAERI-M--8240)
CALIFORNIUM 242/RADIOECOLOGICAL CONCENTRATION
Transfer of actinides from the English Channel into the southern North Sea, 3453
CALIFORNIUM 242/RADIONUCLIDE MIGRATION
Transfer of actinides from the English Channel into the southern North Sea, 3453
CALIFORNIUM 244/RADIOECOLOGICAL CONCENTRATION
Transfer of actinides from the English Channel into the southern North Sea, 3453
CALIFORNIUM 244/RADIONUCLIDE MIGRATION
Transfer of actinides from the English Channel into the southern North Sea, 3453
CALORIMETERS
Capsule calorimeter development report, 378 (ARH--2619)
CAMBRIDGE ELECTRON ACCELERATOR/DECOMMISSIONING
Health physics considerations in accelerator decommissioning and disposal, 1725 (PB--296947)
CANADA
See also ONTARIO
CANADA/ATMOSPHERIC PRECIPITATIONS
Estimating long-term statistics for annual precipitation for six regions of the United States from tree-ring data, 3406 (UCRL--15162)
CANADA/CANDU TYPE REACTORS
Canadian nuclear power program, 2790
CANDU story, 2782
CANADA/GEOLOGIC DEPOSITS
Underground disposal of Canada's nuclear waste, 2387
CANADA/NUCLEAR POWER
Nuclear energy in our time, 2787
CANADA/NUCLEAR POWER PLANTS
Nuclear energy in Canada: potential and problems, 2834
CANADA/RADIOACTIVE WASTE DISPOSAL
Canadian program for nuclear fuel waste disposal, 2300
Progress in waste management technology, 1387 (AECL--6353)
Radioactive waste repository study. Part 1, 1383 (AECL--6188-1)
Radioactive waste repository study. Part 2, 1384 (AECL--6188-2)
Radioactive waste repository study. Part 3 (Summary), 1385 (AECL--6188-3)
Sharp drop and a long tail. The future for nuclear waste disposal, 2230
Use of geophysics in the Canadian radioactve waste disposal program, with examples from the Chalk River research area, 2136
CANADA/RADIOACTIVE WASTE MANAGEMENT
Progress in waste management technology, 1387 (AECL--6353)
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)
CANADA/RADIOACTIVE WASTE PROCESSING
Canadian development program for conditioning Candu reactor wastes for disposal, 1340
Removal of radionuclides from process streams--a review, 20
CANADA/URANIUM ORES
Removal of radionuclides from process streams--a review, 20
CANADA-INDIA REACTOR
See CIRUS REACTOR
CANADIAN AECB
(Canadian Atomic Energy Control Board.)
Control: the capability and commitment, 2645 (ER--77-2)
CANDU TYPE REACTORS
See also DOUGLAS POINT ONTARIO REACTOR
RAJASTHAN-1 REACTOR
RAJASTHAN-2 REACTOR
CANDU TYPE REACTORS/FUEL CYCLE
Possibility of multiple temperature maxima in geologic repositories for spent fuel from nuclear reactors, 232 (ORNL/TM--7024)
CANDU TYPE REACTORS/IAEA SAFEGUARDS
Investigation of techniques for the application of safeguards to a continuously fuelled reactor. Final report for the period 1 December 1975 - 30 September 1977, 2776 (IAEA-R--1733-F)
Safeguards scheme for 600-MW CANDU generating stations, 2780
CANDU TYPE REACTORS/NUCLEAR INDUSTRY
CANDU story, 2782
CANDU TYPE REACTORS/NUCLEAR TRADE
CANDU story, 2782
CANDU TYPE REACTORS/PLANNING
Canadian nuclear power program, 2790
CANDU TYPE REACTORS/RADIOACTIVE EFFLUENTS
Environmental aspects of tritium from CANDU station releases, 2779
CANDU TYPE REACTORS/RADIOACTIVE WASTE MANAGEMENT
Management of radioactive wastes at power reactor sites in India, 2699
On-site management of reactor wastes by a Canadian power utility, 2972
Recovery of tritium from CANDU reactors, its storage and monitoring of its migration in the environment, 2917 (AECL--6544)
CANDU TYPE REACTORS/RADIOACTIVE WASTE PROCESSING
Development of techniques for radwaste systems in CANDU power stations, 2773 (AECL--6534)
CANDU TYPE REACTORS/RADIOACTIVE WASTES
Canadian Development Program for conditioning CANDU reactor wastes for disposal, 607 (AECL--6344)
Canadian development program for conditioning Candu reactor wastes for disposal, 1340
CANDU TYPE REACTORS/REACTOR DECOMMISSIONING
Decommissioning of the CANDU-PHW reactor, 3079
CANDU TYPE REACTORS/TECHNOLOGY ASSESSMENT
Report of the technological study working group of the AEC Committee on Development of Advanced Power Reactors, 2778
CANDU TYPE REACTORS/TRITIUM
Recovery of tritium from CANDU reactors, its storage and monitoring of its migration in the environment, 2917

(AECL--6544)
CARBAMIDE
See UREA
CARBON 11/MONITORING
Environmental monitoring report for calendar year 1979, 3415 (FERMILAB--80/29)
CARBON 11/RADIATION MONITORING
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
CARBON 14/AERIAL MONITORING
Measurement of carbon-14 in gaseous effluents, 3689
CARBON 14/BIOLOGICAL EFFECTS
Potential impact of radiocarbon releases by the nuclear power industry. Consultant report, 2940 (P--300-80-006)
CARBON 14/ENVIRONMENTAL IMPACTS
Public health considerations of carbon-14 discharges from the light-water-cooled nuclear power reactor industry. Technical note, 2942 (PB--295054)
CARBON 14/ENVIRONMENTAL TRANSPORT
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
CARBON 14/GEOCHEMISTRY
Comments on carbon-14 dating of groundwaters in crystalline environments, 3530
CARBON 14/RADIATION DOSES
^{14}C behavior in HTR fuel reprocessing and preliminary evaluation of its release reduction process, 2431 (JAERI-M--7962)
CARBON 14/RADIATION MONITORING
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
CARBON 14/RADIOACTIVE WASTE MANAGEMENT
Assessment of waste management of volatile radionuclides, 496 (ORP/CSD--79-2)
CARBON 14/RADIOACTIVE WASTE PROCESSING
^{14}C behavior in HTR fuel reprocessing and preliminary evaluation of its release reduction process, 2431 (JAERI-M--7962)
CARBON 14/STACK DISPOSAL
AVR's application for release of tritium and carbon-14 approved, 2958
CARBON 14 COMPOUNDS/BIOSYNTHESIS
Microbial production of tritiated and carbon-14 methane from radioactive wastes, 2306
CARBON DIOXIDE
Effect of carbon dioxide on the rate of iodine vapor absorption by aqueous solution of sodium hydroxide, 1331
CARBON DIOXIDE/ADSORPTION
Method of immobilizing carbon dioxide from gas streams (Patent), 1113
CARBON DIOXIDE/RADIOACTIVE WASTE PROCESSING
Processes for the control of $^{14}CO_2$ during reprocessing, 672 (CONF-800211--2(Draft))
CARBON DIOXIDE/SCRUBBING
Analysis of barium hydroxide and calcium hydroxide slurry carbonation reactors, 908 (ORNL/MIT--300)
CARBON STEELS/CORROSION
Corrosion of mild steel waste form containers, 2208
CARBON STEELS/CORROSION RESISTANCE
Results of investigation into corrosion resistance of certain structural steels and nickel in fluoride products of fast reactor fuel reprocessing, 796 (INIS-mf--5565)
CARBONATE ROCKS/GEOCHEMISTRY
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
CARBONATE ROCKS/SAMPLING
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
CARCINOGENS/CHEMICAL REACTIONS
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
CASCADE IMPACTORS/CALIBRATION
Calibration of a modified Sierra Model 235 slotted cascade impactor, 3203 (EML--360)
CASCADE IMPACTORS/DESIGN
Calibration of a modified Sierra Model 235 slotted cascade impactor, 3203 (EML--360)
CASKS/CORROSION
On board corrosion analysis of a recovered nuclear waste container. Technical note, 3616 (PB--301163)
CASKS/DECONTAMINATION
Fleet servicing facilities for servicing, maintaining, and testing rail and truck radioactive waste transport systems: functional requirements, technical design concepts and options cost estimates and comparisons, 231 (ORNL/SUB--79/13866/1)
CASKS/DESIGN
Basalt Waste Isolation Project. Quarterly report, January 1-March 31, 1980, 1806 (RHO-BWI--80-100-Q)
Closable container with a self-locking lid (Patent), 3698
Conceptual design of a shipping cask for rail transport of solidified high level waste, 245 (PNL-SA--6526)
Conceptual design of a shipping cask for rail transport of solidified high level waste, 165 (CONF-780506--(Vol.1))
Design, licensing and fabrication of a 64,000 pound, top and bottom loading, type B shielded overpack, 167 (CONF-780506--(Vol.1))
Oak Ridge National Laboratory shipping containers for radioactive materials, 234 (ORNL/TM--7179)
Spent fuel transportation in the fuel cycle, 353
CASKS/FABRICATION
Design, licensing and fabrication of a 64,000 pound, top and bottom loading, type B shielded overpack, 167 (CONF-780506--(Vol.1))
CASKS/INSPECTION
Fleet servicing facilities for servicing, maintaining, and testing rail and truck radioactive waste transport systems: functional requirements, technical design concepts and options cost estimates and comparisons, 231 (ORNL/SUB--79/13866/1)
CASKS/LICENSING
Design, licensing and fabrication of a 64,000 pound, top and bottom loading, type B shielded overpack, 167 (CONF-780506--(Vol.1))
CASKS/MAINTENANCE
Fleet servicing facilities for servicing, maintaining, and testing rail and truck radioactive waste transport systems: functional requirements, technical design concepts and options cost estimates and comparisons, 231 (ORNL/SUB--79/13866/1)
CASKS/MATERIALS HANDLING
Experience in complying with quality assurance requirements for cask lifting devices, 178 (CONF-780506--(Vol.2))
CASKS/QUALITY ASSURANCE
Experience in complying with quality assurance requirements for cask lifting devices, 178 (CONF-780506--(Vol.2))
CASKS/SAFETY
Railroad perspective on transportation of spent fuel and high level waste and recent ICC decisions, 151 (CONF-780506--(Vol.1))
CASKS/SHIELDING
Some shielding and engineering aspects of irradiated thermal oxide fuel transport flasks, 365
CASKS/SHIELDS
ALARA studies on spent fuel and waste casks, 257 (SAND--79-1841)
CASKS/SPECIFICATIONS
Functional design criteria additional high-level waste storage facilities, 1398 (ARH-CD--362)
CASKS/THERMAL ANALYSIS
Conceptual design of a shipping cask for rail transport of solidified high level waste, 165 (CONF-780506--(Vol.))
CASTINGS/CHEMICAL COMPOSITION
Iron-rich basalt-type waste forms for transuranic and low-level waste containment: evaluation of electromelt castings, 750 (EGG-FM--5241)
CASTINGS/DENSITY
Iron-rich basalt-type waste forms for transuranic and low-level waste containment: evaluation of electromelt castings, 750 (EGG-FM--5241)
CASTINGS/LEACHING
Iron-rich basalt-type waste forms for transuranic and low-level waste containment: evaluation of electromelt castings, 750 (EGG-FM--5241)
CASTINGS/MICROSTRUCTURE
Iron-rich basalt-type waste forms for transuranic and low-level waste containment: evaluation of electromelt castings, 750 (EGG-FM--5241)
CATALYSTS/POLLUTION
Influence of various pollutions on the efficiency of noble metal catalysts, 1033
CATAWBA-1 REACTOR/FUEL RACKS
Experience with intrastation and interstation transfer of spent fuel, 2732
CATAWBA-1 REACTOR/SPENT FUEL STORAGE
Experience with intrastation and interstation transfer of spent fuel, 2732
CATAWBA-2 REACTOR/FUEL RACKS
Experience with intrastation and interstation transfer of spent fuel, 2732
CATAWBA-2 REACTOR/SPENT FUEL STORAGE
Experience with intrastation and interstation transfer of spent fuel, 2732
CATION EXCHANGE CAPACITY
See ION EXCHANGE
CEA LA HAGUE/ENVIRONMENTAL IMPACTS
Marine example of a site protection study, 2422 (IAEA--212)
CEA LA HAGUE/RADIATION HAZARDS
Nuclear debate. Reprocessing: La Hague. The weaker link, 108
CEA LA HAGUE/RADIATION PROTECTION
Nuclear debate. Reprocessing: La Hague. A technique under control, 109
CEA LA HAGUE/RADIOACTIVE EFFLUENTS
In situ data on various sites of radioactive releases into the marine environment, 2503
CEA LA HAGUE/RADIOACTIVE WASTE DISPOSAL
In situ data on various sites of radioactive releases into the marine environment, 2503
CEA LA HAGUE/WORKING CONDITIONS
Nuclear debate. Reprocessing: La Hague. The weaker link, 108
CELL MEMBRANES/RESEARCH PROGRAMS
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)

CEMENTS/CHEMICAL PREPARATION
Role of admixtures in preparing dense cements for radioactive waste isolation, 1237
CEMENTS/CHEMISTRY
Experience with cement usage as the binding agent for radwaste, 1338
CEMENTS/COMPARATIVE EVALUATIONS
European experience with asphalt packaging of radioactive wastes, 156 (CONF-780506--(Vol.1))
Low level radwaste packaging: why not cement, 629 (CONF-780506--(Vol.1))
CEMENTS/COMPRESSION STRENGTH
Solid waste disposal study, 865 (K/ET--5017)
CEMENTS/LEACHING
Immobilization of strontium and cesium in intermediate-level liquid wastes by solidification in cements, 1238
Leach studies of plutonium-contaminated incinerator ash incorporated in cement, 2595
Material investigations on solidification of intermediate-level waste solutions in cement: leachability of strontium and cesium, 875 (KFK--2842)
Pelletized waste form demonstration program, October 1979-March 1980, 894 (MLM--2717)
Radioactivity leach tests under high hydrostatic pressure on full size monolithic cement packages of LWR wastes for sea dumping, 2327
Solid waste disposal study, 865 (K/ET--5017)
CEMENTS/MATERIALS TESTING
Bell Canyon Test (BCT): cement development report, 1978 (SAND--80-0358C)
Sea disposal test of radioactive wastes into the Pacific: national situation, 2245
CEMENTS/PERFORMANCE TESTING
Borehole plugging materials development program, report 2, 1932 (SAND--79-1514)
CEMENTS/PERMEABILITY
Cement technology for borehole plugging: an interim report on permeability measurements of cementitious solids, 1675 (ORNL/TM--7092)
Permeability measurements on cementitious material for nuclear waste isolation, 2275
CEMENTS/RADIOLYSIS
Pelletized waste form demonstration program, October 1979-March 1980, 894 (MLM--2717)
Reaction of hydrogen and oxygen in the presence of concretes incorporating simulated radioactive waste, 669 (CONF-791112--64)
CEMENTS/SORPTIVE PROPERTIES
In-situ stabilization of radioactively contaminated low-level solid wastes buried in shallow trenches: an assessment, 915 (ORNL/TM--7130)
CENTRAL NUCLEAR EN ATUCHA REACTOR
See ATUCHA REACTOR
CENTRIFUGES/PERFORMANCE
Theoretical considerations in solid bowl centrifugation, 979 (RHO-CD--783)
CERAMIC MELTERS
Vitrification of SRP waste by a slurry-fed ceramic melter, 730 (DP-MS--79-103)
CERAMIC MELTERS/COMPUTERIZED SIMULATION
Numerical modeling of liquid feeding in the liquid-fed ceramic melter, 942 (PNL--3137)
CERAMIC MELTERS/CORROSION
Investigation of corrosion experienced in a spray calciner/ceramic melter vitrification system, 951 (PNL--3406)
CERAMIC MELTERS/DESIGN
Development of the in-can melting process for vitrification of Savannah River Plant waste, 740 (DP-MS--80-49)
Startup and operation of a plant-scale continuous glass melter for vitrification of Savannah River Plant simulated waste, 739 (DP-MS--80-48)
CERAMIC MELTERS/OPERATION
Startup and operation of a plant-scale continuous glass melter for vitrification of Savannah River Plant simulated waste, 739 (DP-MS--80-48)
CERAMIC MELTERS/SAFETY
Safety assessment of the liquid-fed ceramic melter process, 953 (PNL--3493)
CERAMIC MELTERS/START-UP
Startup and operation of a plant-scale continuous glass melter for vitrification of Savannah River Plant simulated waste, 739 (DP-MS--80-48)
CERAMICS
Characterization of glass and glass ceramic nuclear waste forms, 1230
CERAMICS/CHEMICAL REACTIONS
Radioactive waste-form and rock interactions: a discussion, 2311
CERAMICS/COMPARATIVE EVALUATIONS
Evaluation and review of alternative waste forms for immobilization of high level radioactive wastes, 713 (DOE/TIC--11219)
CERAMICS/CORROSION
Preliminary corrosion test of a glass-ceramic candidate for a nuclear waste canister, 2263
CERAMICS/EVALUATION
Review of high-level waste-form properties (Sintered ceramics, concrete, glass-ceramics, hot-pressed ceramics, and metal matrices waste forms evaluated), 1254
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
CERAMICS/IMPACT STRENGTH
Preliminary test program for impact resistance of solid waste forms, 2594
CERAMICS/LEACHING
Inspection of 'leach tested' ceramics specimens, 463 (KBS-TR--113)
Leaching of ceramics under simulated disposal conditions, 464 (KBS-TR--113)
Study with Auger electron spectroscopy of a number of ceramic specimens after leaching, 1535 (KBS-TR--113)
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
CERAMICS/PERFORMANCE TESTING
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
CERAMICS/PHASE STUDIES
Advanced waste forms research and development. Final report, October 1, 1978-September 30, 1979 (Supercalcine-ceramics; Soxhlet leachability), 691 (COO--2510-15)
CERAMICS/PHYSICAL RADIATION EFFECTS
Effects of irradiation on structural properties of crystalline ceramics, 396 (CONF-790420--)
CERAMICS/RADIATION EFFECTS
Gamma-irradiation effects on leaching characteristics of waste containment materials, 1797 (PNL-SA--7992)
Significance of radiation effects in solid radioactive waste, 736 (DP-MS--80-27)
CERAMICS/RESEARCH PROGRAMS
Development of tailored ceramics for geologic storage of nuclear wastes. Quarterly progress report, January 1-March 31, 1980, 420 (DOE/ET/41900--T2)
CERAMICS/STABILITY
Chemical stability of ceramics, 462 (KBS-TR--113)
CERIUM/ACTIVATION ANALYSIS
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
CERIUM/ADSORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Nuclide transport by groundwater in Swedish bedrock, 2581
Parameters affecting radionuclide migration in geologic media, 1560 (LA-UR--79-2992)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, July 1-September 30, 1979, 1550 (LA--8152-PR)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, October 1-December 31, 1979, 2435 (LA--8309-PR)
CERIUM/DESORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
CERIUM/DISTRIBUTION FUNCTIONS
Distribution of Cs, Sr, Ce, Eu and Tb into Na- and H-type zeolites, 1291
CERIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
CERIUM/ION EXCHANGE
Distribution of Cs, Sr, Ce, Eu and Tb into Na- and H-type zeolites, 1291
CERIUM/SOLVENT EXTRACTION
Calculation of distribution ratios of rare earth elements in multistage counter current extraction with HDEHP, 3676
CERIUM/SORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
CERIUM 144/ADSORPTION
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
CERIUM 144/DISTRIBUTION FUNCTIONS
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
CERIUM 144/ENVIRONMENTAL EXPOSURE PATHWAY
Determination of safe radioactive releases to the atmosphere from the nuclear power site, Duynefontein, 3360 (CONF-7604154--)

CERIUM 144/EVAPORATION
Some studies of nuclide losses. 2. Cold finger, 1289
CERIUM 144/RADIATION MONITORING
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
CERIUM 144/RADIOECOLOGICAL CONCENTRATION
Some aspects of accumulation of radionuclides in coastal sediments, 3439 (INIS-mf--5372)
CERIUM 144/RADIONUCLIDE KINETICS
Flux of certain radionuclides in the blood-clam Anadara granosa Linnaeus under environmental conditions, 3493
CERMETS/PHYSICAL PROPERTIES
Development and characterization of cermet forms for radioactive waste, 667 (CONF-791112--57)
CERMETS/RADIATION EFFECTS
Significance of radiation effects in solid radioactive waste, 736 (DP-MS--80-27)
CERMETS/SAMPLE PREPARATION
Development and characterization of cermet forms for radioactive waste, 667 (CONF-791112--57)
CESIUM/ACTIVATION ANALYSIS
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
CESIUM/ADSORPTION
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1978, 1774 (PNL-SA--7352(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1979, 2468 (PNL-SA--8571(Vol.2))
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Monitoring and physical characterization of unsaturated zone transport. Laboratory analysis, 2457 (PNL--3304)
Nuclear waste chemistry, 488 (ORNL--5665)
Nuclide transport by groundwater in Swedish bedrock, 2581
Parameters affecting radionuclide migration in geologic media, 1560 (LA-UR--79-2992)
Preliminary rate expressions for analysis of radionuclide migration resulting from fluid flow through jointed media, 1909 (SAND--79-0989C)
Radionuclide transport in a dolomite aquifer, 2476 (SAND--79-1016C)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, July 1-September 30, 1979, 1550 (LA--8152-PR)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, October 1-December 31, 1979, 2435 (LA--8309-PR)
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
Sorption behavior of ^{85}Sr, ^{137}Cs and /sup 95m/Tc under normal atmospheric and reduced oxygen levels, 2470 (PNL-SA--8571(Vol.2))
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Studies of radionuclide availability and migration at the Nevada Test Site relevant to radioactive waste disposal, 1769 (PNL-SA--7352(Vol.1))
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
Systematic study of nuclide adsorption on selected geologic media. Annual progress report, October 1, 1978-September 17, 1979, 2463 (PNL-SA--8571(Vol.2))
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
CESIUM/CHEMICAL REACTIONS
Hydrothermal interactions of cesium and strontium phases from spent unreprocessed fuel with basalt phases and basalts, 1821 (RHO-BWI-C--70)
CESIUM/CHEMISORPTION
Particle size distribution analysis and cesium sorption capacity of some bentonites, 2391
CESIUM/DESORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
CESIUM/DIFFUSION
Migration of cesium in dolomite from the Los Medanos area in southeastern New Mexico, 2193
CESIUM/DISTRIBUTION FUNCTIONS
Distribution of Cs, Sr, Ce, Eu and Tb into Na- and H-type zeolites, 1291
Dynamic properties of ion exchange of cesium into zeolites, 2214
CESIUM/ENVIRONMENTAL EXPOSURE PATHWAY
Geochemistry of radioactive waste disposal, 2135
CESIUM/ENVIRONMENTAL TRANSPORT
Prediction of migration velocities from partition coefficients: cesium in basalt, 2597
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
CESIUM/GEOCHEMISTRY
Geochemistry of radioactive waste disposal, 2135
CESIUM/ION EXCHANGE
Development of an ion-exchange process for removing cesium from high-level radioactive liquid wastes, 721 (DP-MS--79-26)
Distribution of Cs, Sr, Ce, Eu and Tb into Na- and H-type zeolites, 1291
Dynamic properties of ion exchange of cesium into zeolites, 2214
Selective cation-exchange separation of cesium(I) on chromium ferricyanide gel, 1016
Small-scale integrated demonstration of high-level radioactive waste processing and vitrification using actual SRP waste, 742 (DP-MS--80-60)
CESIUM/LEACHING
Immobilization of strontium and cesium in intermediate-level liquid wastes by solidification in cements, 1238
Material investigations on solidification of intermediate-level waste solutions in cement: leachability of strontium and cesium, 875 (KFK--2842)
Material studies on solidification of medium-level waste solutions with cement: leachability of cesium and strontium, 1039 (PNL-TR--387)
Measuring the hydrolytic resistance of solidification products, 2134
Preliminary mini experiments on leaching of glass. A report of the situation 1979-03-15, 2016 (STUDSVIK/E2--79/38)
CESIUM/MASS SPECTROSCOPY
Direct determination of cesium in pilot plant effluents by isotope dilution mass spectrometry, 734 (DP-MS--80-17)
CESIUM/PHOTOMETRY
Rubidium Rb and cesium Cs, 1345
CESIUM/PURIFICATION
Cell 18 ion exchange flowsheet, 980 (RHO-F--7)
CESIUM/RADIOACTIVE WASTE PROCESSING
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
CESIUM/RADIONUCLIDE MIGRATION
Preliminary rate expressions for analysis of radionuclide migration resulting from fluid flow through jointed media, 1909 (SAND--79-0989C)
CESIUM/RECOVERY
Theoretical considerations in solid bowl centrifugation, 979 (RHO-CD--783)
CESIUM/REMOVAL
Laboratory evaluation of an ion exchange process for removing cesium from Purex acid waste solutions, 978 (RHO-CD--739)
CESIUM/SOLUBILITY
Hydrothermal glass reactions in salt brine, 2268
CESIUM/SOLVENT EXTRACTION
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
Rubidium Rb and cesium Cs, 1345
CESIUM/SORPTION
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
Waste isolation safety assessment program. Task 4. Collection and generation of transport data theoretical and experimental evaluation of waste transport in selected rocks. Annual progress report, October 1, 1978-September 30, 1979, 1583 (LBL--9945)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
CESIUM/TITRATION
Rubidium Rb and cesium Cs, 1345
CESIUM/UPTAKE
Microbial uptake of uranium, cesium, and radium, 681 (CONF-800814--12)
CESIUM/VOLATILITY
Investigations of the volatility of cesium from aluminosilicates by mass spectrometry, 1236
CESIUM 134/ADSORPTION
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
CESIUM 134/ENVIRONMENTAL TRANSPORT
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water

contents), 3351
CESIUM 134/RADIONUCLIDE MIGRATION
Evaluation of isotope migration, land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
Windscale radiocaesium in the Clyde Sea area, 3422
CESIUM 135/LEACHING
Leachable gap activities, 1530 (KBS-TR--109)
CESIUM 137
Operation experience on industrial electrodialysis plant EDU-50 used in the sewage purification line at the central station of radiation safety (CSRS), 2933 (INIS-mf--5570)
CESIUM 137/ADSORPTION
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
Variables affecting sorption and transport of radionuclides in Hanford subsoils, 2274
CESIUM 137/BIOLOGICAL ACCUMULATION
Use of Hanford waste water ponds by waterfowl, 3475 (PB--296947)
CESIUM 137/BIOLOGICAL HALF-LIFE
Biological responses of a tropical coastal ecosystem to releases from electro-nuclear installations, 3388
CESIUM 137/DESORPTION
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
CESIUM 137/DIALYSIS
Removal of radioactive ions from nuclear waste solutions by electrodialysis, 1307
CESIUM 137/DISTRIBUTION FUNCTIONS
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
CESIUM 137/ENCAPSULATION
Ion exchange flowsheet for final purification of B plant cesium, 981 (RHO-F--8)
CESIUM 137/ENVIRONMENTAL EXPOSURE PATHWAY
Determination of safe radioactive releases to the atmosphere fron the nuclear power site, Duynefontein, 3360 (CONF-7604154--)
Environmental monitoring programme to assess and control the effects of liquid effluent discharges of low radioactivity to an inland lake, 3482
CESIUM 137/ENVIRONMENTAL TRANSPORT
^{137}Cs - contamination indicator of waste water discharged from A-1 nuclear power plant, 3474 (INIS-mf--4637)
Investigation of radiation substances migration in the surface waters of land, seas and oceans for the purpose of study of radiation situation changes in the fresh and sea-waters in connection with nuclear power plants and nuclear industry enterprises activity, 3417 (INIS-mf--5574)
Physical migration of radionuclides in soil, 3349
Radiocesium exchange among components of a Coastal Plain bottomland stream ecosystem, 3490
Radiological safety studies on the ground disposal of radioactive wastes. Distribution and migration of radionuclides in an aerated zone, 1525 (JAERI-M--8044)
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
Sorption and migration studies of fission products for ground waste disposal, 2335
CESIUM 137/EVAPORATION
Some studies of nuclide losses. 2. Cold finger, 1289
CESIUM 137/FISSION PRODUCTS
Development of ultrafiltration and adsorbents: April-September 1979, 889 (MLM--2684)
CESIUM 137/FLOTATION
Application of heterogeneous flotation for separation of some long living fission products, 810 (INIS-mf--5570)
CESIUM 137/GAMMA SOURCES
Parametric definition of radiocesium sources, 3625
CESIUM 137/INGESTION
Environmental protection, 3358 (BNL--51066)
CESIUM 137/ION EXCHANGE
Waste management program technical progress report, January-March 1979, 428 (DP--79-125-1)
CESIUM 137/ION EXCHANGE CHROMATOGRAPHY
Separation of ^{137}Cs from nuclear waste, 1247
CESIUM 137/LEACHING
Effect of dimension of specimen on amounts of cesium-137, strontium-90, and cobalt-60 leached from matrix of hardened cement grout, 2346
Leach and soil column tests with stored redox sludge, 2411 (ARH--1733)
Leach rates of high activity waste from borosilicate glass, 2226
Physical migration of radionuclides in soil, 3349
Thermal, chemical and radiation stability of vitrificated radioactive wastes, 1513 (INIS-mf--5571)
CESIUM 137/MIGRATION
Physical migration of radionuclides in soil, 3349
CESIUM 137/PLUMES
Liquid waste disposal at the Idaho National Engineering Laboratory and resultant waste plumes in the Snake River Plain aquifer, 3436 (IDO--12088)
CESIUM 137/PURIFICATION
Ion exchange flowsheet for final purification of B plant cesium, 981 (RHO-F--8)
CESIUM 137/RADIATION MONITORING
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
CESIUM 137/RADIOACTIVE WASTE PROCESSING
Application of ion exchangers with crown ethers as anchor groups in analytical and preparative chemistry, 1346
Rubidium Rb and cesium Cs, 1345
Study on the fixation of cesium-137 in clinoptilolite, 1319
CESIUM 137/RADIOCHEMICAL ANALYSIS
Radiochemical analyses of samples from beneath a solid radioactive waste disposal pit at Los Alamos, New Mexico, 1558 (LA--8422-MS)
CESIUM 137/RADIOECOLOGICAL CONCENTRATION
Aerial radiological survey of US Department of Energy sites in Ames, Iowa. Date of survey: May 1977, 3318 (EGG--1183-1686)
Measurement of environmental radioactivity. Ispra 1976, 3206 (EUR--5805)
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
Some aspects of accumulation of radionuclides in coastal sediments, 3439 (INIS-mf--5372)
CESIUM 137/RADIONUCLIDE KINETICS
Flux of certain radionuclides in the blood-clam Anadara granosa Linnaeus under environmental conditions, 3493
CESIUM 137/RADIONUCLIDE MIGRATION
^{90}Sr and ^{137}Cs in coyote scats from the Hanford Reservation, 3384
Evaluation of isotope migration, land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
Potential airborne release from soil-working operations in a contaminated area, 3345 (PNL--3498)
Study on safety ground storage and disposal of radioactive wastes. Distribution and migration of ^{60}Co and ^{137}Cs in a sand layer, 3323 (JAERI-M--7642)
Windscale radiocaesium in the Clyde Sea area, 3422
CESIUM 137/REMOVAL
Removal of radionuclides from Hanford defense waste solutions, 983 (RHO-SA--51)
Removal of radionuclides from the water-soluble fraction of Hanford Nuclear Defense Wastes, 988 (RHO-SA--145)
CESIUM 137/SORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
Sorption studies at Hanford for the control of radioactive wastes, 1872 (RHO-SA--155)
CESIUM 137/STORAGE
Characterization of pollucite as a material for long-term storage of cesium-137, 2161
CESIUM 137/UPTAKE
Cesium-137 in coots (Fulica americana) on Hanford waste ponds: contribution to population dose and offsite transport estimates, 3614 (PB--296947)
Radiocesium uptake by a population of cotton rats (Sigmodon hispidus) inhabitating the banks of a radioactive liquid waste pond, 3385
CESIUM 137/USES
Beneficial Uses Program. Progress report for period ending June 30, 1978, 3619 (SAND--78-1951)
CESIUM CHLORIDES/STORAGE
Characterization of pollucite as a material for long-term storage of cesium-137, 2161
CESIUM COMPOUNDS/ION EXCHANGE
Ion-exchange properties of cesium and strontium into zeolites from sodium salt solutions, 3686
CESIUM ISOTOPES/ENVIRONMENTAL TRANSPORT
Chemical migration of radionuclides in soil, 3350
Radioactive waste/soil interactions-migration potential of radionuclides through four soils, 2309
CESIUM ISOTOPES/LEACHING
Chemical migration of radionuclides in soil, 3350
Method of treating waste material containing radioactive cesium isotopes (Patent), 1068
CESIUM ISOTOPES/MIGRATION
Chemical migration of radionuclides in soil, 3350
CESIUM ISOTOPES/RADIOACTIVE WASTE PROCESSING
Method of treating waste material containing radioactive cesium isotopes (Patent), 1068

CESIUM OXIDES/CHEMICAL PROPERTIES
Characterization of pollucite as a material for long-term storage of cesium-137, 2161
CESIUM OXIDES/MICROSTRUCTURE
Characterization of pollucite as a material for long-term storage of cesium-137, 2161
CESIUM OXIDES/PHYSICAL PROPERTIES
Characterization of pollucite as a material for long-term storage of cesium-137, 2161
CESIUM OXIDES/SOLUBILITY
Hydrothermal interactions of cesium and strontium phases from spent unreprocessed fuel with basalt phases and basalts, 1821 (RHO-BWI-C--70)
CESIUM SILICATES
Pollucite and its alteration in geological occurrences and in deep-burial radioactive waste disposal, 2257
CESIUM SILICATES/RAMAN SPECTRA
Raman spectra of cesium aluminosilicate waste forms, 1224
CHALK RIVER NUCLEAR LABS/RADIOACTIVE WASTE FACILITIES
Canadian Development Program for conditioning CANDU reactor wastes for disposal, 607 (AECL--6344)
CHALK RIVER NUCLEAR LABS/RADIOACTIVE WASTES
Environmental tritium in trees, 3354
CHALKS
See LIMESTONE
CHARCOAL/REGENERATION
Beneficial Uses Program. Progress report for period ending June 30, 1978, 3619 (SAND--78-1951)
CHARCOAL/WEATHERING
Desorption kinetics of methyl iodide from impregnated charcoal, 1025
CHARGING (REACTOR)
See REACTOR FUELING
CHELATING AGENTS
See also EDTA
HEDTA
CHELATING AGENTS/SYNTHESIS
Functionalized glass beads for the recovery of waste radioactive elements. Final report, 710 (DOE/SR/00968--6)
CHEMICAL ANALYSIS
See also GAMMA SPECTROSCOPY
RADIOMETRIC ANALYSIS
Chemistry research and development. Progress report, December 1978-May 1979, 249 (RFP--2982)
CHEMICAL ANALYSIS/RESEARCH PROGRAMS
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
CHEMICAL EFFLUENTS/ENVIRONMENTAL EFFECTS
Public health hazards from electricity-producing plants, 3104
CHEMICAL EFFLUENTS/ENVIRONMENTAL IMPACTS
Comparative biological hazards of chemical pollutants and radiation, 3186
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
CHEMICAL EFFLUENTS/HEALTH HAZARDS
Comparative biological hazards of chemical pollutants and radiation, 3186
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
CHEMICAL EFFLUENTS/MONITORING
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
CHEMICAL PREPARATION
Possibilities of purification of chemonuclear synthesis products and estimating costs of such operations, 3688
CHEMONUCLEAR REACTORS/COST BENEFIT ANALYSIS
Possibilities of purification of chemonuclear synthesis products and estimating costs of such operations, 3688
CHILDREN/RADIOSENSITIVITY
Low level radiation. Radiation injuries of children und fetuses, 3663
CHINA CLAY
See KAOLIN
CHIPMUNKS/THERMOLUMINESCENT DOSIMETRY
Radiation dosimetry of small mammals inhabiting a liquid radioactive waste disposal area, 3363 (IDO--12088)
CHLORIDE VOLATILITY PROCESS/RADIOACTIVE WASTE PROCESSING
Stabilization of high-level waste from a chloride volatility nuclear fuel reprocessing system, 661 (CONF-790420--)
CHLORIDES/ION EXCHANGE
Sorption of fission products on Hungarian synthetic ion exchangers, 793 (INIS-mf--5564)
CHLORINE/ACTIVATION ANALYSIS
Trace elements retained in washed nuclear fuel reprocessing solvents, 43 (DP--1527)
CHLORINE/PLUMES
Liquid waste disposal at the Idaho National Engineering Laboratory and resultant waste plumes in the Snake River Plain aquifer, 3436 (IDO--12088)
2-CHLORO-1,3-BUTADIENE
See NEOPRENE
CHLOROBUTADIENE
See NEOPRENE
CHLOROPRENE

CHROMATIN/MOLECULAR STRUCTURE
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
CHROMIUM/CHROMATOGRAPHY
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
CHROMIUM/DISTRIBUTION FUNCTIONS
Distribution of Co, Cr and Fe into Na- and H-type zeolites, 3687
CHROMIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
CHROMIUM 51/ADSORPTION
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
CHROMIUM 51/DESORPTION
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
CHROMIUM 51/RADIOECOLOGICAL CONCENTRATION
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
CHROMOSOMES/BIOLOGICAL RADIATION EFFECTS
Systemic effects of radiation exposure on rodents inhabiting liquid and solid radioactive waste storage areas, 3473 (IDO--12088)
CHUBU-1 REACTOR

CLAYS/DIAGENESIS
Geothermal alteration of clay minerals and shales: diagenesis, 3513 (ONWI--21)
CLAYS/HEAT TRANSFER
Behavior of clay exposed to heating, 2365
CLAYS/PERMEABILITY
Hydrogeologic properties and pore water origin and age: clayey till and clay in south central Canada, 3534
CLAYS/PHASE TRANSFORMATIONS
Thermal and chemical properties of saturated marine clays in a near field environment, 1930 (SAND--79-1475C)
CLAYS/RADIONUCLIDE MIGRATION
Evaluation of isotope migration: land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Quarterly progress report, October-December 1979, 1613 (NUREG/CR--1325)
Measurement of penetration depths of plutonium and americium in sediment from the ocean floor, 1432 (CONF-791112--52)
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0988C)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
CLAYS/SORPTIVE PROPERTIES
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions, 2413 (BM-RI--8396)
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions. Report of investigations, 920 (PB--80-122740)
Effects of hydrogen peroxide pretreatment of clay minerals on the adsorption of Sr-85 and Tc-95m under anoxic conditions, 2469 (PNL-SA--8571(Vol.2))
Evaluation of isotope migration: land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Quarterly progress report, October-December 1979, 1613 (NUREG/CR--1325)
Nuclear waste chemistry, 488 (ORNL--5665)
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0988C)
Systematic study of nuclide adsorption on selected geologic media. Annual progress report, October 1, 1978-September 17, 1979, 2463 (PNL-SA--8571(Vol.2))
Waste/rock interactions technology. Interactions of plutonyl (VI) with soil minerals, 2465 (PNL-SA--8571(Vol.2))
CLAYS/TEMPERATURE EFFECTS

Behavior of clay exposed to heating, 2365
CLAYS/THERMAL CONDUCTIVITY
Thermal and chemical properties of saturated marine clays in a near field environment, 1930 (SAND--79-1475C)
Thermal conductivity of rocksalt and other geologic materials from the site of the proposed waste isolation pilot plant, 1936 (SAND--79-1665)
CLAYS/THERMODYNAMIC PROPERTIES
Far-field thermomechanical response of argillaceous rock to emplacement of a nuclear-waste repository, 3567 (SAND--79-2230)
CLAYS/THERMODYNAMICS
Geothermal alteration of clay minerals and shales: diagenesis, 3513 (ONWI--21)
CLIMATES/FORECASTING
Glaciological parameters of disruptive event analysis, 2544 (PNL--2851)
Probability of expected climate stresses in North America in the next one My, 2548 (PNL--2851)
CLIMATES/GEOLOGIC HISTORY
Precipitation and lake-level changes in the West and Midwest over the past 10,000 to 24,000 years. Final report, 2044 (UCRL--15173)
CLIMATES/VARIATIONS
Precipitation and lake-level changes in the West and Midwest over the past 10,000 to 24,000 years. Final report, 2044 (UCRL--15173)
CLINCH RIVER BREEDER REACTOR
Safety study. The Clinch River Breeder Reactor Plant, 3036 (INIS-mf--4862)
CLINCH RIVER BREEDER REACTOR/RADIOACTIVE AEROSOLS
Application of aerosol technology in LMFBR design, 3029 (CONF-800434--5)
CLINCH RIVER BREEDER REACTOR/RISK ASSESSMENT
Application of aerosol technology in LMFBR design, 3029 (CONF-800434--5)
CLINCH RIVER BREEDER REACTOR/SPENT FUEL CASKS
Assessment of LMFBR spent fuel shipping cask concepts for the CRBRP and the US conceptual design study, 262 (SAND--80-0085C)
CLINOPTILOLITE
Distribution of Co, Cr and Fe into Na- and H-type zeolites, 3687
CLOSURES/DESIGN
Basalt Waste Isolation Project. Quarterly report, January 1-March 31, 1980, 1806 (RHO-BWI--80-100-2Q)
Basalt Waste Isolation Project borehole plugging studies: an overview, 1838 (RHO-BWI-SA--49)
Evaluation of preconceptual plug designs using experts' judgement, 1841 (RHO-BWI-SA--66)
CLOSURES/FIELD TESTS
Basalt Waste Isolation Project borehole plugging studies: an overview, 1838 (RHO-BWI-SA--49)
CLOSURES/GROUTING
Bell Canyon Test (BCT): cement development report, 1978 (SAND--80-0358C)
Recommended analysis plan for the borehole plugging program potash core test, 1993 (SAND--80-0812)
CLOSURES/LEAK TESTING
Methods for evaluating the leak tightness of spent fuel container closures, 228 (NUREG/CR--1312)
CLOSURES/MATERIALS
Evaluation of preconceptual plug designs using experts' judgement, 1841 (RHO-BWI-SA--66)
CLOSURES/MATERIALS TESTING
Bell Canyon Test (BCT): cement development report, 1978 (SAND--80-0358C)
Borehole plugging of man-made accesses to a basalt repository: a preliminary study, 1814 (RHO-BWI-C--49)
Sealing a nuclear waste repository in Columbia River basalt: preliminary results, 1839 (RHO-BWI-SA--50)
CLOSURES/MATHEMATICAL MODELS
Seabed disposal project two-dimensional axisymmetric penetrometer simulations, 1937 (SAND--79-1679)
CLOSURES/MONITORING
Downhole television (DHTV) applications in borehole plugging, 1984 (SAND--80-0459)
CLOSURES/SIMULATION
Heated mine room and pillar secondary creep response, 1921 (SAND--79-1199)
CNA REACTOR
See ATUCHA REACTOR
COAL/COMBUSTION PRODUCTS
Trace element analysis of radiological effluents from coal-burning power plants, 3261
COAL/GOVERNMENT POLICIES
Scots seek soft path, 3140
COAL/HEALTH HAZARDS
Trace element analysis of radiological effluents from coal-burning power plants, 3261
COAL/RADIATION HAZARDS
Radon: characteristics, natural occurrence, technological enhancement, and health effects, 2598
COAL GAS/PURIFICATION
Gas-absorption process (DOE patent), 1287
COAL GASIFICATION/WASTE DISPOSAL
Earth sciences, 3183 (ORNL--5620)
COAL LIQUEFACTION/WASTE DISPOSAL
Earth sciences, 3183 (ORNL--5620)
COAL MINES/LAND RECLAMATION
Emergence and growth of plant species in coal mine soil, 3301
COAL MINES/SOLID WASTES
Coal mine waste (a bibliography with abstracts). Report for 1964-January 1979, 3611 (NTIS/PS--79/0080)
COAL PREPARATION/WASTES
Sludge dewatering by belt press, 15
COASTAL WATERS/CHEMICAL COMPOSITION
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
COASTAL WATERS/GEOCHEMISTRY
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
COASTAL WATERS/RADIATION MONITORING
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
COASTAL WATERS/RADIOACTIVITY
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
Radioactivity in surface and coastal waters of the British Isles, 1976. Part 2. Areas other than the Irish Sea and its environs, 3435 (FRL--14)
COASTAL WATERS/RADIONUCLIDE MIGRATION
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
COASTAL WATERS/WATER POLLUTION
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
COBALT/DISTRIBUTION FUNCTIONS
Distribution of Co, Cr and Fe into Na- and H-type zeolites, 3687
COBALT/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
COBALT/ION EXCHANGE
Co^{2+} and Ni^{2+} ion exchange on zirconyl phosphate from aqueous solutions, 797 (INIS-mf--5567)
COBALT/SORPTION
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
COBALT 60/ADSORPTION
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
Evaluation of isotope migration: land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Quarterly progress report, October-December 1979, 1613 (NUREG/CR--1325)
Monitoring and physical characterization of unsaturated zone transport. Laboratory analysis, 2457 (PNL--3304)
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
Variables affecting sorption and transport of radionuclides in Hanford subsoils, 2274
COBALT 60/ENVIRONMENTAL EXPOSURE PATHWAY
Distribution of cobalt 60 in a mollusc, a crustacean and a freshwater teleost: variations as a function of the source of pollution and during elimination, 3483
COBALT 60/ENVIRONMENTAL TRANSPORT
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
Radiological safety studies on the ground disposal of radioactive wastes. Distribution and migration of radionuclides in an aerated zone, 1525 (JAERI-M--8044)
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
COBALT 60/FISSION PRODUCTS
Development of ultrafiltration and adsorbents: April-September 1979, 889 (MLM--2684)
COBALT 60/LEACHING
Effect of dimension of specimen on amounts of cesium-137, strontium-90, and cobalt-60 leached from matrix of hardened cement grout, 2346
COBALT 60/RADIATION MONITORING
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
COBALT 60/RADIOACTIVE WASTE PROCESSING
Adsorption of radionuclides in waste water on oxine-impregnated activated charcoal. Adsorption characteristics of manganese-54 ion, 1197
COBALT 60/RADIOECOLOGICAL CONCENTRATION
Aerial radiological survey of US Department of Energy sites in Ames, Iowa. Date of survey: May 1977, 3318 (EGG--1183-1686)
Distribution of cobalt 60 in a mollusc, a crustacean and a freshwater teleost: variations as a function of the source of pollution and during elimination, 3483
COBALT 60/RADIONUCLIDE KINETICS
Flux of certain radionuclides in the blood-clam Anadara granosa Linnaeus under environmental conditions, 3493
Influence of the mode of uptake on the elimination of

cobalt 60 by a phanerogam, a mollusc, a crustacean and a freshwater teleost, 2571
COBALT 60/RADIONUCLIDE MIGRATION
Evaluation of isotope migration, land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
Study on safety ground storage and disposal of radioactive wastes. Distribution and migration of ^{60}Co and ^{137}Cs in a sand layer, 3323 (JAERI-M--7642)
COBALT 60/SORPTION
Sorption studies at Hanford for the control of radioactive wastes, 1872 (RHO-SA--155)
COBALT 60/TISSUE DISTRIBUTION
Distribution of cobalt 60 in a mollusc, a crustacean and a freshwater teleost: variations as a function of the source of pollution and during elimination, 3483
COFFEE
See BEVERAGES
COFRENTES REACTOR/SPENT FUEL STORAGE
Cost and implications of a middle-term program for storage of spent fuel in a nuclear power station (BWR), 359
COKE-OVEN GAS
See COAL GAS
COLD TRAPS/CLEANING
Dry cleaning method for cold trap (Patent), 19
COLLIERIES
See COAL MINES
COLORADO/ENERGY CONSUMPTION
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)
COLORADO/ENERGY SOURCE DEVELOPMENT
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)
COLORADO/FEED MATERIALS PLANTS
''Uranium mill regulation for Colorado--rationale and effectiveness'', 2653
Assessment of the radiological impact of the inactive uranium-mill tailings at Grand Junction, Colorado, 2536 (ORNL--5457)
Assessment of the radiological impact of the inactive uranium-mill tailings at Grand Junction, Colorado, 3336 (ORNL--5457)
Radiological survey of the inactive uranium-mill tailings at Durango, Colorado, 3332 (ORNL--5451)
Radiological survey of the inactive uranium-mill tailings at Gunnison, Colorado, 3333 (ORNL--5453)
Radiological survey of the inactive uranium-mill tailings at Maybell, Colorado, 3335 (ORNL--5456)
Radiological survey of the inactive uranium-mill tailings at Naturita, Colorado, 3334 (ORNL--5454)
COLORADO/GEOLOGY
Geologic studies for waste repository siting in the Paradox Basin, 2302
COLORADO/GEOMORPHOLOGY
Assessment of effectiveness of geologic isolation systems. Geologic factors in the isolation of nuclear waste: evaluation of long-term geomorphic processes and catastrophic events, 1734 (PNL--2854)
COLORADO/POLLUTION REGULATIONS
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)
COLORADO/POPULATION DYNAMICS
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)
COLORADO/RADIATION MONITORING
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
COLUMBIA RIVER/BIRDS
Use of Hanford waste water ponds by waterfowl, 3475 (PB--296947)
COLUMBIA RIVER/CONTAMINATION
Radiological survey of exposed shorelines and islands of the Columbia River between Vernita and the Snake River confluence, 3476 (PNL--3127)
COLUMBIA RIVER/RADIATION MONITORING
Radiological survey of exposed shorelines and islands of the Columbia River between Vernita and the Snake River confluence, 3476 (PNL--3127)
COLUMBIA RIVER BASIN/BIBLIOGRAPHIES
Additions and corrections to the bibliography of geologic studies, Columbia Plateau (Columbia River Besalt) and adjacent Areas, in Idaho, 1980, 1820 (RHO-BWI-C--68)
Bibliography of the geology of the Columbia Basin and surrounding areas of Washington, 1815 (RHO-BWI-C--59)
COLUMBIA RIVER BASIN/GEOLOGY
Additions and corrections to the bibliography of geologic studies, Columbia Plateau (Columbia River Besalt) and adjacent Areas, in Idaho, 1980, 1820 (RHO-BWI-C--68)
Bibliography of the geology of the Columbia Basin and surrounding areas of Washington, 1815 (RHO-BWI-C--59)
Bibliography of the geology of the Columbia plateau and adjacent areas of Washington, 3518 (RHO-BWI-C--82)
Preliminary subsurface hydrologic considerations: Columbia River Plateau physiographic province (Pasco Basin), 3514 (PNL--2851)
Preliminary subsurface hydrologic considerations: Columbia River Plateau Physiographic Province. Assessment of effectiveness of geologic isolation systems, 1736 (PNL--2859)
Summary of FY-1978 consultant input for scenario methodology development, 1731 (PNL--2851)
COLUMBIA RIVER BASIN/HYDROLOGY
Hydrologic bibliography of the Columbia River basalts in Washington with selected annotations, 1812 (RHO-BWI-C--45)
LANDSAT data as a basis for regional environmental assessment within the Columbia Plateau, 1837 (RHO-BWI-SA--43)
Preliminary subsurface hydrologic considerations: Columbia River Plateau physiographic province (Pasco Basin), 3514 (PNL--2851)
Preliminary subsurface hydrologic considerations: Columbia River Plateau Physiographic Province. Assessment of effectiveness of geologic isolation systems, 1736 (PNL--2859)
Summary of FY-1978 consultant input for scenario methodology development, 1731 (PNL--2851)
COLUMBIA RIVER BASIN/LAND USE
LANDSAT data as a basis for regional environmental assessment within the Columbia Plateau, 1837 (RHO-BWI-SA--43)
COLUMBIA RIVER BASIN/METEORITES
Summary of FY-1978 consultant input for scenario methodology development, 1731 (PNL--2851)
COLUMBIA RIVER BASIN/METEOROLOGY
Summary of FY-1978 consultant input for scenario methodology development, 1731 (PNL--2851)
COLUMBIA RIVER BASIN/SEISMIC SURVEYS
Basalt Waste Isolation Project. Quarterly report, January 1-March 31, 1980, 1806 (RHO-BWI--80-100-2Q)
COLUMBIA RIVER BASIN/STRATIGRAPHY
Basalt stratigraphy - Pasco Basin, 3519 (RHO-BWI-SA--26)
COLUMBIA RIVER BASIN/TECTONICS
Rate of deformation in the Pasco Basin during the Miocene as determined by distribution of Columbia River basalt flows, 1834 (RHO-BWI-SA--29)
COLUMBIA RIVER BASIN/VOLCANISM
Summary of FY-1978 consultant input for scenario methodology development, 1731 (PNL--2851)
COLUMBIUM

COMBUSTION PRODUCTS/HEALTH HAZARDS
Energy; what about the waste., 2567
COMBUSTION PRODUCTS/TOXICITY
Energy; what about the waste., 2567
COMMON MARKET/COORDINATED RESEARCH PROGRAMS
Nuclear research and development in the European community, 3630
COMPARATIVE EVALUATIONS/RADIATION HAZARDS
Risk relativities (Population exposure to radiation), 2897
COMPOSITE MATERIALS
See also CERMETS
COMPOSITE MATERIALS/PERMEABILITY
Permeability measurements on cementitious material for nuclear waste isolation, 2275
COMPOSITE MATERIALS/THERMAL CONDUCTIVITY
Thermal conductivity of granules, 1001 (SGAE--3012)
COMPOUNDS (ORGANIC)
See ORGANIC COMPOUNDS
COMPUTER CODES/A CODES
ARDISC Model: a computer program to calculate distribution of trace element migration in partially-equilibrating media, 1778 (PNL-SA--7352(Vol.2))
Assessment of effectiveness of geologic isolation systems. ARRRG and FOOD: computer programs for calculating radiation dose to man from radionuclides in the environment, 2549 (PNL--3180)
Comparison of the results of several heat transfer computer codes when applied to a hypothetical nuclear waste repository, 1677 (ORNL/TM--7112)
ORNL interface and logistics studies, 340
COMPUTER CODES/B CODES
Brine: a computer program to compute brine migration adjacent to a nuclear waste canister in a salt repository, 2031 (UCID--18666)
Compartment model for assessing chronic radioactive releases (Use of BIODOSE program to compute biosphere transport parameters and doses to individuals and populations), 3381
Preliminary evaluation of the BIODOSE computer program (For simulating radionuclide transport through aquatic ecosystems and predicting the dose to humans), 3478 (UCID--18267)
Radionuclide inventories in spent fuel from LWR and in high-level waste from plutonium recycle in PWR, 868 (KBS-TR--111)
Sources of data for biodose simulations used in bedded salt repository analysis, 2055 (UCRL--15208)
COMPUTER CODES/C CODES
Observations on the use of the consequence model CRAC for small nonreactor atmospheric releases, 2947 (SAND--80-0366)
Radioactive waste disposal classification system. Volume 2. The computer program and groundwater migration models, 1611 (NUREG/CR--1005(Vol.2))
Radionuclide inventories in spent fuel from LWR and in high-level waste from plutonium recycle in PWR, 868 (KBS-TR--111)
Survey of the distributions of population and agricultural produce, etc. and the application for

population dose evaluation. Survey for environmental safety research information, 3372 (JAERI-M--7757)
User's guide to the POPDOS2 program for evaluating collective doses, 3593 (CEGB-RD/B/N--4686)
COMPUTER CODES/COMPARATIVE EVALUATIONS
Waste Isolation Safety Assessment Program, 3243 (PNL--3300(Pt.2))
COMPUTER CODES/D CODES
Dynamic intragranular fission gas behavior model, 2870
Modelling and computing radiation hazards of population due to nuclear facility operation, 2427 (INIS-mf--4637)
ORNL interface and logistics studies, 340
COMPUTER CODES/E CODES
ENFORM II: a calculational system for light water reactor logistics and effluent analysis, 2828 (PNL--2429)
COMPUTER CODES/F CODES
Assessment of effectiveness of geologic isolation systems. ARRRG and FOOD: computer programs for calculating radiation dose to man from radionuclides in the environment, 2549 (PNL--3180)
Finite-element three-dimensional ground-water (FE3DGW) flow model - formulation, program listings and users' manual, 1741 (PNL--2939)
COMPUTER CODES/G CODES
GETOUT: a computer program for predicting radionuclide decay chain transport through geologic media, 2453 (PNL--2970)
Mechanistic prediction of transient fission-gas release from LWR fuel, 2684
COMPUTER CODES/H CODES
Comparison of the results of several heat transfer computer codes when applied to a hypothetical nuclear waste repository, 1677 (ORNL/TM--7112)
ORNL interface and logistics studies, 340
COMPUTER CODES/I CODES
User's guide to the programs ITRAP-A, ITRAP-B, ITRAP-S and ITRAP-L, 3226 (ND-R--53(W))
COMPUTER CODES/L CODES
Early identification of technical issues: a sensitivity study to check LISTRA1A internal consistency and structure, 2649 (UCID--18709)
COMPUTER CODES/M CODES
MACRO1: a code to test a methodology for analyzing nuclear-waste management systems, 2068 (UCRL--52736)
ORNL interface and logistics studies, 340
Repository post-sealing risk analysis using MACRO (MACRO), 2560 (UCRL--82236)
COMPUTER CODES/N CODES
Computer model of long-term hazards from waste repositories, 2574
ORNL interface and logistics studies, 340
COMPUTER CODES/O CODES
ORNL interface and logistics studies, 340
Radionuclide inventories in spent fuel from LWR and in high-level waste from plutonium recycle in PWR, 868 (KBS-TR--111)
COMPUTER CODES/P CODES
PLOTLIB: a computerized nuclear waste source-term library storage and retrieval system, 461 (K/DP--248)
User's guide to the POPDOS2 program for evaluating collective doses, 3593 (CEGB-RD/B/N--4686)
COMPUTER CODES/R CODES
REY: a computer code for the determination of the radionuclides activities from the gamma-ray spectrum data, 2935 (JEN--423)
COMPUTER CODES/S CODES
Comparison of the results of several heat transfer computer codes when applied to a hypothetical nuclear waste repository, 1677 (ORNL/TM--7112)
Computerprogram for calculating the radiological consequences of shorttime radioactive releases from nuclear installations, 3189 (AIAU--78306)
ORNL interface and logistics studies, 340
Spent Nuclear Fuel Storage Program user's guide (SNFSM Code), 2838 (DOE/EIA/8589--2)
COMPUTER CODES/T CODES
Comparison of the results of several heat transfer computer codes when applied to a hypothetical nuclear waste repository, 1677 (ORNL/TM--7112)
COMPUTER CODES/X CODES
ORNL interface and logistics studies, 340
COMPUTERS
Proceedings of 20th annual meeting of Institute of Nuclear Materials Management, 1979, 2640
CONCRETES
See also REINFORCED CONCRETE
CONCRETES/CHEMICAL REACTIONS
Structural evaluations of existing underground reinforced concrete tanks for radioactive waste storage, 1867 (RHO-SA--108)
CONCRETES/COMPRESSION
Elastic and strength properties of Hanford concrete mixes at room and elevated temperatures, 1846 (RHO-C--28)
CONCRETES/COMPRESSION STRENGTH
Interim report on status of containment integrity studies for continued in-tank storage of Hanford high-level defense waste, 1854 (RHO-CD--773)
CONCRETES/CRACKS
Calculations of the diffusion of nuclides through cracks in containers made of concrete, 2018 (STUDSVIK-K2--78/70)
CONCRETES/DECONTAMINATION
Decontamination of concrete surfaces at the Los Alamos Scientific Laboratory, 3610 (LA-UR--80-1460)
CONCRETES/ELASTICITY
Elastic and strength properties of Hanford concrete mixes at room and elevated temperatures, 1846 (RHO-C--28)
CONCRETES/EVALUATION
Review of high-level waste-form properties (Sintered ceramics, concrete, glass-ceramics, hot-pressed ceramics, and metal matrices waste forms evaluated), 1254
CONCRETES/MECHANICAL PROPERTIES
Strength and elastic properties of concretes from waste tank farms, 1845 (RHO-C--22)
CONCRETES/MICROSTRUCTURE
Comparison of the microstructure of Hanford Type II concrete structures and test specimens, 1847 (RHO-C--39)
CONCRETES/PERFORMANCE
Water loss in fast project interim fuel storage rack, 3033 (EGG-FM--5078)
CONCRETES/PERFORMANCE TESTING
Behavior of radioactive wastes incorporated in concrete and stored on open-air bed at CAMEN, 2115 (PNL-TR--408)
Waste tank core drilling demonstration results, 1858 (RHO-CD--980)
CONCRETES/PHYSICAL PROPERTIES
Cement technology for borehole plugging: interim report on the effects of fly ash and salt on the physical properties of cementitious solids, 1676 (ORNL/TM--7106)
CONCRETES/POISSON RATIO
Elastic and strength properties of Hanford concrete mixes at room and elevated temperatures, 1846 (RHO-C--28)
CONCRETES/RADIATION EFFECTS
Significance of radiation effects in solid radioactive waste, 736 (DP-MS--80-27)
CONCRETES/RADIONUCLIDE MIGRATION
Calculations of the diffusion of nuclides through cracks in containers made of concrete, 2018 (STUDSVIK-K2--78/70)
CONCRETES/SEALING MATERIALS
Development of a radon barrier, 3685
Field applications of a radon barrier to reduce indoor airborne progeny, 2610
CONCRETES/SEISMIC EFFECTS
Structural evaluations of existing underground reinforced concrete tanks for radioactive waste storage, 1867 (RHO-SA--108)
CONCRETES/TEMPERATURE EFFECTS
Interim report on status of containment integrity studies for continued in-tank storage of Hanford high-level defense waste, 1854 (RHO-CD--773)
Structural evaluations of existing underground reinforced concrete tanks for radioactive waste storage, 1867 (RHO-SA--108)
CONCRETES/TENSILE PROPERTIES
Elastic and strength properties of Hanford concrete mixes at room and elevated temperatures, 1846 (RHO-C--28)
Interim report on status of containment integrity studies for continued in-tank storage of Hanford high-level defense waste, 1854 (RHO-CD--773)
CONSTRUCTION/ACCOUNTING
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel: construction accounting manual, 1692 (ORO--5366-T8)
CONSTRUCTION/MANUALS
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel: construction accounting manual, 1692 (ORO--5366-T8)
CONSUMER PRODUCTS
Discharges of tritium to the environment from unrestricted use of consumer products containing this radionuclide, 3275
CONSUMER PRODUCTS/RADIATION DOSES
Large-scale distribution of tritium in a commercial product, 3274
CONTAINERS

TANKS
CONTAINERS/ANNULAR SPACE
Effects of annular air gaps surrounding an emplaced nuclear waste canister in deep geologic storage, 2080 (UCRL--84152)
CONTAINERS/CHEMICAL COMPOSITION
Transuranic contaminated waste container characterization and data base. Revision I, 1008 (UCRL--15253)
CONTAINERS/CHEMICAL RADIATION EFFECTS
Properties of radioactive wastes and waste containers. First topical report, 1603 (NUREG/CR--0619)
CONTAINERS/CHEMICAL REACTIONS
Application of physical chemistry of fluids in rock salt at elevated temperature and pressure to repositories for radioactive waste, 2264
CONTAINERS/CORROSION
Corrosion of mild steel waste form containers, 2208
CONTAINERS/DESIGN
Oak Ridge National Laboratory shipping containers for radioactive materials, 234 (ORNL/TM--7179)
Safety analysis report for packaging a DOT 7A

specification container for tritiated liquid wastes, 266 (SAND--80-8021)
CONTAINERS/ENGINEERED SAFETY SYSTEMS
Functions of an engineered barrier system for a nuclear waste repository in basalt, 1829 (RHO-BWI-LD--23)
CONTAINERS/FIRES
Thermal response modeling of a contact-handled transuranic waste shipping container system to a fire, 261 (SAND--80-0062C)
CONTAINERS/HEAT TRANSFER
Heat transfer analysis of the geologic disposal of spent fuel and high-level waste storage canisters, 1873 (RHO-SA--160)
CONTAINERS/IMPACT TESTS
Puncture phenomena in low velocity impact of radioactive waste shipping containers, 159 (CONF-780506--(Vol.1))
CONTAINERS/LINERS
Material for radioactive protection (Patent), 2404
CONTAINERS/MATERIALS
Behavior of radioactive wastes incorporated in concrete and stored on open-air bed at CAMEN, 2115 (PNL-TR--408)
CONTAINERS/MECHANICAL PROPERTIES
Properties of radioactive wastes and waste containers. First topical report, 1603 (NUREG/CR--0619)
CONTAINERS/NONDESTRUCTIVE ANALYSIS
Nondestructive analysis at B and W's uranium conversion plant, 588
CONTAINERS/PERFORMANCE
Analysis and model testing of a Super Tiger Type B waste transport system in accident environments, 265 (SAND--80-1633C)
CONTAINERS/PERFORMANCE TESTING
Behavior of radioactive wastes incorporated in concrete and stored on open-air bed at CAMEN, 2115 (PNL-TR--408)
Integrity demonstration test of radioactive waste packages deep-sea disposal. Hanging down-drawing up sea tests of multistage type and monolithic solid type packages, 1523 (JAERI-M--7780)
CONTAINERS/PHYSICAL PROPERTIES
Transuranic contaminated waste container characterization and data base. Revision I, 1008 (UCRL--15253)
CONTAINERS/PHYSICAL RADIATION EFFECTS
Properties of radioactive wastes and waste containers. First topical report, 1603 (NUREG/CR--0619)
CONTAINERS/RADIOACTIVE EFFLUENTS
Leak rates of plutonia powder, 3670
CONTAINERS/RECOMMENDATIONS
Guidelines for sea dumping packages of radioactive waste, 2278
CONTAINERS/REGULATIONS
Effects of proposed changes in regulations on low-level radwaste shipments, 2671
CONTAINERS/SAFETY
Analysis and model testing of a Super Tiger Type B waste transport system in accident environments, 265 (SAND--80-1633C)
CONTAINERS/SPATIAL DEPENDENCE
Annular air space effects on nuclear waste canister temperatures in a deep geologic waste repository, 2028 (UCID--18662)
CONTAINERS/SPECIFICATIONS
Effects of proposed changes in regulations on low-level radwaste shipments, 2671
Safety analysis report for packaging a DOT 7A specification container for tritiated liquid wastes, 266 (SAND--80-8021)
CONTAINERS/STANDARDS
Transuranic contaminated waste container characterization and data base. Revision I, 1008 (UCRL--15253)
CONTAINERS/TEMPERATURE EFFECTS
Effects of annular air gaps surrounding an emplaced nuclear waste canister in deep geologic storage, 2080 (UCRL--84152)
CONTAINERS/THERMAL ANALYSIS
Three-dimensional thermal analysis of a baseline spent fuel repository, 2081 (UCRL--84153)
CONTAINERS/THERMODYNAMIC PROPERTIES
Annular air space effects on nuclear waste canister temperatures in a deep geologic waste repository, 2028 (UCID--18662)
Properties of radioactive wastes and waste containers. First topical report, 1603 (NUREG/CR--0619)
CONTAINERS/ULTRASONIC TESTING
ASEA have developed a new safe container for nuclear fuel waste. Corundum container which takes about 400kg of uranium, 1288
CONTAINERS/UNDERGROUND DISPOSAL
Effects of annular air gaps surrounding an emplaced nuclear waste canister in deep geologic storage, 2080 (UCRL--84152)
CONTAINMENT BUILDINGS/RADIOACTIVE EFFLUENTS
Stably stratified building wakes, 2894 (NUREG/CR--1247)
CONTAINMENT BUILDINGS/SEISMIC EFFECTS
Seismic Safety Margins Research Program (Phase I). Project IV. Structural building response; Structural Building Response Review, 2849 (UCRL--15185)
CONTAINMENT BUILDINGS/STRESS ANALYSIS
Seismic Safety Margins Research Program (Phase I). Project IV. Structural building response; Structural Building Response Review, 2849 (UCRL--15185)
CONTAINMENT BUILDINGS/SURFACE AIR
Stably stratified building wakes, 2894 (NUREG/CR--1247)
CONTAINMENT SYSTEMS/FAILURES
Radioactive release following a LOCA with an initially breached containment (PWR;BWR), 3071
CONTAINMENT SYSTEMS/RADIOACTIVITY TRANSPORT
Natural removal of particulate radioactivity in an LWR-containment during core meltdown accidents, 3028 (CONF-800403--(Vol.2))
CONTAMINATION
(For radioactive contamination only; see also POLLUTION.)
Are portions of the Urals really contaminated (Evaluation of literature concerning radiation release in 1958), 2148
CONTAMINATION (INTERNAL)
See RADIONUCLIDE KINETICS
CONTAMINATION REGULATIONS/COMPLIANCE
Results of ground level radiation measurements in support of the 1978 aerial survey of the Lake Ontario Ordnance Works, Lewiston, New York, 3344 (ORNL/TM--7004)
CONTROL ELEMENTS
Fuel, breeder, or absorber element with elements for fission gas removal (Patent), 2890
CONTROL RODS
See CONTROL ELEMENTS
CONTROL ROOMS
Recent improvement of Toshiba BWR instrumentation and control system, 2889
CONTROL THEORY (REACTOR)
See REACTOR KINETICS
COOLANT CLEANUP SYSTEMS
Measures of reducing accumulation of radioactivity in primary cooling system of pressurized water reactors, 2754
COOLANTS
(See also specific coolant materials.)
COOLANTS/PURIFICATION
Method and apparatus for the *decontamination and cooling* of nuclear power plant, 2862
COOLING SYSTEM (REACTOR)
See REACTOR COOLING SYSTEMS
COORDINATED RESEARCH PROGRAMS/EVALUATION
Nevada Nuclear Waste Storage Investigations. FY 1979 peer review summaries and related documentation, 1618 (NVO--196-16)
COPPER/CORROSION RESISTANCE
Corrosion resistance of canisters for final disposal of spent nuclear fuel, 2262
COPPER/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
COPPER ALLOYS/FABRICATION
Development of boron carbide-copper cermets. Status report, 2792 (SAND--78-2317)
CORN STOVER
See AGRICULTURAL WASTES
CORROSION PRODUCTS/FILTRATION
Electromagnetic filtration of cruds in primary circuits of pressurized water nuclear reactors, 2744
CORROSION PRODUCTS/REMOVAL
Treatment of irradiated nuclear fuel material (Patent), 2882
CORROSION PRODUCTS/SOLVENT EXTRACTION
Distribution ratios and empirical equations for the extraction of elements in Purex high level waste solution. 1. TBP, 1242
COSMOTRON
(3-GeV protron synchrotron at BNL.)
COSMOTRON/DECOMMISSIONING
Health physics considerations in accelerator decommissioning and disposal, 1725 (PB--296947)
COUNTERS (RADIATION)
See RADIATION DETECTORS
CRABS
See CRUSTACEANS
CRANES/QUALITY ASSURANCE
Experience in complying with quality assurance requirements for cask lifting devices, 178 (CONF-780506--(Vol.2))
CRBR REACTOR
See CLINCH RIVER BREEDER REACTOR
CREEKS
See RIVERS
CREEP/MATHEMATICAL MODELS
Creep of ocean sediments resulting from the isolation of radioactive wastes, 1960 (SAND--79-2328C)
CRITICALITY ACCIDENTS
See RADIATION ACCIDENTS
CROPS
Application of atomic energy in agriculture. Annual Report 1978, 3371 (INIS-mf--5349)
CROPS/CONTAMINATION
Survey of the distributions of population and agricultural produce, etc. and the application for population dose evaluation. Survey for environmental safety research information, 3372 (JAERI-M--7757)
CRUDE OIL
See PETROLEUM
CRUSTACEANS
See also ZOOPLANKTON
CRUSTACEANS/RADIONUCLIDE KINETICS

Distribution of cobalt 60 in a mollusc, a crustacean and a freshwater teleost: variations as a function of the source of pollution and during elimination, 3483
CRYOGENICS/RESEARCH PROGRAMS
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
CURIUM/ADSORPTION
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0988C)
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
Theoretical and experimental evaluation of waste transport in selected rocks, 1768 (PNL-SA--7352(Vol.1))
CURIUM/CHEMICAL ANALYSIS
Detection and measurement of curium in the marine environment, 3414 (COO--3563-78)
CURIUM/CHEMICAL PROPERTIES
Chemistry of protactinium, neptunium, americium, and curium in the nuclear fuel cycle, 24
CURIUM/DISTRIBUTION FUNCTIONS
Methods for solvent extraction of strontium 90 with carboxylic acids and separation of americium and curium by quaternary ammonium compounds, 791 (INIS-mf--5564)
CURIUM/ION EXCHANGE
Kilogram-scale purification of americium by ion exchange, 72 (PNL-SA--7844)
Separation of americium, curium, and rare earths from high-level wastes by oxalate precipitation: experiments with synthetic waste solutions, 910 (ORNL/TM--6445)
CURIUM/LEACHING
Leaching of actinides and technetium from simulated high-level waste glass, 513 (PNL--3152)
CURIUM/METABOLISM
Metabolism and biological effects of the transplutonium elements, 3700
CURIUM/PRECIPITATION
Separation of americium, curium, and rare earths from high-level wastes by oxalate precipitation: experiments with synthetic waste solutions, 910 (ORNL/TM--6445)
CURIUM/RADIOACTIVE WASTE PROCESSING
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
Recovery of actinide values (Patent), 1124
CURIUM/RADIOCHEMICAL ANALYSIS
Detection and measurement of curium in the marine environment, 3414 (COO--3563-78)
CURIUM/RADIONUCLIDE MIGRATION
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0988C)
CURIUM/RECOVERY
Recovery of Am-Cm from high-activity waste concentrate by in-canyon-tank precipitation as oxalates, 737 (DP-MS--80-35)
CURIUM/SEPARATION PROCESSES
Separation methods used for large-scale production of transplutonium elements. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, (1), 858 (JAERI-M--8240)
CURIUM/SOLVENT EXTRACTION
Bidentate organophosphorus solvent extraction process for actinide recovery and partition, 1085
Extraction of americium, curium, strontium and rare earths from aqua-tail solutions of WWER spent fuel element reprocessing, 58 (INIS-mf--5567)
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
Recovery of actinide values (Patent), 1124
Recovery process (Patent), 562
Reducing the long-term hazard of reactor waste through actinide removal and destruction in nuclear reactors, 1024
CURIUM/TOXICITY
Metabolism and biological effects of the transplutonium elements, 3700
CURIUM 242/RADIOECOLOGICAL CONCENTRATION
Concentrations of the transuranic radionuclides ^{238}Pu, $^{239\ 240}Pu$, ^{241}Am, ^{242}Cm, and ^{244}Cm in abiotic and biotic components of the Test Reactor Area radioactive leaching ponds, 3472 (IDO--12088)
CURIUM 244/ADSORPTION
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
CURIUM 244/DISTRIBUTION FUNCTIONS
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
CURIUM 244/ENVIRONMENTAL TRANSPORT
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
CURIUM 244/ISOTOPE PRODUCTION
Recovery of by-product actinides from power reactor fuels and production of heat source isotopes, 1046
CURIUM 244/PURIFICATION
Kilogram-scale purification of americium by ion exchange, 72 (PNL-SA--7844)
CURIUM 244/RADIOECOLOGICAL CONCENTRATION
Concentrations of the transuranic radionuclides ^{238}Pu, $^{239\ 240}Pu$, ^{241}Am, ^{242}Cm, and ^{244}Cm in abiotic and biotic components of the Test Reactor Area radioactive leaching ponds, 3472 (IDO--12088)
CURIUM 244/RECOVERY
Process for the recovery of curium-244 from nuclear waste, 905 (ORNL--5687)
CUTTING TOOLS/DESIGN
Volume reduction of metallic waste (Arc saw), 702 (DOE/EV--0046(Vol.2))
CUTTING TOOLS/PERFORMANCE
Volume reduction of metallic waste (Arc saw), 702 (DOE/EV--0046(Vol.2))
CYANIDES/REMOVAL
Problem of detoxication of cyanide-containing radioactive waste. A bibliographic survey, 1217
CYCLOHEXANONE/SOLVENT PROPERTIES
Cyclohexanone solvent extraction of $^{99}TcO_4$ from alkaline nuclear waste solutions, 987 (RHO-SA--123)
CYCLOTRONS
See also ORSAY CYCLOTRON
CYCLOTRONS/RADIOACTIVE EFFLUENTS
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
CYLINDERS/DIFFUSION
Diffusion from solid cylinders, 1664 (ORNL/CSD/TM--84)
CZECHOSLOVAKIA/RADIOACTIVE WASTE DISPOSAL
Project for burial of nuclear power plant wastes in Czechoslovakia, 1514 (INIS-mf--5571)
CZECHOSLOVAKIA/RADIOACTIVE WASTE MANAGEMENT
Waste management practices in selected European countries, 561

D

DATA ACQUISITION SYSTEMS/COMPUTER CODES
Assessment of effectiveness of geologic isolation systems. CIRMIS data system. Volume 4. Driller's logs, stratigraphic cross section and utility routines, 1749 (PNL--3161-4)
DATA PROCESSING
See also DATA PROCESSING
DATA PROCESSING/QUALITY CONTROL
Real time quality control of meteorological data used in SRP's emergency response system, 3197 (DP--1551)
DAUGHTER PRODUCTS/RADIATION MONITORING
Measurements of radon daughter concentrations in structures built on or near uranium mine tailings, 2612
DBP
(Dibutyl phosphate.)
DBP/CHROMATOGRAPHY
Ion chromatographic determination of dibutylphosphoric acid in nuclear fuel reprocessing streams, 1282
DECALSO
See ION EXCHANGE MATERIALS
DECISION MAKING
Remarks on the assessment, representation, aggregation and utilization of expert opinion, 2030 (UCID--18665)
DECISION MAKING/MATHEMATICAL MODELS
Procedures for aggregating citizen preferences in the context of the nuclear waste management problem. Final report, 538 (UCRL--15214)
DECOMMISSIONING
See REACTOR DECOMMISSIONING
Low level waste burial ground, 1601 (NUREG/CP--0008)
Suggested policy and rule changes, 2807 (NUREG/CP--0008)
DECOMMISSIONING/ACTIVITY LEVELS
Residual radioactivity, 2810 (NUREG/CP--0008)
DECOMMISSIONING/BIBLIOGRAPHIES
Nuclear facility decommissioning and site remedial actions. Volume 1. A selected bibliography, 907 (ORNL/EIS--154/V1)
DECOMMISSIONING/COST
Decommissioning standards: the radioactive waste impact, 1722 (PB--296947)
Decommissioning of commercial shallow-land burial sites, 958 (PNL-SA--8014)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 1. Twenty-five-year retrievability, decommissioning cost estimate, 1691 (ORO--5366-T7)
Summary of a decommissioning handbook for nuclear facilities, 3077
DECOMMISSIONING/COST BENEFIT ANALYSIS
Use of a decommissioning cost/risk/benefit analysis to identify beneficial design features, 527 (RHO-SA--148)
DECOMMISSIONING/DECONTAMINATION
Summary of a decommissioning handbook for nuclear facilities, 3077
DECOMMISSIONING/ENVIRONMENTAL IMPACT STATEMENTS
Generic environmental impact statement, 2811 (NUREG/CP--0008)
DECOMMISSIONING/ENVIRONMENTAL IMPACTS
Engineering evaluation of the decommissioning of former uranium ore processing facilities, 22
DECOMMISSIONING/GOVERNMENT POLICIES
Development of United States policy and standards for

decommissioning nuclear facilities, 3075
DECOMMISSIONING/MEETINGS
Decommissioning of nuclear facilities, 2812 (STI/PUB--500)
State workshops for review of the Nuclear Regulatory Commission's decommissioning policy, 2806 (NUREG/CP--0008)
DECOMMISSIONING/PLANNING
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
Summary of a decommissioning handbook for nuclear facilities, 3077
DECOMMISSIONING/RADIATION HAZARDS
Decommissioning of commercial shallow-land burial sites, 958 (PNL-SA--8014)
DECOMMISSIONING/RADIATION PROTECTION
Summary of a decommissioning handbook for nuclear facilities, 3077
DECOMMISSIONING/RECOMMENDATIONS
Recommendations for remedial action and decommissioning of a radioactive waste burial site, 1724 (PB--296947)
DECOMMISSIONING/SAFETY
Decommissioning of commercial shallow-land burial sites, 958 (PNL-SA--8014)
DECOMMISSIONING/UNDERGROUND STORAGE
Engineering evaluation of the decommissioning of former uranium ore processing facilities, 22
DECONTAMINATION
Chemistry research and development. Progress report, December 1978-May 1979, 249 (RFP--2982)
Demonstration of alternative decontamination techniques at Three Mile Island, 3044 (PNL-SA--8143)
Impact of LWR decontamination on radwaste systems, 2676 (PNL-SA--7381)
DECONTAMINATION/BIBLIOGRAPHIES
Nuclear facility decommissioning and site remedial actions. Volume 1. A selected bibliography, 907 (ORNL/EIS--154/V1)
DECONTAMINATION/COST BENEFIT ANALYSIS
Cost/risk/benefit analysis report on the decontamination and decommissioning of Z-plant, 523 (RHO-CD--761)
DECONTAMINATION/ELECTROPOLISHING
Processing of waste solutions from electrochemical decontamination, 932 (PNL--2786)
DECONTAMINATION/MEETINGS
Research on deactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 4. Perfection of methods and means for averting radioactive contamination and for decontamination of equipment of nuclear power plants, research centers, and nuclear fuel reprocessing installations, 836 (INIS-mf--5573)
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 3. Burial of all types of radioactive wastes in geological formations, 835 (INIS-mf--5572)
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 1. Processing of liquid radioactive wastes of low and medium activity, 455 (INIS-mf--5570)
DECONTAMINATION/PLANNING
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
DECONTAMINATION/STANDARDS
Results of ground level radiation measurements in support of the 1978 aerial survey of the Lake Ontario Ordnance Works, Lewiston, New York, 3344 (ORNL/TM--7004)
DEFECTS
(Not for CRYSTAL DEFECTS.)
DEFECTS/SPENT FUEL STORAGE
Impacts of reactor-induced defects on spent fuel storage, 2785
DEFORMATION/MEASURING INSTRUMENTS
Review of current capabilities for the measurement of stress, displacement, and in situ deformation modulus, 3555 (ONWI--95)
DEFORMATION/MEASURING METHODS
Review of current capabilities for the measurement of stress, displacement, and in situ deformation modulus, 3555 (ONWI--95)
DELAYED NEUTRON ANALYSIS
Monte Carlo calculational design of an NDA instrument for the assay of waste products from highly enriched spent fuels, 103
DENITRIFICATION/WASTE DISPOSAL
Earth sciences, 3183 (ORNL--5620)
DENMARK/RADIOACTIVE WASTE DISPOSAL
Final disposal of high-level waste from nuclear power plants, 1503 (INIS-mf--5211)
Nuclear power. The nuclear fuel cycle. Appendix to ''Energy political review from the Ministry of Trade, ER79'', 1502 (INIS-mf--5209)
Regulatory aspects of underground disposal of radioactive waste - Danish notes, 1500 (INIS-mf--4921)
DENMARK/RADIOACTIVE WASTE MANAGEMENT
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)
DENMARK/RADIOACTIVE WASTE STORAGE
Nuclear power. The nuclear fuel cycle. Appendix to ''Energy political review from the Ministry of Trade, ER79'', 1502 (INIS-mf--5209)
DENSIMETERS/PERFORMANCE
Completely contained and remotely operated digital density meter, 3604 (DPSPU--79-30-14)
DENSIMETERS/SPECIFICATIONS
Completely contained and remotely operated digital density meter, 3604 (DPSPU--79-30-14)
DEOXYPENTOSE NUCLEIC ACID

ENVIRONMENTAL EFFECTS/EARTHQUAKES
Studies of the subsurface effects of earthquakes, 3546 (DP-MS--80-16)
ENVIRONMENTAL EFFECTS/FEED MATERIALS PLANTS
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
Assessment of the radiological impact of the inactive uranium-mill tailings at Shiprock, New Mexico, 2444 (ORNL--5447)
Assessment of the radiological impact of the inactive uranium-mill tailings at Monument Valley, Arizona, 2445 (ORNL--5449)
Radiological survey of the inactive uranium-mill tailings at Tuba City, Arizona, 3331 (ORNL--5450)
Uranium mining and milling environmental studies (citations from the Engineering Index data base). Report for 1970-January 1979, 2438 (NTIS/PS--79/0140)
ENVIRONMENTAL EFFECTS/FERMILAB ACCELERATOR
Environmental monitoring report for calendar year 1979, 3415 (FERMILAB--80/29)
ENVIRONMENTAL EFFECTS/HANFORD RESERVATION
Perspective on Hanford safety and environmental protection, 3396 (RLO-SA--79-1)
ENVIRONMENTAL EFFECTS/IODINE 129
^{129}I distribution in vegetation on the Idaho National Engineering Laboratory Site, 3368 (IDO--12088)
ENVIRONMENTAL EFFECTS/LOW-LEVEL RADIOACTIVE WASTES
Biological responses of a tropical coastal ecosystem to releases from electro-nuclear installations, 3388
Radiation dosimetry of small mammals inhabiting a liquid radioactive waste disposal area, 3363 (IDO--12088)
ENVIRONMENTAL EFFECTS/MARINE DISPOSAL
Radioactive waste dumping at sea: causes for concern, 2403
ENVIRONMENTAL EFFECTS/NUCLEAR FACILITIES
Engineering evaluation of a formerly utilized MED/AEC site. Site A and Plot M, Palos Forest Preserve, Palos Park, Illinois, 377 (ANL/ES--80)
Environmental analysis of a formerly utilized MED/AEC site: Site A and plot M, Palos Forest Preserve, Palos Park, Illinois, 2410 (ANL/ES--79)
ENVIRONMENTAL EFFECTS/NUCLEAR INDUSTRY
Results of ground level radiation measurements in

support of the 1978 aerial survey of the Lake Ontario Ordnance Works, Lewiston, New York, 3344 (ORNL/TM--7004)
ENVIRONMENTAL EFFECTS/NUCLEAR POWER PLANTS
Thermo- and fluiddynamic influences of nuclear power plants on the environment, 2913
ENVIRONMENTAL EFFECTS/RADIOACTIVE EFFLUENTS
^{129}I in thyroids of herbivores on the Idaho National Engineering Laboratory Site, 3369 (IDO--12088)
Limitation of the release of radioactive effluents, 2487
Public health hazards from electricity-producing plants, 3104
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
Some environmental aspects of uranium mining and milling in Northern Australia, 2515
ENVIRONMENTAL EFFECTS/RADIOACTIVE WASTE DISPOSAL
Activation and fission radionuclide concentrations and retention by ducks using radioactive leaching ponds, 3470 (IDO--12088)
Dumping of solid packaged radioactivity in the deep ocenas, 3421
Environmental monitoring and disposal of radioactive waste fron naval nuclear vessels and support facilities in 1978, 2175
Nuclear waste and Nuclear Regulatory Commission licensing, 2654
Radiocesium uptake by a population of cotton rats (Sigmodon hispidus) inhabitating the banks of a radioactive liquid waste pond, 3385
Species composition and local movement of small mammals on the Radioactive Waste Management Complex, Idaho National Engineering Laboratory Site, 3366 (IDO--12088)
Theoretical problems in defining dispersal in small mammals occupying the Subsurface Disposal Area, Idaho National Engineering Laboratory Site, 3367 (IDO--12088)
ENVIRONMENTAL EFFECTS/RADIOACTIVE WASTE FACILITIES
Surface hydrologic investigations of the Columbia Plateau Region, Washington, 3496 (RHO-BWI-ST--6)
ENVIRONMENTAL EFFECTS/RADIOACTIVE WASTE MANAGEMENT
Radioactive waste management and its implications for environmental research, 3420
ENVIRONMENTAL EFFECTS/RADIOACTIVE WASTES
Systemic effects of radiation exposure on rodents inhabiting liquid and solid radioactive waste storage areas, 3473 (IDO--12088)
ENVIRONMENTAL EFFECTS/SNR-1 REACTOR
Fast breeders and environment, 2892 (INTAT--78.147)
ENVIRONMENTAL EFFECTS/UNDERGROUND DISPOSAL
Radiation doses to small mammals at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3364 (IDO--12088)
Species composition and local movement of small mammals on the Radioactive Waste Management Complex, Idaho National Engineering Laboratory Site, 3366 (IDO--12088)
Theoretical problems in defining dispersal in small mammals occupying the Subsurface Disposal Area, Idaho National Engineering Laboratory Site, 3367 (IDO--12088)
ENVIRONMENTAL EFFECTS/URANIUM MINES
Uranium mining and milling environmental studies (citations from the Engineering Index data base). Report for 1970-January 1979, 2438 (NTIS/PS--79/0140)
ENVIRONMENTAL EFFECTS/WASTE DISPOSAL
Geological disposal and the taxpayer: the problem of the experts, 2129
ENVIRONMENTAL EFFECTS/WASTE PROCESSING PLANTS
^{129}I in thyroids of herbivores on the Idaho National Engineering Laboratory Site, 3369 (IDO--12088)
ENVIRONMENTAL EFFECTS/WEST VALLEY PROCESSING PLANT
General investigation of radionuclide retention in migration pathways at the West Valley, New York low-level burial site. Annual report, September 1, 1977-September 30, 1978, 1604 (NUREG/CR--0794)
ENVIRONMENTAL EXPOSURE PATHWAY/COMPUTERIZED SIMULATION
Computer enhanced release scenario analysis for a nuclear waste repository, 2584
ENVIRONMENTAL EXPOSURE PATHWAY/MATHEMATICAL MODELS
Computerprogram for calculating the radiological consequences of shorttime radioactive releases from nuclear installations, 3189 (AIAU--78306)
Effect of a long-term release of plutonium and americium into an estuarine-coastal sea ecosystem. 1. Development of an assessment methodology, 3484
Modelling and computing radiation hazards of population due to nuclear facility operation, 2427 (INIS-mf--4637)
Statistical analysis of selected parameters for predicting food chain transport and internal dose of radionuclides. Final report, 3375 (NUREG/CR--1004)
ENVIRONMENTAL EXPOSURE PATHWAY/RADIONUCLIDE KINETICS
Activation and fission radionuclide concentrations and retention by ducks using radioactive leaching ponds, 3470 (IDO--12088)
ENVIRONMENTAL IMPACT STATEMENTS
Final environmental impact statement. Los Alamos Scientific Laboratory Site, Los Alamos, New Mexico, 3601 (DOE/EIS--0018)
ENVIRONMENTAL IMPACT STATEMENTS/EVALUATION
Worst-case scenario syndrome, 3102 (SAND--80-0021C)
ENVIRONMENTAL IMPACTS
Nuclear power plants, 2909
ENVIRONMENTAL IMPACTS/ACCELERATOR FACILITIES
Radiological impact of high-energy accelerators on the environment, 3216 (KEK--78-20)
ENVIRONMENTAL IMPACTS/ACCELERATORS
Radiological environmental impact of high-energy accelerators, 3267
ENVIRONMENTAL IMPACTS/ANL
Environmental monitoring at Argonne National Laboratory. Annual report for 1979, 3304 (ANL--80-29)
ENVIRONMENTAL IMPACTS/BOHUNICE A-1 REACTOR
Radioactivity in the hydrosphere due to A-1 nuclear power plant operation, 3437 (INIS-mf--5319)
ENVIRONMENTAL IMPACTS/BOREHOLES
Research borehole drilling activity for boreholes DH-18, DH-19, DC-12, DC-13, DC-14, DC-15, and deepening of existing borehole DC-7, 1826 (RHO-BWI-CD--42)
ENVIRONMENTAL IMPACTS/CARBON 14
Public health considerations of carbon-14 discharges from the light-water-cooled nuclear power reactor industry. Technical note, 2942 (PB--295054)
ENVIRONMENTAL IMPACTS/CEA LA HAGUE
Marine example of a site protection study, 2422 (IAEA--212)
ENVIRONMENTAL IMPACTS/CHEMICAL EFFLUENTS
Comparative biological hazards of chemical pollutants and radiation, 3186
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
ENVIRONMENTAL IMPACTS/COMPARATIVE EVALUATIONS
Comparative biological hazards of chemical pollutants and radiation, 3186
ENVIRONMENTAL IMPACTS/DECOMMISSIONING
Engineering evaluation of the decommissioning of former uranium ore processing facilities, 22
ENVIRONMENTAL IMPACTS/DUAL-PURPOSE POWER PLANTS
Applied systems analysis No. 11: introduction of nuclear long-distance energy. Environmental impact and its assessment, 2893 (Juel--1573)
ENVIRONMENTAL IMPACTS/EARTHQUAKES
Earthquake damage to underground facilities, 3392 (DP--1526)
ENVIRONMENTAL IMPACTS/ELECTRIC POWER
Unpaid costs of electrical energy: health and environmental impacts from coal and nuclear power (Book), 3178
ENVIRONMENTAL IMPACTS/ENERGY SOURCE DEVELOPMENT

RADIONUCLIDE MIGRATION
ENVIRONMENTAL TRANSPORT/COMPUTER CODES
CIRMIS Data system. Volume 2. Program listings, 1747 (PNL--3161-2)
ENVIRONMENTAL TRANSPORT/FLOW MODELS
Conceptual model for regional radionuclide transport from a basalt repository site. Final draft, technical memorandum, 2066 (UCRL--15252)
Deep geological isolation of nuclear waste: numerical modeling of repository scale hydrology, 2062 (UCRL--15238)
ENVIRONMENTAL TRANSPORT/FORECASTING
NUTRAN: a computer model of long-term hazards from waste repositories, 2482 (UCRL--15150)
ENVIRONMENTAL TRANSPORT/HYDRODYNAMICS
Review of hydrodynamic dispersion in transport models , 3448
ENVIRONMENTAL TRANSPORT/MATHEMATICAL MODELS
Adsorption and cation exchange during unidirectional flow in a saturated porous medium, 3348 (SAND--79-6006)
Application of the finite element method to the calculation of atmospheric transport from large area sources, 3260
CIRMIS Data system. Volume 2. Program listings, 1747 (PNL--3161-2)
Compartment model for assessing chronic radioactive releases (Use of BIODOSE program to compute biosphere transport parameters and doses to individuals and populations), 3381
Deep geological isolation of nuclear waste: numerical modeling of repository scale hydrology, 2062 (UCRL--15238)
Dispersive processes in models of regional radionuclide migration. Technical memorandum, 2065 (UCRL--15251)
Investigation of salt transport in vertical boreholes in brine invasion into freshwater aquifers. Technical report, 1634 (CNWI--77)
Low level waste management: a compilation of models and monitoring techniques. Volume 1, 1668 (ORNL/Sub--79/13617/2)
Numerical analysis of radionuclide movement from a hypothetical nuclear waste repository (Ground-water mediated migration to river and subsequent population doses are modeled), 3450
Preliminary geosphere transport modeling at the WIPP site, 3451
Review of hydrodynamic dispersion in transport models , 3448
Specifications for the development of a fully three-dimensional numerical groundwater model for regional mass transport of radionuclides from a deep waste repository, 2063 (UCRL--15249)
Workshop on transport modeling for nuclear waste repositories, 2460 (PNL-SA--7468)
ENVIRONMENTAL TRANSPORT/RADIATION MONITORING
Low level waste management: a compilation of models and monitoring techniques. Volume 1, 1668 (ORNL/Sub--79/13617/2)
ENVIRONMENTAL TRANSPORT/SIMULATION
Multicomponent mass transport model: a model for simulating migration of radionuclides in ground water, 1752 (PNL--3179)
ENVIRONMENTAL TRANSPORT/TRACER TECHNIQUES
Use of the indicator activation method in studies of the propagation of pollutants in the atmosphere, 3185
ENZYME ACTIVITY/RESEARCH PROGRAMS
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
EPOXIDES/BIOLOGICAL SHIELDING
Field applications of a radon barrier to reduce indoor airborne progeny, 2610
EPOXY COMPOUNDS
See EPOXIDES
EQUIPMENT

EURATOM
EUROPEAN COMMUNITIES/RADIOACTIVITY
Releases of radioactive substances from nuclear power plants in the European Communities in 1972-1976, 2902
EUROPEAN COMMUNITIES/WASTE MANAGEMENT
Position of the European Communities and Belgium concerning the problems raised by radioactive waste, 571
EUROPIUM/ACTIVATION ANALYSIS
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
EUROPIUM/ADSORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Nuclide transport by groundwater in Swedish bedrock, 2581
Parameters affecting radionuclide migration in geologic media, 1560 (LA-UR--79-2992)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, July 1-September 30, 1979, 1550 (LA--8152-PR)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, October 1-December 31, 1979, 2435 (LA--8309-PR)
Systematic study of nuclide adsorption on selected geologic media. Annual progress report, October 1, 1978-September 17, 1979, 2463 (PNL-SA--8571(Vol.2))

EUROPIUM/DESORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
EUROPIUM/DISTRIBUTION FUNCTIONS
Distribution of Cs, Sr, Ce, Eu and Tb into Na- and H-type zeolites, 1291
Ion-exchange equilibria between montmorillonite and solutions of moderate-to-high ionic strength, 3579
EUROPIUM/ION EXCHANGE
Distribution of Cs, Sr, Ce, Eu and Tb into Na- and H-type zeolites, 1291
Ion-exchange equilibria between montmorillonite and solutions of moderate-to-high ionic strength, 3579
EUROPIUM/SOLVENT EXTRACTION
Calculation of distribution ratios of rare earth elements in multistage counter current extraction with HDEHP, 3676
EUROPIUM/SORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
Radionuclide sorption and migration studies of getters for backfill barriers, 1918 (SAND--79-1110)
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
EUROPIUM 152/ADSORPTION
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
EUROPIUM 152/DISTRIBUTION FUNCTIONS
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
EUROPIUM 152/ENVIRONMENTAL TRANSPORT
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
EUROPIUM COMPLEXES/STABILITY

Application of heterogeneous flotation for separation of some long living fission products, 810 (INIS-mf--5570)
FISSION PRODUCTS/GAMMA SPECTROSCOPY
Analysis of the concentrate of liquid HAW in the WAK, 2630
FISSION PRODUCTS/ION EXCHANGE
Sorption of fission products on Hungarian synthetic ion exchangers, 793 (INIS-mf--5564)
FISSION PRODUCTS/LEACHING
Measuring the hydrolytic resistance of solidification products, 2134
FISSION PRODUCTS/MASS SPECTROSCOPY
Analysis of the concentrate of liquid HAW in the WAK, 2630
FISSION PRODUCTS/RADIATION DOSES
Impacts of reactor-induced defects on spent fuel storage, 2785
FISSION PRODUCTS/RADIATION SOURCES
Thoughts on the application of fission product nuclides from radioactive waste, 3645
FISSION PRODUCTS/RADIOACTIVE WASTE PROCESSING
Experiments on the adsorptive removal of rare gases from the gaseous waste of a fuel reprocessing plant, 1308
FISSION PRODUCTS/RADIOCHEMICAL ANALYSIS
Continuous-flow apparatus for determination of ^{90}Sr in mixtures of fission products, 75 (RHO-SA--122)
FISSION PRODUCTS/RADIOECOLOGICAL CONCENTRATION
Analysis of the 1957-58 Soviet nuclear accident, 3233 (ORNL--5613)
Bioindication of nuclear fission aerosol products by means of ordinary pine needles, 3391
FISSION PRODUCTS/REMOVAL
Advances in the fluorocarbon process for decontamination of nuclear facility off-gas (R-12 (dichlorodifluoromethane)), 864 (K/ET--5010)
Removal of radionuclides from Hanford defense waste solutions, 983 (RHO-SA--51)
FISSION PRODUCTS/REVIEWS
Overview of beneficial uses of nuclear fission products, 3621 (SAND--80-0543C)
FISSION PRODUCTS/SCINTILLATION COUNTING
Analysis of the concentrate of liquid HAW in the WAK, 2630
FISSION PRODUCTS/SEPARATION PROCESSES
Extraction of technetium from fission product mixtures, 94
FISSION PRODUCTS/SHIELDING
Shielding thickness calculations for line gamma-ray sources in regular geometrical array, 2343
FISSION PRODUCTS/SOLVENT EXTRACTION
Distribution ratios and empirical equations for the extraction of elements in Purex high level waste solution. 1. TBP, 1242
Extraction process of fission products from spent nuclear fuel elements (Patent), 119
FISSION PRODUCTS/SPECIFIC HEAT
Studying thermophysical properties of high-active secondary products of reprocessing of the BOR-60 reactor spent fuel elements by fluoride gaseous method, 54 (INIS-mf--5564)
FISSION PRODUCTS/THERMAL CONDUCTIVITY
Studying thermophysical properties of high-active secondary products of reprocessing of the BOR-60 reactor spent fuel elements by fluoride gaseous method, 54 (INIS-mf--5564)
FISSION PRODUCTS/UNDERGROUND DISPOSAL
Feasibility of underground storage/disposal of noble gas fission products, 1394 (ANL--78-81)
FISSION PRODUCTS/USES
Overview of beneficial uses of nuclear fission products,

3621 (SAND--80-0543C)
Thoughts on the application of fission product nuclides from radioactive waste, 3645
FISSION PRODUCTS/VOLATILITY
Volatility of alkali fission products during solidification process, 854 (INKA-Conf--79-003-015)
FISSION PRODUCTS/WASTE HEAT UTILIZATION
Hydrogen production from nuclear fission product waste heat and use in gas turbines, 3628
FISSIONABLE MATERIALS
(Materials containing nuclides capable of undergoing fission by any process.)

Alteration of processing of nuclear fuel materials in Kumatori Works of Nuclear Fuel Industries, Ltd., 30
FUEL FABRICATION PLANTS/NUCLEAR MATERIALS MANAGEMENT
Nondestructive analysis at B and W's uranium conversion plant, 588
FUEL FABRICATION PLANTS/QUALITY ASSURANCE
Quality assurance program requirements for post reactor nuclear fuel cycle facilities, 118
FUEL FABRICATION PLANTS/RADIOACTIVE WASTES
Waste inventory report for reactor and fuel fabrication facility wastes, 586
FUEL FABRICATION PLANTS/SAFEGUARDS
Safeguards system of back-end facilities with emphasis on waste management, 2636
FUEL FABRICATION PLANTS/SAFETY STANDARDS
Principles of safety criteria for nuclear fuel facilities, 2580
FUEL FABRICATION PLANTS/SLUDGES
Sludge recovery apparatus (Patent), 1201
FUEL FABRICATION PLANTS/STANDARDS
Quality assurance program requirements for post reactor nuclear fuel cycle facilities, 118
FUEL LOADING
See REACTOR FUELING
FUEL PINS/MATERIALS HANDLING
Device for handling and examining removable pencils of fuel assemblies (Patent), 2887
FUEL PINS/REMOVAL
Spent-fuel disassembly and canning programs at the Barnwell Nuclear Fuel Plant (BNFP), 683 (CONF-800943--(Summ.))
FUEL PINS/SEALS
Sealed connection between fission gas outlet ducts (Patent), 2803
FUEL POOLS
Cost and implications of a middle-term program for storage of spent fuel in a nuclear power station (BWR), 359
Fuel element pond (Patent), 327
Nuclear reactor facility (Patent), 329
FUEL POOLS/ACCOUNTING
Nonintrusive irradiated fuel inventory confirmation technique, 2625 (LA-UR--80-689)
FUEL POOLS/CAPACITY
Reracking to increase spent fuel storage capacity, 1460 (DOE/SR-SF--2004(Rev.1))
FUEL POOLS/COMPARATIVE EVALUATIONS
Comparison of concepts for independent spent fuel storage facilities, 355
FUEL POOLS/CONFIGURATION
Radioactive material storage (Patent), 293
FUEL POOLS/CONTAINERS
Facility for avoiding contamination of a fuel storage pool (Patent), 2857
FUEL POOLS/CONTAMINATION
Arrangement for the prevention of contamination of a fuel element storage pool (Patent), 2856
FUEL POOLS/COOLING
Device for cooling and cleaning fuel pool (Patent), 2693
FUEL POOLS/COOLING SYSTEMS
Investigating the sensitivity of fuel storage concepts with natural-draft aircooling, 284
FUEL POOLS/CRITICAL SIZE
Critical experiments supporting close-packed water storage of power reactor fuel, 2603
Utilization of B and W critical facility in support of spent-fuel storage, 2602
FUEL POOLS/CRITICALITY
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, October 1, 1978-December 31, 1978, 141 (BAW--1484-5)
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, January 1-March 31, 1979, 143 (BAW--1484-6)
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, October 1-December 31, 1978, 137 (BAW--1484-1)
Critical experiments supporting close proximity water storage of power reactor fuel, 139 (BAW--1484-3)
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, October 1-December 31, 1978, 142 (BAW--1484-5)
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, 144 (BAW--1484-7)
K/sub α/ meter for spent nuclear fuel storage pools, 2604
Regulatory history and status of nuclear criticality safety research, 3669
FUEL POOLS/DECONTAMINATION
Device for cooling and cleaning fuel pool (Patent), 2693
Remotely operated ultrasonic decontamination system for fuel transfer pool, 2742
Restoration of an irradiated fuel storage facility, 275 (UNI-SA--74)
FUEL POOLS/DESIGN
Design bases for U.S. department of energy storage basin,

2886
Spent fuel storage capacity in new reactors, 198 (DOE/SR-SF--2003)
Spent fuel handling and storage facility for an LWR fuel reprocessing plant, 44 (DPSTD-AFCT--77-7)
U.S. Department of Energy Program to support the design and licensing of a spent fuel storage basin, 361
FUEL POOLS/EXPANSION
Expansion of capacity of spent fuel pools and associated problems, 2885
FUEL POOLS/FUEL RACKS
Support for a fuel element storage rack (Patent), 294
FUEL POOLS/INSPECTION
Irradiated fuel inspection station (PWR), 2741
FUEL POOLS/INVENTORIES
Computer model for LWR fuel storage, 204 (DPST--77-458)
FUEL POOLS/LEGAL ASPECTS
Status of spent-fuel storage pool applications, 2814
FUEL POOLS/LICENSING
Application for a license for compact storage of spent fuel elements in block 1 of Philippsburg nuclear power plant and Gk Neckar nuclear power plant, 2819
Notification of the Minister for Social Affairs concerning the date of a discussion to be held pursuant to nuclear law on the installation and operation of compact-type fuel stores in the Unterweser nuclear power plant, of October 16, 1979, 292
U.S. Department of Energy Program to support the design and licensing of a spent fuel storage basin, 361
FUEL POOLS/MATERIALS HANDLING
Fuel transporting device (Patent), 321
FUEL POOLS/MODIFICATIONS
Publication of the project of Rheinisch-Westfaelische Elektrizitaetswerk AG, Essen, to increase the capacity of the fuel storage pool of units A and B of Biblis nuclear power plant from five thirds of one core charge each to nine thirds of one core charge each, 2737
FUEL POOLS/OPERATION
Fuel element storage pond for nuclear installations (Patent), 2739
FUEL POOLS/RADIATION HAZARDS
Time integrated spent fuel storage biological doses, 3090
FUEL POOLS/RADIATION PROTECTION
Problems associated with the placement of fixed area monitors around irradiated fuel storage pools, 2861
FUEL POOLS/RADIOACTIVE WASTE PROCESSING
Purification of the high activity water from long time storage pool for fuel element clusters, 809 (INIS-mf--5570)
FUEL POOLS/RHR SYSTEMS
Application of partial failure analysis to an accident involving loss of cooling in a spent fuel storage pool (PWR; BWR), 3026 (CONF-800403--(Vol.2))
FUEL POOLS/SAFEGUARDS
Laser surveillance system for spent fuel, 2615 (BNL--27660)
FUEL POOLS/SPENT FUEL STORAGE
Evaluation of the problems associated with ENEL's irradiated fuel management, 360
FUEL POOLS/STORAGE FACILITIES
Fuel storage tank (Patent), 320
FUEL RACKS
Rack for storing fuel elements (Patent; PWR; BWR), 2706
FUEL RACKS/CAPACITY
High-density rack concepts for AFR fuel storage pools, 186 (CONF-800943--(Summ.))
Reracking to increase spent fuel storage capacity, 1460 (DOE/SR-SF--2004(Rev.1))
FUEL RACKS/COMPUTER-AIDED DESIGN
Study of the sensitivity and influence of the design parameters of a high density spent fuel rack in regard of the safety against criticality, 2866 (SGAE--2971)
FUEL RACKS/CONSTRUCTION
Storage rack for taking used fuel elements for nuclear power stations, 2884
FUEL RACKS/COOLING SYSTEMS
Spent fuel storage facility having forced recycle device (Patent), 323
FUEL RACKS/DESIGN
Device and process for storing groups of fission elements (Patent), 2871
Device for the storage of long nuclear reactor fuel elements in a water-filled pond (Patent), 2872
High-density rack concepts for AFR fuel storage pools, 186 (CONF-800943--(Summ.))
Nuclear fuel storage (Patent), 2869
Rack for holding fuel assemblies of nuclear reactors (Patent), 322
Storage rack for spent fuel elements (Patent), 331
FUEL RACKS/ECONOMIC ANALYSIS
Reracking to increase spent fuel storage capacity, 1460 (DOE/SR-SF--2004(Rev.1))
FUEL RACKS/FABRICATION
Storage rack for taking used fuel elements for nuclear power stations, 2884
FUEL RACKS/LEGAL ASPECTS
Status of spent-fuel storage pool applications, 2814
FUEL RACKS/MODIFICATIONS
Problems encountered during underwater replacement of storage racks in active spent-fuel pools, 2877
FUEL RACKS/NEUTRON ABSORBERS
Behavior of B_4C materials in spent-fuel storage pools, 2854
FUEL RACKS/PERFORMANCE
Water loss in fast project interim fuel storage rack, 3033 (EGG-FM--5078)
FUEL RACKS/SEISMIC EFFECTS
Dynamic analysis of storage racks for spent fuel assemblies, 291
FUEL RACKS/SHOCK ABSORBERS
Side support for a nuclear fuel storage rack and pre-loading device (Patent), 2883
FUEL RACKS/SPECIFICATIONS
Design and operation of a dry spent-fuel storage installation, 297
Swivel base for fuel assembly storage (Patent), 2876
FUEL RACKS/SUPPORTS
Nuclear fuel rack lateral support and preload device (Patent), 2874
Side support for a nuclear fuel storage rack and pre-loading device (Patent), 2883

Shutdown of the Eurochemic plants: program, evolution and teachings, 2609
FUEL REPROCESSING PLANTS/ENVIRONMENTAL IMPACTS
Environmental control aspects for fabrication, reprocessing and waste disposal of alternative LWR and LMFBR fuels, 2454 (PNL--3129)
Interconnection between fuel reprocessing and radioactive waste treatment, 60 (INIS-mf--5569)
FUEL REPROCESSING PLANTS/FEDERAL REPUBLIC OF GERMANY
Unclear decision for Germany (Proposed reactor complex at Gorleben), 3399
FUEL REPROCESSING PLANTS/FISSION PRODUCT RELEASE
Production and emission of tritium from nuclear facilities, and the resulting problems (Federal Republic of Germany), 2281
Radioactive krypton and xenon in nuclear power plant fuel cycle, 1206
Releases of radioactive substances from reprocessing plants in the EC in 1972-1976, 2566
FUEL REPROCESSING PLANTS/FLOWSHEETS
Liquid waste handling facilities for a conceptual light water reactor spent fuel reprocessing complex, 1181
Schematic flow sheet comparison of reprocessing plants,

81
FUEL REPROCESSING PLANTS/FUEL CYCLE
Closing the fast fuel cycle at Dounreay, 87
FUEL REPROCESSING PLANTS/HAZARDS
Reprocessing and waste management, 50 (INIS-mf--4782)
FUEL REPROCESSING PLANTS/HEAD END PROCESSES
Head-end of a reprocessing plant for HTR fuel elements, 93
FUEL REPROCESSING PLANTS/NUCLEAR MATERIALS MANAGEMENT
Licensed fuel facility status report. volume 1, number 3. data for decisions, fuel cycle operations. Status summary report (Events, releases, MUF), 2647 (PB--299080)
FUEL REPROCESSING PLANTS/OFFGAS SYSTEMS
Developments in effluent control for breeder reprocessing facilities, 36 (CONF-800334--7)
Evaluation of submicron particle size classification and collection techniques for nuclear facility off-gas streams, 45 (ENICO--1003)
Iodine 129 trapping in irradiated fuel reprocessing plants, 121
Iodine evolution from nuclear fuel dissolver solutions by air sparging, 39 (CONF-800802--18(Draft))
Iodine retention in La Hague reprocessing plant, 122
Kr-85 separation from the exhaust air of reprocessing plants. Technical realization and results, 1052
Method and equipment to strip traces of noble gas, particularly krypton, from a gas mixture having carbon dioxide as a component (Patent), 1036
Method for retention of tritium released during reprocessing spent nuclear fuel and storing the liquid radioactive waste produced thereby (Patent), 1311
Method of purifying gases from reprocessing of spent fuel elements containing radioactive substances (Patent), 1312
Organic iodine removal from simulated dissolver off-gas streams using silver-exchanged mordenite, 685 (CONF-801038--1(Draft))
Preliminary safety evaluation of a commercial-scale krypton-85 encapsulation facility, 47 (ENICO--1055)
Process-development and improvement of off gas filters for reprocessing plants, 1541 (KFK--2750)
Process for the decontamination of waste gases of a reprocessing plant for spent fuel and/or fertile material and installation for its realisation (Patent), 88
Removal processes for radioactive rare gas of fuel reprocessing plant, 1154
Separation of noble gas mixtures by low temperature rectification: Development for the purification of the offgas of nuclear facilities, 1071
Technical feasibility of krypton-85 storage in sodalite, 665 (CONF-791112--17)
Technical requirements for the control of ^{129}I in a nuclear fuels reprocessing plant, 945 (PNL--3186)
Technical development of the filter system for dissolver off gas cleanup, 872 (KFK--2750)
FUEL REPROCESSING PLANTS/PUBLIC RELATIONS
Windscale inquiry and its implications, 3097
Windscale inquiry and safety assessment. Oxford report No. 4, 2517
FUEL REPROCESSING PLANTS/QUALITY ASSURANCE
Quality assurance program requirements for post reactor nuclear fuel cycle facilities, 118
FUEL REPROCESSING PLANTS/RADIATION MONITORING
Continuous tritium monitor for nuclear facility off-gas streams, 2418 (ENICO--1022)
Identification of iodine-129 sources, concentrations, contaminant levels and radioiodine monitoring techniques in LWR reprocessing operations, 76 (SAI--00979-1)
FUEL REPROCESSING PLANTS/RADIATION PROTECTION
Safety concerning the alteration in fuel material usage (new installation of the high-level radioactive material research facility) in Tokai Works of Power Reactor and Nuclear Fuel Development Corp., 3504
Safety considerations in a fuel reprocessing plant, 51 (INIS-mf--5372)
FUEL REPROCESSING PLANTS/RADIOACTIVE AEROSOLS
Isolation and characterization of individual plutonium-bearing particles in atmospheric effluents from a nuclear processing plant, 3265
FUEL REPROCESSING PLANTS/RADIOACTIVE EFFLUENTS
^{14}C behavior in HTR fuel reprocessing and preliminary evaluation of its release reduction process, 2431 (JAERI-M--7962)
^{85}Kr in the atmosphere and its measurement, 3209 (INIS-mf--4637)
Developments in effluent control for breeder reprocessing facilities, 36 (CONF-800334--7)
Environmental radiation exposure due to exhaust air of the reprocessing plant, 3252
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
Measurement of ^{85}Kr concentration in the environmental air during the hot-test operation of Tokai reprocessing plant, 2448 (PNCT--841-78-49)
Population dose from LWR fuel reprocessing, 2600
Processes for the control of $^{14}CO_2$ during reprocessing, 672 (CONF-800211--2(Draft))
Radioactive effluents from nuclear power stations and fuel reprocessing plants in Europe, 1972 to 1976, 2962
Radioactive effluents from nuclear power stations and nuclear fuel reprocessing plants in the European Community. Discharge data 1972-1976 radiological aspects, 2420 (EUR--6088)
Studies on the dispersion of low-level liquid effluent released from the fuel reprocessing plant into the sea, 1726 (PNCT--841-78-69)
Wet and dry deposition and resuspension of AFCT/TFCT fuel processing radionuclides. Final report, 2556 (SR--0980-10)
Windscale radiocaesium in the Clyde Sea area, 3422
FUEL REPROCESSING PLANTS/RADIOACTIVE WASTE FACILITIES
Preliminary safety evaluation of a commercial-scale krypton-85 encapsulation facility, 688 (CONF-801038--7)
FUEL REPROCESSING PLANTS/RADIOACTIVE WASTE MANAGEMENT
Gorleben report. Insecurity and dangers of nuclear waste management. Excerpts from the expert's reports and the heaving held by the Lower Saxony government, 2291
Management of radionuclides from reprocessing plant gaseous effluents, 2242
FUEL REPROCESSING PLANTS/RADIOACTIVE WASTE PROCESSING
Adsorption-clathrates system for cleaning discharge gases on regeneration of spent reactor fuels, 848 (INIS-mf--5574)
Analysis of barium hydroxide and calcium hydroxide slurry carbonation reactors, 908 (ORNL/MIT--300)
Capture of ruthenium, iodine and triyium from discharge gases, produced during the process of dissolution at the device SU-2 of spent fuel elements from nuclear power plant with WWR reactors, 843 (INIS-mf--5574)
Cladding hull decontamination process: preliminary development studies, 68 (PNL--2985)
Cladding hull decontamination and densification process. Part 1. The prototype cladding hull decontamination system, 70 (PNL--3166(Pt.1))
Comparison of bitumen and cement immobilization of intermediate- and low-level radioactive waste, 957 (PNL-SA--7499)
Description of an incinerator for phosphorus-containing radioactive solvents, 1059
Environmental radiation exposure due to exhaust air of the reprocessing plant, 3252
Experience in decontamination and waste handling at a shut-down plant for regeneration of spent fuel elements, 1243
High level nuclear waste, 738 (DP-MS--80-39)
Interconnection between fuel reprocessing and radioactive waste treatment, 60 (INIS-mf--5569)
Investigation of krypton and xenon capture from discharge gases, produced during the process of dissolution at the device SU-2 spent fuel elements from the nuclear power plant with WWR reactors, 844 (INIS-mf--5574)
Liquid waste handling facilities for a conceptual light water reactor spent fuel reprocessing complex, 1181
Removal of actinides from nuclear fuel reprocessing wastes using an organophosphorous extractant (DHDECMP), 37 (CONF-800610--2)
Removal of actinides from nuclear fuel reprocessing wastes: engineering studies, 679 (CONF-800743--12)
Technical and economic feasibility of zeolite encapsulation for krypton-85 storage, 759 (ENICO--1011)
To the problem of neutralization of low- and medium-active spent fuel reprocessing wastes, 799 (INIS-mf--5567)
Treatment of liquid effluents of reprocessing plants by a chemical process: French experience, 34 (CEA-CONF--4241)
Types and properties of solid and gaseous wastes produced during experimental fluoride-gaseous regeneration of the BOR-60 reactor fuel, 61 (INIS-mf--5571)
FUEL REPROCESSING PLANTS/RADIOACTIVE WASTE STORAGE
Safety concerning the partial alteration of the fuel reprocessing facility in Power Reactor and Nuclear Fuel Development Corporation, 113
Safety concerning the partial alteration of the fuel reprocessing facility in Power Reactor and Nuclear Fuel Development Corporation, 114
FUEL REPROCESSING PLANTS/RADIOACTIVITY
Contamination of the ground near Building B 212 at Windscale Works, BNFL, 3312
FUEL REPROCESSING PLANTS/RECOMMENDATIONS
Safety in alteration of the fuel reprocessing plant in Power Reactor and Nuclear Fuel Development Corporation, 100
FUEL REPROCESSING PLANTS/REGULATIONS
Regulations concerning the reprocessing business of spent fuels, 2656
FUEL REPROCESSING PLANTS/REMOTE HANDLING EQUIPMENT
Operation Testing Laboratory in PNC Reprocessing Plant, (1). Transfer equipments for chopped fuel, dissolver solution, degraded solvent and high active waste, 67 (PNCT--841-78-60)
FUEL REPROCESSING PLANTS/RISK ASSESSMENT
Windscale inquiry and its implications, 3097
FUEL REPROCESSING PLANTS/SAFEGUARDS
Safeguards system of back-end facilities with emphasis on waste management, 2636
Situation at West Valley, 2157
FUEL REPROCESSING PLANTS/SAFETY
Interconnection between fuel reprocessing and radioactive waste treatment, 60 (INIS-mf--5569)

Safety concerning the partial alteration of the fuel reprocessing facility in Power Reactor and Nuclear Fuel Development Corporation, 113
Safety concerning the partial alteration of the fuel reprocessing facility in Power Reactor and Nuclear Fuel Development Corporation, 114
Safety considerations in a fuel reprocessing plant, 51 (INIS-mf--5372)
Safety in alteration of the fuel reprocessing plant in Power Reactor and Nuclear Fuel Development Corporation, 100
FUEL REPROCESSING PLANTS/SAFETY STANDARDS
Principles of safety criteria for nuclear fuel facilities, 2580
FUEL REPROCESSING PLANTS/SAMPLING
Process for taking samples, in particular from hot concentrates flowing in pipes, which contain radioactive or corrosive substances (Patent), 99
FUEL REPROCESSING PLANTS/SITE SELECTION
Interconnection between fuel reprocessing and radioactive waste treatment, 60 (INIS-mf--5569)
FUEL REPROCESSING PLANTS/SPENT FUEL STORAGE
Design and operation of a dry spent-fuel storage installation, 297
Spent fuel handling and storage facility for an LWR fuel reprocessing plant, 44 (DPSTD-AFCT--77-7)
FUEL REPROCESSING PLANTS/STANDARDS
Quality assurance program requirements for post reactor nuclear fuel cycle facilities, 118
FUEL REPROCESSING PLANTS/VALVES
Stop and regulating valves for radiochemical plants, 56 (INIS-mf--5565)
FUEL RODS/BURNUP
Nondestructive verification of relative burnup values and cooling times of irradiated MTR fuel elements, 3009 (LA--7949-MS)
FUEL RODS/LAND TRANSPORT
Operations experience with the NAC-1 legal weight truck cask, 175 (CONF-780506--(Vol.2))
FUEL RODS/NONDESTRUCTIVE TESTING
Nondestructive verification of relative burnup values and cooling times of irradiated MTR fuel elements, 3009 (LA--7949-MS)
FUEL RODS/SAFETY
Storage rack for fuel element sets (Patent), 3082
FUGEN ATR
See JATR REACTOR
FUKUSHIMA-1 REACTOR/CONTAINMENT SYSTEMS
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-1 REACTOR/MODIFICATIONS
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-1 REACTOR/RADIOACTIVE WASTE FACILITIES
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-1 REACTOR/REACTOR LICENSING
Alteration of reactor installation (Unit 1 reactor facility) in Fukushima Nuclear Power Station No. 2 of The Tokyo Electric Power Company, Inc., 2822
FUKUSHIMA-2 REACTOR/CONTAINMENT SYSTEMS
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-2 REACTOR/MODIFICATIONS
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-2 REACTOR/RADIOACTIVE WASTE FACILITIES
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-2 REACTOR/REACTOR LICENSING
Alteration of reactor installation (addition of Unit 2) in the Fukushima Nuclear Power Station No. 2 of the Tokyo Electric Power Company, Inc., 2823
FUKUSHIMA-3 REACTOR/CONTAINMENT SYSTEMS
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-3 REACTOR/MODIFICATIONS
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-3 REACTOR/RADIOACTIVE WASTE FACILITIES
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-6 REACTOR/CONTAINMENT SYSTEMS
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-6 REACTOR/MODIFICATIONS
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-6 REACTOR/RADIOACTIVE WASTE FACILITIES
Modification of reactor installation for the Fukushima First Nuclear Power Station of Tokyo Electric Power Company (modification of No. 1, No. 2, No. 3 and No. 6 reactor facilities), 2705
FUKUSHIMA-II-1 REACTOR/REACTOR LICENSING
Alteration of reactor installation (Unit 1) in Fukushima Nuclear Power Station II of the Tokyo Electric Power Company, Incorporated, 2825

Fifteen years experience filtering N reactor gaseous wastes, 3020 (UNI-SA--77)
Fifteen years of experience in handling tritium problems in connection with low-energy particle accelerators, 3273
Fission gas release in LWR fuel rods exhibiting very high burn-up, 2683
Fuel, breeder, or absorber element with elements for fission gas removal, 2890
Fundamental study on decontamination of tritium from gaseous phases by copper oxide, 1095
Gas-absorption process, 1287
Gas filter and device intended for removing from the housing the absorbant and granular matter, 1318
Gaseous and liquid radioactive leaks from A-1 nuclear power plant, 2761 (INIS-mf--5319)
Guideline concerning the measurement of emitted radioactive substances in light water power reactor facilities, 3285
Guideline for emission and immission monitoring in nuclear facilities, 3057
Head-end of a reprocessing plant for HTR fuel elements, 93
Head-end process for waste disposal within the fuel cycle, 84
Identification of iodine-129 sources, concentrations, contaminant levels and radioiodine monitoring techniques in LWR reprocessing operations, 76 (SAI--00979-1)
Immobilization of krypton by incorporation into a metallic matrix by combined ion implantation and sputtering, 2153
Improvements in particle-in-gas filtering, 3693
Industrial safety and applied health physics. Annual report for 1978, 3497 (ORNL--5543)
Interconnection between fuel reprocessing and radioactive waste treatment, 60 (INIS-mf--5569)
Investigations on methods and means for removal of radioactive aerosols and gases from air discharges for period of 1971 - 1975, 837 (INIS-mf--5574)
Investigation of krypton and xenon capture from discharge gases, produced during the process of dissolution at the device SU-2 spent fuel elements from the nuclear power plant with WWR reactors, 844 (INIS-mf--5574)
Investigations of radioactive iodine catching by ventilation system of the Ewa and Marila reactors, 850 (INIS-mf--5574)
Investigation of the atmospheric dispersion of radioactive gases and aerosols in the mesoscale (more than 15 km distance), 3219 (KFK--2750)
Iodine absorption in mixed solution of sodium hydroxide-boric acid, 1329
Iodine evolution from nuclear fuel dissolver solutions by air sparging, 39 (CONF-800802--18(Draft))
Ion-implantation and storage of radioactive waste in metal matrix, 1343
Isolation and characterization of individual plutonium-bearing particles in atmospheric effluents from a nuclear processing plant, 3265
Isotope composition of iodine in gaseous effluents of nuclear facilities and iodine filter efficiency, 2927 (INIS-mf--4637)
Kinetics of iodine removal by washing with water, 1332

Krypton implantation into metals - a process for fission krypton conditioning under vacuum, 1058
Large-scale distribution of tritium in a commercial product, 3274
Licensed fuel facility status report. volume 1, number 3. data for decisions, fuel cycle operations. Status summary report, 2647 (PB--299080)
Management of radioactive waste from Tarapur Atomic Power Station, 2715
Management of radionuclides from reprocessing plant gaseous effluents, 2242
Measurement of carbon-14 in gaseous effluents, 3689
Measurement and monitoring of gaseous and aerosol-bound radioactive discharges. 1. Measurement and monitoring of radioactive substance releases via the vent stack during routine operation. Draft, 2993
Measurement of tritium and tritiated water vapour in nuclear power installations. I. Tritium formation and transport in nuclear power installations, 2751
Measuring and monitoring of gaseous releases and aerosol-bound radioactive material. Pt. 1. Measuring and monitoring of radioactive material released together with the stack exhaust air in regular operation. KTA safety regulation, 2730
Mechanistic prediction of transient fission-gas release from LWR fuel, 2684
Meteorological aspects of environmental health and safety planning in nuclear power plant sites, 2906
Method and device for fixing radioactive gases, 1294
Method for removing tritium, 1301
Method for retention of tritium released during reprocessing spent nuclear fuel and storing the liquid radioactive waste produced thereby, 1311
Method for assessing the annual dose to the most exposed individual from tritium and ^{14}C reactor discharges to atmosphere, 3592 (CEGB-RD/B/N--4668)
Method of purifying gases from reprocessing of spent fuel elements containing radioactive substances, 1312
Method of processing radioactive gas, 1297
Microstructure-dependent model for fission product gas release and swelling in UO_2 fuel, 2868
Monitoring of radioactive releases at the Garigliano Nuclear Power Station of the Ente Nazionale per l'Energia Elettrica (ENEL), Italy, 2710
Monitoring of gaseous and liquid effluents at French nuclear power plants, 2994
Monitoring methods for radioactive noble gases in airborne effluents from nuclear power plants, 2998
Monitoring of airborne and liquid radioactive releases from nuclear facilities to the environment, 3292
Near surface spent fuel storage: environmental issues, 246 (PNL-SA--7344)
New technical standards for radioactive waste management in Japan, 2246
NRI's research on radioactive wastes, 781 (INIS-mf--4551)
Nuclear reactor gaseous radioactive wastes, 2987
Nuclear waste management. Quarterly progress report, April-June 1979, 507 (PNL--3000-2)
Nuclear waste management. Quarterly progress report, July-September 1979, 508 (PNL--3000-3)
Operative experience in radioactive waste treatment in Atucha nuclear power plant, 2984
Organic iodine removal from simulated dissolver off-gas streams using silver-exchanged mordenite, 685 (CONF-801038--1(Draft))
Potential impact of radiocarbon releases by the nuclear power industry. Consultant report, 2940 (P--300-80-006)
Present state and policy of low-level radioactive management, 1162
Problems of radioactive waste disposal in a nuclear medicine department, 2325
Process for separating fission gases from irradiated nuclear fuel, 112
Process for the decontamination of waste gases of a reprocessing plant for spent fuel and/or fertile material and installation for its realisation, 88
Processes for the control of $^{14}CO_2$ during reprocessing, 672 (CONF-800211--2(Draft))
Programmatic assessment of radioactive waste management: nuclear fuel and waste programs, 491 (ORNL/SUB--80/13837/3)
Progress towards the use of disposable filters, 610 (AERE-M--3012)
Prospects for liquid, gaseous and solid waste treatment systems for ENEL's reference power station BWR and PWR, 2985
R and D for an off-gas treatment system for a slagging pyrolysis radioactive waste incinerator. Final report for Phase II, 994 (SAI--78-904-LJ)
Radiation exposure due to nuclear facilities in West Germany in 1976, 2586
Radiation burden from radioactive gas emissions of the population in the immediate neighbourhood of the Nuclear Research Institute, 3390
Radioactivity reducing device, 2858
Radioactive rare gas separation performance of a two-unit series-type separation cell, 1313
Radioactive effluent control for Nuclear Research Institute, Rez, 2426 (INIS-mf--4637)
Radioactive krypton and xenon in nuclear power plant fuel cycle, 1206
Radioactivity in gaseous waste discharged from the separations facilities during 1978, 1850 (RHO-CO--78-35-4Q)
Radioactive effluents from nuclear power stations and nuclear fuel reprocessing plants in the European Community. Discharge data 1972-1976 radiological aspects, 2420 (EUR--6088)
Radioactive waste management and exposure situation for people engaging in nuclear power plant facilities, 3269
Radioactivity in gaseous waste discharged from the separations facilities during fourth quarter of 1979, 3245 (RHO-CO--79-35-4Q)
Radioactive gaseous waste processing facilities in nuclear power plants, 1119
Radioactive waste treatment experiences at Tarapur, 2978
Radioactive materials and environment, 3380
Radiochromatographic system for off-gas decontamination at the WWER nuclear power plants, 2753
Radiological safety aspects of the operation of electron linear accelerators, 3657
Radiological impact of high-energy accelerators on the environment, 3216 (KEK--78-20)
Radionuclide transfer in the environment and modality of man contamination, 3313
Radwaste process system experience at Tarapur, 2714
Regular control of monitors for effluents from nuclear power plant stacks, 2948 (STUDSVIK/K2--79/79)
Releases of radioactive substances from nuclear power plants in the European Communities in 1972-1976, 2902
Remote experimental facility to solidify SRP high-level waste, 725 (OP-MS--79-53)
Removal of tritium and tritium-containing compounds from a gaseous stream, 2657
Reprocessing and waste management, 50 (INIS-mf--4782)
Research on deactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 4. Perfection of methods and means for averting radioactive contamination and for decontamination of equipment of nuclear power plants, research centers, and nuclear fuel reprocessing installations, 836 (INIS-mf--5573)
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 5, 841 (INIS-mf--5574)
Research on deactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 5. Investigations on methods and means for removal of radioactive aerosols and gases from air discharges, 3416 (INIS-mf--5574)
Revised method to calculate the concentration time integral of atmospheric pollutants, 3282
Scrubbing of iodine from gas streams with mercuric nitrate-conversion of mercuric iodate product to barium iodate for fixation in concrete, 914 (ORNL/TM--7102)
Sealed connection between fission gas outlet ducts, 2803
Separation of krypton and xenon from the offgas of nuclear facilities, 870 (KFK--2600)
Separation of noble gas mixtures by low temperature rectification: Development for the purification of the offgas of nuclear facilities, 1071
Solidification device for radioactive gaseous wastes, 1136
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
Sorption of krypton-85 on molecular sieves, 842 (INIS-mf--5574)
Spray calcination/in-can melting: effluent characterization and treatment, 941 (PNL--3109)
Summary of radioactivity released in effluents from nuclear power plants from 1972 thru 1975, 2944 (PB--296289)
System for ventilating air contaminated with radioactivity, 3681
System for processing gaseous waste of resin-regeneration, 1192
Systems engineering programs for geologic nuclear waste disposal, 1983 (SAND--80-0440)
Technical and economic feasibility of zeolite encapsulation for krypton-85 storage, 759 (ENICO--1011)
Technical feasibility of krypton-85 storage in sodalite, 665 (CONF-791112--17)
Technical quarterly progress report, January 1-March 31, 1979, 443 (ENICO--1012)
Technical quarterly progress report, April 1-June 30, 1979, 444 (ENICO--1013)
Technical standard on disposal of radioactive wastes, 2331
Technological system for reception and storage of liquid radioactive concentrated wastes and spent sorbents for the Finish nuclear power plant Loviisa and serial nuclear power plant blocks with WWR-440 type reactors (system TW), 2931 (INIS-mf--5570)
Transport through a trench cover of gaseous tritiated compounds from buried radioactive wastes, 2285
Treatment and storage of radioactive gases from nuclear facilities, 547
Treatment of radioactive wastes at the Czechoslovak nuclear power station, 2981
Types and properties of solid and gaseous wastes produced during experimental fluoride-gaseous

regeneration of the BOR-60 reactor fuel, 61 (INIS-mf--5571)
User's guide to the POPDOS2 program for evaluating collective doses, 3593 (CEGB-RD/B/N--4686)
User's guide to the programs ITRAP-A, ITRAP-B, ITRAP-S and ITRAP-L, 3226 (ND-R--53(W))
Utilization of the temperature gradients measurements and climatological data in determination of permissible limits of radioactive gases discharge at nuclear power plants, 3212 (INIS-mf--5574)
Week they almost lost Pennsylvania, 3062
Wet combustion as a process of treating burnable plutonium-containing wastes, 1053
GASEOUS WASTES/AERIAL MONITORING
Monitoring of radioiodine in gaseous effluents at the Bhabha Atomic Research Centre, India, 2997
GASEOUS WASTES/AWAY-FROM-REACTOR STORAGE
Effects of gaseous radioactive nuclides on the design and operation of repositories for spent LWR fuel in rock salt, 1660 (ORNL--5578)
GASEOUS WASTES/DOUGLAS POINT ONTARIO REACTOR
Monitoring of gaseous effluents in Ontario Hydro, 2786
GASEOUS WASTES/FILTRATION
Device for filtering gaseous media (Patent), 3674
GASEOUS WASTES/NUCLEAR POWER PLANTS
Monitoring of the discharge of radioactive materials in gaseous effluents at the stack of nuclear power plants with light-water-cooled reactors, 3291
Nuclear reactor gaseous radioactive wastes, 2987
GASEOUS WASTES/RADIATION MONITORING
Explanation of guideline concerning the measurement of emitted radioactive substances in light water power reactor facilities, 3286
Monitoring of gaseous effluents in Ontario Hydro, 2786
Monitoring of releases from an irradiated fuel reprocessing plant, 2995
Monitoring of the discharge of radioactive materials in gaseous effluents at the stack of nuclear power plants with light-water-cooled reactors, 3291
GASEOUS WASTES/RADIOACTIVE WASTE DISPOSAL
Decontamination and disposal of radioactive wastes from nuclear facilities, 694 (CS-INIS--258)
Effects of gaseous radioactive nuclides on the design and operation of repositories for spent LWR fuel in rock salt, 1660 (ORNL--5578)
Radioactivity in gaseous waste discharged from the separations facilities during 1978 (Rockwell Hanford Operations), 1850 (RHO-CD--78-35-4Q)
GASEOUS WASTES/RADIOACTIVE WASTE MANAGEMENT
Management of radionuclides from reprocessing plant gaseous effluents, 2242
GASEOUS WASTES/RADIOACTIVE WASTE PROCESSING
Advances in the fluorocarbon process for decontamination of nuclear facility off-gas (R-12 (dichlorodifluoromethane)), 864 (K/ET--5010)
Analysis of barium hydroxide and calcium hydroxide slurry carbonation reactors, 908 (ORNL/MIT--300)
Apparatus for reducing radioactive gaseous wastes (Patent), 1302
Assessment of the acceptability of performance of installed iodine trapping plant, 3225 (ND-R--52(W))
Capture of ruthenium, iodine and triyium from discharge gases, produced during the process of dissolution at the device SU-2 of spent fuel elements from nuclear power plant with WWR reactors, 843 (INIS-mf--5574)
Cleaning of gaseous wastes produced during operation of the installation for desactivation of radioactive wastes, 849 (INIS-mf--5574)
Decontamination and disposal of radioactive wastes from nuclear facilities, 694 (CS-INIS--258)
Gas-absorption process (DOE patent), 1287
Investigation of krypton and xenon capture from discharge gases, produced during the process of dissolution at the device SU-2 spent fuel elements from the nuclear power plant with WWR reactors, 844 (INIS-mf--5574)
Iodine evolution from nuclear fuel dissolver solutions by air sparging, 39 (CONF-800802--18(Draft))
Kinetics of iodine removal by washing with water, 1332
Method for retention of tritium released during reprocessing spent nuclear fuel and storing the liquid radioactive waste produced thereby (Patent), 1311
Method of purifying gases from reprocessing of spent fuel elements containing radioactive substances (Patent), 1312
Organic iodine removal from simulated dissolver off-gas streams using silver-exchanged mordenite, 685 (CONF-801038--1(Draft))
Process for the decontamination of waste gases of a reprocessing plant for spent fuel and/or fertile material and installation for its realisation (Patent), 88
Processes for the control of $^{14}CO_2$ during reprocessing, 672 (CONF-800211--2(Draft))
Progress towards the use of disposable filters, 610 (AERE-M--3012)
Radioactive gaseous waste processing facilities in nuclear power plants (Patent), 1119
Radiochromatographic system for off-gas decontamination at the WWER nuclear power plants, 2753
Removal of tritium and tritium-containing compounds from a gaseous stream (Patent), 2657
Scrubbing of iodine from gas streams with mercuric nitrate-conversion of mercuric iodate product to barium iodate for fixation in concrete, 914 (ORNL/TM--7102)
Separation of krypton and xenon from the offgas of nuclear facilities, 870 (KFK--2600)
Solidification device for radioactive gaseous wastes (Patent), 1136
Spray calcination/in-can melting: effluent characterization and treatment, 941 (PNL--3109)
Technical feasibility of krypton-85 storage in sodalite, 665 (CONF-791112--17)
Treatment and storage of radioactive gases from nuclear facilities, 547
Types and properties of solid and gaseous wastes produced during experimental fluoride-gaseous regeneration of the BOR-60 reactor fuel, 61 (INIS-mf--5571)
User's guide to the programs ITRAP-A, ITRAP-B, ITRAP-S and ITRAP-L, 3226 (ND-R--53(W))
GASEOUS WASTES/RADIOACTIVE WASTE STORAGE
Community's R and D programme on radioactive waste management and storage. 1977 2. annual progress report, 1480 (EUR--6128)
Technical and economic feasibility of zeolite encapsulation for krypton-85 storage, 759 (ENICO--1011)
Treatment and storage of radioactive gases from nuclear facilities, 547
GASEOUS WASTES/RADIOACTIVITY
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
GASEOUS WASTES/UJV
Radiation burden from radioactive gas emissions of the population in the immediate neighbourhood of the Nuclear Research Institute, 3390

Hydrothermal glass reactions in salt brine, 2268
Leach rate characterization of solid radioactive waste forms, 2255
Leaching characteristics of actinides from simulated reactor waste glass, 1790 (PNL-SA--7992)
Leaching of radioactive waste storage glasses, 1415 (CONF-790420--)
Leaching U-Np-Pu-loaded simulated waste-glass, 1792 (PNL-SA--7992)
Long-term leach rates of glasses containing actual waste, 1421 (CONF-790420--)
Measuring the hydrolytic resistance of solidification products, 2134
Modeling of glass leaching, 1253
Nature of glass leaching, 1781 (PNL-SA--7953)
Parametric study of glass formulations, 1868 (RHO-SA--

117)
Preliminary mini experiments on leaching of glass. A report of the situation 1979-03-15, 2016 (STUDSVIK/E2--79/38)
Relative leach behavior of waste glasses and naturally occurring glasses, 393 (CONF-790420--)
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
Use of glass-ceramic materials for the fixation of radioactive wastes, 663 (CONF-790420--)
Waste management program technical progress report, October-December 1978, 427 (DP--78-125-4)
GLASS/MECHANICAL PROPERTIES
Glass as a material for the final disposal of fission products, 1342
GLASS/PERFORMANCE
Characterization of borosilicate glasses containing simulated high-level radioactive wastes from PNC, 389 (CONF-790420--)
GLASS/PERFORMANCE TESTING
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
GLASS/PHYSICAL RADIATION EFFECTS
Enhanced diffusion and related phenomena in solids containing active species, 3590 (AERE-M--3063)
Radiation effects in vitreous and devitrified simulated waste glass, 395 (CONF-790420--)
Simulations of radiation damage in glasses, 394 (CONF-790420--)
GLASS/RADAR
Impulse radar scanning of intact salt at the Avery Island Mine, 1989 (SAND--80-0632)
GLASS/RADIATION EFFECTS
Gamma-irradiation effects on leaching characteristics of waste containment materials, 1797 (PNL-SA--7992)
Glass: an available material for the immobilization of nuclear waste, 1261
Significance of radiation effects in solid radioactive waste, 736 (DP-MS--80-27)
GLASS/RADIOLYSIS
Glass as a material for the final disposal of fission products, 1342
GLASS/RESEARCH PROGRAMS
See-through solution to nuclear waste (Vitrification process), 1110
GLASS/STABILITY
Glass: an available material for the immobilization of nuclear waste, 1261
Naturally occurring glasses: analogues for radioactive waste forms, 1729 (PNL--2776)
Structures and stability of media intended for the immobilization of high level radioactive waste, 628 (CEGB-RD-B-N--4573)
Thermal, chemical and radiation stability of vitreous radioactive wastes, 1231
GLASS/TEMPERATURE EFFECTS
Thermal fracturing in glass waste forms, 743 (DP-MS--80-61)
GLASS/TENSILE PROPERTIES
Tests for determining impact resistance and strength of glass used for nuclear waste disposal, 1742 (PNL--2954)
GLASS/VISCOSITY
Instrument for determining viscosities and electrical resistivities of molten glass candidates for immobilizing Hanford nuclear defense wastes, 526 (RHO-SA--50)
GLYCINE HISPIDA/BIOLOGICAL RADIATION EFFECTS
Technetium: a toxic waste product of the nuclear fuel cycle: effects on soybean growth and development, 2485
GOLD/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
GOLD ORES/ORE PROCESSING
Wet high-intensity magnetic separation for the concentration of Witwatersrand gold-uranium ores and residues, 21
GONADS/BIOLOGICAL RADIATION EFFECTS
Systemic effects of radiation exposure on rodents inhabiting liquid and solid radioactive waste storage areas, 3473 (IDO--12088)
GOVERNMENT POLICIES
See also ECONOMIC POLICY
ENERGY POLICY
GOVERNMENT POLICIES/MEETINGS
Decommissioning of nuclear facilities. Report on the international symposium held in Vienna from 13 to 17 November 1978, 573
GRAFENRHEINFELD REACTOR/FUEL RACKS
Publication of the project of Bayernwerk AG, Munich, and Kraftwerk Union AG, Frankfurt, to raise the capacity of the spent fuel pit at Grafenrheinfeld nuclear power plant by installing compact storage racks, 2738
GRAMINEAE/RADIOACTIVITY
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
GRANITES
Full-scale and time-scale heating experiments at Stripa: preliminary results, 2377
Review of Y/OWI/TM-36: repository design performance in salt, granite, shale or basalt (Underground disposal of radioactive wastes), 2046 (UCRL--15177)
GRANITES/ACOUSTIC MONITORING
Between-hole acoustic surveying and monitoring of a granitic rock mass, 1588 (LBL--10483)
GRANITES/ACOUSTIC TESTING
Cross-hole investigation of a rock mass subjected to heating, 1592 (LBL--10849)
GRANITES/CHEMICAL REACTIONS
Radioactive waste-form and rock interactions: a discussion, 2311
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
GRANITES/COMPARATIVE EVALUATIONS
Hazardous high-level radioactive waste disposal in geologic formations, 2126
GRANITES/FRACTURE PROPERTIES
Geology and fracture system at Stripa. Technical information report No. 21, 1574 (LBL--8907)
Study of slow crack growth in granite and its applicaton to nuclear waste disposal in hard rock, 3545 (AECL--6423)
GRANITES/GEOCHEMISTRY
Geotechnical assessment and instrumentation needs for nuclear waste isolation in crystalline and argillaceous rocks, 1571 (LBL--8648)
GRANITES/GEOLOGIC FISSURES
Characterization of discontinuities in the Stripa granite, 3554 (LBL--9884)
GRANITES/GEOLOGY
Geological documentation of the Stripa test station, 2370
Geoscience parameter data base handbook: granites and basalts, 2039 (UCRL--15152)
Geoscience data base handbook for modeling a nuclear waste repository, 1609 (NUREG/CR--0912(Vol.2))
Report on geologic exploration activities, 1458 (DOE/RL/01830--14)
GRANITES/GEOPHYSICAL SURVEYS
Geotomography applied at the Stripa Mine in Sweden, 3544 (UCRL--52961)
GRANITES/GEOPHYSICS
Geoscience data base handbook for modeling a nuclear waste repository, 1609 (NUREG/CR--0912(Vol.2))
GRANITES/HEAT TRANSFER
Heat transfer in underground heating experiments in granite, Stipa, Sweden, 1593 (LBL--10876)
I. Some results from a field investigation of thermo-mechanical loading of a rock mass when heaters are emplaced in the rock, 1576 (LBL--9392)
GRANITES/HEAT TREATMENTS
Rock properties and their effect on thermally-induced displacements and stresses, 1589 (LBL--10517)
GRANITES/HEATING
Characterization of discontinuities in the Stripa granite. Time-scale heater experiment, 1563 (LBL--7083)
Pilot heater test of the Swedish Nuclear Fuel Safety Program, 2321
GRANITES/HYDRAULICS
Laboratory investigations on the hydraulic and thermomechanical properties of fractured crystalline rocks, 1580 (LBL--9582)
GRANITES/HYDROLOGY
Approach to the fracture hydrology at Stripa: preliminary results, 2378
Geoscience parameter data base handbook: granites and basalts, 2039 (UCRL--15152)
Geoscience data base handbook for modeling a nuclear waste repository, 1609 (NUREG/CR--0912(Vol.2))
GRANITES/MATHEMATICAL MODELS
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
GRANITES/MECHANICAL PROPERTIES
Instrument evaluation, calibration, and installation for the heater experiments at Stripa, 1566 (LBL--8313)
Mechanical properties of Stripa granite, 2372
Status of LLNL granite projects, 2082 (UCRL--84613)
GRANITES/PERMEABILITY
Complementary measurements of the permeability in the area around Karlshamn, Sweden, 3525 (SKBF/KBS-TR--79-06)
Hydrogeological investigations in two boreholes in the Stripa test station, 2364
Large scale permeability tests in the granite of the Stripa mine, Sweden, 2369
Permeability of generic repository rocks at simulated in situ conditions, 3536
Results of a multiple borehole pumping test in low permeability granite, 3531
Tests of porous permeable medium hypothesis for flow over long distances in fractured deep hard rock, 3457
GRANITES/POROSITY
Results of a multiple borehole pumping test in low permeability granite, 3531
Tests of porous permeable medium hypothesis for flow over long distances in fractured deep hard rock, 3457
GRANITES/RADIONUCLIDE MIGRATION
In situ experiments on nuclide migration in fractured crystalline rocks, 1531 (KBS-TR--110)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--

8088-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Quarterly technical progress report, April 1-June 30, 1980, 1559 (LA--8472-PR)
Microcrack technology. Progress report, 1 April 1979-29 February 1980, 1453 (DOE/ER/04972--2)
Status of LLNL granite projects, 2082 (UCRL--84613)
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
GRANITES/REVIEWS
Geoscience parameter data base handbook: granites and basalts, 2039 (UCRL--15152)
GRANITES/ROCK DRILLING
Experience of diamond-coredrilling in Stripa, 2367
GRANITES/ROCK MECHANICS
Between-hole acoustic surveying and monitoring of a granitic rock mass, 1588 (LBL--10483)
Cross-hole investigation of a rock mass subjected to heating, 1592 (LBL--10849)
Geotechnical assessment and instrumentation needs for nuclear waste isolation in crystalline and argillaceous rocks, 1571 (LBL--8648)
Pilot heater test of the Swedish Nuclear Fuel Safety Program, 2321
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
Progress with field investigations at Stripa, 1591 (LBL--10559)
Rock stress measurements in Stripa Mine, 1529 (KBS-TR--49)
Swedish-American cooperative program on radioactive waste storage in mined caverns in crystalline rock, 1568 (LBL--8648)
Technical concept for rock mechanics tests, Climax Granite, NTS, 2021 (UCID--18009)
Technical approach to resolving issues on rock mechanics as applied to development of a nuclear waste repository in a crystalline rock formation, 1840 (RHO-BWI-SA--51)
Thermomechanical modeling and data analysis for heating experiments at Stripa, Sweden, 1585 (LBL--10193(Rev.))
GRANITES/SORPTIVE PROPERTIES
Autoradiographic studies of actinide sorption in groundwater systems, 3432 (CONF-800433--4)
Autoradiographic study of actinide sorption on climax stock granite, 1662 (ORNL--5617)
Chemical reactions in the bedrock-groundwater system of importance for the sorption of actinides, 1433 (CONF-791112--58)
Chromatographic K/sub d/ values of radionuclides and the effect of redox potentials on sorption of radionuclides by geologic media, 2459 (PNL-SA--7352(Vol.1))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1978, 1774 (PNL-SA--7352(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1979, 2468 (PNL-SA--8571(Vol.2))
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Quarterly technical progress report, April 1-June 30, 1980, 1559 (LA--8472-PR)
Microautoradiographic studies of the sorption of U and Am on natural rock samples, 2100
Nuclear waste chemistry, 488 (ORNL--5665)
Nuclide transport by groundwater in Swedish bedrock, 2581
Parameters affecting radionuclide migration in geologic media, 1560 (LA-UR--79-2992)
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
Sorption-desorption of long-lived radionuclide species on geologic media. Annual report, 2466 (PNL-SA--8571(Vol.2))
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Studies of radionuclide availability and migration at the Nevada Test Site relevant to radioactive waste disposal, 1769 (PNL-SA--7352(Vol.1))
Theoretical and experimental evaluation of waste transport in selected rocks, 1768 (PNL-SA--7352(Vol.1))
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
GRANITES/STRESSES
Pilot heater test in the Stripa granite, 2362
Predicted and measured temperatures, displacements and stresses from the Stripa heater experiments, 1586 (LBL--10358)
GRANITES/TEMPERATURE EFFECTS
Calculated thermally induced displacements and stresses for heater experiments at Stripa, Sweden. Linear thermoelastic models using constant material properties, 1562 (LBL--7061)
Instrument evaluation, calibration, and installation for the heater experiments at Stripa, 1566 (LBL--8313)
Investigations in granite at Stripa, Sweden for nuclear waste storage, 2201
Pilot heater test in the Stripa granite, 2362
Predicted and measured temperatures, displacements and stresses from the Stripa heater experiments, 1586 (LBL--10358)
Regional thermo-hydrological effects of a radioactive waste repository in hard rock, 1569 (LBL--8648)
Rock properties and their effect on thermally-induced displacements and stresses, 1589 (LBL--10517)
Swedish-American cooperative program on radioactive waste storage in mined caverns in crystalline rock, 1568 (LBL--8648)
Technical approach to resolving issues on rock mechanics as applied to development of a nuclear waste repository in a crystalline rock formation, 1840 (RHO-BWI-SA--51)
GRANITES/TEMPERATURE GRADIENTS
Waste disposal in granite: preliminary results from Stripa, Sweden, 1578 (LBL--9424)
GRANITES/THERMAL ANALYSIS
Thermal analysis for a spent reactor fuel storage test in granite, 2079 (UCRL--83995)
GRANITES/THERMAL CONDUCTIVITY
Practical aspects of heat transfer in radioactive-waste repository design, 1389 (AERE-R--9343)
Thermal conductivity of the rocks in the Bureau of Mines Standard Rock Suite, 3557 (ORNL/TM--7052)
GRANITES/THERMAL STRESSES
I. Some results from a field investigation of thermo-mechanical loading of a rock mass when heaters are emplaced in the rock, 1576 (LBL--9392)
GRANITES/THERMODYNAMIC PROPERTIES
Determination of in-situ thermal properties of Stripa granite from temperature measurements in the full-scale heater experiments: method and preliminary results. Technical information report No. 24, 1567 (LBL--8423)
Geoscience parameter data base handbook: granites and basalts, 2039 (UCRL--15152)
Laboratory investigations on the hydraulic and thermomechanical properties of fractured crystalline rocks, 1580 (LBL--9582)
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
Progress with field investigations at Stripa, 1591 (LBL--10559)
Thermal effects in disposal of radioactive waste in hard rock, 2361
Thermomechanical modeling and data analysis for heating experiments at Stripa, Sweden, 1585 (LBL--10193(Rev.))
GRANITES/THERMODYNAMICS
Regional thermo-hydrological effects of a radioactive waste repository in hard rock, 1569 (LBL--8648)
Status of LLNL granite projects, 2082 (UCRL--84613)
GRANITES/THERMOELASTICITY
Calculated thermally induced displacements and stresses for heater experiments at Stripa, Sweden. Linear thermoelastic models using constant material properties, 1562 (LBL--7061)
GRANITES/TOMOGRAPHY
Geotomography applied at the Stripa Mine in Sweden, 3544 (UCRL--52961)
GRANITES/WEATHERING
Association of trace elements with iron oxides during rock weathering, 3302
GRANODIORITES/THERMAL CONDUCTIVITY
Thermal conductivity of the rocks in the Bureau of Mines Standard Rock Suite, 3557 (ORNL/TM--7052)
GRANTS/FRACTURES
Geophysical borehole measurements, 2014 (SKBF/KBS-TR--79-12)
GRANULAR MATERIALS/PNEUMATIC TRANSPORT
Product removal nozzles for a fluidized-bed calciner, 763 (ENICO--1035)
GRAPHITE
See also PYROLYTIC CARBON
GRAPHITE/LEACHING
Reaction of graphite with water and its implications for radioactive waste storage, 2103
GRAPHITE/OXIDATION
Reaction of graphite with water and its implications for radioactive waste storage, 2103
GRASS/PLANT GROWTH
Effect of soil affixants on germination, emergence, and growth of cheatgrass and Russian thistle, 3400
GRASS/RADIOACTIVITY
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
GRASS/RADIONUCLIDE KINETICS
Uptake of trace elements and radionuclides from uranium mill tailings by four-wing saltbush (Atriplex canescens) and alkali sacaton (Sporobolus airoides) (Radium 226; Uranium; Molybdenum; Selenium; Vanadium; Astatine), 3374 (LA-UR--79-3045)
GREAT BRITAIN
See UNITED KINGDOM

GREAT LAKES/RADIONUCLIDE MIGRATION
Effect of nuclear power generation on water quality in the great lakes. Technical report, 3419 (PB--80-101959)
GREAT LAKES/WATER QUALITY
Effect of nuclear power generation on water quality in the great lakes. Technical report, 3419 (PB--80-101959)
GROUND DISPOSAL
See UNDERGROUND DISPOSAL
GROUND DISPOSAL/COMPARATIVE EVALUATIONS
Comparison of alternatives for low-level radioactive waste disposal, 1719 (PB--296947)
GROUND MOTION/FORECASTING
Prediction of ground motion from underground nuclear weapons tests as it relates to siting of a nuclear waste storage facility at NTS and compatibility with the weapons test program, 1994 (SAND--80-1020/1)
Prediction of ground motion from underground nuclear weapons tests as it relates to siting of a nuclear waste storage facility at NTS and compatibility with the weapons test program, 1995 (SAND--80-1020/1)
GROUND MOTION/MEASURING INSTRUMENTS
High pecision measurement of horizontal and vertical movement over salt domes, 2393
GROUND WATER/AGE ESTIMATION
Hydrogeologic properties and pore water origin and age: clayey till and clay in south central Canada, 3534
GROUND WATER/CHEMICAL COMPOSITION
Basalt Waste Isolation Project. Quarterly report, January 1-March 31, 1980, 1806 (RHO-BWI--80-100-2Q)
GROUND WATER/CHEMICAL PROPERTIES
Chemical migration of radionuclides in soil, 3350
GROUND WATER/CHEMICAL REACTIONS
Organic compounds identified in trench leachates from low-level radioactive waste disposal sites, 3449
GROUND WATER/CONTAMINATION
Migration of radionuclides following shallow land burial, 2523 (CONF-800304--11)
Radiological status of the ground water beneath the Hanford project, January-December 1979, 3442 (PNL--3346)
GROUND WATER/FLOW MODELS
Analysis of groundwater flow around a high-level waste repository in crystalline rock, 3532
Assessment of Effectiveness of Geologic Isolation Systems. Variable thickness transient ground-water flow model. Volume 2. Users' manual, 3403 (PNL--3160-2)
Assessment of thermally induced water movement around a radioactive waste depository in hard rock, 2512
Finite-element three-dimensional ground-water (FE3DGW) flow model - formulation, program listings and users' manual, 1741 (PNL--2939)
Parameter identification in groundwater flow: a feasibility study, 2025 (UCID--18575)
Spatial patterns of radiological dose from wells drilled near nuclear waste repositories, 2060 (UCRL--15235)
Survey of near-field flow calculations for nuclear waste repositories NMA L21, 2040 (UCRL--15163)
Variable thickness transient ground-water flow model. Volume 1. Formulation, 3441 (PNL--3160-1)
Waste Isolation Safety Assessment Program. Technical progress report for FY-1978, 1739 (PNL--2874)
GROUND WATER/FLUID FLOW
Geohydrological studies for nuclear waste isolation at the Hanford Reservation. Volume II. Final report, 3510 (LBL--8764(Vol.2))
Groundwater flow due to topographical and geological effects, 3508 (KBS-TR--47)
Local groundwater depression around a repository, 1528 (KBS-TR--47)
Three dimensional model of groundwater flow governed by topography, 1527 (KBS-TR--47)
GROUND WATER/GEOLOGIC HISTORY
Precipitation and lake-level changes in the West and Midwest over the past 10,000 to 24,000 years. Final report, 2044 (UCRL--15173)
GROUND WATER/HYDROLOGY
Calculation of ground water movements in the Sternoe area in Blekinge, Sweden, 3404 (SKBF/KBS-TR--79-08)
Geohydrological studies for nuclear waste isolation at the Hanford Reservation, 1572 (LBL--8648)
Regional thermo-hydrological effects of a radioactive waste repository in hard rock, 1569 (LBL--8648)
GROUND WATER/ISOTOPE DATING
Comments on carbon-14 dating of groundwaters in crystalline environments, 3530
GROUND WATER/LIQUID FLOW
Development and validation of GWHEAD, a three-dimensional groundwater head computer code, 3507 (DP--1522)
Simplified groundwater flow modeling: an application of Kalman filter based identification, 3527 (UCRL--82649)
GROUND WATER/MATHEMATICAL MODELS
Geohydrological studies for nuclear waste isolation at the Hanford Reservation, 1572 (LBL--8648)
Groundwater modeling in subsurface nuclear waste diagonal. An overview, 3447
Specifications for the development of a fully three-dimensional numerical groundwater model for regional mass transport of radionuclides from a deep waste repository, 2063 (UCRL--15249)
GROUND WATER/MIGRATION LENGTH
Field permeability and hydraulic potential measurements in crystalline rock and solute transport through finely fractured media, 3535
GROUND WATER/ORGANIC COMPOUNDS
Status report on the importance of natural organic compounds in groundwater as radionuclide-mobilizing agents, 1636 (ONWI--84)
GROUND WATER/RADIATION MONITORING
Master schedule for CY-1980 Hanford Environmental Surveillance Routine Program, 3240 (PNL--3222)
GROUND WATER/RADIOACTIVITY
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
GROUND WATER/RADIONUCLIDE MIGRATION
Analysis, critique, and reevaluation of high-level waste repository water intrusion scenario studies, 2104
Anion effects on the retention of selected actinides on geologic media, 1683 (ORO--4447-102)
Approach to the fracture hydrology at Stripa: preliminary results, 2378
Assessment of plutonium chemical forms in groundwater, 3458
Characterization of organics in leachates from low-level radioactive waste disposal sites, 1408 (BNL-NUREG--27235)
Chemical migration of radionuclides in soil, 3350
Chemical reactions in the bedrock-groundwater system of importance for the sorption of actinides, 1433 (CONF-791112--58)
Computer model of long-term hazards from waste repositories, 2574
Dose and dose commitment from radioactive substances carried by groundwater from a nuclear fuel repository, 2479 (STUDSVIK-K2--79/92)
Engineering safeguard for accidental release of radionuclides from radioactive waste ground disposal site, (1). Feasibility of contaminated groundwater zone control by underground impermeable wall, 3459
General basin modeling for site suitability. Draft report 1. Baseline data, 2047 (UCRL--15178)
Geochemical aspect for the evaluations of radioelements transfers in subterranean porous media, 1409 (CEA-R--4937)
Geologic migration potentials of technium-99 and neptunium-237, 3425
Groundwater modeling in subsurface nuclear waste diagonal. An overview, 3447
Infiltration control for low-level radioactive solid waste disposal areas: an assessment, 1672 (ORNL/TM--6473)
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Quarterly technical progress report, April 1-June 30, 1980, 1559 (LA--8472-PR)
Leach-migration experiments to determine the mobility of radionulides in geologic media, 2575
Leach test methodology for the Waste/Rock Interactions Technology Program, 1757 (PNL--3326)
Low level waste management: a compilation of models and monitoring techniques. Volume 1, 1668 (ORNL/Sub--79/13617/2)
Mathematical simulation for safety assessment of nuclear waste repositories, 1780 (PNL-SA--7897)
Measurements of parameters essential to predicting nuclide migration, 2271
Migration behavior of the $^{234}U \rightarrow ^{230}Th \rightarrow ^{226}Ra$ + decay chain, 2593
Migration of long-lived radionuclides in the geosphere. Proceedings, 2299
Migration of radionuclides following shallow land burial, 2523 (CONF-800304--11)
Nuclide transport by groundwater in Swedish bedrock, 2581
Numerical analysis of radionuclide movement from a hypothetical nuclear waste repository (Ground-water mediated migration to river and subsequent population doses are modeled), 3450
Numerical modeling of solute transport in groundwater, 2048 (UCRL--15179)
Physical migration of radionuclides in soil, 3349
Prediction of migration velocities from partition coefficients: cesium in basalt, 2597
Preliminary evaluation of the BIODOSE computer program (For simulating radionuclide transport through aquatic ecosystems and predicting the dose to humans), 3478 (UCID--18267)
Preliminary geosphere transport modeling at the WIPP site, 3451

Processes and parameters involved in modeling radionuclide transport from bedded salt repositories. Final report. Technical memorandum, 2036 (UCRL--15095)
Radiolytic oxidation and reduction of plutonium, 1431 (CONF-791112--49)
Radionuclide migration studies associated with the WIPP site in southern New Mexico, 2273
Radionuclide migration resulting from site intrusion, 3353
Radionuclide transport through heteogeneous media, 2486
Recharge and pollution of the English Chalk: some possible mechanisms, 3528
Representation of radioelement migration in fissured rocks by a mathematical model, 3446 (SAND--79-6002)
Review of hydrodynamic dispersion in transport models , 3448
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Status report on the importance of natural organic compounds in groundwater as radionuclide-mobilizing agents, 1636 (ONWI--84)
Superposition solution of the transport of a radionuclide chain through a sorbing medium, 2592
Survey methods for assessment of radiological release from geologic repositories, 2206
Survey of near-field flow calculations for nuclear waste repositories NMA L21, 2040 (UCRL--15163)
Underground storage of nuclear industry wastes, 2348
Waste Isolation Safety Assessment Program. A brief description of the three-dimensional finite element ground-water flow model adapted for waste isolation safety assessments, 2451 (PNL--2652)

GROUND WATER/SORPTIVE PROPERTIES
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Quarterly technical progress report, April 1-June 30, 1980, 1559 (LA--8472-PR)

GROUND WATER/TRANSPORT
Tests of porous permeable medium hypothesis for flow over long distances in fractured deep hard rock, 3457

GROUND-WATER RESERVES
See AQUIFERS

GROUTING/CEMENTS
Bell Canyon Test (BCT): cement development report, 1978 (SAND--80-0358C)

GROUTING/COMPARATIVE EVALUATIONS
Recommended analysis plan for the borehole plugging program potash core test, 1993 (SAND--80-0812)

GROWTH/BIOLOGICAL RADIATION EFFECTS
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)

GULF COAST/GEOLOGY
Conceptual model for regional radionuclide transport from a salt dome repository: a technical memorandum, 2064 (UCRL--15250)

GULF COAST/HYDROLOGY
Conceptual model for regional radionuclide transport from a salt dome repository: a technical memorandum, 2064 (UCRL--15250)

GULF COAST/SALT DEPOSITS
Salt dome utilization and environmental considerations, 2399

GUNDREMMINGEN-2 REACTOR/SPENT FUEL STORAGE
Publication by the State Minister for area development and environment affairs of the project of Rheinisch-Westfaelisches Elektrizitaetswerk AG, Bayernwerk AG, Kernkraftwerk Gundremmingen Verwaltungsgesellschaft mbH, Gundremmingen, Kraftwerk Union AG, Frankfurt, and Hochtief AG, Frankfurt, to increase the storage capacity for spent fuel element clusters at Kernkraftwerk Gundremmingen II by installing compact storage racks. Dated April 15, 1980, 2679

GYPSUM/THERMAL CONDUCTIVITY
Thermal conductivity of rocksalt and other geologic materials from the site of the proposed waste isolation pilot plant, 1936 (SAND--79-1665)

H

HAFNIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)

HALDEN HEAVY BOILING WATER REACTOR
See HBWR REACTOR

HALOGENATED ALIPHATIC HYDROCARBONS/SORPTIVE PROPERTIES
Advances in the fluorocarbon process for decontamination of nuclear facility off-gas (R-12 (dichlorodifluoromethane)), 864 (K/ET--5010)
Removal of noble gases by selective absorption (On fluorocarbon), 2844 (K/ET--5007)

HAMAOKA-1 REACTOR/RADIOACTIVE WASTE PROCESSING
Crud removal equipment using a centrifugal clarifier, 2982

HAMAOKA-1 REACTOR/REACTOR LICENSING
Alteration of reactor installations (Unit 1 and 2 reactor facilities and spent fuel disposal) in Hamaoka Nuclear Power Station of The Chubu Electric Power Co., Ltd., 2821

HAMAOKA-2 REACTOR/RADIOACTIVE WASTE PROCESSING
Crud removal equipment using a centrifugal clarifier, 2982

HAMAOKA-2 REACTOR/REACTOR LICENSING
Alteration of reactor installations (Unit 1 and 2 reactor facilities and spent fuel disposal) in Hamaoka Nuclear Power Station of The Chubu Electric Power Co., Ltd., 2821

HANFORD ATOMIC PRODUCTS OPERATION
See HAPO

HANFORD RESERVATION/AIR QUALITY
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)

HANFORD RESERVATION/BIBLIOGRAPHIES
Site locality identification study: Hanford Site. Volume II. Data cataloging, 1818 (RHO-BWI-C--62(Vol.2)

HANFORD RESERVATION/BIRDS
Use of Hanford waste water ponds by waterfowl, 3475 (PB--296947)

HANFORD RESERVATION/BOREHOLES
Drilling history core hole DC-6 Hanford, Washington, 1809 (RHO-BWI-C--13)
Drilling history core hole DC-8, 1810 (RHO-BWI-C--29)
Drilling history core hole DC-4, 1811 (RHO-BWI-C--40)

HANFORD RESERVATION/ECOLOGY
Use of Hanford waste water ponds by waterfowl, 3475 (PB--296947)

HANFORD RESERVATION/ENVIRONMENTAL EFFECTS
Perspective on Hanford safety and environmental protection, 3396 (RLO-SA--79-1)

HANFORD RESERVATION/EROSION
Pacific Northwest geomorphology and hydrology: rates and probabilities of selected processes and events (Denudation, flooding, landslides), 2542 (PNL--2851)

HANFORD RESERVATION/FLOODS
Pacific Northwest geomorphology and hydrology: rates and probabilities of selected processes and events (Denudation, flooding, landslides), 2542 (PNL--2851)

HANFORD RESERVATION/FUEL CYCLE CENTERS
Potential radiological impact of a conceptual Hanford Nuclear Energy Center, 3308 (PNL-SA--7497)

HANFORD RESERVATION/GEOLOGY
Geology of the Separation Areas, Hanford site, South-Central Washington, 1875 (RHO-ST--23)
Near-surface test facility. Phase I. Geologic site characterization report, 1843 (RHO-BWI-ST--8)
Preliminary subsurface hydrologic considerations: Columbia River Plateau physiographic province (Pasco Basin), 3514 (PNL--2851)

HANFORD RESERVATION/GEOPHYSICAL SURVEYS
Geohydrological studies for nuclear waste isolation at the Hanford Reservation, 1572 (LBL--8648)

HANFORD RESERVATION/GROUND WATER
Radiological status of the ground water beneath the Hanford project, January-December 1979, 3442 (PNL--3346)

HANFORD RESERVATION/HIGHLEVEL RADIOACTIVE WASTES
Characteristics of defense high-level waste, 480 (NUREG/CR--0685)

HANFORD RESERVATION/HYDROLOGY
Geohydrological studies for nuclear waste isolation at the Hanford Reservation. Volume I. Executive summary, 3509 (LBL--8764(Vol.1))
Geohydrological studies for nuclear waste isolation at the Hanford Reservation. Volume II. Final report, 3510 (LBL--8764(Vol.2))
Geohydrological studies for nuclear waste isolation at the Hanford Reservation, 1572 (LBL--8648)
Hydrologic bibliography of the Columbia River basalts in Washington with selected annotations, 1812 (RHO-BWI-C--45)
LANDSAT data as a basis for regional environmental assessment within the Columbia Plateau, 1837 (RHO-BWI-SA--43)
Preliminary subsurface hydrologic considerations: Columbia River Plateau physiographic province (Pasco Basin), 3514 (PNL--2851)

HANFORD RESERVATION/LANDSLIDES
Pacific Northwest geomorphology and hydrology: rates and probabilities of selected processes and events (Denudation, flooding, landslides), 2542 (PNL--2851)

HANFORD RESERVATION/NUCLEAR POWER PLANTS
Potential radiological impact of a conceptual Hanford Nuclear Energy Center, 3308 (PNL-SA--7497)

HANFORD RESERVATION/PONDS
Use of Hanford waste water ponds by waterfowl, 3475 (PB--296947)

HANFORD RESERVATION/RADIATION MONITORING
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)
Environmental status of the Hanford site for CY 1979, 3242 (PNL--3284)
Master schedule for CY-1980 Hanford Environmental Surveillance Routine Program, 3240 (PNL--3222)

HANFORD RESERVATION/RADIOACTIVE WASTE DISPOSAL
Characterization of the Hanford 300 area burial grounds. Task IV. Biological transport, 2452 (PNL--2774)
Hanford high-level waste, 3376 (PNL--3300(Pt.2))
Radioactive liquid wastes discharged to ground in the 200 Areas during 1978, 1849 (RHO-CD--78-34-4Q)
Radioactivity in gaseous waste discharged from the separations facilities during 1978, 1850 (RHO-CD--78-35-4Q)
Transuranic distribution beneath a retired underground disposal facility at the Hanford Site, 2506
HANFORD RESERVATION/RADIOACTIVE WASTE FACILITIES
Site locality identification study: Hanford Site. Volume I. Methodology, guidelines, and screening, 1817 (RHO-BWI-C--62(Vol.1))
Technical requirements for qualification of A potential nuclear waste repository site in basalt, 1827 (RHO-BWI-LD--19)
HANFORD RESERVATION/RADIOACTIVE WASTE MANAGEMENT
Characterization of the Hanford 300 area burial grounds. Final report: decontamination and decommissioning, 1727 (PNL--2557)
Long-term high-level defense waste technology. Progress report, July-September 1979, 525 (RHO-LD--79-101-O)
Radioactive waste management at the Hanford Reservation, 2174
Sorption studies at Hanford for the control of radioactive wastes, 1872 (RHO-SA--155)
HANFORD RESERVATION/RADIOACTIVE WASTE STORAGE
Real-time monitoring of Hanford nuclear waste, 1871 (RHO-SA--143)
HANFORD RESERVATION/RADIOECOLOGY
Nuclear waste ponds and streams on the Hanford site: an ecological search for radiation effects, 3480
HANFORD RESERVATION/RADIONUCLIDE MIGRATION
Characterization of the Hanford 300 area burial grounds. Task IV. Biological transport, 2452 (PNL--2774)
HANFORD RESERVATION/ROCK MECHANICS
Hanford near-surface test facility heater experiments, 3551 (LBL--8648)
HANFORD RESERVATION/SOIL CHEMISTRY
Soil (sediment) properties of twelve Hanford wells with geologic interpretation, 1862 (RHO-LD--82)
HANFORD RESERVATION/SOIL MECHANICS
Soil (sediment) properties of twelve Hanford wells with geologic interpretation, 1862 (RHO-LD--82)
HANFORD RESERVATION/STRATIGRAPHY
Stratigraphy of the late Cenozoic sediments beneath the 216-B and C crib facilities, 1861 (RHO-LD--72)
Stratigraphy of the late Cenozoic sediments beneath the 216-A Crib Facilities, 1860 (RHO-LD--71)
HANFORD RESERVATION/THERMODYNAMIC PROPERTIES
Hanford near-surface test facility heater experiments, 3551 (LBL--8648)
HANFORD RESERVATION/TOPOGRAPHY
Strain distribution and model for formation of eastern Umtanum Ridge anticline, south-central Washington, 1835 (RHO-BWI-SA--30)
HANFORD RESERVATION/WATER QUALITY
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)
HAPO
(Hanford Atomic Products Operation.)
HAPO/RADIATION MONITORING
Radioactivity in gaseous waste discharged from the separations facilities during fourth quarter of 1979, 3245 (RHO-CD--79-35-4Q)
HAPO/RADIOACTIVE WASTE DISPOSAL
Input and decayed values of radioactive liquid wastes discharged to the ground in the 200 Areas through 1975, 1402 (ARH-CD--745)
Radioactive liquid wastes discharged to ground in the 200 Areas during 1976, 1401 (ARH-CD--743-4Q)
Radioactive liquid waste discharged to ground in the 200 Areas during 1977, 1848 (RHO-CD--34-4Q)
Radioactive liquid wastes discharged to ground in the 200 areas during 1979, 1851 (RHO-CD--79-34-4Q)
HAPO/RADIOACTIVE WASTE MANAGEMENT
Removal of radionuclides from the water-soluble fraction of Hanford Nuclear Defense Wastes, 988 (RHO-SA--145)
HASTELLOY C/CORROSION
Attack of high-strength, oxidation-resistant alloys during in-can melting of simulated waste glasses, 722 (DP-MS--79-39)
HASTELLOY X/CORROSION
Attack of high-strength, oxidation-resistant alloys during in-can melting of simulated waste glasses, 722 (DP-MS--79-39)
HATCH-1 REACTOR/AERIAL MONITORING
Aerial radiological survey of the area surrounding the Edwin I. Hatch Nuclear Plant, Baxley, Georgia, 3199 (EGG--1183-1726)
HAWAII/LAND USE
Landsat project, State of Hawaii. A preliminary report, 3394 (PB--296712)
HAZARDOUS MATERIALS/CONTROL
Controlling the use of hazardous materials in research and development laboratories, 3677
HAZARDOUS MATERIALS/ENVIRONMENTAL IMPACTS
Two-dimensional finite element solution for the simultaneous transport of water and solutes through a nonhomogeneous aquifer under transient saturated unsaturated flow conditions, 3506 (CONF-7906121--1)
HAZARDOUS MATERIALS/ENVIRONMENTAL TRANSPORT
Nonradiological hazards of low-level waste burial grounds, 2307
HAZARDOUS MATERIALS/REVIEWS
Toxic and hazardous waste disposal. Volume 1. Processes for stabilization/solidification, 1276
HAZARDOUS MATERIALS/RISK ASSESSMENT
Hazard index for underground toxic material, 3300 (UCRL--52889)
Perspective on the relative hazard of low-level radioactive waste disposal, 1707 (PB--296947)
HAZARDOUS MATERIALS/TOXICITY
Chemical toxicity issues in high-level waste disposal, 2308
HAZARDOUS MATERIALS/WASTE DISPOSAL
Disposal of hazardous wastes, 592
HAZARDOUS MATERIALS/WASTE MANAGEMENT
Hazard index for underground toxic material, 3300 (UCRL--52889)
Safety Analysis (SA) of the Hazardous Waste Disposal Facilities (Buildings 514, 612, and 614) at the Lawrence Livermore Laboratory, 3397 (UCID--18706)
Two-dimensional finite element solution for the simultaneous transport of water and solutes through a nonhomogeneous aquifer under transient saturated unsaturated flow conditions, 3506 (CONF-7906121--1)
HAZARDOUS MATERIALS/WASTE PROCESSING
Toxic and hazardous waste disposal. Volume 1. Processes for stabilization/solidification, 1276
HBWR REACTOR/SPENT FUEL ELEMENTS
Collection of gamma spectra data and correlated isotopic data of irradiated mixed oxide fuel and study of the applicability for safeguards. Final report for the period 1 December 1975 - 31 March 1979, 2775 (IAEA-R--1710-F)
HD 8077
See NICKEL BASE ALLOYS
HDEHP
(Bis(2-ethylhexyl) phosphate.)
HDEHP/RADIOLYSIS
Radiation damage of organic extractant in partitioning of high-level liquid waste, (1). Radiolysis of di(2-ethylhexyl)phosphoric acid by irradiation with cobalt-60 gamma-rays, 1221
HEALTH HAZARDS
See also RADIATION HAZARDS
Energy, health and environment, 3608 (INIS-mf--5598)
HEALTH HAZARDS/COMPARATIVE EVALUATIONS
Comparative biological hazards of chemical pollutants and radiation, 3186
HEALTH PHYSICS
See RADIATION PROTECTION
HEAT PIPES/DESIGN
Heat pipe cooling system for underground, radioactive waste storage tanks, 1554 (LA--8230-MS)
HEAT STORAGE
Earth Sciences Division. Annual report 1978, 3549 (LBL--8648)
HEAT TRANSFER/COMPUTER CALCULATIONS
Numerical calculation of thermal convection in porous media in two dimensions with applications to nuclear repository design, 2034 (UCID--18700)
HEAT TRANSFER/COMPUTER CODES
Comparison of the results of several heat transfer computer codes when applied to a hypothetical nuclear waste repository, 1677 (ORNL/TM--7112)
HEAT TRANSFER/MATHEMATICAL MODELS
Analysis of heat and mass transfer in sub-seabed disposal of nuclear waste, 1976 (SAND--80-0312C)
HEAT TRANSMISSION
See HEAT TRANSFER
HEATERS
Rock instrumentation problems experienced during in-situ heater tests, 1584 (LBL--9952)
Slurry feeding of nuclear wastes to an electric glass melter, 1144
HEATERS/OPERATION
Non-radioactive operation experience with a joule heated ceramic melter for vitrification of high-level liquid waste, 1228
HEATING
See also DISTRICT HEATING
HEATING/SOLID WASTES
Method of processing radioactive wastes (Patent), 1134
HEAVY WATER/ELECTROLYSIS
Tritium waste control, October 1979-March 1980, 476 (MLM--2714)
HEAVY WATER/LIQUID SCINTILLATION DETECTORS
Atomic Energy of Canada Limited monitoring tritiated water in air and water effluents, 3595 (CONF-780110--)
HEAVY WATER/ON-LINE MEASUREMENT SYSTEMS
Atomic Energy of Canada Limited monitoring tritiated water in air and water effluents, 3595 (CONF-780110--)
HEAVY WATER/PURIFICATION
Extraction method of tritium (Patent), 1067
HEAVY WATER COOLANT
See HEAVY WATER
HEAVY WATER COOLED REACTORS
See also HIFAR REACTOR
PHWR TYPE REACTORS
R-A REACTOR
HEAVY WATER COOLED REACTORS/PRIMARY COOLANT CIRCUITS

Measurement of tritium and tritiated water vapour in nuclear power installations. I. Tritium formation and transport in nuclear power installations, 2751
HEAVY WATER PLANTS
Fuel-cycle facilities: preliminary safety and environmental information document. Volume VII, 2839 (DOE/NE--0003/7)
HECTORITE
See MONTMORILLONITE
HEDTA/OXIDATION
Ozonation of Hanford nuclear defense waste, 985 (RHO-SA--98)
HELIUM/NUCLEAR REACTION YIELD
Helium formation from α-decay and its significance for radioactive waste glasses, 2252
HEMATITE/SORPTIVE PROPERTIES
Adsorption of iodate by Hematite (FE_2O_3), 2210
HEMATOPOIETIC SYSTEM/BIOLOGICAL RADIATION EFFECTS
Systemic effects of radiation exposure on rodents inhabiting liquid and solid radioactive waste storage areas, 3473 (IDO--12088)
HEMIC DISEASES
See also LEUKEMIA
HEMIC DISEASES/RADIOINDUCTION
Systemic effects of radiation exposure on rodents inhabiting liquid and solid radioactive waste storage areas, 3473 (IDO--12088)
HERBS/RADIATION MONITORING
Measurement of environmental radioactivity. Ispra 1977, 3207 (EUR--6180)
HEREDITY
See GENETICS
HETEROPOLYANIONS/CHEMICAL PREPARATION
Method of preparing a sorbent (Patent), 3697
HEXADECANE/CATALYTIC CRACKING
Other projects, 474 (LBL--10000)
HIFAR REACTOR/RESEARCH PROGRAMS
Nuclear Science and Technology Branch report 1977. Research Establishment site management, 3018 (AAEC/PR--44S)
HIFAR REACTOR/SPENT FUEL ELEMENTS
Gamma ray measurement of spent HIFAR fuel elements for safeguards verification. 1. Experimental evaluation of method., 3019 (ASO/R--2)
Gamma ray measurement of spent HIFAR fuel elements for safeguards verification. 2. Theoretical evaluation of method, 2846 (ASO/R--3)
HIGH FLUX AUSTRALIAN REACTOR
See HIFAR REACTOR
HIGH-LEVEL RADIOACTIVE WASTES
Abstracts: NRC Waste Management Program reports, 2023 (UCID--18133(Rev.1))
Academy squabbles over radwaste report, 1116
Advanced method for making vitreous waste forms, 689 (CONF-801124--9)
Alara assessment of spent fuel and nuclear waste transportation systems, 2553 (SAND--80-0794C)
ALARA studies on spent fuel and waste casks, 257 (SAND--79-1841)
Alternative solid forms for Savannah River Plant defense waste, 727 (DP-MS--79-91)
Alternative disposal concepts for high-level and transuranic radioactive waste disposal, 1595 (MTR--7718)
Analysis of radionuclides in the defense waste processing facility, 1252
Analysis of the effect of variations in parameter values on the predicted radiological consequences of geologic disposal of high-level waste, 2533 (NRPB-R--86)
Analysis of groundwater flow around a high-level waste repository in crystalline rock, 3532
Annual Report 1976, 466 (KFK--2519)
Application of laboratory hydrothermal studies to heating experiments, 2363
Applied laboratory research of high-level waste denitration and calcination technologies. Progress report, 1011 (UJV--4113-Ch)
Areal thermal loading recommendations for nuclear waste repositories in salt, 2096 (Y/OWI/TM--37)
Aspects of nuclear waste management. Volume 1. Pre-emplacement risks, 2043 (UCRL--15167(Vol.1))
Assessing the long-term integrity of nuclear waste repositories, 2590
Assessment of effectiveness of geologic isolation systems. Test case release consequence analysis for a spent fuel repository in bedded salt, 1730 (PNL--2782)
Assessment of effectiveness of geologic isolation systems: a short description of the AEGIS approach, 1760 (PNL--3398)
Assumptions and ground rules used in nuclear waste projections and source term data, 1626 (ONWI--24)
Basalt Waste Isolation Project borehole plugging studies: an overview, 1838 (RHO-BWI-SA--49)
Basic data report for Drillhole WIPP 22 (Waste Isolation Pilot Plant, WIPP), 1893 (SAND--79-0278)
Behavior of clay exposed to heating, 2365
Bidentate organophosphorus extraction of americium and plutonium from Hanford Plutonium Reclamation Facility waste, 618 (ARH-SA--203)
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1949 (SAND--79-2117C)
Biological studies of the US Subseabed Disposal Program, 1947 (SAND--79-2073)
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1948 (SAND--79-2117)
Calculation of distribution ratios of rare earth elements in multistage counter current extraction with HDEHP, 3676
Canadian program for nuclear fuel waste disposal, 2300
Cemeteries sought for nuclear waste. Geology of a *graveyard*, 2110
Characterization of borosilicate glasses containing simulated high-level radioactive wastes from PNC, 389 (CONF-790420--)
Characterization of gaseous and particulate effluents from the nuclear vitrification project, 944 (PNL--3181)
Characterization of borosilicate glasses containing simulated high-level radioactive wastes, 2222
Chemical compatibility of HLW borosilicate glasses with actinides. Solubilities and segregation processes, 1540 (KFK--2552)
Chemical factors controlling actinide sorption in the environment, 2188

High level fission product waste forms for final storage. Comparative evaluation of the products, 1103
Method for encapsulation of high level radioactive nuclear fuels or wastes (Patent), 1062

HIGH-LEVEL RADIOACTIVE WASTES/HANFORD RESERVATION
Characteristics of defense high-level waste, 480 (NUREG/CR--0685)

HIGH-LEVEL RADIOACTIVE WASTES/HAZARDS
Determination of performance criteria for high-level solidified nuclear waste, 534 (UCID--18121)

HIGH-LEVEL RADIOACTIVE WASTES/HEALTH HAZARDS
Energy; what about the waste., 2567

HIGH-LEVEL RADIOACTIVE WASTES/HEATING RATE
Inspection and evaluation of Nuclear Fuel Services high-level waste storage system. Program plan, 1856 (RHO-CD--882)

HIGH-LEVEL RADIOACTIVE WASTES/HOT PRESSING
Densification of calcines and direct containment of spent nuclear fuel in ceramics by hot isostatic pressing, 651 (CONF-790420--)

HIGH-LEVEL RADIOACTIVE WASTES/IDAHO CHEMICAL PROCESSING PLANT
Characteristics of defense high-level waste, 480 (NUREG/CR--0685)

HIGH-LEVEL RADIOACTIVE WASTES/INVENTORIES
Inventory of calcined waste stored at the ICPP as of September 1979, 1476 (ENICO--1044)
Spent fuel and waste inventories and projections, 495 (ORO--778)

HIGH-LEVEL RADIOACTIVE WASTES/LAND TRANSPORT
Radiological risk analysis of truck and rail transportation of nuclear wastes, 179 (CONF-780506--(Vol.2))
Release of radionuclides from high-level waste during transportation fires, 2585

HIGH-LEVEL RADIOACTIVE WASTES/LEACHING
Analysis, critique, and reevaluation of high-level waste repository water intrusion scenario studies, 2104
Calculations of radioactivity release due to leaching of vitrified high level waste, 2256
Characterization of leached surface layers on simulated high-level waste glasses by sputter-induced optical emission, 2254
Development of aluminosilicate and borosilicate glasses as matrices for CANDU high-level waste, 1414 (CONF-790420--)
Devitrification and leaching effects in HLW glass: comparison of simulated and fully radioactive waste glass, 1420 (CONF-790420--)
Evaluation of long term leaching of borosilicate glasses, 1479 (EUR--5947)
High level waste properties, 959 (PNL-SA--8085)
Hydrothermal glass reactions in salt brine, 2268
Leach-migration experiments to determine the mobility of radionulides in geologic media, 2575
Leach rates of high activity waste from borosilicate glass, 2226
Leach test methodology for the Waste/Rock Interactions Technology Program, 1757 (PNL--3326)
Measuring the hydrolytic resistance of solidification products, 2134
Method for anchoring radioactive substances in a body resistant to leaching by water (Patent), 1075
Thermal, chemical and radiation stability of vitrificated radioactive wastes, 1513 (INIS-mf--5571)

HIGH-LEVEL RADIOACTIVE WASTES/LEGAL ASPECTS
Legal aspects of radioactive high-level waste management, 3145

HIGH-LEVEL RADIOACTIVE WASTES/MELTING
Laboratory-scale glass melter for testing defense waste glass, 641 (CONF-790420--)

HIGH-LEVEL RADIOACTIVE WASTES/NEPTUNIUM 237
Geologic migration potentials of technium-99 and neptunium-237, 3425

HIGH-LEVEL RADIOACTIVE WASTES/OXIDATION
Ozonation of Hanford nuclear defense waste, 985 (RHO-SA--98)

HIGH-LEVEL RADIOACTIVE WASTES/PHASE STUDIES
Compatibility of actinides with HLW borosilicate glass: solubility and phase formation, 384 (CONF-790420--)

HIGH-LEVEL RADIOACTIVE WASTES/PHYSICAL PROPERTIES
High level waste properties, 959 (PNL-SA--8085)

HIGH-LEVEL RADIOACTIVE WASTES/RADIATION ACCIDENTS
Pre-sealing risk analysis, 537 (UCRL--15168)
Technical note: 1957-1958 Soviet nuclear accident in the Urals, 2117

HIGH-LEVEL RADIOACTIVE WASTES/RADIOACTIVE WASTE DISPOSAL
Analysis, critique, and reevaluation of high-level waste repository water intrusion scenario studies, 2104
Application of laboratory hydrothermal studies to heating experiments, 2363
Canadian program for nuclear fuel waste disposal, 2300
Cemeteries sought for nuclear waste. Geology of a graveyard, 2110
Chemical toxicity issues in high-level waste disposal, 2308
Comparison of some geologic and ocean disposal concepts regarding realistic modeling that allows objective risk assessment to be made, 2276
Development of enrichment and reprocessing technologies in Japan, 116
Development of a high level radioactive waste management strategy, 1392 (AERE-R--9548)
Development and application of criteria for siting, 2301
Disposal of high level nuclear waste in the oceans, 2401
Evaluation of systems incorporating transmutation for the reduction of the long term toxicity of high-level waste, 2283
Final disposal of high-level waste from nuclear power plants (The Danish situation), 1503 (INIS-mf--5211)
Functional design criteria additional high-level waste handling and storage facilities, 1399 (ARH-CD--549)
Geologic studies for waste repository siting in the Paradox Basin, 2302
Handling of spent nuclear fuel and final storage of vitrified high level reprocessing waste. Nuclear Fuel Safety Project, 2337
Helium formation from α-decay and its significance for radioactive waste glasses, 2252

High-level active waste disposal, 2162
High level nuclear waste - consequence analysis for disposal in bedrock, 2231
Investigations of the performance of solidified high-level nuclear waste forms, 1602 (NUREG/CR--0612)
Investigation of metallic, ceramic, and polymeric materials for engineered barrier applications in nuclear-waste packages, 1761 (PNL--3484)
Management of high-level radioactive wastes, 1106
Migration of transuranic nuclides in earthen burial trenches at the Savannah River Plant, 1465 (DP-MS--79-20)
Nuclear waste disposal, 2251
Oceanographic basis of the IAEA revised definition and recommendations concerning high-level radioactive waste unsuitable for dumping at sea., 1489 (IAEA--210)
Overview of the NRC high-level waste management program, 2181
Practical aspects of heat transfer in radioactive-waste repository design, 1389 (AERE-R--9343)
Preliminary assessment of the aquatic impacts of a proposed defense waste processing facility at the Savannah River Plant, 3495 (DP-MS--79-95)
Radioactive waste, 2341
Radiological basis of the IAEA revised definition and recommendations concerning high-level radioactive waste unsuitable for dumping at sea., 1490 (IAEA--211)
Regional thermo-hydrological effects of a radioactive waste repository in hard rock, 1569 (LBL--8648)
Report on geologic exploration activities, 1458 (DOE/RL/01830--14)
Responsibility without a parallel, 2238
Rock-melt approach to nuclear waste disposal in geological media, 2260
Safe handling and storage of high level radioactive waste, 2101
See-through solution to nuclear waste (Vitrification process), 1110
Some questions can only be answered by drilling, 2239
Status of nuclear fuel reprocessing, spent fuel storage, and high-level waste disposal. Nuclear Fuel Cycle Committee, California Energy Resources Conservation and Development Commission. Draft report, 117
Subseabed Disposal Program. Annual report, January-December 1978, 1933 (SAND--79-1618/1)
Subseabed disposal program annual report, January-December 1978. Volume II. Principal investigator progress reports, 1934 (SAND--79-1618(Vol.2))
Swedish nuclear fuel safety project for long-term disposal of high-level waste, 2187
Systems analysis approach to the disposal of high-level waste in deep ocean sediments, 1991 (SAND--80-0781C)
Technical developments in the WIPP program, 2002 (SAND--80-1599C)
Treatment and disposal of radioactive wastes from the viewpoint of the NUCLEX 78, 1031
Underground disposal of Canada's nuclear waste (Igneous batholiths, salt deposits, serpentinite), 2387

HIGH-LEVEL RADIOACTIVE WASTES/RADIOACTIVE WASTE FACILITIES
Surface depositories for vitrificated high-activity wastes, 1510 (INIS-mf--5571)

HIGH-LEVEL RADIOACTIVE WASTES/RADIOACTIVE WASTE MANAGEMENT
Environmental effects from disposal of defense high-level radioactive wastes in a generic geologic repository, 1428 (CONF-791112--24)
Generic waste management concepts for six LWR fuel cycles (Three recycle and three no-recycle options), 617 (ANL/EIS--11)
High-level waste management research, 572
High-level defense waste solidification at the Savannah River Plant, 729 (DP-MS--79-94)
High-level waste program progress report, April 1, 1980-June 30, 1980, 918 (ORNL/TM--7476)
Investigations of the performance of solidified high-level nuclear waste forms, 1602 (NUREG/CR--0612)
Long-term high-level defense waste technology. Progress report, July-September 1979, 525 (RHO-LD--79-101-D)
Long-term high-level waste technology program, 424 (DOE/SR-WM--79-3(Rev.4/80))
Management of high-level nuclear wastes, 519 (PNL-SA--7072/T1)
National perspective on waste management, 435 (DP-MS--80-73)
Nuclear wastes, 3108 (CONF-790202--)
Overview of the NRC high-level waste management program, 2181
Overview of high-level waste management accomplishments, 675 (CONF-800313--3)
Overview of the US Nuclear Regulatory Commission high-level waste management repository assessment methods and analysis models, 2589
Savannah River waste management program plan, 425 (DOE/SR-WM--80-1)
Sub-seabed disposal of high-level radioactive waste: prevention of management, 603
Transuranic contaminated waste functional definition and implementation, 2058 (UCRL--15229)

HIGH-LEVEL RADIOACTIVE WASTES/RADIOACTIVE WASTE PROCESSING
Clay-phosphate ceramics and vitromets: alternatives to monolithic high level waste glass products, 1233
Conditioning of HLW-calcines. 1. Pyrocarbon coating, 998 (SGAE--2864)
Conditioning of HLW-calcines. 2. Nickel coating, 999 (SGAE--2932)
Current views on the importance of separating long-lived alpha emitters from high-level wastes from spent fuel reprocessing, 1105
Development of multibarrier nuclear waste forms, 1232
Development of multibarrier nuclear waste forms, 955 (PNL-SA--7292)
Development of suitable vitrified radioactive waste products with low formation temperatures and improved leach resistance - a practical approach, 619 (BARC--1028)
Development of a pelleted waste form for high-level alumina wastes, 770 (ENICO--1051)
Development of the in-can melting process for vitrification of Savannah River Plant waste, 740 (DP-MS--80-49)
Effects of nitrite on denitration of nuclear fuel reprocessing waste with organic reductants, 1155
Evaluation and review of alternative waste forms for immobilization of high level radioactive wastes, 713 (DOE/TIC--11219)
Experimental equipment for the study of high-level waste fixation, 1070
Further developments of borosilicate glass for the nitrification of high-level fission product solutions, 1032
Glass as a material for the final disposal of fission products, 1342
Glass as a matrix for SRP high-level defense waste, 745 (DPST--79-294)
Handling of spent nuclear fuel and final storage of vitrified high level reprocessing waste. Nuclear Fuel Safety Project, 2337
High-level waste immobilization program: an overview, 940 (PNL--3094)
High-level waste solidification - why we chose glass, 613 (AERE-R--9432)
High-level nuclear waste immobilization program, 735 (DP-MS--80-25)
High level waste properties, 959 (PNL-SA--8085)
High-level waste program progress report, April 1, 1980-June 30, 1980, 918 (ORNL/TM--7476)
High-level waste solidification: why we chose glass, 1021
Hot isostatic pressing for the consolidation and containment of radioactive waste, 1235
HTGR reprocessing wastes and development needs, 709 (DOE/SF/71053--T1)
Long-term high-level defense waste technology progress report, October-December 1979, 982 (RHO-LD--80-101-A)
Long-term high-level waste technology. Composite quarterly technical report, January-March 1980, 715 (DP--80-157-1)
Management of high-level radioactive wastes, 1106
Metal encapsulation of ceramic nuclear waste, 1223
Method for the disposal of especially radioactive wastes (Patent), 1359
Method for the covering of a body including radioactive wastes with a layer of some corrosion resistant material (Patent), 1178
Method for encapsulation of high level radioactive nuclear fuels or wastes (Patent), 1062
Method for the recovery of actinide elements from nuclear reactor waste (Patent), 1114
Method for the denitration of highly radioactive waste solutions (Patent), 1099
Method for anchoring radioactive substances in a body resistant to leaching by water (Patent), 1075
Method to encapsulate spent fuel elements or high-level radioactive wastes (Patent), 1177
Outline of the Chemical Processing Facility (CPF), 1315
Overview of high-level waste management accomplishments, 675 (CONF-800313--3)
Phase separation in the glass containing high level radioactive waste, 1152
Preliminary evaluation of alternative waste form solidification processes. Volume II. Evaluation of the processes, 952 (PNL--3477)
Procedure in encapsulation of radioactive wastes (Patent) 1081
Processing of radioactive ruthenium with aluminosilicate gels, 1096
Progress on the cermet approach to nuclear waste management, 1251
Radiation damage of organic extractant in partitioning of high-level liquid waste, (2). Calculation of radiation dose absorbed in organic solvent in extraction process, 1170
Reducing the long-term hazard of reactor waste through actinide removal and destruction in nuclear reactors, 1024
Remote experimental facility to solidify SRP high-heat waste, 1266
Removal of radionuclides from Hanford defense waste solutions, 983 (RHO-SA--51)
Removal of radionuclides from the water-soluble fraction of Hanford Nuclear Defense Wastes, 988 (RHO-SA--145)
Safe handling and storage of high level radioactive waste. A condensed version of the proposals of the Swedish KBS-Project regarding reporcessing waste, spent fuel, 786 (INIS-mf--5013)
Safety assessment of the liquid-fed ceramic melter

process, 953 (PNL--3493)
Separation of americium, curium, and rare earths from high-level wastes by oxalate precipitation: experiments with synthetic waste solutions, 910 (ORNL/TM--6445)
Separation of transplutonium and rare-earth elements by extraction with di-isodecyl phosphoric acid from DTPA solution, 1153
Small-scale demonstration of high-level radioactive waste processing and solidification using actual SRP waste, 733 (DP-MS--80-2)
Small-scale integrated demonstration of high-level radioactive waste processing and vitrification using actual SRP waste, 742 (DP-MS--80-60)
Solidification of high-level wastes from reprocessing, 780 (INFCE/DEP/WG--7/7)
Structures and stability of media intended for the immobilization of high level radioactive waste, 628 (CEGB-RD-B-N--4573)
Study of phosphate systems for high-level waste solidification. Part I, 1012 (UJV--4663-Ch)
Summary of research and development activities in support of waste acceptance criteria for WIPP, 1926 (SAND--79-1305)
Techniques for high level waste solidification in Europe (AVM, HARVEST, and PAMELA processes), 1225
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
Titanate waste forms for high level waste: an evaluation of materials and processes, 997 (SAND--80-1376C)
Treatment and disposal of radioactive wastes from the viewpoint of the NUCLEX 78, 1031
US program for the immobilization of high-level nuclear wastes, 1139
Vitrification of high-level alumina nuclear waste, 666 (CONF-791112--43)
Vitrification of actual high-level waste from LWR fuel, 1267
Vitrification of transuranic and beta-gamma contaminated solid wastes, 720 (DP--1553)
Volatilities of ruthenium, iodine, and technetium on calcining fission product nitrate wastes, 686 (CONF-801038--4)
Volatility of ruthenium-106, technetium-99, and iodine-129, and the evolution of nitrogen oxide compounds during the calcination of high-level, radioactive nitric acid waste, 903 (ORNL--5562)
Volatility of alkali fission products during solidification process, 854 (INKA-Conf--79-003-015)
Waste treatment research and development, 704 (DOE/EV--0046(Vol.2))

HIGH-LEVEL RADIOACTIVE WASTES/RADIOACTIVE WASTE STORAGE
Chemical compatibility of HLW borosilicate glasses with actinides. Solubilities and segregation processes, 1540 (KFK--2552)
Conceptual design of a shipping cask for rail transport of solidified high level waste, 245 (PNL-SA--6526)
Determination of radiolytic hydrogen concentration in the gas plenum of a container for the storage of liquid HAW in the WAK, 2122
Development of a stand-depository for storage and investigation of high-activity solid wastes behaviour, 1511 (INIS-mf--5571)
Functional design criteria: additional high-level waste storage and handling facilities (For liquid and slurry wastes), 1397 (ARH-CD--304)
Functional design criteria additional high-level waste storage facilities, 1398 (ARH-CD--362)
Handling and storage of high-level radioactive liquid wastes requiring cooling, 2287
Inspection and evaluation of Nuclear Fuel Services high-level waste storage system. Program plan, 1856 (RHO-CD--882)
Interim report on status of containment integrity studies for continued in-tank storage of Hanford high-level defense waste, 1854 (RHO-CD--773)
Interim storage device for self-heating, highly dangerous materials, 2154
Intermediate storage facility for vitrified high level waste from the reprocessing of spent nuclear fuel, 1494 (INFCE/DEP/WG--7/10)
Inventory of calcined waste stored at the ICPP as of September 1979, 1476 (ENICO--1044)
Investigations of temperature development in the ultimate storage of radioactive waste. Pt. 1. Calculation of time- and site-dependent temperature fields, 2243
Management of high-level radioactive wastes, 1106
Overview of high-level waste management accomplishments, 675 (CONF-800313--3)
Radioactive waste storage (Patent), 2389
Results of investigations of behaviour of high-activity solid wastes and their compatibility with structural materials of protective ampules during long period storage, 1512 (INIS-mf--5571)
Safe handling and storage of high level radioactive waste. A condensed version of the proposals of the Swedish KBS-Project regarding reprocessing waste, spent fuel, 786 (INIS-mf--5013)
Safeguards assessment of spent fuel disposal alternatives, 2641
State of research and development work on final storage (The German R and D program for the storage of intermediate-level radioactive waste in the salt mine Asse and the participation in the European R and D work on high-level waste disposal), 2402
Summary report of waste tank improvement studies, 1866 (RHO-LD--136)

HIGH-LEVEL RADIOACTIVE WASTES/RADIOISOTOPES
Defense high-level waste and spent fuel characterization for geologic waste repositories, 1889 (SAND--79-0172)

HIGH-LEVEL RADIOACTIVE WASTES/RADIONUCLIDE MIGRATION
Geologic migration potentials of technium-99 and neptunium-237, 3425

HIGH-LEVEL RADIOACTIVE WASTES/RAIL TRANSPORT
Conceptual design of a shipping cask for rail transport of solidified high level waste, 245 (PNL-SA--6526)
Conceptual design of a shipping cask for rail transport of solidified high level waste, 165 (CONF-780506--(Vol.))
Government's duty, as shipper and regulator, to keep spent fuel and waste on track: the ICC cases, 152 (CONF-780506--(Vol.1))
Placing the special trains issue in perspective (Rail shipment of spent fuels), 154 (CONF-780506--(Vol.1))
Private shippers' efforts to transport spent nuclear fuel and waste by rail: the Interstate Commerce Commission cases, 153 (CONF-780506--(Vol.1))
Radiological risk analysis of truck and rail transportation of nuclear wastes, 179 (CONF-780506--(Vol.2))
Railroad perspective on transportation of spent fuel and high level waste and recent ICC decisions, 151 (CONF-780506--(Vol.1))
Release of radionuclides from high-level waste during transportation fires, 2585

HIGH-LEVEL RADIOACTIVE WASTES/RECOVERY
Characteristics of stored high-level ICPP waste calcine, 406 (CONF-790420--)

HIGH-LEVEL RADIOACTIVE WASTES/RESEARCH PROGRAMS
High-level waste program progress report, April 1, 1980-June 30, 1980, 918 (ORNL/TM--7476)

HIGH-LEVEL RADIOACTIVE WASTES/REVIEWS
Characteristics of defense high-level waste, 480 (NUREG/CR--0685)

HIGH-LEVEL RADIOACTIVE WASTES/SAVANNAH RIVER PLANT
Characteristics of defense high-level waste, 480 (NUREG/CR--0685)

HIGH-LEVEL RADIOACTIVE WASTES/SOLIDIFICATION
Solidification of highly active wastes generated by reprocessing: realization and forecasting, 1163
Study of phosphate systems for high-level waste solidification. Part I, 1012 (UJV--4663-Ch)

HIGH-LEVEL RADIOACTIVE WASTES/STABILITY
Development and characterization of the glass-ceramic VCP 15 for immobilization of high-level-liquid radioactive waste, 655 (CONF-790420--)
Thermal, chemical and radiation stability of vitreous radioactive wastes, 1231
Thermal, chemical and radiation stability of vitrificated radioactive wastes, 1513 (INIS-mf--5571)

HIGH-LEVEL RADIOACTIVE WASTES/TECHNETIUM 99
Geologic migration potentials of technium-99 and neptunium-237, 3425

HIGH-LEVEL RADIOACTIVE WASTES/TEMPERATURE MEASUREMENT
Predicted peak temperature-rises around a high-level radioactive waste canister emplaced in the deep ocean bed, 1391 (AERE-R--9518)

HIGH-LEVEL RADIOACTIVE WASTES/TOXICITY
Energy: what about the waste., 2567

HIGH-LEVEL RADIOACTIVE WASTES/UNDERGROUND DISPOSAL
Burying Britain's radioactive waste. The geological areas under investigation, 2151

HIGH-LEVEL RADIOACTIVE WASTES/UNDERGROUND STORAGE
Cemeteries sought for nuclear waste. Anatomy of an inquiry, 2109

HIGH-LEVEL RADIOACTIVE WASTES/USES
Possibility of utilization of high-active wastes from the regeneration of fast power reactor fuel, 560

HIGH-LEVEL RADIOACTIVE WASTES/VAPOR DEPOSITED COATINGS
Conditioning of HLW-calcines. 1. Pyrocarbon coating, 998 (SGAE--2864)
Conditioning of HLW-calcines. 2. Nickel coating, 999 (SGAE--2932)

HIGH-LEVEL RADIOACTIVE WASTES/VITRIFICATION
See-through solution to nuclear waste, 1110
Waste management, 2326

HIGH-LEVEL RADIOACTIVE WASTES/WASTE TRANSPORTATION
Transportation of postfission radioactive wastes from the commercial LWR fuel cycle, 180 (CONF-780506--(Vol.2))

HIGH-TEMPERATURE GAS-COOLED REACTOR
See HTGR TYPE REACTORS

HITACHI TRAINING REACTOR
See HTR REACTOR

HONEY/RADIOACTIVITY
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)

HORDEUM
See BARLEY

HORNBLENDE/SORPTIVE PROPERTIES
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Statistical investigation of the mechanics controlling

radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
HOSPITALS/LOWLEVEL RADIOACTIVE WASTES
Profile of institutional radioactive wastes generated in 1977, 1708 (PB--296947)
HOSPITALS/MATERIALS HANDLING
Unsealed radioactive materials. Handling, storage, use, and disposal in hospitals and medical research institutions, 3665
HOSPITALS/RADIATION PROTECTION
Installations for nuclear medicine. Regulations for construction and equipment, 3502
HOSPITALS/RADIOACTIVE WASTE DISPOSAL
Elimination of radioactive liquid wastes in hospitals: a mathematical model for designing decay ponds, 3427
Low-level radioactive wastes managements in universities, institutes and hospitals. On radiopharmaceutical waste disposal, 2223
HOSPITALS/RADIOACTIVE WASTE MANAGEMENT
Volume reduction of low-level radioactive waste with a hammermill, 502 (PB--296947)
HOSPITALS/RADIOACTIVE WASTE STORAGE
Storage time evaluation for active solid waste produced in hospitals, 2164
HOSPITALS/SAFETY STANDARDS
Health physics considerations in intrainstitutional mobile nuclear medicine, 3680
HOT CELLS/DECONTAMINATION
Assembly of laboratory line for nuclear fuel reprocessing, 2579
HOT CELLS/OPERATION
Vitrification of actual high-level waste from light water reactor fuel, 1042
HOT LABS/EXHAUST SYSTEMS
System for ventilating air contaminated with radioactivity (Patent), 3681
HOT LABS/SAFETY STANDARDS
Principles of safety criteria for nuclear fuel facilities, 2580
HOT LABS/VENTILATION SYSTEMS
System for ventilating air contaminated with radioactivity (Patent), 3681
HTGR TYPE REACTORS
See also AVR REACTOR
THTR-300 REACTOR
VHTR REACTOR
VRAIN REACTOR
HTGR TYPE REACTORS/ACTINIDES
Reactor physical investigations of actinide production and transmutation in HTR reactors, 2766
HTGR TYPE REACTORS/ALPHA-BEARING WASTES
Investigations on the generation of actinides in the high temperature reactor, 2763 (Juel--1603)
HTGR TYPE REACTORS/ENVIRONMENTAL IMPACTS
Applied systems analysis No. 11: introduction of nuclear long-distance energy. Environmental impact and its assessment, 2893 (Juel--1573)
HTGR TYPE REACTORS/FUEL CYCLE
Head-end of a reprocessing plant for HTR fuel elements, 93
Processes for immobilization of high-level solid wastes by glass and ceramic matrices, 659 (CONF-790420--)
Use of low enriched uranium fuel cycle in high temperature gas-cooled reactors, 2762 (JAERI-M--8063)
Waste arisings from a high-temperature reactor with a uranium-thorium fuel cycle, 2759 (INFCE/DEP/WG--7/3)
HTGR TYPE REACTORS/RADIOACTIVE EFFLUENTS
Measurement of liquid radioactive materials for the monitoring of radioactive emissions. UTA safety regulation, 2694
Publication of the safety regulation KTA 3603 of the Committee for Nuclear Technology (KTA). From March 12, 1980, 2898
Stock-taking of the safety design of the nuclear power plant with HTR 1160 and the radiation exposure connected with its operation. Phase 1 (German Federal Republic), 2760 (INIS-mf--4697)
HTGR TYPE REACTORS/RADIOACTIVE WASTE PROCESSING
Gasification of graphite (Patent), 1159
HTGR TYPE REACTORS/RADIOACTIVE WASTES
Waste arisings from a high-temperature reactor with a uranium-thorium fuel cycle, 2759 (INFCE/DEP/WG--7/3)
HTGR TYPE REACTORS/SPENT FUEL ELEMENTS
Processing of spent nuclear fuel from HTGR reactors. Review of current state of art, 2764 (UJV--4666-CH)
HTGR TYPE REACTORS/THORIUM CYCLE
Environmental implications of thorium use in selected nuclear fuel cycles. Final, 2891 (EPA--520/6-78-009)
HTGR TYPE REACTORS/WATER
Treatment of radioactive contaminated water in nuclear power plants. Safety requirements. Draft, 2701
HTR REACTOR/RADIOACTIVE EFFLUENTS
Measurement and monitoring of gaseous and aerosol-bound radioactive discharges. 1. Measurement and monitoring of radioactive substance releases via the vent stack during routine operation. Draft, 2993
HUMAN POPULATIONS/DOSE COMMITMENTS
Assessment of radon progeny inhalation exposure from low-level wastes of phosphate mining in Florida, 3395 (PB--296947)
Cesium-137 in coots (Fulica americana) on Hanford waste ponds: contribution to population dose and offsite transport estimates, 3614 (PB--296947)
Compartment model for assessing chronic radioactive releases (Use of BIODOSE program to compute biosphere transport parameters and doses to individuals and populations), 3381
Dosimetric and risk/benefit implications of Am-241 in smoke detectors disposed of in normal wastes, 3613 (PB--296947)
Environmental consequences of postulated plutonium releases from Exxon Nuclear MOFP, Richland, Washington, as a result of severe natural phenomena, 3377 (PNL--3315)
Foodchain transport of ^{210}Pb resulting from uranium milling activities, 3387
Iodine-129. Proceedings of an NEA specialist meeting. Paris, 13-16 June 1977, 3494
Spatial patterns of radiological dose from wells drilled near nuclear waste repositories, 2060 (UCRL--15235)
HUMAN POPULATIONS/DOSE EQUIVALENTS
Modelling and computing radiation hazards of population due to nuclear facility operation, 2427 (INIS-mf--4637)
HUMAN POPULATIONS/ENVIRONMENTAL EXPOSURE PATHWAY
Environmental radioactivity at the National Nuclear Research Centre, Pelindaba. Report for the year 1978, 3237 (PEL--270)
Marine example of a site protection study, 2422 (IAEA--212)
Modelling and computing radiation hazards of population due to nuclear facility operation, 2427 (INIS-mf--4637)
Preliminary evaluation of the BIODOSE computer program (For simulating radionuclide transport through aquatic ecosystems and predicting the dose to humans), 3478 (UCID--18267)
Radiation exposure due to nuclear facilities in West Germany in 1976, 2586
Radiation safety and health effects related to low-level radioactive wastes, 2075 (UCRL--83328)
Relative potential hazards of radioactive waste in various water systems, 2559 (UCRL--15121)
Statistical analysis of selected parameters for predicting food chain transport and internal dose of radionuclides. Final report, 3375 (NUREG/CR--1004)
Survey of the distributions of population and agricultural produce, etc. and the application for population dose evaluation. Survey for environmental safety research information, 3372 (JAERI-M--7757)
HUMAN POPULATIONS/LEUKEMIA
Excess cancer incidence in Mesa County, Colorado. Final report (Lack of correlation between leukemia incidence and use of uranium mill tailings as construction materials), 2534 (NUREG/CR--0635)
HUMAN POPULATIONS/LOW DOSE IRRADIATION
Genetic risks from radiation: recent assessments by the BEIR and UNSCEAR Committees and suggestions as to how future research can improve such estimates, 3597 (CONF-790977--1)
Nuclear power and the environment, 3655
HUMAN POPULATIONS/MORTALITY
Leukemia due to nuclear power plants, 2577
Nuclear waste disposal, 3426
HUMAN POPULATIONS/POPULATION RELOCATION
Analysis of the 1957-58 Soviet nuclear accident, 3233 (ORNL--5613)
HUMAN POPULATIONS/PUBLIC RELATIONS
Reality and myths, 543
HUMAN POPULATIONS/RADIATION DOSES
Assessment of dose to the critical group and the world population, 2527 (IAEA--212)
Computerprogram for calculating the radiological consequences of shorttime radioactive releases from nuclear installations, 3189 (AIAU--78306)
Contribution of radioactive effluents to exposure of population living near Nuclear Research Institute, Rez, 2428 (INIS-mf--4637)
Cost-effectiveness of the fenceline cow, 3257
Dose and dose commitment from radioactive substances carried by groundwater from a nuclear fuel repository, 2479 (STUDSVIK-K2--79/92)
Dose exposure of the environmental population by natural and released Ra-226 from a uranium mine prospect. Radioecological researches in the region of Feldberg, 2532 (KFK--2866)
Dose modelling for radon-producing activities in heavily populated areas, 2540 (PB--296947)
Environmental control aspects for fabrication, reprocessing and waste disposal of alternative LWR and LMFBR fuels, 2454 (PNL--3129)
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
Environmental monitoring at Ames Laboratory: Calendar year 1979, 3214 (IS--4734)
Environmental consequences of postulated plutonium releases from Exxon Nuclear MOFP, Richland, Washington, as a result of severe natural phenomena, 3377 (PNL--3315)
Estimation of inhalation doses from airborne releases using gross monitors, 3287
Estimation of North American population doses resulting from radon-222 release in western United States: methodology, 3235 (ORNL/TM--6751)
Exposure to radiation from the natural radioactivity in building materials, 3306 (INIS-mf--5531)
Field applications of a radon barrier to reduce indoor

airborne progeny, 2610
General calculation basis for assessing the radiation exposure from radioactive discharges via exhaust air or into surface water (Reg. guide related to paragraph 45 of the German Radiation Protection Regulation), 3499
Health and safety implication of a widespread, unauthorized dispersal of radioactive waste in the public domain, 2629 (PB--296947)
In situ data on various sites of radioactive releases into the marine environment, 2503
Individual and collective doses associated with the transport of irradiated magnox fuel within the UK, 2522 (CEGB-RD/B/N--4440)
Method for assessing the annual dose to the most exposed individual from tritium and ^{14}C reactor discharges to atmosphere, 3592 (CEGB-RD/B/N--4668)
Numerical analysis of radionuclide movement from a hypothetical nuclear waste repository (Ground-water mediated migration to river and subsequent population doses are modeled), 3450
Population dose from LWR fuel reprocessing, 2600
Preliminary evaluation of the BIODOSE computer program (For simulating radionuclide transport through aquatic ecosystems and predicting the dose to humans), 3478 (UCID--18267)
Preliminary examination of hazards arising from hypothetical failure of a long-term disposal facility for high level radioactive wastes from thermal reactors, 2578
Radiation burden from radioactive gas emissions of the population in the immediate neighbourhood of the Nuclear Research Institute, 3390
Radiological impact from model coal-fired power plants and from nuclear systems, 2934 (INKA-Conf--79-187-001)
Radiological evaluation of a uranium mines expansion: a case study, 2601
Release consequence analysis for a hypothetical geologic radioactive waste repository in salt, 1496 (INFCE/DEP/WG--7/16)
Release of radionuclides from high-level waste during transportation fires, 2585
Repository post-sealing risk analysis using MACRO, 2560 (UCRL--82236)
Sources of data for biodose simulations used in bedded salt repository analysis, 2055 (UCRL--15208)
Statistical analysis of selected parameters for predicting food chain transport and internal dose of radionuclides. Final report, 3375 (NUREG/CR--1004)
Supplemental report on population estimates for Hanford high-level defense waste draft programmatic environmental impact statement, 3239 (PNL--3128)
Survey of the distributions of population and agricultural produce, etc. and the application for population dose evaluation. Survey for environmental safety research information, 3372 (JAERI-M--7757)
Technology assessments, 3232 (ORNL--5595)
User's guide to the POPDOS2 program for evaluating collective doses, 3593 (CEGB-RD/B/N--4686)
WATER - a mathematical model for computing population doses in a watershed due to continuous radioactive effluents into water flows, 3479 (UJV--4508-D,CH,A,E)

HUMAN POPULATIONS/RADIATION HAZARDS
Internal irradiation of organism with radioactive rare gases, 2530 (INIS-mf--5319)
Spatial patterns of radiological dose from wells drilled near nuclear waste repositories, 2060 (UCRL--15235)

HUMAN POPULATIONS/RADIATION PROTECTION
Environmental protection, 3358 (BNL--51066)
Hygiene of ionizing radiations, 3699
Implementation of radiation protection requirements in the limitation of the release of radioactive effluents, 2424 (IAEA--212)
Radiation protection requirements in the limitation of the release of radioactive effluents, 2926 (IAEA--212)
Radiation protection activities - 1977. Annual report, 2941 (PB--290215)

HUMAN POPULATIONS/RADIOSENSITIVITY
Leukaemia and radiation, 3636

HUMAN POPULATIONS/RISK ASSESSMENT
Atmospheric Kr^{85} pollution by nuclear energy, 27

HUMIC ACIDS/CHEMICAL REACTIONS
Organic compounds identified in trench leachates from low-level radioactive waste disposal sites, 3449

HUMIC ACIDS/RADIONUCLIDE MIGRATION
Organic compounds identified in trench leachates from low-level radioactive waste disposal sites, 3449

HUMIC ACIDS/SORPTIVE PROPERTIES
Interaction of actinides and humic acid, 2190

HUNGARIAN PAKS-1 REACTOR
See PAKS-1 REACTOR

HUNGARIAN PAKS-2 REACTOR

HYBRID REACTORS/RADIOACTIVE WASTE DISPOSAL
Hyper fuse: a novel inertial confinement system utilizing hypervelocity projectiles for fusion energy production and fission waste transmutation, 3587 (BNL--27118)

HYDRAZINE/CHEMICAL REACTION KINETICS
Study of some saltless reducers of plutonium and neptunium, 52 (INIS-mf--5564)

HYDROCARBONS/ECOLOGICAL CONCENTRATION
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)

HYDROCARBONS/OXIDATION
Removal of tritium and tritium-containing compounds from a gaseous stream (Patent), 2657

HYDROGEN/CHEMICAL REACTION YIELD
Measurement of radiolytic hydrogen at the high level waste storage facility of Wiederaufarbeitungsanlage Karlsruhe (WAK), 2235
Radiolytic gas generation in concrete made with incinerator ash containing transuranium nuclides, 1466 (DP-MS--79-25)

HYDROGEN 3
See TRITIUM

HYDROGEN LOGS
See NEUTRON-NEUTRON LOGGING

HYDROGEN NITRATES
See NITRIC ACID

HYDROGEN PRODUCTION/CORROSION
Note on the consequence of hydrogen production in the repository, 1539 (KBS-TR--120)

HYDROGEN PRODUCTION/ELECTROLYSIS
Hydrogen production from nuclear fission product waste heat and use in gas turbines, 3628

HYDROGEN PRODUCTION/RADIOLYSIS
Note on the consequence of hydrogen production in the repository, 1539 (KBS-TR--120)

HYDROLOGY
Earth Sciences Division. Annual report 1978, 3549 (LBL--8648)

HYDROLOGY/BIBLIOGRAPHIES
Hydrologic bibliography of the Columbia River basalts in Washington with selected annotations, 1812 (RHO-BWI-C--45)

HYDROLOGY/COMPUTER CODES
CIRMIS Data system. Volume 2. Program listings, 1747 (PNL--3161-2)
Finite-element three-dimensional ground-water (FE3DGW) flow model - formulation, program listings and users' manual, 1741 (PNL--2939)

HYDROLOGY/FLOW MODELS
CIRMIS Data system. Volume 2. Program listings, 1747 (PNL--3161-2)
PATHS groundwater hydrologic model, 1750 (PNL--3162)

HYDROLOGY/MATHEMATICAL MODELS
Finite-element three-dimensional ground-water (FE3DGW) flow model - formulation, program listings and users' manual, 1741 (PNL--2939)
PATHS groundwater hydrologic model, 1750 (PNL--3162)
Variable thickness transient ground-water flow model. Volume 3. Program listings, 1745 (PNL--3160-3)

HYDROSPHERE/RADIOECOLOGICAL CONCENTRATION
Radioactivity in the hydrosphere due to A-1 nuclear power plant operation, 3437 (INIS-mf--5319)

HYDROXYLAMINE/CHEMICAL REACTION KINETICS
Study of some saltless reducers of plutonium and neptunium, 52 (INIS-mf--5564)

I

IAEA SAFEGUARDS
NPT and the role of the International Atomic Energy Agency in safeguards, 2621 (INIS-mf--5130)

IAEA SAFEGUARDS/MANAGEMENT
Technical limits of a control system, 3134

ICRP
(International Commission on Radiological Protection.)

ICRP/DOSE LIMITS
Assessment of radionuclides in waters with respect to radiation protection of population, 3600 (CS-INIS--258)

IDAHO/GEOLOGY
Additions and corrections to the bibliography of geologic studies, Columbia Plateau (Columbia River Basalt) and adjacent Areas, in Idaho, 1980, 1820 (RHO-BWI-C--68)

IDAHO/RADIATION MONITORING
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)

IDAHO CHEMICAL PROCESSING PLANT/CRITICALITY
Criticality and safeguards at the Idaho Chemical Processing Plant, 2618 (CONF-801107--13)

IDAHO CHEMICAL PROCESSING PLANT/HIGHLEVEL RADIOACTIVE WASTES
Characteristics of defense high-level waste, 480

(NUREG/CR--0685)
IDAHO CHEMICAL PROCESSING PLANT/INVENTORIES
Inventory of calcined waste stored at the ICPP as of September 1979, 1476 (ENICO--1044)
IDAHO CHEMICAL PROCESSING PLANT/OFFGAS SYSTEMS
Continuous plutonium monitor for nuclear facility off-gas streams, 2419 (ENICO--1054)
Description of the stack monitoring system and effluent measuring techniques at the Idaho Chemical Processing Plant, 757 (ENICO--1005)
IDAHO CHEMICAL PROCESSING PLANT/RADIATION MONITORING
Radiological surveys of radioactive shipments: are they adequate, 2414 (CONF-780506--(Vol.2))
IDAHO CHEMICAL PROCESSING PLANT/RADIOACTIVE WASTE MANAGEMENT
Environmental effects from disposal of defense high-level radioactive wastes in a generic geologic repository, 1428 (CONF-791112--24)
Technical quarterly progress report, January 1-March 31, 1979, 443 (ENICO--1012)
Technical quarterly progress report, April 1-June 30, 1979, 444 (ENICO--1013)
IDAHO CHEMICAL PROCESSING PLANT/RADIOACTIVE WASTE PROCESSING
Calcination of sodium-bearing waste using non-radioactive additives, 768 (ENICO--1043)
Flowsheet development work at the Idaho Chemical Processing plant for the partitioning of actinides from acidic nuclear waste, 1045
Pelleted waste form for high-level ICPP wastes, 392 (CONF-790420--)
IDAHO CHEMICAL PROCESSING PLANT/RADIOACTIVE WASTE STORAGE
Inventory of calcined waste stored at the ICPP as of September 1979, 1476 (ENICO--1044)
Leaching properties and chemical compositions of calcines produced at the Idaho Chemical Processing Plant, 1441 (CONF-800987--1)
Storage and retrievability of existing and future ICPP calcines, 1477 (ENICO--1060)
IDAHO CHEMICAL PROCESSING PLANT/RESEARCH PROGRAMS
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
Technical quarterly progress report, October 1-December 31, 1979, 46 (ENICO--1034)
IDAHO CHEMICAL PROCESSING PLANT/SAFEGUARDS
Criticality and safeguards at the Idaho Chemical Processing Plant, 2618 (CONF-801107--13)
IDAHO CHEMICAL PROCESSING PLANT/STACK DISPOSAL
Description of the stack monitoring system and effluent measuring techniques at the Idaho Chemical Processing Plant, 757 (ENICO--1005)
IDAHO MATERIALS TESTING REACTOR

Waste inventory report for reactor and fuel-fabrication facility wastes, 901 (ONWI--20-NUS-3314)
INTERMEDIATE-LEVEL RADIOACTIVE WASTES/RADIOACTIVE WASTE DISPOSAL
Final storage in concrete of activated metal parts, 1537 (KBS-TR--119)
Shale fracturing injections at Oak Ridge National Laboratory: 1977-1979 series, 1681 (ORNL/TM--7421)
Treatment and disposal of radioactive wastes from the viewpoint of the NUCLEX 78, 1031
INTERMEDIATE-LEVEL RADIOACTIVE WASTES/RADIOACTIVE WASTE MANAGEMENT
Generic waste management concepts for six LWR fuel cycles (Three recycle and three no-recycle options), 617 (ANL/EIS--11)
Shale fracturing injections at Oak Ridge National Laboratory: 1977-1979 series, 1681 (ORNL/TM--7421)
INTERMEDIATE-LEVEL RADIOACTIVE WASTES/RADIOACTIVE WASTE PROCESSING
Description of the R + D-work and the inactive and active test period of the Eurobitum/Eurostorage facility, 873 (KFK--2765)
HTGR reprocessing wastes and development needs, 709 (DOE/SF/71053--T1)
Immobilization of strontium and cesium in intermediate-level liquid wastes by solidification in cements, 1238
Investigations on the extraction of Pu from MAW, 609 (AED-Conf--78-274-018)
Material studies on solidification of medium-level waste solutions with cement: leachability of cesium and strontium, 1039 (PNL-TR--387)
Process for processing and conditioning radioactive effluents of low and medium activity (Patent), 1066
Treatment and disposal of radioactive wastes from the viewpoint of the NUCLEX 78, 1031
INTERMEDIATE-LEVEL RADIOACTIVE WASTES/RADIOACTIVE WASTE STORAGE
Operating safety requirements for the intermediate level liquid waste system, 2646 (ORNL/TM--7262)
State of research and development work on final storage (The German R and D program for the storage of intermediate-level radioactive waste in the salt mine Asse and the participation in the European R and D work on high-level waste disposal), 2402
INTERNAL CONTAMINATION
See RADIONUCLIDE KINETICS
IODATES/ADSORPTION
Adsorption of iodate by Hematite (FE_2O_3), 2210
IODINE/ADSORPTION
Assessment of the acceptability of performance of installed iodine trapping plant, 3225 (ND-R--52(W))
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Investigations of radioactive iodine catching by ventilation system of the Ewa and Marila reactors, 850 (INIS-mf--5574)
Methyl iodide and molecular iodine adsorption on impregnated activated charcoal, 1050
Monitoring and physical characterization of unsaturated zone transport. Laboratory analysis, 2457 (PNL--3304)
Nuclide transport by groundwater in Swedish bedrock, 2581
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Systematic study of nuclide adsorption on selected geologic media. Annual progress report, October 1, 1978-September 17, 1979, 2463 (PNL-SA--8571(Vol.2))
IODINE/CHEMISORPTION
Effect of carbon dioxide on the rate of iodine vapor absorption by aqueous solution of sodium hydroxide, 1331
Iodine absorption in mixed solution of sodium hydroxide-boric acid, 1329
Kinetics of absorption of trace iodine vapor in aqueous solution of sodium hydroxide, (2). Effect of reaction of liquid phase material in constant interface area type stirred absorption tank, 1330
Kinetics of iodine removal by washing with water, 1332
IODINE/DECONTAMINATION
User's guide to the programs ITRAP-A, ITRAP-B, ITRAP-S and ITRAP-L, 3226 (ND-R--53(W))
IODINE/ENVIRONMENTAL EXPOSURE PATHWAY
Geochemistry of radioactive waste disposal, 2135
IODINE/GEOCHEMISTRY
Geochemistry of radioactive waste disposal, 2135
IODINE/RADIOACTIVE AEROSOLS
Monitoring of radioiodine in gaseous effluents at the Bhabha Atomic Research Centre, India, 2997
IODINE/REMOVAL
Assessment of the acceptability of performance of installed iodine trapping plant: comments on the paper by Hyam and Manley in Nuclear Energy, February 1979, and a reply from these authors, 1026
Iodine evolution from nuclear fuel dissolver solutions by air sparging, 39 (CONF-800802--18(Draft))
Scrubbing of iodine from gas streams with mercuric nitrate-conversion of mercuric iodate product to barium iodate for fixation in concrete, 914 (ORNL/TM--7102)
IODINE/SORPTION
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
IODINE/VOLATILITY
Volatilities of ruthenium, iodine, and technetium on calcining fission product nitrate wastes, 686 (CONF-801038--4)
IODINE/WASHOUT
Kinetics of iodine removal by washing with water, 1332
IODINE 127/SEPARATION PROCESSES
Separation of iodine from mercury containing scrubbing solutions (Patent), 1115
IODINE 129/ENVIRONMENTAL EFFECTS
^{129}I distribution in vegetation on the Idaho National Engineering Laboratory Site, 3368 (IDO--12088)
IODINE 129/ENVIRONMENTAL IMPACTS
Iodine-129. Proceedings of an NEA specialist meeting. Paris, 13-16 June 1977, 3494
IODINE 129/ENVIRONMENTAL TRANSPORT
Assessment of effectiveness of geologic isolation systems. Test case release consequence analysis for a spent fuel repository in bedded salt, 1730 (PNL--2782)
IODINE 129/LEACHING
Leachable gap activities, 1530 (KBS-TR--109)
IODINE 129/PARTITION
Actinide partitioning-transmutation program final report. I. Overall assessment, 63 (ORNL--5566)
IODINE 129/PLUMES
Liquid waste disposal at the Idaho National Engineering Laboratory and resultant waste plumes in the Snake River Plain aquifer, 3436 (IDO--12088)
IODINE 129/RADIATION DOSES
Iodine-129 dose to the world population from the nuclear power industry, 3192 (CONF-791103--107)
IODINE 129/RADIATION MONITORING
Identification of iodine-129 sources, concentrations, contaminant levels and radioiodine monitoring techniques in LWR reprocessing operations, 76 (SAI--00979-1)
Monitoring of releases from an irradiated fuel reprocessing plant, 2995
Terrestrial studies, 3317 (DP--1557)
IODINE 129/RADIOACTIVE WASTE DISPOSAL
Adsorption of iodate by Hematite (FE_2O_3), 2210
Disposal of iodine-129, 2319
IODINE 129/RADIOACTIVE WASTE MANAGEMENT
Assessment of waste management of volatile radionuclides, 496 (ORP/CSD--79-2)
IODINE 129/RADIOACTIVE WASTE PROCESSING
Capture of ruthenium, iodine and triyium from discharge gases, produced during the process of dissolution at the device SU-2 of spent fuel elements from nuclear power plant with WWR reactors, 843 (INIS-mf--5574)
Technical requirements for the control of ^{129}I in a nuclear fuels reprocessing plant, 945 (PNL--3186)
IODINE 129/RADIOACTIVE WASTE STORAGE
Iodide and iodate sodalites for the long-term storage of iodine-129, 1422 (CONF-790420--)
IODINE 129/RADIOECOLOGICAL CONCENTRATION
^{129}I distribution in vegetation on the Idaho National Engineering Laboratory Site, 3368 (IDO--12088)
^{129}I in thyroids of herbivores on the Idaho National Engineering Laboratory Site, 3369 (IDO--12088)
IODINE 129/RADIOECOLOGY
Investigation of the radioecology of iodine 129, 3373 (KFK--2750)
IODINE 129/REMOVAL
Iodine 129 trapping in irradiated fuel reprocessing plants, 121
Iodine retention in La Hague reprocessing plant, 122
IODINE 129/SEPARATION PROCESSES
Separation of iodine from mercury containing scrubbing solutions (Patent), 1115
IODINE 129/TRANSMUTATION
Actinide partitioning-transmutation program final report. I. Overall assessment, 63 (ORNL--5566)
IODINE 129/VOLATILITY
Volatility of ruthenium-106, technetium-99, and iodine-129, and the evolution of nitrogen oxide compounds during the calcination of high-level, radioactive nitric acid waste, 903 (ORNL--5562)
IODINE 131/CHEMISORPTION
Iodine retention in La Hague reprocessing plant, 122
IODINE 131/DIFFUSION
Diffusion coefficients of airborne radioactive iodine and methyl iodide, 3288
IODINE 131/ENVIRONMENTAL EXPOSURE PATHWAY
Statistical analysis of selected parameters for predicting food chain transport and internal dose of

radionuclides. Final report, 3375 (NUREG/CR--1004)
IODINE 131/EXCRETION
Excretion of ^{131}I by freshwater catfish (Ictalurus punctatus) and bluegill (Lepomis macrochirus), 3486
IODINE 131/FISSION PRODUCTS
Development of ultrafiltration and adsorbents: April-September 1979, 889 (MLM--2684)
IODINE 131/INGESTION
Statistical analysis of selected parameters for predicting food chain transport and internal dose of radionuclides. Final report, 3375 (NUREG/CR--1004)
IODINE 131/OFFGAS SYSTEMS
Collection efficiency of TEDA-impregnated actived charcoal for low concentration of methyl iodide in air, 857 (JAERI-M--8158)
IODINE 131/PERSONNEL DOSIMETRY
Radiation hazard monitoring in ^{131}I therapy in and out clinic, 3694
IODINE 131/RADIATION HAZARDS
Radiation burden from radioactive gas emissions of the population in the immediate neighbourhood of the Nuclear Research Institute, 3390
IODINE 131/RADIATION MONITORING
Monitoring of releases from an irradiated fuel reprocessing plant, 2995
IODINE 131/RADIOECOLOGICAL CONCENTRATION
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
Statistical analysis of selected parameters for predicting food chain transport and internal dose of radionuclides. Final report, 3375 (NUREG/CR--1004)
IODINE 131/RADIONUCLIDE KINETICS
Excretion of ^{131}I by freshwater catfish (Ictalurus punctatus) and bluegill (Lepomis macrochirus), 3486
IODINE 131/REMOVAL
Capture of radioactive iodine from air discharge of the isotope production laboratories of the Central Institute for nuclear research, 840 (INIS-mf--5574)
Collection efficiency of TEDA-impregnated actived charcoal for low concentration of methyl iodide in air, 857 (JAERI-M--8158)
Iodine retention in La Hague reprocessing plant, 122
Method for cleaning liquid wastes contaminated with radioactive material (PWR type reactors, patent), 2735
IODINE 131/SEPARATION PROCESSES
Separation of iodine from mercury containing scrubbing solutions (Patent), 1115
IODINE COMPOUNDS/CONTAINERS
Container for the transport and dosable removal of radioactive and for toxic media (Patent), 2860
IODINE ISOTOPES/ADSORPTION
Plant for separating gaseous hydrocarbons and radioactive iodine isotopes from waste air (Patent), 1191
IODINE ISOTOPES/BIOLOGICAL RADIATION EFFECTS
Significance of iodine radioactive isotopes in the problem of radiation safety of nuclear fuel cycle, 3667
IODINE ISOTOPES/RADIATION MONITORING
1978 environmental monitoring report, 3190 (BNL--51031)
IODINE ISOTOPES/SEPARATION PROCESSES
Process for separating fission gases from irradiated nuclear fuel (Patent), 112
ION EXCHANGE
Investigation of the utility of chemically treated indigenous minerals in radioactive waste treatment, 1305
ION EXCHANGE MATERIALS
See also INORGANIC ION EXCHANGERS
ORGANIC ION EXCHANGERS
ION EXCHANGE MATERIALS/CHEMICAL RADIATION EFFECTS
Radiation stability of sodium titanate ion exchange materials, 996 (SAND--79-0199)
ION EXCHANGE MATERIALS/FLUIDIZED-BED COMBUSTION
Combustion of ion-exchange materials in fluidized bed. Final report, 965 (PRAV--1.32)
ION EXCHANGE MATERIALS/RADIOLYSIS
Estimation of the radiation effect of medium-active ion-exchange resins with final storage as radioactive wastes, 2179
ION EXCHANGE MATERIALS/REGENERATION
Results of new investigations on the process of liquid wastes purification by means of ion exchange and ways of it's improvement, 812 (INIS-mf--5570)
System for processing gaseous waste of resin-regeneration (Patent), 1192
ION IMPLANTATION
Ion-implantation and storage of radioactive waste in metal matrix, 1343
IONIZATION CHAMBERS/DESIGN
The monitoring system of the Tritium Research Laboratory, Sandia Laboratories, Livermore, California, 3594 (CONF-780110--)
IONIZING RADIATIONS/BIOLOGICAL RADIATION EFFECTS
Biological responses of a tropical coastal ecosystem to releases from electro-nuclear installations, 3388
IOWA/RADIATION MONITORING
Aerial radiological survey of US Department of Energy sites in Ames, Iowa. Date of survey: May 1977, 3318 (EGG--1183-1686)
IRON/DISTRIBUTION FUNCTIONS
Distribution of Co, Cr and Fe into Na- and H-type zeolites, 3687
IRON/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
IRON/ION IMPLANTATION
Krypton entrapment in pulse biased sputter-deposited metals, 1762 (PNL-SA--6698)
IRON/LEACHING
Measuring the hydrolytic resistance of solidification products, 2134
IRON 59/ADSORPTION
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
IRON 59/DESORPTION
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
IRON 59/ENVIRONMENTAL TRANSPORT
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
IRON OXIDES
See also HEMATITE
IRON OXIDES/CHEMICAL BONDS
Bonding of metal oxides in sodium silicate glass, 1241
IRON OXIDES/SOIL CHEMISTRY
Association of trace elements with iron oxides during rock weathering, 3302
IRON OXIDES/SORPTIVE PROPERTIES
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
IRRADIATION CAPSULES/DATA
Data package for the Turkey Point material interaction test capsules, 2848 (HEDL-TC--1283)
IRRADIATION CAPSULES/FABRICATION
Data package for the Turkey Point material interaction test capsules, 1485 (HEDL-TC--1283(Rev.1))
IRRADIATION PLANTS/RADIOACTIVE WASTE MANAGEMENT
Conception design for experimental facility of the research on internal emitters, 1599 (NIRS-R--7)
IRRADIATION PLANTS/RESEARCH PROGRAMS
Beneficial Uses Program. Progress report for period ending June 30, 1978, 3619 (SAND--78-1951)
ISAR REACTOR/RADIOACTIVE EFFLUENTS
Kernkraftwerk Isar: Leakage of a small amount of contaminated auxiliary feedwater into the rainwater duct, 2686
ISAR REACTOR/REACTOR OPERATION
Results of German nuclear power plant operation in 1978. Pt. 1. Industrial nuclear power stations. Data from the annual report by the ABE committee, 2833
ISAR REACTOR/SPENT FUEL STORAGE
Publication of the 5th partial license to increase the storage capacity of the fuel storage pool of Kernkraftwerk Isar, 2681
ISOTOPE PRODUCTION/RESEARCH PROGRAMS
Nuclear Science and Technology Branch report 1977. Research Establishment site management, 3018 (AAEC/PR--44S)
ISOTOPE SEPARATION PLANTS
See also GASEOUS DIFFUSION PLANTS
HEAVY WATER PLANTS
Nuclear fuel supply for countries embarking on a nuclear power programme, and aspects of developing a domestic nuclear fuel industry, 25
ISOTOPE SEPARATION PLANTS/RADIOACTIVE WASTES
Long-term disposal of enrichment plant tails, 779 (INFCE/DEP/WG--7/4)
ITALY/FALLOUT
Measurement of environmental radioactivity. Ispra 1976, 3206 (EUR--5805)
ITALY/RADIOACTIVE WASTE MANAGEMENT
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)

Pacific Northwest geomorphology and hydrology: rates and probabilities of selected processes and events, 2542 (PNL--2851)
LANTHANIDES
See RARE EARTHS
LANTHANUM/ADSORPTION
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
LANTHANUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
LANTHANUM/SOLVENT EXTRACTION
Calculation of distribution ratios of rare earth elements in multistage counter current extraction with HDEHP, 3676
LANTHANUM 140/RADIOECOLOGICAL CONCENTRATION
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
LASER FUSION REACTORS/RADIOACTIVE WASTE DISPOSAL
Burning nuclear wastes in fusion reactors, 2661 (UCRL--82969)
LASL
(Los Alamos Scientific Laboratory.)
LASL/CHEMICAL EFFLUENTS
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
LASL/ENVIRONMENTAL IMPACT STATEMENTS
Final environmental impact statement. Los Alamos Scientific Laboratory Site, Los Alamos, New Mexico, 3601 (DOE/EIS--0018)
LASL/MONITORING
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
LASL/RADIATION MONITORING
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
LASL/RADIOACTIVE EFFLUENTS
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
LASL/RADIOACTIVE WASTE MANAGEMENT
Liquid waste management systems improvement programs at Los Alamos Scientific Laboratory, 473 (LA-UR--807145)
Nuclear waste management technology development activities. Progress report, January-December 1978, 468 (LA--7921-PR)
Performance and improvements of the tritium handling facility at the Los Alamos Scientific Laboratory, 881 (LA-UR--80-1265)
Radioactive waste incineration studies at the Los Alamos Scientific Laboratory, 882 (LA-UR--80-1408)
LASL/RADIOACTIVE WASTES
Studies of transuranic waste storage under conditions expected in the Waste Isolation Pilot Plant (WIPP). Interim summary report, October 1, 1977-June 15, 1979, 1545 (LA--7931-PR)
LASL/RESEARCH PROGRAMS
Volcanology at the Los Alamos Scientific Laboratory, 3542 (LASL--80-42(Mini-Review))
LATEX/BIOLOGICAL EFFECTS
Effect of soil affixants on germination, emergence, and growth of cheatgrass and Russian thistle, 3400
LATEX/TOXICITY
Effect of soil affixants on germination, emergence, and growth of cheatgrass and Russian thistle, 3400
LAUNDRIES/RADIOACTIVE WASTE PROCESSING
Purification of radioactive sewage containing large quantities of detergents, 2932 (INIS-mf--5570)
LAWRENCE BERKELEY LABORATORY/RESEARCH PROGRAMS
Earth Sciences Division. Annual report 1979, 3512 (LBL--10686)
LAWRENCE LIVERMORE LABORATORY/ON-LINE MEASUREMENT SYSTEMS
On-line monitoring of toxic materials in sewage at the Lawrence Livermore Laboratory, 3410 (UCRL--83664)
LAWRENCE LIVERMORE LABORATORY/RESEARCH PROGRAMS
Program report for FY 1979: Atmospheric and Geophysical Sciences Division of the Physics Department, 3184 (UCRL--51444-79)
LAWRENCE LIVERMORE LABORATORY/WASTE MANAGEMENT
Safety Analysis (SA) of the Hazardous Waste Disposal Facilities (Buildings 514, 612, and 614) at the Lawrence Livermore Laboratory, 3397 (UCID--18706)
LEACHATES/CHEMICAL ANALYSIS
Characterization of organics in leachates from low-level radioactive waste disposal sites, 1408 (BNL-NUREG--27235)
LEACHATES/TESTING
Materials Characterization Center workshop on leaching of radioactive waste forms. Summary report, 1756 (PNL--3318)
LEACHING/CHEMICAL REACTION KINETICS
Mechanism for elevated temperature leaching, 1906 (SAND--79-0954C)
LEACHING/MATHEMATICAL MODELS
Release model development, 1789 (PNL-SA--7992)
LEACHING/STANDARDS

Experimental procedure for proposed ANS standard on low-level waste leachability, 2313
LEAD
Uranium-lead shielding for nuclear material transportation systems, 166 (CONF-780506--(Vol.1))
LEAD/ACTIVATION ANALYSIS
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
LEAD/ADSORPTION
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
LEAD/CORROSION RESISTANCE
Lead as a material for atomic waste containers. Analysis of lead corrosion behavior on the basis of archaeological finds, 2102
LEAD/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
LEAD/X-RAY FLUORESCENCE ANALYSIS
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
LEAD 210/ENVIRONMENTAL EXPOSURE PATHWAY
Foodchain transport of ^{210}Pb resulting from uranium milling activities, 3387
LEAD 210/ENVIRONMENTAL TRANSPORT
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
LEAD 210/MIGRATION
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
LEAD 210/RADIOECOLOGICAL CONCENTRATION
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
Foodchain transport of ^{210}Pb resulting from uranium milling activities, 3387
Radiological survey of the radioactive sands and residues at Lowman, Idaho, 3342 (ORNL--5465)
LEAD 210/RADIONUCLIDE MIGRATION
Foodchain transport of ^{210}Pb resulting from uranium milling activities, 3387
LEAK DETECTORS/DESIGN
Leakage detection system for radioactive waste storage tanks (Patent), 2167
LEAKAGE
See LEAKS
LEAKS/MATHEMATICAL MODELS
Effects of gaseous radioactive nuclides on the design and operation of repositories for spent LWR fuel in rock salt, 1660 (ORNL--5578)
LEAKS/RADIONUCLIDE MIGRATION
WISAP Task 4 (sorption-desorption analysis), 1786 (PNL-SA--7992)
LENINGRAD-1 REACTOR/RADIOACTIVE WASTE MANAGEMENT
Technical and economic estimations of liquid wastes localization conformably to the Leningrad nuclear power plant, 458 (INIS-mf--5571)
LEUKEMIA/STATISTICS
Excess cancer incidence in Mesa County, Colorado. Final report (Lack of correlation between leukemia incidence and use of uranium mill tailings as construction materials), 2534 (NUREG/CR--0635)
LEUKEMOGENESIS
Leukaemia and radiation, 3636
LEUKEMOGENESIS/RISK ASSESSMENT
Excess cancer incidence in Mesa County, Colorado. Final report (Lack of correlation between leukemia incidence and use of uranium mill tailings as construction materials), 2534 (NUREG/CR--0635)
LEVEL INDICATORS/CALIBRATION
Calibrator for level indicator of liquid waste in a storage tank (Patent), 2390
LEVEL INDICATORS/DESIGN
Coaxial cavity for measuring level of liquid in a container (Patent), 2150
LICENSING
See also REACTOR LICENSING
LICENSING/MATHEMATICAL MODELS
Early identification of technical issues: a sensitivity study to check LISTRA1A internal consistency and structure, 2649 (UCID--18709)
LI-DRIFTED GE DETECTORS/COMPARATIVE EVALUATIONS
Comparison of gamma-spectrometric techniques for environmental monitoring of nuclear installations, 3629
LIGHT WATER BREEDER REACTORS
See LWBR TYPE REACTORS
LIMESTONE/GEOCHEMISTRY
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
LIMESTONE/RADIONUCLIDE MIGRATION
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
LIMESTONE/SAMPLING
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
LIMESTONE/SORPTIVE PROPERTIES
Preliminary results on comparison of adsorption-desorption methods and statistical techniques to generate Kd predictor equations, 2458 (PNL-SA--7245)
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Studies of radionuclide availability and migration at the Nevada Test Site relevant to radioactive waste disposal, 1769 (PNL-SA--7352(Vol.1))
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
LIMESTONE/THERMAL CONDUCTIVITY
Thermal conductivity of the rocks in the Bureau of Mines Standard Rock Suite, 3557 (ORNL/TM--7052)
LINACS
See LINEAR ACCELERATORS
LINEAR ACCELERATORS/RADIATION PROTECTION
Radiological safety aspects of the operation of electron linear accelerators, 3657
LINEAR ACCELERATORS/RADIOACTIVE EFFLUENTS
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
LINGEN REACTOR/REACTOR DECOMMISSIONING
What can be done with old nuclear power plants, 3054
LINGEN REACTOR/REACTOR DISMANTLING
What can be done with old nuclear power plants, 3054
LIQUID ASPHALT
See RESIDUAL FUELS
LIQUID CONTAMINATION MONITORS/PERFORMANCE
Instantaneous and continuous sampling station for monitoring the radioactivity of sewage, 3000
LIQUID FLOW/G CODES
Development and validation of GWHEAD, a three-dimensional groundwater head computer code, 3507 (DP--1522)
LIQUID METAL FAST BREEDER REACTORS
See LMFBR TYPE REACTORS
LIQUID METAL TEST FACILITIES
See TEST FACILITIES
LIQUID SCINTILLATION DETECTORS/EFFICIENCY
Atomic Energy of Canada Limited monitoring tritiated water in air and water effluents, 3595 (CONF-780110--)
LIQUID SCINTILLATORS/DECONTAMINATION
Decontamination and recovery of 1,4 dioxane-based liquid scintillator, 1216
LIQUID WASTES
See also WASTE WATER
^{137}Cs - contamination indicator of waste water discharged from A-1 nuclear power plant, 3474 (INIS-mf--4637)
1978 environmental monitoring report, 3190 (BNL--51031)
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions. Report of investigations, 920 (PB--80-122740)
Activities of the IAEA in the fields of radioactive wastes handling, 456 (INIS-mf--5570)
Activity report 1978, 48 (ETR--299)
Adsorption of radionuclides in waste water on oxine-impregnated activated charcoal. Adsorption characteristics of manganese-54 ion, 1197
Advanced biological treatment of aqueous effluent from the nuclear fuel cycle, 1435 (CONF-800334--3)
Alkaline pyrohydrolysis of TBP with formation of calcium phosphate and butene, 1054
Annual report on radioactive discharges and monitoring of the environment, 1977, 2429 (INIS-mf--5194)
Annual report on radioactive discharges and monitoring of the environment 1978, 3258
Apparatus for extreme evaporation of special solutions, 1015
Application of ion exchangers with crown ethers as anchor groups in analytical and preparative chemistry, 1346
Application of the solidification method for desactivation of nuclear power plant wastes in Czechoslovakia, 821 (INIS-mf--5571)
Application of heterogeneous flotation for separation of some long living fission products, 810 (INIS-mf--5570)
Application of sorption methods for liquid radioactive wastes processing, 815 (INIS-mf--5570)
Application of extraction chromatography to the recovery of neptunium, plutonium and americium from an industrial waste, 1023
Applied laboratory research of high-level waste denitration and calcination technologies. Progress report, 1011 (UJV--4113-Ch)
Assessment of radionuclides in waters with respect to radiation protection of population, 3600 (CS-INIS--258)
Assessment of the radiological impact of tritium released to sea from the Windscale fuel element reprocessing plant, 3455
Attempt to optimize the conditions for cleaning waste solutions from tissue decontamination, 1281
Automatic installations with evaporators and ion exchange filters for processing trapped waters and boron containing solutions with regeneration of boric acid from them conformably to the nuclear power plant with WWR-1000 reactor project, 2930 (INIS-mf--5570)
Bidentate organophosphorus solvent extraction process for actinide recovery and partition, 1085

Biological denitrification of high-nitrates wastes generated in the nuclear industry, 414 (CONF-800447--1)
Bioprocess development and demonstration, 3409 (ORNL/TM--6328/V1)
Bituminization of biologically harmful wastes, 1361
Calcining sodium-bearing waste by blending with zirconium fluoride waste, 758 (ENICO--1006)
Cell 18 ion exchange flowsheet, 980 (RHO-F--7)
Challenges of nuclear effluent management in the national perspective, 584
Characterisation, handling and treatment of waste arisings from the Winfrith SGHWR, 2973
Clay-phosphate ceramics and vitromets: alternatives to monolithic high level waste glass products, 1233
Coaxial cavity for measuring level of liquid in a container, 2150
Collect and treatment of radioactive wastes in low activity laboratories, 626 (CEA-CONF--4677)
Comparison of calculated and measured radiation doses from chronic aqueous releases, 3423
Concentration of liquid radioactive wastes by evaporation at the temperature below boiling point, 813 (INIS-mf--5570)
Construction of new installation for processing and burial of radioactive wastes in Hungarian Peoples Republic, 829 (INIS-mf--5571)
Contamination of the ground near Building B 212 at Windscale Works, BNFL, 3312
Continuous bituminization plant for solidifying radioactive wastes, 1129
Control and monitoring system of radioactive effluents in radioisotope facilities, 2328
Control of radioactive pollutants in liquid effluents from large nuclear power plants, 2713
Deactivation of waste waters in the Czechoslovak Uranium Industry, 695 (CS-INIS--258)
Decontamination and disposal of radioactive wastes from nuclear facilities, 694 (CS-INIS--258)
Decontamination of waste radioactive polluted solutions in radiation treatment, 3659
Desactivation of liquid radioactive wastes of low and medium activity, 1507 (INIS-mf--5570)
Design and operation principle of pilot-plant for bituminization of radioactive wastes, 827 (INIS-mf--5571)
Designing instruments for measuring activity of liquids, 3652
Determination of the radioactivity categories in liquid wastes, 596
Determination of radiolytic hydrogen concentration in the gas plenum of a container for the storage of liquid HAW in the WAK, 2122
Development and operation experience from pilot-plant for bituminization of liquid radioactive wastes (UBD-200), 822 (INIS-mf--5571)
Development of equipment for pilot-plants for radioactive wastes bituminization, 828 (INIS-mf--5571)
Development of a laundry waste treatment system for nuclear power plants, 1335
Development of the catalog for ordinary sorption agents for low activity sewage purification, 807 (INIS-mf--5570)
Development of sorption agents on the basis of transitition metals hydroxides and investigations on the machanisms of the first and second group elements sorption from solutions with high salt content by means of these sorbents, 817 (INIS-mf--5570)
Developments in the management of liquid and solid radioactive wastes from the irradiated fuel cooling pond at Trawsfynydd power station, 2969
Development of incorporation of evaporator concentrate from pressurized water nuclear power reactors into asphalt, 2980
Device for processing radioactive liquid waste, 1372
Device for radioactive wastes processing, 1374
Device to draw off one or several phases, 1172
Disposal of liquid radioactive wastes from nuclear power plants, 697 (CS-INIS--258)
Double shell slurry process test evaluation, 977 (RHO-CD--394)
Effect of emergency discharge of nuclear facilities effluents on hydrosphere, 3466 (CS-INIS--258)
Effects studies of H_2SO_4/Na_2SO_4 on separation of Sr-90 from liquid Sr-90 waste by coprecipitation method using $BaSO_4$ as a carrier, 962 (PPGM-L--181-78)
Elimination of *manganese-54 in waste water* by oxine-impregnated activated charcoal, 1168
Energy systems group environmental monitoring and facility effluent. Annual report 1979, 3321 (ESG--80-7)
Environmental monitoring and disposal of radioactive waste fron naval nuclear vessels and support facilities in 1978, 2175
Environmental sampling program for a solar evaporation pond for liquid radioactive wastes, 1551 (LA--8177)
Environmental monitoring at Ames Laboratory: Calendar year 1979, 3214 (IS--4734)
Environmental radioactivity at the National Nuclear Research Centre, Pelindaba. Report for the year 1978, 3237 (PEL--270)
Evaluation of large caverns for in-situ solidification and final storage of MAW and LAW with regard to the heat build-up in the waste product, 551
Experience with liquid radioactive waste treatment, 696 (CS-INIS--258)
Experience on operation of pilot plant for concentration of liquid radioactive wastes by means of evaporation at the temperature below boiling point, 808 (INIS-mf--5570)
Explanation of guideline concerning the measurement of emitted radioactive substances in light water power reactor facilities, 3286
Express-method for control of radionuclides migration of the stratum-collector of underground burial site for liquid radioactive wastes, 2430 (INIS-mf--5572)
Exxon nuclear fuel recovery and recycling center: process description, 95
Facility for liquid wastes and aqueous radioactive wastes of an α, β, γ-laboratory, 2098 (ZfK--340)

Properties of radioactive wastes and waste containers. First topical report, 1603 (NUREG/CR--0619)
Prospects for liquid, gaseous and solid waste treatment systems for ENFL's reference power station BWR and PWR, 2985
Publication of the safety regulation KTA 3603 of the Committee for Nuclear Technology (KTA). From March 12, 1980, 2898
Purification of low level activity water by means of selective sorbents, 803 (INIS-mf--5570)
Purification of the high activity water from long time storage pool for fuel element clusters, 809 (INIS-mf--5570)

Purification of radioactive sewage containing large quantities of detergents, 2932 (INIS-mf--5570)
Radiation exposure due to nuclear facilities in West Germany in 1976, 2586
Radiation dosimetry of small mammals inhabiting a liquid radioactive waste disposal area, 3363 (IDO--12088)
Radiation shield integrity testing at the new waste calcining facility, 1347
Radiation burden in underground stores and methods for control of specific radionuclides content, 1517 (INIS-mf--5572)
Radiation damage of organic extractant in partitioning of high-level liquid waste, (2). Calculation of radiation dose absorbed in organic solvent in extraction process, 1170
Radioactive waste management in West Germany, 597
Radioactive waste processing in NRI, 782 (INIS-mf--4551)
Radioactive waste disposal areas and associated environmental surveillance data at Oak Ridge National Laboratory, 3418 (ORNL/TM--6893)
Radioactive liquid wastes discharged to ground in the 200 Areas during 1978, 1849 (RHO-CD--78-34-4Q)
Radioactive liquid wastes processing system, 1293
Radioactive effluents from nuclear power stations and nuclear fuel reprocessing plants in the European Community. Discharge data 1972-1976 radiological aspects, 2420 (EUR--6088)
Radioactivity in the hydrosphere due to A-1 nuclear power plant operation, 3437 (INIS-mf--5319)
Radioactivity leach tests under high hydrostatic pressure on full size monolithic cement packages of LWR wastes for sea dumping, 2327
Radioactive sludge treatment by the centrifugal dehydration method, 927 (PB--296947)
Radioactive waste treatment system for Tsuruga Nuclear Power Station, 1334
Radioactive waste management and exposure situation for people engaging in nuclear power plant facilities, 3269
Radioactive liquid waste management of typical PWR's, 12
Radioactive wastes bituminization by the pilot-plant equipment, 830 (INIS-mf--5571)
Radioactive organic solvent wastes, 1169
Radioactive waste treatment experiences at Tarapur, 2978
Radioactive materials and environment, 3380
Radioactive liquid wastes discharged to ground in the 200 Areas during 1976, 1401 (ARH-CD--743-4Q)
Radioactive liquid waste discharged to ground in the 200 Areas during 1977, 1848 (RHO-CD--34-4Q)
Radioactive liquid wastes discharged to ground in the 200 areas during 1979, 1851 (RHO-CD--79-34-4Q)
Radiocesium uptake by a population of cotton rats (Sigmodon hispidus) inhabitating the banks of a radioactive liquid waste pond, 3385
Radiochemical separation of plutonium from low-activity waste waters, 783 (INIS-mf--4637)
Radioisotope waste processing systems, 1322
Radiological data concerning the nuclear merchantship Otto Hahn. A review after ten years of operation, 3022 (GKSS--79/E/24)
Radionuclide transfer in the environment and modality of man contamination, 3313
Radionuclides from nuclear power facilities operation in hydrosphere, 2719 (CS-INIS--258)
Radwaste process system experience at Tarapur, 2714
Reactor waste management practices in the Federal Republic of Germany, 2700
Recommendations for remedial action and decommissioning of a radioactive waste burial site, 1724 (PB--296947)
Recovering actinide values, 1028
Recovery, purification, and concentration of plutonium and americium from the aqueous wastes discharged in the reprocessing studies, 1020 (LA-tr--80-17)
Recovery of actinides from TBP-Na_2Co_3 scrub-waste solutions: the ARALEX process, 616 (ANL--79-74)
Recovery of actinoids from waste solutions of fuel reprocessing. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, 2, 859 (JAERI-M--8339)
Recovery process, 562
Reduction in waste handling and transportation, 928 (PB--296947)
Regulations of collecting radioactive wastes in Hungary, 593
Remotely operated organic liquid waste incinerator for the fuels and materials examination facility, 776 (HEDL-SA--2009-FP)
Removal of plutonium and americium from alkaline waste solutions, 1156
Removal of radioactive ions from nuclear waste solutions by electrodialysis, 1307
Removal of low-level radioactivities from aqueous waste solutions with activated carbon, 1079
Removal of radionuclides from water, 1176
Removal of tritiated species from gas streams comprised thereof, 1320
Removal of radionuclides from the water-soluble fraction of Hanford Nuclear Defense Wastes, 988 (RHO-SA--145)
Removal of fission and corrosion products from alkaline solutions of boric acid by the ion exchange method, 805 (INIS-mf--5570)
Research on deactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 4. Perfection of methods and means for averting radioactive contamination and for decontamination of equipment of nuclear power plants, research centers, and nuclear fuel reprocessing installations, 836 (INIS-mf--5573)
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 3, 1515 (INIS-mf--5572)
Research on deactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 5. Investigations on methods and means for removal of radioactive aerosols and gases from air discharges, 3416 (INIS-mf--5574)
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Proceedings of the 4-th scientific and technical conference of CMEA. Moscow, 20 - 23 december 1976. Part 1. Processing of liquid radioactive wastes of low and medium activity, 802 (INIS-mf--5570)
Results of new investigations on the process of liquid wastes purification by means of ion exchange and ways of it's improvement, 812 (INIS-mf--5570)
REY: a computer code for the determination of the radionuclides activities from the gamma-ray spectrum data, 2935 (JEN--423)
Safety analysis report for packaging a DOT 7A specification container for tritiated liquid wastes, 266 (SAND--80-8021)
Safety considerations in a fuel reprocessing plant, 51 (INIS-mf--5372)
Safety in alteration of the fuel reprocessing plant in Power Reactor and Nuclear Fuel Development Corporation, 100
Scientific basis for, and experience with, underground storage of liquid radioactive wastes in the USSR, 2258
See-through solution to nuclear waste, 1110
Separation of transplutonium and rare-earth elements by extraction with di-isodecyl phosphoric acid from DTPA solution, 1153
Separation methods used for large-scale production of transplutonium elements. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, (1), 858 (JAERI-M--8240)
Shale fracturing injections at Oak Ridge National Laboratory: 1977-1979 series, 1681 (ORNL/TM--7421)
Slurry feeding of nuclear wastes to an electric glass melter, 1144
Solidification of low-level radioactive liquid waste using a cement-silicate process, 929 (PB--296947)
Solidification method of radioactive waste organic solvents, 1210
Solidification process for an aqueous solution containing radioactive or toxic wastes, 1121
Solidification of liquid wastes from nuclear power plants by mobile solidification units, 2970
Solidificaton of evaporator concentrates by hydraulic binding agents, 2748
Solvent extraction of palladium with sulfur reagents from mineral acid medium. Communication 1. Solvent extraction with symmetrical dialkyl- and diaryl sulfides from nitric acid medium, 790 (INIS-mf--5564)
Solvent extraction of technetium from nitric acid solutions with tributyl phosphate and tri-n-octylamine in tetrachloromethane, 792 (INIS-mf--5564)
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
State of the art review of radioactive waste volume reduction techniques for commercial nuclear power plants, 1670 (ORNL/SUB--79/13837/2)
Stirring vessel for cement solidification of radioactive wastes, 1200
Stratigraphy of the late Cenozoic sediments beneath the 216-A Crib Facilities, 1860 (RHO-LD--71)
Structural analysis and evaluation of a horizontal reservoir, 1184
Studies on the dispersion of low-level liquid effluent released from the fuel reprocessing plant into the sea, 1726 (PNCT--841-78-69)
Studies on the removal of hydrophilic radioactive substances from radioactive waste, 1130
Study of alternative methods for the management of liquid scintillation counting wastes, 479 (NUREG--0656)
Study of radium state and behaviour in surface and waste waters, 3433 (CS-INIS--258)
Study of seepage beneath a model waste disposal crib, 1403 (BARC--947)
Study on decontamination of radioactive ruthenium by steel wool in waste solution, 1151
Surface water contamination with radionuclides caused by nuclear power engineering, 3438 (INIS-mf--5319)
System for processing gaseous waste of resin-regeneration, 1192
System for receiving and shearing LWR spent fuel, 107
Systemic effects of radiation exposure on rodents inhabiting liquid and solid radioactive waste storage areas, 3473 (IDO--12088)
Technical standard on disposal of radioactive wastes, 2331
Technical and economic estimations of liquid wastes

localization conformably to the Leningrad nuclear power plant, 458 (INIS-mf--5571)
Technological lyne for reception and storage of liquid concentrated radioactive wastes and spent sorbents for the Loviisa nuclear power plant and for serial blocks of nuclear power plants with WWR-440 type reactors (System TW), 834 (INIS-mf--5572)
Technological system for reception and storage of liquid radioactive concentrated wastes and spent sorbents for the Finish nuclear power plant Loviisa and serial nuclear power plant blocks with WWR-440 type reactors (system TW), 2931 (INIS-mf--5570)
Technology of two-stage waste water evaporation with mixing condenser, 2957
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
To the problem of neutralization of low- and medium-active spent fuel reprocessing wastes, 799 (INIS-mf--5567)
Toxicity of waste water from uranium ore mining and processing, 3599 (CS-INIS--258)
Transuranic distribution beneath a retired underground disposal facility, Hanford Site, 1869 (RHO-SA--131)
Treatment of radioactive contaminated water in nuclear power plants. Safety requirements. Draft, 2701
Treatment of liquid effluents of reprocessing plants by a chemical process: French experience, 34 (CEA-CONF--4241)
Treatment of liquid and solid waste in the power station area, 2968
Treatment of nuclear drain wastes with an electro magnetic filter and ultrafiltration system, 2685
Treatment of low radioactive liquid waste by compounds having an enhanced affinity for the contaminants, 1271
Treatment of radioactive wastes at the Czechoslovak nuclear power station, 2981
Treatment of radioactive effluent water in nuclear power stations, 2954
Uranium sorption from aqueous solutions by biological absorbent, 788 (INIS-mf--5320)
Use of a bacteria polymer composite to concentrate plutonium from aqueous media, 1091
Use of electrocoagulation technique in waste disposal, 1355
Vitrification of highly active liquid waste. Pt. 2. The thermal decomposition of harvest feed slurries and the characterization of the product, 1093
Vitrification of transuranic and beta-gamma contaminated solid wastes, 720 (DP--1553)
Vitrification process improves product, 1018
Volume reduction system of radioactive waste by electrodialysis, 1185
Volume reduction and solidification of liquid and solid low-level radioactive waste, 1273
Volume reduction, a safer and cheaper way of radwaste management, 1274
Waste disposal for liquid scintillator 'Cocktail', solidification of the evaporated 'Cocktail', 1207
Waste inventory report for reactor and fuel-fabrication facility wastes, 901 (ONWI--20-NUS-3314)
Waste Management Activities (non-production). Quarterly report, October-December 1976, 778 (IDO--10068(77-1))
Waste management program. Technical progress report, April-June 1979, 429 (DP--79-125-2)
Waste water treatment installation, 1333
WCF feed chemistry studies, 760 (ENICO--1016)
Zero release for liquid radioactive wastes. Processing of wastes from nuclear power plants using the ACEREN evaporator, 1277

LIQUID WASTES/CHEMICAL COMPOSITION
Characterization and disposal of radioactive effluents from uranium mining, 1150

LIQUID WASTES/DRYING
Method for solidifying and disposing radioactive liquid waste (Patent), 1373

LIQUID WASTES/EMISSION SPECTROSCOPY
Spectral analysis of radioactive solutions, 540 (ZfK--367)

LIQUID WASTES/GAMMA SPECTROSCOPY
Technique of masuring deactivation efficiency of water treatment equipment in nuclear power facilities by gamma spectrometric analysis, 692 (CS-INIS--258)

LIQUID WASTES/LEVEL INDICATORS
Calibrator for level indicator of liquid waste in a storage tank (Patent), 2390

LIQUID WASTES/ORE PROCESSING
Deactivation of waste waters in the Czechoslovak Uranium Industry, 695 (CS-INIS--258)
Experience with liquid radioactive waste treatment, 696 (CS-INIS--258)

LIQUID WASTES/PWR TYPE REACTORS
Investigation of generation of liquid radioactive wastes and possibilities to reduce their volume in NPP Paks Pt. 2. Computer program for the simulation of radioactive water systems contamination, 2725 (VEIKI--15.98-041-2)

LIQUID WASTES/RADIATION MONITORING
Environmental monitoring programme tc assess and control the effects of liquid effluent discharges of low radioactivity to an inland lake, 3482

LIQUID WASTES/RADIOACTIVE WASTE DISPOSAL
Facility for liquid wastes and aqueous radioactive wastes of an α, β, γ-laboratory, 2098 (ZfK--340)
Monitoring for the dispersion of discharged tritium in sea-water around the Tokai-Mura fuel reprocessing plant, 2280
Studies on the dispersion of low-level liquid effluent released from the fuel reprocessing plant into the sea, 1726 (PNCT--841-78-69)

LIQUID WASTES/RADIOACTIVE WASTE MANAGEMENT
Practical guidelines for radioactive waste management, 576
Study of alternative methods for the management of liquid scintillation counting wastes, 479 (NUREG--0656)
Technical and economic estimations of liquid wastes localization conformably to the Leningrad nuclear power plant, 458 (INIS-mf--5571)

LIQUID WASTES/RADIOACTIVE WASTE PROCESSING
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions. Report of investigations, 920 (PB--80-122740)
Advanced biological treatment of aqueous effluent from the nuclear fuel cycle, 1435 (CONF-800334--3)
Apparatus for extreme evaporation of special solutions, 1015
Bidentate organophosphorus solvent extraction process for actinide recovery and partition, 1085
Device to draw off one or several phases (Patent), 1172
Disposal of liquid radioactive wastes from nuclear power plants, 697 (CS-INIS--258)
Liquid effluent treatment in nuclear power plants with light water reactors, 1107
Method and apparatus for processing liquid sodium wastes (Patent), 1087
Method and equipment to solidify pumpable radioactive wastes in a waste container (Patent), 1097
Method and device for controlling the radioactive liquid wastes processing systems (Patent), 1133
Method and equipment to extract and recover tritium from light and heavy water (FRG patent), 1063
Method and apparatus for processing radioactive laundry waste (Patent), 1098
Method and device for removing volatile components in radioactive liquid wastes (Patent), 1138
Method for solidifying liquid radioactive wastes (Patent) 1109
Method of processing radioactive wastes (Patent), 1171
Method of cement-solidification of radioactive liquid wastes containing surfactant (Patent), 1175
Method of processing radioactive wastes (Patent), 1125
Method of processing radioactive liquid wastes (Patent), 1132
Method of processing radioactive wastes (Patent), 1101
Method of processing organic materials containing radioactive elements (Patent), 1137
Ozonation of Hanford nuclear defense waste, 985 (RHO-SA--98)
Possible treatment of radioactive waters from the uranium mine Hamr u Ceske Lipy, 698 (CS-INIS--258)
Problems of deactivating liquid effluents from nuclear facilities, 693 (CS-INIS--258)
Process and plant improvements in the management of radioactive effluents (Trombay), 605
Process for disposal of aqueous solutions containing radioactive isotopes (Patent), 2141
Process for solidiying nuclear materials (Patent), 1126
Processing radioactive wastes from nuclear power plants in Czechoslovakia, 1369
Processing of high level radioactive wastes by a solidification technique, 1094
Removal of tritiated species from gas streams comprised thereof, 1320
Study on decontamination of radioactive ruthenium by steel wool in waste solution, 1151
Use of electrocoagulation technique in waste disposal, 1355
Vitrification of highly active liquid waste. Pt. 2. The thermal decomposition of harvest feed slurries and the characterization of the product, 1093
Waste management program. Technical progress report, April-June 1979, 429 (DP--79-125-2)

LIQUID WASTES/RADIOACTIVE WASTE STORAGE
Method for retention of tritium released during reprocessing spent nuclear fuel and storing the liquid radioactive waste produced thereby, 1311
Scientific basis for, and experience with, underground storage of liquid radioactive wastes in the USSR, 2258

LIQUID WASTES/RADIOACTIVITY
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)

LIQUID WASTES/SCINTILLATION COUNTING
Study of alternative methods for the management of liquid scintillation counting wastes, 479 (NUREG--0656)

LIQUID WASTES/SOLIDIFICATION
Method of cement-solidification of radioactive liquid wastes containing surfactant (Patent), 1175

LIQUID WASTES/URANIUM MINES
Characterization and disposal of radioactive effluents from uranium mining, 1150

LIQUID WASTES/WWER TYPE REACTORS
Radionuclides from nuclear power facilities operation in hydrosphere, 2719 (CS-INIS--258)

LIQUIDS/GAMMA DETECTION
Designing instruments for measuring activity of liquids,

3652
LIQUIDS/MONITORING
Detection of free liquid in drums of radioactive waste (Patent application), 2631
LIQUIDS/VAPOR CONDENSATION
Gas-absorption process (DOE patent), 1287
LIXIVIATION
See LEACHING
LMFBR TYPE REACTORS
See also BOR-60 REACTOR
CLINCH RIVER BREEDER REACTOR
EBR-2 REACTOR
SNR-1 REACTOR
LMFBR TYPE REACTORS/ENVIRONMENTAL IMPACTS
Recommendations concerning models and parameters best suited to breeder reactor environmental radiological assessments, 2939 (ORNL--5529)
LMFBR TYPE REACTORS/FUEL CYCLE
Actinide partitioning-transmutation program final report. IV. Miscellaneous aspects (Transport; fuel fabrication; decay; policy; economics), 66 (ORNL/TM--6984)
Interconnection between fuel reprocessing and radioactive waste treatment, 60 (INIS-mf--5569)
Part 5. Fuel cycle options, 2835 (ANL--80-40)
Part 6. Internationalization and collocation of FBR fuel cycle facilities, 2836 (ANL--80-40)
LMFBR TYPE REACTORS/PRIMARY COOLANT CIRCUITS
Measurement of tritium and tritiated water vapour in nuclear power installations. I. Tritium formation and transport in nuclear power installations, 2751
LMFBR TYPE REACTORS/REACTOR CORE DISRUPTION
Reactor safety. Annual technical progress report, Government fiscal year 1979, 3034 (ESG-DOE--13294)
LMFBR TYPE REACTORS/REACTOR FUELING
Fuel transporting device (Patent), 2797
LMFBR TYPE REACTORS/REACTOR KINETICS
Reactor application of actinide cross section data, 2791 (BNL--50991)
LMFBR TYPE REACTORS/REACTOR SAFETY
Nuclear reactor safety, 3060
Reactor safety. Annual technical progress report, Government fiscal year 1979, 3034 (ESG-DOE--13294)
LMFBR TYPE REACTORS/RISK ASSESSMENT
Recommendations concerning models and parameters best suited to breeder reactor environmental radiological assessments, 2939 (ORNL--5529)
LMFBR TYPE REACTORS/SPENT FUEL CASKS
Assessment of LMFBR spent fuel shipping cask concepts for the CRBRP and the US conceptual design study, 262 (SAND--80-0085C)
Thermal evaluation facility for LMFBR spent fuel transport, 2793 (SAND--79-1366)
LMFBR TYPE REACTORS/SPENT FUEL ELEMENTS
Considerations for designing a spent-fuel shipping system for commercial LMFBR plants, 3606 (GEFR-SP--204)
LOADING (REACTOR)
See REACTOR FUELING
LOFT REACTOR/OFFGAS SYSTEMS
Radioactive gas and hydrogen removal after a LOCE at the LOFT Facility, 3004 (CONF-800607--20)
LOFT REACTOR/RADIOACTIVE EFFLUENTS
Offsite exposure from rupture waste gas decay tank, 3007 (EGG/LTR--112-7)
LOFT REACTOR/RADIOACTIVE WASTE FACILITIES
Offsite exposure from rupture waste gas decay tank, 3007 (EGG/LTR--112-7)
LOFT REACTOR/RADIOACTIVE WASTE PROCESSING
Radioactive gas and hydrogen removal after a LOCE at the LOFT Facility, 3004 (CONF-800607--20)
LOSS OF COOLANT/FISSION PRODUCT RELEASE
Radioactive release following a LOCA with an initially breached containment (PWR;BWR), 3071
LOSS OF FLUID TEST REACTOR
See LOFT REACTOR
LOUISIANA/ACOUSTIC MONITORING
Monitoring current rates of salt dome movement, 2397
LOUISIANA/SALT DEPOSITS
Potential of Gulf Coast salt domes for isolation of radioactive wastes, 2395
Times and rates of salt movement in North Louisiana, 2396
LOUISIANA/SEISMIC DETECTION
Monitoring current rates of salt dome movement, 2397
LOVIISA-1 REACTOR/RADIOACTIVE WASTES
Some aspects of design, construction and operation in order to minimize the build-up of radioactive waste - Reflections and experience from Loviisa 1 NPS, 2746
LOW DOSE IRRADIATION/BIOLOGICAL EFFECTS
Nuclear power and the environment, 3655
LOW DOSE IRRADIATION/MUTAGENESIS
Genetic risks from radiation: recent assessments by the BEIR and UNSCEAR Committees and suggestions as to how future research can improve such estimates, 3597 (CONF-790977--1)
LOW-LEVEL RADIOACTIVE WASTES
A survey of packaging for solidified low-level radioactive waste. Technical note, 1704 (PB--295038)
ALMA - Transport container: mechanical impact by accidents; conceptual design, 521 (PRAV--1-21)
ALMA. Calculations of diffusion and radiation doses in connection with final storage of radioactive wastes, 2017 (STUDSVIK-K2--78/20)
Assessment of radon progeny inhalation exposure from low-level wastes of phosphate mining in Florida, 3395 (PB--296947)
Available methods of solidification for low-level radioactive wastes in the United States. Technical note, 924 (PB--296164)
Behavior of radioactive wastes incorporated in concrete and stored on open-air bed at CAMEN, 2115 (PNL-TR--408)
Benefit-cost analysis for the commercial disposal of low-level radioactive solid wastes, 2195
Burial of small quantities of radionuclides without prior NRC approval, 1721 (PB--296947)
Calculations on heat generation and temperature rise during storage and solidification of MLW/LLW in large capacity caverns. Reference systems A and B of the in-situ-project, 1544 (KFK--2857)
Canadian Development Program for conditioning CANDU reactor wastes for disposal, 607 (AECL--6344)
Cesium-137 in coots (Fulica americana) on Hanford waste ponds: contribution to population dose and offsite transport estimates, 3614 (PB--296947)
Chemical migration of radionuclides in soil, 3350
Chemical treatments of soil to decrease radiostrontium leachability, 1436 (CONF-800416--1)
Cleaning of stack gases from combustion of low level radioactive waste in Studsvik, Sweden, 1006 (STUDSVIK/K1/4--79/31)
Collect and treatment of radioactive wastes in low activity laboratories, 626 (CEA-CONF--4677)
Collection and disposal of low level waste at an educational institution, 1712 (PB--296947)
Collection and handling of radioactive wastes from a large university, 1713 (PB--296947)
Combustible radioactive waste treatment by incineration and chemical digestion, 777 (HEDL-SA--2064)
Combustion of waste in a 60-liter drum. Status report, March 1978, 1076 (MLM--2663(TR))
Combustion of ion-exchange materials in fluidized bed. Final report, 965 (PRAV--1.32)
Commercial Cyclone Incinerator Demonstration Program: April-September 1979, 886 (MLM--2667)
Commercial nuclear reactors and waste: the current status, 517 (PNL--3317-1)
Commercial cyclone incinerator demonstration program: October 1979-March 1980, 895 (MLM--2731)
Commercial cyclone incinerator demonstration program: October 1979-March 1980, 892 (MLM--2713)
Community's R and D programme on radioactive waste management and storage. 1977 2. annual progress report, 1480 (EUR--6128)
Comparison of bitumen and cement immobilization of intermediate- and low-level radioactive waste, 957 (PNL-SA--7499)
Comparison of alternatives for low-level radioactive waste disposal, 1719 (PB--296947)
Concept for the treatment and disposal of radioactive wastes in the German Entsorgungszentrum, 401 (CONF-790420--)
Contribution to the treatment of low level radioactive waste solutions from the fabrication or refabrication of nuclear fuel containing ammonium nitrate, 860 (Juel--1593)
Control and monitoring system of radioactive effluents in radioisotope facilities, 2328
Control of radionuclide migration in soil by the application of dc electric current, 1429 (CONF-791112--28)
Decommissioning standards: the radioactive waste impact, 1722 (PB--296947)
Decommissioning of commercial shallow-land burial sites, 958 (PNL-SA--8014)
Department of Energy low-level waste management strategy, 416 (CONF-800607--27)
Desactivation of liquid radioactive wastes of low and medium activity, 1507 (INIS-mf--5570)
Development of methods for solidification of radioactive concentrates, 833 (INIS-mf--5571)
Development of educational modules for safeguards and nuclear waste management, 2638
Development of a laundry waste treatment system for nuclear power plants, 1335
Development of criteria and standards for management of low-level radioactive waste, 442 (EGG-WM--5233)
Device for processing radioactive liquid waste, 1372
Disposal of radioactive wastes by vitrification, 1167
Disposal of radioactive wastes, 409 (CONF-791185--2)
Disposal of low-level radioactive waste into the sea, 2224
DOE's low-level waste management program, 1710 (PB--296947)
Dosimetric and risk/benefit implications of Am-241 in smoke detectors disposed of in normal wastes, 3613 (PB--296947)
Dow process for the solidification of low-level radioactive wastes from nuclear power plants, 2976
Effects of chronic low-level irradiation on Gambusia affinis, 3465 (CONF-790562--2)
Environmental monitoring and disposal of radioactive waste fron naval nuclear vessels and support facilities in 1978, 2175
Environmental monitoring programme to assess and control the effects of liquid effluent discharges of low radioactivity to an inland lake, 3482
Evaluation of isotope migration, land burial. Water

chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
Evaluation of the Low-Level Waste Treatment Plant at Oak Ridge National Laboratory, and suggested changes in the design and operation, 904 (ORNL--5618)
Evaluation of isotope migration: land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Quarterly progress report, October-December 1979, 1613 (NUREG/CR--1325)
Evaluation of alternatives for low-level waste disposal, 2295
Evaluation of large caverns for in-situ solidification and final storage of MAW and LAW with regard to the heat build-up in the waste product, 551
Evolution of low level radwaste solidification systems in the USA, 1017
Flux of certain radionuclides in the blood-clam Anadara granosa Linnaeus under environmental conditions, 3493
General investigation of radionuclide retention in migration pathways at the West Valley, New York low-level burial site. Annual report, September 1, 1977-September 30, 1978, 1604 (MUREG/CR--0794)
Generic waste management concepts for six LWR fuel cycles, 617 (ANL/EIS--11)
Geology of the Separation Areas, Hanford site, South-Central Washington, 1875 (RHO-ST--23)
Geomorphic and erosion studies at the Western New York Nuclear Service Center, West Valley, New York, 1605 (NUREG/CR--0795)
Health and safety implication of a widespread, unauthorized dispersal of radioactive waste in the public domain, 2629 (PB--296947)
Health physics considerations in accelerator decommissioning and disposal, 1725 (PB--296947)

MAGNESIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
MAGNESIUM ALLOYS/CORROSION PRODUCTS
Treatment of irradiated nuclear fuel material (Patent), 2882
MAGNESIUM ALLOYS/CORROSION RESISTANCE
Corrosion resistance of magnesium-beryllium alloys in potassium bichromate and carbon dioxide aqueous solutions at different temperatures and pressures, 3684
MAGNOX TYPE REACTORS
See also BRADWELL REACTOR
TRAWSFYNYDD REACTOR
WYLFA REACTOR
MAGNOX TYPE REACTORS/RADIATION PROTECTION
Neutron induced activation, waste disposal and radiation levels for the reactor island structure of a decommissioned Magnox power station, 3078
MAGNOX TYPE REACTORS/REACTOR DECOMMISSIONING
Neutron induced activation, waste disposal and radiation levels for the reactor island structure of a decommissioned Magnox power station, 3078
Radioactive inventory of a decommissioned Magnox power station structure. 1. Measurements of neutron induced activity in samples from the reactor island, 2758 (CEGB-RD/B/N--4231)
MAGNOX TYPE REACTORS/SPENT FUEL STORAGE
Encapsulation of magnox type fuel elements for extended storage in cooling ponds, 2770
MAMMALS
See also RABBITS
RODENTS
MAMMALS/BIOLOGICAL RADIATION EFFECTS
Progress report, Biology and Health Physics Division, 1 April to 30 June 1979, 3413 (AECL--6586)
MAMMALS/DOSIMETRY
Progress report, Biology and Health Physics Division, 1 April to 30 June 1979, 3413 (AECL--6586)
MAN

CHILDREN
MAN/BIOLOGICAL RADIATION EFFECTS
Activation and fission radionuclide concentrations and retention by ducks using radioactive leaching ponds, 3470 (IDO--12088)
MAN/BODY BURDEN
Assessment of effectiveness of geologic isolation systems. ARRRG and FOOD: computer programs for calculating radiation dose to man from radionuclides in the environment, 2549 (PNL--3180)
MAN/DOSE COMMITMENTS
Assessment of effectiveness of geologic isolation systems. ARRRG and FOOD: computer programs for calculating radiation dose to man from radionuclides in the environment, 2549 (PNL--3180)
Compartment model for assessing chronic radioactive releases (Use of BIODOSE program to compute biosphere transport parameters and doses to individuals and populations), 3381
MAN/DOSE RATES
Dose-rate conversion factors for external exposure to photon and electron radiation from radionuclides occurring in routine releases from nuclear fuel cycle facilities, 3251
MAN/ENVIRONMENTAL EXPOSURE PATHWAY
Compartment model for assessing chronic radioactive releases (Use of BIODOSE program to compute biosphere transport parameters and doses to individuals and populations), 3381
Radionuclide transfer in the environment and modality of man contamination, 3313
Radionuclide migration resulting from site intrusion, 3353
WATER - a mathematical model for computing population doses in a watershed due to continuous radioactive effluents into water flows, 3479 (UJV--4508-D,CH,A,E)
MAN/EXTERNAL IRRADIATION
Dose-rate conversion factors for external exposure to photons and electrons, 3193 (CONF-800607--38)
MAN/GENETIC RADIATION EFFECTS
Genetic risks from radiation: recent assessments by the BEIR and UNSCEAR Committees and suggestions as to how future research can improve such estimates, 3597 (CONF-790977--1)
MAN/RADIATION DOSES
AIRDOS-EPA: a computerized methodology for estimating environmental concentrations and dose to man from airborne releases of radionuclides, 3205 (EPA--520/1-79-009)
Computer model of long-term hazards from waste repositories, 2574
LIGA - A program to calculate the local individual gamma submersion dose due to waste air plumes of nuclear facilities, 3215 (Juel--1577)
Radiation exposure due to nuclear facilities in West Germany in 1976, 2586
Radionuclide migration resulting from site intrusion, 3353
MAN/RADIONUCLIDE KINETICS
Radionuclide migration resulting from site intrusion, 3353
MANGANESE/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
MANGANESE 54/ADSORPTION
Elimination of manganese-54 in waste water by oxine-impregnated activated charcoal, 1168
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
MANGANESE 54/DESORPTION
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
MANGANESE 54/RADIOACTIVE WASTE PROCESSING
Adsorption of radionuclides in waste water on oxine-impregnated activated charcoal. Adsorption characteristics of manganese-54 ion, 1197
MANGANESE OXIDES/SORPTIVE PROPERTIES
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
MANOMETERS
See PRESSURE GAGES
MANPOWER/ENERGY
National environmental/energy workforce assessment. Radiation programs. Final report on phase 3, 3615 (PB--298585)
MANPOWER/ENVIRONMENT
National environmental/energy workforce assessment. Radiation programs. Final report on phase 3, 3615 (PB--298585)
MANUALS
Analytical procedure and training material development at ICPP, 105
MARBLE/HYDRAULICS
Laboratory investigations on the hydraulic and thermomechanical properties of fractured crystalline rocks, 1580 (LBL--9582)
MARBLE/SORPTIVE PROPERTIES
Anion effects on the retention of selected actinides on geologic media, 1683 (ORO--4447-102)
Chemical reactions in the bedrock-groundwater system of importance for the sorption of actinides, 1433 (CONF-791112--58)
Mineral-contributed anion effects on the retention of trivalent actinides in the environment, 2192

MARBLE/THERMODYNAMIC PROPERTIES
Laboratory investigations on the hydraulic and thermomechanical properties of fractured crystalline rocks, 1580 (LBL--9582)
MARIA REACTOR/OFFGAS SYSTEMS
Investigations of radioactive iodine catching by ventilation system of the Ewa and Marila reactors, 850 (INIS-mf--5574)
MARINE DISPOSAL/BUDGETS
Subseabed Disposal Program Plan. Volume II. FY80 budget and subtask work plans, 1968 (SAND--80-0007/2)
MARINE DISPOSAL/CLOSURES
Seabed disposal project two-dimensional axisymmetric penetrometer simulations, 1937 (SAND--79-1679)
MARINE DISPOSAL/COMPARATIVE EVALUATIONS
Comparison of alternatives for low-level radioactive waste disposal, 1719 (PB--296947)
MARINE DISPOSAL/ENVIRONMENTAL EFFECTS
Radioactive waste dumping at sea: causes for concern, 2403
MARINE DISPOSAL/ENVIRONMENTAL IMPACTS
Bibliography of marine radiation ecology prepared for the Seabed Program, 1965 (SAND--79-7102)
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1949 (SAND--79-2117C)
Environmental studies data base: development and data synthesis activities of the US Subseabed Disposal Program, 2006 (SAND--80-2096C)
Subseabed Disposal Program. Annual report, January-December 1978, 1933 (SAND--79-1618/1)
Subseabed disposal program annual report, January-December 1978. Volume II. Principal investigator progress reports, 1934 (SAND--79-1618(Vol.2))
MARINE DISPOSAL/FEASIBILITY STUDIES
Strategy for assessing the technical, environmental, and engineering feasibility of subseabed disposal, 1956 (SAND--79-2245C)
MARINE DISPOSAL/LEGAL ASPECTS
Subseabed Disposal Program. Annual report, January-December 1978, 1933 (SAND--79-1618/1)
MARINE DISPOSAL/RADIATION HAZARDS
Radiological aspects of sea bed dumping in the deep oceans, 1798 (PNL-SA--8011)
MARINE DISPOSAL/RECOMMENDATIONS
Guidelines for sea dumping packages of radioactive waste, 2228
MARINE DISPOSAL/RESEARCH PROGRAMS
Subseabed disposal program annual report, January-December 1978. Volume II. Principal investigator progress reports, 1934 (SAND--79-1618(Vol.2))
MARINE DISPOSAL/SITE SELECTION
Subseabed disposal program annual report, January-December 1978. Volume II. Principal investigator progress reports, 1934 (SAND--79-1618(Vol.2))
MARINE ECOSYSTEMS
See AQUATIC ECOSYSTEMS
MARINE VEHICLE ACCIDENTS

MARITIME TRANSPORT/REGULATIONS
Licensing experiences, risk assessment, demonstration test on nuclear fuel packages and design criteria for sea going vessel carrying spent fuel in Japan, 148 (CONF-780506--(Vol.1))
MARITIME TRANSPORT/SAFETY
Safety evaluation on transport of fuel at sea and test program on full scale cask in Japan, 149 (CONF-780506--(Vol.1))
MARSHALL ISLANDS
See also BIKINI
ENIWETOK
MARSHALL ISLANDS/RADIATION MONITORING
Environmental protection, 3358 (BNL--51066)
MASS TRANSFER/BOUNDARY LAYERS
EFFAIR: a computer program for estimating the dispersion of atmospheric emissions from a nuclear site, 3187 (AECL--6309)
MASS TRANSFER/MATHEMATICAL MODELS
Analysis of heat and mass transfer in sub-seabed disposal of nuclear waste, 1976 (SAND--80-0312C)
MATERIAL UNACCOUNTED FOR/ACCIDENTS
Response to a widespread, unauthorized dispersal of radioactive waste in the public domain, 2628 (PB--296947)
MATERIAL UNACCOUNTED FOR/RADIATION HAZARDS
Health and safety implication of a widespread, unauthorized dispersal of radioactive waste in the public domain, 2629 (PB--296947)
MATERIALS
See also BUILDING MATERIALS
GRANULAR MATERIALS
POROUS MATERIALS
MATERIALS/MANAGEMENT
Review of the management of materials research and development in the Department of Energy. Final report, 3107 (DOE/ER--0035)
MATERIALS HANDLING/QUALITY ASSURANCE
Experience in complying with quality assurance requirements for cask lifting devices, 178 (CONF-780506--(Vol.2))
MATERIALS HANDLING/RISK ASSESSMENT
Meteorology and demography models for risk assessments of accidental atmospheric releases of nuclear waste. Phase 2 methodology, 2558 (UCID--17930)
MATERIALS RECOVERY/FEASIBILITY STUDIES
Overall assessment of actinide partitioning and transmutation for waste management purposes, 413 (CONF-800444--1)
MATERIALS TESTING/STANDARDIZATION
Materials Characterization Center workshop on leaching of radioactive waste forms. Summary report, 1756 (PNL--3318)
MATERIALS WORKING
(Covers metal and non-metal working.)
See also PRESSING
MATERIALS WORKING/EQUIPMENT
Device for radioactive wastes processing (Patent), 1374
MATHEMATICAL MODELS
See also FLOW MODELS
MATHEMATICAL MODELS/FLUID FLOW
Numerical analysis of radionuclide movement from a hypothetical nuclear waste repository (Ground-water mediated migration to river and subsequent population doses are modeled), 3450
MATHEMATICAL MODELS/MASS TRANSFER
Numerical analysis of radionuclide movement from a hypothetical nuclear waste repository (Ground-water mediated migration to river and subsequent population doses are modeled), 3450
MATHEMATICAL MODELS/RADIATION DOSES
Numerical analysis of radionuclide movement from a hypothetical nuclear waste repository (Ground-water mediated migration to river and subsequent population doses are modeled), 3450
MATRICES/COMPARATIVE EVALUATIONS
Evaluation and review of alternative waste forms for immobilization of high level radioactive wastes, 713 (DOE/TIC--11219)
MAXIMUM PERMISSIBLE INTAKE/RISK ASSESSMENT
Use of a risk limit as an environmental safety standard for radioactive waste disposal sites, 2538 (PB--296947)
MC GUIRE-1 REACTOR/FUEL RACKS
Experience with intrastation and interstation transfer of spent fuel, 2732
MC GUIRE-1 REACTOR/SPENT FUEL STORAGE
Experience with intrastation and interstation transfer of spent fuel, 2732
MC GUIRE-2 REACTOR/FUEL RACKS
Experience with intrastation and interstation transfer of spent fuel, 2732
MC GUIRE-2 REACTOR/SPENT FUEL STORAGE
Experience with intrastation and interstation transfer of spent fuel, 2732

RADIATION MONITORS
STRAIN GAGES
MEASURING INSTRUMENTS/TECHNOLOGY ASSESSMENT
New developments in measurement technology relevant to the studies of deep geological repositories in domed salt and basalt, 2069 (UCRL--52747)
MEDICAL PERSONNEL/EDUCATION
Radiation protection course for physicians. Pt. 3. Handling of unsealed radioactive sources, 3696
MEDICAL PERSONNEL/RADIATION MONITORING
Radiation hazard monitoring in ^{131}I therapy in and out clinic, 3694
MEDICAL PERSONNEL/RADIATION PROTECTION
Health physics considerations in intrainstitutional mobile nuclear medicine, 3680
Radiation protection course for physicians. Pt. 3. Handling of unsealed radioactive sources, 3696
MEDICINE
See also NUCLEAR MEDICINE
MEDICINE/MEETINGS
Nuclear wastes and traffic safety main community health concerns, 3133
MEETINGS/ACTINIDES
Actinide separations, 82
MEETINGS/DECOMMISSIONING
Decommissioning of nuclear facilities, 2812 (STI/PUB--500)
State workshops for review of the Nuclear Regulatory Commission's decommissioning policy, 2806 (NUREG/CP--0008)
MEETINGS/DECONTAMINATION
Research on deactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 4. Perfection of methods and means for averting radioactive contamination and for decontamination of equipment of nuclear power plants, research centers, and nuclear fuel reprocessing installations, 836 (INIS-mf--5573)
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 3. Burial of all types of radioactive wastes in geological formations, 835 (INIS-mf--5572)
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 1. Processing of liquid radioactive wastes of low and medium activity, 455 (INIS-mf--5570)
MEETINGS/FUEL CYCLE

Fuel cycles for the 80's, 40 (CONF-800943--(Summ.))
MEETINGS/GOVERNMENT POLICIES
Decommissioning of nuclear facilities. Report on the international symposium held in Vienna from 13 to 17 November 1978, 573
MEETINGS/MEDICINE
Nuclear wastes and traffic safety main community health concerns, 3133
MEETINGS/MILL TAILINGS
Management, stabilization, and environmental impact of uranium mill tailings, 601
MEETINGS/NUCLEAR INDUSTRY
Reflections on Nuclex '78 (Brief review), 3143
MEETINGS/NUCLEAR MATERIALS MANAGEMENT
Proceedings of 20th annual meeting of Institute of Nuclear Materials Management, 1979, 2640
MEETINGS/RADIATION PROTECTION
Low-level radioactive waste management, 501 (PB--296947)
Ninth annual national conference on radiation control, 3605 (FDA--78-8054)
MEETINGS/RADIOACTIVE WASTE DISPOSAL
Proceedings of the fourth annual Seabed Working Group Meeting, Albuquerque, New Mexico USA, March 5-7, 1979, 1919 (SAND--79-1156)
Proceedings of the Task 4 Waste Isolation Safety Assessment Program second contractor information meeting, 1767 (PNL-SA--7352(Vol.1))
Proceedings of the Task 4 Waste Isolation Safety Assessment Program second contractor information meeting, 1773 (PNL-SA--7352(Vol.2))
Proceedings of the workshop on the use of argillaceous materials for the isolation of radioactive waste, 2121
MEETINGS/RADIOACTIVE WASTE MANAGEMENT
Ceramics in nuclear waste management, 382 (CONF-790420--)
Consultation and concurrence: workshop proceedings, September 23-26, 1979, the Orcas meeting, Eastsound, Washington (State-federal relations), 487 (ONWI--87)
Management, stabilization, and environmental impact of uranium mill tailings, 601
Management of radioactive wastes in Canada. Proceedings of a symposium, 590
Proceedings of the Task 2 workshop Waste Isolation Safety Assessment Program, 1782 (PNL-SA--7992)
Proceedings of the symposium on the on-site management of power reactor wastes. Zurich, 26-30 March 1979, 2905
Scientific basis for nuclear waste management, 1222
MEETINGS/RADIOACTIVE WASTE PROCESSING
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 1. Processing of liquid radioactive wastes of low and medium activity, 455 (INIS-mf--5570)
MEETINGS/RADIOACTIVE WASTE STORAGE
Proceedings of the National Waste Terminal Storage Program information meeting, 902 (ONWI--62)
Proceedings of 20th annual meeting of Institute of Nuclear Materials Management, 1979, 2640
Waste isolation performance assessment and in-situ testing, 1638 (ONWI--88)
MEETINGS/RADIOACTIVE WASTES
Research on deactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 5. Investigations on methods and means for removal of radioactive aerosols and gases from air discharges, 3416 (INIS-mf--5574)
MEETINGS/RADIONUCLIDE MIGRATION
Migration of long-lived radionuclides in the geosphere. Proceedings, 2299
Waste Isolation Safety Assessment Program. Task 4. Third Contractor Information Meeting (Adsorption-desorption on geological media), 2462 (PNL-SA--8571(Vol.2))
MEETINGS/REACTOR DECOMMISSIONING
State workshops for review of the Nuclear Regulatory Commission's decommissioning policy, 2806 (NUREG/CP--0008)
MEETINGS/REPROCESSING
Fuel cycles for the 80's, 40 (CONF-800943--(Summ.))
MEETINGS/SPENT FUEL STORAGE
Fuel cycles for the 80's, 40 (CONF-800943--(Summ.))
Storage of spent fuel elements, 2772
MELTDOWN/FISSION PRODUCT RELEASE
Natural removal of particulate radioactivity in an LWR-containment during core meltdown accidents, 3028 (CONF-800403--(Vol.2))
MELTDOWN/RADIOACTIVE AEROSOLS
Natural removal of particulate radioactivity in an LWR-containment during core meltdown accidents, 3028 (CONF-800403--(Vol.2))
MELTDOWN/RADIOACTIVE EFFLUENTS
Liquid pathways generic studies; results, interpretation, and design implications (PWR; BWR), 3027 (CONF-800403--(Vol.2))
MELTDOWN/RADIOACTIVITY TRANSPORT
Liquid pathways generic studies; results, interpretation, and design implications (PWR; BWR), 3027 (CONF-800403--(Vol.2))
MERCURY/ACTIVATION ANALYSIS
Trace elements retained in washed nuclear fuel reprocessing solvents, 43 (DP--1527)
MERCURY COMPOUNDS/ENVIRONMENTAL TRANSPORT
Earth sciences, 3183 (ORNL--5620)
METAL INDUSTRY/LOWLEVEL RADIOACTIVE WASTES
Low-level radioactive waste from rare metals processing facilities, 1709 (PB--296947)

METALS

METALS/CHEMICAL REACTIONS
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
METALS/CORROSION
On board corrosion analysis of a recovered nuclear waste container. Technical note, 3616 (PB--301163)
METALS/DECONTAMINATION
Basic electrolyte for low-level decontamination, 1256
Chemical decontamination of metals (Inorganic reduction-oxidation system in nitric acid to chemically dissolve the metal surface layer), 1258
Electrodecontamination using a basic electrolyte, 1257
Melting metal waste for volume reduction and decontamination, 680 (CONF-800802--11)
Processing of waste solutions from electrochemical decontamination, 932 (PNL--2786)
Volume reduction of contaminated metal waste (Sorting, size reduction, drip melting, induction melting), 674 (CONF-800313--2)
METALS/RADAR
Impulse radar scanning of intact salt at the Avery Island Mine, 1989 (SAND--80-0632)
METALS/WEATHERING
Durability of metals from archaeological objects, metal meteorites, and native metals, 3516 (PNL--3198)
METAMORPHIC ROCKS
See also MARBLE
QUARTZITES
SHALES
METAMORPHIC ROCKS/FRACTURES
Comparison of laboratory, in situ, and rock mass measurements of the hydraulic conductivity of metamorphic rock at the Savannah River Plant near Aiken, South Carolina, 1472 (DP-MS--80-7)
Determination of the location of fractures in metamorphic rock with in-hole tracers, 3575
METAMORPHIC ROCKS/GEOLOGIC DEPOSITS
Geohydrologic investigations of buried metamorphic rock and mudstone for the storage of radioactive waste, 3537
METAMORPHIC ROCKS/HYDROLOGY
Geohydrologic investigations of buried metamorphic rock and mudstone for the storage of radioactive waste, 3537
Hydrology of buried crystalline rock at Savannah River Plant near Aiken, South Carolina, 1461 (DOE/SR-WM--79-2)
METAMORPHIC ROCKS/ROCK MECHANICS
Comparison of laboratory, in situ, and rock mass measurements of the hydraulic conductivity of metamorphic rock at the Savannah River Plant near Aiken, South Carolina, 1472 (DP-MS--80-7)
METAMORPHIC ROCKS/SORPTIVE PROPERTIES
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
METAMORPHIC ROCKS/UNDERGROUND DISPOSAL
Geohydrologic investigations of buried metamorphic rock and mudstone for the storage of radioactive waste, 3537
METEORITES/CRATERS
Long-term meteorite hazards to buried nuclear waste. Report 2, 2546 (PNL--2851)
METEORITES/WEATHERING
Durability of metals from archaeological objects, metal meteorites, and native metals, 3516 (PNL--3198)
METEOROLOGY/DATA ACQUISITION SYSTEMS
Real time quality control of meteorological data used in SRP's emergency response system, 3197 (DP--1551)
METHANE/BIOSYNTHESIS
Effect of gamma radiation on yields of methane gas from the anaerobic bacterial digestion of sewage sludge, 1348
METHYL IODIDE/ADSORPTION
Desorption kinetics of methyl iodide from impregnated charcoal, 1025
Investigation of methyl iodide adsorption on impregnated alumina, 1051
Methyl iodide and molecular iodine adsorption on impregnated activated charcoal, 1050
Organic iodine removal from simulated dissolver off-gas streams using silver-exchanged mordenite, 685 (CONF-801038--1(Draft))
Removal of radioiodine species from gaseous stream on inorganic absorbents. Final report for the period 1 November 1976 - 31 October 1977, 49 (IAEA-R--1841-F)
METHYL IODIDE/DESORPTION
Desorption kinetics of methyl iodide from impregnated charcoal, 1025
METHYL IODIDE/DIFFUSION
Diffusion coefficients of airborne radioactive iodine and methyl iodide, 3288
METHYL IODIDE/REMOVAL
Collection efficiency of TEDA-impregnated actived charcoal for low concentration of methyl iodide in air, 857 (JAERI-M--8158)
MEXICO/RADIOACTIVE WASTE MANAGEMENT
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)
MICA
See also BIOTITE

MICA/SORPTIVE PROPERTIES
Sorption of americium on major rock-forming minerals, 2191
MICE/BIOLOGICAL RADIATION EFFECTS
Systemic effects of radiation exposure on rodents inhabiting liquid and solid radioactive waste storage areas, 3473 (IDO--12088)
MICE/POPULATION DYNAMICS
Species composition and local movement of small mammals on the Radioactive Waste Management Complex, Idaho National Engineering Laboratory Site, 3366 (IDO--12088)
MICE/THERMOLUMINESCENT DOSIMETRY
Radiation dosimetry of small mammals inhabiting a liquid radioactive waste disposal area, 3363 (IDO--12088)
Radiation doses to small mammals at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3364 (IDO--12088)
MICHIGAN/ECOLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
MICHIGAN/GEOLOGICAL SURVEYS
Preliminary regional study of the present and possible future oil and gas development in the areas of thick rock salt and shale deposits of Michigan, Ohio, Pennsylvania, and western New York as of December 1975, 1667 (ORNL/SUB--75/87989)
MICHIGAN/GEOLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
MICHIGAN/HYDROLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
MICHIGAN/METEOROLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
MICHIGAN/PETROLEUM GEOLOGY
Preliminary regional study of the present and possible future oil and gas development in the areas of thick rock salt and shale deposits of Michigan, Ohio, Pennsylvania, and western New York as of December 1975, 1667 (ORNL/SUB--75/87989)
MICHIGAN/SOCIO-ECONOMIC FACTORS
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
MICROBIAL FLORA
See MICROORGANISMS
MICROCLINE/SORPTIVE PROPERTIES
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Chemical reactions in the bedrock-groundwater system of importance for the sorption of actinides, 1433 (CONF-791112--58)
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
MICROFLORA
See MICROORGANISMS
MICROORGANISMS/BIOLOGICAL RADIATION EFFECTS
Biological denitrification of high-nitrates wastes generated in the nuclear industry, 414 (CONF-800447--1)
MICROORGANISMS/GROWTH
Potential microbial impact on transuranic wastes under conditions expected in the Waste Isolation Pilot Plant (WIPP). Annual report, October 1, 1978-September 30, 1979, 1555 (LA--8297-PR)
MICROORGANISMS/RADIOSENSITIVITY
Potential microbial impact on transuranic wastes under conditions expected in the Waste Isolation Pilot Plant (WIPP). Annual report, October 1, 1978-September 30, 1979, 1555 (LA--8297-PR)
MIDWEST FUEL RECOVERY PLANT/SPENT FUEL STORAGE
Alternative concepts for spent fuel storage basin expansion at Morris Operation, 1598 (NEDG--24749)
Commentary on spent fuel storage at Morris operation, 227 (NUREG/CR--0956)
MIDWEST REGION
See also IOWA
MIDWEST REGION/GEOLOGICAL SURVEYS
Precipitation and lake-level changes in the West and Midwest over the past 10,000 to 24,000 years. Final report, 2044 (UCRL--15173)
MIHAMA-1 REACTOR/FUEL ELEMENT FAILURE
Recovery of broken fuel pin and the investigation on the safety of re-operation of the Mihama Unit 1 plant, Kansai Electric Power Co., 2750
MILITARY PERSONNEL/RADIATION PROTECTION
The U.S. Army Radon Team: organization, capabilities and resources. Final report, 3589 (AD-A--076168)
MILK/RADIATION MONITORING
Measurement of environmental radioactivity. Ispra 1977, 3207 (EUR--6180)
MILK/RADIOACTIVITY
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
MILL TAILINGS
See also ORE PROCESSING
Engineering evaluation of the decommissioning of former uranium ore processing facilities, 22
MILL TAILINGS/AERIAL MONITORING
Aerial radiation surveys, 3201 (EGG--1183-1759)
MILL TAILINGS/DECONTAMINATION
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions, 2413 (BM-RI--8396)
Decontamination of Elliot Lake uranium tailings, 1104
MILL TAILINGS/ENVIRONMENTAL IMPACTS
Management, stabilisation and environmental impact of uranium mill tailings, 3357
Review of the environmental problems associated with the disposal of uranium tailings, 2178
MILL TAILINGS/FORECASTING
Assumptions and ground rules used in nuclear waste projections and source term data, 1626 (ONWI--24)
MILL TAILINGS/GEOCHEMISTRY
Pollution of ground water due to inactive uranium mill tailings. Summary of progress, October 1, 1979-September 30, 1981, 3316 (DOE/ET/44206--1)
MILL TAILINGS/INVENTORIES
Graphical determination of the radionuclide inventory in the concentrate and tailings from processing facilities (^{232}Th, ^{238}U, and ^{235}U decay series members) 18 (ORNL/TM--6488)
Spent fuel and waste inventories and projections, 495 (ORO--778)
MILL TAILINGS/LAND RECLAMATION
Radioecological investigations of uranium mill tailings systems. Progress report, September 1, 1979-September 30, 1980, 3361 (DOE/EV/10305--1)
MILL TAILINGS/LEACHING
Rate controlling processes in the release of radium-226 from uranium mill tailings--2. kinetic study, 2497
Rate controlling processes in the release of radium-226 from uranium mill tailings. I. Leaching study, 2498
Rate controlling processes in the release of radium-226 from uranium mill tailings. II. Kinetic study, 2499
Removal of hazardous radionuclides from uranium ore and/or mill tailings. Progress report, October 1, 1978-September 30, 1979, 913 (ORNL/TM--7065)
MILL TAILINGS/MEETINGS
Management, stabilization, and environmental impact of uranium mill tailings, 601
MILL TAILINGS/PERMEABILITY
Pollution of ground water due to inactive uranium mill tailings. Summary of progress, October 1, 1979-September 30, 1981, 3316 (DOE/ET/44206--1)
MILL TAILINGS/PHYSICAL PROPERTIES
Pollution of ground water due to inactive uranium mill tailings. Summary of progress, October 1, 1979-September 30, 1981, 3316 (DOE/ET/44206--1)
MILL TAILINGS/RADIATION DOSES
Aerial radiation surveys, 3201 (EGG--1183-1759)
Assessment of the radiological impact of the inactive uranium-mill tailings at Grand Junction, Colorado, 2536 (ORNL--5457)
MILL TAILINGS/RADIATION HAZARDS
Assessment of the radiological impact of the inactive uranium-mill tailings at Grand Junction, Colorado, 2536 (ORNL--5457)
Assessment of the radiological impact of the inactive uranium-mill tailings at Grand Junction, Colorado, 3336 (ORNL--5457)
Excess cancer incidence in Mesa County, Colorado. Final report (Lack of correlation between leukemia incidence and use of uranium mill tailings as construction materials), 2534 (NUREG/CR--0635)
Moisture effects on radon diffusion, 2510
Radon: characteristics, natural occurrence, technological enhancement, and health effects, 2598
Reduction of radon flux from uranium tailings, 2570
MILL TAILINGS/RADIATION MONITORING
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
Assessment of the radiological impact of the inactive uranium-mill tailings at Shiprock, New Mexico, 2444 (ORNL--5447)
Assessment of the radiological impact of the inactive uranium-mill tailings at Monument Valley, Arizona, 2445 (ORNL--5449)
Radiological survey of the inactive uranium-mill tailings at Tuba City, Arizona, 3331 (ORNL--5450)
Radiological survey of the inactive uranium-mill tailings at Naturita, Colorado, 3334 (ORNL--5454)
Radiological survey of the inactive uranium-mill tailings at Slick Rock, Colorado, 3229 (ORNL--5452)
Radiological survey of the inactive uranium-mill tailings at Rifle, Colorado, 3230 (ORNL--5455)
Radiological survey of the inactive uranium-mill tailings at Ambrosia Lake, New Mexico, 3231 (ORNL--5458)
Radiological survey of the inactive uranium-mill tailings at Lakeview, Oregon, 3341 (ORNL--5464)
Radiological survey of the inactive uranium-mill tailings at Falls City, Texas, 3340 (ORNL--5462)
MILL TAILINGS/RADIATION PROTECTION
Reduction of radon flux from uranium tailings, 2160
MILL TAILINGS/RADIOACTIVE WASTE DISPOSAL
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--

0060)
Cleaning up commingled uranium mill tailings: is federal assistance necessary, 921 (PB--290865)
Selecting sites for uranium mill waste disposal facilities, 2320
MILL TAILINGS/RADIOACTIVE WASTE MANAGEMENT
Economics of uranium tailings management, 2211
Issues on management, stabilization and environmental impacts of uranium mill tailings, 598
MILL TAILINGS/RADIOACTIVE WASTES
Assessment of the radiological impact of the inactive uranium-mill tailings at Grand Junction, Colorado, 3336 (ORNL--5457)
MILL TAILINGS/RADIOACTIVITY
Emanating power and diffusion of radon through uranium mill tailings, 2518
Measurement of radon diffusion and exhalation from uranium mill tailings piles, 2490
Source terms for airborne radioactivity arising from uranium mill wastes, 2519
MILL TAILINGS/RADIOCHEMICAL ANALYSIS
Asphalt emulsion sealing of uranium mill tailings, 1979 annual report, 947 (PNL--3290)
MILL TAILINGS/RADIOMETRIC SURVEYS
Assessment of the radiological impact of the inactive uranium-mill tailings at Mexican Hat, Utah, 3330 (ORNL--5448)
Radiological survey of the inactive uranium-mill tailings at Durango, Colorado, 3332 (ORNL--5451)
Radiological survey of the inactive uranium-mill tailings at Gunnison, Colorado, 3333 (ORNL--5453)
Radiological survey of the inactive uranium-mill tailings at Maybell, Colorado, 3335 (ORNL--5456)
Radiological survey of the inactive uranium-mill tailings at Green River, Utah, 3337 (ORNL--5459)
Radiological survey of the inactive uranium-mill tailings at Riverton, Wyoming, 3339 (ORNL--5461)
MILL TAILINGS/RADIONUCLIDE MIGRATION
Characterization of uranium tailings cover materials for radon flux reduction, 2439 (NUREG/CR--1081)
Measurement of radon diffusion from uranium mill tailing piles, 3307 (NUREG/CR--1109)
Measurement of radon diffusion and exhalation from uranium mill tailings piles, 2490
Methods for predicting the effectiveness of uranium mill tailings covers, 2569
MILL TAILINGS/REVEGETATION
Influence of uranium mill tailings on tree growth at Elliot Lake, 2521
MILL TAILINGS/RISK ASSESSMENT
Potential health effects of radon-222 to the general public from uranium milling, 3191 (CONF-791009--39)
MILL TAILINGS/SEPARATION PROCESSES
Wet high-intensity magnetic separation for the concentration of Witwatersrand gold-uranium ores and residues, 21
MILL TAILINGS/STABILIZATION
Asphalt emulsion sealing of uranium mill tailings. 1979 annual report, 947 (PNL--3290)
Management, stabilisation and environmental impact of uranium mill tailings, 3357
Uranium mill tailings stabilization, 960 (PNL-SA--8414)
MILL TAILINGS/STANDARDS
Sandia's activities in uranium mill tailings remedial action, 1996 (SAND--80-1319C)
MILL TAILINGS/VENTILATION BARRIERS
Development of a radon barrier, 3685
MILL TAILINGS/WASTE DISPOSAL
Ocean mining technology and environmental studies, 3407
MILL TAILINGS/WATER REMOVAL
Sludge dewatering by belt press, 15
MINE-MOUTH GENERATING PLANTS

MOLLUSCS
See also OYSTERS
MOLLUSCS/FEEDING
Biological responses of a tropical coastal ecosystem to releases from electro-nuclear installations, 3388
MOLLUSCS/RADIONUCLIDE KINETICS
Distribution of cobalt 60 in a mollusc, a crustacean and a freshwater teleost: variations as a function of the source of pollution and during elimination, 3483
MOLTEN SALT REACTORS/ISOTOPE PRODUCTION
Accelerator molten-salt breeder reactor (Patent), 2768
MOLYBDATES/MOLECULAR STRUCTURE
Polymolybdates as plutonium (IV) hosts, 550
MOLYBDENUM/ABSORPTION SPECTROSCOPY
Interlaboratory comparison of arsenic, molybdenum and selenium analyses from uranium mill tailings, 2488
MOLYBDENUM/ACTIVATION ANALYSIS
Interlaboratory comparison of arsenic, molybdenum and selenium analyses from uranium mill tailings, 2488
MOLYBDENUM/CORROSION RESISTANCE
Interactions between candidate melter electrode materals and defense waste glass melts, 989 (RHO-SA--173)
MOLYBDENUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
MOLYBDENUM/LEACHING
Measuring the hydrolytic resistance of solidification products, 2134
MOLYBDENUM/MILL TAILINGS
Interlaboratory comparison of arsenic, molybdenum, and selenium analyses from uranium mill tailings, 3411
MOLYBDENUM/QUANTITATIVE CHEMICAL ANALYSIS
Interlaboratory comparison of arsenic, molybdenum, and selenium analyses from uranium mill tailings, 3411
Interlaboratory comparison of arsenic, molybdenum and selenium analyses from uranium mill tailings, 2488
MOLYBDENUM/RECOVERY
Radioactive liquid waste processing method (Patent), 1064
MOLYBDENUM/ROOT ABSORPTION
Uptake of trace elements and radionuclides from uranium mill tailings by four-wing saltbush (Atriplex canescens) and alkali sacaton (Sporobolus airoides), 3374 (LA-UR--79-3045)
MOLYBDENUM/SOLUBILITY
Hydrothermal glass reactions in salt brine, 2268
MOLYBDENUM/SPECTROPHOTOMETRY
Interlaboratory comparison of arsenic, molybdenum and selenium analyses from uranium mill tailings, 2488
MOLYBDENUM OXIDES/PHASE STUDIES
Phase separation in the glass containing high level radioactive waste, 1152
MOLYBDENUM OXIDES/SOLUBILITY
Hydrothermal interactions of cesium and strontium phases from spent unreprocessed fuel with basalt phases and basalts, 1821 (RHO-BWI-C--70)
MONAZITES/RADIOACTIVE WASTE DISPOSAL
EPR investigations of Gd^{3+} in single crystals and powders of the zircon--structure orthophosphates fPO_4, $ScPO_4$, and $LuPO_4$, 1014

NATURAL CONVECTION
Experimental study of the steady natural convection in a horizontal annulus with irregular boundaries, 3620 (SAND--79-2354C)
NATURAL GAS/RADIATION HAZARDS
Radon: characteristics, natural occurrence, technological enhancement, and health effects, 2598
NATURAL GAS/TRANSPORT
Selected legal and regulatory concerns affecting domestic energy transportation systems, 3171 (PNL--2989)
NATURAL GAS/UNDERGROUND STORAGE
Legal problems in the utilization of salt domes, 2394
NATURAL RADIOACTIVITY
(For unspecified naturally occuring radioisotopes only; not for BACKGROUND RADIATION.)
NATURAL RADIOACTIVITY/BUILDING MATERIALS
Exposure to radiation from the natural radioactivity in building materials, 3306 (INIS-mf--5531)
NATURAL RADIOACTIVITY/RADIOECOLOGICAL CONCENTRATION
Some aspects of the accumulation of natural radionuclides in aquatic products and vegetation around a uranium complex, 3322 (INIS-mf--5372)
NECKAR REACTOR/FUEL POOLS
Application for a license for compact storage of spent fuel elements in block 1 of Philippsburg nuclear power plant and Gk Neckar nuclear power plant, 2819
NECKAR REACTOR/RADIOACTIVE WASTE PROCESSING
Technology of two-stage waste water evaporation with mixing condenser, 2957
NECKAR REACTOR/SPENT FUEL CASKS
Publication of the first amendment of the licence for the transfer of transport containers for spent fuel elements into the facilities of the Gemeinschaftskraftwerk Neckar and their handling there. May 28, 1979, 308
Publication of the Minister for Economic Affairs, Trade, and Transportation concerning the 2nd supplement on the transport of spent fuel element casks to the site of Gemeinschaftskernkraftwerk Neckar (GKN) and its handling there, 280
NECKAR REACTOR/SPENT FUEL STORAGE
Publication concerning the planned inclusion and

operation of compact storage devices for spent fuel elements in the Neckar reactor. Dated 17th July, 1979, 2728
NEODYMIUM/ADSORPTION
Nuclide transport by groundwater in Swedish bedrock, 2581
NEODYMIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
NEODYMIUM/SOLVENT EXTRACTION
Calculation of distribution ratios of rare earth elements in multistage counter current extraction with HDEHP, 3676
Radiation effects on the separation of lanthanides and transplutonides by the TALSPEAK-type extraction, 1244
NEOPRENE/BIOLOGICAL EFFECTS
Effect of soil affixants on germination, emergence, and growth of cheatgrass and Russian thistle, 3400
NEOPRENE/TOXICITY
Effect of soil affixants on germination, emergence, and growth of cheatgrass and Russian thistle, 3400
NEPTUNIUM/ADSORPTION
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Chromatographic K/sub d/ values of radionuclides and the effect of redox potentials on sorption of radionuclides by geologic media, 2459 (PNL-SA--7352(Vol.1))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1978, 1774 (PNL-SA--7352(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1979, 2468 (PNL-SA--8571(Vol.2))
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, October 1-December 31, 1979, 1552 (LA--8210-PR)
Nuclear waste chemistry, 488 (ORNL--5665)
Nuclide transport by groundwater in Swedish bedrock, 2581
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Systematic study of nuclide adsorption on selected geologic media. Annual progress report, October 1, 1978-September 17, 1979, 2463 (PNL-SA--8571(Vol.2))
Theoretical and experimental evaluation of waste transport in selected rocks, 1768 (PNL-SA--7352(Vol.1))
NEPTUNIUM/AUTORADIOGRAPHY
Autoradiographic studies of actinide sorption in groundwater systems, 3432 (CONF-800433--4)
Autoradiographic study of actinide sorption on climax stock granite, 1662 (ORNL--5617)
NEPTUNIUM/CHEMICAL PROPERTIES
Chemistry of protactinium, neptunium, americium, and curium in the nuclear fuel cycle, 24
NEPTUNIUM/CHEMISTRY
Behaviour of Np and Pu in the reprocessing of thorium-containing nuclear fuels, 31 (AED-Conf--78-274-000)
NEPTUNIUM/DESORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
NEPTUNIUM/EXTRACTION CHROMATOGRAPHY
Extraction chromatographic removal of Np and Pu during the reprocessing of spent Th-U fuel, 1022
NEPTUNIUM/FISSION PRODUCTS
Development of ultrafiltration and adsorbents: April-September 1979, 889 (MLM--2684)
NEPTUNIUM/LEACHING
Leaching of actinides and technetium from simulated high-level waste glass, 513 (PNL--3152)
NEPTUNIUM/RADIOACTIVE WASTE PROCESSING
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
Recovery of actinide values (Patent), 1124
NEPTUNIUM/SEPARATION PROCESSES
Radiochemical separation of neptunium and plutonium from leaching of reactor waste glass in brine solutions, 2073 (UCRL--82798)
NEPTUNIUM/SOLUBILITY
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, October 1-December 31, 1979, 1552 (LA--8210-PR)
NEPTUNIUM/SOLVENT EXTRACTION
Bidentate organophosphorus solvent extraction process for actinide recovery and partition, 1085
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
Recovery of actinide values (Patent), 1124
Recovery process (Patent), 562
Reducing the long-term hazard of reactor waste through actinide removal and destruction in nuclear reactors, 1024
NEPTUNIUM/SORPTION
Autoradiographic studies of actinide sorption in groundwater systems, 3432 (CONF-800433--4)
Autoradiographic study of actinide sorption on climax stock granite, 1662 (ORNL--5617)
Chemical reactions in the bedrock-groundwater system of importance for the sorption of actinides, 1433 (CONF-791112--58)
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
NEPTUNIUM 235/DISTRIBUTION
Anion effects on the retention of selected actinides on geologic media, 1683 (ORO--4447-102)
NEPTUNIUM 235/SORPTION
Anion effects on the retention of selected actinides on geologic media, 1683 (ORO--4447-102)
NEPTUNIUM 237/ENVIRONMENTAL TRANSPORT
Geologic migration potentials of technium-99 and neptunium-237, 3425
NEPTUNIUM 237/EXTRACTION CHROMATOGRAPHY
Application of extraction chromatography to the recovery of neptunium, plutonium and americium from an industrial waste, 1023
NEPTUNIUM 237/ISOTOPE PRODUCTION
Recovery of by-product actinides from power reactor fuels and production of heat source isotopes, 1046
NEPTUNIUM 237/LEACHING
Leaching characteristics of actinides from simulated reactor waste, Part 2 (Borosilicate glass), 2483 (UCRL--81147(Pt.2))
Leaching characteristics of actinides from simulated reactor waste, 2071 (UCRL--81147(Pt.2)(Rev.1))
NEPTUNIUM 237/SOLUBILITY
Geologic migration potentials of technium-99 and neptunium-237, 3425
NEPTUNIUM COMPOUNDS/CHEMICAL REACTION KINETICS
Study of some saltless reducers of plutonium and neptunium, 52 (INIS-mf--5564)
Vanadium(5) as oxidant of neptunium and plutonium, 53 (INIS-mf--5564)
NEPTUNIUM COMPOUNDS/OXIDATION
Vanadium(5) as oxidant of neptunium and plutonium, 53 (INIS-mf--5564)
NEPTUNIUM COMPOUNDS/REDUCTION
Study of some saltless reducers of plutonium and neptunium, 52 (INIS-mf--5564)
NEPTUNIUM ISOTOPES/ENVIRONMENTAL TRANSPORT
Chemical migration of radionuclides in soil, 3350
NEPTUNIUM ISOTOPES/LEACHING
Chemical migration of radionuclides in soil, 3350
NEPTUNIUM ISOTOPES/MIGRATION
Chemical migration of radionuclides in soil, 3350
NETHERLANDS/ENERGY ANALYSIS
Annual report 1978, 3094 (INIS-mf--5244)
NETHERLANDS/FOSSIL-FUEL POWER PLANTS
Summary of 'The costs of energy from coal' and 'Costs of nuclear power in the Netherlands', 2827 (INIS-mf--5131)

NETHERLANDS/NUCLEAR POWER PLANTS
Summary of 'The costs of energy from coal' and 'Costs of nuclear power in the Netherlands', 2827 (INIS-mf--5131)
NETHERLANDS/RADIOACTIVE WASTE MANAGEMENT
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)
NETWORK ANALYSIS
Utilization of probabilistic network analyses in planning long-range engineering projects, 220 (K/OP--268)
NEUTRON ABSORBERS/FABRICATION
Method for manufacture of neutron absorbing articles (Patent), 3624
NEUTRON ABSORBERS/PHYSICAL RADIATION EFFECTS
Behavior of B_4C materials in spent-fuel storage pools, 2854
NEUTRON DETECTORS
See also BF3 COUNTERS
NEUTRON DETECTORS/COUNTING RATES
Theoretical comparison of the enhanced variance and twin-gate methods for monitoring plutonium in waste, 3635
NEUTRON TRANSPORT/COMPUTER CODES
Calculation of gamma-rays and fast neutrons fluxes with the program Mercure-4, 3591 (CEA-CONF--4493)
NEUTRON-NEUTRON LOGGING/DELAYED NEUTRON ANALYSIS
Borehole assay for plutonium using delayed-neutron activation analysis, 3303
NEUTRONS/MONITORING
Environmental monitoring report for calendar year 1979, 3415 (FERMILAB--80/29)
NEVADA/GEOLOGICAL SURVEYS

Precipitation and lake-level changes in the West and Midwest over the past 10,000 to 24,000 years. Final report, 2044 (UCRL--15173)
NEVADA/GEOMORPHOLOGY
Assessment of effectiveness of geologic isolation systems. Geologic factors in the isolation of nuclear waste: evaluation of long-term geomorphic processes and catastrophic events, 1734 (PNL--2854)
NEVADA/TECTONICS
Evidence and theory for the prediction of tectonic activity in the Basin and Range Province of Nevada and Utah for the next one million years, 3538 (PNL--2851)
NEVADA TEST SITE
Preliminary geologic and geophysical data of the UE25a-3 exploratory drill hole, Nevada Test Site, Nevada, 2087 (USGS--1543-6)
NEVADA TEST SITE/BOREHOLES
Geohydrology of hole UE-17a, Syncline Ridge area, Nevada Test Site, 2086 (USGS--1543-4)
NEVADA TEST SITE/ELECTRICAL SURVEYS
Nevada nuclear waste storage investigations. Quarterly report, April - June 1980, 1620 (NVO--196-19)
NEVADA TEST SITE/GEOLOGICAL SURVEYS
Resistivity sounding investigation by the Schlumberger method in the Syncline Ridge area, Nevada Test Site, Nevada, 2092 (USGS-OFR--80-466)
NEVADA TEST SITE/GEOLOGY
Nevada nuclear waste storage investigations. Quarterly report, April - June 1980, 1620 (NVO--196-19)
NEVADA TEST SITE/GEOPHYSICAL SURVEYS
Interpretation of geophysical well-log measurements in drill hole UE25a-1, Nevada Test Site, Radioactive Waste Program, 2094 (USGS-OFR--80-941)
Preliminary interpretations of geologic results obtained from boreholes UE25a-4, -5, -6, and -7, Yucca Mountain, Nevada Test Site, 2093 (USGS-OFR--80-929)
NEVADA TEST SITE/HYDROLOGY
Sensitivity study on the parameters of the regional hydrology model for the Nevada nuclear waste storage investigations, 1920 (SAND--79-1197C)
NEVADA TEST SITE/NUCLEAR EXPLOSIONS
Bibliography of reports by US Geological Survey personnel pertaining to underground nuclear testing and radioactive waste disposal at the Nevada Test Site, and radioactive waste disposal at the WIPP Site, New Mexico, January 1, 1979-December 31, 1979, 539 (USGS-OFR--80-817)
NEVADA TEST SITE/RADIOACTIVE WASTE DISPOSAL
Nevada nuclear waste storage investigations. Quarterly report, April - June 1980, 1620 (NVO--196-19)
NEVADA TEST SITE/RADIOACTIVE WASTE FACILITIES
Nevada nuclear waste storage investigations: FY 1980 Project Plan and FY 1981 forecast, 1616 (NVO--196-13)
NEVADA TEST SITE/RADIOACTIVE WASTE MANAGEMENT
Area 5 Radioactive Waste Management Site Safety Assessment Document, 422 (DOE/NV/00410--54)
Bibliography of reports by US Geological Survey personnel pertaining to underground nuclear testing and radioactive waste disposal at the Nevada Test Site, and radioactive waste disposal at the WIPP Site, New Mexico, January 1, 1979-December 31, 1979, 539 (USGS-OFR--80-817)
Operational Radioactive Waste Management Plan for the Nevada Test Site, 484 (NVO--185(Rev.1))
NEVADA TEST SITE/RESISTIVITY LOGGING
Resistivity sounding investigation by the Schlumberger method in the Syncline Ridge area, Nevada Test Site, Nevada, 2092 (USGS-OFR--80-466)
NEVADA TEST SITE/SEISMIC WAVES
Comparison of predicted and observed subsurface-surface seismic spectral ratios, 2535 (NVO--0624-2)
NEVADA TEST SITE/SEISMICITY
Nevada nuclear waste storage investigations. Quarterly report, April - June 1980, 1620 (NVO--196-19)
Seismic hazard analysis for the NTS spent reactor fuel test site, 3540 (UCRL--15260)
NEVADA TEST SITE/SPENT FUEL STORAGE
Safety Assessment Document for the Spent Reactor Fuel Geologic Storage Test in the Climax Granite Stock at the Nevada Test site, 229 (NVO--210)
NEVADA TEST SITE/TOPOGRAPHY
Nevada nuclear waste storage investigations. Quarterly report, April - June 1980, 1620 (NVO--196-19)
NEVADA TEST SITE/TUFF
Mineralogy and petrology of tuff units from a UE25a-1 drill site, Yucca Mountain, Nevada, 3548 (LA--8139-MS)
NEVADA TEST SITE/UNDERGROUND EXPLOSIONS
Prediction of ground motion from underground nuclear weapons tests as it relates to siting of a nuclear waste storage facility at NTS and compatibility with the weapons test program, 1994 (SAND--80-1020/1)
Prediction of ground motion from underground nuclear weapons tests as it relates to siting of a nuclear waste storage facility at NTS and compatibility with the weapons test program, 1995 (SAND--80-1020/1)
NEVADA TEST SITE/WELL LOGGING
Borehole geophysical measurements for Hole UE25a-3, Nevada Test Site, Nuclear Waste Isolation Program, 2091 (USGS-OFR--80-126)
NEW MEXICO/AIR QUALITY
Meteological and air quality data, quarterly report. WIPP site: Eddy County, New Mexico. Autumn quarter, September 1977-November 1977, 3294 (SAND--80-7121)
Meteorological and air quality data quarterly report WIPP site: Eddy County, New Mexico. Winter quarter, December 1976-February 1977, 1963 (SAND--79-7042)
Meteorological and air quality data quarterly report. WIPP site: Eddy County, New Mexico. Spring quarter, March-May 1977, 3180 (SAND--79-7109)
Meteorological and air quality data quarterly report. WIPP site: Eddy County, New Mexico. Summer quarter, June 1977-August 1977, 2478 (SAND--80-7107)
NEW MEXICO/BOREHOLES
Basic data report for drillhole WIPP 18 (Waste Isolation Pilot Plant - WIPP), 1891 (SAND--79-0275)
Basic data report for drillhole WIPP 21 (Waste Isolation Pilot Plant - WIPP), 1892 (SAND--79-0277)
NEW MEXICO/ENERGY CONSUMPTION
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)
NEW MEXICO/ENERGY POLICY
1979 New Mexico legislative session: energy issues and legislation, 3175 (SAND--79-1095)
NEW MEXICO/ENERGY SOURCE DEVELOPMENT
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)
NEW MEXICO/FEED MATERIALS PLANTS
State policies and requirements for management of uranium mining and milling in New Mexico. Volume III. Adverse effects of uranium mining and milling on the physical environment, 2648 (SAND--78-1332)
NEW MEXICO/GEOLOGICAL SURVEYS
Precipitation and lake-level changes in the West and Midwest over the past 10,000 to 24,000 years. Final report, 2044 (UCRL--15173)
NEW MEXICO/GEOMORPHOLOGY
Assessment of effectiveness of geologic isolation systems. Geologic factors in the isolation of nuclear waste: evaluation of long-term geomorphic processes and catastrophic events, 1734 (PNL--2854)
NEW MEXICO/LITHOLOGY
Basic data report for drillhole WIPP 30 (Waste Isolation Pilot Plant - WIPP), 1898 (SAND--79-0284)
NEW MEXICO/METEOROLOGY
Meteological and air quality data, quarterly report. WIPP site: Eddy County, New Mexico. Autumn quarter, September 1977-November 1977, 3294 (SAND--80-7121)
Meteorological and air quality data quarterly report WIPP site: Eddy County, New Mexico. Winter quarter, December 1976-February 1977, 1963 (SAND--79-7042)
Meteorological and air quality data quarterly report. WIPP site: Eddy County, New Mexico. Spring quarter, March-May 1977, 3180 (SAND--79-7109)
Meteorological and air quality data quarterly report. WIPP site: Eddy County, New Mexico. Summer quarter, June 1977-August 1977, 2478 (SAND--80-7107)
NEW MEXICO/NUCLEAR INDUSTRY
Attitudes of New Mexico residents toward the nuclear fuel industry, 3170
NEW MEXICO/POLLUTION REGULATIONS
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)
NEW MEXICO/POPULATION DYNAMICS
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)
NEW MEXICO/RADIATION MONITORING
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
Assessment of the radiological impact of the inactive uranium-mill tailings at Shiprock, New Mexico, 2444 (ORNL--5447)
NEW MEXICO/RADIOACTIVE WASTE DISPOSAL
Nuclear waste--does burying it bury the problem, 2176
NEW MEXICO/RADIOACTIVE WASTE FACILITIES
Policy report on high level radioactive wastes, 606
NEW MEXICO/RADIOACTIVE WASTE STORAGE
Borehole plugging test activities in southeastern New Mexico, 2008 (SAND--80-2462C)
NEW MEXICO/RADIOACTIVE WASTES
Estimated average annual radon-222 concentrations around the former uranium mill site in Shiprock, New Mexico. Final technical note, 3293 (PB--291892)
NEW MEXICO/TECTONICS
General subsurface geology of southeastern New Mexico with special reference to its structural stability, 3515 (PNL--2851)
NEW MEXICO/UNDERGROUND DISPOSAL
Report of biological investigations at the Los Medanos Waste Isolation Pilot Plant (WIPP) area of New Mexico during FY 1978, 3299 (SAND--79-0368)
NEW MEXICO/URANIUM MINES
Let them mine yellowcakethe impact of uranium mining on new mexicans, 2491
State policies and requirements for management of uranium mining and milling in New Mexico. Volume III. Adverse effects of uranium mining and milling on the physical environment, 2648 (SAND--78-1332)
NEW YORK/ECOLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
NEW YORK/EROSION
Geomorphic and erosion studies at the Western New York Nuclear Service Center, West Valley, New York, 1605 (NUREG/CR--0795)

NEW YORK/GEOLOGICAL SURVEYS
Preliminary regional study of the present and possible future oil and gas development in the areas of thick rock salt and shale deposits of Michigan, Ohio, Pennsylvania, and western New York as of December 1975, 1667 (ORNL/SUB--75/87989)
NEW YORK/GEOLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
Regional summary and recommended study area for Ohio and New York portions of the Salina Basin, 1627 (ONWI--29)
NEW YORK/GEOMORPHOLOGY
General investigation of radionuclide retention in migration pathways at the West Valley, New York low-level burial site. Annual report, September 1, 1977-September 30, 1978, 1604 (NUREG/CR--0794)
Geomorphic and erosion studies at the Western New York Nuclear Service Center, West Valley, New York, 1605 (NUREG/CR--0795)
NEW YORK/HYDROLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
NEW YORK/METEOROLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
NEW YORK/PETROLEUM GEOLOGY
Preliminary regional study of the present and possible future oil and gas development in the areas of thick rock salt and shale deposits of Michigan, Ohio, Pennsylvania, and western New York as of December 1975, 1667 (ORNL/SUB--75/87989)
NEW YORK/RADIOACTIVE WASTE FACILITIES
Preliminary evaluation of the environmental aspects of potential radioactive waste repository study areas in the Ohio and New York portions of the Salina Basin, 1625 (ONWI--23)
Regional summary and recommended study area for Ohio and New York portions of the Salina Basin, 1627 (ONWI--29)
NEW YORK/SOCIO-ECONOMIC FACTORS
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
NICKEL/DECONTAMINATION
Decontamination of metals containing plutonium and americium, 615 (ANL--78-13)
NICKEL/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
NICKEL/ION EXCHANGE
Co^{2+} and Ni^{2+} ion exchange on zirconyl phosphate from aqueous solutions, 797 (INIS-mf--5567)
NICKEL/ION IMPLANTATION
Experimental study of the trapping and release of krypton in nickel (<3 keV), 3639
Krypton entrapment in pulse biased sputter-deposited metals, 1762 (PNL-SA--6698)
NICKEL/THERMAL CONDUCTIVITY
Thermal conductivity of granules, 1001 (SGAE--3012)
NICKEL BASE ALLOYS
See also HASTELLOY C
INCONEL ALLOYS
NICKEL BASE ALLOYS/CORROSION RESISTANCE
Results of investigation into corrosion resistance of certain structural steels and nickel in fluoride products of fast reactor fuel reprocessing, 796 (INIS-mf--5565)
NIEDERAICHBACH REACTOR/REACTOR DECOMMISSIONING
What can be done with old nuclear power plants, 3054
NIEDERAICHBACH REACTOR/REACTOR DISMANTLING
What can be done with old nuclear power plants, 3054
NIOBIUM/ADSORPTION
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
NIOBIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
NIOBIUM CHLORIDES/CHEMICAL REACTIONS
Nuclear waste chemistry, 488 (ORNL--5665)
NITRATES/BIODEGRADATION
Biological denitrification of high-nitrates wastes generated in the nuclear industry, 414 (CONF-800447--1)
NITRATES/CHROMATOGRAPHY
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
NITRIC ACID/CHEMICAL PREPARATION
Method of preparing a sorbent (Patent), 3697
NITRIC ACID/DECOMPOSITION
Process for decomposing nitric acid and/or nitric acid ions (Patent), 1304
NITROGEN 13/RADIATION MONITORING
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
NITROGEN DIOXIDE/MONITORING
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)
NITROGEN OXIDES
See also NITROGEN DIOXIDE
NITROGEN OXIDES/MONITORING
1978 environmental monitoring report, 3190 (BNL--51031)
NOBLE GASES
See RARE GASES
NOK-1 REACTOR
See BEZNAU-1 REACTOR
NON-PROLIFERATION TREATY
NPT and the role of the International Atomic Energy Agency in safeguards, 2621 (INIS-mf--5130)
NORTH AMERICA
See also CANADA
MEXICO
USA
NORTH AMERICA/CLIMATES
Probability of expected climate stresses in North America in the next one My, 2548 (PNL--2851)
NORTH AMERICA/ICE
Glaciological parameters of disruptive event analysis, 2544 (PNL--2851)
NORTH DAKOTA/GEOLOGIC FORMATIONS
Regional flow and solute transport modeling for site suitability. Part I, 2050 (UCRL--15181)
NORTH DAKOTA/RADIATION MONITORING
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
NORTH SEA/RADIOACTIVITY
Windscale radiocaesium in the Clyde Sea area, 3422
NORTHERN IRELAND
See UNITED KINGDOM
NORTHERN TERRITORY/URANIUM ORES
Some environmental aspects of uranium mining and milling in Northern Australia, 2515
NORWAY/ENERGY POLICY
How many human lives and how much environmental damage will be risked to avoid nuclear power, 3164
NORWAY/NUCLEAR POWER
Is nuclear power safe enough, 3150
Nuclear controversy with many undercurrents, 3142
Nuclear power: very significant Norwegian competence, 3153
NORWAY/NUCLEAR POWER PLANTS
Nuclear power plants in Norway - siting and effect on surroundings, 2916
NORWAY/REACTOR SAFETY
Main conclusions in Nuclear Power Commission's report, 3154
NOZZLES/PERFORMANCE TESTING
Product removal nozzles for a fluidized-bed calciner, 763 (ENICO--1035)
NPR REACTOR
See N-REACTOR
N-REACTOR/AIR FILTERS
Fifteen years experience filtering N reactor gaseous wastes, 3020 (UNI-SA--77)
N-REACTOR/CRITICALITY
Experimental programs at the Hanford N reactor in support of spent-fuel storage, 3021
N-REACTOR/FUEL POOLS
Restoration of an irradiated fuel storage facility, 275 (UNI-SA--74)
N-REACTOR/SPENT FUEL STORAGE
Experimental programs at the Hanford N reactor in support of spent-fuel storage, 3021
NS OTTO HAHN/PERSONNEL DOSIMETRY
Radiological data concerning the nuclear merchantship Otto Hahn. A review after ten years of operation, 3022 (GKSS--79/E/24)
NS OTTO HAHN/RADIOACTIVE EFFLUENTS
Radiological data concerning the nuclear merchantship Otto Hahn. A review after ten years of operation, 3022 (GKSS--79/E/24)
NUCLEAR ACCIDENTS
See ACCIDENTS
NUCLEAR ENERGY
Nuclear energy. Introduction to the concepts, systems, and applications of nuclear processes, 2670
NUCLEAR ENERGY/ECONOMIC DEVELOPMENT
Nuclear option: a long term investment, 3135
NUCLEAR ENERGY/ENERGY POLICY
International nuclear energy guide, 3167
NUCLEAR ENERGY/FORECASTING
Energy for tomorrow - planning of today. No. 1, 2667 (INIS-mf--5198)
NUCLEAR ENERGY/HEALTH HAZARDS
Atmospheric Kr^{85} pollution by nuclear energy, 27
Data on radioactive contamination of the biosphere, 3311
NUCLEAR ENERGY/LEGAL ASPECTS
Nuclear inter jura '79, 3121
Topical problems of nuclear law from an international view-point, 3120
NUCLEAR ENERGY/PUBLIC OPINION
Public's confusion on nuclear seen no surprise; key issues remain unanswered: NRC commissioner, 3129
Unraveling the nuclear energy debate, 3147
NUCLEAR ENERGY/TECHNOLOGY ASSESSMENT
International nuclear energy guide, 3167
NUCLEAR ENGINEERING/RESEARCH PROGRAMS
Nuclear Science and Technology Branch report 1977. Research Establishment site management, 3018 (AAEC/PR--44S)
NUCLEAR EXPLOSIONS
See also UNDERGROUND EXPLOSIONS

NUCLEAR EXPLOSIONS/FALLOUT DEPOSITS
Environmental radioactivity at the National Nuclear Research Centre, Pelindaba. Report for the year 1978, 3237 (PEL--270)
NUCLEAR FACILITIES
See also FEED MATERIALS PLANTS
FUEL CYCLE CENTERS
FUEL FABRICATION PLANTS
FUEL REPROCESSING PLANTS
HEAVY WATER PLANTS
ISOTOPE SEPARATION PLANTS
NUCLEAR FACILITIES/ACCIDENTS
Effect of emergency discharge of nuclear facilities effluents on hydrosphere, 3466 (CS-INIS--258)
NUCLEAR FACILITIES/AIR CONDITIONING
Air conditioning and ventilation in atomic energy facilities, 3081
NUCLEAR FACILITIES/CHEMICAL EFFLUENTS
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
NUCLEAR FACILITIES/DECOMMISSIONING
Cost/risk/benefit analysis report on the decontamination and decommissioning of Z-plant, 523 (RHO-CD--761)
Criteria for the management of redundant nuclear facilities, 3076
Decommissioning of nuclear facilities, 2812 (STI/PUB--500)
Decommissioning standards: the radioactive waste impact, 1722 (PB--296947)
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
Disposal of waste resulting from the dismantling of nuclear facilities, 2318
INEL waste cleanup, 671 (CONF-791234--7)
International symposium of the IAEA/NEA on the decommissioning of nuclear facilities. A comment from the operator's point of view, 2233
Nuclear facility decommissioning and site remedial actions. Volume 1. A selected bibliography, 907 (ORNL/EIS--154/V1)
SRE activity requirement No. 18 and 19 decontamination and dismantling of Mark I and Mark II Fuel Handling Machines, 708 (DOE/SF/00701--T60)
Summary of a decommissioning handbook for nuclear facilities, 3077
NUCLEAR FACILITIES/DECONTAMINATION
Cleaning up commingled uranium mill tailings: is Federal assistance necessary, 3109 (EMD--79-29)
Cost/risk/benefit analysis report on the decontamination and decommissioning of Z-plant, 523 (RHO-CD--761)
Decontamination of concrete surfaces at the Los Alamos Scientific Laboratory, 3610 (LA-UR--80-1460)
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
Decontamination of large components at ECN, 1278
Description of the Formerly Utilized Sites Remedial Action Program, 919 (ORO--777)
Detailed working procedure for taking core samples from RMDF leach field, 3362 (DOE/SF/00701--T61)
INEL waste cleanup, 671 (CONF-791234--7)
Nuclear facility decommissioning and site remedial actions. Volume 1. A selected bibliography, 907 (ORNL/EIS--154/V1)
SRE activity requirement No. 18 and 19 decontamination and dismantling of Mark I and Mark II Fuel Handling Machines, 708 (DOE/SF/00701--T60)
NUCLEAR FACILITIES/DESIGN
Seismic design of nonreactor nuclear facilities, 3 (K-BD--904)
NUCLEAR FACILITIES/ENVIRONMENTAL EFFECTS
Engineering evaluation of a formerly utilized MED/AEC site. Site A and Plot M, Palos Forest Preserve, Palos Park, Illinois, 377 (ANL/ES--80)
Environmental analysis of a formerly utilized MED/AEC site: Site A and plot M, Palos Forest Preserve, Palos Park, Illinois, 2410 (ANL/ES--79)
NUCLEAR FACILITIES/ENVIRONMENTAL IMPACTS
Engineering evaluation of a formerly utilized MED/AEC site. Site A and Plot M, Palos Forest Preserve, Palos Park, Illinois, 377 (ANL/ES--80)
Environmental analysis of a formerly utilized MED/AEC site: Site A and plot M, Palos Forest Preserve, Palos Park, Illinois, 2410 (ANL/ES--79)
Internal irradiation of organism with radioactive rare gases, 2530 (INIS-mf--5319)
Nuclear waste ponds and streams on the Hanford site: an ecological search for radiation effects, 3480
NUCLEAR FACILITIES/FILTERS
Gas filter and device intended for removing from the housing the absorbant and granular matter (Patent), 1318
NUCLEAR FACILITIES/FISSION PRODUCT RELEASE
Computerprogram for calculating the radiological consequences of shorttime radioactive releases from nuclear installations, 3189 (AIAU--78306)
NUCLEAR FACILITIES/GLOBAL ASPECTS
World nuclear energy paths, 2669
NUCLEAR FACILITIES/GOVERNMENT POLICIES
Decommissioning of nuclear facilities. Report on the international symposium held in Vienna from 13 to 17 November 1978, 573
NUCLEAR FACILITIES/LICENSING
International symposium of the IAEA/NEA on the decommissioning of nuclear facilities. A comment from the operator's point of view, 2233
NUCLEAR FACILITIES/MAINTENANCE
Instrument maintenance problems in radioactive areas and equipment, 604
NUCLEAR FACILITIES/NATURAL RADIOACTIVITY
Some aspects of the accumulation of natural radionuclides in aquatic products and vegetation around a uranium complex, 3322 (INIS-mf--5372)
NUCLEAR FACILITIES/NUCLEAR MATERIALS DIVERSION
Proceedings of 20th annual meeting of Institute of Nuclear Materials Management, 1979, 2640
NUCLEAR FACILITIES/NUCLEAR MATERIALS MANAGEMENT
Licensed fuel facility status report. volume 1, number 3. data for decisions, fuel cycle operations. Status summary report (Events, releases, MUF), 2647 (PB--299080)
NUCLEAR FACILITIES/OFFGAS SYSTEMS
Advances in the fluorocarbon process for decontamination of nuclear facility off-gas (R-12 (dichlorodifluoromethane)), 864 (K/ET--5010)
Method and equipment to exchange and remove the waste from aerosol filter elements for nuclear plants in a sealed casing (Patent), 3290
Plant for separating gaseous hydrocarbons and radioactive iodine isotopes from waste air (Patent), 1191
Removal of noble gases by selective absorption (On fluorocarbon), 2844 (K/ET--5007)
Removal of radioiodine species from gaseous stream on inorganic absorbents. Final report for the period 1 November 1976 - 31 October 1977, 49 (IAEA-R--1841-F)
Separation of noble gas mixtures by low temperature rectification: Development for the purification of the offgas of nuclear facilities, 1071
NUCLEAR FACILITIES/PERSONNEL
Proceedings of 20th annual meeting of Institute of Nuclear Materials Management, 1979, 2640
NUCLEAR FACILITIES/PERSONNEL MONITORING
Hygiene of ionizing radiations, 3699
NUCLEAR FACILITIES/PLANNING
Conception design for experimental facility of the research on internal emitters, 1599 (NIRS-R--7)
NUCLEAR FACILITIES/PROTECTIVE COATINGS
Materials for surface protection in nuclear facilities, 559
NUCLEAR FACILITIES/RADIATION ACCIDENTS
Computer code to assess accidental pollutant releases, 3198 (OP--1552)
NUCLEAR FACILITIES/RADIATION MONITORING
Aerial radiological surveys of Rockwell International Facilities, Canoga Park, California. Dates of surveys: June and July 1978, 3319 (EGG--1183-1751)
Energy systems group environmental monitoring and facility effluent. Annual report 1979, 3321 (ESG--80-7)
Environmental analysis of a formerly utilized MED/AEC site: Site A and plot M, Palos Forest Preserve, Palos Park, Illinois, 2410 (ANL/ES--79)
Graphic overview system for DOE's effluent and environmental monitoring programs, 3202 (EGG--1183-1760)
New opportunities for state participation in the control of radioactive pollution, 3428
Radiological survey of the inactive uranium-mill tailings at Falls City, Texas, 3340 (ORNL--5462)
NUCLEAR FACILITIES/RADIOACTIVE AEROSOLS
LIGA - A program to calculate the local individual gamma submersion dose due to waste air plumes of nuclear facilities, 3215 (Juel--1577)
NUCLEAR FACILITIES/RADIOACTIVE EFFLUENTS
Air radioactivity in the NRI and its surroundings during 1974, 2425 (INIS-mf--4551)
Analysis of NRC methods for estimating the effects of dry deposition in environmental radiological assessments, 3256
Annual report on radioactive discharges and monitoring of the environment, 1977 (United Kingdom), 2429 (INIS-mf--5194)
Applications of in situ Ge(Li) spectrometry, 3277
Computerprogram for calculating the radiological consequences of shorttime radioactive releases from nuclear installations, 3189 (AIAU--78306)
Dose-rate conversion factors for external exposure to photon and electron radiation from radionuclides occurring in routine releases from nuclear fuel cycle facilities, 3251
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
Graphic overview system for DOE's effluent and environmental monitoring programs, 3202 (EGG--1183-1760)
Implementation of radiation protection requirements in the limitation of the release of radioactive effluents, 2424 (IAEA--212)
In situ data on various sites of radioactive releases into the marine environment, 2503
Limits to radioactive effluents and countermeasures in accidental situations, 2423 (IAEA--212)
Modelling and computing radiation hazards of population due to nuclear facility operation, 2427 (INIS-mf--4637)
Monitoring of airborne and liquid radioactive releases from nuclear facilities to the environment, 3292

On-line meteorological information system for response to accidental releases of radioactivity into the atmosphere, 2959
Radiation exposure due to nuclear facilities in West Germany in 1976, 2586
Radioactivity in surface and coastal waters of the British Isles, 1976. Part 2. Areas other than the Irish Sea and its environs, 3435 (FRL--14)
Reduction of iodine emissions from nuclear facilities, 851 (INKA-Conf--78-156-000)
NUCLEAR FACILITIES/RADIOACTIVE MATERIALS
Radioactive materials in California, 2817
NUCLEAR FACILITIES/RADIOACTIVE WASTE DISPOSAL
In situ data on various sites of radioactive releases into the marine environment, 2503
International symposium of the IAEA/NEA on the decommissioning of nuclear facilities. A comment from the operator's point of view, 2233
NUCLEAR FACILITIES/RADIOACTIVE WASTE MANAGEMENT
Challenges of nuclear effluent management in the national perspective, 584
NUCLEAR FACILITIES/RADIOACTIVE WASTE STORAGE
Radiological survey of the inactive uranium-mill tailings at Falls City, Texas, 3340 (ORNL--5462)
NUCLEAR FACILITIES/RADIOACTIVITY
Air radioactivity in the NRI and its surroundings during 1974, 2425 (INIS-mf--4551)
NUCLEAR FACILITIES/REACTOR DECOMMISSIONING
Decommissioning nuclear facilities, 2830
NUCLEAR FACILITIES/REGULATORY GUIDES
General calculation basis for assessing the radiation exposure from radioactive discharges via exhaust air or into surface water (Reg. guide related to paragraph 45 of the German Radiation Protection Regulation), 3499
NUCLEAR FACILITIES/SAFEGUARDS
Proceedings of 20th annual meeting of Institute of Nuclear Materials Management, 1979, 2640
NUCLEAR FACILITIES/SAFETY
Seismic design of nonreactor nuclear facilities, 3 (K-BD--904)
NUCLEAR FACILITIES/SEISMIC EFFECTS
Seismic design of nonreactor nuclear facilities, 3 (K-BD--904)
NUCLEAR FACILITIES/SHUTDOWNS
Engineering evaluation of a formerly utilized MED/AEC site. Site A and Plot M, Palos Forest Preserve, Palos Park, Illinois, 377 (ANL/ES--80)
Environmental analysis of a formerly utilized MED/AEC site: Site A and plot M, Palos Forest Preserve, Palos Park, Illinois, 2410 (ANL/ES--79)

Fuel transporting device (Patent), 2797
NUCLEAR INDUSTRY
Changes ahead for nuclear industry, 374
NUCLEAR INDUSTRY/ECONOMIC IMPACT
Final environmental impact statement: US Spent Fuel Policy. Charge for spent fuel storage, 1448 (DOE/EIS--0015(Vol.4))
NUCLEAR INDUSTRY/ENVIRONMENTAL EFFECTS
Results of ground level radiation measurements in support of the 1978 aerial survey of the Lake Ontario Ordnance Works, Lewiston, New York, 3344 (ORNL/TM--7004)
NUCLEAR INDUSTRY/ENVIRONMENTAL IMPACTS
Review of the environmental impact of nuclear energy, 3003
NUCLEAR INDUSTRY/FIRE PREVENTION
International guidelines for fire protection at nuclear installations including nuclear fuel plants, nuclear fuel stores, teaching reactors, research establishments, 3505
NUCLEAR INDUSTRY/FORECASTING
Commercial US nuclear reactors and waste: the current status, 373 (PNL--3317-2)
NUCLEAR INDUSTRY/HEALTH HAZARDS
Energy policy and the public health. The safety of nuclear power, 3125
NUCLEAR INDUSTRY/MEETINGS
Reflections on Nuclex '78 (Brief review), 3143
NUCLEAR INDUSTRY/PUBLIC OPINION
Attitudes of New Mexico residents toward the nuclear fuel industry, 3170
Current challenges to U.S. nuclear fuel cycle policies: arguments and tactics, 2666 (INIS-mf--4620)
NUCLEAR INDUSTRY/PUBLIC RELATIONS
Nuclear energy and the nuclear industry. Notes prepared to provide information and to answer questions, 3110 (INIS-mf--5514)
Post-Kemeny nuclear industry in the United States, 2561
NUCLEAR INDUSTRY/RADIATION MONITORING
Computer-controlled remote gamma-ray spectrometer, 2502
NUCLEAR INDUSTRY/RADIOACTIVE EFFLUENTS
Distribution of cobalt 60 in a mollusc, a crustacean and a freshwater teleost: variations as a function of the source of pollution and during elimination, 3483
NUCLEAR INDUSTRY/RADIOACTIVE WASTE MANAGEMENT
Problem of radioactive wastes from the nuclear industry, 583
NUCLEAR INDUSTRY/RISK ASSESSMENT
Risk relativities (Population exposure to radiation), 2897
NUCLEAR MATERIALS DIVERSION
Nuclear tower. The promise and the threat, 3116
Radioactive waste disposal-a comparison of alternative nuclear fuel cycles, 2286
NUCLEAR MATERIALS MANAGEMENT
Nondestructive analysis at B and W's uranium conversion plant, 588
United States Nuclear Regulatory Commission and the agreement states: licensing statistics and other data, July to December 1978, 2642
NUCLEAR MATERIALS MANAGEMENT/EQUIPMENT
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
NUCLEAR MATERIALS MANAGEMENT/MEASURING INSTRUMENTS
Technical quarterly progress report, January 1-March 31, 1979, 443 (ENICO--1012)
NUCLEAR MATERIALS MANAGEMENT/MEETINGS
Proceedings of 20th annual meeting of Institute of Nuclear Materials Management, 1979, 2640
NUCLEAR MATERIALS MANAGEMENT/RISK ASSESSMENT
Nuclear energy: production and problems, 2563
NUCLEAR MATERIALS MANAGEMENT/SECURITY
Technical quarterly progress report, April 1-June 30, 1979, 444 (ENICO--1013)
NUCLEAR MATERIALS MANAGEMENT/TRANSPORTATION SYSTEMS
Program strategy document for the Nuclear Materials Transportation Technology Center, 255 (SAND--79-1402)
NUCLEAR MEDICINE
See also BIOMEDICAL RADIOGRAPHY
RADIOPHARMACEUTICALS
NUCLEAR MEDICINE/BIBLIOGRAPHIES
Nuclear medicine: a bibliography, 3622 (TID--3319-S8-P1)
Nuclear medicine: a bibliography, 3623 (TID--3319-S8-P2)
NUCLEAR MEDICINE/LOWLEVEL RADIOACTIVE WASTES
Profile of institutional radioactive wastes generated in 1977, 1708 (PB--296947)
NUCLEAR MEDICINE/PERSONNEL MONITORING
Hygiene of ionizing radiations, 3699
NUCLEAR MEDICINE/RADIATION PROTECTION
Implementation of the radiation protection ordinance. Here: Radiation protection guidelines for the use of radioactive substances and the operation of apparatus for the generation of ionizing radiation and of irradiation devices with radioactive sources in medical therapy (Radiation Protection guideline in nuclear medicine), 3631
Installations for nuclear medicine. Regulations for construction and equipment, 3502
Unsealed radioactive materials. Handling, storage, use, and disposal in hospitals and medical research institutions, 3665
NUCLEAR MEDICINE/RADIOACTIVE WASTE DISPOSAL
Problems of radioactive waste disposal in a nuclear medicine department, 2325
NUCLEAR MEDICINE/RADIOISOTOPES
Application state of radioisotopes for medical use, 3653
NUCLEAR MEDICINE/RADIOPHARMACEUTICALS
Application state of radioisotopes for medical use, 3653
NUCLEAR PHYSICS
Nuclear energy. Introduction to the concepts, systems, and applications of nuclear processes, 2670
NUCLEAR PHYSICS/INFORMATION SYSTEMS
Role of the National Nuclear Data Center in the field of nuclear waste transmutation, 623 (BNL-NCS--28103)
NUCLEAR POWER/COORDINATED RESEARCH PROGRAMS
Nuclear research in the Federal Republic of Germany, 3144
NUCLEAR POWER/COST
Costs of nuclear power in the Netherlands, 2826 (INIS-mf--5129)
NUCLEAR POWER/DOSE COMMITMENTS
Nuclear power and the environment, 3655
NUCLEAR POWER/ENERGY POLICY
Choose nuclear power, 3163
Energy and human needs, 3151
NUCLEAR POWER/ENVIRONMENTAL IMPACTS

Environmental problems of the uranium mining and milling industry, 2520
NUCLEAR POWER/FUEL CYCLE
Spent-fuel disposition: European strategies, 2841
NUCLEAR POWER/GLOBAL ASPECTS
World nuclear energy paths, 2669
NUCLEAR POWER/GOVERNMENT POLICIES
Scots seek soft path, 3140
Soviet nuclear programme in site of difficulty, 2912
NUCLEAR POWER/HAZARDS
Nuclear power: the doubts remain, 3127
NUCLEAR POWER/INSTITUTIONAL FACTORS
Fate of nuclear hangs in the balance, 3137
NUCLEAR POWER/LEGISLATION
What happened to nuclear: the action's at the NRC, 3119
NUCLEAR POWER/PHYSICAL PROTECTION
Nuclear controversy with many undercurrents, 3142
NUCLEAR POWER/PLANNING
Development of nuclear power utilization in the German Democratic Republic, 3130
Electronuclear program of the Federal Republic of Germany, 3162
Nuclear energy in our time (Canada), 2787
Nuclear power in 1977, 3158
NUCLEAR POWER/PUBLIC OPINION
Nuclear power option - problems and constraints, 2665 (ER--77-2)
Public communication highlights key issues, 3138
Situation of nuclear power generation in Sweden, 3166
NUCLEAR POWER/PUBLIC RELATIONS
Gorleben report. Insecurity and dangers of nuclear waste management. Excerpts from the expert's reports and the heaving held by the Lower Saxony government, 2291
Nuclear power for beginners, 3098
Paradoxes and popular misconceptions over harnessed nuclear energy, 3169
Reality of nuclear power, 3132
NUCLEAR POWER/RADIATION HAZARDS
Energy sources: the potential hazards. Pt. 2, 3083
Risk and fear, 3118
NUCLEAR POWER/RADIOACTIVE EFFLUENTS
Iodine-129 dose to the world population from the nuclear power industry, 3192 (CONF-791103--107)
NUCLEAR POWER/RADIOACTIVE WASTE DISPOSAL
Nuclear power option - problems and constraints, 2665 (ER--77-2)
NUCLEAR POWER/RECOMMENDATIONS
Nuclear power - the grand illusion, 3115
NUCLEAR POWER/REGULATIONS
What happened to nuclear: the action's at the NRC, 3119
NUCLEAR POWER/RESEARCH PROGRAMS
Key issues of nuclear power R and D in Japan, 3155
Long-range program of atomic energy research, development and utilization in Japan, 3157
Long-term atomic energy research, development and utilization program formulated (Japan), 3159
NUCLEAR POWER/RISK ASSESSMENT
Safety of nuclear energy, 3086
Socially responsible energy futures, 3146
NUCLEAR POWER/SAFEGUARDS
Outlook of nuclear power generation and international situation, 3165
NUCLEAR POWER/SAFETY
Common sense in nuclear energy, 3053
How many human lives and how much environmental damage will be risked to avoid nuclear power, 3164
Is nuclear power safe enough, 3150
NUCLEAR POWER/SOCIAL IMPACT
Consequences of large-scale implementation of nuclear energy in the Federal Republic of Germany. Summary report, 3112 (KFK--2707)
Socially responsible energy futures, 3146
NUCLEAR POWER PLANTS
See also UNDERGROUND NUCLEAR STATIONS
NUCLEAR POWER PLANTS/AIR FILTERS
Isotope composition of iodine in gaseous effluents of nuclear facilities and iodine filter efficiency, 2927 (INIS-mf--4637)
NUCLEAR POWER PLANTS/CAPACITY
Projections of commercial nuclear capacity and spent-fuel accumulation in the United States, 89
NUCLEAR POWER PLANTS/COMPARATIVE EVALUATIONS
Nuclear and thermal power plants and the environment, 2831
NUCLEAR POWER PLANTS/CONSTRUCTION
Fate of nuclear hangs in the balance, 3137
NUCLEAR POWER PLANTS/CONTAINMENT BUILDINGS
Seismic Safety Margins Research Program (Phase I). Project IV. Structural building response: Structural Building Response Review, 2849 (UCRL--15185)
Stably stratified building wakes, 2894 (NUREG/CR--1247)
NUCLEAR POWER PLANTS/COST BENEFIT ANALYSIS
Risk benefit analysis of site alternatives for a nuclear power plant producing both electricity and district heat, 2910 (INIS-mf--4778)
NUCLEAR POWER PLANTS/DECOMMISSIONING
The story of nukey poo, 1309
NUCLEAR POWER PLANTS/ECONOMICS
UPDATE: Nuclear Power Program information and data, July-August 1979, 2832 (DOE/TIC--10259)
NUCLEAR POWER PLANTS/ELECTRIC POWER
Power generation costs. Coal - nuclear power. Comparing investment and operating costs of coal-fired and nuclear power plants. Supplement volume, 3111 (INIS-mf--5693)
Summary of 'The costs of energy from coal' and 'Costs of nuclear power in the Netherlands', 2827 (INIS-mf--5131)
NUCLEAR POWER PLANTS/ENVIRONMENTAL EFFECTS
Thermo- and fluiddynamic influences of nuclear power plants on the environment, 2913
NUCLEAR POWER PLANTS/ENVIRONMENTAL IMPACTS
Calculation model for evaluation of doses due to effluents from the operation of nuclear installations, 2951 (UCRL-Trans--11608)
Consequence model of the German reactor safety study, 3061
Ecological problems of nuclear power, 3678
Ecological problems of nuclear power development, 3058
Energy: what about waste, 3309
Environmental effects of nuclear power stations, 2904
Meteorological aspects of environmental health and safety planning in nuclear power plant sites, 2906
Nuclear and thermal power plants and the environment, 2831
Nuclear power plants, 2909
Nuclear power plants and environment protection, 2900
Organization of nuclear plants environmental studies, 2901
Problems linked to the long-term development of electricity production. Pt.2. Nuclear and classical power plants, 2908
Simulation of atmospheric turbulence, 2896 (PNL--3276)
Unpaid costs of electrical energy: health and environmental impacts from coal and nuclear power (Book), 3178
UPDATE: Nuclear Power Program information and data, July-August 1979, 2832 (DOE/TIC--10259)
NUCLEAR POWER PLANTS/FISSION PRODUCT RELEASE
Production and emission of tritium from nuclear facilities, and the resulting problems (Federal Republic of Germany), 2281
Radioactive krypton and xenon in nuclear power plant fuel cycle, 1206
Radiological impact from model coal-fired power plants and from nuclear systems, 2934 (INKA-Conf--79-187-001)
NUCLEAR POWER PLANTS/FORECASTING
Commercial US nuclear reactors and waste: the current status, 373 (PNL--3317-2)
NUCLEAR POWER PLANTS/FUEL CYCLE
Fuel-cycle facilities: preliminary safety and environmental information document. Volume VII, 2839 (DOE/NE--0003/7)
Studies and research concerning BNFP. Nuclear spent fuel transportation studies (Impact of new regulations and uncertainty), 129 (AGNS--35900-1.4-59)
NUCLEAR POWER PLANTS/GASEOUS WASTES
Monitoring of the discharge of radioactive materials in gaseous effluents at the stack of nuclear power plants with light-water-cooled reactors, 3291
Nuclear reactor gaseous radioactive wastes, 2987
NUCLEAR POWER PLANTS/HEALTH HAZARDS
Leukemia due to nuclear power plants, 2577
NUCLEAR POWER PLANTS/LAND RECLAMATION
What do you do with land that can never be reclaimed, 2495
NUCLEAR POWER PLANTS/LEGAL ASPECTS
Nuclear power plant safety today, 3093
NUCLEAR POWER PLANTS/NON-PROLIFERATION TREATY
Nuclear Non-Proliferation Act of 1978 and the nuclear fuel cycle requirements of German nuclear power plants, 3156
NUCLEAR POWER PLANTS/OFFGAS SYSTEMS
Apparatus for reducing radioactive gaseous wastes (Patent), 1302
Catching of radioactive iodine and iodine compounds by nonorganic sorbents, 838 (INIS-mf--5574)
Investigations on methods and means for removal of radioactive aerosols and gases from air discharges for period of 1971 - 1975, 837 (INIS-mf--5574)
Radioactivity reducing device (Patent), 2858
NUCLEAR POWER PLANTS/PLANNING
Illinois and nuclear energy, 2668 (NP--25098)
Nuclear tower. The promise and the threat, 3116
NUCLEAR POWER PLANTS/PLUMES
Simulation of atmospheric turbulence, 2896 (PNL--3276)
NUCLEAR POWER PLANTS/PUBLIC INFORMATION
Nuclear power: still the ultimate fuel, 3124
NUCLEAR POWER PLANTS/PUBLIC RELATIONS
Torness: proposed nuclear power station, 3064
NUCLEAR POWER PLANTS/RADIATION DOSES
Potential radiological impact of a conceptual Hanford Nuclear Energy Center, 3308 (PNL-SA--7497)
Radiation exposure in the vicinity of nuclear power plants, 3656
NUCLEAR POWER PLANTS/RADIATION HAZARDS
Can we fix nuclear energy, 3070
Nuclear power and safety - summary and conclusions of the report of the Nuclear Power Commission. 2. Routine operation, 3055
Nuclear power and safety - summary and conclusions of the report of the Nuclear Power Commission. 1. General views, assumptions and main conclusion, 3056
Radiological health and safety requirements with regard to the population in erecting district-heating atomic plants, 3370 (INIS-mf--4978)

NUCLEAR POWER PLANTS/RADIATION MONITORING
Guideline for emission and immission monitoring in nuclear facilities, 3057
Radiation monitoring system of nuclear power station, 2859
Radioactive waste management and exposure situation for people engaging in nuclear power plant facilities, 3269
Substantiation of the scope of radiation monitoring in the region of atomic power station location, 3001
NUCLEAR POWER PLANTS/RADIATION PROTECTION
Physics contributions to radiation protection in nuclear power plants, 3050
NUCLEAR POWER PLANTS/RADIOACTIVE EFFLUENTS
^{85}Kr in the atmosphere and its measurement, 3209 (INIS-mf--4637)
Aerial radiological survey of the area surrounding the Edwin I. Hatch Nuclear Plant, Baxley, Georgia, 3199 (EGG--1183-1726)
Annual survey of radioactive discharges in Great Britain 1977, 2990
Building effects on effluent dispersion from roof vents at nuclear power plants. Final report, 2923 (EPRI-NP--1380)
Calculation model for evaluation of doses due to effluents from the operation of nuclear installations, 2951 (UCRL-Trans--11608)
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
Cost-effectiveness of the fenceline cow, 3257
Determination of safe radioactive releases to the atmosphere fron the nuclear power site, Duynefontein, 3360 (CONF-7604154--)
Diffusion coefficients of airborne radioactive iodine and methyl iodide, 3288
Distribution of activation products from Barsebaeck nuclear power plant (Sweden) in the marine environment. Temporal and spatial variations as established by seaweed, 3481
Effect of nuclear power generation on water quality in the great lakes. Technical report, 3419 (PB--80-101959)
Evaluation of empirical atmospheric diffusion data, 2938 (NUREG/CR--0789)
Iodine species in reactor effluents and in the environment. Final report, 2922 (EPRI-NP--1269)
Isotope composition of iodine in gaseous effluents of nuclear facilities and iodine filter efficiency, 2927 (INIS-mf--4637)
Liquid effluent treatment in nuclear power plants with light water reactors, 2961
Monitoring of gaseous and liquid effluents at French nuclear power plants, 2994
Monitoring equipment for liquid effluents, 2996
Monitoring of the discharge of radioactive materials in gaseous effluents at the stack of nuclear power plants with light-water-cooled reactors, 3291
Monitoring of airborne and liquid radioactive releases from nuclear facilities to the environment. Safety series No. 46: recommendations, 3248 (STI/PUB--482)
Nuclear power and environmental radioactivity. Regulations, 3661
Public health considerations of carbon-14 discharges from the light-water-cooled nuclear power reactor industry. Technical note, 2942 (PB--295054)
Public health hazards from electricity-producing plants, 3104
Radiation protection activities - 1977. Annual report, 2941 (PB--290215)
Radioactive effluents from nuclear power stations and fuel reprocessing plants in Europe, 1972 to 1976, 2962
Radioactive materials released from nuclear power plants in 1977, 2963
Radioactive effluents from nuclear power stations and nuclear fuel reprocessing plants in the European Community. Discharge data 1972-1976 radiological aspects, 2420 (EUR--6088)
Radiological impact from model coal-fired power plants and from nuclear systems, 2934 (INKA-Conf--79-187-001)
Real-time simulation of gamma exposure rate by puff model, 3280
Releases of radioactive substances from nuclear power plants in the European Communities in 1972-1976, 2902
Summary of radioactivity released in effluents from nuclear power plants from 1973 thru 1976, 2943 (PB--295100)
Summary of radioactivity released in effluents from nuclear power plants from 1972 thru 1975, 2944 (PB--296289)
Transfer parameters of fission and activation products present in effluents of nuclear power reactors, 2925 (IAEA--212)
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
NUCLEAR POWER PLANTS/RADIOACTIVE MATERIALS
Radioactive materials in California, 2817
NUCLEAR POWER PLANTS/RADIOACTIVE WASTE DISPOSAL
Existing nuclear sites can be used for new powerplants and nuclear waste storage, 2664 (EMD--80-67)
NUCLEAR POWER PLANTS/RADIOACTIVE WASTE FACILITIES
Liquid effluent treatment in nuclear power plants with light water reactors, 1107
NUCLEAR POWER PLANTS/RADIOACTIVE WASTE MANAGEMENT
Commercial nuclear reactors and waste: the current status, 517 (PNL--3317-1)
Low-level radioactive waste management. Volume I: current power reactor low-level radwaste. Final report, 497 (PB--80-105042)
Modification of the waste management principles for nuclear power plants. New licensing requirements, 544
Nuclear power plant waste management, 554
On-site management of power reactor wastes. Report on the international symposium held at Zuerich from 26 to 30 March 1979, 2687
On-site permanent facilities for processing and disposal of radioactive waste from nuclear power plants of Kraftwerk Union, 2986
Power-reactor low-level radioactive waste generation and waste management practices evaluation. Report E. Policy recommendations, conclusions, and summary, 483 (NUS--3383)
Technological lyne for reception and storage of liquid concentrated radioactive wastes and spent sorbents for the Loviisa nuclear power plant and for serial blocks of nuclear power plants with WWR-440 type reactors (System TW), 834 (INIS-mf--5572)
Updating radwaste processing, storage, 2903
NUCLEAR POWER PLANTS/RADIOACTIVE WASTE PROCESSING
Dow process for the solidification of low-level radioactive wastes from nuclear power plants, 2974
Low-level radioactive waste management. Volume III. Feasibility of volume-reduction processes, 624 (CAEC--007(Vol.3))
Measured performance of four PWR liquid radioactive waste treatment systems, 2920 (CONF-800607--9)
Nuclear power plant (Patent), 2855
Process and installation for the disposal of liquid radioactive waste (Patent), 3454
Prospects for liquid, gaseous and solid waste treatment systems for ENEL's reference power station BWR and PWR, 2985
Purification of radioactive sewage containing large quantities of detergents, 2932 (INIS-mf--5570)
Radiochemical problems in atomic energy and the role of nuclear power plants research institute in their solution (Czechoslovakia), 579
Solidification of liquid wastes from nuclear power plants by mobile solidification units, 2970
Treatment of radioactive effluent water in nuclear power stations, 2954
Unit operations used to treat process and/or waste streams at nuclear power plants, 2921 (CONF-800802--14)
Volume reduction system of radioactive waste by electrodialysis, 1185
NUCLEAR POWER PLANTS/RADIOACTIVE WASTE STORAGE
Existing nuclear sites can be used for new powerplants and nuclear waste storage, 2664 (EMD--80-67)
Facing the challenge of nuclear waste, 3136
Nuclear power plant approach to temporary on-site storage of radioactive waste, 1711 (PB--296947)
On-site management of power reactor wastes. Report on the international symposium held at Zuerich from 26 to 30 March 1979, 2687
NUCLEAR POWER PLANTS/RADIOACTIVE WASTES
Commercial nuclear reactors and waste: the current status, 517 (PNL--3317-1)
Effects of proposed changes in regulations on low-level radwaste shipments, 2671
Radioecology in resolving environmental health problems, 3305 (INIS-mf--4978)
Summary of radioactivity released in effluents from nuclear power plants from 1973 thru 1976, 2943 (PB--295100)
Summary of radioactivity released in effluents from nuclear power plants from 1972 thru 1975, 2944 (PB--296289)
Waste inventory report for reactor and fuel fabrication facility wastes, 586
NUCLEAR POWER PLANTS/RADIOACTIVITY
Can we fix nuclear energy, 3070
NUCLEAR POWER PLANTS/REACTOR DECOMMISSIONING
Decommissioning nuclear power plants: what are the problems that need to be overcome, 2816
Decommissioning of nuclear power plants, 3049
Generic environmental impact statement, 2811 (NUREG/CP--0008)
Residual radioactivity, 2810 (NUREG/CP--0008)
State workshops for review of the Nuclear Regulatory Commission's decommissioning policy, 2806 (NUREG/CP--0008)
Suggested policy and rule changes, 2807 (NUREG/CP--0008)
NUCLEAR POWER PLANTS/REACTOR DISMANTLING
Decommissioning nuclear power plants: what are the problems that need to be overcome, 2816
NUCLEAR POWER PLANTS/REACTOR LICENSING
Nuclear power plant licensing procedures in the United Kingdom, 3148
NUCLEAR POWER PLANTS/REACTOR OPERATION
UPDATE: Nuclear Power Program information and data, July-August 1979, 2832 (DOE/TIC--10259)
NUCLEAR POWER PLANTS/REACTOR SAFETY
Design for safety of nuclear power plants. A code of practice, 3089
Nuclear safety and radioactive wastes, 3073
NUCLEAR POWER PLANTS/REVIEWS
Illinois and nuclear energy, 2668 (NP--25098)

NUCLEAR POWER PLANTS/RISK ASSESSMENT
Consequence model of the German reactor safety study, 3061
Nuclear energy: production and problems, 2563
NUCLEAR POWER PLANTS/SAFETY
Nuclear power and safety - summary and conclusions of the report of the Nuclear Power Commission. 1. General views, assumptions and main conclusion, 3056
NUCLEAR POWER PLANTS/SITE SELECTION
Existing nuclear sites can be used for new powerplants and nuclear waste storage, 2664 (EMD--80-67)
Nuclear power plants in Norway - siting and effect on surroundings, 2916
Policy based on expansion of existing sites, 2911 (ORAU/IEA--80-3(P))
Risk benefit analysis of site alternatives for a nuclear power plant producing both electricity and district heat, 2910 (INIS-mf--4778)
Siting policy for an acceptable nuclear future, 2914
Soviet nuclear programme in site of difficulty, 2912
NUCLEAR POWER PLANTS/SPENT FUEL CASKS
Effects of proposed changes in regulations on low-level radwaste shipments, 2671
NUCLEAR POWER PLANTS/SPENT FUEL STORAGE
Compact storage of spent fuel elements in nuclear power plants with LWR reactors, 3037 (INIS-mf--5181)
Spent Nuclear Fuel Storage Program user's guide (SNFSM Code), 2838 (DOE/EIA/8589--2)
NUCLEAR POWER PLANTS/STACK DISPOSAL
Method for assessing the annual dose to the most exposed individual from tritium and ^{14}C reactor discharges to atmosphere, 3592 (CEGB-RD/B/N--4668)
NUCLEAR POWER PLANTS/TRADE
Twilight of nuclear exports, 3128
NUCLEAR POWER PLANTS/WASTE MANAGEMENT
Guide to the safe handling of radioactive wastes at nuclear power plants, 553
NUCLEAR REACTION ANALYZERS/DESIGN
Monte Carlo calculational design of an NDA instrument for the assay of waste products from highly enriched spent fuels, 103

OFF-GAS SYSTEMS
Analysis of a non-isothermal gas stripper with volatile solvent, 863 (K/ET--174)
Analysis of a gas absorption system with soluble carrier gas and volatile solvent, 861 (K--2007)
Investigation of methyl iodide adsorption on impregnated alumina, 1051
Process for the removal of iodine and iodine compounds from gases and vapours and sorption agents impregrated with silver nitrate to carry out the process (Patent), 1120
OFF-GAS SYSTEMS/BWR TYPE REACTORS
Technical quarterly progress report, January 1-March 31, 1979, 443 (ENICO--1012)
OFF-GAS SYSTEMS/COLD TRAPS
Assessment of the acceptability of performance of installed iodine trapping plant: comments on the paper by Hyam and Manley in Nuclear Energy, February 1979, and a reply from these authors, 1026
OFF-GAS SYSTEMS/DESIGN
Off-gas treatment system for INEL radioactive slagging pyrolysis incinerator, 1249
Remotely operated organic liquid waste incinerator for the fuels and materials examination facility, 776 (HEDL-SA--2009-FP)
OFF-GAS SYSTEMS/EWA REACTOR
Investigations of radioactive iodine catching by ventilation system of the Ewa and Marila reactors, 850 (INIS-mf--5574)
OFF-GAS SYSTEMS/FILTERS
Charging device for filter materials (Patent), 2853
OFF-GAS SYSTEMS/FUEL REPROCESSING PLANTS
Developments in effluent control for breeder reprocessing facilities, 36 (CONF-800334--7)
Evaluation of submicron particle size classification and collection techniques for nuclear facility off-gas streams, 45 (ENICO--1003)
Iodine 129 trapping in irradiated fuel reprocessing plants, 121
Iodine evolution from nuclear fuel dissolver solutions by air sparging, 39 (CONF-800802--18(Draft))
Iodine retention in La Hague reprocessing plant, 122
Kr-85 separation from the exhaust air of reprocessing plants. Technical realization and results, 1052
Method and equipment to strip traces of noble gas, particularly krypton, from a gas mixture having carbon dioxide as a component (Patent), 1036
Method for retention of tritium released during reprocessing spent nuclear fuel and storing the liquid radioactive waste produced thereby (Patent), 1311
Method of purifying gases from reprocessing of spent fuel elements containing radioactive substances (Patent), 1312
Organic iodine removal from simulated dissolver off-gas streams using silver-exchanged mordenite, 685 (CONF-801038--1(Draft))
Preliminary safety evaluation of a commercial-scale krypton-85 encapsulation facility, 47 (ENICO--1055)
Process-development and improvement of off gas filters for reprocessing plants, 1541 (KFK--2750)
Process for the decontamination of waste gases of a reprocessing plant for spent fuel and/or fertile material and installation for its realisation (Patent), 88
Removal processes for radioactive rare gas of fuel reprocessing plant, 1154
Separation of noble gas mixtures by low temperature rectification: Development for the purification of the offgas of nuclear facilities, 1071
Technical feasibility of krypton-85 storage in sodalite, 665 (CONF-791112--17)
Technical requirements for the control of ^{129}I in a nuclear fuels reprocessing plant, 945 (PNL--3186)
Technical development of the filter system for dissolver off gas cleanup, 872 (KFK--2750)
OFF-GAS SYSTEMS/GENKAI-2 REACTOR
Alteration of reactor installation (unit 2) in Genkai Nuclear Power Station of Kyushu Electric Power Co., Inc., 2756
OFF-GAS SYSTEMS/IDAHO CHEMICAL PROCESSING PLANT
Continuous plutonium monitor for nuclear facility off-gas streams, 2419 (ENICO--1054)
Description of the stack monitoring system and effluent measuring techniques at the Idaho Chemical Processing Plant, 757 (ENICO--1005)
OFF-GAS SYSTEMS/INCINERATORS
Defense waste cyclone incinerator demonstration program: October 1979-March 1980, 893 (MLM--2716)
Off-gas treatment system for INEL radioactive slagging pyrolysis incinerator, 1249
OFF-GAS SYSTEMS/IODINE 131
Collection efficiency of TEDA-impregnated actived charcoal for low concentration of methyl iodide in air, 857 (JAERI-M--8158)
OFF-GAS SYSTEMS/KRYPTON 85
Method and equipment to strip traces of noble gas, particularly krypton, from a gas mixture having carbon dioxide as a component (Patent), 1036
Separation of noble gas mixtures by low temperature rectification: Development for the purification of the offgas of nuclear facilities, 1071
OFF-GAS SYSTEMS/LOFT REACTOR
Radioactive gas and hydrogen removal after a LOCE at the LOFT Facility, 3004 (CONF-800607--20)

OFF-GAS SYSTEMS/MARIA REACTOR
Investigations of radioactive iodine catching by ventilation system of the Ewa and Marila reactors, 850 (INIS-mf--5574)
OFF-GAS SYSTEMS/NUCLEAR FACILITIES
Advances in the fluorocarbon process for decontamination of nuclear facility off-gas (R-12 (dichlorodifluoromethane)), 864 (K/ET--5010)
Method and equipment to exchange and remove the waste from aerosol filter elements for nuclear plants in a sealed casing (Patent), 3290
Plant for separating gaseous hydrocarbons and radioactive iodine isotopes from waste air (Patent), 1191
Removal of noble gases by selective absorption (On fluorocarbon), 2844 (K/ET--5007)
Removal of radioiodine species from gaseous stream on inorganic absorbents. Final report for the period 1 November 1976 - 31 October 1977, 49 (IAEA-R--1841-F)
Separation of noble gas mixtures by low temperature rectification: Development for the purification of the offgas of nuclear facilities, 1071
OFF-GAS SYSTEMS/NUCLEAR POWER PLANTS
Apparatus for reducing radioactive gaseous wastes (Patent), 1302
Catching of radioactive iodine and iodine compounds by nonorganic sorbents, 838 (INIS-mf--5574)
Investigations on methods and means for removal of radioactive aerosols and gases from air discharges for period of 1971 - 1975, 837 (INIS-mf--5574)
Radioactivity reducing device (Patent), 2858
OFF-GAS SYSTEMS/PERFORMANCE
Radiochromatographic system for off-gas decontamination at the WWER nuclear power plants, 2753
OFF-GAS SYSTEMS/POLLUTION CONTROL EQUIPMENT
Radioactivity reducing device (Patent), 2858
OFF-GAS SYSTEMS/RADIOACTIVE WASTE DISPOSAL
Method and equipment to exchange and remove the waste from aerosol filter elements for nuclear plants in a sealed casing (Patent), 3290
OFF-GAS SYSTEMS/RADIOACTIVE WASTE FACILITIES
Evaluation of submicron particle size classification and collection techniques for nuclear facility off-gas streams, 45 (ENICO--1003)
R and D for an off-gas treatment system for a slagging pyrolysis radioactive waste incinerator. Final report for Phase III, 995 (SAI--132-79-764-LJ)
OFF-GAS SYSTEMS/RADIOACTIVE WASTE PROCESSING
Cleaning of stack gases from combustion of low level radioactive waste in Studsvik, Sweden, 1006 (STUDSVIK/K1/4--79/31)
Spray calcination/in-can melting: effluent characterization and treatment, 941 (PNL--3109)
OFF-GAS SYSTEMS/SAMPLING
Defense waste cyclone incinerator demonstration program: October 1979-March 1980, 893 (MLM--2716)
OFF-GAS SYSTEMS/SLAGGING PYROLYSIS PROCESS
R and D for an off-gas treatment system for a slagging pyrolysis radioactive waste incinerator. Final report for Phase II, 994 (SAI--78-904-LJ)
OFF-GAS SYSTEMS/WWER TYPE REACTORS
Radiochromatographic system for off-gas decontamination at the WWER nuclear power plants, 2753
OFFSHORE NUCLEAR POWER PLANTS/MELTDOWN
Liquid pathways generic studies: results, interpretation, and design implications, 3027 (CONF-800403--(Vol.2))
OHIO/ECOLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
OHIO/GEOLOGICAL SURVEYS
Preliminary regional study of the present and possible future oil and gas development in the areas of thick rock salt and shale deposits of Michigan, Ohio, Pennsylvania, and western New York as of December 1975, 1667 (ORNL/SUB--75/87989)
OHIO/GEOLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
Regional summary and recommended study area for Ohio and New York portions of the Salina Basin, 1627 (ONWI--29)
OHIO/HYDROLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
OHIO/METEOROLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
OHIO/PETROLEUM GEOLOGY
Preliminary regional study of the present and possible future oil and gas development in the areas of thick rock salt and shale deposits of Michigan, Ohio, Pennsylvania, and western New York as of December 1975, 1667 (ORNL/SUB--75/87989)
OHIO/RADIOACTIVE WASTE FACILITIES
Preliminary evaluation of the environmental aspects of potential radioactive waste repository study areas in the Ohio and New York portions of the Salina Basin, 1625 (ONWI--23)
Regional summary and recommended study area for Ohio and New York portions of the Salina Basin, 1627 (ONWI--29)
OHIO/SOCIO-ECONOMIC FACTORS
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
OIL SHALE DEPOSITS/STRATIGRAPHY
Preliminary regional study of the present and possible future oil and gas development in the areas of thick rock salt and shale deposits of Michigan, Ohio, Pennsylvania, and western New York as of December 1975, 1667 (ORNL/SUB--75/87989)
OKG-1 REACTOR/REACTOR OPERATION
Quarterly report from the Swedish Nuclear Power Inspectorate Jul - Sep 1979, 2675 (INIS-mf--5666)
OKG-2 REACTOR/REACTOR OPERATION
Quarterly report from the Swedish Nuclear Power Inspectorate Jul - Sep 1979, 2675 (INIS-mf--5666)
OKLO PHENOMENON
Migration paths for Oklo reactor products and applications to the problem of geological storage of nuclear wastes, 9
Relevance of the studies of the OKLO natural nuclear reactors to the storage of radioactive wastes, 8
Relevance of natural retention experience to nuclear waste management, 2357
OLIVINE/SORPTIVE PROPERTIES
Sorption of americium on major rock-forming minerals, 2191
OMRE REACTOR/REACTOR DECOMMISSIONING
Decontamination and decommissioning of the Organic Moderated Reactor Experiment facility (OMRE), 3006 (EGG--2059)
OMRE REACTOR/REACTOR DISMANTLING
Decontamination and decommissioning of the Organic Moderated Reactor Experiment facility (OMRE), 3006 (EGG--2059)
ONTARIO/FEED MATERIALS PLANTS
Environmental factors related to the development of a new uranium refinery, 2492
ONTARIO/URANIUM MINES
Influence of uranium mill tailings on tree growth at Elliot Lake, 2521
ONTOGENESIS/RESEARCH PROGRAMS
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
OPIX PROCESS
Separation of americium, curium, and rare earths from high-level wastes by oxalate precipitation: experiments with synthetic waste solutions, 910 (ORNL/TM--6445)
ORE PROCESSING
See also MILL TAILINGS
ORE PROCESSING/LIQUID WASTES
Deactivation of waste waters in the Czechoslovak Uranium Industry, 695 (CS-INIS--258)
Experience with liquid radioactive waste treatment, 696 (CS-INIS--258)
ORE PROCESSING/RADIOACTIVE EFFLUENTS
Some environmental aspects of uranium mining and milling in Northern Australia, 2515
OREGON/HYDROLOGY
Surface hydrologic investigations of the Columbia Plateau region, Washington, 3520 (RHO-BWI-ST--6)
OREGON/RADIATION MONITORING
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
OREGON STATE TRIGA REACTOR
See OSTR REACTOR
ORGANIC ACIDS
(Excluding NUCLEIC ACIDS and NUCLEOTIDES.)
See also HUMIC ACIDS
ORGANIC ACIDS/CHEMICAL REACTIONS
Organic compounds identified in trench leachates from low-level radioactive waste disposal sites, 3449
ORGANIC ACIDS/LEACHING
Organic compounds identified in trench leachates from low-level radioactive waste disposal sites, 3449
ORGANIC COMPOUNDS
See also HYDROCARBONS
NUCLEIC ACIDS
ORGANIC ACIDS
ORGANOMETALLIC COMPOUNDS
OTHER ORGANIC COMPOUNDS
PROTEINS
ORGANIC COMPOUNDS/CHEMICAL REACTIONS
Status report on the importance of natural organic compounds in groundwater as radionuclide-mobilizing agents, 1636 (ONWI--84)
ORGANIC COMPOUNDS/ECOLOGICAL CONCENTRATION
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
ORGANIC COMPOUNDS/ENVIRONMENTAL TRANSPORT
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
ORGANIC COMPOUNDS/RADIOLYSIS
Gamma-radiolysis of organic compounds and alpha-radiolysis of water, 1536 (KBS-TR--114)
ORGANIC ION EXCHANGERS
Application of ion exchangers with crown ethers as anchor groups in analytical and preparative chemistry, 1346

ORGANIC ION EXCHANGERS/COMPARATIVE EVALUATIONS
Comparison of anion exchange resins for recovering plutonium from nitric acid waste, 1069
ORGANIC MODERATED REACTOR EXPERIMENT
See OMRE REACTOR
ORGANIC SOLVENTS
Incineration of contaminated organic solvents in a fluidized-bed calciner, 687 (CONF-801038--6)
ORGANIC SOLVENTS/CHEMICAL RADIATION EFFECTS
Radiation damage of organic extractant in partitioning of high-level liquid waste, (2). Calculation of radiation dose absorbed in organic solvent in extraction process, 1170
ORGANOMETALLIC COMPOUNDS/CHEMICAL REACTIONS
Organic compounds identified in trench leachates from low-level radioactive waste disposal sites, 3449
ORGDP
(Oak Ridge Gaseous Diffusion Plant.)
ORGDP/RADIOACTIVE EFFLUENTS
UF_6 release experience and prevention in United States gaseous diffusion plants, 2433 (KY--690)
ORNL
(Oak Ridge National Laboratory.)
ORNL/AIR POLLUTION
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
ORNL/PERSONNEL MONITORING
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
ORNL/RADIATION MONITORING
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
ORNL/RADIOACTIVE EFFLUENTS
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
ORNL/RADIOACTIVE WASTE MANAGEMENT
Programmatic assessment of radioactive waste management: nuclear fuel and waste programs, 491 (ORNL/SUB--80/13837/3)
Progress report on the design of a Low-Level Waste Pilot Facility at ORNL, 412 (CONF-800416--3)
Shale fracturing injections at Oak Ridge National Laboratory: 1977-1979 series, 1681 (ORNL/TM--7421)
Waste sludge resuspension and transfer: development program, 1678 (ORNL/TM--7125)
ORNL/RADIOACTIVE WASTES
Radioactive waste disposal areas and associated environmental surveillance data at Oak Ridge National Laboratory, 3418 (ORNL/TM--6893)
ORNL/RESEARCH PROGRAMS
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
ORNL/SAFETY
Industrial safety and applied health physics. Annual report for 1978, 3497 (ORNL--5543)
ORNL/WATER POLLUTION
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
ORSAY CYCLOTRON/DEMOLITION
Data on the activation and dismantling of the 155MeV synchrocyclotron of the Institute of Nuclear Physics at Orsay, 3664
OSKARSHAMN-1 REACTOR
See OKG-1 REACTOR
OSKARSHAMN-2 REACTOR

Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
PACIFIC OCEAN/RADIATION MONITORING
Plutonium in the marine environment of the Marshall Islands, 3444 (UCRL--52000-80-10)
PACKAGING/IMPACT TESTS
Scale model experiments of energy material shipping containers, 3602 (DOE/EV--0046(Vol.2))
PACKAGING/SAFETY
Scale model experiments of energy material shipping containers, 3602 (DOE/EV--0046(Vol.2))
PACKAGING/SPECIFICATIONS
Criteria for packaging transuranic waste for receipt at the Idaho National Engineering Laboratory radioactive waste management complex offsite generated waste, 1491 (IDO--10074(Rev.1))
PADUCAH PLANT/RADIOACTIVE EFFLUENTS
UF_6 release experience and prevention in United States gaseous diffusion plants, 2433 (KY--690)
PAKS-1 REACTOR/ENVIRONMENTAL IMPACTS
Environmental protection of nuclear power stations, 2999
PAKS-1 REACTOR/RADIATION HAZARDS
Radioactive contamination of the atmosphere and its effects on population in the neighbourhood, 2745
PAKS-1 REACTOR/RADIOACTIVE EFFLUENTS
Environmental protection of nuclear power stations, 2999
Radioactive contamination of the atmosphere and its effects on population in the neighbourhood, 2745
PAKS-1 REACTOR/RADIOACTIVE WASTE DISPOSAL
Radioactive waste disposal, 2513
PAKS-1 REACTOR/RADIOACTIVE WASTE PROCESSING
Treatment of liquid and solid waste in the power station area, 2968
PAKS-2 REACTOR/RADIATION HAZARDS
Radioactive contamination of the atmosphere and its effects on population in the neighbourhood, 2745
PAKS-2 REACTOR/RADIOACTIVE EFFLUENTS
Radioactive contamination of the atmosphere and its effects on population in the neighbourhood, 2745
PAKS-2 REACTOR/RADIOACTIVE WASTE DISPOSAL
Radioactive waste disposal, 2513
PAKS-2 REACTOR/RADIOACTIVE WASTE PROCESSING
Treatment of liquid and solid waste in the power station area, 2968
PALLADIUM/ADSORPTION
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
PALLADIUM/CATALYTIC EFFECTS
Removal of tritium and tritium-containing compounds from a gaseous stream (Patent), 2657
PALLADIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
PALLADIUM/RADIOACTIVE WASTE PROCESSING
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
Recovery of palladium and technetium values (Patent), 1123
PALLADIUM/SEPARATION PROCESSES
Nuclear waste chemistry (Pd-Ru separation), 488 (ORNL--5665)
PALLADIUM/SOLVENT EXTRACTION
Method for recovering palladium and technetium values from nuclear fuel reprocessing waste solutions (Patent) 1112
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
Recovery of palladium and technetium values (Patent), 1123
Solvent extraction of palladium with sulfur reagents from mineral acid medium. Communication 1. Solvent extraction with symmetrical dialkyl- and diaryl sulfides from nitric acid medium, 790 (INIS-mf--5564)
PALLADIUM 107/ISOTOPE PRODUCTION
Method for the recovery of palladium and technetium, 1122
PARTICLE RESUSPENSION/MATHEMATICAL MODELS
Potential importance of resuspension during chronic releases to the atmosphere (Contribution of resuspension of radioisotopes to air concentrations and radiation exposures), 3259
PARTICLE SIZE/CONTROL
Role of seed particles in the prediction and control of product particle size in fluidized-bed dryers, 764 (ENICO--1036)
PATHOLOGICAL CHANGES/RADIOINDUCTION
Systemic effects of radiation exposure on rodents inhabiting liquid and solid radioactive waste storage areas, 3473 (IDO--12088)
PATIENTS/RADIATION MONITORING
Radiation hazard monitoring in ^{131}I therapy in and out clinic, 3694
PATIENTS/RADIATION PROTECTION
Hygiene of ionizing radiations, 3699
PATIENTS/RADIOACTIVE WASTES
Contamination of surroundings by patients treated with ^{131}I, 3382
PEARL SPAR

See DOLOMITE
PELLETS/RADIATION EFFECTS
Significance of radiation effects in solid radioactive waste, 736 (DP-MS--80-27)
PENNSYLVANIA/ECOLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
PENNSYLVANIA/GEOLOGICAL SURVEYS
Preliminary regional study of the present and possible future oil and gas development in the areas of thick rock salt and shale deposits of Michigan, Ohio, Pennsylvania, and western New York as of December 1975, 1667 (ORNL/SUB--75/87989)
PENNSYLVANIA/GEOLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
PENNSYLVANIA/HYDROLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
PENNSYLVANIA/METEOROLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
PENNSYLVANIA/PETROLEUM GEOLOGY
Preliminary regional study of the present and possible future oil and gas development in the areas of thick rock salt and shale deposits of Michigan, Ohio, Pennsylvania, and western New York as of December 1975, 1667 (ORNL/SUB--75/87989)
PENNSYLVANIA/RADIATION MONITORING
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
PENNSYLVANIA/SOCIO-ECONOMIC FACTORS
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
PERMEABILITY/CONTROL
Infiltration control for low-level radioactive solid waste disposal areas: an assessment, 1672 (ORNL/TM--6473)

Calculation of the depletion of a radioactive plume in the atmosphere and subsequent exposure due to deposited activity, 3271
PLUTONIUM/ACTIVATION ANALYSIS
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
PLUTONIUM/ADSORPTION
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1978, 1774 (PNL-SA--7352(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1979, 2468 (PNL-SA--8571(Vol.2))
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, October 1-December 31, 1979, 1552 (LA--8210-PR)
Nuclide transport by groundwater in Swedish bedrock, 2581
Plutonium adsorption by selected inorganic compounds, 890 (MLM--2692)
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0988C)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, July 1-September 30, 1979, 1550 (LA--8152-PR)
Solution species of ^{239}Pu in oxidizing environments: I. Polymeric Pu(IV), 1771 (PNL-SA--7352(Vol.1))
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
Sorption-desorption of long-lived radionuclide species on geologic media. Annual report, 2466 (PNL-SA--8571(Vol.2))
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Studies of radionuclide availability and migration at the Nevada Test Site relevant to radioactive waste disposal, 1769 (PNL-SA--7352(Vol.1))
Theoretical and experimental evaluation of waste transport in selected rocks, 1768 (PNL-SA--7352(Vol.1))
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
PLUTONIUM/AUTORADIOGRAPHY
Autoradiographic studies of actinide sorption in groundwater systems, 3432 (CONF-800433--4)
Autoradiographic study of actinide sorption on climax stock granite, 1662 (ORNL--5617)
PLUTONIUM/CALORIMETRY
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Method for calibration of plutonium NDA, 2627 (MLM--2755(OP))
PLUTONIUM/CHEMICAL RADIATION EFFECTS
Oxidatyon of plutonium to higher states by radiation, 2189
PLUTONIUM/CHEMICAL STATE
Assessment of plutonium chemical forms in groundwater, 3458
Radiolytic oxidation and reduction of plutonium, 1431 (CONF-791112--49)
Solution species of ^{239}Pu in oxidizing environments: I. Polymeric Pu(IV), 1771 (PNL-SA--7352(Vol.1))
Solution species of ^{239}Pu [V] in the environment, 1772 (PNL-SA--7352(Vol.1))
Solution species of plutonium in the environment, 3445
PLUTONIUM/CHEMISTRY
Behaviour of Np and Pu in the reprocessing of thorium-containing nuclear fuels, 31 (AED-Conf--78-274-000)
PLUTONIUM/DELAYED NEUTRON ANALYSIS
Borehole assay for plutonium using delayed-neutron activation analysis, 3303
PLUTONIUM/DESORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
PLUTONIUM/ENERGY POLICY
Carter anti-plutonium policy, 3131
PLUTONIUM/ENVIRONMENTAL EXPOSURE PATHWAY
Effect of a long-term release of plutonium and americium into an estuarine-coastal sea ecosystem. 1. Development of an assessment methodology, 3484
PLUTONIUM/ENVIRONMENTAL TRANSPORT
Migration of transuranic nuclides in earthen burial trenches at the Savannah River Plant, 2310
Radiolytic oxidation and reduction of plutonium, 1431 (CONF-791112--49)
Solution species of ^{239}Pu in oxidizing environments: I. Polymeric Pu(IV), 1771 (PNL-SA--7352(Vol.1))
Solution species of ^{239}Pu [V] in the environment, 1772 (PNL-SA--7352(Vol.1))
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))

Transuranic distribution beneath a retired underground disposal facility, Hanford Site, 1869 (RHO-SA--131)
PLUTONIUM/EXTRACTION CHROMATOGRAPHY
Extraction chromatographic removal of Np and Pu during the reprocessing of spent Th-U fuel, 1022
PLUTONIUM/FISSION PRODUCTS
Development of ultrafiltration and adsorbents: April-September 1979, 889 (MLM--2684)
PLUTONIUM/GAMMA SPECTROSCOPY
Nondestructive assay system for use in decommissioning a plutonium-handling facility, 29
PLUTONIUM/HUMAN POPULATIONS
Determination of plutonium in man, 3324 (LA--8023-PR)
PLUTONIUM/INGESTION
Risk relativities (Population exposure to radiation), 2897
PLUTONIUM/INVENTORIES
Radioactive waste disposal-a comparison of alternative nuclear fuel cycles, 2286
PLUTONIUM/ION EXCHANGE
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Chemistry research and development. Progress report, November 1978-April 1979, 971 (RFP--2952)
Comparison of anion exchange resins for recovering plutonium from nitric acid waste, 1069
Kilogram-scale purification of americium by ion exchange, 72 (PNL-SA--7844)
Recovery, purification, and concentration of plutonium and americium from the aqueous wastes discharged in the reprocessing studies, 1020 (LA-tr--80-17)
Removal of plutonium and americium from alkaline waste solutions (Patent), 1156
PLUTONIUM/LEACHING
Leach rates of high activity waste from borosilicate glass, 2226
Leaching of actinides and technetium from simulated high-level waste glass, 513 (PNL--3152)
PLUTONIUM/MARITIME TRANSPORT
Considerations in the transportation of spent fuel and other radioactive materials by sea, 2551 (PNL-SA--6523)
PLUTONIUM/MATERIALS HANDLING
Handling of alpha active material, 2557 (STUDSVIK/K1/4--78/9)
PLUTONIUM/MOBILITY
Analysis of Pu-release consequences on the environmental geochemistry, 2582
PLUTONIUM/MONITORING
Continuous plutonium monitor for nuclear facility off-gas streams, 2419 (ENICO--1054)
Theoretical comparison of the enhanced variance and twin-gate methods for monitoring plutonium in waste, 3635
PLUTONIUM/NEUTRON DETECTION
Measurement system for use in the selection of plutonium contaminated waste for disposal, 1388 (AERE-R--8301)
PLUTONIUM/NEUTRON DETECTORS
Theoretical comparison of the enhanced variance and twin-gate methods for monitoring plutonium in waste, 3635
PLUTONIUM/NEUTRON LOGGING
Plutonium waste crib logging using the prompt fission neutron uranium logging system, 1482 (GJBX--122(80))
PLUTONIUM/NONDESTRUCTIVE ANALYSIS
In situ nondestructive plutonium assay for an electropolishing bath, 1255
Measurement of uranium and plutonium in solid waste by passive photon or neutron counting and isotopic neutron source interrogation, 469 (LA--8294-MS)
Uranium and plutonium assay of crated waste by gamma-ray, singles-neutron, and slow-neutron coincidence counting, 2635
PLUTONIUM/NUCLEAR REACTION ANALYSIS
Measurement of uranium and plutonium in solid waste by passive photon or neutron counting and isotopic neutron source interrogation, 469 (LA--8294-MS)
PLUTONIUM/OXIDATION
Oxidatyon of plutonium to higher states by radiation, 2189
PLUTONIUM/PRECIPITATION
Recovery, purification, and concentration of plutonium and americium from the aqueous wastes discharged in the reprocessing studies, 1020 (LA-tr--80-17)
PLUTONIUM/PRODUCTION
Community's R and D programme on radioactive waste management and storage. 1977 2. annual progress report, 1480 (EUR--6128)
Process technology and process development. Rockwell Hanford Operations semiannual report, October 1978-March 1979, 73 (RHO-LD--79-3A)
PLUTONIUM/PURIFICATION
Plutonium recovery at the Los Alamos Scientific Laboratory, 880 (LA-UR--80-1168)
PLUTONIUM/RADIATION MONITORING
Monitoring of plutonium contaminated solid waste streams. Chapter II: principles and theory of radiometric assay, 3434 (EUR--5636)
Monitoring of plutonium contaminated solid waste streams. Chapter IV: Passive neutron assay, 447 (EUR--6027)
PLUTONIUM/RADIOACTIVE WASTE PROCESSING
Investigations on the extraction of Pu from MAW, 609 (AED-Conf--78-274-018)
Recovery of actinide values (Patent), 1124
PLUTONIUM/RADIOECOLOGICAL CONCENTRATION
Statistical considerations and survey of plutonium concentration variability in some terrestrial ecosystem components, 3310
PLUTONIUM/RADIONUCLIDE MIGRATION
Environmental transuranic and moisture assay by passive activation, 3352
Migration of transuranic nuclides in earthen burial trenches at the Savannah River Plant, 1465 (DP-MS--79-20)
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0908C)
PLUTONIUM/RECOVERY
Bidentate organophosphorus extraction of americium and plutonium from Hanford Plutonium Reclamation Facility waste, 618 (ARH-SA--203)
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Chemistry research and development. Progress report, November 1978-April 1979, 971 (RFP--2952)
Method to recover nuclear fuel from waste material and device to carry out the method (Patent), 1187
Plutonium recovery goes on-steam, 86
Recovery of plutonium from HEPA filters by Ce(IV): promoted dissolution of PuO_2 and recycle of the cerium promoter, 911 (ORNL/TM--6802)
Recovery of plutonium from HEPA filters by Ce(IV)-promoted dissolution of PuO_2 and recycle of the cerium promoter, 38 (CONF-800743--1)
PLUTONIUM/REMOVAL
Melting metal waste for volume reduction and decontamination, 680 (CONF-800802--11)
PLUTONIUM/SEPARATION PROCESSES
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Investigation into plutonium separation from sorbents and high-active wastes of gas-fluoride technology, 55 (INIS-mf--5565)
Radiochemical separation of neptunium and plutonium from leaching of reactor waste glass in brine solutions, 2073 (UCRL--82798)
Radiochemical separation of plutonium from low-activity waste waters, 783 (INIS-mf--4637)
Recovery of actinoids from waste solutions of fuel reprocessing. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, 2, 859 (JAERI-M--8339)
Separation methods used for large-scale production of transplutonium elements. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, (1), 858 (JAERI-M--8240)
Work within the coordinated programme on environmental evaluation and hazard assessment of the separation of the actinides from the high-level waste from fuel reprocessing followed by either transmutation or separate disposal. Final report for the period 1 November 1976 - 31 October 1977, 449 (IAEA-R--1898-F)
PLUTONIUM/SOLUBILITY
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, October 1-December 31, 1979, 1552 (LA--8210-PR)
PLUTONIUM/SOLVENT EXTRACTION
Bidentate organophosphorus solvent extraction process for actinide recovery and partition, 1085
Chemistry research and development. Progress report, November 1978-April 1979, 971 (RFP--2952)
Exxon nuclear fuel recovery and recycling center: process description, 95
Plutonium separation by reduction stripping. Application to processing of mixed oxide $(U,Pu)O_2$ fuel fabrication wastes, 627 (CEA-R--4946)
Recovery of actinide values (Patent), 1124
Recovery process (Patent), 562
Reducing the long-term hazard of reactor waste through actinide removal and destruction in nuclear reactors, 1024
Removal of actinides from selected nuclear fuel reprocessing wastes, 1179
Separation of uranium and plutonium from an aqueous solution containing phosphoric, sulfuric, and nitric acids by solvent extraction, 1240
PLUTONIUM/SORPTION
Autoradiographic studies of actinide sorption in groundwater systems, 3432 (CONF-800433--4)
Autoradiographic study of actinide sorption on climax stock granite, 1662 (ORNL--5617)
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
Radionuclide sorption and migration studies of getters for backfill barriers, 1918 (SAND--79-1110)
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
PLUTONIUM/SPATIAL DISTRIBUTION
Plutonium in soil adjacent to Rocky Flats Plant, 2507
PLUTONIUM/THERMODYNAMIC PROPERTIES
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Chemistry research and development. Progress report, November 1978-April 1979, 971 (RFP--2952)
PLUTONIUM/TRANSMUTATION

Transmutation of radwaste using accelerators, 990 (RHO-SA--174)
PLUTONIUM/TRANSPORT REGULATIONS
Transport of radioactive materials, 349
PLUTONIUM/TRANSPORTATION SYSTEMS
Risk assessment of energy material transportation systems, 2525 (DOE/EV--0046(Vol.2))
PLUTONIUM/UPTAKE
Cesium-137 in coots (Fulica americana) on Hanford waste ponds: contribution to population dose and offsite transport estimates, 3614 (PB--296947)
PLUTONIUM 237/ADSORPTION
Laboratory studies of Pu-237 sorption on selected minerals under anoxic conditions, 2467 (PNL-SA--8571(Vol.2))
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
PLUTONIUM 237/ENVIRONMENTAL TRANSPORT
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
PLUTONIUM 237/SORPTION
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
PLUTONIUM 238/ADSORPTION
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
PLUTONIUM 238/DISTRIBUTION
Plutonium contamination of the 'Altrhein'. The contamination of the sediments, 3440 (KFK--2892)
PLUTONIUM 238/DISTRIBUTION FUNCTIONS
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
PLUTONIUM 238/ENVIRONMENTAL IMPACTS
Plutonium as an environmental problem, 2516
PLUTONIUM 238/ENVIRONMENTAL TRANSPORT
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
PLUTONIUM 238/ISOTOPE PRODUCTION
Recovery of by-product actinides from power reactor fuels and production of heat source isotopes, 1046
PLUTONIUM 238/RADIATION MONITORING
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
PLUTONIUM 238/RADIOCHEMICAL ANALYSIS
Radiochemical analyses of samples from beneath a solid radioactive waste disposal pit at Los Alamos, New Mexico, 1558 (LA--8422-MS)
PLUTONIUM 238/RADIOECOLOGICAL CONCENTRATION
Ecology studies at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3365 (IDO--12088)
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
Transfer of actinides from the English Channel into the southern North Sea, 3453
PLUTONIUM 238/RADIONUCLIDE MIGRATION
Evaluation of isotope migration, land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
Transfer of actinides from the English Channel into the southern North Sea, 3453
PLUTONIUM 238/RIVERS
Sources of plutonium to the great Miami River, 3464 (ANL--78-65(Pt.3))
PLUTONIUM 238/SORPTIVE PROPERTIES
Actinide diffusion in waste glasses, 853 (INKA-Conf--79-003-004)
PLUTONIUM 239/ADSORPTION
Waste/rock interactions technology. Interactions of plutonyl (VI) with soil minerals, 2465 (PNL-SA--8571(Vol.2))
PLUTONIUM 239/DISTRIBUTION
Plutonium contamination of the 'Altrhein'. The contamination of the sediments, 3440 (KFK--2892)
PLUTONIUM 239/ENVIRONMENTAL TRANSPORT
Leaching technique for studying actinide-contaminated Hanford sediments, 1864 (RHO-LD--98)
PLUTONIUM 239/EXTRACTION CHROMATOGRAPHY
Application of extraction chromatography to the recovery of neptunium, plutonium and americium from an industrial waste, 1023
PLUTONIUM 239/LEACHING
Leach and soil column tests with stored redox sludge, 2411 (ARH--1733)
Leaching characteristics of actinides from simulated reactor waste, Part 2 (Borosilicate glass), 2483 (UCRL--81147(Pt.2))
Leaching characteristics of actinides from simulated reactor waste, 2071 (UCRL--81147(Pt.2)(Rev.1))
Leaching technique for studying actinide-contaminated Hanford sediments, 1864 (RHO-LD--99)
PLUTONIUM 239/METABOLISM
Metabolism and biological effects of the transplutonium elements, 3700
PLUTONIUM 239/RADIATION MONITORING
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
PLUTONIUM 239/RADIOACTIVITY
Plutonium in the marine environment of the Marshall Islands, 3444 (UCRL--52000-80-10)
PLUTONIUM 239/RADIOCHEMICAL ANALYSIS
Radiochemical analyses of samples from beneath a solid radioactive waste disposal pit at Los Alamos, New Mexico, 1558 (LA--8422-MS)
PLUTONIUM 239/RADIOECOLOGICAL CONCENTRATION
Concentrations of the transuranic radionuclides ^{238}Pu, $^{239,240}Pu$, ^{241}Am, ^{242}Cm, and ^{244}Cm in abiotic and biotic components of the Test Reactor Area radioactive leaching ponds, 3472 (IDO--12088)
Ecology studies at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3365 (IDO--12088)
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
Some aspects of accumulation of radionuclides in coastal sediments, 3439 (INIS-mf--5372)
Transfer of actinides from the English Channel into the southern North Sea, 3453
PLUTONIUM 239/RADIOMETRIC ANALYSIS
Control and accountability of special nuclear material waste and scrap by gamma-scan assay, 2637
PLUTONIUM 239/RADIONUCLIDE MIGRATION
Evaluation of isotope migration, land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
Transfer of actinides from the English Channel into the southern North Sea, 3453
PLUTONIUM 239/TOXICITY
Metabolism and biological effects of the transplutonium elements, 3700
PLUTONIUM 240/DISTRIBUTION
Plutonium contamination of the 'Altrhein'. The contamination of the sediments, 3440 (KFK--2892)
PLUTONIUM 240/RADIOACTIVITY
Plutonium in the marine environment of the Marshall Islands, 3444 (UCRL--52000-80-10)
PLUTONIUM 240/RADIOCHEMICAL ANALYSIS
Radiochemical analyses of samples from beneath a solid radioactive waste disposal pit at Los Alamos, New Mexico, 1558 (LA--8422-MS)
PLUTONIUM 240/RADIOECOLOGICAL CONCENTRATION
Concentrations of the transuranic radionuclides ^{238}Pu, $^{239,240}Pu$, ^{241}Am, ^{242}Cm, and ^{244}Cm in abiotic and biotic components of the Test Reactor Area radioactive leaching ponds, 3472 (IDO--12088)
Ecology studies at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3365 (IDO--12088)
Some aspects of accumulation of radionuclides in coastal sediments, 3439 (INIS-mf--5372)
Transfer of actinides from the English Channel into the southern North Sea, 3453
PLUTONIUM 240/RADIONUCLIDE MIGRATION
Evaluation of isotope migration, land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
Transfer of actinides from the English Channel into the southern North Sea, 3453
PLUTONIUM 241/RADIOECOLOGICAL CONCENTRATION
Transfer of actinides from the English Channel into the southern North Sea, 3453
PLUTONIUM 241/RADIONUCLIDE MIGRATION
Transfer of actinides from the English Channel into the southern North Sea, 3453
PLUTONIUM CHLORIDES/RADIOACTIVE WASTE PROCESSING
Use of a bacteria polymer composite to concentrate plutonium from aqueous media, 1091
PLUTONIUM COMPLEXES/CHEMICAL STATE
Assessment of plutonium chemical forms in groundwater, 3458
PLUTONIUM COMPOUNDS/CHEMICAL REACTION KINETICS
Study of some saltless reducers of plutonium and neptunium, 52 (INIS-mf--5564)
Vanadium(5) as oxidant of neptunium and plutonium, 53 (INIS-mf--5564)
PLUTONIUM COMPOUNDS/MOLECULAR STRUCTURE
Polymolybdates as plutonium (IV) hosts, 550
PLUTONIUM COMPOUNDS/OXIDATION
Vanadium(5) as oxidant of neptunium and plutonium, 53 (INIS-mf--5564)
PLUTONIUM COMPOUNDS/REDUCTION
Study of some saltless reducers of plutonium and neptunium, 52 (INIS-mf--5564)
PLUTONIUM DIOXIDE/CHEMICAL PREPARATION
Plutonium scrap processing at the Los Alamos Scientific Laboratory, 879 (LA-UR--80-835)
PLUTONIUM DIOXIDE/DISSOLUTION
Recovery of plutonium from HEPA filters by Ce(IV):

promoted dissolution of PuO_2 and recycle of the cerium promoter, 911 (ORNL/TM--6802)
Recovery of plutonium from HEPA filters by Ce(IV)-promoted dissolution of PuO_2 and recycle of the cerium promoter, 38 (CONF-800743--1)
PLUTONIUM DIOXIDE/LAND TRANSPORT
Radiological risk analysis of truck and rail transportation of nuclear wastes, 179 (CONF-780506--(Vol.2))
PLUTONIUM DIOXIDE/RADIOACTIVE WASTE PROCESSING
Use of a bacteria polymer composite to concentrate plutonium from aqueous media, 1091
PLUTONIUM DIOXIDE/RAIL TRANSPORT
Radiological risk analysis of truck and rail transportation of nuclear wastes, 179 (CONF-780506--(Vol.2))
PLUTONIUM DIOXIDE/SOLUBILITY
Waste/rock interaction technology. Solubility of plutonium compounds and their behavior in soils, 2464 (PNL-SA--8571(Vol.2))
PLUTONIUM DIOXIDE/TRANSPORT
Leak rates of plutonia powder, 3670
PLUTONIUM HYDROXIDES/SOLUBILITY
Waste/rock interaction technology. Solubility of plutonium compounds and their behavior in soils, 2464 (PNL-SA--8571(Vol.2))
PLUTONIUM ISOTOPES/ENVIRONMENTAL TRANSPORT
Chemical migration of radionuclides in soil, 3350
Radioactive waste/soil interactions-migration potential of radionuclides through four soils, 2309
Transuranic distribution beneath a retired underground disposal facility at the Hanford Site, 2506
PLUTONIUM ISOTOPES/LEACHING
Chemical migration of radionuclides in soil, 3350
PLUTONIUM ISOTOPES/MIGRATION
Chemical migration of radionuclides in soil, 3350
PLUTONIUM ISOTOPES/RADIOECOLOGICAL CONCENTRATION
Investigation of the physical and chemical environmental behaviour of radionuclides characterized by a particular biological effectiveness - Pu, Am, Cm, 2432 (KFK--2750)
Plutonium in the lungs of pronghorn antelope near a nuclear fuel reprocessing plant, 3379
PLUTONIUM ISOTOPES/RADIONUCLIDE MIGRATION
Investigation of the physical and chemical environmental behaviour of radionuclides characterized by a particular biological effectiveness - Pu, Am, Cm, 2432 (KFK--2750)
PLUTONIUM ISOTOPES/SPATIAL DISTRIBUTION
Transuranic distribution beneath a retired underground disposal facility at the Hanford Site, 2506
PLUTONIUM NITRATES/DENITRATION
Direct denitration of plutonium nitrate-nitric acid solution in a screw calciner, 1260
PLUTONIUM OXIDES/BIODEGRADATION
Potential microbial impact on transuranic wastes under conditions expected in the Waste Isolation Pilot Plant (WIPP). Annual report, October 1, 1978-September 30, 1979, 1555 (LA--8297-PR)
PLUTONIUM OXIDES/DISSOLUTION
Potential microbial impact on transuranic wastes under conditions expected in the Waste Isolation Pilot Plant (WIPP). Annual report, October 1, 1978-September 30, 1979, 1555 (LA--8297-PR)
PLUTONIUM OXIDES/MAGNETIC SUSCEPTIBILITY
Magnetic susceptibility of sodium disilicate glasses containing PuO_2 (4 to 300°K), 1423 (CONF-790881--1)
PLUTONIUM OXIDES/NONDESTRUCTIVE ANALYSIS
Passive gamma scanner for estimation of plutonium in fabrication waste, 2614 (BARC--986)
PLUTONIUM OXIDES/PNEUMATIC TRANSPORT
Pneumatic transport system development: residuals and releases program at Westinghouse Cheswick site, 2472 (RPDE--79-023)
PLUTONIUM OXIDES/REMOTE HANDLING
Pneumatic transport system development: residuals and releases program at Westinghouse Cheswick site, 2472 (RPDE--79-023)
PLUTONIUM RECYCLE
Experience with the use of recycle plutonium in mixed-oxide fuel in light water reactors in the Federal Republic of Germany, 1180
Plutonium processing for the fast reactor fuel cycle, 85
PLUTONYL COMPOUNDS/ADSORPTION
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
PLUTONYL COMPOUNDS/SOLUBILITY
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
PNC
(Power Reactor Nuclear Fuel Development Corporation.)
PNC/FUEL REPROCESSING PLANTS
Safety in alteration of the fuel reprocessing plant in Power Reactor and Nuclear Fuel Development Corporation, 100
PNC/NUCLEAR FACILITIES
Outline of the Chemical Processing Facility (CPF), 1315
PNC/RESEARCH PROGRAMS
Ten years' history of Power Reactor and Nuclear Fuel Development Corporation, 2845
POINT BEACH-1 REACTOR/FUEL RACKS
Replacement of high-density racks with poisoned racks at Point Beach Nuclear Plant, 2733
POINT BEACH-2 REACTOR/FUEL RACKS
Replacement of high-density racks with poisoned racks at Point Beach Nuclear Plant, 2733
POISEUILLE FLOW
See LAMINAR FLOW
POLLUTION
(For nonradioactive pollution only; see also CONTAMINATION.)
See also AIR POLLUTION
CHEMICAL EFFLUENTS
THERMAL POLLUTION
WATER POLLUTION
POLLUTION/MONITORING
Handbooks on effluent and environmental monitoring, 3244 (PNL--3300(Pt.5))
POLLUTION CONTROL/MANUALS
Handbook of key Federal regulations and criteria for multimedia environmental control. Final report, September 1978-June 1979, 3296 (PB--80-107998)
POLLUTION CONTROL/REGULATIONS
Handbook of key Federal regulations and criteria for multimedia environmental control. Final report, September 1978-June 1979, 3296 (PB--80-107998)
POLONIUM/ADSORPTION
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
POLONIUM 210/ENVIRONMENTAL TRANSPORT
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
POLONIUM 210/MIGRATION
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
POLONIUM 210/RADIOECOLOGICAL CONCENTRATION
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
Ecology studies at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3365 (IDO--12088)
POLYURETHANES/PYROLYSIS
Thermal response modeling of a contact-handled transuranic waste shipping container system to a fire, 261 (SAND--80-0062C)
PONDS/CONTAMINATION
Effects of chronic low-level irradiation on Gambusia affinis (White Oak Lake), 3465 (CONF-790562--2)
PONDS/ENVIRONMENTAL IMPACTS
Environmental sampling program for a solar evaporation pond for liquid radioactive wastes, 1551 (LA--8177)
POROUS MATERIALS/CREEP
Creep consolidation of nuclear depository backfill materials, 1951 (SAND--79-2212)
POROUS MATERIALS/FLUID FLOW
Numerical calculation of thermal convection in porous media in two dimensions with applications to nuclear repository design, 2034 (UCID--18700)
POROUS MATERIALS/HEAT TRANSFER
Numerical calculation of thermal convection in porous media in two dimensions with applications to nuclear repository design, 2034 (UCID--18700)
POROUS MATERIALS/SORPTIVE PROPERTIES
Adsorption and cation exchange during unidirectional flow in a saturated porous medium, 3348 (SAND--79-6006)
PORTSMOUTH GASEOUS DIFFUSION PLANT/RADIOACTIVE EFFLUENTS
UF_6 release experience and prevention in United States gaseous diffusion plants, 2433 (KY--690)
POTABLE WATER
See DRINKING WATER
POTASSIUM/ADSORPTION
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
POTASSIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
POTASSIUM 40/RADIATION MONITORING
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
POTASSIUM 40/RADIOECOLOGICAL CONCENTRATION
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
POTASSIUM CARBONATES/DEFORMATION
Measurements of very large deformations in potash salt in conjunction with an ongoing mining operation, 1958 (SAND--79-2254)
POTASSIUM CARBONATES/ROOM AND PILLAR MINING
Measurements of very large deformations in potash salt in conjunction with an ongoing mining operation, 1958 (SAND--79-2254)
POWER DENSITY/ONE-DIMENSIONAL CALCULATIONS
Preliminary one-dimensional thermal analysis of waste emplacement in tuffs, 1923 (SAND--79-1265)
POWER GENERATION/COMPARATIVE EVALUATIONS
Nuclear power and other thermal power. A comparative evaluation of safety and environment, 3152
POWER GENERATION/COST BENEFIT ANALYSIS
WIPP conceptual design report. Addendum D. A report

to Holmes and Narver, Inc., Anaheim, California on alternative energy sources for Waste Isolation Pilot Plant, Carlsbad, New Mexico, 1879 (SAND--77-0274(Add.D))
POWER GENERATION/ENVIRONMENTAL IMPACTS
Environmental implications of electric-utility supply plans, 1978-2000, 3179 (P--300-80-005)
Public health hazards from electricity-producing plants, 3104
POWER GENERATION/HEALTH HAZARDS
Public health hazards from electricity-producing plants, 3104
POWER GENERATION/MODIFICATIONS
Consideration in upgrading a nuclear powr plant, 2696
POWER GENERATION/RISK ASSESSMENT
Windscale inquiry and its implications, 3097
POWER GENERATION/SAFETY
Nuclear power and other thermal power. A comparative evaluation of safety and environment, 3152

POWER REACTORS/RADIOACTIVE WASTE PROCESSING
Pre-treatment of evaporator concentrates and spent ion-exchangers before their solidification in organic binders, 2975
POWER REACTORS/RADIOACTIVE WASTES
Containers used in packaging reactor waste, 2983
POWER REACTORS/SPENT FUEL STORAGE
Spent fuel storage capacity in new reactors, 198 (DOE/SR-SF--2003)
PRECIPITATION
(In chemical processes only; see also ATMOSPHERIC PRECIPITATIONS, ELECTRON PRECIPITATION, and PROTON PRECIPITATION.)
PRECIPITATION/GEOLOGIC HISTORY
Precipitation and lake-level changes in the West and Midwest over the past 10,000 to 24,000 years. Final report, 2044 (UCRL--15173)
PRECIPITATION/MEASURING METHODS
Methods for determining radionuclide retardation factors: status report, 1759 (PNL--3349)
PRECIPITATIONS (ATMOSPHERIC)
See ATMOSPHERIC PRECIPITATIONS
PREPARATION (CHEMICAL)
See CHEMICAL PREPARATION
PRESSING/COMPACTING
Method and device to package solid radioactive or poisonous waste materials (Patent), 1117
PRESSING/PACKAGING
Method and device to package solid radioactive or poisonous waste materials (Patent), 1117
PRESSURE GAGES/SPECIFICATIONS
Pressure measurements in low permeability formations, 1990 (SAND--80-0705C)
PRESSURIZED WATER REACTORS
See PWR TYPE REACTORS
PRIMARY COOLANT CIRCUITS/CONTAMINATION
Measures of reducing accumulation of radioactivity in primary cooling system of pressurized water reactors, 2754
PRIMARY COOLANT CIRCUITS/COOLANTS
Removal of fission and corrosion products from alkaline solutions of boric acid by the ion exchange method, 805 (INIS-mf--5570)
PRIMARY COOLANT CIRCUITS/RADIOACTIVITY TRANSPORT
Measurement of tritium and tritiated water vapour in nuclear power installations. I. Tritium formation and transport in nuclear power installations, 2751
PRIMARY COOLANT CIRCUITS/WATER CHEMISTRY
Crud reduction study of primary coolant system at Tsuruga Nuclear Power Station, 2692
PROCESSING (DATA)

PRODUCTION REACTORS/CHEMICAL EFFLUENTS
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
PRODUCTION REACTORS/RADIOACTIVE EFFLUENTS
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
PROFESSIONAL PERSONNEL
See also MEDICAL PERSONNEL
PROFESSIONAL PERSONNEL/DECISION MAKING
Assessment of effectiveness of geologic isolation systems: the feasibility of computer interrogation of experts for WISAP, 1737 (PNL--2862)
Remarks on the assessment, representation, aggregation and utilization of expert opinion, 2030 (UCID--18665)
PROLIFERATION
Difficulty of clandestinely building an atomic bomb, 2632
Nuclear proliferation and civilian nuclear power: report of the Nonproliferation Alternative Systems Assessment Program. Volume II. Proliferation resistance, 2619 (DOE/NE--0001(Vol.2))
Nuclear proliferation and civilian nuclear power: report of the Nonproliferation Alternative Systems Assessment Program. Volume IX. Reactor and fuel cycle descriptions, 2620 (DOE/NE--0001(Vol.9))
PROLIFERATION/INTERNATIONAL CONTROL
Chapter 10. Multinational and international controls. Paper 18. Nuclear proliferation: arrangements for international control, 2639
PROMETHIUM/ADSORPTION
Preliminary rate expressions for analysis of radionuclide migration resulting from fluid flow through jointed media, 1909 (SAND--79-0989C)
PROMETHIUM/RADIONUCLIDE MIGRATION
Preliminary rate expressions for analysis of radionuclide migration resulting from fluid flow through jointed media, 1909 (SAND--79-0989C)
PROMETHIUM/SORPTION
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
PROPORTIONAL COUNTERS
See also BF3 COUNTERS
PROPORTIONAL COUNTERS/LIQUID COLUMN CHROMATOGRAPHY
Continuous detection of radioactive effluents in liquid

chromatography by means of a high efficiency toroidal type proportional counter, 3633
PROPORTIONAL COUNTERS/SENSITIVITY
Continuous detection of radioactive effluents in liquid chromatography by means of a high efficiency toroidal type proportional counter, 3633
PROTACTINIUM/ADSORPTION
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
PROTECTION
See SAFETY
PROTECTION (RADIATION)
See RADIATION PROTECTION
PROTECTIVE COATINGS/PERFORMANCE TESTING
Materials for surface protection in nuclear facilities, 559
PROTEINS/RESEARCH PROGRAMS
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
PROTON TRANSPORT/COMPUTER CODES
Calculation of gamma-rays and fast neutrons fluxes with the program Mercure-4, 3591 (CEA-CONF--4493)
PROTOTYPE FAST REACTOR (DOUNREAY)
See PFR REACTOR
PSEUDOMONAS/POLYMERS
Use of a bacteria polymer composite to concentrate plutonium from aqueous media, 1091
PSEUDOMONAS/RADIONUCLIDE KINETICS
Microbial uptake of uranium, cesium, and radium, 681 (CONF-800814--12)
PULPS
See SLURRIES
PULSE COLUMNS
See EXTRACTION COLUMNS
PUMPS/MAINTENANCE
Instrument maintenance problems in radioactive areas and equipment, 604
PUREX PROCESS
Exxon nuclear fuel recovery and recycling center: process description, 95
Reprocessing and waste management, 50 (INIS-mf--4782)
State of development and problems of chemistry and process technology in nuclear fuel processing, 78 (WINDSCALE-TRANS--813)
PUREX PROCESS/DISSOLUTION
Investigations of the solidification of feed clarification sludge in an inorganic matrix resistant to radiation and heat (vitrification), Subproject B, 79 (PNL-TR--409)
PUREX PROCESS/RADIOACTIVE WASTE PROCESSING
Distribution ratios and empirical equations for the extraction of elements in Purex high level waste solution. 1. TBP, 1242
Laboratory evaluation of an ion exchange process for removing cesium from Purex acid waste solutions, 978 (RHO-CO--739)
Potential of pyroprocessing for partitioning purex wastes, 1010 (UCRL--84405)
Work within the coordinated programme on environmental evaluation and hazard assessment of the separation of the actinides from the high-level waste from fuel reprocessing followed by either transmutation or separate disposal. Final report for the period 1 November 1976 - 31 October 1977, 449 (IAEA-R--1898-F)

WWER TYPE REACTORS
PWR TYPE REACTORS/ACTIVITY LEVELS
Measurements of radionuclide concentrations in liquid and gaseous streams in PWR's, 2717 (CONF-791118--6)
PWR TYPE REACTORS/CONTAINMENT SYSTEMS
Natural removal of particulate radioactivity in an LWR-containment during core meltdown accidents, 3028 (CONF-800403--(Vol.2))
Radioactive release following a LOCA with an initially breached containment, 3071
PWR TYPE REACTORS/COOLANT CLEANUP SYSTEMS
Measures of reducing accumulation of radioactivity in primary cooling system of pressurized water reactors, 2754
PWR TYPE REACTORS/CORROSION PRODUCTS
Electromagnetic filtration of cruds in primary circuits of pressurized water nuclear reactors, 2744
PWR TYPE REACTORS/DECONTAMINATION
Impact of LWR decontamination on radwaste systems, 2676 (PNL-SA--7381)
PWR TYPE REACTORS/ECCS
Emergency and/or post-shutdown cooling of a nuclear reactor (Patent), 3059
PWR TYPE REACTORS/EMERGENCY PLANS
Planning basis for the development of state and local government Radiological Emergency Response Plans in support of light water nuclear power plants, 2936 (NUREG--0396)
PWR TYPE REACTORS/ENVIRONMENTAL IMPACTS
ENFORM II: a calculational system for light water reactor logistics and effluent analysis, 2828 (PNL--2429)
PWR TYPE REACTORS/FISSION PRODUCT RELEASE
Measuring and monitoring of gaseous releases and aerosol-bound radioactive material. Pt. 1. Measuring and monitoring of radioactive material released together with the stack exhaust air in regular operation. KTA safety regulation, 2730
PWR TYPE REACTORS/FORECASTING
Commercial US nuclear reactors and waste: the current status, 373 (PNL--3317-2)
PWR TYPE REACTORS/FUEL CYCLE
Actinide partitioning-transmutation program final report. IV. Miscellaneous aspects (Transport; fuel fabrication; decay; policy; economics), 66 (ORNL/TM--6984)
Chapter 3. Reprocessing. Paper 5. Proliferation risks associated with different back-end fuel cycles for light water reactors, 2842
Descriptions of reference LWR facilities for analysis of nuclear fuel cycles, 2449 (PNL--2286)
Descriptions of reference LWR facilities for analysis of nuclear fuel cycles. Appendixes, 2945 (PNL--2286(App.))
Ex-reactor fuel cycle nuclear safety, 2840
Generic waste management concepts for six LWR fuel cycles (Three recycle and three no-recycle options), 617 (ANL/EIS--11)
PWR TYPE REACTORS/FUEL ELEMENTS
Framework for storing long fuel elements, 2736
Framework for storing fuel elements (Patent), 2852
Mechanistic prediction of transient fission-gas release from LWR fuel, 2684
PWR TYPE REACTORS/FUEL POOLS
Application of partial failure analysis to an accident involving loss of cooling in a spent fuel storage pool, 3026 (CONF-800403--(Vol.2))
Fuel element storage pond for nuclear installations (Patent), 2739
Irradiated fuel inspection station, 2741
Nuclear reactor plant (Patent), 2752
Nuclear reactor facility (Patent), 329
Remotely operated ultrasonic decontamination system for fuel transfer pool, 2742
Status of spent-fuel storage pool applications, 2814
PWR TYPE REACTORS/FUEL RACKS
Rack for storing fuel elements (Patent; PWR; BWR), 2706
Status of spent-fuel storage pool applications, 2814
Storage rack for spent fuel elements (Patent), 331
PWR TYPE REACTORS/FUEL RODS
Nondestructive verification of relative burnup values and cooling times of irradiated MTR fuel elements, 3009 (LA--7949-MS)
PWR TYPE REACTORS/LIQUID WASTES
Investigation of generation of liquid radioactive wastes and possibilities to reduce their volume in NPP Paks Pt. 2. Computer program for the simulation of radioactive water systems contamination, 2725 (VEIKI--15.98-041-2)
PWR TYPE REACTORS/LOSS OF COOLANT
Radioactive release following a LOCA with an initially breached containment, 3071
PWR TYPE REACTORS/LOWLEVEL RADIOACTIVE WASTES
Activity levels of transuranic nuclides in low-level solid wastse from US power reactors. Final report, 446 (EPRI-NP--1494)
PWR TYPE REACTORS/MELTDOWN
Natural removal of particulate radioactivity in an LWR-containment during core meltdown accidents, 3028 (CONF-800403--(Vol.2))
PWR TYPE REACTORS/NUCLEAR MATERIALS MANAGEMENT
Nondestructive verification of relative burnup values and cooling times of irradiated MTR fuel elements, 3009 (LA--7949-MS)
PWR TYPE REACTORS/OFFSHORE NUCLEAR POWER PLANTS
Liquid pathways generic studies; results, interpretation,

and design implications, 3027 (CONF-800403--(Vol.2))
PWR TYPE REACTORS/PLUTONIUM RECYCLE
Experience with the use of recycle plutonium in mixed-oxide fuel in light water reactors in the Federal Republic of Germany, 1180
Report of the technological study working group of the AEC Committee on Development of Advanced Power Reactors, 2778
PWR TYPE REACTORS/PRIMARY COOLANT CIRCUITS
Electromagnetic filtration of cruds in primary circuits of pressurized water nuclear reactors, 2744
Measures of reducing accumulation of radioactivity in primary cooling system of pressurized water reactors, 2754
PWR TYPE REACTORS/RADIOACTIVE EFFLUENTS
Determination of the sources of the airborne physico-chemical ^{131}I species in a PWR power plant, 2929 (INIS-mf--4957)
Guideline concerning the measurement of emitted radioactive substances in light water power reactor facilities, 3285
Measurement and monitoring of gaseous and aerosol-bound radioactive discharges. 1. Measurement and monitoring of radioactive substance releases via the vent stack during routine operation. Draft, 2993
Measurement of liquid radioactive materials for the monitoring of radioactive emissions. UTA safety regulation, 2694
Methods for demonstrating LWR compliance with the EPA uranium fuel cycle standard: 40 CFR Part 190, 2937 (NUREG--0543)
Planning basis for the development of state and local government Radiological Emergency Response Plans in support of light water nuclear power plants, 2936 (NUREG--0396)
Publication of the safety regulation KTA 3603 of the Committee for Nuclear Technology (KTA). From March 12, 1980, 2898
Tritium in PWRs: a rational perspective, 2731
PWR TYPE REACTORS/RADIOACTIVE WASTE MANAGEMENT
Future outlook of waste packaging at Electricite de France, 2749
Radioactive liquid waste management of typical PWR's, 12
Reactor waste management practices in the Federal Republic of Germany, 2700
PWR TYPE REACTORS/RADIOACTIVE WASTE PROCESSING
Development of incorporation of evaporator concentrate from pressurized water nuclear power reactors into asphalt, 2980
Impact of LWR decontamination on radwaste systems, 2676 (PNL-SA--7381)
Improvement of chemical and physical processes to treat the waste water from nuclear power plants, 2722 (Juel--1586)
Measured performance of four PWR liquid radioactive waste treatment systems, 2920 (CONF-800607--9)
Proceedings of the symposium on the on-site management of power reactor wastes, 2695
Solidificaton of evaporator concentrates by hydraulic binding agents, 2748
Studies on the treatment of radioactive waste water formed from the steam generator of PWR type reactor using ion exchange resins, 2757
PWR TYPE REACTORS/RADIOACTIVE WASTES
Evaluation of tritium recycle and buildup in a pressurized water reactor. Technical note, 2724 (PB--295036)
Results of an analysis of the quantities of radioactive wastes developing during the decommissioning of nuclear power plants, 3074
Wastes arising from nuclear power plants, 2698
PWR TYPE REACTORS/RADIOACTIVITY TRANSPORT
Measurements of radionuclide concentrations in liquid and gaseous streams in PWR's, 2717 (CONF-791118--6)
PWR TYPE REACTORS/REACTOR DECOMMISSIONING
Development of United States policy and standards for decommissioning nuclear facilities, 3075
Pressurized water reactor addendum, 2809 (NUREG/CP--0008)
Results of an analysis of the quantities of radioactive wastes developing during the decommissioning of nuclear power plants, 3074
PWR TYPE REACTORS/REACTOR FUELING
Nuclear reactor power station with two different pools (Patent), 2755
PWR TYPE REACTORS/REACTOR MAINTENANCE
Remotely operated ultrasonic decontamination system for fuel transfer pool, 2742
PWR TYPE REACTORS/REACTOR OPERATION
ENFORM II: a calculational system for light water reactor logistics and effluent analysis, 2828 (PNL--2429)
Operating experience with West European light-water reactors, 2703
PWR TYPE REACTORS/SPENT FUEL CASKS
Basket for storing nuclear fuels in a cooling pool (Patent), 2716
PWR TYPE REACTORS/SPENT FUEL ELEMENTS
Spent fuel data base: commercial light water reactors, 2678 (UCRL--15186)
PWR TYPE REACTORS/SPENT FUEL STORAGE
Behavior of spent LWR fuel assemblies, 2709
Economics of spent LWR fuel storage, 2674 (DP-MS--80-24)
Framework for storing long fuel elements, 315
Framework for storing fuel elements (Patent), 2852
Method and device for storing irradiated respectively spent fuel assemblies from pressurized and boiling water reactors (Patent), 2704
Normal and compact spent fuel storage in light water reactor power plants, 2708
Spent fuel data base: commercial light water reactors, 2678 (UCRL--15186)
Spent fuel storage - Philosophies and experience, 2712
Spent Nuclear Fuel Storage Program user's guide (SNFSM Code), 2838 (DOE/EIA/8589--2)
Waterfilled storage pond (Patent), 2729
PWR TYPE REACTORS/SPENT FUELS
Nuclear reactor power station with two different pools (Patent), 2755
PWR TYPE REACTORS/THORIUM CYCLE
Environmental implications of thorium use in selected nuclear fuel cycles. Final, 2891 (EPA--520/6-78-009)
PWR TYPE REACTORS/WASTE MANAGEMENT
Safety aspects of the design of a PWR gaseous radwaste treatment system using hydrogen recombiners, 2720 (INIS-mf--4770)
PWR TYPE REACTORS/WATER
Treatment of radioactive contaminated water in nuclear power plants. Safety requirements. Draft, 2701
PYROCHEMICAL REPROCESSING
Potential of pyroprocessing for partitioning purex wastes, 1010 (UCRL--84405)
PYROLYTIC CARBON
Conditioning of HLW-calcines. 1. Pyrocarbon coating, 998 (SGAE--2864)
PYROLYTIC CARBON/THERMAL CONDUCTIVITY
Thermal conductivity of granules, 1001 (SGAE--3012)
PYROXENES
Glass-crystalline materials for active waste incorporation, 662 (CONF-790420--)
PYROXENES/SORPTIVE PROPERTIES
Sorption of americium on major rock-forming minerals, 2191

Q

QUALITY ASSURANCE/PROGRAM MANAGEMENT
Nevada Nuclear Waste Storage Investigations. Management and overview Quality Assurance Program Plan, 486 (NVO--196-18)
QUARTZ/EROSION
Clay particle redistribution and piping phenomena in bentonite/quartz buffer material due to high hydraulic gradients, 2010 (SKBF-KBS-TR--79-01)
QUARTZ/ROCK-FLUID INTERACTIONS
Waste Isolation Safety Assessment Program, 1573 (LBL--8648)
QUARTZ/SORPTIVE PROPERTIES
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Chemical reactions in the bedrock-groundwater system of importance for the sorption of actinides, 1433 (CONF-791112--58)
Mineral-contributed anion effects on the retention of trivalent actinides in the environment, 2192
Nuclide transport by groundwater in Swedish bedrock, 2581
Sorption of americium on major rock-forming minerals, 2191
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Waste isolation safety assessment program. Task 4. Collection and generation of transport data theoretical and experimental evaluation of waste transport in selected rocks. Annual progress report, October 1, 1978-September 30, 1979, 1583 (LBL--9965)
QUARTZ/THERMAL CONDUCTIVITY
Thermal conductivity of silicic tuffs: predictive formalism and comparison with preliminary experimental results, 3570 (SAND--80-0769)
QUARTZITES/THERMAL CONDUCTIVITY
Thermal conductivity of the rocks in the Bureau of Mines Standard Rock Suite, 3557 (ORNL/TM--7052)
QUATERNARY PERIOD/GEOMORPHOLOGY
Assessment of effectiveness of geologic isolation systems. Geologic factors in the isolation of nuclear waste: evaluation of long-term geomorphic processes and catastrophic events, 1734 (PNL--2854)

R

R-A REACTOR/WASTE DISPOSAL
Application of activation analysis in radioecological investigations, 3016
RABBITS/BIOLOGICAL RADIATION EFFECTS
^{129}I in thyroids of herbivores on the Idaho National Engineering Laboratory Site, 3369 (IDO--12088)
RABBITS/THERMOLUMINESCENT DOSIMETRY
Radiation doses to small mammals at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3364 (IDO--12088)
RACKS (FUEL)
See FUEL RACKS

RADIATION ACCIDENTS
Are portions of the Urals really contaminated (Evaluation of literature concerning radiation release in 1958), 2148
Soviet science, 2511
RADIATION ACCIDENTS/EMERGENCY PLANS
Limits to radioactive effluents and countermeasures in accidental situations, 2423 (IAEA--212)
RADIATION ACCIDENTS/EXPLOSIONS
Nuclear disaster in the Urals, 2568
RADIATION ACCIDENTS/FISSION PRODUCT RELEASE
Analysis of the 1957-58 Soviet nuclear accident, 3233 (ORNL--5613)
RADIATION ACCIDENTS/RISK ASSESSMENT
Pre-sealing risk analysis, 537 (UCRL--15168)
RADIATION DAMAGE (NONBIOLOGIC)
See RADIATION EFFECTS
RADIATION DECONTAMINATION
See DECONTAMINATION
RADIATION DETECTION
See also BETA DETECTION
GAMMA DETECTION
RADIATION DETECTION/RADIATION DETECTORS
Method of locating radiation detectors, 98
RADIATION DETECTORS
See also IONIZATION CHAMBERS
NEUTRON DETECTORS
PROPORTIONAL COUNTERS
RADIATION MONITORS
RADIATION DETECTORS/SURFACE CONTAMINATION
Method of locating radiation detectors, 98
RADIATION DOSES/A CODES
AIRDOS-EPA: a computerized methodology for estimating environmental concentrations and dose to man from airborne releases of radionuclides, 3205 (EPA--520/1-79-009)
RADIATION DOSES/COMPUTER CALCULATIONS
Assessment of effectiveness of geologic isolation systems. ARRRG and FOOD: computer programs for calculating radiation dose to man from radionuclides in the environment, 2549 (PNL--3180)
User's guide to the POPDOS2 program for evaluating collective doses, 3593 (CEGB-RD/B/N--4686)
RADIATION DOSES/COMPUTER CODES
Estimation of North American population doses resulting from radon-222 release in western United States: methodology, 3235 (ORNL/TM--6751)
RADIATION DOSES/COMPUTERIZED SIMULATION
Modification of the reactor safety study consequences computer program (CRAC) to include plume trajectories, 3279
RADIATION DOSES/ENVIRONMENTAL EXPOSURE PATHWAY
General calculation basis for assessing the radiation exposure from radioactive discharges via exhaust air or into surface water (Reg. guide related to paragraph 45 of the German Radiation Protection Regulation), 3499
RADIATION DOSES/FORECASTING
NUTRAN: a computer model of long-term hazards from waste repositories, 2482 (UCRL--15150)
Supplemental report on population estimates for Hanford high-level defense waste draft programmatic environmental impact statement, 3239 (PNL--3128)
RADIATION DOSES/GLOBAL ASPECTS
Assessment of dose to the critical group and the world population, 2527 (IAEA--212)
RADIATION DOSES/MANAGEMENT
Radiation protection activities - 1977. Annual report, 2941 (PB--290215)
RADIATION DOSES/MATHEMATICAL MODELS
Comparison of Nordic dose models, 2946 (RISO-M--1972)
Model for calculating the mean gamma dose from a continuously emitting source of airborne radioactivity, 3253
Preliminary evaluation of the BIODOSE computer program (For simulating radionuclide transport through aquatic ecosystems and predicting the dose to humans), 3478 (UCID--18267)
Use of a risk limit as an environmental safety standard for radioactive waste disposal sites, 2538 (PB--296947)
RADIATION DOSES/MEASURING METHODS
Assessment of noble gas releases from the Three Mile Island Unit 2 accident, 3278
RADIATION DOSES/MONITORING
Applications of in situ Ge(Li) spectrometry, 3277
RADIATION DOSES/SPATIAL DISTRIBUTION
Dose modelling for radon-producing activities in heavily populated areas, 2540 (PB--296947)
RADIATION DOSES/THERMOLUMINESCENT DOSIMETRY
Radiation dosimetry of small mammals inhabiting a liquid radioactive waste disposal area, 3363 (IDO--12088)
Radiation doses to small mammals at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3364 (IDO--12088)
RADIATION DOSIMETRY
See DOSIMETRY
RADIATION EFFECTS
See also BIOLOGICAL RADIATION EFFECTS
RADIATION EFFECTS/ATTITUDES
Risk and fear, 3118
RADIATION EFFECTS/RISK ASSESSMENT
Risk and fear, 3118
RADIATION EXPOSURE (DOSES)
See RADIATION DOSES
RADIATION HAZARDS/ATTITUDES
Risk and fear, 3118
RADIATION HAZARDS/EMERGENCY PLANS
The U.S. Army Radon Team: organization, capabilities and resources. Final report, 3589 (AD-A--076168)
RADIATION HAZARDS/MAN
Radioactivity in man: levels, effects and unknowns, 3598 (CONF-800392--1)
RADIATION HAZARDS/RISK ASSESSMENT
Radiation safety and health effects related to low-level radioactive wastes, 2075 (UCRL--83328)
Risk and fear, 3118
RADIATION HYGIENE
See RADIATION PROTECTION
RADIATION MONITORING
Laboratory computer system for routine, plant, and environmental radiation-monitoring applications, 3014
Radiation monitoring system of nuclear power station, 2859
RADIATION MONITORING/AAEC
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
RADIATION MONITORING/ABANDONED SITES
Description of the Formerly Utilized Sites Remedial Action Program, 919 (ORO--777)
RADIATION MONITORING/AIR
1978 annual environmental report. Volume 2. Radiological, 3195 (DOE/PNRO--0292-T1)
Measurement of environmental radioactivity. Ispra 1977, 3207 (EUR--6180)
RADIATION MONITORING/AMERICIUM 241
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
RADIATION MONITORING/AMES LABORATORY
Aerial radiological survey of US Department of Energy sites in Ames, Iowa. Date of survey: May 1977, 3318 (EGG--1183-1686)
Environmental monitoring at Ames Laboratory: Calendar year 1979, 3214 (IS--4734)
RADIATION MONITORING/ANL
Environmental monitoring at Argonne National Laboratory. Annual report for 1979, 3304 (ANL--80-29)
RADIATION MONITORING/ANTIMONY 125
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
RADIATION MONITORING/AQUATIC ECOSYSTEMS
Detection and measurement of curium in the marine environment, 3414 (COO--3563-78)
In situ data on various sites of radioactive releases into the marine environment, 2503
RADIATION MONITORING/AQUIFERS
Tatum Dome Project, Lamar County, Mississippi, 3329 (NVO--225)
RADIATION MONITORING/ARGON 41
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
RADIATION MONITORING/ARIZONA
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
Assessment of the radiological impact of the inactive uranium-mill tailings at Monument Valley, Arizona, 2445 (ORNL--5449)
Radiological survey of the inactive uranium-mill tailings at Tuba City, Arizona, 3331 (ORNL--5450)
RADIATION MONITORING/ATMOSPHERIC PRECIPITATIONS
Measurement of environmental radioactivity. Ispra 1977, 3207 (EUR--6180)
RADIATION MONITORING/BARNWELL FUEL PROCESSING PLANT
Aerial radiological survey of the area surrounding the Chem-Nuclear Disposal Facility and Allied General Nuclear Services Facility, Barnwell, South Carolina, 3200 (EGG--1183-1747)
RADIATION MONITORING/BATTELLE COLUMBUS LABORATORY
Environmental report for calendar year 1978 on radiological and nonradiological parameters, 3196 (DOE/TIC--11148)
RADIATION MONITORING/BATTELLE PACIFIC NORTHWEST LABORATORIES
Field test facility for monitoring water/radionuclide transport through partially saturated geologic media: design, construction, and preliminary description, 1753 (PNL--3226)
RADIATION MONITORING/BEAVER VALLEY-1 REACTOR
1978 annual environmental report. Volume 2. Radiological, 3195 (DOE/PNRO--0292-T1)
RADIATION MONITORING/BEAVER VALLEY-2 REACTOR
1978 annual environmental report. Volume 2. Radiological, 3195 (DOE/PNRO--0292-T1)
RADIATION MONITORING/BERYLLIUM 7
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
RADIATION MONITORING/BIKINI
Plutonium in the marine environment of the Marshall Islands, 3444 (UCRL--52000-80-10)
RADIATION MONITORING/BNL
1978 environmental monitoring report, 3190 (BNL--51031)
RADIATION MONITORING/CARBON 11
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)

RADIATION MONITORING/CARBON 14
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
RADIATION MONITORING/CERIUM 144
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
RADIATION MONITORING/CESIUM 137
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
RADIATION MONITORING/COASTAL WATERS
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
RADIATION MONITORING/COBALT 60
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
RADIATION MONITORING/COLORADO
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
RADIATION MONITORING/COLUMBIA RIVER
Radiological survey of exposed shorelines and islands of the Columbia River between Vernita and the Snake River confluence, 3476 (PNL--3127)
RADIATION MONITORING/COMPUTER GRAPHICS
Graphic overview system for DOE's effluent and environmental monitoring programs, 3202 (EGG--1183-1760)
RADIATION MONITORING/DAUGHTER PRODUCTS
Measurements of radon daughter concentrations in structures built on or near uranium mine tailings, 2612
RADIATION MONITORING/ENIWETOK
Plutonium in the marine environment of the Marshall Islands, 3444 (UCRL--52000-80-10)
RADIATION MONITORING/ENVIRONMENT
Environmental radiological surveillance in perspective: the relative importance of environmental media as a function of effluent pathway and radionuclides, 3264
Environmental radioactivity at the National Nuclear Research Centre, Pelindaba. Report for the year 1978, 3237 (PEL--270)
Measurement of environmental radioactivity. Ispra 1976, 3206 (EUR--5805)
RADIATION MONITORING/ENVIRONMENTAL TRANSPORT
Low level waste management: a compilation of models and monitoring techniques. Volume 1, 1668 (ORNL/Sub--79/13617/2)
RADIATION MONITORING/FALLOUT
Harrisburg fallout, 2496
Radiation protection activities - 1977. Annual report, 2941 (PB--290215)
RADIATION MONITORING/FEED MATERIALS PLANTS
Radiological survey of the inactive uranium-mill tailings at the Spook site, Converse County, Wyoming, 3338 (ORNL--5460)
Technology assessments, 3232 (ORNL--5595)
RADIATION MONITORING/FERMILAB ACCELERATOR
Environmental monitoring report for calendar year 1979, 3415 (FERMILAB--80/29)
RADIATION MONITORING/FISSION PRODUCT RELEASE
Measuring and monitoring of gaseous releases and aerosol-bound radioactive material. Pt. 1. Measuring and monitoring of radioactive material released together with the stack exhaust air in regular operation. KTA safety regulation, 2730
RADIATION MONITORING/FOOD
Master schedule for CY-1980 Hanford Environmental Surveillance Routine Program, 3240 (PNL--3222)
RADIATION MONITORING/FUEL REPROCESSING PLANTS
Continuous tritium monitor for nuclear facility off-gas streams, 2418 (ENICO--1022)
Identification of iodine-129 sources, concentrations, contaminant levels and radioiodine monitoring techniques in LWR reprocessing operations, 76 (SAI--00979-1)
RADIATION MONITORING/GAMMA SPECTROSCOPY
Computer-controlled remote gamma-ray spectrometer, 2502
RADIATION MONITORING/GASEOUS WASTES
Explanation of guideline concerning the measurement of emitted radioactive substances in light water power reactor facilities, 3286
Monitoring of gaseous effluents in Ontario Hydro, 2786
Monitoring of releases from an irradiated fuel reprocessing plant, 2995
Monitoring of the discharge of radioactive materials in gaseous effluents at the stack of nuclear power plants with light-water-cooled reactors, 3291
RADIATION MONITORING/GROUND WATER
Master schedule for CY-1980 Hanford Environmental Surveillance Routine Program, 3240 (PNL--3222)
RADIATION MONITORING/HANFORD RESERVATION
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)
Environmental status of the Hanford site for CY 1979, 3242 (PNL--3284)
Master schedule for CY-1980 Hanford Environmental Surveillance Routine Program, 3240 (PNL--3222)
RADIATION MONITORING/HAPO
Radioactivity in gaseous waste discharged from the separations facilities during fourth quarter of 1979, 3245 (RHO-CO--79-35-4Q)
RADIATION MONITORING/HERBS
Measurement of environmental radioactivity. Ispra 1977, 3207 (EUR--6180)
RADIATION MONITORING/IDAHO
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
RADIATION MONITORING/IDAHO CHEMICAL PROCESSING PLANT
Radiological surveys of radioactive shipments: are they adequate, 2414 (CONF-780506--(Vol.2))
RADIATION MONITORING/IDAHO NATIONAL ENGINEERING LABORATORY
1979 environmental monitoring program report for Idaho National Engineering Laboratory Site, 3208 (IDO--12082(79))
Dosimetry developments and their application to radioecology studies at the Idaho National Engineering Laboratory Site, 3468 (IDO--12088)
RADIATION MONITORING/INDUSTRIAL PARKS
Development of a radon monitoring plan for Canonsburg, Pennsylvania, 3223 (MLM--2703(OP))
RADIATION MONITORING/IODINE 129
Identification of iodine-129 sources, concentrations, contaminant levels and radioiodine monitoring techniques in LWR reprocessing operations, 76 (SAI--00979-1)
Monitoring of releases from an irradiated fuel reprocessing plant, 2995
Terrestrial studies, 3317 (DP--1557)
RADIATION MONITORING/IODINE 131
Monitoring of releases from an irradiated fuel reprocessing plant, 2995
RADIATION MONITORING/IODINE ISOTOPES
1978 environmental monitoring report, 3190 (BNL--51031)
RADIATION MONITORING/IOWA
Aerial radiological survey of US Department of Energy sites in Ames, Iowa. Date of survey: May 1977, 3318 (EGG--1183-1686)
RADIATION MONITORING/JAERI
Health physics and safety in JAERI, No.20 (April 1, 1977 - March 31, 1978), 3609 (JAERI-M--7979)
RADIATION MONITORING/KRYPTON 85
^{85}Kr in the atmosphere and its measurement, 3209 (INIS-mf--4637)
Measured hourly and daily average ^{85}Kr concentrations within 10 km of the Savannah River Plant (1976), 3204 (EML--373)
Monitoring of releases from an irradiated fuel reprocessing plant, 2995
RADIATION MONITORING/KRYPTON 88
Utilization of the atmospheric release advisory capability (ARAC) services during and after the Three Mile Island accident, 3250 (UCRL--52959)
RADIATION MONITORING/LASL
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
RADIATION MONITORING/LIQUID WASTES
Environmental monitoring programme to assess and control the effects of liquid effluent discharges of low radio-activity to an inland lake, 3482
RADIATION MONITORING/MANAGEMENT
Radiation protection activities - 1977. Annual report, 2941 (PB--290215)
RADIATION MONITORING/MANUALS
Monitoring of airborne and liquid radioactive releases from nuclear facilities to the environment. Safety series No. 46: recommendations, 3248 (STI/PUB--482)
RADIATION MONITORING/MARSHALL ISLANDS
Environmental protection, 3358 (BNL--51066)
RADIATION MONITORING/MEDICAL PERSONNEL
Radiation hazard monitoring in ^{131}I therapy in and out clinic, 3694
RADIATION MONITORING/MILK
Measurement of environmental radioactivity. Ispra 1977, 3207 (EUR--6180)
RADIATION MONITORING/MILL TAILINGS
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
Assessment of the radiological impact of the inactive uranium-mill tailings at Shiprock, New Mexico, 2444 (ORNL--5447)
Assessment of the radiological impact of the inactive uranium-mill tailings at Monument Valley, Arizona, 2445 (ORNL--5449)
Radiological survey of the inactive uranium-mill tailings at Tuba City, Arizona, 3331 (ORNL--5450)
Radiological survey of the inactive uranium-mill tailings at Naturita, Colorado, 3334 (ORNL--5454)
Radiological survey of the inactive uranium-mill tailings at Slick Rock, Colorado, 3229 (ORNL--5452)
Radiological survey of the inactive uranium-mill tailings at Rifle, Colorado, 3230 (ORNL--5455)
Radiological survey of the inactive uranium-mill tailings at Ambrosia Lake, New Mexico, 3231 (ORNL--5458)
Radiological survey of the inactive uranium-mill tailings at Lakeview, Oregon, 3341 (ORNL--5464)
Radiological survey of the inactive uranium-mill tailings at Falls City, Texas, 3340 (ORNL--5462)

RADIATION MONITORING/MOUND LABORATORY
Annual environmental monitoring report: calendar year 1979, 3222 (MLM--2700)
RADIATION MONITORING/NEW MEXICO
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
Assessment of the radiological impact of the inactive uranium-mill tailings at Shiprock, New Mexico, 2444 (ORNL--5447)
RADIATION MONITORING/NITROGEN 13
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
RADIATION MONITORING/NORTH DAKOTA
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
RADIATION MONITORING/NUCLEAR FACILITIES
Aerial radiological surveys of Rockwell International Facilities, Canoga Park, California. Dates of surveys: June and July 1978, 3319 (EGG--1183-1751)
Energy systems group environmental monitoring and facility effluent. Annual report 1979, 3321 (ESG--80-7)
Environmental analysis of a formerly utilized MED/AEC site: Site A and plot M, Palos Forest Preserve, Palos Park, Illinois, 2410 (ANL/ES--79)
Graphic overview system for DOE's effluent and environmental monitoring programs, 3202 (EGG--1183-1760)
New opportunities for state participation in the control of radioactive pollution, 3428
Radiological survey of the inactive uranium-mill tailings at Falls City, Texas, 3340 (ORNL--5462)
RADIATION MONITORING/NUCLEAR INDUSTRY
Computer-controlled remote gamma-ray spectrometer, 2502
RADIATION MONITORING/NUCLEAR POWER PLANTS
Guideline for emission and immission monitoring in nuclear facilities, 3057
Radiation monitoring system of nuclear power station, 2859
Radioactive waste management and exposure situation for people engaging in nuclear power plant facilities, 3269
Substantiation of the scope of radiation monitoring in the region of atomic power station location, 3001
RADIATION MONITORING/OREGON
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
RADIATION MONITORING/ORNL
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
RADIATION MONITORING/OXYGEN 15
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
RADIATION MONITORING/PACIFIC OCEAN
Plutonium in the marine environment of the Marshall Islands, 3444 (UCRL--52000-80-10)
RADIATION MONITORING/PATIENTS
Radiation hazard monitoring in ^{131}I therapy in and out clinic, 3694
RADIATION MONITORING/PENNSYLVANIA
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
RADIATION MONITORING/PLANTS
Energy systems group environmental monitoring and facility effluent. Annual report 1979, 3321 (ESG--80-7)
RADIATION MONITORING/PLUTONIUM
Monitoring of plutonium contaminated solid waste streams. Chapter II: principles and theory of radiometric assay, 3434 (EUR--5636)
Monitoring of plutonium contaminated solid waste streams. Chapter IV: Passive neutron assay, 447 (EUR--6027)
RADIATION MONITORING/PLUTONIUM 238
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
RADIATION MONITORING/PLUTONIUM 239
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
RADIATION MONITORING/POTASSIUM 40
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
RADIATION MONITORING/RADIOACTIVE AEROSOLS
Determination of pollution spreading areas from nuclear power plants by means of the post-irradiation analysis method, 3181 (INIS-mf--5574)
Estimation of inhalation doses from airborne releases using gross monitors, 3287
Forecast of air pollution around nuclear installations on the basis of meteorological measurements, 3213 (INIS-mf--5574)
Isolation and characterization of individual plutonium-bearing particles in atmospheric effluents from a nuclear processing plant, 3265
Monitoring of airborne and liquid radioactive releases from nuclear facilities to the environment. Safety series No. 46: recommendations, 3248 (STI/PUB--482)
RADIATION MONITORING/RADIOACTIVE EFFLUENTS
Annual report on radioactive discharges and monitoring of the environment, 1977 (United Kingdom), 2429 (INIS-mf--5194)
Control and monitoring system of radioactive effluents in radioisotope facilities, 2328
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
Measurement and monitoring of gaseous and aerosol-bound radioactive discharges. 1. Measurement and monitoring of radioactive substance releases via the vent stack during routine operation. Draft, 2993
Measurement of environmental radioactivity. Ispra 1977, 3207 (EUR--6180)
Monitoring of gaseous effluents in Ontario Hydro, 2786
Monitoring of the release of radioactive substances from nuclear facilities into surface waters, 2907
Monitoring of gaseous and liquid effluents at French nuclear power plants, 2994
Monitoring of releases from an irradiated fuel reprocessing plant, 2995
Monitoring equipment for liquid effluents, 2996
Monitoring methods for radioactive noble gases in airborne effluents from nuclear power plants, 2998
Monitoring of the discharge of radioactive materials in gaseous effluents at the stack of nuclear power plants with light-water-cooled reactors, 3291
On-line meteorological information system for response to accidental releases of radioactivity into the atmosphere, 2959
Radioactive effluent control for Nuclear Research Institute, Rez, 2426 (INIS-mf--4637)
RADIATION MONITORING/RADIOACTIVE WASTE FACILITIES
Activity measurements at a waste volume reduction facility, 926 (PB--296947)
Aerial radiological survey of the area surrounding the Chem-Nuclear Disposal Facility and Allied General Nuclear Services Facility, Barnwell, South Carolina, 3200 (EGG--1183-1747)
Continuous tritium monitor for nuclear facility off-gas streams, 2418 (ENICO--1022)
Radiation shield integrity testing at the new waste calcining facility, 1347
Review of radon monitoring at the DOE-Niagara Falls Storage Site, 3227 (NLCO--004EV)
RADIATION MONITORING/RADIOACTIVE WASTES
Assessment of criticality monitoring techniques for a transuranic waste treatment facility, 439 (EGG-PHYS--5084)
Monitoring of plutonium contaminated solid waste streams. Chapter II: principles and theory of radiometric assay, 3434 (EUR--5636)
Monitoring of plutonium contaminated solid waste streams. Chapter IV: Passive neutron assay, 447 (EUR--6027)
Programmable calculator: alternative to minicomputer-based analyzer, 581
RADIATION MONITORING/RADIOISOTOPES
Radioactivity in surface and coastal waters of the British Isles, 1976. Part 2. Areas other than the Irish Sea and its environs, 3435 (FRL--14)
RADIATION MONITORING/RADIONUCLIDE MIGRATION
Field test facility for monitoring water/radionuclide transport through partially saturated geologic media: design, construction, and preliminary description (Battelle Pacific Northwest Laboratories), 1753 (PNL--3226)
Low level waste management: a compilation of models and monitoring techniques. Volume 1, 1668 (ORNL/Sub--79/13617/2)
RADIATION MONITORING/RADIUM 226
Radiological survey of the inactive uranium-mill tailings at Slick Rock, Colorado, 3229 (ORNL--5452)
Radiological survey of the inactive uranium-mill tailings at Ambrosia Lake, New Mexico, 3231 (ORNL--5458)
Radiological survey of the inactive uranium-mill tailings at Lakeview, Oregon, 3341 (ORNL--5464)
RADIATION MONITORING/RADON 222
Review of radon monitoring at the DOE-Niagara Falls Storage Site, 3227 (NLCO--004EV)
RADIATION MONITORING/REACTOR ACCIDENTS
Radioactive plume from the Three Mile Island accident: xenon-133 in air at a distance of 375 kilometers, 2899
RADIATION MONITORING/REACTOR SITES
Aerial radiological survey of the area surrounding the Edwin I. Hatch Nuclear Plant, Baxley, Georgia, 3199 (EGG--1183-1726)
RADIATION MONITORING/RECOMMENDATIONS
Explanation of guideline concerning the measurement of emitted radioactive substances in light water power reactor facilities, 3286
Guideline concerning the measurement of emitted radioactive substances in light water power reactor facilities, 3285
RADIATION MONITORING/REGULATORY GUIDES
Analysis of NRC methods for estimating the effects of dry deposition in environmental radiological

assessments, 3256
Guideline for emission and immission monitoring in nuclear facilities, 3057
RADIATION MONITORING/RUTHENIUM 106
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
RADIATION MONITORING/SAMPLING
Monitoring of airborne and liquid radioactive releases from nuclear facilities to the environment, 3292
RADIATION MONITORING/SANDIA LABORATORIES
Sandia National Laboratories 1979 environmental monitoring report, 3246 (SAND--80-0342)
RADIATION MONITORING/SANITARY LANDFILLS
Formerly utilized MED/AEC sites remedial action program. Radiological survey of the Middlesex Municipal Landfill, Middlesex, New Jersey. Final report, 2415 (DOE/EV--0005/20)
RADIATION MONITORING/SEWAGE SLUDGE
Medically used radionuclides in sewage sludge, 3461
RADIATION MONITORING/SHIPPINGPORT REACTOR
1978 annual environmental report. Volume 2. Radiological, 3195 (DOE/PNRO--0292-T1)
RADIATION MONITORING/SOILS
Energy systems group environmental monitoring and facility effluent. Annual report 1979, 3321 (ESG--80-7)
Soil monitoring instrumentation, 3327 (LA-UR--80-616)
RADIATION MONITORING/SPENT FUELS
Irradiated fuel monitoring by Cerenkov glow intensity measurements, 2622 (LA--7838-MS)
RADIATION MONITORING/STACK DISPOSAL
Monitoring of the release of radioactive substances from nuclear facilities into surface waters, 2907
Monitoring methods for radioactive noble gases in airborne effluents from nuclear power plants, 2998
RADIATION MONITORING/STACKS
Regular control of monitors for effluents from nuclear power plant stacks, 2948 (STUDSVIK/K2--79/79)
RADIATION MONITORING/STANFORD LINEAR ACCELERATOR CENTER
Annual environmental monitoring report, January-December 1979, 3247 (SLAC--228)
RADIATION MONITORING/STRONTIUM 90
1978 environmental monitoring report, 3190 (BNL--51031)
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)
RADIATION MONITORING/SURFACE WATERS
1978 annual environmental report. Volume 2. Radiological, 3195 (DOE/PNRO--0292-T1)
Energy systems group environmental monitoring and facility effluent. Annual report 1979, 3321 (ESG--80-7)
Master schedule for CY-1980 Hanford Environmental Surveillance Routine Program, 3240 (PNL--3222)
RADIATION MONITORING/TECHNETIUM 99
Terrestrial studies, 3317 (DP--1557)
RADIATION MONITORING/TEST REACTORS
Laboratory computer system for routine, plant, and environmental radiation-monitoring applications, 3014
RADIATION MONITORING/TEXAS
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
RADIATION MONITORING/THORIUM 232
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
RADIATION MONITORING/THREE MILE ISLAND-2 REACTOR
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
RADIATION MONITORING/TRITIUM
1978 environmental monitoring report, 3190 (BNL--51031)
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
Behaviour of tritium in the environment. Report on the international symposium held in San Francisco from 16 to 20 October 1978, 3383
Continuous tritium monitor for nuclear facility off-gas streams, 2418 (ENICO--1022)
Environmental aspects of tritium from CANDU station releases, 2779
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
Method for measuring tritium activity from radioactive solution (Patent), 120
Monitoring of releases from an irradiated fuel reprocessing plant, 2995
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
RADIATION MONITORING/UJV
Radiation situation on the premises of the Institute of Nuclear Research in Rez, 3283
RADIATION MONITORING/UNITED KINGDOM
Radioactivity in surface and coastal waters of the British Isles, 1976. Part 2. Areas other than the Irish Sea and its environs, 3435 (FRL--14)
RADIATION MONITORING/URANIUM 235
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
RADIATION MONITORING/URANIUM 238
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
RADIATION MONITORING/UTAH
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
RADIATION MONITORING/WASTE PROCESSING PLANTS
In situ measurements of radioactivities at a megalopolice waste water treatment plant, 3452
RADIATION MONITORING/WATER
Measurement of environmental radioactivity. Ispra 1977, 3207 (EUR--6180)
RADIATION MONITORING/WILD ANIMALS
Master schedule for CY-1980 Hanford Environmental Surveillance Routine Program, 3240 (PNL--3222)
RADIATION MONITORING/WORKING CONDITIONS
Radiological surveillance of airborne contaminants in the working environment, 3672
RADIATION MONITORING/WYOMING
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
RADIATION MONITORING/XENON 133
Radioactive plume from the Three Mile Island accident: xenon-133 in air at a distance of 375 kilometers, 2899
Utilization of the atmospheric release advisory capability (ARAC) services during and after the Three Mile Island accident, 3250 (UCRL--52959)
RADIATION MONITORING/ZINC 65
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
RADIATION MONITORS
See also LIQUID CONTAMINATION MONITORS
RADIATION MONITORS/CALIBRATION
Regular control of monitors for effluents from nuclear power plant stacks, 2948 (STUDSVIK/K2--79/79)
RADIATION MONITORS/DESIGN
Survey of instrumentation for environmental monitoring: major update. Volume 3. Radiation, 3221 (LBL--1(Vol. 3))
RADIATION MONITORS/GAMMA DETECTION
Designing instruments for measuring activity of liquids, 3652
RADIATION MONITORS/MANUALS
Survey of instrumentation for environmental monitoring: major update. Volume 3. Radiation, 3221 (LBL--1(Vol. 3))
RADIATION PROTECTION
Accident at Three Mile Island. Comments by the Health and Safety Executive, 3069
Organisation of nuclear safety in France, 3045 (RISLEY-Trans--3352)
RADIATION PROTECTION/DATA COMPILATION
Statistical information 1971-76. From the National Institute of Radiation Protection, 2529 (INIS-mf--5012)
RADIATION PROTECTION/EDUCATION
National environmental/energy workforce assessment. Radiation programs. Final report on phase 3, 3615 (PB--298585)
RADIATION PROTECTION/MANUALS
Radiological safety aspects of the operation of electron linear accelerators, 3657
RADIATION PROTECTION/MEETINGS
Low-level radioactive waste management, 501 (PB--296947)
Ninth annual national conference on radiation control, 3605 (FDA--78-8054)
RADIATION PROTECTION/OPTIMIZATION
Methods for estimating population detriment and their application in setting environmental discharge limits, 2606
RADIATION PROTECTION/RECOMMENDATIONS
Hygiene of ionizing radiations, 3699
Radiation protection activities - 1977. Annual report, 2941 (PB--290215)
RADIATION PROTECTION/SOCIOLOGY
Society's valuation of life saving in radiation protection and other contexts, 3627
RADIATION PROTECTION/STANDARDS
Update on EPA uranium fuel cycle standards, 2607
RADIATION PROTECTION LAWS/ECONOMICS
Limits of the concept of radiation minimisation, 3638
RADIATION SAFETY
See *RADIATION PROTECTION*
RADIATION SOURCES
(For cosmic sources of radiation see also COSMIC GAMMA SOURCES, COSMIC RADIO SOURCES, and COSMIC X-RAY SOURCES.)
See also BETA SOURCES
GAMMA SOURCES
RADIATION SOURCES/DOSE LIMITS
Hygiene of ionizing radiations, 3699
RADIATION SOURCES/MAXIMUM PERMISSIBLE DOSE
Hygiene of ionizing radiations, 3699
RADIATION SOURCES/RISK ASSESSMENT
Radioactivity in man: levels, effects and unknowns, 3598 (CONF-800392--1)
RADIATION TRANSPORT
See also NEUTRON TRANSPORT
PROTON TRANSPORT
RADIATION TRANSPORT/ENVIRONMENTAL IMPACTS
Environmental effects from disposal of defense high-level radioactive wastes in a generic geologic repository, 1428 (CONF-791112--24)
RADIOACTIVE AEROSOLS/AEROSOL MONITORING
Air radioactivity in the NRI and its surroundings during 1974, 2425 (INIS-mf--4551)

Measurement and monitoring of gaseous and aerosol-bound radioactive discharges. 1. Measurement and monitoring of radioactive substance releases via the vent stack during routine operation. Draft, 2993
RADIOACTIVE AEROSOLS/DEPOSITION
Wet and dry deposition and resuspension of AFCT/TFCT fuel processing radionuclides. Final report, 2556 (SR--0980-10)
RADIOACTIVE AEROSOLS/DIFFUSION
Analytical and experimental investigation of the atmospheric dispersion of radioactive gases in the local range (up to 15 km distance, emission height =< 100 m), 3217 (KFK--2750)
Investigation of the atmospheric dispersion of radioactive gases and aerosols in the local range (up to 15 km distance) at emission heights above 100 m, 3218 (KFK--2750)
Investigation of the atmospheric dispersion of radioactive gases and aerosols in the mesoscale (more than 15 km distance), 3219 (KFK--2750)
Revised method to calculate the concentration time integral of atmospheric pollutants, 3282
Utilization of the temperature gradients measurements and climatological data in determination of permissible limits of radioactive gases discharge at nuclear power plants, 3212 (INIS-mf--5574)
RADIOACTIVE AEROSOLS/ENVIRONMENTAL TRANSPORT
Analytical and experimental investigation of the atmospheric dispersion of radioactive gases in the local range (up to 15 km distance, emission height =< 100 m), 3217 (KFK--2750)
Computer code to assess accidental pollutant releases, 3198 (DP--1552)
Investigation of the atmospheric dispersion of radioactive gases and aerosols in the local range (up to 15 km distance) at emission heights above 100 m, 3218 (KFK--2750)
RADIOACTIVE AEROSOLS/FILTRATION
Method and equipment to exchange and remove the waste from aerosol filter elements for nuclear plants in a sealed casing (Patent), 3290
RADIOACTIVE AEROSOLS/GASEOUS DIFFUSION
Containment of gaseous fission products in caverns, 3356
RADIOACTIVE AEROSOLS/PARTICLE SIZE
Evaluation of submicron particle size classification and collection techniques for nuclear facility off-gas streams, 45 (ENICO--1003)
RADIOACTIVE AEROSOLS/RADIATION MONITORING
Determination of pollution spreading areas from nuclear power plants by means of the post-irradiation analysis method, 3181 (INIS-mf--5574)
Estimation of inhalation doses from airborne releases using gross monitors, 3287
Forecast of air pollution around nuclear installations on the basis of meteorological measurements, 3213 (INIS-mf--5574)
Isolation and characterization of individual plutonium-bearing particles in atmospheric effluents from a nuclear processing plant, 3265
Monitoring of airborne and liquid radioactive releases from nuclear facilities to the environment. Safety series No. 46: recommendations, 3248 (STI/PUB--482)
RADIOACTIVE AEROSOLS/WASHOUT
Wet and dry deposition and resuspension of AFCT/TFCT fuel processing radionuclides. Final report, 2556 (SR--0980-10)
RADIOACTIVE BIOLOGICAL WASTES
See RADIOACTIVE WASTES
RADIOACTIVE EFFLUENTS
See also RADIOACTIVE WASTES
Airborne ^{131}I releases from operating BWRs, 2691
Annual survey of radioactive discharges in Great Britain 1977, 2990
Determination of the sources of the airborne physico-chemical ^{131}I species in a PWR power plant, 2929 (INIS-mf--4957)
Establishment of activity limits for items to be released for unrestricted use, 2988
New test set up for the in situ determination of percolation parameters in rock, 2915
RADIOACTIVE EFFLUENTS/ACCELERATOR FACILITIES
Radiological impact of high-energy accelerators on the environment, 3216 (KEK--78-20)
RADIOACTIVE EFFLUENTS/AEROSOL MONITORING
Air radioactivity in the NRI and its surroundings during 1974, 2425 (INIS-mf--4551)
RADIOACTIVE EFFLUENTS/ATMOSPHERIC CHEMISTRY
Calculation of the depletion of a radioactive plume in the atmosphere and subsequent exposure due to deposited activity, 3271
RADIOACTIVE EFFLUENTS/AVR REACTOR
AVR's application for release of tritium and carbon-14 approved, 2958
RADIOACTIVE EFFLUENTS/BATTELLE COLUMBUS LABORATORY
Environmental report for calendar year 1978 on radiological and nonradiological parameters, 3196 (DOE/TIC--11148)
RADIOACTIVE EFFLUENTS/BETATRONS
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
RADIOACTIVE EFFLUENTS/BIBLIS-B REACTOR
Stock-taking of the safety design of the nuclear power plant with PWR type Biblis B and the radiation exposure connected with its operation. Phase 1, 2928 (INIS-mf--4698)
RADIOACTIVE EFFLUENTS/BIOLOGICAL RADIATION EFFECTS
Incidence of myeloid leukaemia in Lancashire, 3666
RADIOACTIVE EFFLUENTS/BIOLOGICAL STRESS
Effects of thermal effluent on body condition of largemouth bass, 3683
RADIOACTIVE EFFLUENTS/BNFL
Annual report on radioactive discharges and monitoring of the environment 1978, 3258
RADIOACTIVE EFFLUENTS/BOHUNICE A-1 REACTOR
^{137}Cs - contamination indicator of waste water discharged from A-1 nuclear power plant, 3474 (INIS-mf--4637)
Fission product determination in A-1 nuclear power plant waste waters, 2774 (CS-INIS--206)
Surface water contamination with radionuclides caused by nuclear power engineering, 3438 (INIS-mf--5319)
RADIOACTIVE EFFLUENTS/BRADWELL REACTOR
In situ data on various sites of radioactive releases into the marine environment, 2503
RADIOACTIVE EFFLUENTS/BWR TYPE REACTORS
Airborne ^{131}I releases from operating BWRs, 2691
Beta dose in skin from gaseous radioactive reactor effluents, 2964
Guideline concerning the measurement of emitted radioactive substances in light water power reactor facilities, 3285
Iodine species in reactor effluents and in the environment. Final report, 2922 (EPRI-NP--1269)
Measurement and monitoring of gaseous and aerosol-bound radioactive discharges. 1. Measurement and monitoring of radioactive substance releases via the vent stack during routine operation. Draft, 2993
Measurement of liquid radioactive materials for the monitoring of radioactive emissions. UTA safety regulation, 2694
Methods for demonstrating LWR compliance with the EPA uranium fuel cycle standard: 40 CFR Part 190, 2937 (NUREG--0543)
Planning basis for the development of state and local government Radiological Emergency Response Plans in support of light water nuclear power plants, 2936 (NUREG--0396)
Publication of the safety regulation KTA 3603 of the Committee for Nuclear Technology (KTA). From March 12, 1980, 2898
Radioactivity release to the environment by thermal power stations using coal as a fuel, 2955
Radioactivity releases in boiling water reactors reported in the LER file, 2697
RADIOACTIVE EFFLUENTS/CANDU TYPE REACTORS
Environmental aspects of tritium from CANDU station releases, 2779
RADIOACTIVE EFFLUENTS/CEA LA HAGUE
In situ data on various sites of radioactive releases into the marine environment, 2503
RADIOACTIVE EFFLUENTS/COMPUTER GRAPHICS
Graphic overview system for DOE's effluent and environmental monitoring programs, 3202 (EGG--1183-1760)
RADIOACTIVE EFFLUENTS/CONTAINERS
Leak rates of plutonia powder, 3670
RADIOACTIVE EFFLUENTS/CONTAINMENT BUILDINGS
Stably stratified building wakes, 2894 (NUREG/CR--1247)
RADIOACTIVE EFFLUENTS/CYCLOTRONS
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
RADIOACTIVE EFFLUENTS/DATA COMPILATION
Radioactive effluents from nuclear power stations and fuel reprocessing plants in Europe, 1972 to 1976, 2962
Radioactive materials released from nuclear power plants in 1977, 2963
Radioactivity releases in boiling water reactors reported in the LER file, 2697
Summary of radioactivity released in effluents from nuclear power plants from 1972 thru 1975, 2944 (PB--296289)
RADIOACTIVE EFFLUENTS/DECONTAMINATION
Publication of the safety regulation KTA 3603 of the Committee for Nuclear Technology (KTA). From March 12, 1980, 2898
Waste water treatment installation (Patent), 1333
RADIOACTIVE EFFLUENTS/DIFFUSION
Atmospheric dispersion calculation for posturated accident of nuclear facilities and the computer code: PANDA. Relative concentration (X/Q) and relative cloud-gamma dose (D/Q), 3238 (PNCT--841-79-03)
Dispersion parameters: impact on calculated reactor accident consequences, 3281
Model for short and medium range dispersion of radionuclides released to the atmosphere. The first report of a Working Group on Atmospheric Dispersion, 3228 (NRPB-R--91)
RADIOACTIVE EFFLUENTS/DOSE RATES
Radiological impact from model coal-fired power plants and from nuclear systems, 2934 (INKA-Conf--79-187-001)
RADIOACTIVE EFFLUENTS/DOUGLAS POINT ONTARIO REACTOR
Monitoring of gaseous effluents in Ontario Hydro, 2786
RADIOACTIVE EFFLUENTS/ENVIRONMENTAL EFFECTS
^{129}I in thyroids of herbivores on the Idaho National

Engineering Laboratory Site, 3369 (IDO--12088)
Limitation of the release of radioactive effluents, 2487
Public health hazards from electricity-producing plants, 3104
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
Some environmental aspects of uranium mining and milling in Northern Australia, 2515
RADIOACTIVE EFFLUENTS/ENVIRONMENTAL EXPOSURE PATHWAY
Marine example of a site protection study, 2422 (IAEA--212)
Modelling and computing radiation hazards of population due to nuclear facility operation, 2427 (INIS-mf--4637)
Survey of the distributions of population and agricultural produce, etc. and the application for population dose evaluation. Survey for environmental safety research information, 3372 (JAERI-M--7757)
WATER - a mathematical model for computing population doses in a watershed due to continuous radioactive effluents into water flows, 3479 (UJV--4508-D,CH,A,E)
RADIOACTIVE EFFLUENTS/ENVIRONMENTAL IMPACTS
Comparative biological hazards of chemical pollutants and radiation, 3186
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
Methods for estimating population detriment and their application in setting environmental discharge limits, 2606
RADIOACTIVE EFFLUENTS/ENVIRONMENTAL TRANSPORT
Contribution of radioactive effluents to exposure of population living near Nuclear Research Institute, Rez, 2428 (INIS-mf--4637)
EFFAIR: a computer program for estimating the dispersion of atmospheric emissions from a nuclear site, 3187 (AECL--6309)
Radiocesium exchange among components of a Coastal Plain bottomland stream ecosystem, 3490
RADIOACTIVE EFFLUENTS/FALLOUT
Analysis of NRC methods for estimating the effects of dry deposition in environmental radiological assessments, 3256
RADIOACTIVE EFFLUENTS/FEED MATERIALS PLANTS
Emission and control of radon at active uranium mines and mills, 2505
RADIOACTIVE EFFLUENTS/FFTF REACTOR
Evaluation models and their influence on radiological consequences of hypothetical accidents in FFTF, 3035 (HEDL-SA--2017-FP)
RADIOACTIVE EFFLUENTS/FILTERS
Control connection, primarily for radioactive products filtration equipment (Patent), 3692
RADIOACTIVE EFFLUENTS/FILTRATION
Gas filter and device intended for removing from the housing the absorbant and granular matter (Patent), 1318
RADIOACTIVE EFFLUENTS/FOSSIL-FUEL POWER PLANTS
Radioactivity release to the environment by thermal power stations using coal as a fuel, 2955
Radioactivity from fossil-fuel power plant and its effects, 3268
Radiological impact from model coal-fired power plants and from nuclear systems, 2934 (INKA-Conf--79-187-001)
Trace element analysis of radiological effluents from coal-burning power plants, 3261
US measures coal-fired radioactive hazard, 3284
RADIOACTIVE EFFLUENTS/FUEL CYCLE
Descriptions of reference LWR facilities for analysis of nuclear fuel cycles. Appendixes, 2945 (PNL--2286(App.))
Survey of LWR environmental control technology performance and cost, 2450 (PNL--2287)
RADIOACTIVE EFFLUENTS/FUEL REPROCESSING PLANTS
^{14}C behavior in HTR fuel reprocessing and preliminary evaluation of its release reduction process, 2431 (JAERI-M--7962)
^{85}Kr in the atmosphere and its measurement, 3209 (INIS-mf--4637)
Developments in effluent control for breeder reprocessing facilities, 36 (CONF-800334--7)
Environmental radiation exposure due to exhaust air of the reprocessing plant, 3252
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
Measurement of ^{85}Kr concentration in the environmental air during the hot-test operation of Tokai reprocessing plant, 2448 (PNCT--841-78-49)
Population dose from LWR fuel reprocessing, 2600
Processes for the control of $^{14}CO_2$ during reprocessing, 672 (CONF-800211--2(Draft))
Radioactive effluents from nuclear power stations and fuel reprocessing plants in Europe, 1972 to 1976, 2962
Radioactive effluents from nuclear power stations and nuclear fuel reprocessing plants in the European Community. Discharge data 1972-1976 radiological aspects, 2420 (EUR--6088)
Studies on the dispersion of low-level liquid effluent released from the fuel reprocessing plant into the sea, 1726 (PNCT--841-78-69)
Wet and dry deposition and resuspension of AFCT/TFCT fuel processing radionuclides. Final report, 2556 (SR--0980-10)
Windscale radiocaesium in the Clyde Sea area, 3422
RADIOACTIVE EFFLUENTS/GARIGLIANO REACTOR
Monitoring of radioactive releases at the Garigliano Nuclear Power Station of the Ente Nazionale per l'Energia Elettrica (ENEL), Italy, 2710
RADIOACTIVE EFFLUENTS/HEALTH HAZARDS
Comparative biological hazards of chemical pollutants and radiation, 3186
Limitation of the release of radioactive effluents, 2487
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
RADIOACTIVE EFFLUENTS/HTGR TYPE REACTORS
Measurement of liquid radioactive materials for the monitoring of radioactive emissions. UTA safety regulation, 2694
Publication of the safety regulation KTA 3603 of the Committee for Nuclear Technology (KTA). From March 12, 1980, 2898
Stock-taking of the safety design of the nuclear power plant with HTR 1160 and the radiation exposure connected with its operation. Phase 1 (German Federal Republic), 2760 (INIS-mf--4697)
RADIOACTIVE EFFLUENTS/HTR REACTOR
Measurement and monitoring of gaseous and aerosol-bound radioactive discharges. 1. Measurement and monitoring of radioactive substance releases via the vent stack during routine operation. Draft, 2993
RADIOACTIVE EFFLUENTS/IDAHO NATIONAL ENGINEERING LABORATORY
Plutonium in the lungs of pronghorn antelope near a nuclear fuel reprocessing plant, 3379
RADIOACTIVE EFFLUENTS/ISAR REACTOR
Kernkraftwerk Isar: Leakage of a small amount of contaminated auxiliary feedwater into the rainwater duct, 2686
RADIOACTIVE EFFLUENTS/ISOTOPE RATIO
Isotope composition of iodine in gaseous effluents of nuclear facilities and iodine filter efficiency, 2927 (INIS-mf--4637)
RADIOACTIVE EFFLUENTS/KERNFORSCHUNGSZENTRUM KARLSRUHE
Impact on the environment of tritium releases from the Karlsruhe Nuclear Research Center, 3272
On-line meteorological information system for response to accidental releases of radioactivity into the atmosphere, 2959
RADIOACTIVE EFFLUENTS/KOEBERG-1 REACTOR
Assessment of environmental radiation hazards from the Koeberg nuclear power station, 2952
RADIOACTIVE EFFLUENTS/LASL
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
RADIOACTIVE EFFLUENTS/LEGAL ASPECTS
Methods for demonstrating LWR compliance with the EPA uranium fuel cycle standard: 40 CFR Part 190, 2937 (NUREG--0543)
RADIOACTIVE EFFLUENTS/LI-DRIFTED GE DETECTORS
Comparison of gamma-spectrometric techniques for environmental monitoring of nuclear installations, 3629
RADIOACTIVE EFFLUENTS/LINEAR ACCELERATORS
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
RADIOACTIVE EFFLUENTS/LIQUID CONTAMINATION MONITORS
Instantaneous and continuous sampling station for monitoring the radioactivity of sewage, 3000
RADIOACTIVE EFFLUENTS/LOFT REACTOR
Offsite exposure from rupture waste gas decay tank, 3007 (EGG/LTR--112-7)
RADIOACTIVE EFFLUENTS/MANAGEMENT
Radiation protection activities - 1977. Annual report, 2941 (PB--290215)
RADIOACTIVE EFFLUENTS/MATHEMATICAL MODELS
Calculation model for evaluation of doses due to effluents from the operation of nuclear installations, 2951 (UCRL-Trans--11608)
Evaluation of empirical atmospheric diffusion data, 2938 (NUREG/CR--0789)
RADIOACTIVE EFFLUENTS/MAXIMUM PERMISSIBLE CONCENTRATION
Limits to radioactive effluents and countermeasures in accidental situations, 2423 (IAEA--212)
RADIOACTIVE EFFLUENTS/MELTDOWN
Liquid pathways generic studies; results, interpretation, and design implications (PWR; BWR), 3027 (CONF-800403--(Vol.2))
RADIOACTIVE EFFLUENTS/MONITORING
Atmospheric Release Advisory Capability (ARAC) response to the Three Mile Island accident, 3051
Iodine species in reactor effluents and in the environment. Final report, 2922 (EPRI-NP--1269)
Radioactive waste disposal by UKAEA establishments during 1978 and associated environmental monitoring results, 1390 (AERE-R--9445)
RADIOACTIVE EFFLUENTS/NS OTTO HAHN
Radiological data concerning the nuclear merchantship Otto Hahn. A review after ten years of operation, 3022 (GKSS--79/E/24)
RADIOACTIVE EFFLUENTS/NUCLEAR FACILITIES
Air radioactivity in the NRI and its surroundings during 1974, 2425 (INIS-mf--4551)
Analysis of NRC methods for estimating the effects of dry deposition in environmental radiological assessments, 3256
Annual report on radioactive discharges and monitoring of the environment, 1977 (United Kingdom), 2429 (INIS-mf--5194)

Applications of in situ Ge(Li) spectrometry, 3277
Computerprogram for calculating the radiological consequences of shorttime radioactive releases from nuclear installations, 3189 (AIAU--78306)
Dose-rate conversion factors for external exposure to photon and electron radiation from radionuclides occurring in routine releases from nuclear fuel cycle facilities, 3251
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
Graphic overview system for DOE's effluent and environmental monitoring programs, 3202 (EGG--1183-1760)
Implementation of radiation protection requirements in the limitation of the release of radioactive effluents, 2424 (IAEA--212)
In situ data on various sites of radioactive releases into the marine environment, 2503
Limits to radioactive effluents and countermeasures in accidental situations, 2423 (IAEA--212)
Modelling and computing radiation hazards of population due to nuclear facility operation, 2427 (INIS-mf--4637)
Monitoring of airborne and liquid radioactive releases from nuclear facilities to the environment, 3292
On-line meteorological information system for response to accidental releases of radioactivity into the atmosphere, 2959
Radiation exposure due to nuclear facilities in West Germany in 1976, 2586
Radioactivity in surface and coastal waters of the British Isles, 1976. Part 2. Areas other than the Irish Sea and its environs, 3435 (FRL--14)
Reduction of iodine emissions from nuclear facilities, 851 (INKA-Conf--78-156-000)
RADIOACTIVE EFFLUENTS/NUCLEAR INDUSTRY
Distribution of cobalt 60 in a mollusc, a crustacean and a freshwater teleost: variations as a function of the source of pollution and during elimination, 3483
RADIOACTIVE EFFLUENTS/NUCLEAR POWER
Iodine-129 dose to the world population from the nuclear power industry, 3192 (CONF-791103--107)
RADIOACTIVE EFFLUENTS/NUCLEAR POWER PLANTS
^{85}Kr in the atmosphere and its measurement, 3209 (INIS-mf--4637)
Aerial radiological survey of the area surrounding the Edwin I. Hatch Nuclear Plant, Baxley, Georgia, 3199 (EGG--1183-1726)
Annual survey of radioactive discharges in Great Britain 1977, 2990
Building effects on effluent dispersion from roof vents at nuclear power plants. Final report, 2923 (EPRI-NP--1380)
Calculation model for evaluation of doses due to effluents from the operation of nuclear installations, 2951 (UCRL-Trans--11608)
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
Cost-effectiveness of the fenceline cow, 3257
Determination of safe radioactive releases to the atmosphere fron the nuclear power site, Duynefontein, 3360 (CONF-7604154--)
Diffusion coefficients of airborne radioactive iodine and methyl iodide, 3288
Distribution of activation products from Barsebaeck nuclear power plant (Sweden) in the marine environment. Temporal and spatial variations as established by seaweed, 3481
Effect of nuclear power generation on water quality in the great lakes. Technical report, 3419 (PB--80-101959)
Evaluation of empirical atmospheric diffusion data, 2938 (NUREG/CR--0789)
Iodine species in reactor effluents and in the environment. Final report, 2922 (EPRI-NP--1269)
Isotope composition of iodine in gaseous effluents of nuclear facilities and iodine filter efficiency, 2927 (INIS-mf--4637)
Liquid effluent treatment in nuclear power plants with light water reactors, 2961
Monitoring of radioactive releases at the Garigliano Nuclear Power Station of the Ente Nazionale per l'Energia Elettrica (ENEL), Italy, 2710
Monitoring of gaseous and liquid effluents at French nuclear power plants, 2994
Monitoring equipment for liquid effluents, 2996
Monitoring of the discharge of radioactive materials in gaseous effluents at the stack of nuclear power plants with light-water-cooled reactors, 3291
Monitoring of airborne and liquid radioactive releases from nuclear facilities to the environment. Safety series No. 46: recommendations, 3248 (STI/PUB--482)
Nuclear power and environmental radioactivity. Regulations, 3661
Public health considerations of carbon-14 discharges from the light-water-cooled nuclear power reactor industry. Technical note, 2942 (PB--295054)
Public health hazards from electricity-producing plants, 3104
Radiation protection activities - 1977. Annual report, 2941 (PB--290215)
Radioactive effluents from nuclear power stations and fuel reprocessing plants in Europe, 1972 to 1976, 2962
Radioactive materials released from nuclear power plants in 1977, 2963
Radioactive effluents from nuclear power stations and nuclear fuel reprocessing plants in the European Community. Discharge data 1972-1976 radiological aspects, 2420 (EUR--6088)
Radiological impact from model coal-fired power plants and from nuclear systems, 2934 (INKA-Conf--79-187-001)
Real-time simulation of gamma exposure rate by puff model, 3280
Releases of radioactive substances from nuclear power plants in the European Communities in 1972-1976, 2902
Summary of radioactivity released in effluents from nuclear power plants from 1973 thru 1976, 2943 (PB--295100)
Summary of radioactivity released in effluents from nuclear power plants from 1972 thru 1975, 2944 (PB--296289)
Transfer parameters of fission and activation products present in effluents of nuclear power reactors, 2925 (IAEA--212)
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
RADIOACTIVE EFFLUENTS/ORE PROCESSING
Some environmental aspects of uranium mining and milling in Northern Australia, 2515
RADIOACTIVE EFFLUENTS/ORGDP
UF_6 release experience and prevention in United States gaseous diffusion plants, 2433 (KY--690)
RADIOACTIVE EFFLUENTS/ORNL
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
RADIOACTIVE EFFLUENTS/PADUCAH PLANT
UF_6 release experience and prevention in United States gaseous diffusion plants, 2433 (KY--690)
RADIOACTIVE EFFLUENTS/PAKS-1 REACTOR
Environmental protection of nuclear power stations, 2999
Radioactive contamination of the atmosphere and its effects on population in the neighbourhood, 2745
RADIOACTIVE EFFLUENTS/PAKS-2 REACTOR
Radioactive contamination of the atmosphere and its effects on population in the neighbourhood, 2745.
RADIOACTIVE EFFLUENTS/PLUMES
Calculation of the depletion of a radioactive plume in the atmosphere and subsequent exposure due to deposited activity, 3271
Stably stratified building wakes, 2894 (NUREG/CR--1247)
RADIOACTIVE EFFLUENTS/PORTSMOUTH GASEOUS DIFFUSION PLANT
UF_6 release experience and prevention in United States gaseous diffusion plants, 2433 (KY--690)
RADIOACTIVE EFFLUENTS/PRODUCTION REACTORS
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
RADIOACTIVE EFFLUENTS/PWR TYPE REACTORS
Determination of the sources of the airborne physico-chemical ^{131}I species in a PWR power plant, 2929 (INIS-mf--4957)
Guideline concerning the measurement of emitted radioactive substances in light water power reactor facilities, 3285
Measurement and monitoring of gaseous and aerosol-bound radioactive discharges. 1. Measurement and monitoring of radioactive substance releases via the vent stack during routine operation. Draft, 2993
Measurement of liquid radioactive materials for the monitoring of radioactive emissions. UTA safety regulation, 2694
Methods for demonstrating LWR compliance with the EPA uranium fuel cycle standard: 40 CFR Part 190, 2937 (NUREG--0543)
Planning basis for the development of state and local government Radiological Emergency Response Plans in support of light water nuclear power plants, 2936 (NUREG--0396)
Publication of the safety regulation KTA 3603 of the Committee for Nuclear Technology (KTA). From March 12, 1980, 2898
Tritium in PWRs: a rational perspective, 2731
RADIOACTIVE EFFLUENTS/RADIATION DETECTION
Method of locating radiation detectors, 98
RADIOACTIVE EFFLUENTS/RADIATION HAZARDS
Environmental development plan for special nuclear materials production, 3194 (DOE/EDP--0056)
Methods for estimating population detriment and their application in setting environmental discharge limits, 2606
Modelling and computing radiation hazards of population due to nuclear facility operation, 2427 (INIS-mf--4637)
Radiological consequences of radioactive effluents, 2960
Some environmental aspects of uranium mining and milling in Northern Australia, 2515
RADIOACTIVE EFFLUENTS/RADIATION MONITORING
Annual report on radioactive discharges and monitoring of the environment, 1977 (United Kingdom), 2429 (INIS-mf--5194)
Control and monitoring system of radioactive effluents in radioisotope facilities, 2328
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
Measurement and monitoring of gaseous and aerosol-bound radioactive discharges. 1. Measurement and

monitoring of radioactive substance releases via the vent stack during routine operation. Draft, 2993
Measurement of environmental radioactivity. Ispra 1977, 3207 (EUR--6180)
Monitoring of gaseous effluents in Ontario Hydro, 2786
Monitoring of the release of radioactive substances from nuclear facilities into surface waters, 2907
Monitoring of gaseous and liquid effluents at French nuclear power plants, 2994
Monitoring of releases from an irradiated fuel reprocessing plant, 2995
Monitoring equipment for liquid effluents, 2996
Monitoring methods for radioactive noble gases in airborne effluents from nuclear power plants, 2998
Monitoring of the discharge of radioactive materials in gaseous effluents at the stack of nuclear power plants with light-water-cooled reactors, 3291
On-line meteorological information system for response to accidental releases of radioactivity into the atmosphere, 2959
Radioactive effluent control for Nuclear Research Institute, Rez, 2426 (INIS-mf--4637)

RADIOACTIVE EFFLUENTS/RADIOACTIVE WASTE PROCESSING
Liquid effluent treatment in nuclear power plants with light water reactors, 2961
Public health considerations of carbon-14 discharges from the light-water-cooled nuclear power reactor industry. Technical note, 2942 (PB--295054)

RADIOACTIVE EFFLUENTS/RADIOACTIVE WASTE STORAGE
Control and monitoring system of radioactive effluents in radioisotope facilities, 2328

RADIOACTIVE EFFLUENTS/RADIOECOLOGICAL CONCENTRATION
Measurement of environmental radioactivity. Ispra 1976, 3206 (EUR--5805)

RADIOACTIVE EFFLUENTS/RADIONUCLIDE MIGRATION
Calculation of the depletion of a radioactive plume in the atmosphere and subsequent exposure due to deposited activity, 3271
Calculation of pollutant transfer in an aquifer TRIDISOL A1, A2, and 3 codes. Report DSN No. 270, 3314 (DOE/CEA/BMFT--8)
Liquid waste disposal at the Idaho National Engineering Laboratory and resultant waste plumes in the Snake River Plain aquifer, 3436 (IDO--12088)
Method for previsional evaluation of pollutant transfers in an aquifer. First results obtained in a sandy environment (at the BARP workings, GIRONDE). Report DSN No. 261, 3315 (DOE/CEA/BMFT--9)
Model for short and medium range dispersion of radionuclides released to the atmosphere. The first *report of a Working Group on Atmospheric Dispersion*, 3228 (NRPB-R--91)
Radiological status of the ground water beneath the Hanford project, January-December 1979, 3442 (PNL--3346)
Transport and transfer rates in the waters of the continental shelf (Atlantic Ocean), 3408 (COO--2185-12)

RADIOACTIVE EFFLUENTS/REACTOR ACCIDENTS
New test set up for the in situ determination of percolation parameters in rock, 2915
Observations on the use of the consequence model CRAC for small nonreactor atmospheric releases, 2947 (SAND--80-0366)

RADIOACTIVE EFFLUENTS/REACTOR DECOMMISSIONING
Establishment of activity limits for items to be released for unrestricted use, 2988
Methodology for determining acceptable residual radioactive contamination levels at decommissioned nuclear facilities/sites, 2989

RADIOACTIVE EFFLUENTS/REACTOR SITES
Survey of the distributions of population and agricultural produce, etc. and the application for population dose evaluation. Survey for environmental safety research information, 3372 (JAERI-M--7757)

RADIOACTIVE EFFLUENTS/REGULATIONS
Nuclear power and environmental radioactivity. Regulations, 3661

RADIOACTIVE EFFLUENTS/REGULATORY GUIDES
Statistical analysis of selected parameters for predicting food chain transport and internal dose of radionuclides. Final report, 3375 (NUREG/CR--1004)

RADIOACTIVE EFFLUENTS/RELEASE LIMITS
Implementation of radiation protection requirements in the limitation of the release of radioactive effluents, 2424 (IAEA--212)
Limits for radioactive material releases from nuclear fuel cycle facilities, 3297
Radiation protection requirements in the limitation of the release of radioactive effluents, 2926 (IAEA--212)

RADIOACTIVE EFFLUENTS/ROCKY FLATS PLANT
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
Plutonium in soil adjacent to Rocky Flats Plant, 2507

RADIOACTIVE EFFLUENTS/SAVANNAH RIVER PLANT
Comparison of calculated and measured radiation doses from chronic aqueous releases, 3423
Measured hourly and daily average ^{85}Kr concentrations within 10 km of the Savannah River Plant (1976), 3204 (EML--373)

RADIOACTIVE EFFLUENTS/SCRUBBING
Gas scrubber, installation and process to make use of it, 3289

RADIOACTIVE EFFLUENTS/SOLID SCINTILLATION DETECTORS
Comparison of gamma-spectrometric techniques for environmental monitoring of nuclear installations, 3629

RADIOACTIVE EFFLUENTS/SPENT FUEL ELEMENTS
Observations on the use of the consequence model CRAC for small nonreactor atmospheric releases, 2947 (SAND--80-0366)

RADIOACTIVE EFFLUENTS/STACK DISPOSAL
Analytical and experimental investigation of the atmospheric dispersion of radioactive gases in the local range (up to 15 km distance, emission height =< 100 m), 3217 (KFK--2750)
Investigation of the atmospheric dispersion of radioactive gases and aerosols in the local range (up to 15 km distance) at emission heights above 100 m, 3218 (KFK--2750)

RADIOACTIVE EFFLUENTS/THREE MILE ISLAND-2 REACTOR
^{131}I studies at TMI Unit 2. Final report, 2924 (EPRI-NP--1389)
Accident at Three Mile Island. Comments by the Health and Safety Executive, 3069
Archiving the paper fallout from Three Mile Island, 2949 (UCID--18243)
Atmospheric Release Advisory Capability (ARAC) response to the Three Mile Island accident, 3051
Critique of source term and environmental measurement at Three Mile Island, 2918 (BNL--26970)
Emergency actions concerned with effluent control at TMI, 3030 (CONF-800607--60)
Estimates of dose to the population within fifty miles due to noble gas releases from the Three Mile Island incident, 2919 (CONF-800403--13)
Population dose and health impact of the accident at the Three Mile Island Nuclear Station. Final report, 28 March-7 April 1978, 3042 (PB--296197)
Preliminary comparisons between measurements and model calculations for the TMI venting of ^{85}Kr, 2950 (UCID--18783)
Reports of the Public Health and Safety Task Force on public health and safety summary; health physics and dosimetry; radiation health effects; behavioral effects; and public health and epidemiology, 3040 (NP--25109)
Summary and discussion of findings from: population dose and health impact of the accident at the Three Mile Island Nuclear Station (a preliminary assessment for the period March 28-April 7, 1979), 2967
Utilization of the atmospheric release advisory capability (ARAC) services during and after the Three Mile Island accident, 3250 (UCRL--52959)

RADIOACTIVE EFFLUENTS/TRIGA-3-SEOUL REACTOR
Measurement of airborne radon daughter concentrations in the atmosphere, 3011

RADIOACTIVE EFFLUENTS/UJV
Airborne radioactivity measurement at Nuclear Research Institute, 3211 (INIS-mf--4637)
Contribution of radioactive effluents to exposure of population living near Nuclear Research Institute, Rez, 2428 (INIS-mf--4637)
Radioactive effluent control for Nuclear Research Institute, Rez, 2426 (INIS-mf--4637)

RADIOACTIVE EFFLUENTS/UNTERWESER REACTOR
Radioecological experts' opinions on waste water of Esensham nuclear power plant. Final report of a part of the project: Pollution at the place of work and in the Lower Weser industrialized region, 2721 (INIS-mf--5464)

RADIOACTIVE EFFLUENTS/URANIUM MINES
Emission and control of radon at active uranium mines and mills, 2505

RADIOACTIVE EFFLUENTS/VAN DE GRAAFF ACCELERATORS
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)

RADIOACTIVE EFFLUENTS/VRAIN REACTOR
Fort St. Vrain Nuclear Generating Station environmental surveillance program. Summary report, July 1, 1979-December 31, 1979, 2956

RADIOACTIVE EFFLUENTS/WAK
Investigation of the physical and chemical environmental behaviour of radionuclides characterized by a particular biological effectiveness - Pu, Am, Cm, 2432 (KFK--2750)

RADIOACTIVE MATERIALS
See also FISSION PRODUCTS
RADIOACTIVE WASTES
RADIOPHARMACEUTICALS

RADIOACTIVE MATERIALS/BIBLIOGRAPHIES
Hazardous materials transportation. part 2. radioactive materials and wastes (citations from the NTIS data base). Report for 1964-Apr 1979, 226 (NTIS/PS--79/0704)

RADIOACTIVE MATERIALS/ENVIRONMENTAL IMPACTS
Radioactive materials and environment, 3380

RADIOACTIVE MATERIALS/ENVIRONMENTAL TRANSPORT
Two-dimensional finite element solution for the simultaneous transport of water and solutes through a nonhomogeneous aquifer under transient saturated unsaturated flow conditions, 3506 (CONF-7906121--1)

RADIOACTIVE MATERIALS/FIRE HAZARDS
International guidelines for fire protection at nuclear *installations including nuclear fuel plants, nuclear* fuel stores, teaching reactors, research establishments, 3505

RADIOACTIVE MATERIALS/RADIATION PROTECTION
Radioactive materials in California, 2817
RADIOACTIVE MATERIALS/RAIL TRANSPORT
Analysis of freight train accident statistics for 1972-1974, 244 (PNL-SA--6521)
Compatibility of radioactive materials transportation with railroad operations: two views, 155 (CONF-780506--(Vol.1))
RADIOACTIVE MATERIALS/REGULATIONS
Radioactive materials in California, 2817
Radioactive materials in California, 2818
RADIOACTIVE MATERIALS/RISK ASSESSMENT
Environmental effects associated with the transportation of radioactive material, 258 (SAND--79-1929C)
RADIOACTIVE MATERIALS/TRANSPORT
Assessment of dose to the critical group and the world population, 2527 (IAEA--212)
Chemistry research and development. Progress report, December 1978-May 1979, 249 (RFP--2982)
Container for transport of radioactive materials (Patent), 366
Environmental effects associated with the transportation of radioactive material, 258 (SAND--79-1929C)
Hazardous materials transportation. part 2. radioactive materials and wastes (citations from the NTIS data base). Report for 1964-Apr 1979, 226 (NTIS/PS--79/0704)
ORNL interface and logistics studies, 340
Proceedings of the nuclear materials transportation program development seminar, 259 (SAND--79-2262)
Scale model experiments of energy material shipping containers, 3602 (DOE/EV--0046(Vol.2))
RADIOACTIVE MATERIALS/TRANSPORT REGULATIONS
The transport of radioactive materials, 3503
Transport of radioactive materials, 349
RADIOACTIVE MATERIALS/TRANSPORTATION SYSTEMS
Program strategy document for the nuclear materials. Transportation Technology Center (FY 80), 264 (SAND--80-0784)
RADIOACTIVE WASTE DISPOSAL
See also SHAFT EXCAVATIONS
STACK DISPOSAL
A flood of hot waste, 2248
Brief account of the proceedings of working group 7, waste management and disposal, of the international nuclear fuel cycle evaluation, 1497 (INFCE/DEP/WG--7/23)
Burning nuclear wastes in fusion reactors, 2661 (UCRL--82969)
Chemistry of radioactive waste disposal. Pt. 1, 2374
Chemistry of radioactive waste disposal. Pt. 2, 2375
Controlling the use of hazardous materials in research and development laboratories, 3677
Disposal of radioactive wastes, 409 (CONF-791185--2)
Disposal of nuclear waste, 2351
Disposal of waste resulting from the dismantling of nuclear facilities, 2318
Earth Sciences Division. Annual report 1978, 3549 (LBL--8648)
Final disposal of radioactive wastes, 2105
Fuel-cycle facilities: preliminary safety and environmental information document. Volume VII, 2839 (DOE/NE--0003/7)
Geohydrologic investigations of buried metamorphic rock and mudstone for the storage of radioactive waste, 3537
Glasses and ceramics for immobilisation of radioactive wastes for disposal, 612 (AERE-R--9417)
How to store wastes, 2290
International symposium of the IAEA/NEA on the decommissioning of nuclear facilities. A comment from the operator's point of view, 2233
Low-level radioactive wastes managements in universities, institutes and hospitals. On radiopharmaceutical waste disposal, 2223
No technical barriers to waste disposal, 2249
Nuclear fuel supply for countries embarking on a nuclear power programme, and aspects of developing a domestic nuclear fuel industry, 25
Nuclear waste: a problem that must be solved (New legislation for), 2156
Nuclear Waste Management Program summary document, FY 1981, 421 (DOE/NE--0008)
Nuclear waste management: storage and disposal aspects, 2084 (UCRL--84918)
Problems of radioactive waste disposal in a nuclear medicine department, 2325
Progress report, Biology and Health Physics Division, 1 April to 30 June 1979, 3413 (AECL--6586)
Project for burial of nuclear power plant wastes in Czechoslovakia, 1514 (INIS-mf--5571)
Radioactive waste: availability of solutions, 703 (DOE/EV--0046(Vol.2))
Radioactive waste disposal, 2220
Radioactive waste disposal-a comparison of alternative nuclear fuel cycles, 2286
Radioactive waste: a technical solution, 2152
Radioactive wastes. Chapter 9, 1270
Radioactive waste storage and disposal: the challenge, 1382 (AECB--1120)
Reduction in the toxicity of fission product wastes through transmutation with deuterium-tritium fusion neutrons, 3585
Relevance of natural retention experience to nuclear waste management, 2357
Remarks to Gorleben, 2171
Some notes in connection with the KBS studies of final disposal of spent fuel, 1538 (KBS-TR--120)
Study on safety ground storage and disposal of radioactive wastes. Distribution and migration of ^{60}Co and ^{137}Cs in a sand layer, 3323 (JAERI-M--7642)
Treatment and ultimate storage of radioactive waste, 608 (AED-Conf--76-760-000)
Water percolation effects on clay-poor bentonite/quartz buffer material at high hydraulic gradients, 3405 (SKBF/KBS-TR--79-17)
RADIOACTIVE WASTE DISPOSAL/AERIAL MONITORING
Photon spectra of gamma-rays back-scattered by infinite air. Part I: Area-skyline, 2493
RADIOACTIVE WASTE DISPOSAL/ALPHA-BEARING WASTES
Management and disposal of wastes contaminated by alpha emitters, 2405 (RFP-Trans--286)
RADIOACTIVE WASTE DISPOSAL/AUTORADIOLYSIS
Gas generation by self-radiolysis of tritiated waste materials, 2111
RADIOACTIVE WASTE DISPOSAL/BACKFILLING
Creep consolidation of nuclear depository backfill materials, 1951 (SAND--79-2212)
RADIOACTIVE WASTE DISPOSAL/BIBLIOGRAPHIES
Geoscience data base handbook for modeling a nuclear waste repository. Volume 1, 1608 (NUREG/CR--0912(Vol.))
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
Radioactive waste processing and disposal (4144 citations), 899 (NUREG--0643)
Radioactive waste processing and disposal, 478 (NUREG--0644)
Radioactive waste disposal in salt deposits (a bibliography with abstracts). Report for 1964-November 1979, 1695 (PB--80-801772)
Radioactive waste management integrated data base: a bibliography, 494 (ORNL/TM--7385/V2)
Selected, annotated bibliography of studies relevant to the isolation of nuclear wastes (705 references), 1665 (ORNL/EIS--156/V1)
Site locality identification study: Hanford Site. Volume II. Data cataloging, 1818 (RHO-BWI-C--62(Vol.2)
RADIOACTIVE WASTE DISPOSAL/CAPITAL
Management of solid waste, 1666 (ORNL/ENG/INF--80/1)
RADIOACTIVE WASTE DISPOSAL/CHEMISTRY
Nuclear waste chemistry, 488 (ORNL--5665)
RADIOACTIVE WASTE DISPOSAL/CLASSIFICATION
Radioactive waste disposal classification system, 1610 (NUREG/CR--1005(Vol.1))
RADIOACTIVE WASTE DISPOSAL/CLOSURES
Apparatus for sealing access holes to cavities within the earth with rock glass (Patent), 2383
RADIOACTIVE WASTE DISPOSAL/COMPARATIVE EVALUATIONS
Alternative waste disposal concepts. An interim technical assessment, technical report, 1632 (ONWI--65)
Alternative disposal concepts for high-level and transuranic radioactive waste disposal, 1595 (MTR--7718)
Comparison of some geologic and ocean disposal concepts regarding realistic modeling that allows objective risk assessment to be made, 2276
Evaluation of alternatives for low-level waste disposal (Shallow land burial, improved shallow land burial, deep burial, new and existing mines, above-grade structures and ocean disposal), 2295
RADIOACTIVE WASTE DISPOSAL/COMPATIBILITY
Materials interaction test summary description, 1486 (HEDL-TC--1331(Rev.1))
RADIOACTIVE WASTE DISPOSAL/COMPUTER CODES
Systems engineering programs for geologic nuclear waste disposal, 1983 (SAND--80-0440)
Waste Isolation Safety Assessment Program, 3243 (PNL--3300(Pt.2))
RADIOACTIVE WASTE DISPOSAL/CONFIGURATION
Comparison of temperature calculations for an arbitrary high-level waste disposal configuration in salt formations, 1474 (ECN--63)
RADIOACTIVE WASTE DISPOSAL/CONTAINERS
A survey of packaging for solidified low-level radioactive waste. Technical note, 1704 (PB--295038)
Basalt Waste Isolation Project. Quarterly report, January 1-March 31, 1980, 1806 (RHO-BWI--80-100-2Q)
Canister compatibility with Carlsbad salt, 1467 (DP-MS--79-30)
Chemical toxicity issues in high-level waste disposal, 2308
Corrosion resistance of canisters for final disposal of spent nuclear fuel, 2262
Corrosion of mild steel waste form containers, 2208
Final storage in concrete of activated metal parts, 1537 (KBS-TR--119)
Lead as a material for atomic waste containers. Analysis of lead corrosion behavior on the basis of archaeological finds, 2102
Material for radioactive protection (Patent), 2404
RADIOACTIVE WASTE DISPOSAL/CONTROL ELEMENTS
Packaging, transportation and disposal of reactor core components, 630 (CONF-780506--(Vol.2))
RADIOACTIVE WASTE DISPOSAL/COORDINATED RESEARCH PROGRAMS
Nevada Nuclear Waste Storage Investigations. FY 1979 peer review summaries and related documentation, 1618

(NVO--196-16)
Report on geologic exploration activities, 1459 (DOE/RL/C--14)
RADIOACTIVE WASTE DISPOSAL/COST
Management and disposal of wastes contaminated by alpha emitters, 2405 (RFP-Trans--286)
Regulatory problems with nuclear fuel storage and disposal costs, 302
Status of low-level radioactive waste disposal: how to plan a disaster, 1717 (PB--296947)
WIPP conceptual design report. Addendum C. Cost worksheets for Waste Isolation Pilot Plant (WIPP), 1878 (SAND--77-0274(Add.C))
RADIOACTIVE WASTE DISPOSAL/COST BENEFIT ANALYSIS
Benefit-cost analysis for the commercial disposal of low-level radioactive solid wastes, 2195
Cost-effectiveness of the fenceline cow, 3257
Observations on the use of cost-benefit analysis in the control of radioactive waste disposal, 1594 (MAFF-FL--17)
RADIOACTIVE WASTE DISPOSAL/CRITICALITY
Criticality considerations for geological disposal of spent fuel, 2296
RADIOACTIVE WASTE DISPOSAL/DATA COMPILATION
Radioactive liquid waste discharged to ground in the 200 Areas during 1977, 1848 (RHO-CD--34-4Q)
RADIOACTIVE WASTE DISPOSAL/DECISION MAKING
Development of regulatory procedures for the disposal of solid radioactive waste in deep, continental formations, 2125
Methodology for analyzing decisions regarding nuclear waste disposal, 2205
Shallow land burial: why or why not, 1718 (PB--296947)
RADIOACTIVE WASTE DISPOSAL/ECONOMIC ANALYSIS
Back-end fuel cycle costs for alternative fuels, 2837 (CONF-800943--(Summ.))
RADIOACTIVE WASTE DISPOSAL/ENGINEERED SAFETY SYSTEMS
Investigation of metallic, ceramic, and polymeric materials for engineered barrier applications in nuclear-waste packages, 1761 (PNL--3486)
RADIOACTIVE WASTE DISPOSAL/ENVIRONMENTAL EFFECTS
Activation and fission radionuclide concentrations and retention by ducks using radioactive leaching ponds, 3470 (IDO--12086)
Dumping of solid packaged radioactivity in the deep ocenas, 3421
Environmental monitoring and disposal of radioactive waste fron naval nuclear vessels and support facilities in 1978, 2175
Nuclear waste and Nuclear Regulatory Commission licensing, 2654
Radiocesium uptake by a population of cotton rats (Sigmodon hispidus) inhabitating the banks of a radioactive liquid waste pond, 3385
Species composition and local movement of small mammals on the Radioactive Waste Management Complex, Idaho National Engineering Laboratory Site, 3366 (IDO--12088)
Theoretical problems in defining dispersal in small mammals occupying the Subsurface Disposal Area, Idaho National Engineering Laboratory Site, 3367 (IDO--12088)
RADIOACTIVE WASTE DISPOSAL/ENVIRONMENTAL EXPOSURE PATHWAY
Assessment of effectiveness of geologic isolation systems. Perspectives on the geological and hydrological aspects of long-term release scenario analyses, 1740 (PNL--2928)
Microbial production of tritiated and carbon-14 methane from radioactive wastes, 2306
RADIOACTIVE WASTE DISPOSAL/ENVIRONMENTAL IMPACT STATEMENTS
Final environmental impact statement. Waste Isolation Pilot Plant, 1451 (DOE/EIS--0026(Vol.1))
Final environmental impact statement. Waste Isolation Pilot Plant, 1452 (DOE/EIS--0026(Vol.2))
RADIOACTIVE WASTE DISPOSAL/ENVIRONMENTAL IMPACTS
Biological studies of the US Subseabed Disposal Program, 1947 (SAND--79-2073)
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1948 (SAND--79-2117)
Environmental control aspects for fabrication, reprocessing and waste disposal of alternative LWR and LMFBR fuels, 2454 (PNL--3129)
Environmental sampling program for a solar evaporation pond for liquid radioactive wastes, 1551 (LA--8177)
Modeling and environmental assessment of land disposal methods for low-level radioactive wastes, 1723 (PB--296947)
Ocean dumping of high-level waste: an acceptable solution we can ''guarantee'', 2118
Paradoxes and popular misconceptions over harnessed nuclear energy, 3169
Perspective of waste isolation research issues and assessment of consequences for radionuclide release, 1916 (SAND--79-1076C)
Preliminary assessment of the aquatic impacts of a proposed defense waste processing facility at the Savannah River Plant, 3495 (DP-MS--79-95)
Supplemental report on population estimates for Hanford high-level defense waste draft programmatic environmental impact statement, 3239 (PNL--3128)
Two-dimensional finite element solution for the simultaneous transport of water and solutes through a nonhomogeneous aquifer under transient saturated unsaturated flow conditions, 3506 (CONF-7906121--1)
Waste Isolation Pilot Plant (WIPP) release scenarios, 1943 (SAND--79-1959C)
RADIOACTIVE WASTE DISPOSAL/ERRORS
Contamination in an office and exposure of office workers, 2572
RADIOACTIVE WASTE DISPOSAL/EVALUATION
Glassy and crystalline high-level nuclear waste forms: an attempt at critical evaluation, 1411 (CONF-790420--)
Radionuclide redistribution mechanisms at the 2800-m Atlantic nuclear waste disposal site, 2133
RADIOACTIVE WASTE DISPOSAL/FEASIBILITY STUDIES
EPR investigations of Gd^{3+} in single crystals and powders of the zircon--structure orthophosphates YPO_4, $ScPO_4$, and $LuPO_4$, 1014
State of the art review of alternatives to shallow land burial of low level radioactive waste, 1669 (ORNL/SUB--79/13837/1)
Subseabed Radioactive Waste Disposal Feasibility Program: ocean engineering challenges for the 80's, 1973 (SAND--80-0304C)
RADIOACTIVE WASTE DISPOSAL/FIELD TESTS
German in-situ studies in salt, 1644 (ONWI--88)
Progress with field investigations at Stripa, 1591 (LBL--10559)
RADIOACTIVE WASTE DISPOSAL/FISSION PRODUCT RELEASE
Leachable gap activities (129-I and 135-Cs from disposed fuel elements), 1530 (KBS-TR--109)
RADIOACTIVE WASTE DISPOSAL/FORECASTING
Storage and disposal of nuclear wastes: prospects for the next 25 years, 2353
RADIOACTIVE WASTE DISPOSAL/FUEL CHANNELS
Packaging, transportation and disposal of reactor core components, 630 (CONF-780506--(Vol.2))
RADIOACTIVE WASTE DISPOSAL/GAMMA SPECTRA
Photon spectra of gamma-rays back-scattered by infinite air. Part I: Area-skyline, 2493
RADIOACTIVE WASTE DISPOSAL/GASEOUS WASTES
Decontamination and disposal of radioactive wastes from nuclear facilities, 694 (CS-INIS--258)
Effects of gaseous radioactive nuclides on the design and operation of repositories for spent LWR fuel in rock salt, 1660 (ORNL--5578)
Radioactivity in gaseous waste discharged from the separations facilities during 1978 (Rockwell Hanford Operations), 1850 (RHO-CD--78-35-4Q)
RADIOACTIVE WASTE DISPOSAL/GEOCHEMICAL SURVEYS
Review of geochemical measurement techniques for a nuclear waste repository in bedded salt, 2029 (UCID--18666)
RADIOACTIVE WASTE DISPOSAL/GEOCHEMISTRY
Geochemistry of radioactive waste disposal, 2135
RADIOACTIVE WASTE DISPOSAL/GEOLOGIC DEPOSITS
Analysis of migration pathways for geologic radioactive waste repositories, 2524 (DOE/EV--0046(Vol.2))
Anion effects on the retention of selected actinides on geologic media, 1683 (ORO--4447-102)
Application of laboratory hydrothermal studies to heating experiments, 2363
Approach to the fracture hydrology at Stripa: preliminary results, 2378
Assessing the long-term integrity of nuclear waste repositories, 2590
Assessment of LWR spent fuel disposal options. Volume 2. System definition and assessments. Technical report, 1628 (ONWI--39(Vol.2))
Assessment of LWR spent fuel disposal options. Volume 3. Study bases and system design considerations (Appendices). Technical report, 1629 (ONWI--39(Vol.3)
Assessment of effectiveness of geologic isolation systems. Perspectives on the geological and hydrological aspects of long-term release scenario analyses, 1740 (PNL--2928)
Atomic waste disposal - the Swiss way. Environmental and landscape protection are mandatory, 2145
Behavior of clay exposed to heating, 2365
Bell Canyon test and results, 2007 (SAND--80-2414C)
BWIP - another step on the way to a waste repository, 2112
Comparison of some geologic and ocean disposal concepts regarding realistic modeling that allows objective risk assessment to be made, 2276
Comparison of INTERA and WISAP consequence model application. Assessment of effectiveness of geologic isolation systems, 1743 (PNL--3070)
Criticality considerations for geological disposal of spent fuel, 2296
Deformation of a jointed rock mass, 2165
Description of the ONWI program, 2196
Development and testing of long-term safety assessment methodology for geologic waste repositories, 2599
Development of regulatory procedures for the disposal of solid radioactive waste in deep, continental formations, 2125
Earth Science Technical Plan for mined geologic disposal of radioactive waste, 2202
Evaluation of basalt flows as a waste isolation medium, 2198
Experience of diamond-coredrilling in Stripa, 2367
Final disposal of high-level waste from nuclear power plants (The Danish situation), 1503 (INIS-mf--5211)
Full-scale and time-scale heating experiments at Stripa: preliminary results, 2377
Geohydrological studies for nuclear waste isolation at the Hanford Reservation, 1572 (LBL--8648)

Geological documentation of the Stripa test station, 2370
Geotechnical assessment and instrumentation needs for nuclear waste isolation in crystalline and argillaceous rocks, 1571 (LBL--8648)
Great Britain prepares permanent storage of radioactive waste, 2384
Hanford near-surface test facility heater experiments, 3551 (LBL--8648)

High level nuclear waste - consequence analysis for disposal in bedrock, 2231
Highly compacted sodium bentonite for isolating rock-deposited radioactive waste products, 2159
Hydrogeological investigations in two boreholes in the Stripa test station, 2364
Hydrogeologic effects of natural disruptive events on nuclear waste repositories, 1735 (PNL--2858)
In situ heating experiments in geological formations. Proceedings, 2359
International research programme for disposal of radioactive waste, 2140
Investigations in granite at Stripa, Sweden for nuclear waste storage, 2201
Large scale permeability tests in the granite of the Stripa mine, Sweden, 2369
Low-flow, low-permeability measurements in largely impermeable rocks. Proceedings of the NEA/AIEA workshop, Paris, 19-21 Mar 1979, 2292
Mechanical modeling of nuclear waste disposal in argillite at the Nevada Test Site, 1915 (SAND--79-1047C)
Mechanical properties of Stripa granite, 2372
Method for long time storage of radioactive material in the bedrock (Patent), 2106
Migration of long-lived radionuclides in the geosphere. Proceedings, 2299
Nature and distribution of secondary minerals in the basalts of the Pasco Basin, Washington, and their relation to the disposal of nuclear wastes, 3550 (LBL--8648)
Nevada Nuclear Waste Storage Investigations, 2199
Nuclear waste repository in basalt: preconceptual design guidelines, 1823 (RHO-BWI-CD--2(Rev.1))
Nuclear waste disposal, 2251
Nuclear waste: a 5000 year problem, 2108
Overview of waste isolation safety assessment methods, 2587
Pilot heater test in the Stripa granite, 2362
Pollucite and its alteration in geological occurrences and in deep-burial radioactive waste disposal, 2257
Practical aspects of heat transfer in radioactive-waste repository design, 1389 (AERE-R--9343)
Probability analysis of geological processes: a useful tool for the safety assessment of radioactive waste disposal, 2562
Progress report on the Canadian underground heater experiment, 2373
Recommended new criteria for the selection of nuclear waste repository sites in Columbia River basalt and US Gulf Coast domed salt, 2070 (UCRL--52749)
Regional basalt hydrology of the Columbia Plateau in Washington, 1816 (RHO-BWI-C--60)
Regional thermo-hydrological effects of a radioactive waste repository in hard rock, 1569 (LBL--8648)
Report on geologic exploration activities, 1458 (DOE/RL/01830--14)
Rock-melt approach to nuclear waste disposal in geological media, 2260
Rock stress measurements in Stripa Mine, 1529 (KBS-TR--49)
Safe handling and storage of high level radioactive waste, 2101
Solving the geologic issues in nuclear waste disposal, 2074 (UCRL--83285)
Status report on studies to assess the feasibility of storing nuclear waste in Columbia Pleteau basalts, 1833 (RHO-BWI-SA--25)
Survey methods for assessment of radiological release from geologic repositories, 2206
Swedish-American cooperative program on radioactive waste storage in mined caverns in crystalline rock, 1568 (LBL--8648)
Technical concept for rock mechanics tests, Climax Granite, NTS, 2021 (UCID--18009)
Technical program for establishing the scientific basis for geologic disposal, 1455 (DOE/EV--0046(Vol.2))
Technical program plan, Basalt Waste Isolation Project, 1852 (RHO-CD--132(Rev.4))
Test bores irrelevant, 2114
Thermal property measurements of Pomona member basalt from core holes DB-5 and DB-15, Hanford site, southeastern Washington, 1822 (RHO-BWI-C--76)
US Geological Survey Program, 2200
Waste disposal in granite: preliminary results from Stripa, Sweden, 1578 (LBL--9424)
Waste dumping: why oppose test bores, 2113
Waste isolation performance assessment program, 2588
Waste Isolation Safety Assessment Program, 1573 (LBL--8648)

RADIOACTIVE WASTE DISPOSAL/GEOPHYSICAL SURVEYS
Use of geophysics in the Canadian radioactve waste disposal program, with examples from the Chalk River research area, 2136

RADIOACTIVE WASTE DISPOSAL/GLOBAL ASPECTS
Overview of the Subseabed Disposal Program, 2003 (SAND--80-1606C)

RADIOACTIVE WASTE DISPOSAL/GOVERNMENT POLICIES
High-level active waste disposal, 2162
Management and disposal of wastes contaminated by alpha emitters, 2405 (RFP-Trans--286)
Proposed federal radiation guidance for radioactive wastes, 2613 (PB--296947)

RADIOACTIVE WASTE DISPOSAL/GRANITES
Instrument evaluation, calibration, and installation for the heater experiments at Stripa, 1566 (LBL--8313)
Thermomechanical modeling and data analysis for heating experiments at Stripa, Sweden, 1585 (LBL--10193(Rev.))

RADIOACTIVE WASTE DISPOSAL/GROUND DISPOSAL
Input and decayed values of radioactive liquid wastes discharged to the ground in the 200 Areas through 1975, 1402 (ARH-CD--745)
Modeling and environmental assessment of land disposal methods for low-level radioactive wastes, 1723 (PB--296947)
Preliminary impact assessment of institutional radioactive waste disposal, 503 (PB--296947)
Radioactive liquid wastes discharged to ground in the 200 Areas during 1978, 1849 (RHO-CD--78-34-4Q)
Radioactive liquid wastes discharged to ground in the 200 Areas during 1976, 1401 (ARH-CD--743-4Q)
Radioactive liquid waste discharged to ground in the 200 Areas during 1977, 1848 (RHO-CD--34-4Q)
Radioactive liquid wastes discharged to ground in the 200 areas during 1979, 1851 (RHO-CD--79-34-4Q)
Shallow land burial: why or why not, 1718 (PB--296947)

RADIOACTIVE WASTE DISPOSAL/GROUND WATER
Local groundwater depression around a repository, 1528 (KBS-TR--47)
Three dimensional model of groundwater flow governed by topography, 1527 (KBS-TR--47)

RADIOACTIVE WASTE DISPOSAL/HEALTH HAZARDS
Nonradiological hazards of low-level waste burial grounds, 2307
Relative potential hazards of radioactive waste in various water systems, 2184
Unconventional waste treatment and disposal methods, 1040

RADIOACTIVE WASTE DISPOSAL/HEAT TRANSFER
Practical aspects of heat transfer in radioactive-waste repository design, 1389 (AERE-R--9343)
Thermal aspects of waste emplacement in layered tuffs, 1911 (SAND--79-1000C)

RADIOACTIVE WASTE DISPOSAL/HEATING
Areal thermal loading recommendations for nuclear waste repositories in salt, 2096 (Y/OWI/TM--37)
Nonstationary temperature fields on disposal of solid radioactive wastes of high activity into ground, 1509 (INIS-mf--5571)

RADIOACTIVE WASTE DISPOSAL/HIGHLEVEL RADIOACTIVE WASTES
Analysis, critique, and reevaluation of high-level waste repository water intrusion scenario studies, 2104
Application of laboratory hydrothermal studies to heating experiments, 2363
Canadian program for nuclear fuel waste disposal, 2300
Cemeteries sought for nuclear waste. Geology of a graveyard, 2110
Chemical toxicity issues in high-level waste disposal, 2308
Comparison of some geologic and ocean disposal concepts regarding realistic modeling that allows objective risk assessment to be made, 2276
Development of enrichment and reprocessing technologies in Japan, 116
Development of a high level radioactive waste management strategy, 1392 (AERE-R--9548)
Development and application of criteria for siting, 2301
Disposal of high level nuclear waste in the oceans, 2401
Evaluation of systems incorporating transmutation for the reduction of the long term toxicity of high-level waste, 2283
Final disposal of high-level waste from nuclear power plants (The Danish situation), 1503 (INIS-mf--5211)
Functional design criteria additional high-level waste handling and storage facilities, 1399 (ARH-CD--549)
Geologic studies for waste repository siting in the Paradox Basin, 2302
Handling of spent nuclear fuel and final storage of vitrified high level reprocessing waste. Nuclear Fuel Safety Project, 2337
Helium formation from α-decay and its significance for radioactive waste glasses, 2252
High-level active waste disposal, 2162
High level nuclear waste - consequence analysis for disposal in bedrock, 2231
Investigations of the performance of solidified high-level nuclear waste forms, 1602 (NUREG/CR--0612)
Investigation of metallic, ceramic, and polymeric materials for engineered barrier applications in nuclear-waste packages, 1761 (PNL--3484)
Management of high-level radioactive wastes, 1106
Migration of transuranic nuclides in earthen burial trenches at the Savannah River Plant, 1465 (DP-MS--79-20)
Nuclear waste disposal, 2251
Oceanographic basis of the IAEA revised definition and recommendations concerning high-level radioactive

waste unsuitable for dumping at sea., 1489 (IAEA--210)
Overview of the NRC high-level waste management program, 2181
Practical aspects of heat transfer in radioactive-waste repository design, 1389 (AERE-R--9343)
Preliminary assessment of the aquatic impacts of a proposed defense waste processing facility at the Savannah River Plant, 3495 (DP-MS--79-95)
Radioactive waste, 2341
Radiological basis of the IAEA revised definition and recommendations concerning high-level radioactive waste unsuitable for dumping at sea., 1490 (IAEA--211)
Regional thermo-hydrological effects of a radioactive waste repository in hard rock, 1569 (LBL--8648)
Report on geologic exploration activities, 1458 (DOE/RL/01830--14)
Responsibility without a parallel, 2238
Rock-melt approach to nuclear waste disposal in geological media, 2260
Safe handling and storage of high level radioactive waste, 2101
See-through solution to nuclear waste (Vitrification process), 1110
Some questions can only be answered by drilling, 2239
Status of nuclear fuel reprocessing, spent fuel storage, and high-level waste disposal. Nuclear Fuel Cycle Committee, California Energy Resources Conservation and Development Commission. Draft report, 117
Subseabed Disposal Program. Annual report, January-December 1978, 1933 (SAND--79-1618/1)
Subseabed disposal program annual report, January-December 1978. Volume II. Principal investigator progress reports, 1934 (SAND--79-1618(Vol.2))
Swedish nuclear fuel safety project for long-term disposal of high-level waste, 2187
Systems analysis approach to the disposal of high-level waste in deep ocean sediments, 1991 (SAND--80-0781C)
Technical developments in the WIPP program, 2002 (SAND--80-1599C)
Treatment and disposal of radioactive wastes from the viewpoint of the NUCLEX 78, 1031
Underground disposal of Canada's nuclear waste (Igneous batholiths, salt deposits, serpentinite), 2387

RADIOACTIVE WASTE DISPOSAL/INCINERATORS
Unconventional furnace for special waste, 2250

RADIOACTIVE WASTE DISPOSAL/INTERMEDIATELEVEL RADIOACTIVE WASTES
Final storage in concrete of activated metal parts, 1537 (KBS-TR--119)
Shale fracturing injections at Oak Ridge National Laboratory: 1977-1979 series, 1681 (ORNL/TM--7421)
Treatment and disposal of radioactive wastes from the viewpoint of the NUCLEX 78, 1031

RADIOACTIVE WASTE DISPOSAL/INTERNATIONAL COOPERATION
International research programme for disposal of radioactive waste, 2140
Potential US/Canadian cooperative activities in geological disposal of radioactive waste, 1657 (CONWI--91)
Swedish-American cooperative program on radioactive waste storage in mined caverns in crystalline rock, 1568 (LBL--8648)

RADIOACTIVE WASTE DISPOSAL/KRYPTON 85
Separation, conditioning, storage and disposal of krypton-85, 1002 (SGAE--3038)

RADIOACTIVE WASTE DISPOSAL/LEACHING
Nuclear fuel cycle studies, 376 (ANL--80-66)

RADIOACTIVE WASTE DISPOSAL/LEGAL ASPECTS
Historical review of federal/state roles in regulating commercial low level radioactive waste burial ground, 1705 (PB--296947)
Overview of the Subseabed Disposal Program, 2003 (SAND--80-1606C)
Present state and policy of low-level radioactive management, 1162
Strategy for assessing the technical, environmental, and engineering feasibility of subseabed disposal, 1955 (SAND--79-2245)

RADIOACTIVE WASTE DISPOSAL/LEGISLATION
Disposal of radioactive wastes. Chapter 11, 2282

RADIOACTIVE WASTE DISPOSAL/LIQUID WASTES
Facility for liquid wastes and aqueous radioactive wastes of an α, β, γ-laboratory, 2098 (ZfK--340)
Monitoring for the dispersion of discharged tritium in sea-water around the Tokai-Mura fuel reprocessing plant, 2280
Studies on the dispersion of low-level liquid effluent released from the fuel reprocessing plant into the sea, 1726 (PNCT--841-78-69)

RADIOACTIVE WASTE DISPOSAL/LOWLEVEL RADIOACTIVE WASTES
Benefit-cost analysis for the commercial disposal of low-level radioactive solid wastes, 2195
Characterization of organics in leachates from low-level radioactive waste disposal sites, 1408 (BNL-NUREG--27235)
Comparison of alternatives for low-level radioactive waste disposal, 1719 (PB--296947)
Disposal classification of low-level radioactive waste, 1720 (PB--296947)
Disposal of low-level radioactive waste into the sea, 2224
Evaluation of alternatives for low-level waste disposal (Shallow land burial, improved shallow land burial, deep burial, new and existing mines, above-grade structures and ocean disposal), 2295
General investigation of radionuclide retention in migration pathways at the West Valley, New York low-level burial site. Annual report, September 1, 1977-September 30, 1978, 1604 (NUREG/CR--0794)
Geomorphic and erosion studies at the Western New York Nuclear Service Center, West Valley, New York, 1605 (NUREG/CR--0795)
Infiltration control for low-level radioactive solid waste disposal areas: an assessment, 1672 (ORNL/TM--6473)
Logistics of low-level radioactive waste transport and disposal (Effects of hauling distance, overweight shipments, volume reduction, increased activity levels are evaluated), 2194
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
Microbial production of tritiated and carbon-14 methane from radioactive wastes, 2306
Nonradiological hazards of low-level waste burial grounds, 2307
Preparations for sea disposal of low level radioactive wastes, 2345
Preparations for sea disposal of low-level radioactive waste, 2349 (ORNL-tr--4672)
Progress report on the design of a Low-Level Waste Pilot Facility at ORNL, 412 (CONF-800416--3)
Radioactive waste backup threatens research, 2147
Sea disposal test of radioactive wastes into the Pacific: national situation, 2245
State of the art review of alternatives to shallow land burial of low level radioactive waste, 1669 (ORNL/SUB--79/13837/1)
Status of low-level radioactive waste disposal: how to plan a disaster, 1717 (PB--296947)
Transuranic distribution beneath a retired underground disposal facility, Hanford Site, 1869 (RHO-SA--131)
Treatment and disposal of radioactive wastes from the viewpoint of the NUCLEX 78, 1031
Volumetric reduction techniques for low-level radioactive waste, 1141
Waste sludge resuspension and transfer: development program, 1678 (ORNL/TM--7125)

RADIOACTIVE WASTE DISPOSAL/MARINE DISPOSAL
Act No. 298 of 16 March 1979 on Prevention of Marine Pollution, 1506 (INIS-mf--5549)
Comparison of some geologic and ocean disposal concepts regarding realistic modeling that allows objective risk assessment to be made, 2276
Disposal of radioactive waste. Promising project identifies prospective sea zones, 2385
Disposal of high level nuclear waste in the oceans, 2401
Disposal of radionuclides in the sea, 2172
Disposal of low-level radioactive waste into the sea, 2224
Environmental studies data base: development and data synthesis activities of the US Subseabed Disposal Program, 2006 (SAND--80-2096C)
Finite element analysis of thermal convection in deep ocean sediments, 1975 (SAND--80-0310C)
Geochemical studies supporting the US subseabed disposal program, 1997 (SAND--80-1407C)
Geotechnical properties of sediments from North Pacific and Northern Bermuda Rise, 2005 (SAND--80-2035C)
Guidelines for sea dumping packages of radioactive waste, 2278
Guidelines for sea dumping packages of radioactive waste, 2228
In situ data on various sites of radioactive releases into the marine environment, 2503
Legal, political, and institutional implications of the sea-bed program for radioactive waste disposal. *Annual technical progress report*, 1442 (COO--4917-1)
Marine radioecology. A study of the fate of radionuclides released into the marine environment and applications to radiation protection, 3456
Measurement of penetration depths of plutonium and americium in sediment from the ocean floor, 1432 (CONF-791112--52)
Method and device for marine disposal of radioactive wastes (Patent), 2333
Ocean dumping of high-level waste: an acceptable solution we can ''guarantee'', 2118
Oceanographic basis of the IAEA revised definition and recommendations concerning high-level radioactive waste unsuitable for dumping at sea., 1489 (IAEA--210)
Oceanography related to deep sea waste disposal. A survey commissioned by the Department of the Environment, 3580 (IOS-Rep--77)
Overview of the Subseabed Disposal Program, 2003 (SAND--80-1606C)
Predicted peak temperature-rises around a high-level radioactive waste canister emplaced in the deep ocean bed, 1391 (AERE-R--9518)
Preparations for sea disposal of low level radioactive wastes, 2345
Preparations for sea disposal of low-level radioactive waste, 2349 (ORNL-tr--4672)
Proceedings of the fourth annual Seabed Working Group Meeting, Albuquerque, New Mexico USA, March 5-7, 1979, 1919 (SAND--79-1156)
Radio-active waste disposal and deep-sea biology, 2334

Radioactivity leach tests under high hydrostatic pressure on full size monolithic cement packages of LWR wastes for sea dumping, 2327
Radioactive waste dumping at sea: causes for concern, 2403
Radiological basis of the IAEA revised definition and recommendations concerning high-level radioactive waste unsuitable for dumping at sea., 1490 (IAEA--211)
Radiological aspects of sea bed dumping in the deep oceans, 1798 (PNL-SA--8011)
Recommended operational procedures for sea dumping of radioactive waste, 2277
Recommended operational procedures for sea dumping of radioactive waste, 2227
Review of the continued suitability of the dumping site for radioactive waste in the North-East Atlantic (Book), 2128
Revised definition of high-level radioactive wastes unsuitable for dumping at sea, 2234
Seabed disposal project two-dimensional axisymmetric penetrometer simulations, 1937 (SAND--79-1679)
Sediment mechanical response due to emplacement of a waste canister, 1974 (SAND--80-0307C)
Separation, conditioning, storage and disposal of krypton-85, 1002 (SGAE--3038)
Strategy for assessing the technical, environmental, and engineering feasibility of subseabed disposal, 1956 (SAND--79-2245C)
Strategy for assessing the technical, environmental, and engineering feasibility of subseabed disposal, 1955 (SAND--79-2245)
Studies on the dispersion of low-level liquid effluent released from the fuel reprocessing plant into the sea, 1726 (PNCT--841-78-69)
Sub-seabed disposal of high-level radioactive waste: prevention of management, 603
Submergible barge retrievable storage and permanent disposal system for radioactive waste (Patent application), 2406
Subseabed Disposal Program Plan. Volume II. FY80 budget and subtask work plans, 1968 (SAND--80-0007/2)
Subseabed Disposal Program. Annual report, January-December 1978, 1933 (SAND--79-1618/1)
Subseabed disposal program annual report, January-December 1978. Volume II. Principal investigator progress reports, 1934 (SAND--79-1618(Vol.2))
Subseabed Disposal Program plan. Volume I. Overview, 1967 (SAND--80-0007/1)
Subseabed Radioactive Waste Disposal Feasibility Program: ocean engineering challenges for the 80's, 1973 (SAND--80-0304C)
Systems analysis approach to the disposal of high-level waste in deep ocean sediments, 1991 (SAND--80-0781C)
Thermal, chemical, and mass-transport processes induced in abyssal sediments by the emplacement of nuclear waste: experimental and modeling results, 1954 (SAND--79-2244C)
Thermal and chemical properties of saturated marine clays in a near field environment, 1930 (SAND--79-1475C)
Thermal convection at low Rayleigh number from concentrated sources in porous media, 1982 (SAND--80-0426C)
Thermophysical properties of deep ocean sediments, 1999 (SAND--80-1533C)
Will vitrified high active reactor waste be deposited on the seabed, 2350

RADIOACTIVE WASTE DISPOSAL/MATERIALS
Tests for determining impact resistance and strength of glass used for nuclear waste disposal, 1742 (PNL--2954)

RADIOACTIVE WASTE DISPOSAL/MATHEMATICAL MODELS
Effect of dimension of specimen on amounts of cesium-137, strontium-90, and cobalt-60 leached from matrix of hardened cement grout, 2346

RADIOACTIVE WASTE DISPOSAL/MEETINGS
Proceedings of the fourth annual Seabed Working Group Meeting, Albuquerque, New Mexico USA, March 5-7, 1979, 1919 (SAND--79-1156)
Proceedings of the Task 4 Waste Isolation Safety Assessment Program second contractor information meeting, 1767 (PNL-SA--7352(Vol.1))
Proceedings of the Task 4 Waste Isolation Safety Assessment Program second contractor information meeting, 1773 (PNL-SA--7352(Vol.2))
Proceedings of the workshop on the use of argillaceous materials for the isolation of radioactive waste, 2121

RADIOACTIVE WASTE DISPOSAL/MILL TAILINGS
Cleaning up commingled uranium mill tailings: is federal assistance necessary, 921 (PB--290865)
Radon: an environmental pollutant, 2539 (PB--296947)
Review of the environmental problems associated with the disposal of uranium tailings, 2178
Selecting sites for uranium mill waste disposal facilities, 2320
Uranium tailings. A hot issue in North America - but what of SA, 2247

RADIOACTIVE WASTE DISPOSAL/NEUTRON LOGGING
Plutonium waste crib logging using the prompt fission neutron uranium logging system, 1482 (GJBX--122(80))

RADIOACTIVE WASTE DISPOSAL/NEUTRON-NEUTRON LOGGING
Borehole assay for plutonium using delayed-neutron activation analysis, 3303

RADIOACTIVE WASTE DISPOSAL/NEVADA TEST SITE
Prediction of ground motion from underground nuclear weapons tests as it relates to siting of a nuclear waste storage facility at NTS and compatibility with the weapons test program, 1994 (SAND--80-1020/1)
Prediction of ground motion from underground nuclear weapons tests as it relates to siting of a nuclear waste storage facility at NTS and compatibility with the weapons test program, 1995 (SAND--80-1020/1)

RADIOACTIVE WASTE DISPOSAL/OPERATING COST
Management of solid waste, 1666 (ORNL/ENG/INF--80/1)

RADIOACTIVE WASTE DISPOSAL/PACKAGING
Acceptance criteria for transuranic waste packages for disposal in a licensed geologic repository, 380 (BMI-X--702)
Chemical toxicity issues in high-level waste disposal, 2308
Integrity demonstration test of radioactive waste packages deep-sea disposal. Hanging down-drawing up sea tests of multistage type and monolithic solid type packages, 1523 (JAERI-M--7780)

RADIOACTIVE WASTE DISPOSAL/PERFORMANCE
Naturally occurring glasses: analogues for radioactive waste forms, 1729 (PNL--2776)

RADIOACTIVE WASTE DISPOSAL/PILOT PLANTS
Basic data report for drillhole WIPP 26 (Waste Isolation Pilot Plant - WIPP), 1895 (SAND--79-0280)
WIPP conceptual design report. Addendum A. Design calculations for Waste Isolation Pilot Plant (WIPP), 1876 (SAND--77-0274(Add.A))

RADIOACTIVE WASTE DISPOSAL/PITCHBLENDE
Formerly utilized MED/AEC sites remedial action program. Radiological survey of the Middlesex Municipal Landfill, Middlesex, New Jersey. Final report, 2415 (DOE/EV--0005/20)

RADIOACTIVE WASTE DISPOSAL/PLANNING
Development of a high level radioactive waste management strategy, 1392 (AERE-R--9548)
Need to evaluate waste disposal options, 2143
Solving the nuclear waste disposal problem, 2177

RADIOACTIVE WASTE DISPOSAL/POLITICAL ASPECTS
Overview of the Subseabed Disposal Program, 2003 (SAND--80-1606C)
Strategy for assessing the technical, environmental, and engineering feasibility of subseabed disposal, 1955 (SAND--79-2245)

RADIOACTIVE WASTE DISPOSAL/PONDS
Environmental sampling program for a solar evaporation pond for liquid radioactive wastes, 1551 (LA--8177)

RADIOACTIVE WASTE DISPOSAL/PUBLIC OPINION
Nuclear power option - problems and constraints, 2665 (ER--77-2)
Nuclear waste: beyond Faust and fate, 580
Nuclear waste: A problem of perspective, 2213
Nuclear wastes and traffic safety main community health concerns, 3133
Radioactive wastes: public attitudes toward disposal facilities, 2212
Solving the nuclear waste disposal problem, 2177

RADIOACTIVE WASTE DISPOSAL/PUBLIC POLICY
Nuclear waste: beyond Faust and fate, 580

RADIOACTIVE WASTE DISPOSAL/QUALITY ASSURANCE
Nevada Nuclear Waste Storage Investigations. Management and overview Quality Assurance Program Plan, 486 (NVO--196-18)
Nevada Nuclear Waste Storage Investigations: Quality Assurance Plan, 1619 (NVO--196-17)

RADIOACTIVE WASTE DISPOSAL/RADIATION ACCIDENTS
Technical note: 1957-1958 Soviet nuclear accident in the Urals, 2117

RADIOACTIVE WASTE DISPOSAL/RADIATION DOSES
Analysis of the effect of variations in parameter values on the predicted radiological consequences of geologic disposal of high-level waste, 2533 (NRPB-R--86)
Waste Isolation Safety Assessment Program, 3243 (PNL--3300(Pt.2))

RADIOACTIVE WASTE DISPOSAL/RADIATION HAZARDS
Biological studies of the US Subseabed Disposal Program, 1947 (SAND--79-2073)
Marine pollution - Facts and fiction, the situation in Britain, 3412
Migration of radionuclides following shallow land burial, 2523 (CONF-800304--11)
NUTRAN: a computer model of long-term hazards from waste repositories, 2482 (UCRL--15150)
Preliminary assessment of the waste disposal problem for magnox steels, 3359 (CEGB-RD/B/N--4291)
Preliminary examination of hazards arising from hypothetical failure of a long-term disposal facility for high level radioactive wastes from thermal reactors, 2578
Radiation exposure due to nuclear facilities in West Germany in 1976, 2586
Relative potential hazards of radioactive waste in various water systems, 2559 (UCRL--15121)
Summary report on the low-level radioactive waste burial site, West Valley, New York (1963-1975), 1693 (PB--80-138993)

RADIOACTIVE WASTE DISPOSAL/RADIATION PROTECTION
Analysis of the effect of variations in parameter values on the predicted radiological consequences of geologic disposal of high-level waste, 2533 (NRPB-R--86)
National Waste Terminal Storage repository in a bedded salt formation for spent unreprocessed fuel.

Occupational exposure and health physics studies. KE report No. 78-21-R, 1686 (ORO--5366-T2)
Proposed federal radiation guidance for radioactive wastes, 2613 (PB--296947)
Radiation protection and safety in connection with radioactive waste. Report about the 7th IRPA regional congress and 13th annual meeting of FS at Cologne, 2564
RADIOACTIVE WASTE DISPOSAL/RADIOACTIVITY TRANSPORT
Decommissioning and decontamination (burial ground stabilization) studies, 516 (PNL--3300(Pt.2))
RADIOACTIVE WASTE DISPOSAL/RADIONUCLIDE MIGRATION
Characterization of the physical parameters and sampling procedure of a modified rocking autoclave apparatus, 2471 (RHO-BWI-C--65)
Chemical Engineering Division fuel cycle programs. Quarterly progress report, July-September 1978, 33 (ANL--79-6)
Diffusion in the rock matrix - An important factor in radionuclide retardation, 1003 (SKBF/KBS-TR--79-19)
Effect of ionizing radiation on the sorptive capacity of soils, 1516 (INIS-mf--5572)
Geologic waste disposal and a model for the surface movement of radionuclides, 1904 (SAND--79-0907C)
Migration of transuranic nuclides in earthen burial trenches at the Savannah River Plant, 1465 (DP-MS--79-20)
Nuclear fuel cycle studies, 376 (ANL--80-66)
Numerical analysis of radionuclide movement from a hypothetical nuclear waste repository, 2461 (PNL-SA--7875)
Radioactive wastes burial in surface geological formations, 1520 (INIS-mf--5572)
Radioactive waste disposal, 2513
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 3, 1515 (INIS-mf--5572)
Sensitivity study on the parameters of the regional hydrology model for the Nevada nuclear waste storage investigations, 1920 (SAND--79-1197C)
Stochastic aspects of migration from repository sites, 2303
Studies of nuclear-waste migration in geologic media. Annual report, October 1977-September 1978, 2409 (ANL--79-30)
Study of slow crack growth in granite and its applicaton to nuclear waste disposal in hard rock, 3545 (AECL--6423)
Summary report on the low-level radioactive waste burial site, West Valley, New York (1963-1975), 1693 (PB--80-138993)
Technetium: reduction and sorption in granitic bedrock, 2500
Thermal, chemical, and mass-transport processes induced in abyssal sediments by the emplacement of nuclear waste: experimental and modeling results, 1954 (SAND--79-2244C)
Waste pipe calculus extensions, 2480 (UCID--18136)
RADIOACTIVE WASTE DISPOSAL/RECOMMENDATIONS
Proposed federal radiation guidance for radioactive wastes, 2613 (PB--296947)
RADIOACTIVE WASTE DISPOSAL/REGULATIONS
Burial of small quantities of radionuclides without prior NRC approval, 1721 (PB--296947)
Development of regulatory procedures for the disposal of solid radioactive waste in deep, continental formations, 2125
Regulation of Federal radioactive waste activities. Report to Congress on extending the Nuclear Regulatory Commission's licensing or regulatory authority to Federal radioactive waste storage and disposal activities, 477 (NUREG--0527)
Regulation of Federal radioactive waste activities. Summary of report to Congress on extending the Nuclear Regulatory Commission's licensing or regulatory authority to Federal radioactive waste storage and disposal activities, 1600 (NUREG--0527(Summ.))
Regulatory aspects of underground disposal of radioactive waste - Danish notes, 1500 (INIS-mf--4921)
Regulatory considerations for radioactive waste diposal, 1714 (PB--296947)
RADIOACTIVE WASTE DISPOSAL/RESEARCH PROGRAMS
Atomic waste disposal - the Swiss way. Environmental and landscape protection are mandatory, 2145
DOE program for the management of radioactive waste and spent reactor fuel, 2382
Office of Waste Isolation progess report, June 1978, 2097 (Y/OWI/TM--43/9)
Protocol of the results of the 18th PTB seminar 'site-independent planning of the final storage facility at the site of the Gorleben integrated nuclear waste management centre, 1801 (PTB-SE--2)
Research and development related to Nevada nuclear waste storage investigations. Progress report, April 1-June 30, 1979, 1546 (LA--7974-PR)
Seminar on R + D work and studies on the disposal and final storage of radioactive waste. Report SE-1, 1800 (PTB-SE--1)
Technical program plan, Basalt Waste Isolation Project, 1853 (RHO-CD--132(Rev.5))
United States National Waste Terminal Storage argillaceous rock studies, 1424 (CONF-790938--5)
Waste isolation safety assessment program, 1765 (PNL-SA--7243)
RADIOACTIVE WASTE DISPOSAL/RETRIEVAL SYSTEMS
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 1. 25-year retrievability, 1688 (ORO--5366-T4)
Retrieval methods and equipment for WIPP high-level waste experiment area, 2312
RADIOACTIVE WASTE DISPOSAL/REVIEWS
Geoscience data base handbook for modeling a nuclear waste repository. Volume 1, 1608 (NUREG/CR--0912(Vol. 1))
Industrial wastes: radioactive waste, 2342
National and international activities in the field of underground disposal of radioactive wastes, 2340
Underground disposal of radioactive wastes, 2144
RADIOACTIVE WASTE DISPOSAL/RISK ASSESSMENT
Actinide partitioning-transmutation program. Final report. VII. Long-term risk analysis of the geologic repository (appendix), 909 (ORNL/Sub--80/31038/1)
Assessment of effectiveness of geologic isolation systems. Perspectives on the geological and hydrological aspects of long-term release scenario analyses, 1740 (PNL--2928)
Disruptive event uncertainties in a perturbation approach to nuclear waste repository risk analysis, 2020 (UCID--17893)
Environmental studies data base: development and data synthesis activities of the US Subseabed Disposal Program, 2006 (SAND--80-2096C)
Identification of key radionuclides in a nuclear waste repository in basalt, 1844 (RHO-BWI-ST--9)
Modeling and environmental assessment of land disposal methods for low-level radioactive wastes, 1723 (PB--296947)
Nuclear waste: beyond Faust and fate, 580
Nuclear waste disposal, 3426
Overview of waste isolation safety assessment methods, 2587
Probability analysis of geological processes: a useful tool for the safety assessment of radioactive waste disposal, 2562
Repository post-sealing risk analysis using MACRO, 2560 (UCRL--82236)
Review of the nuclear waste disposal problem, 1396 (ANL/EES-TM--68)
Risk evaluations of transuranic waste at the Idaho National Engineering Laboratory, 1434 (CONF-800313--1)
Risk perspectives in waste management, 1870 (RHO-SA--142)
Risk relativities (Population exposure to radiation), 2897
Safety and environmental protection in nuclear waste management, 2289
Social decision-making for high consequence, low probability occurrences. Final report 1975-77, 1696 (PB--292735)
State-of-the-art for evaluating the potential effects of erosion and deposition on a radioactive waste repository. Final report, 2067 (UCRL--15268)
Status report on risk assessment for nuclear waste disposal. Interim report, 1478 (EPRI-NP--1197)
Waste Isolation Safety Assessment Program. Technical progress report for FY-1978, 1739 (PNL--2876)
Waste isolation performance assessment program, 2588
RADIOACTIVE WASTE DISPOSAL/ROCK CAVERNS
I. Some results from a field investigation of thermo-mechanical loading of a rock mass when heaters are emplaced in the rock. II. The application of field data from heater experiments conducted at Stripa, Sweden to parameters for repository design. SAC-26, 1575 (LBL--9392)
I. Some results from a field investigation of thermo-mechanical loading of a rock mass when heaters are emplaced in the rock, 1576 (LBL--9392)
II. Application of field data from heater experiments conducted at Stripa, Sweden, to parameters for repository design, 1577 (LBL--9392)
RADIOACTIVE WASTE DISPOSAL/ROCK MECHANICS
Temperature loading and rocks mechanics at final storage of radioactive waste, 2011 (SKBF/KBS-TR--79-03)
Temperature and stress calculation for final disposal, 2012 (SKBF/KBS-TR--79-04)
RADIOACTIVE WASTE DISPOSAL/ROCK-FLUID INTERACTIONS
Application of laboratory hydrothermal studies to heating experiments, 2363
RADIOACTIVE WASTE DISPOSAL/SAFEGUARDS
Preliminary concepts: materials management in an internationally safeguarded nuclear-waste geologic repository, 1547 (LA--8049-MS)
PTB projects for the safeguarding and final storage of radioactive waste, 2137
RADIOACTIVE WASTE DISPOSAL/SAFETY
Development and testing of long-term safety assessment methodology for geologic waste repositories, 2599
General criteria for radioactive waste disposal, 1430 (CONF-791112--45)
Mathematical simulation for safety assessment of nuclear waste repositories, 1780 (PNL-SA--7897)
Radioactive materials and environment, 3500
Study of seepage beneath a model waste disposal crib, 1403 (BARC--947)
Underground storage of nuclear industry wastes, 2348

RADIOACTIVE WASTE DISPOSAL/SAFETY STANDARDS
New technical standards for radioactive waste management in Japan, 2246
RADIOACTIVE WASTE DISPOSAL/SALT DEPOSITS
Basic data report for drillhole WIPP 29 (Waste Isolation Pilot Plant-WIPP), 1897 (SAND--79-0283)
Design, installation, and operation of heater tests in dome salt, 2379
Energy stored in irradiated NaCl, 313
Geological aspects of weak spot analysis for the federal repository for radioactive wastes at the Gorleben site, 2127 (ORNL-tr--4673)
Geothermal in situ experiments in the Asse salt-mine, 2368
Gorleben-Rambow salt dome is not suited for the final storage of radioactive waste, 2237
Investigations on the borehole climate in an in-situ simulation experiment in the Asse salt mine. A presentation of the concept and preliminary works, 2371
Processes and parameters involved in modeling radionuclide transport from bedded salt repositories. Final report. Technical memorandum, 2036 (UCRL--15095)
Radiation damage studies on natural and synthetic rock salt for waste disposal applications, 2269
Release consequence analysis for a hypothetical geologic radioactive waste repository in salt, 1496 (INFCE/DEP/WG--7/16)
Responsibility without a parallel, 2238
Some questions can only be answered by drilling, 2239
Sources of data for biodose simulations used in bedded salt repository analysis, 2055 (UCRL--15208)
Status of the simulation experiments in cased boreholes to be run in the Asse salt mine, 2366
Status of siting for the waste isolation pilot plant, 2304
Status report on the Waste Isolation Pilot Plant, 2197
Technical developments in the WIPP program, 2002 (SAND--80-1599C)
Tracer tests performed in the field for WIPP in southeastern New Mexico, 1907 (SAND--79-0981C)
RADIOACTIVE WASTE DISPOSAL/SANITARY LANDFILLS
Formerly utilized MED/AEC sites remedial action program. Radiological survey of the Middlesex Municipal Landfill, Middlesex, New Jersey. Final report, 2415 (DOE/EV--0005/20)
RADIOACTIVE WASTE DISPOSAL/SEISMIC EFFECTS
Seismic risk and toxic waste disposal. A discussion, 2565
RADIOACTIVE WASTE DISPOSAL/SIMULATION
Instrument evaluation, calibration, and installation for the heater experiments at Stripa, 1566 (LBL--8313)
Investigations on the borehole climate in an in-situ simulation experiment in the Asse salt mine. A presentation of the concept and preliminary works, 2371
RADIOACTIVE WASTE DISPOSAL/SITE SELECTION
Development and application of criteria for siting, 2301
Evaluation methods for hydrogeologic conditions at radioactive waste burial sites, 2182
Geochemical considerations in the choice of a host rock for the disposal of high-level radioactive wastes, 2293
Geologic studies for waste repository siting in the Paradox Basin, 2302
Hazardous high-level radioactive waste disposal in geologic formations, 2126
Nevada nuclear waste storage investigations. Quarterly report, July-September 1979, 1615 (NVO--196-12)
NNWSI site evaluation activity, 2305
Preliminary geologic and geophysical data of the UE25a-3 exploratory drill hole, Nevada Test Site, Nevada, 2087 (USGS--1543-6)
Preliminary interpretations of geologic results obtained from boreholes UE25a-4, -5, -6, and -7, Yucca Mountain, Nevada Test Site, 2093 (USGS-OFR--80-929)
Recommended new criteria for the selection of nuclear waste repository sites in Columbia River basalt and US Gulf Coast domed salt, 2070 (UCRL--52749)
Relative potential hazards of radioactive waste in various water systems, 2184
Report of biological investigations at the Los Medanos Waste Isolation Pilot Plant (WIPP) area of New Mexico during FY 1978, 3299 (SAND--79-0368)
Report on geologic exploration activities, 1458 (DOE/RL/01830--14)
Selecting sites for uranium mill waste disposal facilities, 2320
Status of siting for the waste isolation pilot plant, 2304
Summary report on the low-level radioactive waste burial site, West Valley, New York (1963-1975), 1693 (PB--80-138993)
Technical developments in the WIPP program, 2002 (SAND--80-1599C)
Vitrified radwaste from reprocessing. Material concerning the examination by the Swedish Nuclear Power Inspectorate of the supplementary geology report from the KBS-project, 1504 (INIS-mf--5298)
Vitrified radwaste from reprocessing. Supplementary geological investigations of the KBS-project, Sweden, 1505 (INIS-mf--5299)
RADIOACTIVE WASTE DISPOSAL/SMOKE DETECTORS
Dosimetric and risk/benefit implications of Am-241 in smoke detectors disposed of in normal wastes, 3613 (PB--296947)
RADIOACTIVE WASTE DISPOSAL/SOLID WASTES
Final storage in concrete of activated metal parts, 1537 (KBS-TR--119)
RADIOACTIVE WASTE DISPOSAL/SPACE
Thermal control of high energy nuclear waste, space option, 1596 (N--79-25869)
Wastes mixes and forms for space disposal of nuclear waste, 2297
RADIOACTIVE WASTE DISPOSAL/SPACE FLIGHT
Space augmentation of military high-level waste disposal, 1597 (N--79-27193)
RADIOACTIVE WASTE DISPOSAL/SPECIFICATIONS
Criteria for radioactive waste: a time for reason, 2203
Waste characteristics that may require specification in waste acceptance criteria, 2204
RADIOACTIVE WASTE DISPOSAL/SPENT FUEL ELEMENTS
ASEA have developed a new safe container for nuclear fuel waste. Corundum container which takes about 400kg of uranium, 1288
ASEA is producing full-scale canisters for nuclear waste (Sweden), 2279
Spent fuel characterization for the commercial waste and spent fuel packaging program, 1487 (HEDL-TC--1384(Rev. 1))
RADIOACTIVE WASTE DISPOSAL/SPENT FUELS
Assessment of LWR spent fuel disposal options. Volume 2. System definition and assessments. Technical report, 1628 (ONWI--39(Vol.2))
Assessment of LWR spent fuel disposal options. Volume 3. Study bases and system design considerations (Appendices). Technical report, 1629 (ONWI--39(Vol.3)
Disposal of spent nuclear fuel, 1630 (ONWI--59)
Effects of gaseous radioactive nuclides on the design and operation of repositories for spent LWR fuel in rock salt, 1660 (ORNL--5578)
Nuclear waste disposal, 2251
RADIOACTIVE WASTE DISPOSAL/STANDARDS
Technical standard on disposal of radioactive wastes, 2331
RADIOACTIVE WASTE DISPOSAL/SYSTEMS ANALYSIS
Systems analysis approach to the disposal of high-level waste in deep ocean sediments, 1991 (SAND--80-0781C)
RADIOACTIVE WASTE DISPOSAL/TANKS
Structural evaluations of existing underground reinforced concrete tanks for radioactive waste storage, 1867 (RHO-SA--108)
RADIOACTIVE WASTE DISPOSAL/TECHNOLOGY ASSESSMENT
Assessment of LWR spent fuel disposal options. Volume 2. System definition and assessments. Technical report, 1628 (ONWI--39(Vol.2))
Assessment of LWR spent fuel disposal options. Volume 3. Study bases and system design considerations (Appendices). Technical report, 1629 (ONWI--39(Vol.3)
Nuclear wastes and public acceptance, 2236
Review of the nuclear waste disposal problem, 1396 (ANL/EES-TM--68)
Statement of position of the United States Department of Energy in the matter of proposed rulemaking on the storage and disposal of nuclear waste (waste confidence rulemaking), 1457 (DOE/NE--0007)
Status of nuclear fuel reprocessing, spent fuel storage, and high-level waste disposal. Nuclear Fuel Cycle Committee, California Energy Resources Conservation and Development Commission. Draft report, 117
RADIOACTIVE WASTE DISPOSAL/TEMPERATURE DISTRIBUTION
Calculation of temperature field of media, containing radioactive wastes, 1519 (INIS-mf--5572)
RADIOACTIVE WASTE DISPOSAL/TEMPERATURE EFFECTS
Full-scale and time-scale heating experiments at Stripa: preliminary results, 2377
Temperature loading and rocks mechanics at final storage of radioactive waste, 2011 (SKBF/KBS-TR--79-03)
RADIOACTIVE WASTE DISPOSAL/TEMPERATURE GRADIENTS
Experimental results from Stripa, 1579 (LBL--9426)
RADIOACTIVE WASTE DISPOSAL/TEST FACILITIES
Near-surface test facility. Phase I. Geologic site characterization report, 1843 (RHO-BWI-ST--8)
RADIOACTIVE WASTE DISPOSAL/TRANSMUTATION
Evaluation of systems incorporating transmutation for the reduction of the long term toxicity of high-level waste, 2283
Transmutation of waste actinides in thermal reactors, 2207
RADIOACTIVE WASTE DISPOSAL/TRITIUM
Trittium waste control: April-September 1979, 475 (MLM--2669)
RADIOACTIVE WASTE DISPOSAL/UNDERGROUND DISPOSAL
Actinide partitioning-transmutation program final report. VII. Long-term risk analysis of the geologic repository, 1674 (ORNL/TM--6987)
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
Apparatus for sealing access holes to cavities within the earth with rock glass (Patent), 2383
Assessment of potential radionuclide transport in site-specific geologic formations, 1962 (SAND--79-2468)
Autoclave release studies, 1788 (PNL-SA--7992)
Basic data report for drillhole WIPP 19 (Waste Isolation Pilot Plant-WIPP), 3521 (SAND--79-0276)
Burial ground technology, 1663 (ORNL--5620)
Canadian program for nuclear fuel waste disposal, 2300
Characterization of the Hanford 300 area burial grounds. Task IV. Biological transport, 2452 (PNL--2774)

Characterization of the Hanford 300 area burial grounds. Final report: decontamination and decommissioning, 1727 (PNL--2557)
Control of radionuclide migration in soil by the application of dc electric current, 1429 (CONF-791112--28)
Criticality in a spent fuel repository in wet crystalline rock, 221 (KBS-TR--108)
Degradation of transuranic-contaminated wastes under geologic isolation conditions, 1952 (SAND--79-2216A)
Derivation of parameters necessary for the evaluation of performance of sites for deep geological repositories with particular reference to bedded salt, Livermore, California. Volume I. Main text, 2041 (UCRL--15166(Vol.1))
Derivation of parameters necessary for the evaluation of performance of sites for deep geological repositories with particular reference to bedded salt, Livermore, California. Volume II. Appendices, 2042 (UCRL--15166(Vol.2))
Determination of in-situ thermal properties of Stripa granite from temperature measurements in the full-scale heater experiments: method and preliminary results. Technical information report No. 24, 1567 (LBL--8423)
Disruptive event analysis: volcanism and igneous intrusion, 3543 (PNL--2882)
Effects of annular air gaps surrounding an emplaced nuclear waste canister in deep geologic storage, 2080 (UCRL--84152)
Environmental and other evaluations of alternatives for long-term management of buried INEL transuranic waste, 1492 (IDO--10085)
Environmental analysis of a formerly utilized MED/AEC site: Site A and plot M, Palos Forest Preserve, Palos Park, Illinois, 2410 (ANL/ES--79)
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
Evaluation of isotope migration, land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
Executive-style briefings on selected repository design issues, 2095 (Y/GWI/SUB--78/22340/4)
Expected environments in high-level nuclear waste and spent fuel repositories in salt, 1679 (ORNL/TM--7201)
Far field heating effects of a radioactive waste depository in hard rock, 2358
Far-field thermomechanical response of argillaceous rock to emplacement of a nuclear-waste repository, 3567 (SAND--79-2230)
Feasibility of underground storage/disposal of noble gas fission products, 1394 (ANL--78-81)
Field test facility for monitoring water/radionuclide transport through partially saturated geologic media: design, construction, and preliminary description (Battelle Pacific Northwest Laboratories), 1753 (PNL--3226)
Final disposal of radioactive wastes, 2155
Final environmental impact statement. Waste Isolation Pilot Plant, 1451 (DOE/EIS--0026(Vol.1))
Final environmental impact statement. Waste Isolation Pilot Plant, 1452 (DOE/EIS--0026(Vol.2))
Fission product release. Progress report, January 1-March 31, 1980, 2864 (LA--8389-PR)
Flowability of bulk solids used in shale fracturing grouts as determined by the Jenike and Johanson method, 1673 (ORNL/TM--6882)
Geochemistry of radioactive waste disposal, 2135
Geologic, stratigraphic, thermal, and mechanical factors which influence repository design in the bedded salt environment, 2052 (UCRL--15203)
Geologic disposal of nuclear wastes: salt's lead is challenged, 2215
Geological conditions of the use of the saliferon strata of the Ukrainian SSR for waste disposal, 2330
Geology, water supply, and waste disposal at sites II and IIA, burial ground D, and vicinity, national reactor testing station, Idaho, 1493 (IDO--22027-USGS)
Geomorphic and erosion studies at the Western New York Nuclear Service Center, West Valley, New York, 1605 (NUREG/CR--0795)
Geophysical surveys for buried waste detection at the Idaho National Engineering Laboratory, 1755 (PNL--3227)
Geoscience parameter data base handbook: granites and basalts, 2039 (UCRL--15152)
Geoscience data base handbook for modeling a nuclear waste repository. Volume 1, 1608 (NUREG/CR--0912(Vol.1))
Handling and final storage of unreprocessed spent nuclear fuel, 217 (INIS-mf--5013)
Handling of final storage of unreprocessed spent nuclear fuel. 2. Technical, 216 (INIS-mf--5010)
Heat transfer analysis of the geologic disposal of spent fuel and high-level waste storage canisters, 1873 (RHO-SA--160)
High-level active waste disposal, 2162
I. Some results from a field investigation of thermo-mechanical loading of a rock mass when heaters are emplaced in the rock. II. The application of field data from heater experiments conducted at Stripa, Sweden to parameters for repository design. SAC-26, 1575 (LBL--9392)
I. Some results from a field investigation of thermo-mechanical loading of a rock mass when heaters are emplaced in the rock, 1576 (LBL--9392)
Identification of key radionuclides in a nuclear waste repository in basalt, 1844 (RHO-BWI-ST--9)
II. Application of field data from heater experiments conducted at Stripa, Sweden, to parameters for repository design, 1577 (LBL--9392)
In situ heating experiments in geological formations, 2360
In situ heating experiments in hard rock: their objectives and design, 2376
Infiltration control for low-level radioactive solid waste disposal areas: an assessment, 1672 (ORNL/TM--6473)
Instrument evaluation, calibration, and installation for the heater experiments at Stripa, 1566 (LBL--8313)
International research programme for disposal of radioactive waste, 2140
Investigation of the regional characteristic of the Devonian shales for the storage/disposal of radioactive wastes, 1425 (CONF-790938--6)
Investigation of underground caverns (Patent), 2142
Leach and soil column tests with stored redox sludge, 2411 (ARH--1733)
Leaching characteristics of actinides from simulated reactor waste glass, 1790 (PNL-SA--7992)
Legal problems in the utilization of salt domes, 2394
Locating field confirmation study areas for isolation of nuclear waste in the Texas Panhandle. Annual report, October 1, 1978-September 30, 1979, 1635 (ONWI--79/E511-00300-4)
Low-level radioactive waste disposal techniques., 16
Materials aspects of nuclear waste disposal in Canada, 1410 (CONF-790420--)
Method for long time storage of radioactive material in the bedrock (Patent), 2106
Mining aspects of nuclear waste disposal in salt domes, 2216
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Volume I. Conceptual design report, 1684 (ORO--5366-T1(Vol.1)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Volume II. Conceptual design report, 1685 (ORO--5366-T1(Vol.2))
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 1. Twenty-five-year retrievability capital equipment cost estimate, 1687 (ORO--5366-T3)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 1. 25-year retrievability, 1688 (ORO--5366-T4)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Quality assurance program for licensing, 1689 (ORO--5366-T5)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 3. Waste retrieval from backfilled regions, 1690 (ORO--5366-T6)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel: construction accounting manual, 1692 (ORO--5366-T8)
Near-surface heater experiments in argillaceous rocks, 2655
Near-surface test facility. Phase I. Geologic site characterization report, 1843 (RHO-BWI-ST--8)
Nevada nuclear waste storage investigations. Quarterly report, April - June 1980, 1620 (NVO--196-19)
Nonstationary temperature fields on disposal of solid radioactive wastes of high activity into ground, 1509 (INIS-mf--5571)

Test bores irrelevant, 2114
Thermal conductivity of rocksalt and other geologic materials from the site of the proposed waste isolation pilot plant, 2477 (SAND--79-1665C)
Thermal effects in disposal of radioactive waste in hard rock, 2361
Three-dimensional thermal analysis of a baseline spent fuel repository, 2091 (UCRL--84153)
Transuranic distribution beneath a retired underground disposal facility, Hanford Site, 1869 (RHO-SA--131)
Underground waste disposal: the time to go ahead, 2132
Underground storage of nuclear industry wastes, 2348
Very deep hole concept: evaluation of an alternative for nuclear waste disposal, 1564 (LBL--7089)
Very deep hole concept: evaluation of an alternative for nuclear waste disposal, 1570 (LBL--8648)
Vitrified radwaste from reprocessing. Supplementary geological investigations of the KBS-project, Sweden, 1505 (INIS-mf--5299)
Waste dumping: why oppose test bores, 2113
Waste Isolation Pilot Plant (WIPP) release scenarios, 1943 (SAND--79-1959C)
Waste Isolation Safety Assessment Program, 1784 (PNL-SA--7992)
Waste isolation safety assessment program, 1765 (PNL-SA--7243)
WIPP waste characterization and experimental programs, 1795 (PNL-SA--7992)
WISAP Task 4 (sorption-desorption analysis), 1786 (PNL-SA--7992)
Workshop on transport modeling for nuclear waste repositories, 2460 (PNL-SA--7468)

RADIOACTIVE WASTE DISPOSAL/WASTE OILS
Waste oil disposal at the Department of Energy facilities at Oak Ridge, Tennessee, 862 (K/C--1383)

RADIOACTIVE WASTE FACILITIES
Construction of new installation for processing and burial of radioactive wastes in Hungarian Peoples Republic, 829 (INIS-mf--5571)
Continuous bituminization plant for solidifying radioactive wastes, 1129
Defense waste processing facility, 427 (DP--78-125-4)
Defense waste processing facility, 428 (DP--79-125-1)
Facility for liquid wastes and aqueous radioactive wastes of an α, β, γ-laboratory, 2098 (ZfK--340)
Heating of radioactive waste processing tank (Patent), 2218
Intermediate storage facility for vitrified high level waste from the reprocessing of spent nuclear fuel, 1494 (INFCE/DEP/WG--7/10)
Liquid waste handling facilities for a conceptual light water reactor spent fuel reprocessing complex, 1181
Nuclear Waste Management Program summary document, FY 1981, 421 (DOE/NE--0008)
Radioactive liquid waste treatment plant in KEK, 869 (KEK--78-21)

RADIOACTIVE WASTE FACILITIES/AFTER-HEAT
Effects of dimensionality and boundary conditions on thermal calculations (Underground repository), 2033 (UCID--18681)

RADIOACTIVE WASTE FACILITIES/AIR QUALITY
Meteorological and air quality data quarterly report. WIPP site: Eddy County, New Mexico. Spring quarter, March-May 1977, 3180 (SAND--79-7109)
Meteorological and air quality data quarterly report. WIPP site: Eddy County, New Mexico. Summer quarter, June 1977-August 1977, 2478 (SAND--80-7107)

RADIOACTIVE WASTE FACILITIES/AWAY-FROM-REACTOR STORAGE
DOE's spent fuel program talk, 181 (CONF-800943--(Summ.))

RADIOACTIVE WASTE FACILITIES/BIBLIOGRAPHIES
Site locality identification study: Hanford Site. Volume II. Data cataloging, 1818 (RHO-BWI-C--62(Vol.2)

RADIOACTIVE WASTE FACILITIES/BOREHOLES
Sandia Borehole Plugging Program for the Waste Isolation Pilot Plant (WIPP), 1980 (SAND--80-0390C)
Test plan: Potash Core Test. WIPP experimental program borehole plugging, 1927 (SAND--79-1306)

RADIOACTIVE WASTE FACILITIES/CALCINATION
Radiation protection features of the new waste calcining facility, 2611

RADIOACTIVE WASTE FACILITIES/CLOSURES
Basalt Waste Isolation Project borehole plugging studies: an overview, 1838 (RHO-BWI-SA--49)
Borehole Plugging Program. Status report, October 1, 1978-September 30, 1979, 1950 (SAND--79-2141)
Cement technology for borehole plugging: interim report on the effects of fly ash and salt on the physical properties of cementitious solids, 1676 (ORNL/TM--7106)
Instrumentation development for the Waste Isolation Pilot Plant (WIPP) borehole plugging program (BHP), 1941 (SAND--79-1902)
Preliminary geochemical and physical testing of materials for plugging of man-made accesses to a repository in basalt, 1819 (RHO-BWI-C--66)
Role of borehole plugging in the evaluation of the Waste Isolation Pilot Plant, 1986 (SAND--80-0502C)
Sealing a nuclear waste repository in Columbia River basalt: preliminary results, 1839 (RHO-BWI-SA--50)

RADIOACTIVE WASTE FACILITIES/COMPARATIVE EVALUATIONS
Transportation analysis for the concept of regional repositories, 233 (ORNL/TM--7170)

RADIOACTIVE WASTE FACILITIES/COMPUTERIZED SIMULATION
Analysis of radionuclides in the defense waste processing facility, 1252

RADIOACTIVE WASTE FACILITIES/COMPUTERS
WIPP conceptual design report. Addendum M. Computer system and data processing requirements for Waste Isolation Pilot Plant (WIPP), 1887 (SAND--77-0274(Add. M))

RADIOACTIVE WASTE FACILITIES/CONSTRUCTION
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel: construction accounting manual, 1692 (ORO--5366-T8)

RADIOACTIVE WASTE FACILITIES/COORDINATED RESEARCH PROGRAMS
Waste Isolation Safety Assessment Program, 1784 (PNL-SA--7992)
WISAP Task 4 (sorption-desorption analysis), 1786 (PNL-SA--7992)

RADIOACTIVE WASTE FACILITIES/COST

National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 1. Twenty-five-year retrievability capital equipment cost estimate, 1687 (ORO--5366-T3)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel: construction accounting manual, 1692 (ORO--5366-T8)
WIPP conceptual design report. Addendum C. Cost worksheets for Waste Isolation Pilot Plant (WIPP), 1878 (SAND--77-0274(Add.C))
RADIOACTIVE WASTE FACILITIES/CRITICALITY
Assessment of criticality monitoring techniques for a transuranic waste treatment facility, 439 (EGG-PHYS--5084)
RADIOACTIVE WASTE FACILITIES/DECOMMISSIONING
Characterization of the Hanford 300 area burial grounds. Final report: decontamination and decommissioning, 1727 (PNL--2557)
Decommissioning of commercial shallow-land burial sites, 958 (PNL-SA--8014)
Decommissioning of a ^{239}Pu contaminated incinerator facility, 1275
Decommissioning of the surface facilities associated with repositories for the deep geological disposal of high-level nuclear waste, 2317
Field test programs of borehole plugs in southeastern New Mexico, 1935 (SAND--79-1634C)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 1. Twenty-five-year retrievability, decommissioning cost estimate, 1691 (ORO--5366-T7)
Recommendations for remedial action and decommissioning of a radioactive waste burial site, 1724 (PB--296947)
RADIOACTIVE WASTE FACILITIES/DECONTAMINATION
Recommendations for remedial action and decommissioning of a radioactive waste burial site, 1724 (PB--296947)
RADIOACTIVE WASTE FACILITIES/DEFORMATION
Comparison of thermomechanical calculations for highly non-linear quasistatic drift deformations, 1971 (SAND--80-0149)
Summary of convergence and stress measurements in the Temperature-test-field 4, 1651 (ONWI--88)
RADIOACTIVE WASTE FACILITIES/DENSIMETERS
Completely contained and remotely operated digital density meter, 3604 (DPSPU--79-30-14)
RADIOACTIVE WASTE FACILITIES/DESIGN
Alternative concepts for spent fuel storage basin expansion at Morris Operation, 1598 (NEDG--24749)
Basalt Waste Isolation Project. Quarterly report, January 1-March 31, 1980, 1806 (RHO-BWI--80-109-2Q)
Considerations for developing seismic design criteria for nuclear waste storage repositories, 1522 (JAB--00099-128)
Engineered storage facility for radioactive krypton, 2229
II. Application of field data from heater experiments conducted at Stripa, Sweden, to parameters for repository design, 1577 (LBL--9392)
Liquid effluent treatment in nuclear power plants with light water reactors, 1107
Management of solid waste, 1666 (ORNL/ENG/INF--80/1)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Volume I. Conceptual design report, 1684 (ORO--5366-T1(Vol.1))
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Volume II. Conceptual design report, 1685 (ORO--5366-T1(Vol. 2))
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 1. 25-year retrievability, 1688 (ORO--5366-T4)
Nuclear waste repository in basalt: preconceptual design guidelines, 1823 (RHO-BWI-CD--2(Rev.1))
Nuclear waste repository in basalt project B-301 preconceptual design report, 1825 (RHO-BWI-CD--35)
Numerical modeling of the geomechanical response of a rock mass to a radioactive waste repository, 1831 (RHO-BWI-SA--20)
Overview of some current US design concepts for nuclear waste/spent fuel repositories in salt, 1639 (ONWI--88)
Preconceptual design management plan basalt waste isolation program basalt repository, 1824 (RHO-BWI-CD--22(Rev.1))
Preliminary technical data summary No. 3 for the Defense Waste Processing Facility, 746 (DPSTO--77-13-3)
Progress report on the design of a Low-Level Waste Pilot Facility at ORNL, 412 (CONF-800416--3)
Remarks on the assessment, representation, aggregation and utilization of expert opinion, 2030 (UCID--18665)
Review of Y/OWI/TM-36: repository design performance in salt, granite, shale or basalt, 2046 (UCRL--15177)
Summary of research and development activities in support of waste acceptance criteria for WIPP, 1926 (SAND--79-1305)
WIPP conceptual design report. Addendum A. Design calculations for Waste Isolation Pilot Plant (WIPP), 1876 (SAND--77-0274(Add.A))
WIPP conceptual design report. Addendum B. Tailings disposal proposal, 1877 (SAND--77-0274(Add.B))
WIPP conceptual design report. Addendum C. Cost worksheets for Waste Isolation Pilot Plant (WIPP), 1878 (SAND--77-0274(Add.C))
WIPP conceptual design report. Addendum E. Electrical load summary for Waste Isolation Pilot Plant, 1880 (SAND--77-0274(Add.E))
WIPP conceptual design report. Addendum F. HVAC systems energy analysis for Waste Isolation Pilot Plant, 1881 (SAND--77-0274(Add.F))
WIPP conceptual design report. Addendum G. Accident analysis for Waste Isolation Pilot Plant, 1882 (SAND--77-0274(Add.G))
WIPP conceptual design report. Addendum H. Special equipment development program for Waste Isolation Pilot Plant (WIPP), 1883 (SAND--77-0274(Add.H))
WIPP conceptual design report. Addentum I. Soils and foundation investigation for proposed Waste Isolation Pilot Plant, Eddy County, New Mexico, 1884 (SAND--77-0274(Add.I))
WIPP conceptual design report. Addendum J. Support equipment in the high level waste facility of the Waste Isolation Pilot Plant, 1885 (SAND--77-0274(Add.J))
WIPP conceptual design report. Addendum L. Mine safety code review for Waste Isolation Pilot Plant (WIPP), 1886 (SAND--77-0274(Add.L))
WIPP conceptual design report. Addendum M. Computer system and data processing requirements for Waste Isolation Pilot Plant (WIPP), 1887 (SAND--77-0274(Add.M))
RADIOACTIVE WASTE FACILITIES/ELECTRICAL ENGINEERING
WIPP conceptual design report. Addendum E. Electrical load summary for Waste Isolation Pilot Plant, 1880 (SAND--77-0274(Add.E))
RADIOACTIVE WASTE FACILITIES/ENGINEERING
Systems engineering programs for geologic nuclear waste disposal, 1983 (SAND--80-0440)
RADIOACTIVE WASTE FACILITIES/ENVIRONMENTAL EFFECTS
Surface hydrologic investigations of the Columbia Plateau Region, Washington, 3496 (RHO-BWI-ST--6)
RADIOACTIVE WASTE FACILITIES/ENVIRONMENTAL IMPACT STATEMENTS
Final environmental impact statement. Waste Isolation Pilot Plant, 1451 (DOE/EIS--0026(Vol.1))
Final environmental impact statement. Waste Isolation Pilot Plant, 1452 (DOE/EIS--0026(Vol.2))
RADIOACTIVE WASTE FACILITIES/ENVIRONMENTAL IMPACTS
Characterization of the Hanford 300 area burial grounds. Task IV. Biological transport, 2452 (PNL--2774)
Environmental analysis of a formerly utilized MED/AEC site: Site A and plot M, Palos Forest Preserve, Palos Park, Illinois, 2410 (ANL/ES--79)
Final environmental impact statement. Waste Isolation Pilot Plant, 1452 (DOE/EIS--0026(Vol.2))
Geomorphic and erosion studies at the Western New York Nuclear Service Center, West Valley, New York, 1605 (NUREG/CR--0795)
LANDSAT data as a basis for regional environmental assessment within the Columbia Plateau, 1837 (RHO-BWI-SA--43)
Preliminary assessment of the aquatic impacts of a proposed defense waste processing facility at the Savannah River Plant, 3495 (DP-MS--79-95)
Summary of FY-1978 consultant input for scenario methodology development, 1731 (PNL--2851)
Surface hydrologic investigations of the Columbia Plateau region, Washington, 3520 (RHO-BWI-ST--6)
Waste Isolation Safety Assessment Program, 1784 (PNL-SA--7992)
Waste isolation safety assessment program, 1765 (PNL-SA--7243)
RADIOACTIVE WASTE FACILITIES/EQUIPMENT
Pulverulent body change-over device in radioactive waste processing facilities (Patent), 1371
WIPP conceptual design report. Addendum H. Special equipment development program for Waste Isolation Pilot Plant (WIPP), 1883 (SAND--77-0274(Add.H))
WIPP conceptual design report. Addendum J. Support equipment in the high level waste facility of the Waste Isolation Pilot Plant, 1885 (SAND--77-0274(Add.J))
RADIOACTIVE WASTE FACILITIES/EVALUATION
Identification of technical problems encountered in the shallow land burial of low-level radioactive wastes, 1671 (ORNL/SUB--80/13619/1)
Inspection and evaluation of Nuclear Fuel Services high-level waste storage system. Program plan, 1856 (RHO-CD--882)
RADIOACTIVE WASTE FACILITIES/FAILURE MODE ANALYSIS
Bedded-salt repository analysis. Final report, 2061 (UCRL--15236)
RADIOACTIVE WASTE FACILITIES/FAILURES
Disruptive event analysis: volcanism and igneous intrusion (Waste repository disruption), 1733 (PNL--2851)
Hydrogeologic effects of natural disruptive events on nuclear waste repositories, 1735 (PNL--2858)
RADIOACTIVE WASTE FACILITIES/FEDERAL REPUBLIC OF GERMANY
Unclear decision for Germany (Proposed reactor complex at Gorleben), 3399
RADIOACTIVE WASTE FACILITIES/FLOODS
State-of-the-art for evaluating the potential impact of flooding on a radioactive waste repository, 3526 (UCRL--15270)
RADIOACTIVE WASTE FACILITIES/FLOWSHEETS
Actinide partitioning flowsheets, 1044
Design study for a fission product fixation plant and storage at Windscale, 611 (AERE-R--9416)
RADIOACTIVE WASTE FACILITIES/GASES

Measurement of radiolytic hydrogen at the high level waste storage facility of Wiederaufarbeitungsanlage Karlsruhe (WAK), 2235
RADIOACTIVE WASTE FACILITIES/GEOLOGIC FAULTS
Probabilistic aspects of faulting in anisotropic media, 1902 (SAND--79-0895C)
RADIOACTIVE WASTE FACILITIES/GEOLOGY
United States geological exploration and hydrology, Southeastern New Mexico, 1646 (ONWI--88)
RADIOACTIVE WASTE FACILITIES/GEOPHYSICAL SURVEYS
Basic data report for drillhole WIPP 27 (Waste Isolation Pilot Plant), 1896 (SAND--79-0281)
RADIOACTIVE WASTE FACILITIES/HAZARDS
Hydrologic effects of natural disruptive events on nuclear repositories, 2547 (PNL--2851)
RADIOACTIVE WASTE FACILITIES/HEALTH HAZARDS
Investigation of gas formation on a low-level radioactive waste disposal site, 2356
RADIOACTIVE WASTE FACILITIES/HEARINGS
Waste isolation pilot plant, 2652
RADIOACTIVE WASTE FACILITIES/HEAT TRANSFER
Comparison of the results of several heat transfer computer codes when applied to a hypothetical nuclear waste repository, 1677 (ORNL/TM--7112)
RADIOACTIVE WASTE FACILITIES/HEATING
Brine experiments by the BGR in the Asse II, 1654 (ONWI--88)
Far field thermal calculations for the WIPP site in SENM, 1912 (SAND--79-1013C)
RADIOACTIVE WASTE FACILITIES/HIGHLEVEL RADIOACTIVE WASTES
Surface depositories for vitrificated high-activity wastes, 1510 (INIS-mf--5571)
RADIOACTIVE WASTE FACILITIES/HVAC SYSTEMS
WIPP conceptual design report. Addendum F. HVAC systems energy analysis for Waste Isolation Pilot Plant, 1881 (SAND--77-0274(Add.F))
RADIOACTIVE WASTE FACILITIES/HYDROLOGY
Study of regional temperature and thermohydrological effects of an underground repository for nuclear wastes in hard rock, 1565 (LBL--8271(Rev.))
United States geological exploration and hydrology, Southeastern New Mexico, 1646 (ONWI--88)
RADIOACTIVE WASTE FACILITIES/INSPECTION
Inspection and evaluation of Nuclear Fuel Services high-level waste storage system. Program plan, 1856 (RHO-CD--882)
RADIOACTIVE WASTE FACILITIES/LEAKS
Waste Isolation Safety Assessment Program. Task 2: waste form release rate analysis, 1785 (PNL-SA--7992)
RADIOACTIVE WASTE FACILITIES/LEGAL ASPECTS
WIPP conceptual design report. Addendum L. Mine safety code review for Waste Isolation Pilot Plant (WIPP), 1886 (SAND--77-0274(Add.L))
RADIOACTIVE WASTE FACILITIES/LEGISLATION
1979 New Mexico legislative session: energy issues and legislation (WIPP), 3175 (SAND--79-1095)
RADIOACTIVE WASTE FACILITIES/LICENSING
Early identification of technical issues: a sensitivity study to check LISTRA1A internal consistency and structure, 2649 (UCID--18709)
Licensing of away-from-reactor (AFR) installations, 184 (CONF-800943--(Summ.))
Regulation of Federal radioactive waste activities. Report to Congress on extending the Nuclear Regulatory Commission's licensing or regulatory authority to Federal radioactive waste storage and disposal activities, 477 (NUREG--0527)
RADIOACTIVE WASTE FACILITIES/LOWLEVEL RADIOACTIVE WASTES
Health and safety implication of a widespread, unauthorized dispersal of radioactive waste in the public domain, 2629 (PB--296947)
Operational experience at Chem-Nuclear's Barnwell Facility, 1715 (PB--296947)
RADIOACTIVE WASTE FACILITIES/MATERIAL UNACCOUNTED FOR
Response to a widespread, unauthorized dispersal of radioactive waste in the public domain, 2628 (PB--296947)
RADIOACTIVE WASTE FACILITIES/MATERIALS HANDLING
Pulverulent body change-over device in radioactive waste processing facilities (Patent), 1371
RADIOACTIVE WASTE FACILITIES/MAXIMUM CREDIBLE ACCIDENT
Preliminary safety evaluation of a commercial-scale krypton-85 encapsulation facility, 688 (CONF-801038--7)
RADIOACTIVE WASTE FACILITIES/METEOROLOGY
Meteorological and air quality data quarterly report. WIPP site: Eddy County, New Mexico. Spring quarter, March-May 1977, 3180 (SAND--79-7109)
Meteorological and air quality data quarterly report. WIPP site: Eddy County, New Mexico. Summer quarter, June 1977-August 1977, 2478 (SAND--80-7107)
RADIOACTIVE WASTE FACILITIES/MINING
FRG conceptual design and design basis, 1640 (ONWI--88)
RADIOACTIVE WASTE FACILITIES/MONITORING
Granulometric data 216-B Crib Facilities monitoring well sediments, 1859 (RHO-LD--45)
Management and surveillance of a university radioactive waste burial site, 1716 (PB--296947)
Monitoring system specifications: retrieval of surf from a salt repository, 2059 (UCRL--15232)
Operational experience at Chem-Nuclear's Barnwell Facility, 1715 (PB--296947)
RADIOACTIVE WASTE FACILITIES/OFFGAS SYSTEMS
Evaluation of submicron particle size classification and collection techniques for nuclear facility off-gas streams, 45 (ENICO--1003)
R and D for an off-gas treatment system for a slagging pyrolysis radioactive waste incinerator. Final report for Phase III, 995 (SAI--132-79-764-LJ)
RADIOACTIVE WASTE FACILITIES/OPERATION
Management of solid waste, 1666 (ORNL/ENG/INF--80/1)
Summary of research and development activities in support of waste acceptance criteria for WIPP, 1926 (SAND--79-1305)
RADIOACTIVE WASTE FACILITIES/PERFORMANCE
Numerical modeling capabilities to predict repository performance, 2045 (UCRL--15176)
US performance assessment, 1642 (ONWI--88)
Waste isolation performance assessment: a status report, 1631 (ONWI--60)
RADIOACTIVE WASTE FACILITIES/PERFORMANCE TESTING
Radioactive waste treatment system for Tsuruga Nuclear Power Station, 1334
RADIOACTIVE WASTE FACILITIES/PERSONNEL
Waste Isolation Pilot Plant Title I operator dose calculations. Final report, LATA report No. 90, 2552 (SAND--79-7107)
RADIOACTIVE WASTE FACILITIES/PILOT PLANTS
Final environmental impact statement. Waste Isolation Pilot Plant, 1452 (DOE/EIS--0026(Vol.2))
Status of siting for the waste isolation pilot plant, 2304
Status report on the Waste Isolation Pilot Plant, 2197
WIPP waste characterization and experimental programs, 1795 (PNL-SA--7992)
RADIOACTIVE WASTE FACILITIES/PUBLIC OPINION
Attitudes of New Mexico residents toward the nuclear fuel industry, 3170
Radioactive wastes: public attitudes toward disposal facilities, 2212
RADIOACTIVE WASTE FACILITIES/QUALITY ASSURANCE
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Quality assurance program for licensing, 1689 (ORO--5366-T5)
Quality assurance program requirements for post reactor nuclear fuel cycle facilities, 118
RADIOACTIVE WASTE FACILITIES/RADIATION ACCIDENTS
Analysis of the 1957-58 Soviet nuclear accident, 3233 (ORNL--5613)
RADIOACTIVE WASTE FACILITIES/RADIATION DOSES
Dose modelling for radon-producing activities in heavily populated areas, 2540 (PB--296947)
RADIOACTIVE WASTE FACILITIES/RADIATION HAZARDS
Computer model of long-term hazards from waste repositories, 2574
Release consequence analysis for a hypothetical geologic radioactive waste repository in salt, 1496 (INFCE/DEP/WG--7/16)
Sources of data for biodose simulations used in bedded salt repository analysis, 2055 (UCRL--15208)
Spatial patterns of radiological dose from wells drilled near nuclear waste repositories, 2060 (UCRL--15235)
RADIOACTIVE WASTE FACILITIES/RADIATION MONITORING
Activity measurements at a waste volume reduction facility, 926 (PB--296947)
Aerial radiological survey of the area surrounding the Chem-Nuclear Disposal Facility and Allied General Nuclear Services Facility, Barnwell, South Carolina, 3200 (EGG--1183-1747)
Continuous tritium monitor for nuclear facility off-gas streams, 2418 (ENICO--1022)
Radiation shield integrity testing at the new waste calcining facility, 1347
Review of radon monitoring at the DOE-Niagara Falls Storage Site, 3227 (NLCO--004EV)
RADIOACTIVE WASTE FACILITIES/RADIATION PROTECTION
National Waste Terminal Storage repository in a bedded salt formation for spent unreprocessed fuel. Occupational exposure and health physics studies. KE report No. 78-21-R, 1686 (ORO--5366-T2)
Radiation shield integrity testing at the new waste calcining facility, 1347
Use of a risk limit as an environmental safety standard for radioactive waste disposal sites, 2538 (PB--296947)
RADIOACTIVE WASTE FACILITIES/RADIOACTIVE WASTE STORAGE
Information base for waste repository design. Volume 5. Decommissioning of underground facilities. Technical report, 1701 (PB--293405)
RADIOACTIVE WASTE FACILITIES/RADIONUCLIDE MIGRATION
Application of FRAMIS to K/sub D/ data, 2027 (UCID--18651)
Development of an inter-layer solute transport algorithm for SOLTR computer program. Part 1. The algorithm, 2049 (UCRL--15180)
Example of Monte Carlo analysis applied to repository siting, 2056 (UCRL--15217)
Geology of the Separation Areas, Hanford site, South-Central Washington, 1875 (RHO-ST--23)
Numerical analysis of radionuclide movement from a hypothetical nuclear waste repository (Ground-water mediated migration to river and subsequent population doses are modeled), 3450
Preliminary geosphere transport modeling at the WIPP site, 3451
Radionuclide migration resulting from site intrusion, 3353
Research and development related to the Nevada nuclear

waste storage investigations. Progress report, October 1-December 31, 1979, 2435 (LA--8309-PR)
Status of sorption information retrieval system, 1744 (PNL--3139)
Subsurface-migration studies at the Radioactive Waste Management Complex, Idaho, 1426 (CONF-791103--42)
RADIOACTIVE WASTE FACILITIES/REMOTE HANDLING
Method and apparatus for separating materials (Patent), 1035
RADIOACTIVE WASTE FACILITIES/RESEARCH PROGRAMS
Technical progress raport for the quarter January 1-March 31, 1979, 1621 (ONWI--9(2))
RADIOACTIVE WASTE FACILITIES/RESPONSE FUNCTIONS
Thermal mechanical modelling, 1650 (ONWI--88)
RADIOACTIVE WASTE FACILITIES/RISK ASSESSMENT
Actinide partitioning-transmutation program final report. VII. Long-term risk analysis of the geologic repository, 1674 (ORNL/TM--6987)
Area 5 Radioactive Waste Management Site Safety Assessment Document, 422 (DOE/NV/00410--54)
Assessing the long-term integrity of nuclear waste repositories, 2590
Assessment of tectonic hazards to waste storage in interior-basin salt domes, 3539 (PNL--2851)
Overview of the US Nuclear Regulatory Commission high-level waste management repository assessment methods and analysis models, 2589
Perspective of waste isolation research issues and assessment of consequences for radionuclide release, 1916 (SAND--79-1076C)
Radiological safety assessment for a low-level radioactive solid waste storage facility: preliminary risk evaluation by reliability techniques, 2608
Shallow land burial: why or why not, 1718 (PB--296947)
State-of-the-art for evaluating the potential impact of flooding on a radioactive waste repository, 3526 (UCRL--15270)
Waste Isolation Pilot Plant (WIPP) release scenarios, 1943 (SAND--79-1959C)
RADIOACTIVE WASTE FACILITIES/SAFEGUARDS
Safeguards system of back-end facilities with emphasis on waste management, 2636
RADIOACTIVE WASTE FACILITIES/SAFETY
Comparison of INTERA and WISAP consequence model application. Assessment of effectiveness of geologic isolation systems, 1743 (PNL--3070)
Computer enhanced release scenario analysis for a nuclear waste repository, 2584
Development of scenarios for long-term release of radionuclides from the proposed waste isolation pilot plant in southeastern New Mexico, 2475 (SAND--79-0955C)
Development and testing of long-term safety assessment methodology for geologic waste repositories, 2599
Fourth Calcined Solids Storage Facility. Final safety analysis report, 1475 (ENICO--1031)
Mathematical simulation for safety assessment of nuclear waste repositories, 1780 (PNL-SA--7897)
Operating safety requirements for the intermediate level liquid waste system, 2646 (ORNL/TM--7262)
Preliminary safety assessment of the WIPP facility, 2583
Project SAFETY-STUDIES ENTSORGUNG in the Federal Republic of Germany, 1641 (ONWI--88)
Safety Analysis (SA) of the Hazardous Waste Disposal Facilities (Buildings 514, 612, and 614) at the Lawrence Livermore Laboratory, 3397 (UCID--18706)
SPI Project Criticality Task Force initial review and assessment, 748 (EGG--2017)
Statement by Dr. Ernst Albrecht on the provincial government's position regarding the planned nuclear waste disposal facility (NEZ) in Gorleben. Part II. Position taken by the Federal government regarding the policy statement by the Niedersachsen provincial government on the planned nuclear waste disposal facility in Gorleben (Federal government response), 2131 (PNL-TR--378)
Summary of FY-1978 consultation input for Scenario Methodology Development, 1732 (PNL--2851)
RADIOACTIVE WASTE FACILITIES/SAFETY ENGINEERING
Engineering safeguard for accidental release of radionuclides from radioactive waste ground disposal site, (1). Feasibility of contaminated groundwater zone control by underground impermeable wall, 3459
WIPP conceptual design report. Addendum G. Accident analysis for Waste Isolation Pilot Plant, 1882 (SAND--77-0274(Add.G))
RADIOACTIVE WASTE FACILITIES/SEISMIC EFFECTS
Analysis of the seismic hazard to an underground waste repository, 2543 (PNL--2851)
Earthquake damage to underground facilities, 1464 (DP-MS--78-92)
Risk of earthquake damage to waste management facilities (Solidification and RSSF facilities), 437 (DPST--76-303)
Seismic safety in nuclear-waste disposal, 2022 (UCID--18125)
RADIOACTIVE WASTE FACILITIES/SEISMOLOGY
Basic data report for Drillhole WIPP 22 (Waste Isolation Pilot Plant, WIPP), 1893 (SAND--79-0278)
RADIOACTIVE WASTE FACILITIES/SENSITIVITY ANALYSIS
Statistical sensitivity analysis of a simple nuclear waste repository model, 1680 (ORNL/TM--7310)
RADIOACTIVE WASTE FACILITIES/SIMULATION
Conasauga near-surface heater experiment. Final report, 1939 (SAND--79-1855)
Role of large-scale permeability measurements in fractured rock and their application at Stripa, 1582 (LBL--9903)
RADIOACTIVE WASTE FACILITIES/SITE PREPARATION
Geologic, stratigraphic, thermal, and mechanical factors which influence repository design in the bedded salt environment, 2052 (UCRL--15203)
WIPP conceptual design report. Addendum D. A report to Holmes and Narver, Inc., Anaheim, California on alternative energy sources for Waste Isolation Pilot Plant, Carlsbad, New Mexico, 1879 (SAND--77-0274(Add.D)
RADIOACTIVE WASTE FACILITIES/SITE SELECTION
Basalt Waste Isolation Project. Quarterly report, July 1, 1979-September 30, 1979, 1805 (RHO-BWI--79-100-4Q)
Derivation of parameters necessary for the evaluation of performance of sites for deep geological repositories with particular reference to bedded salt, Livermore, California. Volume I. Main text, 2041 (UCRL--15166(Vol.1))
Derivation of parameters necessary for the evaluation of performance of sites for deep geological repositories with particular reference to bedded salt, Livermore, California. Volume II. Appendices, 2042 (UCRL--15166(Vol.2))
Disruptive event analysis: volcanism and igneous intrusion, 3543 (PNL--2882)
Effects of resource activities upon repository siting and waste containment with reference to bedded salt, 2054 (UCRL--15205)
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)
Finding a site to store spent fuel in the Pacific Basin, 2163
Framework for geologic repository siting, 2183
Meteorological and air quality data quarterly report WIPP site: Eddy County, New Mexico. Winter quarter, December 1976-February 1977, 1963 (SAND--79-7042)
Nevada nuclear waste storage investigations: FY 1980 Project Plan and FY 1981 forecast, 1616 (NVO--196-13)
Prediction of ground motion from underground nuclear weapons tests as it relates to siting of a nuclear waste storage facility at NTS and compatibility with the weapons test program, 1994 (SAND--80-1020/1)
Prediction of ground motion from underground nuclear weapons tests as it relates to siting of a nuclear waste storage facility at NTS and compatibility with the weapons test program, 1995 (SAND--80-1020/1)
Preliminary evaluation of the environmental aspects of potential radioactive waste repository study areas in the Ohio and New York portions of the Salina Basin, 1625 (ONWI--23)
Recommended new criteria for the selection of nuclear waste repository sites in Columbia River basalt and US Gulf Coast domed salt, 2070 (UCRL--52749)
Regional summary and recommended study area for Ohio and New York portions of the Salina Basin, 1627 (ONWI--29)
Report on geologic exploration activities, 1459 (DOE/RL/C--14)
Review of geotechnical measurement techniques for a nuclear waste repository in bedded salt, 2038 (UCRL--15141)
Site identification presentation: Basalt Waste Isolation Project, 1828 (RHO-BWI-LD--22)
Site locality identification study: Hanford Site. Volume I. Methodology, guidelines, and screening, 1817 (RHO-BWI-C--62(Vol.1))
Site locality identification study: Hanford Site. Volume II. Data cataloging, 1818 (RHO-BWI-C--62(Vol.2)
Social impact mitigation and nuclear waste repository siting, 1462 (DOE/TIC--11260)
Spring inventory of the Rattlesnake Hills, 1813 (RHO-BWI-C--47)
State-of-the-art for evaluating the potential impact of tectonism and volcanism on a radioactive waste repository, 3541 (UCRL--15269)
Suitability of Palestine salt dome, Anderson Co., Texas for disposal of high-level radioactive waste, 1633 (ONWI--74)
Technical issues in the geologic disposal of radioactive wastes, 1977 (SAND--80-0323C)
Technical requirements for qualification of A potential nuclear waste repository site in basalt, 1827 (RHO-BWI-LD--19)
Waste management program. Technical progress report, April-June 1979, 429 (DP--79-125-2)
RADIOACTIVE WASTE FACILITIES/SOCIO-ECONOMIC FACTORS
Social impact mitigation and nuclear waste repository siting, 1462 (DOE/TIC--11260)
RADIOACTIVE WASTE FACILITIES/SOIL MECHANICS
WIPP conceptual design report. Addentum I. Soils and foundation investigation for proposed Waste Isolation Pilot Plant, Eddy County, New Mexico, 1884 (SAND--77-0274(Add.I))
RADIOACTIVE WASTE FACILITIES/SPECIFICATIONS
Preliminary criteria for shallow-land storage/disposal of low-level radioactive solid waste in an arid environment, 1855 (RHO-CD--810)
RADIOACTIVE WASTE FACILITIES/STANDARDS
Quality assurance program requirements for post reactor nuclear fuel cycle facilities, 118
RADIOACTIVE WASTE FACILITIES/STRATIGRAPHY

Basic data report for drillhole WIPP 25 (Waste Isolation Pilot Plant - WIPP), 1894 (SAND--79-0279)
Basic data report for drillhole WIPP 13 (Waste isolation pilot plant - WIPP), 1890 (SAND--79-0273)
RADIOACTIVE WASTE FACILITIES/STRESSES
Summary of convergence and stress measurements in the Temperature-test-field 4, 1651 (ONWI--88)
RADIOACTIVE WASTE FACILITIES/SYSTEMS ANALYSIS
Systems engineering programs for geologic nuclear waste disposal, 1983 (SAND--80-0440)
RADIOACTIVE WASTE FACILITIES/TEMPERATURE DISTRIBUTION
Preliminary assessment of temperature distributions associated with a radioactive waste vault, 1386 (AECL--6308)
Sensitivity calculations for low heat generating defense waste repository temperatures, 1471 (OP-MS--80-4)
Thermal/mechanical modelling for repository design and in-situ testing, 1649 (ONWI--88)
RADIOACTIVE WASTE FACILITIES/TEMPERATURE EFFECTS
Thermomechanical response of WIPP repositories, 1966 (SAND--79-7111)
RADIOACTIVE WASTE FACILITIES/TEMPERATURE GRADIENTS
Study of regional temperature and thermohydrological effects of an underground repository for nuclear wastes in hard rock, 1565 (LBL--8271(Rev.))
RADIOACTIVE WASTE FACILITIES/TEST FACILITIES
Basalt Waste Isolation Project. Quarterly report, July 1, 1979-September 30, 1979, 1805 (RHO-BWI--79-100-4Q)
RADIOACTIVE WASTE FACILITIES/WELL LOGGING
Basic data report for drillhole WIPP 26 (Waste Isolation Pilot Plant - WIPP), 1895 (SAND--79-0280)
RADIOACTIVE WASTE MANAGEMENT

RADIOACTIVE WASTE MANAGEMENT/ANIMALS
Treatment of animal wastes contaminated with radioisotopes, 1167
RADIOACTIVE WASTE MANAGEMENT/BIBLIOGRAPHIES
Abstracts: NRC Waste Management Program reports, 2023 (UCID--18133(Rev.1))
Bibliography of reports by US Geological Survey personnel pertaining to underground nuclear testing and radioactive waste disposal at the Nevada Test Site, and radioactive waste disposal at the WIPP Site, New Mexico, January 1, 1979-December 31, 1979, 539 (USGS-OFR--80-817)
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
Radioactive waste management integrated data base: a bibliography, 494 (ORNL/TM--7385/V2)
Radioactive waste management integrated data base: a bibliography (Approximately 1100 references), 493 (ORNL/TM--7385/V1)
RADIOACTIVE WASTE MANAGEMENT/BIOLOGICAL WASTES
Treatment of animal wastes contaminated with radioisotopes, 1167
RADIOACTIVE WASTE MANAGEMENT/COMPARATIVE EVALUATIONS
Comparative techniques for nuclear fuel cycle waste management systems (Once-through and coprocessed UO_2-PuO_2 fuel cycles), 69 (PNL--3153)
RADIOACTIVE WASTE MANAGEMENT/COMPUTER CODES
MACRO1: a code to test a methodology for analyzing nuclear-waste management systems, 2068 (UCRL--52736)
RADIOACTIVE WASTE MANAGEMENT/COORDINATED RESEARCH PROGRAMS
IAEA coordinated research program on the evaluation of solidified high-level radioactive waste products, 403 (CONF-790420--)
Long-term high-level waste technology program, 424 (DOE/SR-WM--79-3(Rev.4/80))
RADIOACTIVE WASTE MANAGEMENT/COST
Allowing for uncertainties in the expected waste management costs, 545
Defense transuranic waste at the Savannah River Plant, Aiken, South Carolina. Supplemental alternatives for long-term management, 423 (DOE/SR-WM--79-1(Suppl.))
RADIOACTIVE WASTE MANAGEMENT/DATA COMPILATION
Characteristics of solidified high-level waste products, 582
RADIOACTIVE WASTE MANAGEMENT/DECISION MAKING
Assessment of effectiveness of geologic isolation systems: the feasibility of computer interrogation of experts for WISAP, 1737 (PNL--2862)
Nuclear waste management issues: a multidisciplinary evaluation framework. TeKneKron 8-52865-A-L, 512 (PNL--3078)
Risk perspectives in waste management, 1870 (RHO-SA--142)
RADIOACTIVE WASTE MANAGEMENT/DECISION TREE ANALYSIS
Regulatable elements in the high-level waste management program, 535 (UCID--18150)
RADIOACTIVE WASTE MANAGEMENT/DECOMMISSIONING
Decommissioning standards: the radioactive waste impact, 1722 (PB--296947)
RADIOACTIVE WASTE MANAGEMENT/ECONOMIC ANALYSIS
Economic comparison of centralizing or decentralizing processing facilities for defense transuranic waste, 699 (DOE/AL/TRU--8003)
RADIOACTIVE WASTE MANAGEMENT/EDUCATIONAL FACILITIES
Collection and disposal of low level waste at an educational institution, 1712 (PB--296947)
RADIOACTIVE WASTE MANAGEMENT/EDUCATIONAL TOOLS
Development of educational modules for safeguards and nuclear waste management, 2638
RADIOACTIVE WASTE MANAGEMENT/ENVIRONMENTAL EFFECTS
Radioactive waste management and its implications for environmental research, 3420
RADIOACTIVE WASTE MANAGEMENT/ENVIRONMENTAL IMPACT STATEMENTS
Final environmental impact statement. Long-term management of defense high-level radioactive wastes (research and development program for immobilization), Savannah River Plant, Aiken, South Carolina, 1450 (DOE/EIS--0023)
RADIOACTIVE WASTE MANAGEMENT/ETHICS
Managing low-level radioactive wastes: bioethical concerns, 2541 (PB--296947)
RADIOACTIVE WASTE MANAGEMENT/EVALUATION
Environmental and other evaluations of alternatives for long-term management of stored INEL transuranic waste, 419 (DOE/ET--0081(Revised))
Evaluations of alternatives for management of INEL transuranic waste, 563
Preliminary impact assessment of institutional radioactive waste disposal, 503 (PB--296947)
Programmatic assessment of radioactive waste management: nuclear fuel and waste programs, 491 (ORNL/SUB--80/13837/3)
RADIOACTIVE WASTE MANAGEMENT/GASEOUS WASTES
Management of radionuclides from reprocessing plant gaseous effluents, 2242
RADIOACTIVE WASTE MANAGEMENT/GOVERNMENT POLICIES
Management of high-level nuclear wastes, 519 (PNL-SA--7072/T1)
Nuclear Waste Management Program summary document, FY 1981, 421 (DOE/NE--0008)
Nuclear Waste Management Act of 1977, 602

Sub-seabed disposal of high-level radioactive waste: prevention of management, 603
Summary of the report to the President by the Interagency Review Group on Nuclear Waste Management, 555
RADIOACTIVE WASTE MANAGEMENT/HIGHLEVEL RADIOACTIVE WASTES
Environmental effects from disposal of defense high-level radioactive wastes in a generic geologic repository, 1428 (CONF-791112--24)
Generic waste management concepts for six LWR fuel cycles (Three recycle and three no-recycle options), 617 (ANL/EIS--11)
High-level waste management research, 572
High-level defense waste solidification at the Savannah River Plant, 729 (DP-MS--79-94)
High-level waste program progress report, April 1, 1980-June 30, 1980, 918 (ORNL/TM--7476)
Investigations of the performance of solidified high-level nuclear waste forms, 1602 (NUREG/CR--0612)
Long-term high-level defense waste technology. Progress report, July-September 1979, 525 (RHO-LD--79-101-D)
Long-term high-level waste technology program, 424 (DOE/SR-WM--79-3(Rev.4/80))
Management of high-level nuclear wastes, 519 (PNL-SA--7072/T1)
National perspective on waste management, 435 (DP-MS--80-73)
Overview of the NRC high-level waste management program, 2181
Overview of high-level waste management accomplishments, 675 (CONF-800313--3)
Overview of the US Nuclear Regulatory Commission high-level waste management repository assessment methods and analysis models, 2589
Savannah River waste management program plan, 425 (DOE/SR-WM--80-1)
Sub-seabed disposal of high-level radioactive waste: prevention of management, 603
Transuranic contaminated waste functional definition and implementation, 2058 (UCRL--15229)
RADIOACTIVE WASTE MANAGEMENT/INFORMATION
Public information on radioactive waste: a study of an emerging issue, 489 (ORNL/OIAPA--13)
RADIOACTIVE WASTE MANAGEMENT/INTERMEDIATELEVEL RADIOACTIVE WASTES
Generic waste management concepts for six LWR fuel cycles (Three recycle and three no-recycle options), 617 (ANL/EIS--11)
Shale fracturing injections at Oak Ridge National Laboratory: 1977-1979 series, 1681 (ORNL/TM--7421)
RADIOACTIVE WASTE MANAGEMENT/INTERNATIONAL COOPERATION
Determination of the radioactivity categories in liquid wastes (In Russian), 596
RADIOACTIVE WASTE MANAGEMENT/KRYPTON 85
Strategy analysis for ^{85}Kr waste management, 1259
RADIOACTIVE WASTE MANAGEMENT/LAWS
Nuclear Waste Management Act of 1977, 602
RADIOACTIVE WASTE MANAGEMENT/LECTURES

Origin, magnitude, and treatment of radioactive wastes, 670 (CONF-791185--1)
RADIOACTIVE WASTE MANAGEMENT/LEGAL ASPECTS
Impact factors on radioactive waste management. Legal and institutional matters, 451 (INFCE/DEP/WG--7/22)
Legal aspects of radioactive high-level waste management, 3145
RADIOACTIVE WASTE MANAGEMENT/LEGISLATION
Nuclear waste management, 3122
RADIOACTIVE WASTE MANAGEMENT/LIABILITIES
Impact factors on radioactive waste management. Legal and institutional matters, 451 (INFCE/DEP/WG--7/22)
RADIOACTIVE WASTE MANAGEMENT/LIQUID WASTES
Practical guidelines for radioactive waste management, 576
Study of alternative methods for the management of liquid scintillation counting wastes, 479 (NUREG--0656)
Technical and economic estimations of liquid wastes localization conformably to the Leningrad nuclear power plant, 458 (INIS-mf--5571)
RADIOACTIVE WASTE MANAGEMENT/LOWLEVEL RADIOACTIVE WASTES
Collection and handling of radioactive wastes from a large university, 1713 (PB--296947)
Decommissioning standards: the radioactive waste impact, 1722 (PB--296947)
Development of criteria and standards for management of low-level radioactive waste, 442 (EGG-WM--5233)
Generic waste management concepts for six LWR fuel cycles (Three recycle and three no-recycle options), 617 (ANL/EIS--11)
High-level waste program. Progress report, October 1, 1979-December 31, 1979, 492 (ORNL/TM--7253)
Identification of technical problems encountered in the shallow land burial of low-level radioactive wastes, 1671 (ORNL/SUB--80/13619/1)
Low-level radioactive waste management. Volume I: current power reactor low-level radwaste. Final report, 497 (PB--80-105042)
Low-level radioactive waste management, 501 (PB--296947)
Low-level radioactive waste management: retrospect and prospect, 1706 (PB--296947)
Low-level radioactive waste management. Volume V. Policy recommendations, conclusions and summary. Final report, 498 (PB--105083)
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
Management of alpha-contaminated wastes at the radioactive waste management complex at the Idaho National Engineering Laboratory, 1439 (CONF-800611--1)
National perspective on waste management, 435 (DP-MS--80-73)
Present state and moot points in Japan. Low-level radioactive waste management, 2221
Regulatory aspects of low level waste disposal, 506 (PB--296947)
Savannah River waste management program plan, 425 (DOE/SR-WM--80-1)
Volume reduction of low-level radioactive waste with a hammermill, 502 (PB--296947)
RADIOACTIVE WASTE MANAGEMENT/MANUALS
Practical guidelines for radioactive waste management, 576
RADIOACTIVE WASTE MANAGEMENT/MATERIALS RECOVERY
Overall assessment of actinide partitioning and transmutation for waste management purposes, 413 (CONF-800444--1)
RADIOACTIVE WASTE MANAGEMENT/MATHEMATICAL MODELS
Regulatable elements in the high-level waste management program, 535 (UCID--18150)
RADIOACTIVE WASTE MANAGEMENT/MEETINGS
Ceramics in nuclear waste management, 382 (CONF-790420--)
Consultation and concurrence: workshop proceedings, September 23-26, 1979, the Orcas meeting, Eastsound, Washington (State-federal relations), 487 (ONWI--87)
Management, stabilization, and environmental impact of uranium mill tailings, 601
Management of radioactive wastes in Canada. Proceedings of a symposium, 590
Proceedings of the Task 2 workshop Waste Isolation Safety Assessment Program, 1782 (PNL-SA--7992)
Proceedings of the symposium on the on-site management of power reactor wastes. Zurich, 26-30 March 1979, 2905
Scientific basis for nuclear waste management, 1222
RADIOACTIVE WASTE MANAGEMENT/METAL INDUSTRY
Low-level radioactive waste from rare metals processing facilities, 1709 (PB--296947)
RADIOACTIVE WASTE MANAGEMENT/MILL TAILINGS
Issues on management, stabilization and environmental impacts of uranium mill tailings, 598
National perspective on waste management, 435 (DP-MS--80-73)
Other sorts of radioactive waste, 556
Removal of hazardous radionuclides from uranium ore and/or mill tailings. Progress report, October 1, 1978-September 30, 1979, 913 (ORNL/TM--7065)
Stabilization of uranium mill tailings, 2354
RADIOACTIVE WASTE MANAGEMENT/NATURAL RADIOACTIVITY
Management of low-level natural radioactivity wastes of phosphate mining and processing, 505 (PB--296947)
RADIOACTIVE WASTE MANAGEMENT/NUCLEAR FACILITIES
Treatment and storage of radioactive gases from nuclear facilities, 547
RADIOACTIVE WASTE MANAGEMENT/ORGANIZATIONAL MODELS
Overview of the Office of Nuclear Waste Isolation, 1783 (PNL-SA--7992)
Technical program plan, Basalt Waste Isolation Project, 1853 (RHO-CD--132(Rev.5))
RADIOACTIVE WASTE MANAGEMENT/PLANNING
HTGR reprocessing wastes and development needs, 709 (DOE/SF/71053--T1)
Nuclear fuel services waste characterization and waste removal system, 524 (RHO-CD--883)
Operational Radioactive Waste Management Plan for the Nevada Test Site, 484 (NVO--185(Rev.1))
RADIOACTIVE WASTE MANAGEMENT/POLLUTION CONTROL
Environmental control technology for mining, milling, and refining thorium, 2455 (PNL--3253)
RADIOACTIVE WASTE MANAGEMENT/PUBLIC OPINION
Public participation in nuclear waste management, 379 (B-HARC--411-021)
Why extremists plague the nuclear inspector, 541
RADIOACTIVE WASTE MANAGEMENT/PUBLIC POLICY
Helping the public decide: the case of radioactive waste management, 3114
Radiological performance objectives for radioactive waste derived from public values. Final report PR 78-20-80R, 536 (UCRL--15143)
RADIOACTIVE WASTE MANAGEMENT/PUBLIC RELATIONS
Department of Energy low-level waste management strategy, 416 (CONF-800607--27)
Public information on radioactive waste: a study of an emerging issue, 489 (ORNL/OIAPA--13)
RADIOACTIVE WASTE MANAGEMENT/RADIATION HAZARDS
Radiological health and safety impact, 450 (INFCE/DEP/WG--7/15)
RADIOACTIVE WASTE MANAGEMENT/RADIOACTIVE WASTE DISPOSAL
Environmental development plan. LWR commercial waste management, 1444 (DOE/EDP--0063)
Overview of radioactive waste management, 415 (CONF-800535--3)
RADIOACTIVE WASTE MANAGEMENT/RECOMMENDATIONS
Nuclear-waste problems still await solutions, 3113
Radioactive waste management. Summary of the report of an expert group who studied the 1959 White Paper - The control of radioactive wastes, 549

RADIOACTIVE WASTE MANAGEMENT/REGULATIONS
What to do with the radioactive waste. (In Sweden), 2146
RADIOACTIVE WASTE MANAGEMENT/RESEARCH PROGRAMS
Activities of the IAEA in the fields of radioactive wastes handling, 456 (INIS-mf--5570)
Community's R and D programme on radioactive waste management and storage. 1977 2. annual progress report, 1480 (EUR--6128)
DOE program for the management of radioactive waste and spent reactor fuel, 2382
European joint energy research stresses nuclear safety, 3052
High-level waste program progress report, April 1, 1980-June 30, 1980, 918 (ORNL/TM--7476)
Nuclear Science and Technology Branch report 1977. Research Establishment site management, 3018 (AAEC/PR--44S)
Nuclear waste management technology development activities. Progress report, January-December 1978, 468 (LA--7921-PR)
Nuclear waste management. Quarterly progress report, April-June 1979, 507 (PNL--3000-2)
Nuclear waste management. Quarterly progress report, July-September 1979, 508 (PNL--3000-3)
Nuclear waste management. Quarterly progress report, October-December 1979, 509 (PNL--3000-4)
Nuclear waste management. Quarterly progress report, January-March 1980, 510 (PNL--3000-5)
Rockwell Hanford Operations process technology and process development. Semiannual report, April-September 1979, 74 (RHO-LD--79-3B)

RADIOACTIVE WASTE MANAGEMENT/SLUDGES
Waste sludge resuspension and transfer: development program, 1678 (ORNL/TM--7125)
RADIOACTIVE WASTE MANAGEMENT/SOCIOLOGY
Procedures for aggregating citizen preferences in the context of the nuclear waste management problem. Final report, 538 (UCRL--15214)
RADIOACTIVE WASTE MANAGEMENT/SOLID WASTES
Practical guidelines for radioactive waste management, 576
RADIOACTIVE WASTE MANAGEMENT/SPENT FUELS
Disposal of spent nuclear fuel, 1630 (ONWI--59)
National perspective on waste management, 435 (DP-MS--80-73)
Spent fuel storage. Facts booklet, 1456 (DOE/NE--0005)
RADIOACTIVE WASTE MANAGEMENT/STANDARDIZED TERMINOLOGY
Nuclear waste management terminology, 567
RADIOACTIVE WASTE MANAGEMENT/STANDARDS
Development of criteria and standards for management of low-level radioactive waste, 442 (EGG-WM--5233)
RADIOACTIVE WASTE MANAGEMENT/SYSTEMS ANALYSIS
Influence of system considerations on waste form design, 402 (CONF-790420--)
RADIOACTIVE WASTE MANAGEMENT/TECHNOLOGY ASSESSMENT
Assessment of waste management of volatile radionuclides, 496 (ORP/CSD--79-2)
Systematic approach for assessment of alternative nuclear waste management strategies, 408 (CONF-791112--66)
RADIOACTIVE WASTE MANAGEMENT/TRANSURANIUM ELEMENTS
National perspective on waste management, 435 (DP-MS--80-73)
Transuranic contaminated waste functional definition and implementation, 2058 (UCRL--15229)
Transuranic contaminated waste container characterization and data base. Revision I, 1008 (UCRL--15253)
US Department of Energy acceptance of commercial transuranic waste, 1802 (RFP--3110)
RADIOACTIVE WASTE PROCESSING
Behaviours of trinitratonitrosyl complexes of ruthenium in dilute nitric acid solutions, 1127
Canadian development program for conditioning Candu reactor wastes for disposal, 1340
Chemistry research and development. Progress report, December 1978-May 1979, 249 (RFP--2982)
Collect and treatment of radioactive wastes in low activity laboratories, 626 (CEA-CONF--4677)
Conditioning highly radioactive solidified waste, 3463
Desactivation of liquid radioactive wastes of low and medium activity (Research in CMEA countries), 1507 (INIS-mf--5570)
Development of techniques for radwaste systems in CANDU power stations, 2773 (AECL--6534)
Experience in decontamination and waste handling at a shut-down plant for regeneration of spent fuel elements, 1243
Impact of decontamination on LWR radioactive waste treatment systems, 2677 (PNL-SA--7535)
Method to recover nuclear fuel from waste material and device to carry out the method (Patent), 1187
Multibarrier waste forms. Part III: Process considerations (Uncoated or coated glass/supercalcine), 931 (PNL--2668-3)
Nuclear power plant (Patent), 2855
Nuclear Waste Management Program summary document, FY 1981, 421 (DOE/NE--0008)
Operation experience in plants for desactivation of radioactive wastes of low and medium activity in Romania, 804 (INIS-mf--5570)
Operation experience of radioactive wastes purification station at the Institute for nuclear research in Rez (Czechoslovakia), 818 (INIS-mf--5570)
Present situation of treatment of radioactive wastes in research institutions, 1323
Problem of detoxication of cyanide-containing radioactive waste. A bibliographic survey, 1217
Process for reducing the volume of radioactive organic wastes (Patent: decomposition with concentrated H_2SO_4 and H_2O_2), 1367
Purification of radioactive sewage containing large quantities of detergents, 2932 (INIS-mf--5570)
Radioactive waste: availability of solutions, 703 (DOE/EV--0046(Vol.2))
Radioactive krypton and xenon in nuclear power plant fuel cycle, 1206
Radioactive wastes. Chapter 9, 1270
Radioactive liquid waste processing method (Patent), 1064
Radiochemical separation of plutonium from low-activity waste waters, 783 (INIS-mf--4637)
Radiochemical problems in atomic energy and the role of nuclear power plants research institute in their solution, 579
Treatment and ultimate storage of radioactive waste, 608 (AED-Conf--76-760-000)
Treatment of low radioactive liquid waste by compounds having an enhanced affinity for the contaminants, 1271
Treatment of radioactive wastes at the Czechoslovak nuclear power station, 2981
Unit operations used to treat process and/or waste streams at nuclear power plants, 2921 (CONF-800802--14)
Volume reduction of contaminated metal waste (Sorting, size reduction, drip melting, induction melting), 674 (CONF-800313--2)
Volume reduction, a safer and cheaper way of radwaste management, 1274
Waste water treatment installation (Patent), 1333
Work within the coordinated programme on environmental evaluation and hazard assessment of the separation of the actinides from the high-level waste from fuel reprocessing followed by either transmutation or separate disposal. Final report for the period 1 November 1976 - 31 October 1977, 449 (IAEA-R--1898-F)
RADIOACTIVE WASTE PROCESSING/ACTINIDES
Actinide partitioning flowsheets, 1044
Method for the recovery of actinide elements from nuclear reactor waste (Patent), 1114
Removal of actinides from nuclear reprocessing wastes: a pilot plant study using non-radioactive simulants, 1440 (CONF-800918--3)
Separation of actinides from Purex-type high active waste raffinates: development of experimental studies at JRC-ISPRA establishment, 1047
Solidification of ICPP actinide partitioning solutions, 771 (ENICO--1062)
RADIOACTIVE WASTE PROCESSING/ADSORBENTS
Development of ultrafiltration and adsorbents: October 1979-March 1980, 896 (MLM--2735)
RADIOACTIVE WASTE PROCESSING/ADSORPTION
Adsorption-clathrates system for cleaning discharge gases on regeneration of spent reactor fuels, 848 (INIS-mf--5574)

Application of sorption methods for liquid radioactive wastes processing, 815 (INIS-mf--5570)
Attempt to optimize the conditions for cleaning waste solutions from tissue decontamination, 1281
Catching of radioactive iodine and iodine compounds by nonorganic sorbents, 838 (INIS-mf--5574)
Collection efficiency of TEDA-impregnated actived charcoal for low concentration of methyl iodide in air, 857 (JAERI-M--8158)
Development of ultrafiltration and adsorbents: April-September 1979, 889 (MLM--2684)
Development of the catalog for ordinary sorption agents for low activity sewage purification, 807 (INIS-mf--5570)
Development of sorption agents on the basis of transitition metals hydroxides and investigations on the machanisms of the first and second group elements sorption from solutions with high salt content by means of these sorbents, 817 (INIS-mf--5570)
Elimination of manganese-54 in waste water by oxine-impregnated activated charcoal, 1168
Experiments on the adsorptive removal of rare gases from the gaseous waste of a fuel reprocessing plant, 1308
Functionalized glass beads for the recovery of waste radioactive elements. Final report (Fixation of EDTA on beads for sorbing Pu, U, Cs, Sr), 710 (DOE/SR/00968--6)
Investigation on possibilities of application of the Bulgarian natural sorbents for desactivation of liquid radioactive wastes of medium and low level of activity, 806 (INIS-mf--5570)
Investigation on natural calcium clinoptilolite intended for its application for purification of water containing cesium, strontium and cobalt isotopes, 811 (INIS-mf--5570)
Method of processing radioactive gas (Patent), 1297
Nonorganic selective adsorption agents and experience of their application for desactivation of low activity wastes having heightened salts concentration, 816 (INIS-mf--5570)
NRI's research on radioactive wastes, 781 (INIS-mf--4551)
Process for the removal of iodine and iodine compounds from gases and vapours and sorption agents impregrated with silver nitrate to carry out the process (Patent), 1120
Purification of low level activity water by means of selective sorbents, 803 (INIS-mf--5570)
Removal of radioiodine species from gaseous stream on inorganic absorbents. Final report for the period 1 November 1976 - 31 October 1977, 49 (IAEA-R--1841-F)
System for processing gaseous waste of resin-regeneration (Patent), 1192

RADIOACTIVE WASTE PROCESSING/AEROSOL WASTES
Investigations on methods and means for removal of radioactive aerosols and gases from air discharges for period of 1971 - 1975, 837 (INIS-mf--5574)
Investigations of radioactive iodine catching by ventilation system of the Ewa and Marila reactors, 850 (INIS-mf--5574)

RADIOACTIVE WASTE PROCESSING/AIR POLLUTION
Characterization of gaseous and particulate effluents from the nuclear vitrification project, 944 (PNL--3181)

RADIOACTIVE WASTE PROCESSING/ALPHA-BEARING WASTES
Application of extraction chromatography to the recovery of neptunium, plutonium and americium from an industrial waste, 1023
Reducing the long-term hazard of reactor waste through actinide removal and destruction in nuclear reactors, 1024

RADIOACTIVE WASTE PROCESSING/AMMONIUM NITRATES
Method to process the ammonium nitrate occuring in the manufacture of fuels or breeder materials for nuclear reactors (Patent), 1350

RADIOACTIVE WASTE PROCESSING/ANAEROBIC DIGESTION
Effect of gamma radiation on yields of methane gas from the anaerobic bacterial digestion of sewage sludge, 1348

RADIOACTIVE WASTE PROCESSING/ANIMALS
Microwave evaporation system for the waste treatment of radioactive animals. Application to the waste animals containing tritium or carbon-14 (Japan), 1218

RADIOACTIVE WASTE PROCESSING/ASHES
Pelletized waste form demonstration program, October 1979-March 1980, 894 (MLM--2717)

RADIOACTIVE WASTE PROCESSING/BIBLIOGRAPHIES
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
Radioactive waste processing and disposal (4144 citations), 899 (NUREG--0643)
Radioactive waste processing and disposal, 478 (NUREG--0644)
Radioactive waste management integrated data base: a bibliography, 494 (ORNL/TM--7385/V2)
Recovery of actinoids from waste solutions of fuel reprocessing. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, 2, 859 (JAERI-M--8339)
Selected, annotated bibliography of studies relevant to the isolation of nuclear wastes (705 references), 1665 (ORNL/EIS--156/V1)

RADIOACTIVE WASTE PROCESSING/BIOADSORBENTS
Microbial uptake of uranium, cesium, and radium, 681 (CONF-800814--12)

RADIOACTIVE WASTE PROCESSING/BIOLOGICAL WASTES
Studies on treatment of radioactive animal carcass, (1). A proposal of multi-step processing and its prospect, 1198

RADIOACTIVE WASTE PROCESSING/CALCINATION
Applied laboratory research of high-level waste denitration and calcination technologies. Progress report, 1011 (UJV--4113-Ch)
Calcination of sodium-bearing waste using non-radioactive additives, 768 (ENICO--1043)
Calcining sodium-bearing waste by blending with zirconium fluoride waste, 758 (ENICO--1006)
Cleaning of gaseous wastes produced during operation of the installation for desactivation of radioactive wastes, 869 (INIS-mf--5574)
Corrosion experience in calcination of liquid nuclear waste, 673 (CONF-800305--4)
Engineering-scale vitrification of commercial high-level waste, 949 (PNL--3375)
Method for calcining radioactive wastes (Patent), 2219
Method for calcining radioactive wastes (Patent), 1204
Product removal nozzles for a fluidized-bed calciner, 763 (ENICO--1035)
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
Vitrification of radioactive high-level waste by spray calcination and in-can melting, 943 (PNL--3145)
WCF feed chemistry studies, 760 (ENICO--1016)

RADIOACTIVE WASTE PROCESSING/CARBON 14
Method of immobilizing carbon dioxide from gas streams (Patent), 1113

RADIOACTIVE WASTE PROCESSING/CENTRIFUGATION
Crud removal equipment using a centrifugal clarifier, 2982
Theoretical considerations in solid bowl centrifugation, 979 (RHO-CO--783)

RADIOACTIVE WASTE PROCESSING/CERAMIC MELTERS
Safety assessment of the liquid-fed ceramic melter process, 953 (PNL--3493)

RADIOACTIVE WASTE PROCESSING/CHEMISORPTION
Fixation mechanism between zeolite and some radioactive elements, 1336
Iodine 129 trapping in irradiated fuel reprocessing plants, 121
Removal of low-level radioactivities from aqueous waste solutions with activated carbon, 1079

RADIOACTIVE WASTE PROCESSING/COMBUSTION
Beta-gamma contaminated solid waste incinerator facility, 747 (DPSTD--79-34)
Cleaning of stack gases from combustion of low level radioactive waste in Studsvik, Sweden, 1006 (STUDSVIK/K1/4--79/31)
Combustible radioactive waste treatment by incineration and chemical digestion, 777 (HEDL-SA--2064)
Combustion of waste in a 60-liter drum. Status report, March 1978, 1076 (MLM--2663(TR))
Commercial Cyclone Incinerator Demonstration Program: April-September 1979, 886 (MLM--2667)
Commercial cyclone incinerator demonstration program: October 1979-March 1980, 895 (MLM--2731)
Commercial cyclone incinerator demonstration program: October 1979-March 1980, 892 (MLM--2713)
Conceptual design report for alpha waste incinerator, 744 (DPE--3584)
Controlled-air incineration of alpha-bearing solid wastes, 883 (LA-UR--80-1428)
Correlation of leachant analyses and weight loss measurements in the leaching of high-iron synthetic basalts, 690 (CONF-801206--2)
Defense transuranic waste at the Savannah River Plant, Aiken, South Carolina. Supplemental alternatives for long-term management, 423 (DOE/SR-WM--79-1(Suppl.))
Defense waste cyclone incinerator demonstration program: April-September 1979, 888 (MLM--2672)
Defense waste cyclone incinerator demonstration program: October 1979-March 1980, 893 (MLM--2716)
Design of an experimental incinerator for alpha waste, 716 (DP--1521)
Elaboration and operation experience of two chamber plant for wastes burning, 814 (INIS-mf--5570)
Electric controlled air incinerator for radioactive wastes (Patent), 1380
Evaluation of refractory materials for a nuclear waste incinerator, 972 (RFP--2969)
Incineration of wastes from nuclear installations with the Juelich incineration process, 1072
Incineration of radioactive wastes in shaft furnaces, 1073
Incineration of combustible waste at a reactor site, 2979
Incineration of LWR-type waste at Mound Facility, 898 (MLM--2775(OP))
Low-level waste institutional waste incinerator program, 756 (EGG-WM--5116)
Off-gas treatment system for INEL radioactive slagging pyrolysis incinerator, 1249
Operating experience and economic evaluation of the process of radioactive waste combustion in shaft furnaces, 1057
Operation of a prototype alpha solid waste incinerator, 1263
Organic waste process containing at least one radioactive element (Patent), 1363

Overview of the incinerator offgas system study, 878 (LA-UR--80-696)
Purification of off-gases in a metal-cloth filter while burning solid wastes, 1327
R and D for an off-gas treatment system for a slagging pyrolysis radioactive waste incinerator. Final report for Phase III, 995 (SAI--132-79-764-LJ)
Radioactive waste incineration studies at the Los Alamos Scientific Laboratory, 882 (LA-UR--80-1408)
Radioactive waste incineration studies at the Los Alamos Scientific Laboratory, 1268
Remotely operated organic liquid waste incinerator for the fuels and materials examination facility, 776 (HEDL-SA--2009-FP)
SPI Project Criticality Task Force initial review and assessment, 748 (EGG--2017)
USDOE radioactive waste incineration technology: status review, 877 (LA-UR--80-692)
Waste management program technical progress report, October-December 1978, 427 (DP--78-125-4)

RADIOACTIVE WASTE PROCESSING/COMPACTING
Comparative evaluation of radioactive materials management by different methods: Pt. 1. Quantitative comparison of the different methods used for the reduction of the volume of α contaminated solid wastes, 772 (EUR--5785)
Method of treating radioactive waste material (Patent), 1037
Pelleted waste form for high-level ICPP wastes, 392 (CONF-790420--)
Storage preparation process of fractionated solid materials (compacting; patent), 1364

RADIOACTIVE WASTE PROCESSING/COMPARATIVE EVALUATIONS
Decontamination of waste radioactive polluted solutions in radiation treatment, 3659
Preliminary evaluation of alternative waste form solidification processes. Volume II. Evaluation of the processes, 952 (PNL--3477)
TRU waste processing comparison: slagging pyrolysis versus modified glassmaker, 755 (EGG-WM--5103)

RADIOACTIVE WASTE PROCESSING/CONTAINERS
Filters used in the processing of radioactive fluids (Patent), 1370

RADIOACTIVE WASTE PROCESSING/CONTROL ELEMENTS
Packaging, transportation and disposal of reactor core components, 630 (CONF-780506--(Vol.2))

RADIOACTIVE WASTE PROCESSING/CONTROL SYSTEMS
Method and device for controlling the radioactive liquid wastes processing systems (Patent), 1133

RADIOACTIVE WASTE PROCESSING/COORDINATED RESEARCH PROGRAMS
Long-term high-level waste technology. Composite quarterly technical report, January-March 1980, 715 (DP--80-157-1)

RADIOACTIVE WASTE PROCESSING/COPRECIPITATION
Coprecipitation process studies of liquid uranium waste by using many kinds flocculents, 961 (PPGM-L--165-78)
Effects studies of H_2SO_4/Na_2SO_4 on separation of Sr-90 from liquid Sr-90 waste by coprecipitation method using $BaSO_4$ as a carrier, 962 (PPGM-L--181-78)
Process for decontaminating a radioactive effluent in particular ruthenium (Patent), 1366
Treatment of liquid effluents of reprocessing plants by a chemical process: French experience, 34 (CEA-CONF--4241)

RADIOACTIVE WASTE PROCESSING/COST
Cost-efficiency analysis and radioprotection of the public. The application to the case of radioactive effluents by the U.S. Environmental Protection Agency, 1220
Possible treatment of radioactive waters from the uranium mine Hamr u Ceske Lipy, 698 (CS-INIS--258)

RADIOACTIVE WASTE PROCESSING/CUTTING TOOLS
Development and verification test on remote plasma cutting of large metallic waste, 1131

RADIOACTIVE WASTE PROCESSING/DECONTAMINATION
Defense transuranic waste at the Savannah River Plant, Aiken, South Carolina. Supplemental alternatives for long-term management, 423 (DOE/SR-WM--79-1(Suppl.))
Method for cleaning liquid wastes contaminated with radioactive material (PWR type reactors, patent), 2735
Method of processing laundry drain (Patent), 1083
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 5, 841 (INIS-mf--5574)
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 3. Burial of all types of radioactive wastes in geological formations, 835 (INIS-mf--5572)
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Proceedings of the 4-th scientific and technical conference of CMEA. Moscow, 20 - 23 december 1976. Part 1. Processing of liquid radioactive wastes of low and medium activity, 802 (INIS-mf--5570)

RADIOACTIVE WASTE PROCESSING/DEHYDRATION
Studies on the removal of hydrophilic radioactive substances from radioactive waste, 1130

RADIOACTIVE WASTE PROCESSING/DEMONSTRATION PROGRAMS
Pelletized waste form demonstration program, October 1979-March 1980, 894 (MLM--2717)

RADIOACTIVE WASTE PROCESSING/DENITRATION
Applied laboratory research of high-level waste denitration and calcination technologies. Progress report, 1011 (UJV--4113-Ch)
Effect of platinum group elements on denitration of high-level liquid waste with formic acid, 1306
Effects of nitrite on denitration of nuclear fuel reprocessing waste with organic reductants, 1149
Effects of nitrite on denitration of nuclear fuel reprocessing waste with organic reductants, 1155
Method for the denitration of highly radioactive waste solutions (Patent), 1099
Process for decomposing nitric acid and/or nitric acid ions (Patent), 1304
Setting up of reaction model for the denitration of effluents from the processing of nuclear fuels, 1128

RADIOACTIVE WASTE PROCESSING/DENITRIFICATION
Advanced biological treatment of aqueous effluent from the nuclear fuel cycle, 1435 (CONF-800334--3)

RADIOACTIVE WASTE PROCESSING/DIALYSIS
Removal of radioactive ions from nuclear waste solutions by electrodialysis, 1307

RADIOACTIVE WASTE PROCESSING/DIGESTION
Operation of the radioactive acid digestion test unit, 775 (HEDL-SA--1967)
RADTU; acid digestion, 448 (HEDL-TME--79-15)

RADIOACTIVE WASTE PROCESSING/DISSOLUTION
Actinide recovery from combustible waste: the Ce(IV)-NHO_3 system. Final report, 969 (RFP--2907)
Waste management analysis for the nuclear fuel cycle: actinide recovery from combustible waste, October 1977-March 1978, 967 (RFP--2798)

RADIOACTIVE WASTE PROCESSING/DOSE RATES
Absorption dose rate in great bitumen blocks. Experimental detection, 2554 (SGAE--2889)

RADIOACTIVE WASTE PROCESSING/DRYING
Microwave energy for post-calcination treatment of high-level nuclear wastes, 682 (CONF-800914--3)

RADIOACTIVE WASTE PROCESSING/ECONOMIC ANALYSIS
Back-end fuel cycle costs for alternative fuels, 2837 (CONF-800943--(Summ.))

RADIOACTIVE WASTE PROCESSING/ECONOMICS
Safety aspects of light water reactor radwaste solidification processes, 1061

RADIOACTIVE WASTE PROCESSING/EFFICIENCY
^{14}C behavior in HTR fuel reprocessing and preliminary evaluation of its release reduction process, 2431 (JAERI-M--7962)
Technique of masuring deactivation efficiency of water treatment equipment in nuclear power facilities by gamma spectrometric analysis, 692 (CS-INIS--258)

RADIOACTIVE WASTE PROCESSING/ELECTROLYSIS
Volume reduction system of radioactive waste by electrodialysis, 1185

RADIOACTIVE WASTE PROCESSING/ELECTROPHORESIS
Separation of actinides from high active waste by means of counter current ion migration, 1048

RADIOACTIVE WASTE PROCESSING/ELECTROPOLISHING
In situ nondestructive plutonium assay for an electropolishing bath, 1255

RADIOACTIVE WASTE PROCESSING/ENCAPSULATION
Ceramic encapsulation of nuclear fuel wastes, 1041
Charging Facility for drums with radioactive content (Patent), 1295
Chemical Engineering Division Fuel Cycle Programs. Quarterly progress report, April-June 1978, 32 (ANL--78-76)
Chemical Engineering Division fuel cycle programs. Quarterly progress report, July-September 1978, 33 (ANL--79-6)
Chemical stability of ceramics, 462 (KBS-TR--113)
Demonstrate fuel disassembly/encapsulation. Technical progress report, July 1980-September 1980, 614 (AGNS--47921-3026-TPR-2)
Development of multibarrier nuclear waste forms, 1232
Immobilization of hazardous residuals by encapsulation. Final technical report, 925 (PB--296642)
Metal encapsulation of ceramic nuclear waste, 1223
Method for encapsulation of high level radioactive nuclear fuels or wastes (Patent), 1062
Method of treating radioactive waste material (Patent), 1037
Nuclear fuel cycle studies, 376 (ANL--80-66)
Porous glass matrix method for encapsulating high-level nuclear wastes, 656 (CONF-790420--)
Preliminary safety evaluation of a commercial-scale krypton-85 encapsulation facility, 688 (CONF-801038--7)
Procedure in encapsulation of radioactive wastes (Patent) 1081
Radioactive waste disposal (Patent), 1088
Safe encapsulation of nuclear fuel waste. ASEA plant soon in full scale production, 1349
Studies of ceramic materials for incapsulation of high-active waste, 465 (KBS-TR--113)

RADIOACTIVE WASTE PROCESSING/EQUIPMENT
Device to draw off one or several phases (Patent), 1172

RADIOACTIVE WASTE PROCESSING/EVAPORATION
Apparatus for extreme evaporation of special solutions, 1015
Concentration of liquid radioactive wastes by evaporation at the temperature below boiling point, 813 (INIS-mf--5570)
Double shell slurry process test evaluation, 977 (RHO-CD--394)
Experience on operation of pilot plant for concentration of liquid radioactive wastes by means of evaporation

at the temperature below boiling point, 808 (INIS-mf--5570)
Process and device for concentrating liquid radioactive waste (Patent), 1214
Process and installation for the disposal of liquid radioactive waste (Patent), 3454
Wiped-film evaporators for evaporating alkaline light water reactor radioactive wastes, 1182
RADIOACTIVE WASTE PROCESSING/EVAPORATORS
Apparatus for extreme evaporation of special solutions, 1015
RADIOACTIVE WASTE PROCESSING/FEASIBILITY STUDIES
Actinide partitioning-transmutation program final report. III. Transmutation studies, 912 (ORNL/TM--6983)
RADIOACTIVE WASTE PROCESSING/FILTRATION
Determination of the aerosol filters efficiency by means of the tracer techniques, 845 (INIS-mf--5574)
Filtration of radioactive water, 1166
Gas filter and device intended for removing from the housing the absorbant and granular matter (Patent), 1318
Investigation on electrostatic interaction of aerosols particles and aerosol filters materials, 846 (INIS-mf--5574)
Purification of off-gases in a metal-cloth filter while burning solid wastes, 1327
RADIOACTIVE WASTE PROCESSING/FISSION PRODUCTS
Process for packaging fission products resulting from reprocessing by dry methods (Patent), 1360
RADIOACTIVE WASTE PROCESSING/FLOCCULATION
Coprecipitation process studies of liquid uranium waste by using many kinds flocculents, 961 (PPGM-L--165-78)
Method for continuous recovery of fine-grained radioactive raw materials from waste sludges (Patent), 2386
RADIOACTIVE WASTE PROCESSING/FLOTATION
Application of heterogeneous flotation for separation of some long living fission products, 810 (INIS-mf--5570)
Ionic flotation of strontium 89, 1161
RADIOACTIVE WASTE PROCESSING/FLUIDIZED-BED COMBUSTION
Combustion of ion-exchange materials in fluidized bed. Final report, 965 (PRAV--1.32)
Data acquisition and control instrumentation for fluidized bed incineration system, 974 (RFP--3013)
Description of an incinerator for phosphorus-containing radioactive solvents, 1059
Fluidized bed incineration of transuranic waste, 975 (RFP--3030)
Fluidized bed incineration process design for transuranic waste, 970 (RFP--2945)
Incineration of contaminated organic solvents in a fluidized-bed calciner, 687 (CONF-801038--6)
Volume reduction and solidification of liquid and solid low-level radioactive waste, 1273
RADIOACTIVE WASTE PROCESSING/FUEL CHANNELS
Packaging, transportation and disposal of reactor core components, 630 (CONF-780506--(Vol.2))
RADIOACTIVE WASTE PROCESSING/GASEOUS WASTES
Advances in the fluorocarbon process for decontamination of nuclear facility off-gas (R-12 (dichlorodifluoromethane)), 864 (K/ET--5010)
Analysis of barium hydroxide and calcium hydroxide slurry carbonation reactors, 908 (ORNL/MIT--300)
Apparatus for reducing radioactive gaseous wastes (Patent), 1302
Assessment of the acceptability of performance of installed iodine trapping plant, 3225 (ND-R--52(W))
Capture of ruthenium, iodine and triyium from discharge gases, produced during the process of dissolution at the device SU-2 of spent fuel elements from nuclear power plant with WWR reactors, 843 (INIS-mf--5574)
Cleaning of gaseous wastes produced during operation of the installation for desactivation of radioactive wastes, 849 (INIS-mf--5574)
Decontamination and disposal of radioactive wastes from nuclear facilities, 694 (CS-INIS--258)
Gas-absorption process (DOE patent), 1287
Investigation of krypton and xenon capture from discharge gases, produced during the process of dissolution at the device SU-2 spent fuel elements from the nuclear power plant with WWR reactors, 844 (INIS-mf--5574)
Iodine evolution from nuclear fuel dissolver solutions by air sparging, 39 (CONF-800802--18(Draft))
Kinetics of iodine removal by washing with water, 1332
Method for retention of tritium released during reprocessing spent nuclear fuel and storing the liquid radioactive waste produced thereby (Patent), 1311
Method of purifying gases from reprocessing of spent fuel elements containing radioactive substances (Patent), 1312
Organic iodine removal from simulated dissolver off-gas streams using silver-exchanged mordenite, 685 (CONF-801038--1(Draft))
Process for the decontamination of waste gases of a reprocessing plant for spent fuel and/or fertile material and installation for its realisation (Patent), 88
Processes for the control of $^{14}CO_2$ during reprocessing, 672 (CONF-800211--2(Draft))
Progress towards the use of disposable filters, 610 (AERE-M--3012)
Radioactive gaseous waste processing facilities in nuclear power plants (Patent), 1119
Radiochromatographic system for off-gas decontamination at the WWER nuclear power plants, 2753
Removal of tritium and tritium-containing compounds from a gaseous stream (Patent), 2657
Scrubbing of iodine from gas streams with mercuric nitrate-conversion of mercuric iodate product to barium iodate for fixation in concrete, 914 (ORNL/TM--7102)
Separation of krypton and xenon from the offgas of nuclear facilities, 870 (KFK--2600)
Solidification device for radioactive gaseous wastes (Patent), 1136
Spray calcination/in-can melting: effluent characterization and treatment, 941 (PNL--3109)
Technical feasibility of krypton-85 storage in sodalite, 665 (CONF-791112--17)
Treatment and storage of radioactive gases from nuclear facilities, 547
Types and properties of solid and gaseous wastes produced during experimental fluoride-gaseous regeneration of the BOR-60 reactor fuel, 61 (INIS-mf--5571)
User's guide to the programs ITRAP-A, ITRAP-B, ITRAP-S and ITRAP-L, 3226 (ND-R--53(W))
RADIOACTIVE WASTE PROCESSING/HEALTH HAZARDS
Unconventional waste treatment and disposal methods, 1040
RADIOACTIVE WASTE PROCESSING/HIGHLEVEL RADIOACTIVE WASTES
Clay-phosphate ceramics and vitromets: alternatives to monolithic high level waste glass products, 1233
Conditioning of HLW-calcines. 1. Pyrocarbon coating, 998 (SGAE--2864)
Conditioning of HLW-calcines. 2. Nickel coating, 999 (SGAE--2932)
Current views on the importance of separating long-lived alpha emitters from high-level wastes from spent fuel reprocessing, 1105
Development of multibarrier nuclear waste forms, 1232
Development of multibarrier nuclear waste forms, 955 (PNL-SA--7292)
Development of suitable vitrified radioactive waste products with low formation temperatures and improved leach resistance - a practical approach, 619 (BARC--1028)
Development of a pelleted waste form for high-level alumina wastes, 770 (ENICO--1051)
Development of the in-can melting process for vitrification of Savannah River Plant waste, 740 (DP-MS--80-49)
Effects of nitrite on denitration of nuclear fuel reprocessing waste with organic reductants, 1155
Evaluation and review of alternative waste forms for immobilization of high level radioactive wastes, 713 (DOE/TIC--11219)
Experimental equipment for the study of high-level waste fixation, 1070
Further developments of borosilicate glass for the nitrification of high-level fission product solutions, 1032
Glass as a material for the final disposal of fission products, 1342
Glass as a matrix for SRP high-level defense waste, 745 (DPST--79-294)
Handling of spent nuclear fuel and final storage of vitrified high level reprocessing waste. Nuclear Fuel Safety Project, 2337
High-level waste immobilization program: an overview, 940 (PNL--3094)
High-level waste solidification - why we chose glass, 613 (AERE-R--9432)
High-level nuclear waste immobilization program, 735 (DP-MS--80-25)
High level waste properties, 959 (PNL-SA--8085)
High-level waste program progress report, April 1, 1980-June 30, 1980, 918 (ORNL/TM--7476)
High-level waste solidification: why we chose glass, 1021
Hot isostatic pressing for the consolidation and containment of radioactive waste, 1235
HTGR reprocessing wastes and development needs, 709 (DOE/SF/71053--T1)
Long-term high-level defense waste technology progress report, October-December 1979, 982 (RHO-LD--80-101-A)
Long-term high-level waste technology. Composite quarterly technical report, January-March 1980, 715 (DP--80-157-1)
Management of high-level radioactive wastes, 1106
Metal encapsulation of ceramic nuclear waste, 1223
Method for the disposal of especially radioactive wastes (Patent), 1359
Method for the covering of a body including radioactive wastes with a layer of some corrosion resistant material (Patent), 1178
Method for encapsulation of high level radioactive nuclear fuels or wastes (Patent), 1062
Method for the recovery of actinide elements from nuclear reactor waste (Patent), 1114
Method for the denitration of highly radioactive waste solutions (Patent), 1099
Method for anchoring radioactive substances in a body resistant to leaching by water (Patent), 1075
Method to encapsulate spent fuel elements or high-level radioactive wastes (Patent), 1177

Outline of the Chemical Processing Facility (CPF), 1315
Overview of high-level waste management accomplishments, 675 (CONF-800313--3)
Phase separation in the glass containing high level radioactive waste, 1152
Preliminary evaluation of alternative waste form solidification processes. Volume II. Evaluation of the processes, 952 (PNL--3477)
Procedure in encapsulation of radioactive wastes (Patent), 1081
Processing of radioactive ruthenium with aluminosilicate gels, 1096
Progress on the cermet approach to nuclear waste management, 1251
Radiation damage of organic extractant in partitioning of high-level liquid waste, (2). Calculation of radiation dose absorbed in organic solvent in extraction process, 1170
Reducing the long-term hazard of reactor waste through actinide removal and destruction in nuclear reactors, 1024
Remote experimental facility to solidify SRP high-heat waste, 1266
Removal of radionuclides from Hanford defense waste solutions, 983 (RHO-SA--51)
Removal of radionuclides from the water-soluble fraction of Hanford Nuclear Defense Wastes, 988 (RHO-SA--145)
Safe handling and storage of high level radioactive waste. A condensed version of the proposals of the Swedish KBS-Project regarding reporcessing waste, spent fuel, 786 (INIS-mf--5013)
Safety assessment of the liquid-fed ceramic melter process, 953 (PNL--3493)
Separation of americium, curium, and rare earths from high-level wastes by oxalate precipitation: experiments with synthetic waste solutions, 910 (ORNL/TM--6445)
Separation of transplutonium and rare-earth elements by extraction with di-isodecyl phosphoric acid from DTPA solution, 1153
Small-scale demonstration of high-level radioactive waste processing and solidification using actual SRP waste, 733 (DP-MS--80-2)
Small-scale integrated demonstration of high-level radioactive waste processing and vitrification using actual SRP waste, 742 (DP-MS--80-60)
Solidification of high-level wastes from reprocessing, 780 (INFCE/DEP/WG--7/7)
Structures and stability of media intended for the immobilization of high level radioactive waste, 628 (CEGB-RD-B-N--4573)
Study of phosphate systems for high-level waste solidification. Part I, 1012 (UJV--4663-Ch)
Summary of research and development activities in support of waste acceptance criteria for WIPP, 1926 (SAND--79-1305)
Techniques for high level waste solidification in Europe (AVM, HARVEST, and PAMELA processes), 1225
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
Titanate waste forms for high level waste: an evaluation of materials and processes, 997 (SAND--80-1376C)
Treatment and disposal of radioactive wastes from the viewpoint of the NUCLEX 78, 1031
US program for the immobilization of high-level nuclear wastes, 1139
Vitrification of high-level alumina nuclear waste, 666 (CONF-791112--43)
Vitrification of actual high-level waste from LWR fuel, 1267
Vitrification of transuranic and beta-gamma contaminated solid wastes, 720 (DP--1553)
Volatilities of ruthenium, iodine, and technetium on calcining fission product nitrate wastes, 686 (CONF-801038--4)
Volatility of ruthenium-106, technetium-99, and iodine-129, and the evolution of nitrogen oxide compounds during the calcination of high-level, radioactive nitric acid waste, 903 (ORNL--5562)
Volatility of alkali fission products during solidification process, 854 (INKA-Conf--79-003-015)
Waste treatment research and development, 704 (DOE/EV--0046(Vol.2))

RADIOACTIVE WASTE PROCESSING/HYDROLYSIS
Long-term disposal of enrichment plant tails, 779 (INFCE/DEP/WG--7/4)

RADIOACTIVE WASTE PROCESSING/INCINERATORS
Combustible radioactive waste treatment by incineration and chemical digestion, 777 (HEDL-SA--2064)
Combustion furnace for wastes (Patent), 1202
Method and combustion furnace for burning waste (Patent), 1203

RADIOACTIVE WASTE PROCESSING/INTERMEDIATELEVEL RADIOACTIVE WASTES
Description of the R + D-work and the inactive and active test period of the Eurobitum/Eurostorage facility, 873 (KFK--2765)
HTGR reprocessing wastes and development needs, 709 (DOE/SF/71053--T1)
Immobilization of strontium and cesium in intermediate-level liquid wastes by solidification in cements, 1238
Investigations on the extraction of Pu from MAW, 609 (AED-Conf--78-274-018)
Material studies on solidification of medium-level waste solutions with cement: leachability of cesium and strontium, 1039 (PNL-TR--387)
Process for processing and conditioning radioactive effluents of low and medium activity (Patent), 1066
Treatment and disposal of radioactive wastes from the viewpoint of the NUCLEX 78, 1031

RADIOACTIVE WASTE PROCESSING/IODINE
Separation of iodine from mercury containing scrubbing solutions (Patent), 1115

RADIOACTIVE WASTE PROCESSING/IODINE 131
Process for the removal of iodine and iodine compounds from gases and vapours and sorption agents impregrated with silver nitrate to carry out the process (Patent), 1120

RADIOACTIVE WASTE PROCESSING/ION EXCHANGE
Application of ion exchangers with crown ethers as anchor groups in analytical and preparative chemistry, 1346
Development of an ion-exchange process for removing cesium from high-level radioactive liquid wastes, 721 (DP-MS--79-26)
Evaluation of the Low-Level Waste Treatment Plant at Oak Ridge National Laboratory, and suggested changes in the design and operation, 904 (ORNL--5618)
Investigation of the utility of chemically treated indigenous minerals in radioactive waste treatment, 1305
Isolation of radionuclides from waste solutions using bituminous sorbents, 789 (INIS-mf--5450)
Laboratory evaluation of an ion exchange process for removing cesium from Purex acid waste solutions, 978 (RHO-CD--739)
Methods for decontamination of radioactive wastes, 1183
Radioactive liquid wastes processing system (Patent), 1293
Removal of plutonium and americium from alkaline waste solutions (Patent), 1156
Removal of radioactive waste during in-situ leaching of uranium (Patent), 1356
Removal of fission and corrosion products from alkaline solutions of boric acid by the ion exchange method, 805 (INIS-mf--5570)
Results of new investigations on the process of liquid wastes purification by means of ion exchange and ways of it's improvement, 812 (INIS-mf--5570)
Selective cation-exchange separation of cesium(I) on chromium ferricyanide gel, 1016
System for the transfer of long-lived radioactive nuclides from spent organic ion-exchange resins from nuclear power stations to zeolites -titanates, 966 (PRAV--3-19)

RADIOACTIVE WASTE PROCESSING/ION EXCHANGE CHROMATOGRAPHY
Separation of ^{137}Cs from nuclear waste, 1247

RADIOACTIVE WASTE PROCESSING/KRYPTON 85
Ion-implantation and storage of radioactive waste in metal matrix, 1343
Separation, conditioning, storage and disposal of krypton-85, 1002 (SGAE--3038)
Solidification device for radioactive gaseous wastes (Patent), 1136

RADIOACTIVE WASTE PROCESSING/LABORATORY ANIMALS
Drying equipment for radioisotope-treated animals, 1292

RADIOACTIVE WASTE PROCESSING/LECTURES
High-level nuclear waste immobilization program, 735 (DP-MS--80-25)

RADIOACTIVE WASTE PROCESSING/LIQUID WASTES
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions. Report of investigations, 920 (PB--80-122740)
Advanced biological treatment of aqueous effluent from the nuclear fuel cycle, 1435 (CONF-800334--3)
Apparatus for extreme evaporation of special solutions, 1015
Bidentate organophosphorus solvent extraction process for actinide recovery and partition, 1085
Device to draw off one or several phases (Patent), 1172
Disposal of liquid radioactive wastes from nuclear power plants, 697 (CS-INIS--258)
Liquid effluent treatment in nuclear power plants with light water reactors, 1107
Method and apparatus for processing liquid sodium wastes (Patent), 1087
Method and equipment to solidify pumpable radioactive wastes in a waste container (Patent), 1097
Method and device for controlling the radioactive liquid wastes processing systems (Patent), 1133
Method and equipment to extract and recover tritium from light and heavy water (FRG patent), 1063
Method and apparatus for processing radioactive laundry waste (Patent), 1098
Method and device for removing volatile components in radioactive liquid wastes (Patent), 1138
Method for solidifying liquid radioactive wastes (Patent) 1109
Method of processing radioactive wastes (Patent), 1171
Method of cement-solidification of radioactive liquid wastes containing surfactant (Patent), 1175
Method of processing radioactive wastes (Patent), 1125
Method of processing radioactive liquid wastes (Patent), 1132

Method of processing radioactive wastes (Patent), 1101
Method of processing organic materials containing radioactive elements (Patent), 1137
Ozonation of Hanford nuclear defense waste, 985 (RHO-SA--98)
Possible treatment of radioactive waters from the uranium mine Hamr u Ceske Lipy, 698 (CS-INIS--258)
Problems of deactivating liquid effluents from nuclear facilities, 693 (CS-INIS--258)
Process and plant improvements in the management of radioactive effluents (Trombay), 605
Process for disposal of aqueous solutions containing radioactive isotopes (Patent), 2141
Process for solidiying nuclear materials (Patent), 1126
Processing radioactive wastes from nuclear power plants in Czechoslovakia, 1369
Processing of high level radioactive wastes by a solidification technique, 1094
Removal of tritiated species from gas streams comprised thereof, 1320
Study on decontamination of radioactive ruthenium by steel wool in waste solution, 1151
Use of electrocoagulation technique in waste disposal, 1355
Vitrification of highly active liquid waste. Pt. 2. The thermal decomposition of harvest feed slurries and the characterization of the product, 1093
Waste management program. Technical progress report, April-June 1979, 429 (DP--79-125-2)

RADIOACTIVE WASTE PROCESSING/LOSSES
Some studies of nuclide losses. 2. Cold finger, 1289

RADIOACTIVE WASTE PROCESSING/LOWLEVEL RADIOACTIVE WASTES
Combustible radioactive waste treatment by incineration and chemical digestion, 777 (HEDL-SA--2064)
Commercial Cyclone Incinerator Demonstration Program: April-September 1979, 886 (MLM--2667)
Contribution to the treatment of low level radioactive waste solutions from the fabrication or refabrication of nuclear fuel containing ammonium nitrate, 860 (Juel--1593)
Correlation of leachant analyses and weight loss measurements in the leaching of high-iron synthetic basalts, 690 (CONF-801206--2)
Development of a laundry waste treatment system for nuclear power plants, 1335
In-situ stabilization of radioactively contaminated low-level solid wastes buried in shallow trenches: an assessment, 915 (ORNL/TM--7130)
Incineration of LWR-type waste at Mound Facility, 898 (MLM--2775(OP))
Inert-carrier radwaste volume reduction and solidification system, 1142
Iron-rich basalt-type waste forms for transuranic and low-level waste containment: evaluation of electromelt castings, 750 (EGG-FM--5241)
Leaching of incinerator slag from municipal waste, 753 (EGG-RE-M--79-005)
Logistical advantages of mobile radwaste processing systems, 1140
Low-level radioactive waste management. Volume IV. Radioactive waste solidification and handling practices, 900 (NUS--3245)
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
Magnox sludge encapsulation plant (United Kingdom), 1102
Method for incorporating water-containing radioactive waste in cement (Patent), 1310
Precipitation of uranium from low-level liquid wastes, 1092
Present state and policy of low-level radioactive management, 1162
Process for processing and conditioning radioactive effluents of low and medium activity (Patent), 1066
Radioactive liquid waste treatment plant in KEK, 869 (KEK--78-21)
Radioactive sludge treatment by the centrifugal dehydration method, 927 (PB--296947)
Radioactive organic solvent wastes, 1169
Reduction in waste handling and transportation, 928 (PB--296947)
Solidification of low-level radioactive liquid waste using a cement-silicate process, 929 (PB--296947)
State-of-the-art report on low-level radioactive waste treatment, 917 (ORNL/TM--7427)
Study on the fixation of cesium-137 in clinoptilolite, 1319
Treatment and disposal of radioactive wastes from the viewpoint of the NUCLEX 78, 1031
Updating radwaste processing, storage, 1080
Volumetric reduction techniques for low-level radioactive waste, 1141

RADIOACTIVE WASTE PROCESSING/LYOPHILIZATION
Dehydration of contaminated animal carcasses with a commercial lyophilizer, 1164

RADIOACTIVE WASTE PROCESSING/MATERIALS HANDLING
Slurry feeding of nuclear wastes to an electric glass melter, 1144

RADIOACTIVE WASTE PROCESSING/MEETINGS
Research on desactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 1. Processing of liquid radioactive wastes of low and medium activity, 455 (INIS-mf--5570)

RADIOACTIVE WASTE PROCESSING/MELTING
Volume reduction of metallic waste, 984 (RHO-SA--91)

RADIOACTIVE WASTE PROCESSING/MILL TAILINGS
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions, 2413 (BM-RI--8396)
Asphalt emulsion sealing of uranium mill tailings. 1979 annual report, 947 (PNL--3290)
Uranium mill tailings stabilization, 960 (PNL-SA--8414)

RADIOACTIVE WASTE PROCESSING/MIXING
Effects of processing variables on the product quality of large-scale glass forms containing simulated SRP waste, 741 (DP-MS--80-50)

RADIOACTIVE WASTE PROCESSING/NUCLEAR POWER PLANTS
Treatment of liquid and solid waste in the power station area, 2968

RADIOACTIVE WASTE PROCESSING/OFFGAS SYSTEMS
Cleaning of stack gases from combustion of low level radioactive waste in Studsvik, Sweden, 1006 (STUDSVIK/K1/4--79/31)
Spray calcination/in-can melting: effluent characterization and treatment, 941 (PNL--3109)

RADIOACTIVE WASTE PROCESSING/OPTIMIZATION
Thermal fracturing in glass waste forms, 743 (DP-MS--80-61)

RADIOACTIVE WASTE PROCESSING/ORGANIC COMPOUNDS
Remotely operated organic liquid waste incinerator for the fuels and materials examination facility, 776 (HEDL-SA--2009-FP)

RADIOACTIVE WASTE PROCESSING/ORGANIC SOLVENTS
Incineration of contaminated organic solvents in a fluidized-bed calciner, 687 (CONF-801038--6)
Radioactive organic solvent wastes, 1169

RADIOACTIVE WASTE PROCESSING/OSMOSIS
A study of reverse osmosis applicability to light water reactor radwaste processing. Technical report, 922 (PB--294947)
Development of ultrafiltration and adsorbents: April-September 1979, 889 (MLM--2684)
Process for treating waste water containing radioactive substances (Patent), 1118

RADIOACTIVE WASTE PROCESSING/PACKAGING
A survey of packaging for solidified low-level radioactive waste. Technical note, 1704 (PB--295038)
Process for the storage preparation of fractionised solid materials (Patent), 1376

RADIOACTIVE WASTE PROCESSING/PALLADIUM
Method for recovering palladium and technetium values from nuclear fuel reprocessing waste solutions (Patent) 1112

RADIOACTIVE WASTE PROCESSING/PARTITION
Actinide partitioning-transmutation program final report. III. Transmutation studies, 912 (ORNL/TM--6983)
Actinide partitioning-transmutation program final report. VII. Long-term risk analysis of the geologic repository, 1674 (ORNL/TM--6987)
Critique of rationale for transmutation of nuclear waste, 1009 (UCRL--84356)
Potential of pyroprocessing for partitioning purex wastes, 1010 (UCRL--84405)
Present status of partitioning developments, 856 (JAERI-M--7852)

RADIOACTIVE WASTE PROCESSING/PELLETIZING
Description of a pilot plant to produce a pelleted form from simulated ICPP high-level calcined wastes, 762 (ENICO--1032)
Development of a pelleted waste form for high-level alumina wastes, 770 (ENICO--1051)
Pelletized waste form demonstration program, October 1979-March 1980, 894 (MLM--2717)

RADIOACTIVE WASTE PROCESSING/PERFORMANCE
Evaluation procedure for radioactive waste treatment processes, 876 (LA--8052-MS)

RADIOACTIVE WASTE PROCESSING/PILOT PLANTS
Development of equipment for pilot-plants for radioactive wastes bituminization, 828 (INIS-mf--5571)
Radioactive wastes bituminization by the pilot-plant equipment, 830 (INIS-mf--5571)
Zero release for liquid radioactive wastes. Processing of wastes from nuclear power plants using the ACEREN evaporator, 1277

RADIOACTIVE WASTE PROCESSING/POLYMERIZATION
Method for processing powdery radioactive wastes (Patent) 1299
Method for solidifying powdery radioactive wastes, 1300

RADIOACTIVE WASTE PROCESSING/PRESSING
Treatment of solid radioactive wastes by baling, 855 (INR--1740/13/C/A)

RADIOACTIVE WASTE PROCESSING/PRESSURE DEPENDENCE
Effects of processing variables on the product quality of large-scale glass forms containing simulated SRP waste, 741 (DP-MS--80-50)

RADIOACTIVE WASTE PROCESSING/PYROLYSIS
Long-term disposal of enrichment plant tails, 779 (INFCE/DEP/WG--7/4)
Pyrolysis model for an alpha waste incinerator prototype, 1195
Vitrification of highly active liquid waste. Pt. 2. The thermal decomposition of harvest feed slurries and the characterization of the product, 1093

RADIOACTIVE WASTE PROCESSING/QUALITY CONTROL
Effects of processing variables on the product quality of large-scale glass forms containing simulated SRP waste, 741 (DP-MS--80-50)

RADIOACTIVE WASTE PROCESSING/RADIATION PROTECTION

Sludge recovery apparatus (Patent), 1201
RADIOACTIVE WASTE PROCESSING/RADIOACTIVE EFFLUENTS
Public health considerations of carbon-14 discharges from the light-water-cooled nuclear power reactor industry. Technical note, 2942 (PB--295054)
RADIOACTIVE WASTE PROCESSING/RADIOACTIVE WASTE PROCESSING
DOE materials program supporting immobilization of radioactive wastes, 631 (CONF-790420--)
RADIOACTIVE WASTE PROCESSING/RADIOACTIVE WASTES
Improvement of BWR radioactive waste disposal system (Japan), 1290
Types and properties of solid and gaseous wastes produced during experimental fluoride-gaseous regeneration of the BOR-60 reactor fuel, 61 (INIS-mf--5571)
RADIOACTIVE WASTE PROCESSING/RARE EARTHS
Solidification of ICPP actinide partitioning solutions, 771 (ENICO--1062)
RADIOACTIVE WASTE PROCESSING/REACTOR COMPONENTS
Method to dispose of solid radioactive wastes (Patent), 1358
RADIOACTIVE WASTE PROCESSING/RECRYSTALLIZATION
Leaching behaviour of rhyolite glass, 546
RADIOACTIVE WASTE PROCESSING/REFINING
Method of refining uranium-containing waste oils (Patent), 1303
RADIOACTIVE WASTE PROCESSING/REMOTE HANDLING
Method and apparatus for separating materials (Patent), 1035
RADIOACTIVE WASTE PROCESSING/RESEARCH PROGRAMS
Combustible radioactive waste treatment by incineration and chemical digestion, 777 (HEDL-SA--2064)
RADIOACTIVE WASTE PROCESSING/RESIDUES
Plutonium recovery at the Los Alamos Scientific Laboratory, 880 (LA-UR--80-1168)
RADIOACTIVE WASTE PROCESSING/REVIEWS
Development of solid radionuclide waste forms in the United States, 726 (DP-MS--79-70)
State of the art review of radioactive waste volume reduction techniques for commercial nuclear power plants, 1670 (ORNL/SUB--79/13837/2)
Toxic and hazardous waste disposal. Volume 1. Processes for stabilization/solidification, 1276
RADIOACTIVE WASTE PROCESSING/RISK ASSESSMENT
Actinide partitioning-transmutation program. Final report. VII. Long-term risk analysis of the geologic repository (appendix), 909 (ORNL/Sub--80/31038/1)
Safety assessment of the liquid-fed ceramic melter process, 953 (PNL--3493)
RADIOACTIVE WASTE PROCESSING/RUTHENIUM
Processing of radioactive ruthenium with aluminosilicate gels, 1096
RADIOACTIVE WASTE PROCESSING/SAFETY
Radioactivity generation and control radwaste processing, 784 (INIS-mf--4771)
Safety aspects of light water reactor radwaste solidification processes, 1061
RADIOACTIVE WASTE PROCESSING/SAMPLING
Process for taking samples, in particular from hot concentrates flowing in pipes, which contain radioactive or corrosive substances (Patent), 99
RADIOACTIVE WASTE PROCESSING/SCRAP
Apparatus and process for recovering nuclear fuel from scrap material (Patent), 1060
Plutonium scrap processing at the Los Alamos Scientific Laboratory, 879 (LA-UR--80-835)
RADIOACTIVE WASTE PROCESSING/SEPARATION PROCESSES
Methods for separating actinides from reprocessing and refabrication plant wastes, 668 (CONF-791112--63)
Radioactive rare gas separation performance of a two-unit series-type separation cell, 1313
Recovery of actinoids from waste solutions of fuel reprocessing. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, 2, 859 (JAERI-M--8339)
Studies on actinides separation in JAERI, 83
RADIOACTIVE WASTE PROCESSING/SLAGGING PYROLYSIS PROCESS
Migration of TRU-containing slag into candidate refractories for waste management, 441 (EGG-RE-M--78-034)
R and D for an off-gas treatment system for a slagging pyrolysis radioactive waste incinerator. Final report for Phase II, 994 (SAI--78-904-LJ)
Summary of FY 1979 material support studies for SPI - migration and immobilization (Analyses of slag products), 749 (EGG-FM--5041)
RADIOACTIVE WASTE PROCESSING/SLAGS
Brief summary of slag handling options reviewed for the slagging pyrolysis incinerator in the transuranic waste treatment facility (TWIF) at the INEL, 754 (EGG-TF--5168)
RADIOACTIVE WASTE PROCESSING/SLUDGES
Pelletized waste form demonstration program, October 1979-March 1980, 894 (MLM--2717)
Sludge recovery apparatus (Patent), 1201
RADIOACTIVE WASTE PROCESSING/SMELTING
Treatment of metallic wastes by smelting, 1279
RADIOACTIVE WASTE PROCESSING/SOLID WASTES
Activity measurements at a waste volume reduction facility, 926 (PB--296947)
Community's R and D programme on radioactive waste management and storage. 1977 2. annual progress report, 1480 (EUR--6128)
Controlled-air incineration of alpha-bearing solid wastes, 883 (LA-UR--80-1428)
Development and verification test on remote plasma cutting of large metallic waste, 1131
Method of processing radioactive wastes (Patent), 1125
Radioactive solid waste management at Trombay, 2789
Radioactive waste incineration studies at the Los Alamos Scientific Laboratory, 1268
Storage preparation process of fractionated solid materials (compacting; patent), 1364
Waste management program. Technical progress report, April-June 1979, 429 (DP--79-125-2)
Waste treatment research and development, 704 (DOE/EV--0046(Vol.2))
RADIOACTIVE WASTE PROCESSING/SOLIDIFICATION
A survey of the available methods of solidification for radioactive wastes, 923 (PB--295214)
Academy squabbles over radwaste report, 1116
Activity report 1978, 48 (ETR--299)
Advanced method for making vitreous waste forms, 689 (CONF-801124--9)
Advanced waste forms research and development. Final report, October 1, 1978-September 30, 1979 (Supercalcine-ceramics; Soxhlet leachability), 691 (COO--2510-15)
Alternative solid forms for Savannah River Plant defense waste, 727 (DP-MS--79-91)
Analysis of radionuclides in the defense waste processing facility, 1252
Annual Report 1976, 466 (KFK--2519)
Application of borate glasses and various boron bearing glasses to the management of French radioactive wastes, 625 (CEA-CONF--4435)
Application of the solidification method for desactivation of nuclear power plant wastes in Czechoslovakia, 821 (INIS-mf--5571)
Available methods of solidification for low-level radioactive wastes in the United States. Technical note, 924 (PB--296164)
Bituminization of biologically harmful wastes (Patent), 1361
Canadian Development Program for conditioning CANDU reactor wastes for disposal, 607 (AECL--6344)
Cement solidification of BWR and PWR radioactive waste at the Ringhals nuclear power plant, 2971
Ceramics in nuclear waste management, 382 (CONF-790420--)
Characterization of glass and glass ceramic nuclear waste forms, 1230
Charging Facility for drums with radioactive content (Patent), 1295
Clay-phosphate ceramics and vitromets: alternatives to monolithic high level waste glass products, 1233
Cleaning process for solidification apparatus of radioactive liquid waste (Patent), 1375
Comparison of bitumen and cement immobilization of intermediate- and low-level radioactive waste, 957 (PNL-SA--7499)
Concentration of liquid radioactive wastes by evaporation at the temperature below boiling point, 813 (INIS-mf--5570)
Continuous bituminization plant for solidifying radioactive wastes, 1129
Conversion of radioactive cyanide compounds (Patent), 1362
Crystallochemical stabilization of radwaste elements in Portland cement clinker, 658 (CONF-790420--)
Densification of calcines and direct containment of spent nuclear fuel in ceramics by hot isostatic pressing, 651 (CONF-790420--)
Description of the R + D-work and the inactive and active test period of the Eurobitum/Eurostorage facility, 873 (KFK--2765)
Design and operation principle of pilot-plant for bituminization of radioactive wastes, 827 (INIS-mf--5571)
Design features of the laboratory-scale radiochemical immobilization system, 936 (PNL--3027)
Design study for a fission product fixation plant and storage at Windscale, 611 (AERE-R--9416)
Development of cermets for high-level radioactive waste fixation, 650 (CONF-790420--)
Development and characterization of the glass-ceramic VCP 15 for immobilization of high-level-liquid radioactive waste, 655 (CONF-790420--)
Development and characterization of solidified forms for high-level wastes: 1978. Annual report (Waste form development, canister, leaching, phase behavior, devitrification, radiation effects, shock), 939 (PNL--3060)
Development of tailored ceramics for geologic storage of nuclear wastes. Quarterly progress report, October 1, 1979-December 31, 1979, 701 (DOE/ET/41900--T1)
Development and characterization of cermet forms for radioactive waste, 667 (CONF-791112--57)
Development and operation experience from pilot-plant for bituminization of liquid radioactive wastes (UBD-200), 822 (INIS-mf--5571)
Development of a portable volume reduction and solidification system, 1250
Development of methods for solidification of radioactive concentrates, 833 (INIS-mf--5571)

Development of suitable vitrified radioactive waste products with low formation temperatures and improved leach resistance - a practical approach, 619 (BARC--1028)
Development of incorporation of evaporator concentrate from pressurized water nuclear power reactors into asphalt, 2980
Development of the in-can melting process for vitrification of Savannah River Plant waste, 740 (DP-MS--80-49)
Device for solidification of gaseous wastes (Patent), 1209
Dow process for the solidification of low-level radioactive wastes from nuclear power plants, 2974
Embedding methods of solidified waste in metal matrices, 649 (CONF-790420--)
Evaluation and review of alternative waste forms for immobilization of high level radioactive wastes, 712 (DOE/TIC--10228)
Evaluation and review of alternative waste forms for immobilization of high level radioactive wastes, 713 (DOE/TIC--11219)
Evaluation of large caverns for in-situ solidification and final storage of MAW and LAW with regard to the heat build-up in the waste product, 551
Evolution of low level radwaste solidification systems in the USA, 1017
Experience with cement usage as the binding agent for radwaste, 1338
Experimental equipment for the study of high-level waste fixation, 1070
Fabrication and characterization of an improved borosilicate glass for solidification of high-level fission-product solutions (HLW). Part 1. Studies of 25 borosilicate-glass products for selection of an improved borosilicate glass, 1030 (PNL-TR--386)
Fixation of radioactive materials in a glass matrix (Patent), 1326
French commercial plant for reprocessing and vitrification of spent reactor fuel, 115
FUETAP (formed under elevated temperatures and pressures) concretes as hosts for radioactive wastes, 644 (CONF-790420--)
Further developments of borosilicate glass for the nitrification of high-level fission product solutions, 1032
Glass: an available material for the immobilization of nuclear waste, 1261
Glass as a matrix for SRP high-level defense waste, 745 (DPST--79-294)
Glasses and ceramics for immobilisation of radioactive wastes for disposal, 612 (AERE-R--9417)
Handling of spent nuclear fuel and final storage of nitrified high level reprocessing waste, 785 (INIS-mf--5013)
High-density graphite with anorganic binders as possible matrix material for radioactive and biological waste, 1055
High level nuclear waste isolation: borosilicate glass versus crystals, 1188
High-level waste immobilization program: an overview, 940 (PNL--3094)
High-level waste program. Progress report, October 1, 1979-December 31, 1979, 492 (ORNL/TM--7253)
High-level defense waste solidification at the Savannah River Plant, 729 (DP-MS--79-94)
High-level waste solidification - why we chose glass, 613 (AERE-R--9432)
High level nuclear waste, 738 (DP-MS--80-39)
High-level waste program progress report, January 1, 1980-March 31, 1980, 916 (ORNL/TM--7371)
High-level nuclear waste immobilization program, 735 (DP-MS--80-25)
High level waste properties, 959 (PNL-SA--8085)
High-level waste program progress report, April 1, 1980-June 30, 1980, 918 (ORNL/TM--7476)
High-level waste solidification: why we chose glass, 1021
HTGR reprocessing wastes and development needs, 709 (DOE/SF/71053--T1)
Immobilisation of high level nuclear reactor wastes in SYNROC, 1189
Immobilization of high-level wastes in SYNROC titanate ceramic, 652 (CONF-790420--)
Immobilization of strontium and cesium in intermediate-level liquid wastes by solidification in cements, 1238
Immobilization of INEL low-level radioactive wastes in ceramic containment materials, 752 (EGG-RE-M--78-033)
Immobilization of hazardous residuals by encapsulation. Final technical report, 925 (PB--296642)
Incineration of contaminated organic solvents in a fluidized-bed calciner, 687 (CONF-801038--6)
Incorporation of precipitate from treatment of medium-level liquid radioactive waste into glass matrix or ceramics together with high-level liquid waste, 660 (CONF-790420--)
Inert-carrier radwaste volume reduction and solidification system, 1142
Inflammability and explosiveness in bituminization, 1321
Instrument for determining viscosities and electrical resistivities of molten glass candidates for immobilizing Hanford nuclear defense wastes, 526 (RHO-SA--50)
Investigations of possibilities for improvement of properties of organic binders, 823 (INIS-mf--5571)
Investigations in the field of high-activity wastes desactivation, 824 (INIS-mf--5571)
Leaching behaviour of tritium from a hardened cement paste, 585
Leaching behaviour of rhyolite glass, 546
Liquid effluent treatment in nuclear power plants with light water reactors, 1107
Liquid waste concentrating system (Patent), 1212
Long-term high-level waste technology. Composite quarterly technical report, July-September 1979, 714 (DP--79-157-3)
Long-term high-level defense waste technology progress report, October-December 1979, 982 (RHO-LD--80-101-A)
Long-term high-level waste technology. Composite quarterly technical report, October-December 1979, 711 (DOE/SR-WM--79-2)
Low-level radioactive waste management. Volume IV. Radioactive waste solidification and handling practices, 900 (NUS--3245)
Low temperatue ceramic radioactive waste form, 645 (CONF-790420--)
Low-temperature ceramic radioactive waste form characteriztion of supercalcine-based monazite-cement composites, 700 (DOE/ET/41900--1)
Material investigations on solidification of intermediate-level waste solutions in cement: leachability of strontium and cesium, 875 (KFK--2842)
Material studies on solidification of medium-level waste solutions with cement: leachability of cesium and strontium, 1039 (PNL-TR--387)
Method and equipment to prepare aqueous radioactive waste for non-polluting and safe handling, transport, and final storage (Patent), 1353
Method and equipment for evaporation below boiling point and final storage of liquid radioactive wastes (Patent) 1365
Method and equipment of solidification especially of radioactive harmful and waste materials, 1215
Method and device for fixing radioactive gases (Patent), 1294
Method and equipment to solidify pumpable radioactive wastes in a waste container (Patent), 1097
Method and device for solidifying radioactive dry powder (Patent), 1090
Method and apparatus for processing radioactive laundry waste (Patent), 1098
Method for processing powdery radioactive wastes (Patent) 1299
Method for solidifying powdery radioactive wastes, 1300
Method for the disposal of especially radioactive wastes (Patent), 1359
Method for fixing organic radioactive solvent wastes (Patent), 1286
Method for processing radioactive wastes (Patent), 1296
Method for solidification of high level radioactive liquid wastes (Patent), 1211
Method for calcining nuclear waste solutions containing zirconium and halides (Patent), 1100
Method for anchoring radioactive substances in a body resistant to leaching by water (Patent), 1075
Method for solidifying liquid radioactive wastes (Patent) 1109
Method of processing radioactive wastes (Patent), 1368
Method of processing radioactive liquid wastes (Patent), 1284
Method of solidifying radioactive wastes (Patent), 1285
Method of solidifying radioactive wastes (Patent), 1193
Method of handling radioactive alkali metal waste (Patent), 1379
Method of simultaneous evaporation and cementation of radioactive wastes, 820 (INIS-mf--5571)
Method of processing radioactive liquid wastes (Patent), 1132
Method of treating waste material containing radioactive cesium isotopes (Patent), 1068
Method of solidifying radioactive wastes (Patent), 1077
Method of processing radioactive wastes (Patent), 1101
Method of processing radioactive wastes (Patent), 1111
Method of processing organic materials containing radioactive elements (Patent), 1137
Method to dry boric acid and/or borate-containing solution concentrates (Patent), 1324
Method to solidify and dispose radioactive borate-containing liquids (Patent), 1357
Method to fabricate bodies containing radioactive materials (Patent), 1314
Method to solidify a radioactive or toxic aqueous solution containing waste materials (Patent), 1084
Method to solidifly highly and medium radioactive and/or actinide-containing aqueous waste concentrates or of fine-grain solid wastes slurried in water, so that these are ready for ultimate storage and do not harm the environment (Patent), 1074
Method to improve the leaching resistance of bitumen solidification products (Patent), 1157
Natural glasses: analogues for radioactive waste forms (Volcanic glasses, tektites, and lunar glasses), 1229
Non-radioactive operation experience with a joule heated ceramic melter for vitrification of high-level liquid waste, 1228
Nuclear waste vitrification, 1317

Nuclear waste immobilization. Progress report, 1007 (UCRL--15147)
Nuclear waste disposal, 2251
Operation performance of the bituminization plant at Tsuruga Nuclear Power Station, 1219
Operation performance of continuous bituminization plant for solidifying radioactive waste at Tsuruga Nuclear Power Station, 1082
Organic bond for radioactive wastes (Patent), 1378
Pelletized Waste Form Demonstration Program: April-September 1979, 887 (MLM--2670)
Pelletized waste form demonstration program: final design criteria for waste pelletization, 891 (MLM--2697)
Phase separation in the glass containing high level radioactive waste, 1152
Plastic solidification system for radioactive waste, 1108
Polymer impregnated tritiated concrete. Final report, 884 (MLM--2644)
Polymeric solidification of low-level radioactive waste, 1248
Preliminary evaluation of alternative forms for immobilization of Savannah River Plant high-level waste (Eleven alternative solid forms), 719 (DP--1545)
Preliminary technical data summary No. 3 for the Defense Waste Processing Facility, 746 (DPSTD--77-13-3)
Preliminary evaluation of alternative waste form solidification processes. Volume I. Identification of the processes (11 processes), 946 (PNL--3244)
Preliminary evaluation of alternative waste form solidification processes. Volume II. Evaluation of the processes, 952 (PNL--3477)
Preparation and characterization of an improved high level radioactive waste (HAW) borosilicate glass, 1226
Present status of techniques used for high-level liquid-waste solidification, 1038 (PNL-TR--377)
Principal trends of investigations carried on in the USSR on incorporation of highly active wastes into glass and ceramic type materials, 664 (CONF-790420--)
Problems of high-active waste processing before disposal, 794 (INIS-mf--5565)
Procedure to convert mean and low activity radioactive wastes (Patent), 1029
Process and plant for manipulating radioactive waste (Patent), 1208
Process for an ultimate storage-mature, environmentally harmless solidification of highly and medium radioactive and/or actinides-containing aqueous waste concentrates or of fine-grained solid wastes in water slurries (Patent), 1283
Process for draining off radioactive wastes mixed with bitumen (Patent), 1205
Process for disposal of aqueous solutions containing radioactive isotopes (Patent), 1065
Process for solidiying nuclear materials (Patent), 1126
Process for processing and conditioning radioactive effluents of low and medium activity (Patent), 1066
Process technology and process development. Rockwell Hanford Operations semiannual report, October 1978-March 1979, 73 (RHO-LO--79-3A)
Processes for immobilization of high-level solid wastes by glass and ceramic matrices, 659 (CONF-790420--)
Processes for production of alternative waste forms, 956 (PNL-SA--7414)
Processing of high level radioactive wastes by a solidification technique, 1094
Processing of radioactive wastes formed in the nuclear fuel recycle for disposal, 801 (INIS-mf--5569)
Progress in fission product solidification and characterization utilizing the Juelich FIPS process, 640 (CONF-790420--)
Progress on the cermet approach to nuclear waste management, 1251
Properties of bituminous-embedded radioactive wastes from Barseback Nuclear Power Station, Sweden, 963 (PRAV--1.22)
Radioactive waste processing (Patent), 1377
Radioactive waste processing in NRI, 782 (INIS-mf--4551)
Radioactivity generation and control radwaste processing, 784 (INIS-mf--4771)
Radioactive substance solidifying device (Patent), 1186
Radioactive concentrate inclusion into bitumen during filmy evaporation, 800 (INIS-mf--5567)
Radioactive wastes bituminization by the pilot-plant equipment, 830 (INIS-mf--5571)
Raman spectra of cesium aluminosilicate waste forms, 1224
Reaction of hydrogen and oxygen in the presence of concretes incorporating simulated radioactive waste, 669 (CONF-791112--64)
Recent developments in low- and intermediate-level waste fixation by cement, 643 (CONF-790420--)
Remote experimental facility to solidify SRP high-heat waste, 1266
Removing radio-active wastes from nuclear power stations by the STEAG system. Experience in operation, 852 (INKA-Conf--78-396-000)
Research and development activities: High-Level Waste Immobilization Program. Quarterly progress reports, January-December 1978, 935 (PNL--2999(Pts.1-4))
Research and development activities: high-level waste impobilization program. Quarterly progress report, April-June 1979, 938 (PNL--3050-2)
Research and development activities: high-level waste immobilization program. Quarterly progress report, January-March 1979, 937 (PNL--3050-1)
Review of high-level waste-form properties (Sintered ceramics, concrete, glass-ceramics, hot-pressed ceramics, and metal matrices waste forms evaluated), 1254
Safety assessment of the liquid-fed ceramic melter process, 953 (PNL--3493)
Screw mixer (Patent), 1190
Significance of radiation effects in solid radioactive waste, 736 (DP-MS--80-27)
Small-scale demonstration of high-level radioactive waste processing and solidification using actual SRP waste, 733 (DP-MS--80-2)
Small-scale integrated demonstration of high-level radioactive waste processing and vitrification using actual SRP waste, 742 (DP-MS--80-60)
Solid waste disposal study, 865 (K/ET--5017)
Solidification of HLLW by glass-ceramic process, 646 (CONF-790420--)
Solidification of HLLW into sintered ceramics, 648 (CONF-790420--)
Solidification of boric acid waste: impact of urea-formaldehyde waste forms, 482 (NUREG/CR--1326)
Solidification of liquids by the use of microwaves, 787 (INIS-mf--5316)
Solidification of high-level radioactive wastes, 1316
Solidification of low-level radioactive liquid waste using a cement-silicate process, 929 (PB--296947)
Solidification method of radioactive waste organic solvents (Patent), 1210
Solidification process for an aqueous solution containing radioactive or toxic wastes (Patent), 1121
Solidification of low and medium level wastes in bitumen at Barsebaeck nuclear power station, 964 (PRAV--1.22)
Solidification of waste water concentrates using a roller drier, 1272
Solidification of high-level wastes from reprocessing, 780 (INFCE/DEP/WG--7/7)
Solidification of liquid wastes from nuclear power plants by mobile solidification units, 2970
Solidification of ICPP actinide partitioning solutions, 771 (ENICO--1062)
Some methods of investigation of solidification process of high-active wastes containing aluminium oxide, 798 (INIS-mf--5567)
Startup and operation of a plant-scale continuous glass melter for vitrification of Savannah River Plant simulated waste, 739 (DP-MS--80-48)
Stirring vessel for cement solidification of radioactive wastes (Patent), 1200
Structures and stability of media intended for the immobilization of high level radioactive waste, 628 (CEGB-RD-B-N--4573)
Studies on the stability of bitumen salt mixtures. 3. Mixtures of bitumen and simulated steel corrosion products, 1000 (SGAE--3006)
Suitability of using concrete for solidification of liquid radioactive wastes, 1013 (VTT-REA--40)
Survey on product properties of bituminized waste concentrates from reprocessing, nuclear installations and nuclear power plants, 874 (KFK--2796)
Synthetic rutile microencapsulation: a radioactive waste solidification system resulting in an extremely stable product, 1234
Synthetic mineral nuclear waste ceramics, 1262
System for disposing of radioactive waste (Patent), 1086
Techniques for high level waste solidification in Europe (AVM, HARVEST, and PAMELA processes), 1225
Technological investigations of bituminization process for liquid radioactive wastes, 826 (INIS-mf--5571)
Testing and evaluation of the properties of various potential materials for immobilizing high activity waste. First annual report (1977), 773 (EUR--6213)
Titanate waste forms for high level waste: an evaluation of materials and processes, 997 (SAND--80-1376C)
To the problem of neutralization of low- and medium-active spent fuel reprocessing wastes, 799 (INIS-mf--5567)
Toxic and hazardous waste disposal. Volume 1. Processes for stabilization/solidification, 1276
Tritium waste control, October 1979-March 1980, 476 (MLM--2714)
US program for the immobilization of high-level nuclear wastes, 1139
Use of natural aluminosilicates and porous ceramic materials for the inclusion of radioactive wastes, 653 (CONF-790420--)
Vitrification of Savannah River Plant radioactive waste: process development studies, 724 (DP-MS--79-42)
Vitrification of high sodium-aluminum wastes: composition ranges and properties, 1227
Vitrification of high-level alumina nuclear waste, 666 (CONF-791112--43)
Vitrification of SRP waste by a slurry-fed ceramic melter, 730 (DP-MS--79-103)
Vitrification of actual high-level waste from LWR fuel, 1267
Vitrification of radioactive wastes, 1280
Volatilities of ruthenium, iodine, and technetium on calcining fission product nitrate wastes, 686 (CONF-801038--4)

Volatility of ruthenium-106, technetium-99, and iodine-129, and the evolution of nitrogen oxide compounds during the calcination of high-level, radioactive nitric acid waste, 903 (ORNL--5562)
Volatility of alkali fission products during solidification process, 854 (INKA-Conf--79-003-015)
Waste disposal for liquid scintillator 'Cocktail', solidification of the evaporated 'Cocktail', 1207
Waste management program. Technical progress report, April-June 1979, 429 (DP--79-125-2)
RADIOACTIVE WASTE PROCESSING/SOLVENT EXTRACTION
Bidentate organophosphorus extraction of americium and plutonium from Hanford Plutonium Reclamation Facility waste, 618 (ARH-SA--203)
Cyclohexanone solvent extraction of $^{99}TcO_4$ from alkaline nuclear waste solutions, 987 (RHO-SA--123)
Distribution ratios and empirical equations for the extraction of elements in Purex high level waste solution. 1. TBP, 1242
Experimental studies at the Idaho Chemical Processing Plant on actinide partitioning from acidic nuclear wastes, 678 (CONF-800743--5)
Flowsheet development work at the Idaho Chemical Processing plant for the partitioning of actinides from acidic nuclear waste, 1045
Method for the recovery of palladium and technetium, 1122
Method of recovering and regenerating organic solvents used for the reprocessing of radioactive wastes (Patent), 1199
Methods for solvent extraction of strontium 90 with carboxylic acids and separation of americium and curium by quaternary ammonium compounds, 791 (INIS-mf--5564)
Recovery of actinides from TBP-Na_2Co_3 scrub-waste solutions: the ARALEX process, 616 (ANL--79-74)
Recovery of palladium and technetium values, 1123
Recovery of actinide values (Patent), 1124
Removal of actinides from selected nuclear fuel reprocessing wastes, 1179
Removal of actinides from nuclear fuel reprocessing wastes using an organophosphorous extractant (DHDECMP), 37 (CONF-800610--2)
Removal of actinides from nuclear fuel reprocessing wastes: engineering studies, 679 (CONF-800743--12)
RADIOACTIVE WASTE PROCESSING/SORPTION
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
RADIOACTIVE WASTE PROCESSING/SPRAY DRYING
Slurry spray distribution within a simulated laboratory scale spray dryer, 732 (DP-MS--79-112)
RADIOACTIVE WASTE PROCESSING/STABILIZATION
Stabilization of high-level waste from a chloride volatility nuclear fuel reprocessing system, 661 (CONF-790420--)
RADIOACTIVE WASTE PROCESSING/SURFACE COATING
Coating of waste containing ceramic granules, 647 (CONF-790420--)
RADIOACTIVE WASTE PROCESSING/SYSTEMS ANALYSIS
Systems analysis and process strategy, 1246
RADIOACTIVE WASTE PROCESSING/TECHNETIUM
Method for recovering palladium and technetium values from nuclear fuel reprocessing waste solutions (Patent), 1112
RADIOACTIVE WASTE PROCESSING/TECHNOLOGY ASSESSMENT
Application of European radwaste technology in North America, 1339
Evaluation and review of alternative waste forms for immobilization of high level radioactive wastes, 712 (DOE/TIC--10228)
Low-level radioactive waste management. Volume III. Feasibility of volume-reduction processes, 624 (CAEC--007(Vol.3))
RADIOACTIVE WASTE PROCESSING/TRANSMUTATION
Actinide partitioning-transmutation program final report. I. Overall assessment, 63 (ORNL--5566)
Actinide Partitioning-Transmutation Program Final Report. V. Preconceptual designs and costs of partitioning facilities and shipping casks (appendix 3), 64 (ORNL/Sub--79/31056/1/A3)
Actinide partitioning-transmutation program. V. Preconceptual designs and costs of partitioning facilities and shipping casks, Appendix 4. Final report, 65 (ORNL/Sub--79/31056/1/A4)
Actinide partitioning-transmutation program final report. VI. Short-term risk analysis of reprocessing, refabrication, and transportation: appendix, 2537 (ORNL/Sub--80/31048/1)
Actinide partitioning-transmutation program final report. VII. Long-term risk analysis of the geologic repository, 1674 (ORNL/TM--6987)
Actinide partitioning-transmutation program final report. IV. Miscellaneous aspects (Transport; fuel fabrication; decay; policy; economics), 66 (ORNL/TM--6984)
Actinide recycle in LMFBRs as a waste management alternative, 774 (GEFR-SP--215)
APEX accelerator cycle for transmutation of long-lived fission wastes, 622 (BNL--28282)
Keynote address at the international conference on nuclear waste transmutation, 621 (BNL--28193)
Transmutation of radwaste using accelerators, 990 (RHO-SA--174)
RADIOACTIVE WASTE PROCESSING/TRANSURANIUM ELEMENTS
Defense transuranic waste at the Savannah River Plant, Aiken, South Carolina. Supplemental alternatives for long-term management, 423 (DOE/SR-WM--79-1(Suppl.))
Iron-rich basalt-type waste forms for transuranic and low-level waste containment: evaluation of electromelt castings, 750 (EGG-FM--5241)
RADIOACTIVE WASTE PROCESSING/TRITIUM
Method for removing tritium (Patent), 1301
Performance and improvements of the tritium handling facility at the Los Alamos Scientific Laboratory, 881 (LA-UR--80-1265)
RADIOACTIVE WASTE PROCESSING/TRITIUM RECOVERY
Combined Electrolysis Catalytic Exchange (CECE), 897 (MLM--2774)
RADIOACTIVE WASTE PROCESSING/ULTRAFILTRATION
Development of ultrafiltration and adsorbents: April-September 1979, 889 (MLM--2684)
Development of ultrafiltration and adsorbents: October 1979-March 1980, 896 (MLM--2735)
RADIOACTIVE WASTE PROCESSING/UNDERGROUND
Evaluation of large caverns for in-situ solidification and final storage of MAW and LAW with regard to the heat build-up in the waste product, 551
RADIOACTIVE WASTE PROCESSING/VAPOR DEPOSITED COATINGS
High level waste containing granules coated and embedded in metal as an alternative to HLW glasses, 1043
RADIOACTIVE WASTE PROCESSING/VITRIFICATION
Assessment of water/glass interactions in waste glass melter operation, 930 (PNL--2622)
Attack of high-strength, oxidation-resistant alloys during in-can melting of simulated waste glasses, 722 (DP-MS--79-39)
Characterization of borosilicate glasses containing simulated high-level radioactive wastes from PNC, 389 (CONF-790420--)
Characterization of gaseous and particulate effluents from the nuclear vitrification project, 944 (PNL--3181)
Characterization of off-gases from a small-scale, joule-heated ceramic melter for nuclear waste vitrification (Ru, Cl, F, ^{137}Cs), 728 (DP-MS--79-92)
Comparison of some properties of phosphate and silicate glasses intended for vitrification of aluminium containing radioactive wastes, 819 (INIS-mf--5571)
Current status of ceramic melting tank with direct electrical heating for HAW vitrification, 1056
Design and operation of small-scale glass melters for immobilizing radioactive waste, 731 (DP-MS--79-108)
Development of engineering scale HLLW vitrification technique at PNC, 638 (CONF-790420--)
Development of aluminosilicate and borosilicate glasses as matrices for CANDU high-level waste, 1414 (CONF-790420--)
Disposal of radioactive wastes by vitrification, 1147
Engineering-scale vitrification of commercial high-level waste, 949 (PNL--3375)
Fixation of radioactive materials in a glass matrix (Patent), 1325
Fixation of radioactive substances in a glass matrix (Patent), 1328
Full-scale in-can melter demonstration for vitrification of nuclear waste, 954 (PNL-SA--6768)
Glasses as materials used in France for management of high-level wastes, 388 (CONF-790420--)
Glasses with amorphous structure used for the packaging of radio-active waste, 1146
Handling high-level radioactive wastes (PAMELA), 2355 (ANL-Trans--1181)
High-temperature vitrification of Hanford residual-liquid waste in a continuous melter, 948 (PNL--3343)
In-can melting process and equipment development from 1974 to 1978, 934 (PNL--2925)
In-can melting demonstration of wastes from the Idaho Chemical Processing Plant, 950 (PNL--3405)
Influence of heat transfer on the pot vitrification process, 642 (CONF-790420--)
Interactions between candidate melter electrode materals and defense waste glass melts, 989 (RHO-SA--173)
Investigations of radionuclides behaviour during vitrification of wastes, 831 (INIS-mf--5571)
Investigations of the solidification of feed clarification sludge in an inorganic matrix resistant to radiation and heat (vitrification), Subproject B, 79 (PNL-TR--409)
Iron behaviour x-raying during vitrification of radioactive wastes, 1245
Method for the inclusion of radioactive fission products (Patent), 1213
Microwave energy for post-calcination treatment of high-level nuclear wastes, 682 (CONF-800914--3)
Modeling principles applied to the simulation of a joule-heated glass melter, 718 (DP--1540)
NRI's research on radioactive wastes, 781 (INIS-mf--4551)
Operational experience of the first industrial HLW vitrification plant, 633 (CONF-790420--)
Pecularities of carrying out radioactive wastes vitrification process without preliminary calcination of wastes, 832 (INIS-mf--5571)
Properties of vitrified ICPP zirconia calcine, 766 (ENICO--1038)
Remote experimental facility to solidify SRP high-level waste, 725 (DP-MS--79-53)
Review of continuous ceramic-lined melter and associated

experience at PNL, 639 (CONF-790420--)
Small-scale, joule-heated melting of Savannah River Plant waste glass. I. Factors affecting large-scale vitrification tests, 717 (DP--1535)
Solidification of HLW solutions with the PAMELA process, 637 (CONF-790420--)
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
UK program: glasses and ceramics for immobilization of radioactive wastes for disposal, 632 (CONF-790420--)
Utilization of borosilicate glass for transuranic waste immobilization, 657 (CONF-790420--)
Vitrification of Hanford wastes in a joule-heated ceramic melter and evaluation of resultant canisterized product, 933 (PNL--2904)
Vitrification of high-level radioactive waste in a continuous liquid-fed ceramic melter, 635 (CONF-790420--)
Vitrification of Hanford radioactive defense wastes, 636 (CONF-790420--)
Vitrification of ICPP high-level zirconia calcine, 654 (CONF-790420--)
Vitrification of nuclear waste, 993 (RISLEY-Trans--3373)
Vitrification process of wastes containing radioactive substances (Patent), 1352
Vitrification of high-level alumina nuclear waste, 767 (ENICO--1040)
Vitrification of actual high-level waste from light water reactor fuel, 1042
Vitrification of actual high-level waste from LWR fuel, 1267
Vitrification of transuranic and beta-gamma contaminated solid wastes, 720 (DP--1553)
Vitrification of radioactive high-level waste by spray calcination and in-can melting, 943 (PNL--3145)
Vitrification process improves product, 1018
Waste management program technical progress report, October-December 1978, 427 (DP--78-125-4)
Waste management program technical progress report, January-March 1979, 428 (DP--79-125-1)
RADIOACTIVE WASTE PROCESSING/WASTE WATER
Biological removal of metal ions from aqueous process streams, 1341
Reducing radioactive contamination by sorption on impregnated water works sand, 1443 (CS-INIS--258)
RADIOACTIVE WASTE PROCESSING/WET ASHING
Wet combustion as a process of treating burnable plutonium-containing wastes, 1053
RADIOACTIVE WASTE STORAGE
Analysis of groundwater flow around a high-level waste repository in crystalline rock, 3532
Ion-implantation and storage of radioactive waste in metal matrix, 1343
Magnetic susceptibility of sodium disilicate glasses containing PuO_2 (4 to 300°K), 1423 (CONF-790881--1)
Migration paths for Oklo reactor products and applications to the problem of geological storage of nuclear wastes, 9
Nuclear energy and the fuel circuit (Belgium), 1160
Nuclear waste: a problem that must be solved (New legislation for), 2156
Nuclear waste management: storage and disposal aspects, 2084 (UCRL--84918)
Properties of light water reactor spent fuel cladding. Interim report, 1488 (HEDL-TME--78-70)
Radioactive waste storage and disposal: the challenge, 1382 (AECB--1120)
Surface depositories for vitrificated high-activity wastes, 1510 (INIS-mf--5571)
Waste Isolation Program Evaluation Assistance. Quarterly technical progress report (Managing by Decisions), 2035 (UCID--18796-80-1)
Waste storage glass stands up to the test, 2241
RADIOACTIVE WASTE STORAGE/ACCIDENTS
Report and analysis of the concealed nuclear catastrophe in the USSR, 3501
RADIOACTIVE WASTE STORAGE/AFTER-HEAT
Calculations on heat generation and temperature rise during storage and solidification of HLW/LLW in large capacity caverns. Reference systems A and B of the in-situ-project, 1544 (KFK--2857)
RADIOACTIVE WASTE STORAGE/AFTER-HEAT REMOVAL
Inherently safe aircooling for the storage of self-heating configurations of radionuclides, 2120
RADIOACTIVE WASTE STORAGE/AIR FILTERS
Progress towards the use of disposable filters, 610 (AERE-M--3012)
RADIOACTIVE WASTE STORAGE/BACKFILLING
Backfill as an engineered barrier for nuclear waste management (Bentonite-hectorite), 1910 (SAND--79-0990C)
RADIOACTIVE WASTE STORAGE/BASALT
Basalt Waste Isolation Program. Quarterly report, April 1, 1979-June 30, 1979, 1804 (RHO-BWI--79-100-3Q)
RADIOACTIVE WASTE STORAGE/BENCH-SCALE EXPERIMENTS
Laboratory simulation of high-level liquid waste evaporation and storage, 2119
RADIOACTIVE WASTE STORAGE/BIBLIOGRAPHIES
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
RADIOACTIVE WASTE STORAGE/BUDGETS
National Waste Terminal Storage Program. Office of Nuclear Waste Isolation technical program plan, 1624 (ONWI--19(Rev.1))
RADIOACTIVE WASTE STORAGE/BUILDING MATERIALS
Results of investigations of behaviour of high-activity solid wastes and their compatibility with structural materials of protective ampules during long period storage, 1512 (INIS-mf--5571)
RADIOACTIVE WASTE STORAGE/CAPITAL
Management of solid waste, 1666 (ORNL/ENG/INF--80/1)
RADIOACTIVE WASTE STORAGE/CASKS
Radioactive waste storage (Patent), 2389
RADIOACTIVE WASTE STORAGE/CERAMICS
Development of tailored ceramics for geologic storage of nuclear wastes. Quarterly progress report, January 1-March 31, 1980, 420 (DOE/ET/41900--T2)
RADIOACTIVE WASTE STORAGE/CHARGES
Advance payments on the cost of the Federal repository for radioactive waste, 2232
RADIOACTIVE WASTE STORAGE/CLOSURES
Method to close rock cavities (Patent), 2344
RADIOACTIVE WASTE STORAGE/CONTAINERS
Behavior of radioactive wastes incorporated in concrete and stored on open-air bed at CAMEN, 2115 (PNL-TR--408)
Calculations of the diffusion of nuclides through cracks in containers made of concrete, 2018 (STUDSVIK-K2--78/70)
Data package for the Turkey Point material interaction test capsules, 1485 (HEDL-TC--1283(Rev.1))
Device for the ultimate storage of radioactive waste materials of varying activities (Patent), 2169
Device to absorb solid radioactive waste suspended in water (Patent), 2225
Durability of containers for storing solidified radioactive wastes, 2347
Durability of metals from archaeological objects, metal meteorites, and native metals, 3516 (PNL--3198)
Experiments on the corrosion of materials for borehole casings and for waste packaging canister in salt, 1656 (ONWI--88)
Final storage vessel for radioactive waste (Patent), 2217
Investigations for the Kr-85 storage, 1542 (KFK--2750)
Issues relevant to nuclear waste canister materials, 1521 (IS-M--273)
Leakage detection system for radioactive waste storage tanks (Patent), 2167
Process for introducing radioactive articles into a transport and/or storage container and transporting and/or storing the container and later extraction of the article from the container, and container for transporting and/or storing radioactive articles (Patent), 2168
Process for transporting and/or storing of radioactive articles or substances and transportable transport and/or storage container, in particular for carrying out the process (Patent), 2173
Properties of radioactive wastes and waste containers. First topical report, 1603 (NUREG/CR--0619)
Titanium alloy corrosion in nuclear waste environments (Ti-50A; TiCode 12; Ti-Pd), 1946 (SAND--79-2023C)
RADIOACTIVE WASTE STORAGE/COOLING SYSTEMS
Heat pipe cooling system for underground, radioactive waste storage tanks, 1554 (LA--8230-MS)
RADIOACTIVE WASTE STORAGE/COORDINATED RESEARCH PROGRAMS
Nevada Nuclear Waste Storage Investigations. FY 1979 peer review summaries and related documentation, 1618 (NVO--196-16)
RADIOACTIVE WASTE STORAGE/CORROSION
Computer modeling of nuclear waste storage canister corrosion, 2076 (UCRL--83488)
RADIOACTIVE WASTE STORAGE/DECOMPOSITION
Studies of transuranic waste storage under conditions expected in the Waste Isolation Pilot Plant (WIPP). Interim summary report, October 1, 1977-June 15, 1979, 1545 (LA--7931-PR)
RADIOACTIVE WASTE STORAGE/DISSOLUTION
Waste form dissolution in bedded salt, 2032 (UCID--18678)
RADIOACTIVE WASTE STORAGE/ECONOMICS
Design study for a fission product fixation plant and storage at Windscale, 611 (AERE-R--9416)
RADIOACTIVE WASTE STORAGE/ENGINEERED SAFETY SYSTEMS
Summary report of waste tank improvement studies, 1866 (RHO-LD--136)
RADIOACTIVE WASTE STORAGE/ENVIRONMENTAL IMPACT STATEMENTS
Final environmental impact statement. Handling and storage of spent light water power reactor fuel, 2298
RADIOACTIVE WASTE STORAGE/ENVIRONMENTAL IMPACTS
Final environmental impact statement: US Spent Fuel Policy. Executive summary, 1445 (DOE/EIS--0015(Vol.1)
RADIOACTIVE WASTE STORAGE/EQUIPMENT
Information base for waste repository design. Volume 2. Equipment performance requirements. Technical report, 1698 (PB--293402)
RADIOACTIVE WASTE STORAGE/EXPLOSIONS
Report and analysis of the concealed nuclear catastrophe in the USSR, 3501
RADIOACTIVE WASTE STORAGE/FEASIBILITY STUDIES
Status report on studies to assess the feasibility of storing nuclear waste in Columbia plateau basalts, 1830 (RHO-BWI-SA--19)
RADIOACTIVE WASTE STORAGE/FIELD TESTS
Spent fuel handling system for a geologic storage test at the Nevada Test Site, 2077 (UCRL--83728)
US in-situ studies in salt, 1643 (ONWI--88)
RADIOACTIVE WASTE STORAGE/FORECASTING
Storage and disposal of nuclear wastes: prospects for

the next 25 years, 2353
Various aspects of transportation, storage and discharge of radioactive wastes: future prospects, 595
RADIOACTIVE WASTE STORAGE/GASEOUS WASTES
Community's R and D programme on radioactive waste management and storage. 1977 2. annual progress report, 1480 (EUR--6128)
Technical and economic feasibility of zeolite encapsulation for krypton-85 storage, 759 (ENICO--1011)
Treatment and storage of radioactive gases from nuclear facilities, 547
RADIOACTIVE WASTE STORAGE/GEOCHEMISTRY
Granite-repository - geochemical environment, 1495 (INFCE/DEP/WG--7/13)
RADIOACTIVE WASTE STORAGE/GOVERNMENT POLICIES
Final environmental impact statement: US Spent Fuel Policy. Executive summary, 1445 (DOE/EIS--0015(Vol.1))
RADIOACTIVE WASTE STORAGE/HARDENING
Device to absorb solid radioactive waste suspended in water (Patent), 2225
RADIOACTIVE WASTE STORAGE/HAZARDS
Long-term meteorite hazards to buried nuclear waste. Report 2, 2546 (PNL--2851)
RADIOACTIVE WASTE STORAGE/HEARINGS
Cemeteries sought for nuclear waste. Anatomy of an inquiry, 2109
RADIOACTIVE WASTE STORAGE/HEAT RECOVERY
Device to store radioactive wastes and recovery of heat liberated by these wastes (Patent), 2388
RADIOACTIVE WASTE STORAGE/HEATING
Analytic solutions for thermal conduction from heat producing cylinders and spheres, 1969 (SAND--80-0039)
Asse II in-situ brine migration tests, 1655 (ONWI--88)
Conasauga Near Surface Heater Experiment. Implications for a repository sited in a water-saturated argillaceous formation, 1929 (SAND--79-1474C)
Conasauga near-surface heater experiment. Final report, 1939 (SAND--79-1855)
Salt Block I test: experimental details and comparison with theory. Final report, 1964 (SAND--79-7050)
Test results and supporting analysis of a near surface heater experiment in the Eleana Argillite, 1938 (SAND--79-1746C)
RADIOACTIVE WASTE STORAGE/HIGHLEVEL RADIOACTIVE WASTES
Chemical compatibility of HLW borosilicate glasses with actinides. Solubilities and segregation processes, 1540 (KFK--2552)
Conceptual design of a shipping cask for rail transport of solidified high level waste, 245 (PNL-SA--6526)
Determination of radiolytic hydrogen concentration in the gas plenum of a container for the storage of liquid HAW in the WAK, 2122
Development of a stand-depository for storage and investigation of high-activity solid wastes behaviour, 1511 (INIS-mf--5571)
Functional design criteria: additional high-level waste storage and handling facilities (For liquid and slurry wastes), 1397 (ARH-CD--304)
Functional design criteria additional high-level waste storage facilities, 1398 (ARH-CD--362)
Handling and storage of high-level radioactive liquid wastes requiring cooling, 2287
Inspection and evaluation of Nuclear Fuel Services high-level waste storage system. Program plan, 1856 (RHO-CD--882)
Interim report on status of containment integrity studies for continued in-tank storage of Hanford high-level defense waste, 1854 (RHO-CD--773)
Interim storage device for self-heating, highly dangerous materials, 2154
Intermediate storage facility for vitrified high level waste from the reprocessing of spent nuclear fuel, 1494 (INFCE/DEP/WG--7/10)
Inventory of calcined waste stored at the ICPP as of September 1979, 1476 (ENICO--1044)
Investigations of temperature development in the ultimate storage of radioactive waste. Pt. 1. Calculation of time- and site-dependent temperature fields, 2243
Management of high-level radioactive wastes, 1106
Overview of high-level waste management accomplishments, 675 (CONF-800313--3)
Radioactive waste storage (Patent), 2389
Results of investigations of behaviour of high-activity solid wastes and their compatibility with structural materials of protective ampules during long period storage, 1512 (INIS-mf--5571)
Safe handling and storage of high level radioactive waste. A condensed version of the proposals of the Swedish KBS-Project regarding reporcessing waste, spent fuel, 786 (INIS-mf--5013)
Safeguards assessment of spent fuel disposal alternatives, 2641
State of research and development work on final storage (The German R and D program for the storage of intermediate-level radioactive waste in the salt mine Asse and the participation in the European R and D work on high-level waste disposal), 2402
Summary report of waste tank improvement studies, 1866 (RHO-LD--136)
RADIOACTIVE WASTE STORAGE/INTERMEDIATELEVEL RADIOACTIVE WASTES
Operating safety requirements for the intermediate level liquid waste system, 2646 (ORNL/TM--7262)
State of research and development work on final storage (The German R and D program for the storage of intermediate-level radioactive waste in the salt mine Asse and the participation in the European R and D work on high-level waste disposal), 2402
RADIOACTIVE WASTE STORAGE/INVENTORIES
Inventory of calcined waste stored at the ICPP as of September 1979, 1476 (ENICO--1044)
RADIOACTIVE WASTE STORAGE/IODINE 129
Iodide and iodate sodalites for the long-term storage of iodine-129, 1422 (CONF-790420--)
RADIOACTIVE WASTE STORAGE/KRYPTON 85
Engineered storage facility for radioactive krypton, 2229
Krypton-85 storage in solid matrices (By ion implantation during sputtering, or by dissolution in glass), 71 (PNL-SA--7752)
Technical quarterly progress report, January 1-March 31, 1979, 443 (ENICO--1012)
Technical quarterly progress report, April 1-June 30, 1979, 444 (ENICO--1013)
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
Technical quarterly progress report, October 1-December 31, 1979, 46 (ENICO--1034)
RADIOACTIVE WASTE STORAGE/LEACHING
Interrelation of short-term leach tests and long-term leaching, 1427 (CONF-791103--98)
RADIOACTIVE WASTE STORAGE/LEAKS
Diaphragm walls to hold Windscale leak, 2139
RADIOACTIVE WASTE STORAGE/LECTURES
Battle for nuclear power, 1874 (RHO-SA--170)
RADIOACTIVE WASTE STORAGE/LICENSING
Site-specific EIS ordered but injunctive relief deined in nuclear waste storage case, 2650
RADIOACTIVE WASTE STORAGE/LIQUID WASTES
Method for retention of tritium released during reprocessing spent nuclear fuel and storing the liquid radioactive waste produced thereby, 1311
Scientific basis for, and experience with, underground storage of liquid radioactive wastes in the USSR, 2258
RADIOACTIVE WASTE STORAGE/LOSS OF COOLANT
Heat transfer analysis for a loss of institutional control event at the Waste Encapsulation and Storage Facility (^{137}Cs; ^{90}Sr), 1865 (RHO-LD--100)
RADIOACTIVE WASTE STORAGE/LOWLEVEL RADIOACTIVE WASTES
Low-level radioactive waste technology: a selected, annotated bibliography, 906 (ORNL/EIS--133/V2)
Safety concerning the partial alteration of the fuel reprocessing facility in Power Reactor and Nuclear Fuel Development Corporation, 113
Updating radwaste processing, storage, 1080
RADIOACTIVE WASTE STORAGE/MANAGEMENT
MACRO1: a code to test a methodology for analyzing nuclear-waste management systems, 2068 (UCRL--52736)
RADIOACTIVE WASTE STORAGE/MATERIALS
Proposal of materials for the storage of radioactive wastes, 1533 (KBS-TR--113)
RADIOACTIVE WASTE STORAGE/MATRIX MATERIALS
Immobilization of krypton by incorporation into a metallic matrix by combined ion implantation and sputtering, 2153
RADIOACTIVE WASTE STORAGE/MEETINGS
Proceedings of the National Waste Terminal Storage Program information meeting, 902 (ONWI--62)
Proceedings of 20th annual meeting of Institute of Nuclear Materials Management, 1979, 2640
Waste isolation performance assessment and in-situ testing, 1638 (ONWI--88)
RADIOACTIVE WASTE STORAGE/MONITORING
Detection of free liquid in drums of radioactive waste (Patent application), 2631
Real-time monitoring of Hanford nuclear waste, 1871 (RHO-SA--143)
RADIOACTIVE WASTE STORAGE/OPERATING COST
Management of solid waste, 1666 (ORNL/ENG/INF--80/1)
RADIOACTIVE WASTE STORAGE/PILOT PLANTS
In situ experiments to support development of the waste isolation pilot plant (WIPP), 1903 (SAND--79-0905C)
Waste isolation pilot plant (WIPP) experimental program, 1652 (ONWI--88)
RADIOACTIVE WASTE STORAGE/RADIATION ACCIDENTS
Nuclear disaster in the Urals, 2568
RADIOACTIVE WASTE STORAGE/RADIATION CHEMISTRY
Review of information on the radiation chemistry of materials around waste canisters in salt and assessment of the need for additional experimental information, 1661 (ORNL--5607)
RADIOACTIVE WASTE STORAGE/RADIATION DOSES
ALMA. Calculations of diffusion and radiation doses in connection with final storage of radioactive wastes, 2017 (STUDSVIK-K2--78/20)
RADIOACTIVE WASTE STORAGE/RADIATION HAZARDS
Dose and dose commitment from radioactive substances carried by groundwater from a nuclear fuel repository, 2479 (STUDSVIK-K2--79/92)
RADIOACTIVE WASTE STORAGE/RADIOACTIVE EFFLUENTS
Control and monitoring system of radioactive effluents in radioisotope facilities, 2328
RADIOACTIVE WASTE STORAGE/RADIOLYSIS
Radiolytic gas generation in concrete made with incinerator ash containing transuranium nuclides, 1466 (DP-MS--79-25)

Studies of transuranic waste storage under conditions expected in the Waste Isolation Pilot Plant (WIPP). Progress report, October 1-December 31, 1979, 1553 (LA--8224-PR)
Studies of transuranic waste storage under conditions expected in the Waste Isolation Pilot Plant (WIPP). Progress report, January 1-March 25, 1980, 1557 (LA--8345-PR)

RADIOACTIVE WASTE STORAGE/RADIONUCLIDE MIGRATION
Express-method for control of radionuclides migration of the stratum-collector of underground burial site for liquid radioactive wastes, 2430 (INIS-mf--5572)
FEMWATER: a finite-element model of water flow through saturated-unsaturated porous media, 2446 (ORNL--5567)
General modeling, considerations and data requirements for consequence analysis, 2442 (ONWI--88)
GETOUT: a computer program for predicting radionuclide decay chain transport through geologic media, 2453 (PNL--2970)
Parameters affecting radionuclide migration in geologic media, 1560 (LA-UR--79-2992)
PSE: release scenario analysis, 2441 (ONWI--88)
Radionuclide transport in a dolomite aquifer, 2476 (SAND--79-1016C)
Release consequence analysis, 2443 (ONWI--88)
Relevance of the studies of the OKLO natural nuclear reactors to the storage of radioactive wastes, 8
Sensitivity studies of the swift radionuclide transport model, 2473 (SAND--79-0896C)
Transport through a trench cover of gaseous tritiated compounds from buried radioactive wastes, 2285
Waste Isolation Safety Assessment Program. A brief description of the three-dimensional finite element ground-water flow model adapted for waste isolation safety assessments, 2451 (PNL--2652)
Waste Isolation Safety Assessment Program. Task 4. Third Contractor Information Meeting (Adsorption-desorption on geological media), 2462 (PNL-SA--8571(Vol.2))

RADIOACTIVE WASTE STORAGE/RECOMMENDATIONS
Nuclear-waste problems still await solutions, 3113

RADIOACTIVE WASTE STORAGE/RECOVERY
Engineering study of stored waste retrieval at Idaho National Engineering Laboratory, 1481 (FBDU--289-01)
Hanford radioactive tank cleanout and sludge processing, 991 (RHO-ST--30)

RADIOACTIVE WASTE STORAGE/REGULATIONS
Regulation of Federal radioactive waste activities. Report to Congress on extending the Nuclear Regulatory Commission's licensing or regulatory authority to Federal radioactive waste storage and disposal activities, 477 (NUREG--0527)
Regulation of Federal radioactive waste activities. Summary of report to Congress on extending the Nuclear Regulatory Commission's licensing or regulatory authority to Federal radioactive waste storage and disposal activities, 1600 (NUREG--0527(Summ.))

RADIOACTIVE WASTE STORAGE/RESEARCH PROGRAMS
Basalt Waste Isolation Project. Quarterly report, April 1, 1980-June 30, 1980, 1807 (RHO-BWI--80-100-3Q)
Community's R and D programme on radioactive waste management and storage. 1977 2. annual progress report, 1480 (EUR--6128)
National Waste Terminal Storage Program. Office of Nuclear Waste Isolation technical program plan, 1624 (ONWI--19(Rev.1))
Nevada nuclear waste storage investigations. Quarterly report, October-December 1979, 1617 (NVO--196-14)
Nevada nuclear waste storage investigations. Quarterly report, January-March 1980, 485 (NVO--196-15)
Studies of transuranic waste storage under conditions expected in the Waste Isolation Pilot Plant (WIPP). Progress report, January 1-March 25, 1980, 1557 (LA--8345-PR)
Summary of results and plans of the experimental program for the Waste Isolation Pilot Plant, 1942 (SAND--79-1950C)
Technical progress report, April 1-June 30, 1979, 1622 (ONWI--9(3))

RADIOACTIVE WASTE STORAGE/RETRIEVAL SYSTEMS
Retrieval system for emplaced spent unreprocessed fuel (SURF) in salt bed depository: accident event analysis and mechanical failure probabilities. Final report, 2037 (UCRL--15111)
Storage and retrievability of existing and future ICPP calcines, 1477 (ENICO--1060)

RADIOACTIVE WASTE STORAGE/RISK ASSESSMENT
Aspects of nuclear waste management. Volume 1. Pre-emplacement risks, 2043 (UCRL--15167(Vol.1))
PSE: release scenario analysis, 2441 (ONWI--88)

RADIOACTIVE WASTE STORAGE/ROCK MECHANICS
Information base for waste repository design. Volume 3. Waste/rock interactions. Technical report, 1699 (PB--293403)

RADIOACTIVE WASTE STORAGE/SAFETY
Engineered barrier development for a nuclear waste repository in basalt: an integration of current knowledge, 1842 (RHO-BWI-ST--7)
Methodology for assessing the long-term safety of radioactive waste storage in geologic formations, 1763 (PNL-SA--7184)
Operating safety requirements for the intermediate level liquid waste system, 2646 (ORNL/TM--7262)
Operational safety analysis report: double-shell waste storage tanks, 1400 (ARH-CD--719)
Radiological safety assessment for a low-level radioactive solid waste storage facility: preliminary risk evaluation by reliability techniques, 2608
Safety above everything, 2166
Waste isolation safety assessment program WISAP release scenario analysis, 1648 (ONWI--88)
Workshop on Potentially Disruptive Phenomena for Nuclear Waste Repositories, July 27-28, 1977, 1764 (PNL-SA--7197)

RADIOACTIVE WASTE STORAGE/SALT DEPOSITS
Annual Report 1976, 466 (KFK--2519)
Investigations of temperature development in the ultimate storage of radioactive waste. Pt. 1. Calculation of time- and site-dependent temperature fields, 2243
Method to close rock cavities (Patent), 2344
Modeling of brine migration in halite, 2484 (UCRL--82228)
Objections to Gorleben from the geomorphological point of view, 2240
Review of information on the radiation chemistry of materials around waste canisters in salt and assessment of the need for additional experimental information, 1661 (ORNL--5607)

RADIOACTIVE WASTE STORAGE/SAMPLERS
Equipment for collecting sludge samples from Savannah River Plant waste tanks, 1470 (DP-MS--79-49)

RADIOACTIVE WASTE STORAGE/SEALS
Borehole plugging test activities in southeastern New Mexico, 2008 (SAND--80-2462C)

RADIOACTIVE WASTE STORAGE/SEISMIC WAVES
Comparison of predicted and observed subsurface-surface seismic spectral ratios, 2535 (NVO--0624-2)

RADIOACTIVE WASTE STORAGE/SHAFT EXCAVATIONS
Information base for waste repository design. volume 6. excavation technology. Technical report, 1702 (PB--293406)

RADIOACTIVE WASTE STORAGE/SHIELDING
Arrangement for storage of radioactive waste materials (Patent), 2352

RADIOACTIVE WASTE STORAGE/SIMULATION
Characterization of discontinuities in the Stripa granite. Time-scale heater experiment, 1563 (LBL--7083)
Laboratory simulation of high-level liquid waste evaporation and storage, 2119
Rock instrumentation problems experienced during in-situ heater tests, 1584 (LBL--9952)

RADIOACTIVE WASTE STORAGE/SITE SELECTION
Earthquake damage to underground facilities, 3392 (DP--1526)
Fluid inclusions in salt from the Rayburn and Vacherie domes, Louisiana, 2090 (USGS-OFR--79-1675)
Geohydrology of hole UE-17a, Syncline Ridge area, Nevada Test Site, 2086 (USGS--1543-4)
Geological and hydrological exploration of Gulf Coast Salt Domes, 1645 (ONWI--88)
Interpretation of geophysical well-log measurements in drill hole UE25a-1, Nevada Test Site, Radioactive Waste Program, 2094 (USGS-OFR--80-941)
Minimum risk based selection of waste fuel dumping site, 2531 (INIS-mf--5372)
Nevada nuclear waste storage investigations. Quarterly report, April-June 1979, 1614 (NVO--196-11)

RADIOACTIVE WASTE STORAGE/SLUDGES
Method of taking sludges out of radioactive liquid wastes storage vessel (Patent), 2332

RADIOACTIVE WASTE STORAGE/SOLID WASTES
Durability of containers for storing solidified radioactive wastes, 2347
Leaching properties and chemical compositions of calcines produced at the Idaho Chemical Processing Plant, 1441 (CONF-800987--1)
Multibarrier storage of Savannah River Plant waste (Borosilicate glass in canister), 1468 (DP-MS--79-31)
Nuclear power plant approach to temporary on-site storage of radioactive waste, 1711 (PB--296947)
Storage time evaluation for active solid waste produced in hospitals, 2164

RADIOACTIVE WASTE STORAGE/SPECIFICATIONS
Criteria for packaging transuranic waste for receipt at the Idaho National Engineering Laboratory radioactive waste management complex offsite generated waste, 1491 (IDO--10074(Rev.1))

RADIOACTIVE WASTE STORAGE/SPENT FUELS
Spent fuel storage requirements: the need for away-from-reactor storage, 189 (DOE/NE--0002)

RADIOACTIVE WASTE STORAGE/STABILITY
Hydrothermal stability of spent fuel and high-level waste ceramics in the geologic repository environment, 1419 (CONF-790420--)
Report on stability of minerals at hydrothermal conditions, 1532 (KBS-TR--113)

RADIOACTIVE WASTE STORAGE/STORAGE FACILITIES
Fourth Calcined Solids Storage Facility. Final safety analysis report, 1475 (ENICO--1031)
Project plan for inspection and evaluation of Nuclear Fuel Services high-level waste storage system, 1863 (RHO-LD--97)
Report of conceptual design for TRU solid waste facilities adjacent to 200H Area: Savannah River Plant, 1473 (DPE--3519)

RADIOACTIVE WASTE STORAGE/STORED ENERGY
Stored energy of gamma-irradiated 97% pure rocksalt, 2004 (SAND--80-1616C)
RADIOACTIVE WASTE STORAGE/SYSTEMS ANALYSIS
Assessment of effectiveness of geologic isolation systems: a short description of the AEGIS approach, 1760 (PNL--3398)
RADIOACTIVE WASTE STORAGE/TANKS
Determination of radiolytic hydrogen concentration in the gas plenum of a container for the storage of liquid HAW in the WAK, 2122
Elastic and strength properties of Hanford concrete mixes at room and elevated temperatures, 1846 (RHO-C--28)
Heating of radioactive waste processing tank (Patent), 2218
Inspection and evaluation of Nuclear Fuel Services high-level waste storage system. Program plan, 1856 (RHO-CD--882)
Interim report on status of containment integrity studies for continued in-tank storage of Hanford high-level defense waste, 1854 (RHO-CD--773)
Manufacturing high-integrity stainless-steel waste storage tanks, 2339
Possible microbial corrosion of decay tanks for liquid radioactive wastes in nuclear power plants, 1501 (INIS-mf--5101)
Prolonged storage of highly concentrated liquid radioactive wastes in special tanks, 1508 (INIS-mf--5570)
Review of classification of nine Hanford single-shell questionable integrity tanks, 1857 (RHO-CD--896)
Strength and elastic properties of concretes from waste tank farms, 1845 (RHO-C--22)
Summary report of waste tank improvement studies, 1866 (RHO-LD--136)
Waste management program technical progress report, October-December 1978, 427 (DP--78-125-4)
Waste management program technical progress report, January-March 1979, 428 (DP--79-125-1)
Waste tank core drilling demonstration results, 1858 (RHO-CD--980)
RADIOACTIVE WASTE STORAGE/TECHNOLOGY ASSESSMENT
Statement of position of the United States Department of Energy in the matter of proposed rulemaking on the storage and disposal of nuclear waste (waste confidence rulemaking), 1457 (DOE/NE--0007)
RADIOACTIVE WASTE STORAGE/TEMPERATURE DISTRIBUTION
Calculation of the temperature field during burial of radioactive wastes, 1518 (INIS-mf--5572)
Storage temperatures for vitrified HAW, 2124
RADIOACTIVE WASTE STORAGE/TEMPERATURE GRADIENTS
Modeling of brine migration in halite, 2072 (UCRL--82228(Rev.1))
Temperatures generated by underground storage of defense waste canisters, 1469 (DP-MS--79-37)
Thermal aspects of the Eleana near-surface heater experiment, 1914 (SAND--79-1036C)
RADIOACTIVE WASTE STORAGE/TEST FACILITIES
Basalt near-surface test facility test plans, 1832 (RHO-BWI-SA--21)
RADIOACTIVE WASTE STORAGE/THERMAL DEGRADATION
Studies of transuranic waste storage under conditions expected in the Waste Isolation Pilot Plant (WIPP). Progress report, October 1-December 31, 1979, 1553 (LA--8224-PR)
Studies of transuranic waste storage under conditions expected in the Waste Isolation Pilot Plant (WIPP). Progress report, January 1-March 25, 1980, 1557 (LA--8345-PR)
RADIOACTIVE WASTE STORAGE/TRANSURANIUM ELEMENTS
Studies of transuranic waste storage under conditions expected in the Waste Isolation Pilot Plant (WIPP). Progress report, January 1-March 25, 1980, 1557 (LA--8345-PR)
US Department of Energy acceptance of commercial transuranic waste, 1802 (RFP--3110)
RADIOACTIVE WASTE STORAGE/UNDERGROUND DISPOSAL
Studies of the temperature behavior associated with the ultimate storage of high level radioactive waste, 2244
RADIOACTIVE WASTE STORAGE/UNDERGROUND STORAGE
Basalt Waste Isolation Project. Annual report, fiscal year 1979, 1803 (RHO-BWI--79-100)
Basalt Waste Isolation Project. Quarterly report, October 1, 1979-December 31, 1979, 1808 (RHO-BWI--80-100-19)
Calculated hydrogeologic pressures and temperatures resulting from radioactive waste in the Eleana argillite, 1945 (SAND--79-2019C)
CEDRA Informe: National Cooperative Association for the Storage of Radioactive Wastes, 2116 (PNL-TR--384)
Clay particle redistribution and piping phenomena in bentonite/quartz buffer material due to high hydraulic gradients, 2010 (SKBF-KBS-TR--79-01)
Comparison of thermomechanical calculations for highly non-linear quasistatic drift deformations, 1971 (SAND--80-0149)
Considerations for developing seismic design criteria for nuclear waste storage repositories, 1522 (JAB--00099-128)
Design study for a fission product fixation plant and storage at Windscale, 611 (AERE-R--9416)
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. Second progress report, fiscal year 1979, 3560 (RHO-BWI-C--54)
Determination of basalt physical and thermal properties at varying temperatures, pressures, and moisture contents. Third progress report, fiscal year 1979, 3561 (RHO-BWI-C--55)
Determination of the location of fractures in metamorphic rock with in-hole tracers, 3575
Device for the ultimate storage of radioactive waste materials of varying activities (Patent), 2169
Dose and dose commitment from radioactive substances carried by groundwater from a nuclear fuel repository, 2479 (STUDSVIK-K2--79/92)
Effects of brine migration on waste storage systems. Final report (Thermomechanical effects), 2481 (UCRL--15102)
Estimation of the radiation effect of medium-active ion-exchange resins with final storage as radioactive wastes, 2179
Evaluation of large caverns for in-situ solidification and final storage of MAW and LAW with regard to the heat build-up in the waste product, 551
Final storage container for radioactive waste (Patent), 2323
Functional design criteria: additional high-level waste storage and handling facilities (For liquid and slurry wastes), 1397 (ARH-CD--304)
Handling of spent nuclear fuel and final storage of nitrified high level reprocessing waste, 785 (INIS-mf--5013)
Influence of the temperature on groundwater movements in jointed rock masses with applications to radioactive waste disposal, 2322
Information base for waste repository design. Volume 1. Borehole and shaft sealing. Technical report, 1697 (PB--293401)
Information base for waste repository design. volume 4. mine structural features. Technical report, 1700 (PB--293404)
Information base for waste repository design. Volume 5. Decommissioning of underground facilities. Technical report, 1701 (PB--293405)
Information base for waste repository design. Volume 7. Executive summary. Technical report, 1703 (PB--293407)
Intermediate storage facility for vitrified high level waste from the reprocessing of spent nuclear fuel, 1494 (INFCE/DEP/WG--7/10)
Long-term geologic storage of spent fuel, 2099
Material properties of Eleana argillite: extrapolation to other argillaceous rocks, and implications for waste management, 2408 (ALO--0789-T14)
Numerical modeling capabilities to predict repository performance, 2045 (UCRL--15176)
Numerical simulation of creep closure of deep potash mines (with application to waste isolation), 1985 (SAND--80-0467)
Pilot heater test of the Swedish Nuclear Fuel Safety Program, 2321
Problems of the final storage of radioactive waste in salt formations, 1499 (INIS-mf--4782)
Scientific basis for, and experience with, underground storage of liquid radioactive wastes in the USSR, 2258
Small scale heater tests in argillite of the Eleana Formation at the Nevada Test Site, 1899 (SAND--79-0344)
Studies concerning the conditions for underground storage of short-lived radioactive wastes, 2019 (STUDSVIK-SA--78/34)
Unsealed storage of MAW/LAW in salt caverns, 2123
RADIOACTIVE WASTE STORAGE/UNDERWATER
Building for treatment or storage of toxic or radioactive material (Patent), 2329
RADIOACTIVE WASTE STORAGE/VENTILATION
Information base for waste repository design. Volume 2. Equipment performance requirements. Technical report, 1698 (PB--293402)
RADIOACTIVE WASTES
See also HIGH-LEVEL RADIOACTIVE WASTES
INTERMEDIATE-LEVEL RADIOACTIVE WASTES
LOW-LEVEL RADIOACTIVE WASTES
RADIOACTIVE EFFLUENTS
Development and characterization of solidified forms for high-level wastes: 1978. Annual report (Waste form development, canister, leaching, phase behavior, devitrification, radiation effects, shock), 939 (PNL--3060)
Nuclear Waste Management Program summary document, FY 1981, 421 (DOE/NE--0008)
Nuclear wastes, a questionnaire, 548
RADIOACTIVE WASTES/ADSORPTION
Fixation of radioactive ions in porous media with ion exchange gels (DOE patent), 2494
RADIOACTIVE WASTES/BIBLIOGRAPHIES
Bibliography of articles on radioactive waste from 1973-1978, 490 (ORNL/OIAPA--14)
Hazardous materials transportation. part 2. radioactive materials and wastes (citations from the NTIS data base). Report for 1964-Apr 1979, 226 (NTIS/PS--79/0704)
Radioactive waste processing and disposal, 478 (NUREG--0644)
Radioactive waste management integrated data base: a

bibliography, 494 (ORNL/TM--7385/V2)
RADIOACTIVE WASTES/BIODEGRADATION
Degradation of transuranic-contaminated wastes under geologic isolation conditions, 1952 (SAND--79-2216A)
Potential microbial impact on transuranic wastes under conditions expected in the Waste Isolation Pilot Plant (WIPP). Annual report, October 1, 1978-September 30, 1979, 1555 (LA--8297-PR)
RADIOACTIVE WASTES/BIOLOGICAL EFFECTS
Technetium: a toxic waste product of the nuclear fuel cycle: effects on soybean growth and development, 2485
RADIOACTIVE WASTES/BUILDUP
Theoretical and experimental analyses of actinide build-up and α-wastes for nuclear disposal, 552
RADIOACTIVE WASTES/CALORIMETRY
Capsule calorimeter development report, 378 (ARH--2619)
RADIOACTIVE WASTES/CASKS
Closable container with a self-locking lid (Patent), 3698
RADIOACTIVE WASTES/CHEMICAL ANALYSIS
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
Recent developments at Los Alamos for the measurement of alpha contaminated waste, 471 (LA-UR--80-1289)
RADIOACTIVE WASTES/CHEMICAL REACTIONS
Application of physical chemistry of fluids in rock salt at elevated temperature and pressure to repositories for radioactive waste, 2264
Chemistry of nuclear waste glass reactions: problems and potential of prediction, 2253
Hydrothermal reactivity of simulated nuclear waste forms and water-catalysed waste-rock interactions, 2267
Interaction of a glass-based nuclear waste simulant and natural rock, 2261
Interaction of waste radionuclides with geomedia: program approach and progress, 2272
RADIOACTIVE WASTES/CLASSIFICATION
Acceptable residual activity levels allowing waste to be considered inactive, 589
Determination of the radioactivity categories in liquid wastes (In Russian), 596
Proposal of threshold levels for the definition of non-radioactive wastes, 13
Radioactive waste disposal classification system, 1610 (NUREG/CR--1005(Vol.1))
Radioactive waste disposal classification system. Volume 2. The computer program and groundwater migration models, 1611 (NUREG/CR--1005(Vol.2))
RADIOACTIVE WASTES/COMPARATIVE EVALUATIONS
Comparison of glass and crystalline waste materials, 387 (CONF-790420--)
Wastes from selected activities in two light-water reactor fuel cycles, 518 (PNL--3425)
RADIOACTIVE WASTES/CONTAINERS
Container for the transport and dosable removal of radioactive and for toxic media (Patent), 2860
Corrosion resistant metallic canisters: an important element of a multibarrier disposal program (TiCode-12 (Ti-0.8% Ni-0.3% Mo)), 1928 (SAND--79-1429C)
Effects of proposed changes in regulations on low-level radwaste shipments, 2671
National Waste Terminal Storage Program: containment system concepts for transporting Type B quantities of transuranic waste, 248 (RFP--2862)
Properties of radioactive wastes and waste containers. Progress report No. 10, July-September 1978, 1606 (NUREG/CR--0857)
Properties of radioactive wastes and waste containers. Progress report No. 11, October-December 1978, 1607 (NUREG/CR--0911)
Safety analysis report for packaging a DOT 7A specification container for tritiated liquid wastes, 266 (SAND--80-8021)
Stress analysis of high-level waste canisters: methods, applications, and design data, 511 (PNL--3036)
RADIOACTIVE WASTES/CONTAMINATION
Contamination of the ground near Building B 212 at Windscale Works, BNFL, 3312
RADIOACTIVE WASTES/CRYSTAL STRUCTURE
Crystal chemistry of the synthetic minerals in current supercalcine-ceramics, 397 (CONF-790420--)
RADIOACTIVE WASTES/CRYSTALLIZATION
Effects of composition on waste glass properties, 391 (CONF-790420--)
Investigation of crystallization in glasses containing fission products, 390 (CONF-790420--)
RADIOACTIVE WASTES/DATA COMPILATION
Summary of radioactivity released in effluents from nuclear power plants from 1972 thru 1975, 2944 (PB--296289)
RADIOACTIVE WASTES/DECONTAMINATION
Decontamination of large components at ECN, 1278
Methods of radioactive wastewater treatment, 3424
Process for decontaminating radioactive effluents, principally in antimony and ruthenium (Patent), 3002
RADIOACTIVE WASTES/DEGASSING
Gas generation from transuranic waste degradaton, 1905 (SAND--79-0911C)
Gas generation from transuranic waste degradation: data summary and interpretation, 530 (SAND--79-1245)
RADIOACTIVE WASTES/DENITRIFICATION
Biological denitrification of high-nitrates wastes generated in the nuclear industry, 414 (CONF-800447--1)
Bioprocess development and demonstration, 3409 (ORNL/TM--6328/V1)
RADIOACTIVE WASTES/DISSOLUTION
Waste management program technical progress report, October-December 1978, 427 (DP--78-125-4)
RADIOACTIVE WASTES/ELECTRIC CONDUCTIVITY
Effects of composition on waste glass properties, 391 (CONF-790420--)
Electrical resistivities of glass melts containing simulated SRP waste sludges, 433 (DP--1488(Add.))
Viscosity and electrical conductivity of glass melts as a function of waste composition, 383 (CONF-790420--)
RADIOACTIVE WASTES/ENCAPSULATION
Successful encapsulation of nuclear waste, 1194
RADIOACTIVE WASTES/ENVIRONMENTAL EFFECTS
Systemic effects of radiation exposure on rodents inhabiting liquid and solid radioactive waste storage areas, 3473 (IDO--12088)
RADIOACTIVE WASTES/ENVIRONMENTAL EXPOSURE PATHWAY
Characterization of the Hanford 300 area burial grounds. Task IV. Biological transport, 2452 (PNL--2774)
Long-term accumulation factors for fish and sediments in the Bavarian Danube area, 3386
Relative potential hazards of radioactive waste in various water systems, 2559 (UCRL--15121)
RADIOACTIVE WASTES/ENVIRONMENTAL IMPACTS
Disposal o radioactive wastes from fission reactors, 2336
RADIOACTIVE WASTES/ENVIRONMENTAL TRANSPORT
Studies of nuclear waste migration in geologic media. Annual report, October 1978-September 1979, 1395 (ANL--80-36)
RADIOACTIVE WASTES/FORECASTING
Assumptions and ground rules used in nuclear waste projections and source term data, 1626 (ONWI--24)
Commercial nuclear reactors and waste: the current status, 517 (PNL--3317-1)
Spent fuel and waste inventories and projections, 495 (ORO--778)
Wastes from selected activities in two light-water reactor fuel cycles, 518 (PNL--3425)
RADIOACTIVE WASTES/FRAGMENTATION
Characterization of impact fracture of brittle solid-waste forms, 407 (CONF-791112--50)
RADIOACTIVE WASTES/GAMMA RADIATION
Escape probability of gamma from radioactive contaminated solid waste, 452 (INIS-mf--4789)
RADIOACTIVE WASTES/GOVERNMENT POLICIES
Hidden dimension of the National Energy Plan: executive policy direction in nuclear waste management, 577
RADIOACTIVE WASTES/HEALTH HAZARDS
Estimation of North American population doses resulting from radon-222 release in western United States: methodology, 3235 (ORNL/TM--6751)
RADIOACTIVE WASTES/IMPACT TESTS
Solidification of boric acid waste: impact of urea-formaldehyde waste forms, 482 (NUREG/CR--1326)
RADIOACTIVE WASTES/INFORMATION SYSTEMS
PLOTLIB: a computerized nuclear waste source-term library storage and retrieval system, 461 (K/DP--248)
RADIOACTIVE WASTES/INVENTORIES
Studies of transuranic waste storage under conditions expected in the Waste Isolation Pilot Plant (WIPP). Interim summary report, October 1, 1977-June 15, 1979, 1545 (LA--7931-PR)
Waste inventory report for reactor and fuel fabrication facility wastes, 586
RADIOACTIVE WASTES/LAND TRANSPORT
Analysis and model testing of a Super Tiger Type B waste transport system in accident environments, 265 (SAND--80-1633C)
RADIOACTIVE WASTES/LEACHING
Autoclave release studies, 1788 (PNL-SA--7992)
Brine chemistry effects on the durability of a simulated nuclear waste glass, 2474 (SAND--79-0900C)
Chemical durability of nuclear waste glasses, 1417 (CONF-790420--)
Chemical durability and characterization of nuclear waste forms in a hydrothermal environment (Cu borosilicate glass: titanate ceramic), 1418 (CONF-790420--)
Corrosion behavior of zinc borosilicate simulated nuclear waste glass, 1416 (CONF-790420--)
Determination of nuclear waste-form leach rates by activation analysis, 2596
Development of improved leaching techniques for vitrified radioactive waste products, 2412 (BARC--1032)
Devitrification and leaching effects in HLW glass: comparison of simulated and fully radioactive waste glass, 1420 (CONF-790420--)
Effects of temperature and leaching media on the leach rates of nuclear waste materials, 2209
Fuel and waste immobilization in Canada related to WISAP Task 2, 1794 (PNL-SA--7992)
Investigations of tritiated water fixation in silicagel, zeolites and different types of cement, 1526 (Juel--1581)
Leach rate characterization of solid radioactive waste forms, 2255
Leach studies of plutonium-contaminated incinerator ash incorporated in cement, 2595
Leach testing of Idaho Chemical Processing Plant final waste forms, 418 (CONF-800987--2)
Leaching behaviour of tritium from a hardened cement

paste, 585
Leaching characteristics of actinides from simulated reactor waste, Part 2 (Borosilicate glass), 2483 (UCRL--81147(Pt.2))
Leaching characteristics of actinides from simulated reactor waste, 2071 (UCRL--81147(Pt.2)(Rev.1))
Leaching of radioactive waste storage glasses, 1415 (CONF-790420--)
Leaching of actinides and technetium from simulated high-level waste glass, 513 (PNL--3152)
Leaching of tritium from a cement composite, 1524 (JAERI-M--7936)
Leaching properties of solidified TRU waste forms (WBS element 0206), 1791 (PNL-SA--7992)
Leaching properties and chemical compositions of calcines produced at the Idaho Chemical Processing Plant, 1441 (CONF-800987--1)
Leaching technique for studying actinide-contaminated Hanford sediments, 1864 (RHO-LD--98)
Leaching U-Np-Pu-loaded simulated waste-glass, 1792 (PNL-SA--7992)
Long-term leach rates of glasses containing actual waste, 1421 (CONF-790420--)
Long-term leaching of irradiated spent fuel, 247 (PNL-SA--7734)
Materials Characterization Center workshop on leaching of radioactive waste forms. Summary report, 1756 (PNL--3318)
Mechanism for elevated temperature leaching, 1906 (SAND--79-0954C)
Methods used to estimate geochemical aspects of radionuclide migration from waste repositories, 2186
Modeling of glass leaching, 1253
Nature of glass leaching, 1781 (PNL-SA--7953)
Non-flow release studies, 1787 (PNL-SA--7992)
Properties of radioactive wastes and waste containers. Progress report No. 10, July-September 1978, 1606 (NUREG/CR--0857)
Properties of radioactive wastes and waste containers. Progress report No. 11, October-December 1978, 1607 (NUREG/CR--0911)
Radioactivity leach tests under high hydrostatic pressure on full size monolithic cement packages of LWR wastes for sea dumping, 2327
Relative leach behavior of waste glasses and naturally occurring glasses, 393 (CONF-790420--)
Release model development, 1789 (PNL-SA--7992)
Survey on product properties of bituminized waste concentrates from reprocessing, nuclear installations and nuclear power plants, 874 (KFK--2796)

RADIOACTIVE WASTES/LEAKS
Waste Isolation Safety Assessment Program. Task 2: waste form release rate analysis, 1785 (PNL-SA--7992)

RADIOACTIVE WASTES/LICENSING
Licensing and regulation of nuclear waste, 2651

RADIOACTIVE WASTES/MARINE DISPOSAL
Ocean energy: forms and prospects, 3105

RADIOACTIVE WASTES/MARITIME TRANSPORT
ALMA - Transport container: mechanical impact by accidents; conceptual design, 521 (PRAV--1-21)

RADIOACTIVE WASTES/MATERIALS HANDLING
Demonstration of radioactive sludge removal from SRP storage tank, 436 (DPSPU--79-30-11)
Meteorology and demography models for risk assessments of accidental atmospheric releases of nuclear waste. Phase 2 methodology, 2558 (UCID--17930)
Shaft conveyor (Patent), 2338

RADIOACTIVE WASTES/MECHANICAL PROPERTIES
Effect of impact energy on solid-waste composites of brittle and ductile materials, 398 (CONF-790420--)

RADIOACTIVE WASTES/MEETINGS
Research on deactivation of liquid, solid and gaseous radioactive wastes and decontamination of surfaces. Part 5. Investigations on methods and means for removal of radioactive aerosols and gases from air discharges, 3416 (INIS-mf--5574)

RADIOACTIVE WASTES/MELTING
Compatibility tests of materials for a prototype ceramic melter for defense glass-waste products, 634 (CONF-790420--)

RADIOACTIVE WASTES/METABOLISM
Advanced biological treatment of aqueous effluent from the nuclear fuel cycle, 1435 (CONF-800334--3)

RADIOACTIVE WASTES/MICROSTRUCTURE
Microstructural characterization of glass and ceramic simulated waste forms, 531 (SAND--79-1667C)

RADIOACTIVE WASTES/NEUTRON DETECTION
Measurement system for use in the selection of plutonium contaminated waste for disposal, 1388 (AERE-R--8301)

RADIOACTIVE WASTES/NONDESTRUCTIVE ANALYSIS
Measurement of uranium and plutonium in solid waste by passive photon or neutron counting and isotopic neutron source interrogation, 469 (LA--8294-MS)
Monte Carlo calculational design of an NDA instrument for the assay of waste products from high enriched uranium spent fuels, 2624 (LA-UR--79-3218)
Nondestructive analysis at B and W's uranium conversion plant, 588
Savannah River Plant californium-252 Shuffler electronics manual, 2623 (LA--8103-M)

RADIOACTIVE WASTES/NUCLEAR REACTION ANALYSIS
Measurement of uranium and plutonium in solid waste by passive photon or neutron counting and isotopic neutron source interrogation, 469 (LA--8294-MS)

RADIOACTIVE WASTES/PACKAGING
Choice of optimum packing for the transport and storage of radioactive wastes, 460 (INKA-Conf--78-396-000)
Commercial Waste and Spent Fuel Packaging Program. Quarterly technical progress report, April-June 1979, 251 (RHO-LO--79-83-3Q)
Containers used in packaging reactor waste, 2983
Packaging, transportation and disposal of reactor core components, 630 (CONF-780506--(Vol.2))
Puncture phenomena in low velocity impact of radioactive waste shipping containers, 159 (CONF-780506--(Vol.1))
Radioactive waste package acceptance criteria, 522 (RHO-CD--568)
Transuranic contaminated waste container characterization and data base. Revision I, 1008 (UCRL--15253)

RADIOACTIVE WASTES/PHASE STUDIES
Compatibility of actinides with HLW borosilicate glass: solubility and phase formation, 384 (CONF-790420--)
Phase boundary effects in metal matrix embedded glasses, 404 (CONF-790420--)

RADIOACTIVE WASTES/PHYSICAL RADIATION EFFECTS
Effects of irradiation on structural properties of crystalline ceramics, 396 (CONF-790420--)
Radiation effects in vitreous and devitrified simulated waste glass, 395 (CONF-790420--)

RADIOACTIVE WASTES/POLLUTION CONTROL
Ninth annual national conference on radiation control, 3605 (FDA--78-8054)

RADIOACTIVE WASTES/POLLUTION REGULATIONS
Pollution control in England and Wales (part 2), 3254

RADIOACTIVE WASTES/PRODUCTION
Overview of solid waste generation in the United States, 3100 (LA--8172-MS)

RADIOACTIVE WASTES/PUBLIC OPINION
Bibliography of articles on radioactive waste from 1973-1978, 490 (ORNL/OIAPA--14)

RADIOACTIVE WASTES/QUALITY CONTROL
Development of comprehensive waste acceptance criteria for commercial nuclear waste, 385 (CONF-790420--)

RADIOACTIVE WASTES/RADIATION HAZARDS
Disposal o radioactive wastes from fission reactors, 2336
Some environmental aspects of uranium mining and milling in Northern Australia, 2515

RADIOACTIVE WASTES/RADIATION MONITORING
Assessment of criticality monitoring techniques for a transuranic waste treatment facility, 439 (EGG-PHYS--5084)
Monitoring of plutonium contaminated solid waste streams. Chapter II: principles and theory of radiometric assay, 3434 (EUR--5636)
Monitoring of plutonium contaminated solid waste streams. Chapter IV: Passive neutron assay, 447 (EUR--6027)
Programmable calculator: alternative to minicomputer-based analyzer, 581

RADIOACTIVE WASTES/RADIOACTIVITY
Calculation of radionuclides in the defense waste processing facility, 434 (DP-MS--79-55)

RADIOACTIVE WASTES/RADIOASSAY
Determination of ^{233}U content in sealed containers and waste packages by gamma counting, 454 (INIS-mf--5372)
Passive gamma scanner for estimation of plutonium in fabrication waste, 2614 (BARC--986)

RADIOACTIVE WASTES/RADIOCHEMICAL ANALYSIS
Leaching properties and chemical compositions of calcines produced at the Idaho Chemical Processing Plant, 1441 (CONF-800987--1)

RADIOACTIVE WASTES/RADIOECOLOGICAL CONCENTRATION
Radioactive waste disposal areas and associated environmental surveillance data at Oak Ridge National Laboratory, 3418 (ORNL/TM--6893)

RADIOACTIVE WASTES/RADIOLYSIS
Degradation of transuranic-contaminated wastes under geologic isolation conditions, 1952 (SAND--79-2216A)
Gas generation from transuranic waste degradation: an interim assessment, 529 (SAND--79-0117)
Gas generation from transuranic waste degradaton, 1905 (SAND--79-0911C)
Gas production from alpha radiolysis of concrete containing tru incinerator ash. Progress report 1, April 1-July 31, 1978, 438 (DPST--78-150-1)
Investigation of hydrogen and methane production when irradiation of bitumen B45 and bitumen B45 mixed with solid substances, 457 (INIS-mf--5571)
Transuranic waste degradation under waste isolation pilot plant (WIPP) conditions, 2294

RADIOACTIVE WASTES/RADIOMETRIC ANALYSIS
A 1-nCi/g sensitivity transuranic waste assay system using pulsed neutron interrogation, 472 (LA-UR--80-1794)
Application of linear accelerator technology to the detection of trace amounts of transuranics in waste barrels, 470 (LA-UR--80-1274)
Control and accountability of special nuclear material waste and scrap by gamma-scan assay, 2637
Electronics system for transuranic waste assays using a photon interrogation technique, 751 (EGG-PHYS--5076)
Granulometric composition analysis of radioactive aerosols by means of the centrifugal aerosol spectrometer, 847 (INIS-mf--5574)
Photon interrogation annual report for FY 1979, 440 (EGG-PHYS--5085)

RADIOACTIVE WASTES/RADIONUCLIDE MIGRATION
Theoretical problems in defining dispersal in small mammals occupying the Subsurface Disposal Area, Idaho National Engineering Laboratory Site, 3367 (IDO--12088)
Waste Isolation Safety Assessment Program. Task 2: waste form release rate analysis, 1785 (PNL-SA--7992)
WISAP Task 4 (sorption-desorption analysis), 1786 (PNL-SA--7992)
RADIOACTIVE WASTES/RAIL TRANSPORT
Predicting routes of radioactive wastes moved on the U.S. railroad system, 187 (CONF-801115--5(Draft))
RADIOACTIVE WASTES/RECOMMENDATIONS
Cleaning up commingled uranium mill tailings: is Federal assistance necessary, 3109 (EMD--79-29)
RADIOACTIVE WASTES/REGULATIONS
Licensing and regulation of nuclear waste, 2651
Nuclear waste and Nuclear Regulatory Commission licensing, 2654
RADIOACTIVE WASTES/REMOTE HANDLING EQUIPMENT
Apparatus and process for handling dangerous fluent material (Patent), 2966
RADIOACTIVE WASTES/REMOVAL
Method of removing accumulated sludge within reactor container bottom housing (Patent), 2863
RADIOACTIVE WASTES/RETRIEVAL SYSTEMS
Retrieval system for emplaced spent unreprocessed fuel (SURF) in salt bed depository: accident event analysis and mechanical failure probabilities. Final report, 2037 (UCRL--15111)
RADIOACTIVE WASTES/REVIEWS
Characterization of nuclear waste, 520 (PNL-SA--7540)
Interactions of radioactive wastes with soils. A review, October 1976-May 1979, 3328 (NUREG/CR--1155)
RADIOACTIVE WASTES/RISK ASSESSMENT
Hazard index for underground toxic material, 3300 (UCRL--52889)
Meteorology and demography models for risk assessments of accidental atmospheric releases of nuclear waste. Phase 2 methodology, 2558 (UCID--17930)
Proposed federal radiation guidance for radioactive wastes, 2613 (PB--296947)
RADIOACTIVE WASTES/ROCK-FLUID INTERACTIONS
Influence of radiation on the system liquid radioactive wastes: geologic formation, 2259
RADIOACTIVE WASTES/SAFETY
Nuclear safety and radioactive wastes, 3073
RADIOACTIVE WASTES/SAMPLING
Equipment for collecting sludge samples from Savannah River Plant waste tanks, 11
RADIOACTIVE WASTES/SOLIDIFICATION
European experience with asphalt packaging of radioactive wastes, 156 (CONF-780506--(Vol.1))
The solidification of high-level radioactive wastes, 2992
RADIOACTIVE WASTES/SPRAY COATING
Radioactive substance solidifying device (Patent), 1186
RADIOACTIVE WASTES/STABILITY
Approach towards long term prediction of stability of nuclear waste forms, 386 (CONF-790420--)
Characterization and evaluation of multibarrier nuclear waste forms, 1412 (CONF-790420--)
Survey on product properties of bituminized waste concentrates from reprocessing, nuclear installations and nuclear power plants, 874 (KFK--2796)
RADIOACTIVE WASTES/STANDARDS
Materials Characterization Center program plan, 515 (PNL--3254)
RADIOACTIVE WASTES/STRESS ANALYSIS
Stress analysis of glass-canister interaction: a study of residual stresses and fracturing, 405 (CONF-790420--)
RADIOACTIVE WASTES/TEMPERATURE CONTROL
Thermal control of high energy nuclear waste, space option, 1596 (N--79-25869)
RADIOACTIVE WASTES/THERMAL DEGRADATION
Degradation of transuranic-contaminated wastes under geologic isolation conditions, 1952 (SAND--79-2216A)
Transuranic waste degradation under waste isolation pilot plant (WIPP) conditions, 2294
RADIOACTIVE WASTES/TRANSMUTATION
Gas core reactors for actinide transmutation. Annual report, 2777 (N--79-22876)
Reduction in the toxicity of fission product wastes through transmutation with deuterium-tritium fusion neutrons, 1034
RADIOACTIVE WASTES/TRANSPORT
Away-from reactor fuel element storage and transportation of nuclear waste, 296
Contact- handled transuranic waste transportation, 339
DOE transportation technology center: a program for nuclear transportation, 338
ORNL interface and logistics studies, 340
Radioactive waste: availability of solutions, 703 (DOE/EV--0046(Vol.2))
Safety analysis report for packaging a DOT 7A specification container for tritiated liquid wastes, 266 (SAND--80-8021)
Scale model experiments of energy material shipping containers, 3602 (DOE/EV--0046(Vol.2))
RADIOACTIVE WASTES/TRANSPORT REGULATIONS
1979 New Mexico legislative session: energy issues and legislation, 3175 (SAND--79-1095)
RADIOACTIVE WASTES/TRANSPORTATION SYSTEMS
Program strategy document for the Nuclear Materials Transportation Technology Center, 255 (SAND--79-1402)
Program strategy document for the nuclear materials. Transportation Technology Center (FY 80), 264 (SAND--80-0784)
RADIOACTIVE WASTES/UNDERGROUND DISPOSAL
National and international activities in the field of underground disposal of radioactive wastes, 2991
RADIOACTIVE WASTES/UPTAKE
Influence of the mode of uptake on the elimination of cobalt 60 by a phanerogam, a mollusc, a crustacean and a freshwater teleost, 2571
RADIOACTIVE WASTES/USES
Usage of radioactive wastes for district heating, 3673
RADIOACTIVE WASTES/VISCOSITY
Effects of composition on waste glass properties, 391 (CONF-790420--)
Viscosity and electrical conductivity of glass melts as a function of waste composition, 383 (CONF-790420--)
RADIOACTIVE WASTES/VOLUME
Wastes from selected activities in two light-water reactor fuel cycles, 518 (PNL--3425)
RADIOACTIVE WASTES/WASTE DISPOSAL
Disposal of hazardous wastes, 592
RADIOACTIVE WASTES/WASTE MANAGEMENT
Analytic dosimetry, 3295 (ORNL--5308)
Criteria for the management of redundant nuclear facilities, 3076
RADIOACTIVE WASTES/WASTE PROCESSING
The solidification of high-level radioactive wastes, 2992
RADIOACTIVE WASTES/WASTE TRANSPORTATION
ALARA studies on spent fuel and waste casks, 257 (SAND--79-1841)
Chemistry research and development. Progress report, December 1978-May 1979, 249 (RFP--2982)
Hazardous materials transportation. part 2. radioactive materials and wastes (citations from the NTIS data base). Report for 1964-Apr 1979, 226 (NTIS/PS--79/0704)
Interim report on concreted uranium fines and chips billet curing tests: a basis for resuming shipment of concreted uranium scrap billets, 2085 (UNI--1454)
Meteorology and demography models for risk assessments of accidental atmospheric releases of nuclear waste. Phase 2 methodology, 2558 (UCID--17930)
National Waste Terminal Storage Program: containment system concepts for transporting Type B quantities of transuranic waste, 248 (RFP--2862)
Packaging, transportation and disposal of reactor core components, 630 (CONF-780506--(Vol.2))
Proceedings of the nuclear materials transportation program development seminar, 259 (SAND--79-2262)
Public acceptance of radioactive waste transportation systems, 174 (CONF-780506--(Vol.2))
Technology Information Center, 533 (SAND--80-0023C)
Thermal response modeling of a contact-handled transuranic waste shipping container system to a fire, 261 (SAND--80-0062C)
Transportation of radioactive wastes from nuclear fuel cycles, 532 (SAND--79-1886C)
Various aspects of transportation, storage and discharge of radioactive wastes: future prospects, 595
Waste transport, 281
RADIOACTIVITY
See also ACTIVITY LEVELS
NATURAL RADIOACTIVITY
RADIOACTIVITY/DATA COMPILATION
Environmental radioactivity at the National Nuclear Research Centre, Pelindaba. Report for the year 1978, 3237 (PEL--270)
RADIOACTIVITY/TOXICITY
Preliminary assessment of the waste disposal problem for magnox steels, 3359 (CEGB-RD/B/N--4291)
RADIOACTIVITY TRANSPORT
Limits for radioactive material releases from nuclear fuel cycle facilities, 3297
RADIOAPPLICATORS
See RADIATION SOURCES
RADIOBIOLOGICAL EFFECTS
See BIOLOGICAL RADIATION EFFECTS
RADIOCARBON DATING
See CARBON 14
RADIODIAGNOSIS (RADIONUCLIDES)
See NUCLEAR MEDICINE
RADIOECOLOGICAL CONCENTRATION
See also ENVIRONMENTAL TRANSPORT
RADIOECOLOGICAL CONCENTRATION/A CODES
AIRDOS-EPA: a computerized methodology for estimating environmental concentrations and dose to man from airborne releases of radionuclides, 3205 (EPA--520/1-79-009)
RADIOECOLOGICAL CONCENTRATION/MATHEMATICAL MODELS
Radiological aspects of sea bed dumping in the deep oceans, 1798 (PNL-SA--8011)
Statistical analysis of selected parameters for predicting food chain transport and internal dose of radionuclides. Final report, 3375 (NUREG/CR--1004)
RADIOECOLOGY/BIBLIOGRAPHIES
Bibliography of marine radiation ecology prepared for the Seabed Program, 1965 (SAND--79-7102)
RADIOGRAPHY (BIOMEDICAL)
See BIOMEDICAL RADIOGRAPHY
RADIOISOTOPE BATTERIES/DESIGN
Electricity generator operated by radiation energy, 3643

RADIOISOTOPE HEAT SOURCES/RESEARCH PROGRAMS
Quarterly report on the strontium heat source development program, Advanced Nuclear Systems and Projects Division for July-September 1979, 3617 (PNL--1845-44)
RADIOISOTOPE HEAT SOURCES/USES
Radioisotope heating block (Patent), 3654
RADIOISOTOPE KINETICS
See RADIONUCLIDE KINETICS
RADIOISOTOPE MIGRATION
See RADIONUCLIDE MIGRATION
RADIOISOTOPES/ADSORPTION
Methods used to estimate geochemical aspects of radionuclide migration from waste repositories, 2186
Mobility and sorption processes of radioactive waste materials in subsurface migration, 1775 (PNL-SA--7352(Vol.2))
Preliminary results on comparison of adsorption-desorption methods and statistical techniques to generate Kd predictor equations, 2458 (PNL-SA--7245)
RADIOISOTOPES/CHEMICAL REACTIONS
Organic compounds identified in trench leachates from low-level radioactive waste disposal sites, 3449
RADIOISOTOPES/COMPLEXES
Organic compounds identified in trench leachates from low-level radioactive waste disposal sites, 3449
RADIOISOTOPES/CONTAINERS
Container for the transport and dosable removal of radioactive and for toxic media (Patent), 2860
RADIOISOTOPES/DECONTAMINATION
Method to decontaminate radioactive water in the presence of impurity substances, 3460
RADIOISOTOPES/DESORPTION
Methods used to estimate geochemical aspects of radionuclide migration from waste repositories, 2186
RADIOISOTOPES/ENVIRONMENTAL EXPOSURE PATHWAY
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1948 (SAND--79-2117)
Compartment model for assessing chronic radioactive releases (Use of BIODOSE program to compute biosphere transport parameters and doses to individuals and populations), 3381
Preliminary evaluation of the BIODOSE computer program (For simulating radionuclide transport through aquatic ecosystems and predicting the dose to humans), 3478 (UCID--18267)
Radiological aspects of sea bed dumping in the deep oceans, 1798 (PNL-SA--8011)
Radionuclide migration resulting from site intrusion, 3353
RADIOISOTOPES/ENVIRONMENTAL TRANSPORT
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1948 (SAND--79-2117)
Chemical migration of radionuclides in soil, 3350
Compartment model for assessing chronic radioactive releases (Use of BIODOSE program to compute biosphere transport parameters and doses to individuals and populations), 3381
Multicomponent mass transport model: a model for simulating migration of radionuclides in ground water, 1752 (PNL--3179)
Numerical analysis of radionuclide movement from a hypothetical nuclear waste repository (Ground-water mediated migration to river and subsequent population doses are modeled), 3450
Organic compounds identified in trench leachates from low-level radioactive waste disposal sites, 3449
Physical migration of radionuclides in soil, 3349
Preliminary evaluation of the BIODOSE computer program (For simulating radionuclide transport through aquatic ecosystems and predicting the dose to humans), 3478 (UCID--18267)
Preliminary geosphere transport modeling at the WIPP site, 3451
Radionuclide migration resulting from site intrusion, 3353
Review of hydrodynamic dispersion in transport models , 3448
Studies of nuclear waste migration in geologic media. Annual report, October 1978-September 1979, 1395 (ANL--80-36)
RADIOISOTOPES/INGESTION
Radionuclide migration resulting from site intrusion, 3353
RADIOISOTOPES/INHALATION
Radionuclide migration resulting from site intrusion, 3353
RADIOISOTOPES/LEACHING
Chemical migration of radionuclides in soil, 3350
Physical migration of radionuclides in soil, 3349
Review of hydrodynamic dispersion in transport models , 3448
RADIOISOTOPES/MIGRATION
Chemical migration of radionuclides in soil, 3350
Physical migration of radionuclides in soil, 3349
RADIOISOTOPES/MOBILITY
Mobility and sorption processes of radioactive waste materials in subsurface migration, 1775 (PNL-SA--7352(Vol.2))
RADIOISOTOPES/PARTICLE RESUSPENSION
Potential importance of resuspension during chronic releases to the atmosphere (Contribution of resuspension of radioisotopes to air concentrations and radiation exposures), 3259
RADIOISOTOPES/RADIATION HAZARDS
Radioactive materials and environment, 3500
RADIOISOTOPES/RADIATION MONITORING
Radioactivity in surface and coastal waters of the British Isles, 1976. Part 2. Areas other than the Irish Sea and its environs, 3435 (FRL--14)
RADIOISOTOPES/RADIOECOLOGICAL CONCENTRATION
Alpha-emitting nuclides in commercial fish species caught in the vicinity of Windscale, United Kingdom, and their radiological significance to man, 3489
Artificial radioactivity in the sea. Chapter 22, 3429
Distribution and avian export of gamma emitting radionuclides at the Test Reactor Area leaching ponds, 3471 (IDO--12088)
Evolution of gamma artificial radioactivity in coastal sediments of the English Channel during the years 1976, 1977 and 1978, 3485
Long-term accumulation factors for fish and sediments in the Bavarian Danube area, 3386
Preliminary evaluation of the BIODOSE computer program (For simulating radionuclide transport through aquatic ecosystems and predicting the dose to humans), 3478 (UCID--18267)
RADIOISOTOPES/RADIONUCLIDE MIGRATION
BIODOSE: a code for predicting the dose to man from radionuclides released from underground nuclear waste repositories, 3443 (UCID--18652)
Distribution of activation products from Barsebaeck nuclear power plant (Sweden) in the marine environment. Temporal and spatial variations as established by seaweed, 3481
Evolution of gamma artificial radioactivity in coastal sediments of the English Channel during the years 1976, 1977 and 1978, 3485
RADIOISOTOPES/ROOT ABSORPTION
Radionuclide migration resulting from site intrusion, 3353
RADIOISOTOPES/SPATIAL DISTRIBUTION
Distribution of activation products from Barsebaeck nuclear power plant (Sweden) in the marine environment. Temporal and spatial variations as established by seaweed, 3481
RADIOISOTOPES/USES
Application state of radioisotopes for medical use, 3653
RADIOLOGICAL PERSONNEL/RADIATION PROTECTION
Health physics considerations in intrainstitutional mobile nuclear medicine, 3680
Implementation of the radiation protection ordinance. Here: Radiation protection guidelines for the use of radioactive substances and the operation of apparatus for the generation of ionizing radiation and of irradiation devices with radioactive sources in medical therapy (Radiation Protection guideline in nuclear medicine), 3631
RADIOMETRIC ANALYSIS/DATA PROCESSING
Programmable calculator: alternative to minicomputer-based analyzer, 581
RADIONUCLIDE CONCENTRATION
See RADIOACTIVITY
RADIONUCLIDE KINETICS
(In living organisms.)
RADIONUCLIDE KINETICS/BIOLOGICAL INDICATORS
Preliminary results on accumulation and loss of artificial radionuclides in marine benthic algae, 3492
RADIONUCLIDE MIGRATION
(In environment.)
Analysis of migration pathways for geologic radioactive waste repositories, 2524 (DOE/EV--0046(Vol.2))
Chemical Engineering Division Fuel Cycle Programs. Quarterly progress report, April-June 1978, 32 (ANL--78-76)
Measurements of parameters essential to predicting nuclide migration, 2271
Methods used to estimate geochemical aspects of radionuclide migration from waste repositories, 2186
Monitoring and physical characterization of unsaturated zone transport. Laboratory analysis, 2457 (PNL--3304)
Oxidatyon of plutonium to higher states by radiation, 2189
RADIONUCLIDE MIGRATION/COMPUTER CALCULATIONS
Brine: a computer program to compute brine migration adjacent to a nuclear waste canister in a salt repository, 2031 (UCID--18666)
Numerical calculation of thermal convection in porous media in two dimensions with applications to nuclear repository design, 2034 (UCID--18700)
RADIONUCLIDE MIGRATION/COMPUTER CODES
Assessment of Effectiveness of Geologic Isolation Systems. Variable thickness transient ground-water flow model. Volume 2. Users' manual, 3403 (PNL--3160-2)
Finite-element three-dimensional ground-water (FE3DGW) flow model - formulation, program listings and users' manual, 1741 (PNL--2939)
GETOUT: a computer program for predicting radionuclide decay chain transport through geologic media, 2453 (PNL--2970)
RADIONUCLIDE MIGRATION/COMPUTERIZED SIMULATION
ARDISC Model: a computer program to calculate distribution of trace element migration in partially-equilibrating media, 1778 (PNL-SA--7352(Vol.2))
Bedded-salt repository analysis. Final report, 2061

(UCRL--15236)
BIODOSE: a code for predicting the dose to man from radionuclides released from underground nuclear waste repositories, 3443 (UCID--18652)
Theoretical and experimental evaluation of waste transport in selected rocks, 1768 (PNL-SA--7352(Vol.1))
RADIONUCLIDE MIGRATION/DATA ANALYSIS
Environmental studies data base: development and data synthesis activities of the US Subseabed Disposal Program, 2006 (SAND--80-2096C)
RADIONUCLIDE MIGRATION/EARTH ATMOSPHERE
Investigation of the atmospheric dispersion of radioactive gases and aerosols in the mesoscale (more than 15 km distance), 3219 (KFK--2750)
RADIONUCLIDE MIGRATION/ENVIRONMENTAL EXPOSURE PATHWAY
Radionuclide transfer in the environment and modality of man contamination, 3313
RADIONUCLIDE MIGRATION/ENVIRONMENTAL IMPACTS
Panel summary report, 3488
RADIONUCLIDE MIGRATION/ENVIRONMENTAL TRANSPORT
Study of radium state and behaviour in surface and waste waters, 3433 (CS-INIS--258)
RADIONUCLIDE MIGRATION/FIELD TESTS
Field test facility for monitoring water/radionuclide transport through partially saturated geologic media: design, construction, and preliminary description. Appendix I. Engineering drawings, 1754 (PNL--3226(App.1))
RADIONUCLIDE MIGRATION/FLOW MODELS
Assessment of Effectiveness of Geologic Isolation Systems. Variable thickness transient ground-water flow model. Volume 2. Users' manual, 3403 (PNL--3160-2)
Conceptual model for regional radionuclide transport from a basalt repository site. Final draft, technical memorandum, 2066 (UCRL--15252)
Conceptual model for regional radionuclide transport from a salt dome repository: a technical memorandum, 2064 (UCRL--15250)
Deep geological isolation of nuclear waste: numerical modeling of repository scale hydrology, 2062 (UCRL--15238)
Numerical modeling of solute transport in groundwater, 2048 (UCRL--15179)
Preliminary analytical repository flow model, 2051 (UCRL--15184)
RADIONUCLIDE MIGRATION/FORECASTING
NUTRAN: a computer model of long-term hazards from waste repositories, 2482 (UCRL--15150)
RADIONUCLIDE MIGRATION/HYDRODYNAMICS
Review of hydrodynamic dispersion in transport models , 3448
RADIONUCLIDE MIGRATION/INFORMATION RETRIEVAL
Status of sorption information retrieval system, 1744 (PNL--3139)
RADIONUCLIDE MIGRATION/INFORMATION SYSTEMS
Assessment of effectiveness of geologic isolation systems. CIRMIS data system. Volume 1. Initialization, operation, and documentation, 1746 (PNL--3161-1)
Assessment of effectiveness of geologic isolation systems. CIRMIS data system. Volume 3. Generator routines, 1748 (PNL--3161-3)
RADIONUCLIDE MIGRATION/KINETICS
Studies of nuclear-waste migration in geologic media. Annual report, October 1977-September 1978, 2409 (ANL--79-30)
RADIONUCLIDE MIGRATION/MATHEMATICAL MODELS
Adsorption and cation exchange during unidirectional flow in a saturated porous medium, 3348 (SAND--79-6006)
Application of the finite element method to the calculation of atmospheric transport from large area sources, 3260
Assessment of effectiveness of geologic isolation systems. CIRMIS data system. Volume 1. Initialization, operation, and documentation, 1746 (PNL--3161-1)
Assessment of effectiveness of geologic isolation systems. CIRMIS data system. Volume 3. Generator routines, 1748 (PNL--3161-3)
Assessment of effectiveness of geologic isolation systems. Test case release consequence analysis for a spent fuel repository in bedded salt, 1730 (PNL--2782)
Deep geological isolation of nuclear waste: numerical modeling of repository scale hydrology, 2062 (UCRL--15238)
Dispersive processes in models of regional radionuclide migration. Technical memorandum, 2065 (UCRL--15251)
Effect of source boundary conditions in predicting the migration of radionuclides through geologic media, 2591
Environmental studies data base: development and data synthesis activities of the US Subseabed Disposal Program, 2006 (SAND--80-2096C)
Evaluation methods for hydrogeologic conditions at radioactive waste burial sites, 2182
FEMWATER: a finite-element model of water flow through saturated-unsaturated porous media, 2446 (ORNL--5567)
Long-term subsurface migration of radionuclides from buried INEL transuranic waste, 1437 (CONF-800607--6)
Low level waste management: a compilation of models and monitoring techniques. Volume 1, 1668 (ORNL/Sub--79/13617/2)
Migration behavior of the $^{234}U \rightarrow ^{230}Th \rightarrow ^{226}Ra \rightarrow$ decay chain, 2593
Model for the transport of radionuclides and their decay products through geologic media, 2440 (ONWI--11(AECL-6325))
Numerical analysis of radionuclide movement from a hypothetical nuclear waste repository (Ground-water mediated migration to river and subsequent population doses are modeled), 3450
Preliminary evaluation of the BIODOSE computer program (For simulating radionuclide transport through aquatic ecosystems and predicting the dose to humans), 3478 (UCID--18267)
Preliminary geosphere transport modeling at the WIPP site, 3451
Processes and parameters involved in modeling radionuclide transport from bedded salt repositories. Final report. Technical memorandum, 2036 (UCRL--15095)
Radionuclide transport through heteogeneous media, 2486
Representation of radioelement migration in fissured rocks by a mathematical model, 3446 (SAND--79-6002)
Review of hydrodynamic dispersion in transport models , 3448
Specifications for the development of a fully three-dimensional numerical groundwater model for regional mass transport of radionuclides from a deep waste repository, 2063 (UCRL--15249)
Statistical analysis of selected parameters for predicting food chain transport and internal dose of radionuclides. Final report, 3375 (NUREG/CR--1004)
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Superposition solution of the transport of a radionuclide chain through a sorbing medium, 2592
Thermal gradient brine inclusion migration in salt study: gas-liquid inclusions, preliminary model, 1637 (ONWI--85)
Underground storage of nuclear industry wastes, 2348
Utilization of the temperature gradients measurements and climatological data in determination of permissible limits of radioactive gases discharge at nuclear power plants, 3212 (INIS-mf--5574)
Variable thickness transient ground-water flow model. Volume 3. Program listings, 1745 (PNL--3160-3)
Waste isolation safety assessment program. Task 4. Collection and generation of transport data theoretical and experimental evaluation of waste transport in selected rocks. Annual progress report, October 1, 1978-September 30, 1979, 1583 (LBL--9945)
WATER - a mathematical model for computing population doses in a watershed due to continuous radioactive effluents into water flows, 3479 (UJV--4508-D,CH,A,E)
Workshop on transport modeling for nuclear waste repositories, 2460 (PNL-SA--7468)
RADIONUCLIDE MIGRATION/MEASURING METHODS
Methods for determining radionuclide retardation factors: status report, 1759 (PNL--3349)
RADIONUCLIDE MIGRATION/MEETINGS
Migration of long-lived radionuclides in the geosphere. Proceedings, 2299
Waste Isolation Safety Assessment Program. Task 4. Third Contractor Information Meeting (Adsorption-desorption on geological media), 2462 (PNL-SA--8571(Vol.2))
RADIONUCLIDE MIGRATION/P CODES
Atmospheric dispersion calculation for posturated accident of nuclear facilities and the computer code: PANDA. Relative concentration (X/Q) and relative cloud-gamma dose (D/Q), 3238 (PNCT--841-79-03)
RADIONUCLIDE MIGRATION/RADIATION MONITORING
Field test facility for monitoring water/radionuclide transport through partially saturated geologic media: design, construction, and preliminary description (Battelle Pacific Northwest Laboratories), 1753 (PNL--3226)
Low level waste management: a compilation of models and monitoring techniques. Volume 1, 1668 (ORNL/Sub--79/1361772)
RADIONUCLIDE MIGRATION/RESEARCH PROGRAMS
Transport and transfer rates in the waters of the continental shelf (Atlantic Ocean), 3408 (COO--2185-12)
RADIONUCLIDE MIGRATION/STOCHASTIC PROCESSES
Stochastic aspects of migration from repository sites, 2303
RADIONUCLIDE MIGRATION/T CODES
Calculation of pollutant transfer in an aquifer TRIDISOL A1, A2, and 3 codes. Report DSN No. 270, 3314 (DOE/CEA/BMFT--8)
RADIONUCLIDES
See RADIOISOTOPES
RADIOPHARMACEUTICALS/MANUALS
Preparation and control of radiopharmaceuticals in hospitals. A guidebook, 3662
RADIOPHARMACEUTICALS/RADIOACTIVE WASTE DISPOSAL
Low-level radioactive wastes managements in universities, institutes and hospitals. On radiopharmaceutical waste disposal, 2223
RADIOPHARMACEUTICALS/TRANSPORT
Health physics considerations in intrainstitutional mobile nuclear medicine, 3680
RADIOPHARMACEUTICALS/USES
Application state of radioisotopes for medical use, 3653

RADIUM/ADSORPTION
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions, 2413 (BM-RI--8396)
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions. Report of investigations, 920 (PB--80-122740)
Absorption of radium and thorium from New Mexico uranium mill tailing solutions, 620 (BM-RI--8463)
Nuclide transport by groundwater in Swedish bedrock, 2581
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
RADIUM/DESORPTION
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions. Report of investigations, 920 (PB--80-122740)
RADIUM/MATERIALS RECOVERY
Removal of hazardous radionuclides from uranium ore and/or mill tailings. Progress report, October 1, 1978-September 30, 1979, 913 (ORNL/TM--7065)
RADIUM/RADIONUCLIDE MIGRATION
Determination of plutonium in man, 3324 (LA--8023-PR)
RADIUM/SORPTION
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
RADIUM/UPTAKE
Microbial uptake of uranium, cesium, and radium, 681 (CONF-800814--12)
RADIUM 226/DIFFUSION
Measurement of radon diffusion and exhalation from uranium mill tailings piles, 2490
RADIUM 226/ENVIRONMENTAL EXPOSURE PATHWAY
Assessment of the radiological impact of the inactive uranium-mill tailings at Shiprock, New Mexico, 2444 (ORNL--5447)
Dose exposure of the environmental population by natural and released Ra-226 from a uranium mine prospect. Radioecological researches in the region of Feldberg, 2532 (KFK--2866)
RADIUM 226/ENVIRONMENTAL TRANSPORT
Assessment of the radiological impact of the inactive uranium-mill tailings at Shiprock, New Mexico, 2444 (ORNL--5447)
Assessment of the radiological impact of the inactive uranium-mill tailings at Monument Valley, Arizona, 2445 (ORNL--5449)
Measurement of radon diffusion from uranium mill tailing piles, 3307 (NUREG/CR--1109)
Migration behavior of the $^{234}U \rightarrow ^{230}Th \rightarrow ^{226}Ra \rightarrow$ decay chain, 2593
Radiological survey of the inactive uranium-mill tailings at Tuba City, Arizona, 3331 (ORNL--5450)
Radiological survey of the inactive uranium-mill tailings at Slick Rock, Colorado, 3229 (ORNL--5452)
Radiological survey of the inactive uranium-mill tailings at Rifle, Colorado, 3230 (ORNL--5455)
Radiological survey of the inactive uranium-mill tailings at Ambrosia Lake, New Mexico, 3231 (ORNL--5458)
Two-dimensional finite element solution for the simultaneous transport of water and solutes through a nonhomogeneous aquifer under transient saturated unsaturated flow conditions, 3506 (CONF-7906121--1)
RADIUM 226/LEACHING
Rate controlling processes in the release of radium-226 from uranium mill tailings--2. kinetic study, 2497
Rate controlling processes in the release of radium-226 from uranium mill tailings. I. Leaching study, 2498
Rate controlling processes in the release of radium-226 from uranium mill tailings. II. Kinetic study, 2499
RADIUM 226/RADIATION HAZARDS
Rate controlling processes in the release of radium-226 from uranium mill tailings. I. Leaching study, 2498
Rate controlling processes in the release of radium-226 from uranium mill tailings. II. Kinetic study, 2499
RADIUM 226/RADIATION MONITORING
Radiological survey of the inactive uranium-mill tailings at Slick Rock, Colorado, 3229 (ORNL--5452)
Radiological survey of the inactive uranium-mill tailings at Ambrosia Lake, New Mexico, 3231 (ORNL--5458)
Radiological survey of the inactive uranium-mill tailings at Lakeview, Oregon, 3341 (ORNL--5464)
RADIUM 226/RADIOECOLOGICAL CONCENTRATION
Measurement of radon diffusion from uranium mill tailing piles, 3307 (NUREG/CR--1109)
Radiological survey of the radioactive sands and residues at Lowman, Idaho, 3342 (ORNL--5465)
RADIUM 226/ROOT ABSORPTION
Uptake of trace elements and radionuclides from uranium mill tailings by four-wing saltbush (Atriplex canescens) and alkali sacaton (Sporobolus airoides), 3374 (LA-UR--79-3045)
RADIUM 226/UPTAKE
Radium-226 in vegetation and substrates at inactive uranium mill sites, 3326 (LA--8183-T)
RADON/AIR SAMPLERS
Measurement of airborne radon daughter concentrations in the atmosphere, 3011
RADON/DIFFUSION
Emanating power and diffusion of radon through uranium mill tailings, 2518
Laboratory measurement of diffusion constants for mill tailings covers and its application, 2509
Methods for predicting the effectiveness of uranium mill tailings covers, 2569
Reduction of radon flux from uranium tailings, 2570
RADON/DOSE RATES
Field applications of a radon barrier to reduce indoor airborne progeny, 2610
RADON/DOSIMETRY
Analytic dosimetry, 3295 (ORNL--5308)
RADON/ENVIRONMENTAL EXPOSURE PATHWAY
Assessment of the radiological impact of the inactive uranium-mill tailings at Shiprock, New Mexico, 2444 (ORNL--5447)
RADON/ENVIRONMENTAL TRANSPORT
Application of the finite element method to the calculation of atmospheric transport from large area sources, 3260
Assessment of the radiological impact of the inactive uranium-mill tailings at Shiprock, New Mexico, 2444 (ORNL--5447)
Assessment of the radiological impact of the inactive uranium-mill tailings at Monument Valley, Arizona, 2445 (ORNL--5449)
Characterization of uranium tailings cover materials for radon flux reduction, 2439 (NUREG/CR--1081)
Radon: characteristics, natural occurrence, technological enhancement, and health effects, 2598
RADON/GAS FLOW
Uranium mill tailings stabilization, 960 (PNL-SA--8414)
RADON/HEALTH HAZARDS
Role of radon on comparisons of effects of radioactivity releases from nuclear power, coal burning, and phosphate mining, 3671
RADON/MEASURING METHODS
Laboratory measurement of diffusion constants for mill tailings covers and its application, 2509
RADON/MIGRATION
Radionuclide migration resulting from site intrusion, 3353
RADON/RADIATION HAZARDS
Radon: characteristics, natural occurrence, technological enhancement, and health effects, 2598
RADON/RADIOECOLOGICAL CONCENTRATION
Radon monitoring program, February-April 1980, 3224 (MLM--2758)
RADON/RADIONUCLIDE MIGRATION
Attenuation of radon flux from uranium mill tailings by consolidation, 3263
RADON/REVIEWS
Radon: characteristics, natural occurrence, technological enhancement, and health effects, 2598
RADON/RISK ASSESSMENT
Radon: an environmental pollutant, 2539 (PB--296947)
RADON/SEALING MATERIALS
Development of a radon barrier, 3685
RADON 219/RADIOECOLOGICAL CONCENTRATION
Assessment of two-filter technique for correlating actinium-227 concentrations in soils, 3343 (ORNL/MIT--299)
RADON 222/DAUGHTER PRODUCTS
Measurements of radon daughter concentrations in structures built on or near uranium mine tailings, 2612
RADON 222/DIFFUSION
Measurement of radon diffusion and exhalation from uranium mill tailings piles, 2490
Moisture effects on radon diffusion, 2510
RADON 222/DOSIMETRY
Technology assessments, 3232 (ORNL--5595)
RADON 222/ENVIRONMENTAL IMPACTS
Annual rate of release of radon to the atmosphere as a result of coal combustion in the United Kingdom, 3270
RADON 222/ENVIRONMENTAL TRANSPORT
Measurement of radon diffusion from uranium mill tailing piles, 3307 (NUREG/CR--1109)
RADON 222/RADIATION DOSES
Potential health effects of radon-222 to the general public from uranium milling, 3191 (CONF-791009--39)
RADON 222/RADIATION HAZARDS
Assessment of radon progeny inhalation exposure from low-level wastes of phosphate mining in Florida, 3395 (PB--296947)
RADON 222/RADIATION MONITORING
Review of radon monitoring at the DOE-Niagara Falls Storage Site, 3227 (NLCO--004EV)
RADON 222/RADIOECOLOGICAL CONCENTRATION
Measurements of radon daughter concentrations in structures built on or near uranium mine tailings, 2612
Measurement of radon diffusion from uranium mill tailing piles, 3307 (NUREG/CR--1109)
RADON ISOTOPES/CONTAINMENT
Reduction of radon flux from uranium tailings, 2160
RADON ISOTOPES/RADIATION DOSES
Emission and control of radon at active uranium mines and mills, 2505
RADON ISOTOPES/RADIOECOLOGICAL CONCENTRATION
Estimated average annual radon-222 concentrations around the former uranium mill site in Shiprock, New Mexico. Final technical note, 3293 (PB--291892)
RAIL TRANSPORT/COMPARATIVE EVALUATIONS
Truck vs rail shipment of spent nuclear fuel, 173 (CONF-780506--(Vol.2))
RAIL TRANSPORT/ECONOMIC ANALYSIS
Placing the special trains issue in perspective (Rail

shipment of spent fuels), 154 (CONF-780506--(Vol.1))
RAIL TRANSPORT/EVALUATION
Compatibility of radioactive materials transportation with railroad operations: two views, 155 (CONF-780506--(Vol.1))
RAIL TRANSPORT/FORECASTING
Predicting routes of radioactive wastes moved on the U.S. railroad system, 187 (CONF-801115--5(Draft))
RAIL TRANSPORT/GOVERNMENT POLICIES
Government's duty, as shipper and regulator, to keep spent fuel and waste on track: the ICC cases, 152 (CONF-780506--(Vol.1))
RAIL TRANSPORT/LEGAL ASPECTS
Government's duty, as shipper and regulator, to keep spent fuel and waste on track: the ICC cases, 152 (CONF-780506--(Vol.1))
Placing the special trains issue in perspective (Rail shipment of spent fuels), 154 (CONF-780506--(Vol.1))
Private shippers' efforts to transport spent nuclear fuel and waste by rail: the Interstate Commerce Commission cases, 153 (CONF-780506--(Vol.1))
RAIL TRANSPORT/RISK ASSESSMENT
Radiological risk analysis of truck and rail transportation of nuclear wastes, 179 (CONF-780506--(Vol.2))
RAIL TRANSPORT/SAFETY
Placing the special trains issue in perspective (Rail shipment of spent fuels), 154 (CONF-780506--(Vol.1))
Railroad perspective on transportation of spent fuel and high level waste and recent ICC decisions, 151 (CONF-780506--(Vol.1))
RAIL TRANSPORT/TRANSPORT REGULATIONS
Placing the special trains issue in perspective, 242 (PNL-SA--6519)
RAILROAD CARS/DECONTAMINATION
Fleet servicing facilities for servicing, maintaining, and testing rail and truck radioactive waste transport systems: functional requirements, technical design concepts and options cost estimates and comparisons, 231 (ORNL/SUB--79/13866/1)
RAILROAD CARS/INSPECTION
Fleet servicing facilities for servicing, maintaining, and testing rail and truck radioactive waste transport systems: functional requirements, technical design concepts and options cost estimates and comparisons, 231 (ORNL/SUB--79/13866/1)
RAILROAD CARS/MAINTENANCE
Fleet servicing facilities for servicing, maintaining, and testing rail and truck radioactive waste transport systems: functional requirements, technical design concepts and options cost estimates and comparisons, 231 (ORNL/SUB--79/13866/1)
RAJASTHAN-1 REACTOR/RADIOACTIVE WASTE PROCESSING
Management of radioactive waste from Rajasthan Atomic Power Station, 2788
RAJASTHAN-2 REACTOR/RADIOACTIVE WASTE PROCESSING
Management of radioactive waste from Rajasthan Atomic Power Station, 2788
RANCHO SECO-1 REACTOR
ARAC feasibility study for the NRC Phase I: final report, 3046 (UCID--18315)
RANCHO SECO-1 REACTOR/ENVIRONMENTAL IMPACTS
Rancho Seco building wake effects on atmospheric diffusion: simulation in a meteorological wind tunnel, 2895 (NUREG/CR--1286)
RAPS-1 REACTOR

RARE EARTH COMPOUNDS/CHEMICAL PREPARATION
Nuclear waste chemistry, 488 (ORNL--5665)
RARE EARTHS
See also CERIUM
EUROPIUM
LANTHANUM
NEODYMIUM
PROMETHIUM
SAMARIUM
TERBIUM
YTTERBIUM
RARE EARTHS/ADSORPTION
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
RARE EARTHS/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
RARE EARTHS/ION EXCHANGE
Separation of americium, curium, and rare earths from high-level wastes by oxalate precipitation: experiments with synthetic waste solutions, 910 (ORNL/TM--6445)
RARE EARTHS/PRECIPITATION
Separation of americium, curium, and rare earths from high-level wastes by oxalate precipitation: experiments with synthetic waste solutions, 910 (ORNL/TM--6445)
RARE EARTHS/SEPARATION PROCESSES
Recovery of actinoids from waste solutions of fuel reprocessing. Literature survey of the chemical processes of partitioning transplutonium elements in the high-level liquid wastes of fuel reprocessing, 2, 859 (JAERI-M--8339)
RARE EARTHS/SOLVENT EXTRACTION
Extraction of americium, curium, strontium and rare earths from aqua-tail solutions of WWER spent fuel element reprocessing, 58 (INIS-mf--5567)
Recovery of actinide values (Patent), 1124
Recovery process (Patent), 562
RARE GASES
See also HELIUM
KRYPTON
RADON
XENON
RARE GASES/SEPARATION PROCESSES
Radioactive rare gas separation performance of a two-unit series-type separation cell, 1313
RARE GASES/UNDERGROUND DISPOSAL
Feasibility of underground storage/disposal of noble gas fission products, 1394 (ANL--78-81)
RATS/POPULATION DYNAMICS
Species composition and local movement of small mammals on the Radioactive Waste Management Complex, Idaho National Engineering Laboratory Site, 3366 (IDO--12088)
RATS/THERMOLUMINESCENT DOSIMETRY
Radiation dosimetry of small mammals inhabiting a liquid radioactive waste disposal area, 3363 (IDO--12088)
Radiation doses to small mammals at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3364 (IDO--12088)
REACTOR ACCIDENTS
See also LOSS OF COOLANT
MELTDOWN
REACTOR CORE DISRUPTION
REACTOR ACCIDENTS/BIBLIOGRAPHIES
Accident risks in nuclear facilities (a bibliography with abstracts). Report for 1964-November 1979, 3043 (PB--801269)
REACTOR ACCIDENTS/DECOMMISSIONING
INEL waste cleanup, 671 (CONF-791234--7)
REACTOR ACCIDENTS/DECONTAMINATION
INEL waste cleanup, 671 (CONF-791234--7)
REACTOR ACCIDENTS/EDUCATION
Post-Kemeny nuclear industry in the United States, 2561
REACTOR ACCIDENTS/EMERGENCY PLANS
Post-Kemeny nuclear industry in the United States, 2561
REACTOR ACCIDENTS/ENVIRONMENTAL IMPACTS
Observations on the use of the consequence model CRAC for small nonreactor atmospheric releases, 2947 (SAND--80-0366)
REACTOR ACCIDENTS/RADIATION MONITORING
Radioactive plume from the Three Mile Island accident: xenon-133 in air at a distance of 375 kilometers, 2899
REACTOR ACCIDENTS/RADIOACTIVE EFFLUENTS
New test set up for the in situ determination of percolation parameters in rock, 2915
Observations on the use of the consequence model CRAC for small nonreactor atmospheric releases, 2947 (SAND--80-0366)
REACTOR ACCIDENTS/RESEARCH PROGRAMS
Present status of nuclear power safety studies in JAERI, 3080
REACTOR ACCIDENTS/SIMULATION
Containment of gaseous fission products in caverns, 3356
REACTOR ACCIDENTS/THREE MILE ISLAND-2 REACTOR
Week they almost lost Pennsylvania, 3062
REACTOR COMPONENTS

Ocean energy: forms and prospects, 3105
REACTOR COOLING SYSTEMS/WATER
Ocean energy: forms and prospects, 3105
REACTOR CORE DISRUPTION/FIRES
Reactor safety. Annual technical progress report, Government fiscal year 1979 (LMFBR), 3034 (ESG-DOE--13294)
REACTOR CORE DISRUPTION/RADIOACTIVE AEROSOLS
Reactor safety. Annual technical progress report, Government fiscal year 1979 (LMFBR), 3034 (ESG-DOE--13294)

Decay heat, 2847
REACTOR CORES/LAND TRANSPORT
Experience in complying with quality assurance requirements for cask lifting devices, 178 (CONF-780506--(Vol.2))
REACTOR DECOMMISSIONING
Boiling water reactor, 2808 (NUREG/CP--0008)
Decommissioning nuclear power plants: what are the problems that need to be overcome, 2816
Pressurized water reactor addendum, 2809 (NUREG/CP--0008)
Suggested policy and rule changes, 2807 (NUREG/CP--0008)
REACTOR DECOMMISSIONING/ACTIVITY LEVELS
Radioactive inventory of a decommissioned Magnox power station structure. 1. Measurements of neutron induced activity in samples from the reactor island, 2758 (CEGB-RD/B/N--4231)
Residual radioactivity, 2810 (NUREG/CP--0008)
REACTOR DECOMMISSIONING/COST
Decommissioning nuclear facilities, 2830
REACTOR DECOMMISSIONING/ENVIRONMENTAL IMPACT STATEMENTS
Generic environmental impact statement, 2811 (NUREG/CP--0008)
REACTOR DECOMMISSIONING/MEETINGS
State workshops for review of the Nuclear Regulatory Commission's decommissioning policy, 2806 (NUREG/CP--0008)
REACTOR DECOMMISSIONING/RADIOACTIVE EFFLUENTS
Establishment of activity limits for items to be released for unrestricted use, 2988
Methodology for determining acceptable residual radioactive contamination levels at decommissioned nuclear facilities/sites, 2989
REACTOR DECOMMISSIONING/RISK ASSESSMENT
Methodology for determining acceptable residual radioactive contamination levels at decommissioned nuclear facilities/sites, 2989
REACTOR DISMANTLING
Decommissioning nuclear power plants: what are the problems that need to be overcome, 2816
What can be done with old nuclear power plants, 3054
REACTOR DISMANTLING/RADIATION HAZARDS
Preliminary assessment of the waste disposal problem for magnox steels, 3359 (CEGB-RD/B/N--4291)
REACTOR FUEL ELEMENTS
See FUEL ELEMENTS
REACTOR FUELING/SPENT FUEL STORAGE
Drum for storing nuclear reactor fuel elements (Patent), 2850
REACTOR FUELS
See NUCLEAR FUELS
REACTOR KINETICS/CROSS SECTIONS
Reactor application of actinide cross section data, 2791 (BNL--50991)
REACTOR LICENSING
Nuclear waste and Nuclear Regulatory Commission licensing (NRC must consider waste issue before issuing operating license), 2654
REACTOR MAINTENANCE
Remotely operated ultrasonic decontamination system for fuel transfer pool, 2742
REACTOR OPERATION/DATA ACQUISITION
Operational safety experience reporting in the United States, 2805 (INIS-mf--4767)
REACTOR OPERATION/RADIATION HAZARDS
Nuclear power and safety - summary and conclusions of the report of the Nuclear Power Commission. 2. Routine operation, 3055
REACTOR SAFETY
(Theoretical and experimental investigations of the behavior of reactor types and designs under various real or hypothetical accidents.)
Nuclear safety and radioactive wastes, 3073
Organisation of nuclear safety in France, 3045 (RISLEY-Trans--3352)

Studies of the subsurface effects of earthquakes, 3546 (DP-MS--80-16)
ROCKS/FRACTURE PROPERTIES
Analysis of the state of strain around different geometries with radial cracks in an indefinite medium due to expansive forces, 3547 (DS--1972-11)
ROCKS/MATHEMATICAL MODELS
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
ROCKS/PERMEABILITY
Analysis of groundwater flow around a high-level waste repository in crystalline rock, 3532
Assessment of thermally induced water movement around a radioactive waste depository in hard rock, 2512
Calculation of ground water movements in the Sternoe area in Blekinge, Sweden, 3404 (SKBF/KBS-TR--79-08)
Estimation of hydraulic conductivity in Swedish precambrian crystalline bedrock, 3533
Field permeability and hydraulic potential measurements in crystalline rock and solute transport through finely fractured media, 3535
Permeability measurements on cementitious material for nuclear waste isolation, 2275
Permeability characterization of nearly impermeable rock masses for nuclear waste repository siting, 3576
Role of large-scale permeability measurements in fractured rock and their application at Stripa, 1582 (LBL--9903)
ROCKS/RADIATION EFFECTS
Information base for waste repository design. Volume 3. Waste/rock interactions. Technical report, 1699 (PB--293403)
ROCKS/RADIONUCLIDE MIGRATION
Far field heating effects of a radioactive waste depository in hard rock, 2358
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, October 1-December 31, 1979, 1552 (LA--8210-PR)
Leach test methodology for the Waste/Rock Interactions Technology Program, 1757 (PNL--3326)
ROCKS/RESPONSE FUNCTIONS
Field measurement techniques: status and needs (Response to thermomechanical experiments), 3552 (LBL--9425)
ROCKS/ROCK MECHANICS
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
ROCKS/ROCK-FLUID INTERACTIONS
Influence of radiation on the system liquid radioactive wastes: geologic formation, 2259
ROCKS/SORPTIVE PROPERTIES
Effect of ionizing radiation on the sorptive capacity of soils, 1516 (INIS-mf--5572)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, October 1-December 31, 1979, 1552 (LA--8210-PR)
ROCKS/STRESS ANALYSIS
Analysis of the state of strain around different geometries with radial cracks in an indefinite medium due to expansive forces, 3547 (DS--1972-11)
Numerical modeling of the geomechanical response of a rock mass to a radioactive waste repository, 1831 (RHO-BWI-SA--20)
ROCKS/STRESSES
Information base for waste repository design. Volume 3. Waste/rock interactions. Technical report, 1699 (PB--293403)
ROCKS/TEMPERATURE EFFECTS
In situ heating experiments in hard rock: their objectives and design, 2376
Progress report on the Canadian underground heater experiment, 2373
ROCKS/THERMAL CONDUCTIVITY
Climax granite test results, 2024 (UCID--18502)
Critical review of the methods of determining the thermal conductivity of rocks, 3577
Thermophysical properties of rocks: a perspective on data needs, sources and accuracy, 1922 (SAND--79-1259C)
ROCKS/THERMAL DIFFUSIVITY
Climax granite test results, 2024 (UCID--18502)
ROCKS/THERMAL STRESSES
Far field heating effects of a radioactive waste depository in hard rock, 2358
ROCKS/THERMODYNAMIC PROPERTIES
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
ROCKY FLATS PLANT
Chemistry research and development. Progress report, December 1978-May 1979 (Component, pilot plant, instrumentation), 249 (RFP--2982)
ROCKY FLATS PLANT/RADIOACTIVE EFFLUENTS
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
Plutonium in soil adjacent to Rocky Flats Plant, 2507

RODENTS/POPULATION DYNAMICS
Theoretical problems in defining dispersal in small mammals occupying the Subsurface Disposal Area, Idaho National Engineering Laboratory Site, 3367 (IDO--12088)
ROOM AND PILLAR MINING/DEFORMATION
Measurements of very large deformations in potash salt in conjunction with an ongoing mining operation, 1959 (SAND--79-2254C)
RUBIDIUM/ACTIVATION ANALYSIS

[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
RUBIDIUM/ADSORPTION
Systematic study of metal ion sorption on selected geologic media. Sesquiennual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
RUBIDIUM/SOLUBILITY
Hydrothermal glass reactions in salt brine, 2268
RUBIDIUM/X-RAY FLUORESCENCE ANALYSIS
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
RUBIDIUM 88/BETA DOSIMETRY
Beta dose in skin from gaseous radioactive reactor effluents, 2964
RURAL AREAS/RADIOACTIVE WASTE FACILITIES
Social impact mitigation and nuclear waste repository siting, 1462 (DOE/TIC--11260)
RUTHENIUM/ADSORPTION
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1978, 1774 (PNL-SA--7352(Vol.2))
RUTHENIUM/COPRECIPITATION
Processing of radioactive ruthenium with aluminosilicate gels, 1096
RUTHENIUM/GAMMA SPECTROSCOPY
Trace elements retained in washed nuclear fuel reprocessing solvents, 43 (DP--1527)
RUTHENIUM/RADIOACTIVE WASTE PROCESSING
Capture of ruthenium, iodine and tritium from discharge gases, produced during the process of dissolution at the device SU-2 of spent fuel elements from nuclear power plant with WWR reactors, 843 (INIS-mf--5574)
Process for decontaminating a radioactive effluent in particular ruthenium (Patent), 1366
RUTHENIUM/SEPARATION PROCESSES
Nuclear waste chemistry (Pd-Ru separation), 488 (ORNL--5665)
RUTHENIUM/SORPTION
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
RUTHENIUM/VOLATILITY
Volatilities of ruthenium, iodine, and technetium on calcining fission product nitrate wastes, 686 (CONF-801038--4)
RUTHENIUM 103/RADIOECOLOGICAL CONCENTRATION
Radioruthenium in the environment, 3266
RUTHENIUM 106/ADSORPTION
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
Variables affecting sorption and transport of radionuclides in Hanford subsoils, 2274
RUTHENIUM 106/DECONTAMINATION
Study on decontamination of radioactive ruthenium by steel wool in waste solution, 1151
RUTHENIUM 106/DESORPTION
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
RUTHENIUM 106/DIALYSIS
Removal of radioactive ions from nuclear waste solutions by electrodialysis, 1307
RUTHENIUM 106/ENVIRONMENTAL EXPOSURE PATHWAY
Determination of safe radioactive releases to the atmosphere fron the nuclear power site, Duynefontein, 3360 (CONF-7604154--)
RUTHENIUM 106/EVAPORATION
Some studies of nuclide losses. 2. Cold finger, 1289
RUTHENIUM 106/RADIATION MONITORING
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
RUTHENIUM 106/RADIOECOLOGICAL CONCENTRATION
Radioruthenium in the environment, 3266
Some aspects of accumulation of radionuclides in coastal sediments, 3439 (INIS-mf--5372)
RUTHENIUM 106/RADIONUCLIDE KINETICS
Flux of certain radionuclides in the blood-clam Anadara granosa Linnaeus under environmental conditions, 3493
RUTHENIUM 106/VOLATILITY
Volatility of ruthenium-106, technetium-99, and iodine-129, and the evolution of nitrogen oxide compounds during the calcination of high-level, radioactive nitric acid waste, 903 (ORNL--5562)
RUTHENIUM COMPLEXES/ABSORPTION
Adsorption of tetranitronitrosylruthenate on activated charcoal, 3660
RUTHENIUM COMPLEXES/CHEMICAL REACTION KINETICS
Behaviours of trinitratonitrosyl complexes of ruthenium in dilute nitric acid solutions, 1127
RUTHENIUM OXIDES/EVAPORATION
Confinement of ruthenium oxides volatilized during nuclear fuels reprocessing, 1027
RUTHENIUM OXIDES/FISSION PRODUCTS
Confinement of ruthenium oxides volatilized during nuclear fuels reprocessing, 1027
RUTHENIUM OXIDES/TRAPPING
Confinement of ruthenium oxides volatilized during nuclear fuels reprocessing, 1027
RUTHENIUM OXIDES/VOLATILITY
Confinement of volatilized ruthenium oxides, 1239

SALT DEPOSITS/EXPLORATION
Geological and hydrological exploration of Gulf Coast

Salt Domes, 1645 (ONWI--88)
SALT DEPOSITS/FLOW MODELS
Response of salt migration to dissolution in salt domes and how it affects a radioactive waste isolation facility design, 2392
SALT DEPOSITS/FLOW RATE
Monitoring current rates of salt dome movement, 2397
Times and rates of salt movement in North Louisiana, 2396
SALT DEPOSITS/FLUID FLOW
Environmental chemistry, 1659 (ORNL--5485)
Mineralogical aspects of fluid migration in the Salt Block II experiment, 1961 (SAND--79-2423)
SALT DEPOSITS/GEOCHEMISTRY
Review of geochemical measurement techniques for a nuclear waste repository in bedded salt, 2029 (UCID--18664)
SALT DEPOSITS/GEOLOGIC HISTORY
Identifying suitable piercement salt domes for nuclear waste storage sites, 3558 (PNL--2864)
SALT DEPOSITS/GEOLOGY
German geological exploration and hydrology of Asse II, 1647 (ONWI--88)
Identifying suitable piercement salt domes for nuclear waste storage sites, 3558 (PNL--2864)
Report on geologic exploration activities, 1458 (DOE/RL/01830--14)
Times and rates of salt movement in North Louisiana, 2396
SALT DEPOSITS/GROUND MOTION
High pecision measurement of horizontal and vertical movement over salt domes, 2393
SALT DEPOSITS/HEAT TRANSFER
Computer thermal modeling for the Salt Rock II experiment, 1957 (SAND--79-2250)
Heat transfer analysis of the geologic disposal of spent fuel and high-level waste storage canisters, 1873 (RHO-SA--160)
SALT DEPOSITS/HEATING
Asse II in-situ brine migration tests, 1655 (ONWI--88)
SALT DEPOSITS/HYDRAULICS
Flow properties of rock salt: study on the extrapolation of test results to long time periods, 2138 (UCRL-Trans--11550)
SALT DEPOSITS/HYDROLOGY
General modeling, considerations and data requirements for consequence analysis, 2442 (ONWI--88)
German geological exploration and hydrology of Asse II, 1647 (ONWI--88)
Hydrologic stability of salt domes, 2398
SALT DEPOSITS/INCLUSIONS
Application of studies of fluid inclusions in Permian Salado salt, New Mexico, to problems of siting the Waste Isolation Pilot Plant, 2265
Fluid inclusions in salt from the Rayburn and Vacherie domes, Louisiana, 2090 (USGS-OFR--79-1675)
Thermal gradient brine inclusion migration in salt study: gas-liquid inclusions, preliminary model, 1637 (ONWI--85)
SALT DEPOSITS/MASS TRANSFER
Response of salt migration to dissolution in salt domes and how it affects a radioactive waste isolation facility design, 2392
SALT DEPOSITS/MATHEMATICAL MODELS
Rock salt constitutive modeling, 2053 (UCRL--15204)
SALT DEPOSITS/MECHANICAL PROPERTIES
Geomechanics activities conducted at Sandia National Laboratories in support of the waste isolation pilot plant, 2001 (SAND--80-1592C)
Status of the simulation experiments in cased boreholes to be run in the Asse salt mine, 2366
Thermomechanical response of WIPP repositories, 1966 (SAND--79-7111)
SALT DEPOSITS/METAMORPHISM
Responsibility without a parallel, 2238
SALT DEPOSITS/MINERALOGY
Mineralogical aspects of fluid migration in the Salt Block II experiment, 1961 (SAND--79-2423)
SALT DEPOSITS/ORIGIN
Responsibility without a parallel, 2238
SALT DEPOSITS/PERMEABILITY
Brine experiments by the BGR in the Asse II, 1654 (ONWI--88)
Laboratory studies of water transport in rock salt, 3522 (SAND--79-1519)
Laboratory studies of water transport in rock salt, 3529
SALT DEPOSITS/PHYSICAL RADIATION EFFECTS
Radiation damage studies on synthetic NaCl crystals and natural rock salt for waste disposal applications, 400 (CONF-790420--)
SALT DEPOSITS/RADIATION EFFECTS
Expected environments in high-level nuclear waste and spent fuel repositories in salt, 1679 (ORNL/TM--7201)
Radiation damage measurements on rock salt and other minerals for waste disposal applications. Quarterly report, January 1, 1980-March 31, 1980, 1407 (BNL--27841)
Recent radiation effect studies on natural and synthetic rock salt for waste disposal applications, 1405 (BNL--26555)
Stored energy of gamma-irradiated WIPP salt, 1981 (SAND--80-0416)
Strain related radiation damage measurements in rock salt for waste disposal applications. Quarterly report, April 1, 1979-June 30, 1979, 1404 (BNL--26455)
Strain related radiation damage measurements in rock salt for waste disposal applications. Quarterly report, July 1-September 30, 1979, 1406 (BNL--26931)
SALT DEPOSITS/RADIATION HARDENING
Radiation hardening of rocksalt, 2000 (SAND--80-1566C)
SALT DEPOSITS/RADIATION HEATING
Comparison of temperature calculations for an arbitrary high-level waste disposal configuration in salt formations, 1474 (ECN--63)
SALT DEPOSITS/RADIONUCLIDE MIGRATION
Conceptual model for regional radionuclide transport from a salt dome repository: a technical memorandum, 2064 (UCRL--15250)
General basin modeling for site suitability. Draft report 1. Baseline data, 2047 (UCRL--15178)

Flow properties of rock salt: study on the extrapolation of test results to long time periods, 2138 (UCRL-Trans--11550)
SALT DEPOSITS/ROOM AND PILLAR MINING
Measurements of very large deformations in potash salt in conjunction with an ongoing mining operation, 1959 (SAND--79-2254C)
SALT DEPOSITS/SEISMIC SURVEYS
Identifying suitable piercement salt domes for nuclear waste storage sites, 3558 (PNL--2864)
Seismic-refraction survey to the top of salt in the north end of the Salt valley anticline, Grand County, Utah, 2088 (USGS-OFR--79-1212)
SALT DEPOSITS/SHEAR PROPERTIES
Creep curves and fitting parameters for southeastern New Mexico bedded salt, 1970 (SAND--80-0087)
SALT DEPOSITS/SITE PREPARATION
Geologic, stratigraphic, thermal, and mechanical factors which influence repository design in the bedded salt environment, 2052 (UCRL--15203)
SALT DEPOSITS/SORPTIVE PROPERTIES
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
SALT DEPOSITS/SPECIFIC HEAT
Statistical sensitivity analysis of a simple nuclear waste repository model, 1680 (ORNL/TM--7310)
Thermal properties measurements on rocksalt samples from the site of the proposed Waste Isolation Pilot Plant, 1992 (SAND--80-0799)
SALT DEPOSITS/STABILITY
Geomechanics of bedded salt, 3571 (UCRL--15117)
Hydrologic stability of salt domes, 2398
Monitoring current rates of salt dome movement, 2397
SALT DEPOSITS/STRESS ANALYSIS
Borehole-inclusion stressmeter measurements in bedded salt, 1900 (SAND--79-0377)
SALT DEPOSITS/TECTONICS
Assessment of tectonic hazards to waste storage in interior-basin salt domes, 3539 (PNL--2851)
SALT DEPOSITS/TEMPERATURE EFFECTS
Computer thermal modeling for the Salt Rock II experiment, 1957 (SAND--79-2250)
Design, installation, and operation of heater tests in dome salt, 2379
Expected environments in high-level nuclear waste and spent fuel repositories in salt, 1679 (ORNL/TM--7201)
Mineralogical aspects of fluid migration in the Salt Block II experiment, 1961 (SAND--79-2423)
Salt Block II: description and results, 1953 (SAND--79-2226)
Status of the simulation experiments in cased boreholes to be run in the Asse salt mine, 2366
SALT DEPOSITS/TEMPERATURE GRADIENTS
Geothermal in situ experiments in the Asse salt-mine, 2368
Investigations of temperature development in the ultimate storage of radioactive waste. Pt. 1. Calculation of time- and site-dependent temperature fields, 2243
Investigations on the borehole climate in an in-situ simulation experiment in the Asse salt mine. A presentation of the concept and preliminary works, 2371
Modeling of brine migration in halite, 2484 (UCRL--82228)
SALT DEPOSITS/THERMAL CONDUCTIVITY
Geothermal in situ experiments in the Asse salt-mine, 2368
Statistical sensitivity analysis of a simple nuclear waste repository model, 1680 (ORNL/TM--7310)
Thermal conductivity of rocksalt and other geologic materials from the site of the proposed waste isolation pilot plant, 2477 (SAND--79-1665C)
Thermal conductivity of rocksalt and other geologic

materials from the site of the proposed waste isolation pilot plant, 1936 (SAND--79-1665)
Thermal properties measurements on rocksalt samples from the site of the proposed Waste Isolation Pilot Plant, 1992 (SAND--80-0799)
SALT DEPOSITS/THERMAL EXPANSION
Thermal properties measurements on rocksalt samples from the site of the proposed Waste Isolation Pilot Plant, 1992 (SAND--80-0799)
SALT DEPOSITS/THERMAL STRESSES
Rock salt constitutive modeling, 2053 (UCRL--15204)
SALT DEPOSITS/THERMODYNAMIC PROPERTIES
Annular air space effects on nuclear waste canister temperatures in a deep geologic waste repository, 2028 (UCID--18662)
Geomechanics activities conducted at Sandia National Laboratories in support of the waste isolation pilot plant, 2001 (SAND--80-1592C)
Heated mine room and pillar secondary creep response, 1921 (SAND--79-1199)
Predicted temperature/time histories resulting from the burial of nuclear waste canisters in bedded salt, 3565 (SAND--79-1773)
Summary of research and development activities in support of waste acceptance criteria for WIPP, 1926 (SAND--79-1305)
Thermal conductivity, diffusivity and expansion of Avery Island salt at pressure and temperature, 2078 (UCRL--83789)
Thermomechanical response of WIPP repositories, 1966 (SAND--79-7111)
SALT DEPOSITS/THICKNESS
Preliminary regional study of the present and possible future oil and gas development in the areas of thick rock salt and shale deposits of Michigan, Ohio, Pennsylvania, and western New York as of December 1975, 1667 (ORNL/SUB--75/87989)
SALT DEPOSITS/UNDERGROUND DISPOSAL
Geoscience data base handbook for modeling a nuclear waste repository. Volume 1, 1608 (NUREG/CR--0912(Vol.1))
SALT DEPOSITS/USES
Salt dome utilization and environmental considerations, 2399
SALT DEPOSITS/VOIDS
Impulse radar scanning of intact salt at the Avery Island Mine, 1989 (SAND--80-0632)
SALT DEPOSITS/WATER INFLUX
Salt Block II: description and results, 1953 (SAND--79-2226)
SALT DEPOSITS/WELL LOGGING
Basic data report for drillhole WIPP 30 (Waste Isolation Pilot Plant - WIPP), 1898 (SAND--79-0284)
SALTS/MASS TRANSFER
Investigation of salt transport in vertical boreholes in brine invasion into freshwater aquifers. Technical report, 1634 (ONWI--77)
SALTS/RADIATION EFFECTS
Stored energy of gamma-irradiated WIPP salt, 1981 (SAND--80-0416)
SALTS/STORED ENERGY
Stored energy of gamma-irradiated WIPP salt, 1981 (SAND--80-0416)
SAMARIUM/ACTIVATION ANALYSIS
Trace elements retained in washed nuclear fuel reprocessing solvents, 43 (DP--1527)
SAMARIUM/ADSORPTION
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
SAMARIUM/SOLVENT EXTRACTION
Calculation of distribution ratios of rare earth elements in multistage counter current extraction with HDEHP, 3676
SAND/RADIONUCLIDE MIGRATION
Containment of gaseous fission products in caverns, 3356
Radiological safety studies on the ground disposal of radioactive wastes. Distribution and migration of radionuclides in an aerated zone, 1525 (JAERI-M--8044)
Study on safety ground storage and disposal of radioactive wastes. Distribution and migration of ^{60}Co and ^{137}Cs in a sand layer, 3323 (JAERI-M--7642)
SANDIA LABORATORIES/MONITORING
The monitoring system of the Tritium Research Laboratory, Sandia Laboratories, Livermore, California, 3594 (CONF-780110--)
SANDIA LABORATORIES/RADIATION MONITORING
Sandia National Laboratories 1979 environmental monitoring report, 3246 (SAND--80-0342)
SANDIA LABORATORIES/RESEARCH PROGRAMS
Application of QA geoscience investigations, 1987 (SAND--80-0531C)
SANDSTONES/RADIONUCLIDE MIGRATION
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
SANDSTONES/THERMAL CONDUCTIVITY
Thermal conductivity of the rocks in the Bureau of Mines Standard Rock Suite, 3557 (ORNL/TM--7052)
SANITARY LANDFILLS/RADIATION MONITORING
Formerly utilized MED/AEC sites remedial action program. Radiological survey of the Middlesex Municipal Landfill, Middlesex, New Jersey. Final report, 2415 (DOE/EV--0005/20)
SANITARY LANDFILLS/RADIOACTIVE WASTE DISPOSAL
Environmental protection, 3358 (BNL--51066)
SANITARY LANDFILLS/RADIOACTIVITY
Formerly utilized MED/AEC sites remedial action program. Radiological survey of the Middlesex Municipal Landfill, Middlesex, New Jersey. Final report, 2415 (DOE/EV--0005/20)
SAVANNAH RIVER PLANT/DOSE COMMITMENTS
Comparison of calculated and measured radiation doses from chronic aqueous releases, 3423
SAVANNAH RIVER PLANT/ENVIRONMENTAL IMPACTS
Preliminary assessment of the aquatic impacts of a proposed defense waste processing facility at the Savannah River Plant, 3495 (DP-MS--79-95)
SAVANNAH RIVER PLANT/HIGHLEVEL RADIOACTIVE WASTES
Characteristics of defense high-level waste, 480 (NUREG/CR--0685)
SAVANNAH RIVER PLANT/HYDROLOGY
Hydrology of buried crystalline rock at Savannah River Plant near Aiken, South Carolina, 1461 (DOE/SR-WM--79-2)
SAVANNAH RIVER PLANT/RADIOACTIVE EFFLUENTS
Comparison of calculated and measured radiation doses from chronic aqueous releases, 3423
Measured hourly and daily average ^{85}Kr concentrations within 10 km of the Savannah River Plant (1976), 3204 (EML--373)
SAVANNAH RIVER PLANT/RADIOACTIVE WASTE DISPOSAL
Migration of transuranic nuclides in earthen burial trenches at the Savannah River Plant, 2310
SAVANNAH RIVER PLANT/RADIOACTIVE WASTE FACILITIES
Remote experimental facility to solidify SRP high-heat waste, 1266
SAVANNAH RIVER PLANT/RADIOACTIVE WASTE MANAGEMENT
Demonstration of radioactive sludge removal from SRP storage tank, 436 (DPSPU--79-30-11)
Final environmental impact statement. Long-term management of defense high-level radioactive wastes (research and development program for immobilization), Savannah River Plant, Aiken, South Carolina, 1450 (DOE/EIS--0023)
High-level defense waste solidification at the Savannah River Plant, 729 (DP-MS--79-94)
Report of conceptual design for TRU solid waste facilities adjacent to 200H Area: Savannah River Plant, 1473 (DPE--3519)
Savannah River waste management program plan, 425 (DOE/SR-WM--80-1)
Waste management program technical progress report, October-December 1978, 427 (DP--78-125-4)
Waste management program technical progress report, January-March 1979, 428 (DP--79-125-1)
Waste management program. Technical progress report, April-June 1979, 429 (DP--79-125-2)
Waste Management Program. Technical progress report, October-December 1979, 431 (DP--79-125-4)
Waste management program technical progress report, July-September 1979, 430 (DP--79-125-3)
Waste management program technical progress report, January-March 1980, 432 (DP--80-125-1)
SAVANNAH RIVER PLANT/RADIOACTIVE WASTE PROCESSING
Preliminary evaluation of alternative forms for immobilization of Savannah River Plant high-level waste (Eleven alternative solid forms), 719 (DP--1545)
SAVANNAH RIVER PLANT/RADIOACTIVE WASTE STORAGE
Multibarrier storage of Savannah River Plant waste (Borosilicate glass in canister), 1468 (DP-MS--79-31)
SAVANNAH RIVER PLANT/RADIOACTIVE WASTES
Equipment for collecting sludge samples from Savannah River Plant waste tanks, 11
SAVANNAH RIVER PLANT/REMOTE HANDLING EQUIPMENT
Equipment for collecting sludge samples from Savannah River Plant waste tanks, 11
SAVANNAH RIVER PLANT/STORAGE FACILITIES
Report of conceptual design for TRU solid waste facilities adjacent to 200H Area: Savannah River Plant, 1473 (DPE--3519)
SCANDIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
SCHISTS
Measurements of parameters essential to predicting nuclide migration, 2271
SCHISTS/RADIONUCLIDE MIGRATION
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
SCHISTS/SORPTIVE PROPERTIES
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
SCHMEHAUSEN THTR REACTOR
See THTR-300 REACTOR
SCHNELLER NATRIUMGEKUEHLTER REAKTOR
See SNR-1 REACTOR
SCHOOL FACILITIES
See EDUCATIONAL FACILITIES
SCHOOL PLANT
See EDUCATIONAL FACILITIES
SCINTILLATION COUNTING/LIQUID WASTES
Study of alternative methods for the management of

liquid scintillation counting wastes, 479 (NUREG--0656)
SCRUBBERS/MATHEMATICAL MODELS
Analysis of barium hydroxide and calcium hydroxide slurry carbonation reactors, 908 (ORNL/MIT--300)
SCRUBBERS/PERFORMANCE
Analysis of barium hydroxide and calcium hydroxide slurry carbonation reactors, 908 (ORNL/MIT--300)
SEA BED/GEOLOGY
Geotechnical properties of sediments from North Pacific and Northern Bermuda Rise, 2005 (SAND--80-2035C)
SEA BED/MINING
Ocean mining technology and environmental studies, 3407
SEA BED/PHASE TRANSFORMATIONS
Thermal and chemical properties of saturated marine clays in a near field environment, 1930 (SAND--79-1475C)
SEA BED/PHYSICAL PROPERTIES
Geotechnical properties of sediments from North Pacific and Northern Bermuda Rise, 2005 (SAND--80-2035C)
SEA BED/RADIONUCLIDE MIGRATION
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1948 (SAND--79-2117)
SEA BED/TENSILE PROPERTIES
Geotechnical properties of sediments from North Pacific and Northern Bermuda Rise, 2005 (SAND--80-2035C)
SEA BED/THERMAL CONDUCTIVITY
Thermal and chemical properties of saturated marine clays in a near field environment, 1930 (SAND--79-1475C)
SEA DISPOSAL
See MARINE DISPOSAL
SEA LEVEL
Sea level report (Past and possible future changes), 3581 (PNL--2851)
SEAFOOD/CONTAMINATION
Incidence of myeloid leukaemia in Lancashire, 3666
SEALS/LEAK TESTING
Methods for evaluating the leak tightness of spent fuel container closures, 228 (NUREG/CR--1312)
SEAS
See also ATLANTIC OCEAN
PACIFIC OCEAN
SEAS/ECOLOGY
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1949 (SAND--79-2117C)
SEAS/ENERGY SOURCES
Ocean energy: forms and prospects, 3105
SEAS/RADIOECOLOGY
Radioactivity in the marine environment. Chapter 15, 3430
SEAS/RADIONUCLIDE MIGRATION
Biological ramifications of the subseabed disposal of high-level nuclear waste, 1949 (SAND--79-2117C)
Measurement of penetration depths of plutonium and americium in sediment from the ocean floor, 1432 (CONF-791112--52)
SEAS/WATER POLLUTION
Marine pollution - Facts and fiction, the situation in Britain, 3412
SEAWATER/CORROSIVE EFFECTS
On board corrosion analysis of a recovered nuclear waste container. Technical note, 3616 (PB--301163)
SEAWATER/GEOCHEMISTRY
Geochemical studies supporting the US subseabed disposal program, 1997 (SAND--80-1407C)
SEAWATER/RADIOACTIVITY
Artificial radioactivity in the sea. Chapter 22, 3429
SEAWATER/RADIONUCLIDE MIGRATION
Assessment of the radiological impact of tritium released to sea from the Windscale fuel element reprocessing plant, 3455
Monitoring for the dispersion of discharged tritium in sea-water around the Tokai-Mura fuel reprocessing plant, 2280
SEAWATER/TEMPERATURE EFFECTS
Geochemical studies supporting the US subseabed disposal program, 1997 (SAND--80-1407C)
SEBACEOUS GLANDS
See SKIN
SEDIMENTARY ROCKS
See also LIMESTONE
SANDSTONES
SEDIMENTARY ROCKS/HYDROLOGY
Hydrologic properties of shale and related argillaceous rocks, 3572 (UCRL--15149)
SEDIMENTATION/RADIONUCLIDE MIGRATION
^{137}Cs - contamination indicator of waste water discharged from A-1 nuclear power plant, 3474 (INIS-mf--4637)
SEDIMENTS/CHEMICAL COMPOSITION
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
Granulometric data 216-B Crib Facilities monitoring well sediments, 1859 (RHO-LD--45)
SEDIMENTS/CONTAMINATION
Application of atomic energy in agriculture. Annual Report 1978, 3371 (INIS-mf--5349)
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
SEDIMENTS/CONVECTION
Finite element analysis of thermal convection in deep ocean sediments, 1975 (SAND--80-0310C)
SEDIMENTS/CREEP
Creep of ocean sediments resulting from the isolation of radioactive wastes, 1960 (SAND--79-2328C)
SEDIMENTS/FLUID FLOW
Finite element analysis of thermal convection in deep ocean sediments, 1975 (SAND--80-0310C)
SEDIMENTS/GEOCHEMISTRY
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
Geochemical studies supporting the US subseabed disposal program, 1997 (SAND--80-1407C)
SEDIMENTS/MECHANICAL PROPERTIES
Sediment mechanical response due to emplacement of a waste canister, 1974 (SAND--80-0307C)
SEDIMENTS/PERMEABILITY
Geotechnical properties of sediments from North Pacific and Northern Bermuda Rise, 2005 (SAND--80-2035C)
SEDIMENTS/PHYSICAL PROPERTIES
Geotechnical properties of sediments from North Pacific and Northern Bermuda Rise, 2005 (SAND--80-2035C)
Thermophysical properties of deep ocean sediments, 1999 (SAND--80-1533C)
SEDIMENTS/RADIOACTIVITY
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
SEDIMENTS/RADIOCHEMICAL ANALYSIS
Radiological survey of the radioactive sands and residues at Lowman, Idaho, 3342 (ORNL--5465)
SEDIMENTS/RADIONUCLIDE MIGRATION
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
Compartment model for assessing chronic radioactive releases CUse of BIODOSE program to compute biosphere transport parameters and doses to individuals and populations), 3381
Leaching technique for studying actinide-contaminated Hanford sediments, 1864 (RHO-LD--98)
Measurement of penetration depths of plutonium and americium in sediment from the ocean floor, 1432 (CONF-791112--52)
Monitoring and physical characterization of unsaturated zone transport. Laboratory analysis, 2457 (PNL--3304)
Plutonium contamination of the 'Altrhein'. The contamination of the sediments, 3440 (KFK--2892)
Radiological survey of the inactive uranium-mill tailings at Rifle, Colorado, 3230 (ORNL--5455)
Radiological survey of the inactive uranium-mill tailings at Ambrosia Lake, New Mexico, 3231 (ORNL--5458)
Some aspects of accumulation of radionuclides in coastal sediments, 3439 (INIS-mf--5372)
Stratigraphy of the late Cenozoic sediments beneath the 216-A Crib Facilities, 1860 (RHO-LD--71)
Study of radium state and behaviour in surface and waste waters, 3433 (CS-INIS--258)
Transuranic distribution beneath a retired underground disposal facility, Hanford Site, 1869 (RHO-SA--131)
SEDIMENTS/SOIL CHEMISTRY
Soil (sediment) properties of twelve Hanford wells with geologic interpretation, 1862 (RHO-LD--82)
SEDIMENTS/SOIL MECHANICS
Soil (sediment) properties of twelve Hanford wells with geologic interpretation, 1862 (RHO-LD--82)
SEDIMENTS/SORPTIVE PROPERTIES
Monitoring and physical characterization of unsaturated zone transport. Laboratory analysis, 2457 (PNL--3304)
Sorption studies at Hanford for the control of radioactive wastes, 1872 (RHO-SA--155)
SEDIMENTS/STRATIGRAPHY
Stratigraphy of the late Cenozoic sediments beneath the 216-B and C crib facilities, 1861 (RHO-LD--72)
Stratigraphy of the late Cenozoic sediments beneath the 216-A Crib Facilities, 1860 (RHO-LD--71)
SEDIMENTS/TEMPERATURE EFFECTS
Analysis of heat and mass transfer in sub-seabed disposal of nuclear waste, 1976 (SAND--80-0312C)
Geochemical studies supporting the US subseabed disposal program, 1997 (SAND--80-1407C)
SEDIMENTS/TENSILE PROPERTIES
Geotechnical properties of sediments from North Pacific and Northern Bermuda Rise, 2005 (SAND--80-2035C)
SEDIMENTS/THERMODYNAMIC PROPERTIES
Sediment mechanical response due to emplacement of a waste canister, 1974 (SAND--80-0307C)
Thermophysical properties of deep ocean sediments, 1999 (SAND--80-1533C)
SEDIMENT-WATER INTERFACES/GEOCHEMISTRY
Geochemical studies supporting the US subseabed disposal program, 1997 (SAND--80-1407C)
SEDIMENT-WATER INTERFACES/TEMPERATURE EFFECTS
Geochemical studies supporting the US subseabed disposal program, 1997 (SAND--80-1407C)
SEEDS/GERMINATION
Effect of soil affixants on germination, emergence, and growth of cheatgrass and Russian thistle, 3400
SELENIUM/ABSORPTION SPECTROSCOPY

Interlaboratory comparison of arsenic, molybdenum and selenium analyses from uranium mill tailings, 2488
SELENIUM/ACTIVATION ANALYSIS
Interlaboratory comparison of arsenic, molybdenum and selenium analyses from uranium mill tailings, 2488
SELENIUM/ADSORPTION
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
SELENIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
SELENIUM/ENVIRONMENTAL EXPOSURE PATHWAY
Geochemistry of radioactive waste disposal, 2135
SELENIUM/GEOCHEMISTRY
Geochemistry of radioactive waste disposal, 2135
SELENIUM/MILL TAILINGS
Interlaboratory comparison of arsenic, molybdenum, and selenium analyses from uranium mill tailings, 3411
SELENIUM/QUANTITATIVE CHEMICAL ANALYSIS
Interlaboratory comparison of arsenic, molybdenum, and selenium analyses from uranium mill tailings, 3411
Interlaboratory comparison of arsenic, molybdenum and selenium analyses from uranium mill tailings, 2488
SELENIUM/ROOT ABSORPTION
Uptake of trace elements and radionuclides from uranium mill tailings by four-wing saltbush (Atriplex canescens) and alkali sacaton (Sporobolus airoides), 3374 (LA-UR--79-3045)
SELENIUM/SPECTROPHOTOMETRY
Interlaboratory comparison of arsenic, molybdenum and selenium analyses from uranium mill tailings, 2488
SELENIUM 75/RADIOECOLOGICAL CONCENTRATION
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
SENA REACTOR
See ARDENNES REACTOR
SENDAI-1 REACTOR/REACTOR LICENSING
Report on installation of reactor in the Sendai Nuclear Power Plant of Kyushu Electric Company, 2824
SENN REACTOR
See GARIGLIANO REACTOR
SEQUESTRENE
See EDTA
SEWAGE
See LIQUID WASTES
SEWAGE/MONITORING
On-line monitoring of toxic materials in sewage at the Lawrence Livermore Laboratory, 3410 (UCRL--83664)
SEWAGE/RADIOACTIVITY
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
SEWAGE SLUDGE/ANAEROBIC DIGESTION
Effect of gamma radiation on yields of methane gas from the anaerobic bacterial digestion of sewage sludge, 1348
SEWAGE SLUDGE/CHEMICAL RADIATION EFFECTS
Effect of gamma radiation on yields of methane gas from the anaerobic bacterial digestion of sewage sludge, 1348
SEWAGE SLUDGE/RADIATION MONITORING
Medically used radionuclides in sewage sludge, 3461
SEWAGE SLUDGE/RADIOACTIVE WASTE DISPOSAL
Environmental protection, 3358 (BNL--51066)
SEWAGE SLUDGE/RADIOACTIVITY
Medically used radionuclides in sewage sludge, 3461
SEWAGE SLUDGE/RADIOSTERILIZATION
Beneficial Uses Program. Progress report for period ending June 30, 1978, 3619 (SAND--78-1951)
SEWAGE TREATMENT
See WASTE PROCESSING
SGHWR REACTOR/RADIOACTIVE WASTE MANAGEMENT
Characterisation, handling and treatment of waste arisings from the Winfrith SGHWR, 2973
SHAFT EXCAVATIONS
See also MINING
RADIOACTIVE WASTE DISPOSAL
Information base for waste repository design. volume 6. excavation technology. Technical report, 1702 (PB--293406)
SHAFT EXCAVATIONS/CLOSURES
Basalt Waste Isolation Project borehole plugging studies: an overview, 1838 (RHO-BWI-SA--49)
Sealing a nuclear waste repository in Columbia River basalt: preliminary results, 1839 (RHO-BWI-SA--50)
SHAFT EXCAVATIONS/SEALS
Information base for waste repository design. Volume 1. Borehole and shaft sealing. Technical report, 1697 (PB--293401)
SHALES
Review of Y/OWI/TM-36: repository design performance in salt, granite, shale or basalt (Underground disposal of radioactive wastes), 2046 (UCRL--15177)
SHALES/CHEMICAL REACTIONS
Hydrothermal reactivity of simulated nuclear waste forms and water-catalysed waste-rock interactions, 2267
Radioactive waste-form and rock interactions: a discussion, 2311
SHALES/COMPARATIVE EVALUATIONS
Hazardous high-level radioactive waste disposal in geologic formations, 2126
SHALES/DIAGENESIS
Geothermal alteration of clay minerals and shales: diagenesis, 3513 (ONWI--21)
SHALES/FRACTURING
Flowability of bulk solids used in shale fracturing grouts as determined by the Jenike and Johanson method, 1673 (ORNL/TM--6882)
SHALES/GEOLOGY
Geoscience data base handbook for modeling a nuclear waste repository, 1609 (NUREG/CR--0912(Vol.2))
Report on geologic exploration activities, 1458 (DOE/RL/01830--14)
SHALES/GEOPHYSICS
Geoscience data base handbook for modeling a nuclear waste repository, 1609 (NUREG/CR--0912(Vol.2))
SHALES/HYDROLOGY
Geoscience data base handbook for modeling a nuclear waste repository, 1609 (NUREG/CR--0912(Vol.2))
Hydrologic properties of shale and related argillaceous rocks, 3572 (UCRL--15149)
SHALES/INJECTION WELLS
Shale fracturing injections at Oak Ridge National Laboratory: 1977-1979 series, 1681 (ORNL/TM--7421)
SHALES/INVENTORIES
Preliminary inventory of pre-Cenozoic clay shales and argillites of the conterminous United States, 1944 (SAND--79-2015)
SHALES/RADIONUCLIDE MIGRATION
General basin modeling for site suitability. Draft report 1. Baseline data, 2047 (UCRL--15178)
Microcrack technology. Progress report, 1 April 1979-29 February 1980, 1453 (DOE/ER/04972--2)
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
SHALES/RESPONSE FUNCTIONS
Conasauga near-surface heater experiment. Final report, 1939 (SAND--79-1855)
SHALES/ROCK-FLUID INTERACTIONS
Waste Isolation Safety Assessment Program, 1573 (LBL--8648)
SHALES/SORPTIVE PROPERTIES
Cation exchange and selectivity in heated minerals, 3398
Chromatographic K/sub d/ values of radionuclides and the effect of redox potentials on sorption of radionuclides by geologic media, 2459 (PNL-SA--7352(Vol.1))
Shale as a radioactive waste repository: the importance of vermiculite, 2288
Sorption-desorption of long-lived radionuclide species on geologic media. Annual report, 2466 (PNL-SA--8571(Vol.2))
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Studies of radionuclide availability and migration at the Nevada Test Site relevant to radioactive waste disposal, 1769 (PNL-SA--7352(Vol.1))
Theoretical and experimental evaluation of waste transport in selected rocks, 1768 (PNL-SA--7352(Vol.1))
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
SHALES/THERMODYNAMIC PROPERTIES
Far-field thermomechanical response of argillaceous rock to emplacement of a nuclear-waste repository, 3567 (SAND--79-2230)
SHALES/THERMODYNAMICS
Geothermal alteration of clay minerals and shales: diagenesis, 3513 (ONWI--21)
SHEATHS (FUEL)
See FUEL CANS
SHIELD TEST REACTOR
See STIR REACTOR
SHIELDING MATERIALS/COMPARATIVE EVALUATIONS
Uranium-lead shielding for nuclear material transportation systems, 166 (CONF-780506--(Vol.1))
SHIELDING MATERIALS/THERMAL TESTING
Solid neutron shield material tests, 3668
SHIELDS/NEUTRON TRANSPORT
Calculation of gamma-rays and fast neutrons fluxes with the program Mercure-4, 3591 (CEA-CONF--4493)
SHIELDS/PROTON TRANSPORT
Calculation of gamma-rays and fast neutrons fluxes with the program Mercure-4, 3591 (CEA-CONF--4493)
SHIMANE-1 REACTOR/REACTOR LICENSING
Alteration of reactor installation (reactor facilities) in Shimane Nuclear Power Station of The Chugoku Electric Power Co., Inc., 3085
SHIMANE-1 REACTOR/REACTOR SAFETY
Alteration of reactor installation (reactor facilities) in Shimane Nuclear Power Station of The Chugoku Electric Power Co., Inc., 3085
SHIPMENT

SHIPPINGPORT REACTOR/RADIATION MONITORING
1978 annual environmental report. Volume 2. Radiological, 3195 (DOE/PNRO--0292-T1)
SHIPS
See also NUCLEAR SHIPS
SHIPS/DESIGN
Motor vessel HONOURA MARU: a specialized carrier for spent fuel, 162 (CONF-780506--(Vol.1))
SHRUBS/PLANT GROWTH

Effect of soil affixants on germination, emergence, and growth of cheatgrass and Russian thistle, 3400
SHRUBS/RADIONUCLIDE KINETICS
Uptake of trace elements and radionuclides from uranium mill tailings by four-wing saltbush (Atriplex canescens) and alkali sacaton (Sporobolus airoides) (Radium 226; Uranium; Molybdenum; Selenium; Vanadium; Astatine), 3374 (LA-UR--79-3045)
SILICA/SOLUBILITY
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
SILICATES
See also PYROXENES
SILICATES/RADIATION EFFECTS
Application of borate glasses and various boron bearing glasses to the management of French radioactive wastes, 625 (CEA-CONF--4435)
SILICON/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
SILICON/LEACHING
Leaching of actinides and technetium from simulated high-level waste glass, 513 (PNL--3152)
SILICON OXIDES
See also QUARTZ
SILICON OXIDES/CHEMICAL PROPERTIES
Characterization of pollucite as a material for long-term storage of cesium-137, 2161
SILICON OXIDES/MAGNETIC SUSCEPTIBILITY
Magnetic susceptibility of sodium disilicate glasses containing PuO_2 (4 to 300°K), 1423 (CONF-790881--1)
SILICON OXIDES/MICROSTRUCTURE
Characterization of pollucite as a material for long-term storage of cesium-137, 2161
SILICON OXIDES/PHASE STUDIES
Phase separation in the glass containing high level radioactive waste, 1152
SILICON OXIDES/PHYSICAL PROPERTIES
Characterization of pollucite as a material for long-term storage of cesium-137, 2161
SILVER/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
SITE SELECTION
Derivation of parameters necessary for the evaluation of performance of sites for deep geological repositories with particular reference to bedded salt, Livermore, California. Volume II. Appendices, 2042 (UCRL--15166(Vol.2))
SITE SELECTION/DECISION MAKING
Site identification presentation: Basalt Waste Isolation Project, 1828 (RHO-BWI-LD--22)
SITE SELECTION/PLANNING
Policy based on expansion of existing sites, 2911 (ORAU/IEA--80-3(P))
SITE SELECTION/REVIEWS
Review of geotechnical measurement techniques for a nuclear waste repository in bedded salt, 2038 (UCRL--15141)
SITES (REACTOR)
See REACTOR SITES
SKELETON/DOMINANT MUTATIONS
Genetic risks from radiation: recent assessments by the BEIR and UNSCEAR Committees and suggestions as to how future research can improve such estimates, 3597 (CONF-790977--1)
SKELETON/GENETICALLY SIGNIFICANT DOSE
Genetic risks from radiation: recent assessments by the BEIR and UNSCEAR Committees and suggestions as to how future research can improve such estimates, 3597 (CONF-790977--1)
SKIN/DEPTH DOSE DISTRIBUTIONS
Beta dose in skin from gaseous radioactive reactor effluents, 2964
SLAGGING PYROLYSIS PROCESS/OFFGAS SYSTEMS
R and D for an off-gas treatment system for a slagging pyrolysis radioactive waste incinerator. Final report for Phase II, 994 (SAI--78-904-LJ)
SLAGS/LEACHING
Leaching of incinerator slag from municipal waste, 753 (EGG-RE-M--79-005)
SLAGS/QUENCHING
Brief summary of slag handling options reviewed for the slagging pyrolysis incinerator in the transuranic waste treatment facility (TWIF) at the INEL, 754 (EGG-TF--5168)
SLUDGES
See SLURRIES
SLUDGES/DISSOLUTION
Waste management program technical progress report, October-December 1978, 427 (DP--78-125-4)
SLUDGES/MATERIALS HANDLING
Demonstration of radioactive sludge removal from SRP storage tank, 1264
SLUDGES/RECOVERY
Waste management program technical progress report, January-March 1979, 428 (DP--79-125-1)
SLUDGES/REMOVAL
Method of removing accumulated sludge within reactor container bottom housing (Patent), 2863
SLUDGES/RHEOLOGY
Rheology of sludge-slurry grouts, 1682 (ORNL/TM--7497)
SLUDGES/SAMPLERS
Equipment for collecting sludge samples from Savannah River Plant waste tanks, 1265
SLUDGES/SOLIDIFICATION
Solid waste disposal study, 865 (K/ET--5017)
SLUDGES/WASTE DISPOSAL
Sludge dewatering by belt process, 3642
SLUDGES/WATER REMOVAL
Sludge dewatering by belt process, 3642
SLUGS (FUEL)
See FUEL RODS
SLURRIES/EVAPORATION
Rapid petrographic differentiation of the major crystalline components of synthetic Hanford evaporator slurry, 986 (RHO-SA--116)
SLURRIES/MATERIALS HANDLING
Slurry feeding of nuclear wastes to an electric glass melter, 1144
SLURRIES/RHEOLOGY
Rheology of sludge-slurry grouts, 1682 (ORNL/TM--7497)
SMECTITE/ION EXCHANGE
Tabulation and evaluation of ion exchange data on smectites, certain zeolites and basalt, 1590 (LBL--10541)
SMECTITE/PHYSICAL PROPERTIES
Geotechnical properties of sediments from North Pacific and Northern Bermuda Rise, 2005 (SAND--80-2035C)
Thermophysical properties of deep ocean sediments, 1999 (SAND--80-1533C)
SMECTITE/TENSILE PROPERTIES
Geotechnical properties of sediments from North Pacific and Northern Bermuda Rise, 2005 (SAND--80-2035C)
SMECTITE/THERMODYNAMIC PROPERTIES
Thermophysical properties of deep ocean sediments, 1999 (SAND--80-1533C)
SMOKE DETECTORS/RISK ASSESSMENT
Dosimetric and risk/benefit implications of Am-241 in smoke detectors disposed of in normal wastes, 3613 (PB--296947)
SNAP 8 REACTOR/DECOMMISSIONING
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
SNAP 8 REACTOR/DECONTAMINATION
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
SNR REACTOR
See SNR-1 REACTOR
SNR-1 REACTOR/ENVIRONMENTAL EFFECTS
Fast breeders and environment, 2892 (INTAT--78.147)
SNR-1 REACTOR/ENVIRONMENTAL EXPOSURE PATHWAY
Fast breeders and environment, 2892 (INTAT--78.147)
SNR-1 REACTOR/RESEARCH PROGRAMS
Annual scientific report 1977, 2672 (BLG--524)
SNR-1 REACTOR/SAFEGUARDS
Status of the safeguards system developed for the LMFBR prototype power plant SNR-300 (KKW Kalkar), 2802
SNR-300 REACTOR
See SNR-1 REACTOR
SODIUM/ACTIVATION ANALYSIS
Trace elements retained in washed nuclear fuel reprocessing solvents, 43 (DP--1527)
SODIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
SODIUM/GASIFICATION
Gasification of graphite (Patent), 1159
SODIUM/LEACHING
Measuring the hydrolytic resistance of solidification products, 2134
Preliminary mini experiments on leaching of glass. A report of the situation 1979-03-15, 2016 (STUDSVIK/E2--79/38)
SODIUM/PLUMES
Liquid waste disposal at the Idaho National Engineering Laboratory and resultant waste plumes in the Snake River Plain aquifer, 3636 (IDO--12088)
SODIUM/RADIOACTIVE WASTE PROCESSING
Method and apparatus for processing liquid sodium wastes (Patent), 1087
SODIUM 22/RADIONUCLIDE MIGRATION
Evaluation of isotope migration, land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
SODIUM 24/RADIOECOLOGICAL CONCENTRATION
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
SODIUM CHLORIDES/F CENTERS
Energy stored in irradiated NaCl, 313
SODIUM CHLORIDES/PHYSICAL RADIATION EFFECTS
Energy stored in irradiated NaCl, 313
Radiation damage studies on synthetic NaCl crystals and natural rock salt for waste disposal applications, 400 (CONF-790420--)
SODIUM CHLORIDES/RADIATION EFFECTS
Radiation damage studies on natural and synthetic rock salt for waste disposal applications, 2269
Radiation damage measurements on rock salt and other minerals for waste disposal applications. Quarterly report, January 1, 1980-March 31, 1980, 1407 (BNL--

27841)
Recent radiation effect studies on natural and synthetic rock salt for waste disposal applications, 1405 (BNL--26555)
Stored energy of gamma-irradiated 97% pure rocksalt, 2004 (SAND--80-1616C)
Strain related radiation damage measurements in rock salt for waste disposal applications. Quarterly report, April 1, 1979-June 30, 1979, 1404 (BNL--26455)
Strain related radiation damage measurements in rock salt for waste disposal applications. Quarterly report, July 1-September 30, 1979, 1406 (BNL--26931)
SODIUM CHLORIDES/RADIATION HARDENING
Radiation hardening of rocksalt, 2000 (SAND--80-1566C)
SODIUM CHLORIDES/ROCK MECHANICS
Mechanical behavior of New Mexico rock salt in triaxial compression up to 200 °C, 3573
SODIUM CHLORIDES/STORED ENERGY
Energy stored in irradiated NaCl, 313
Stored energy of gamma-irradiated 97% pure rocksalt, 2004 (SAND--80-1616C)
SODIUM HYDROXIDES/SORPTIVE PROPERTIES
Iodine absorption in mixed solution of sodium hydroxide-boric acid, 1329
SODIUM IODIDE DETECTORS
See NAI DETECTORS
SODIUM NITRATES/COMBUSTION
Burning test on a storage drum filled with a mixture of sodium nitrate and bitumen, 2555 (SGAE--3023)
SODIUM OXIDES/MAGNETIC SUSCEPTIBILITY
Magnetic susceptibility of sodium disilicate glasses containing PuO_2 (4 to 300°K), 1423 (CONF-790881--1)
SODIUM OXIDES/PHASE STUDIES
Phase separation in the glass containing high level radioactive waste, 1152
SODIUM REACTOR EXPERIMENT
See SRE REACTOR
SODIUM SILICATES/CHEMICAL BONDS
Bonding of metal oxides in sodium silicate glass, 1241
SODIUM SILICATES/RAMAN SPECTRA
Raman spectra of cesium aluminosilicate waste forms, 1224
SODIUM-SULFUR BATTERIES/SOLID ELECTROLYTES
Other projects, 474 (LBL--10000)
SOIL CHEMISTRY

FERTILIZERS
SOIL CHEMISTRY/HYDROTHERMAL ALTERATION
Cation exchange and selectivity in heated minerals, 3398
SOIL MECHANICS
WIPP conceptual design report. Addentum I. Soils and foundation investigation for proposed Waste Isolation Pilot Plant, Eddy County, New Mexico, 1884 (SAND--77-0274(Add.I))
SOILS/CHEMICAL PROPERTIES
Chemical migration of radionuclides in soil, 3350
SOILS/CONTAMINATION
Application of atomic energy in agriculture. Annual Report 1978, 3371 (INIS-mf--5349)
Fixation of radioactive ions in porous media with ion exchange gels (DOE patent), 2494
Plutonium in soil adjacent to Rocky Flats Plant, 2507
Potential airborne release from soil-working operations in a contaminated area, 3345 (PNL--3498)
Waste/rock interaction technology. Solubility of plutonium compounds and their behavior in soils, 2464 (PNL-SA--8571(Vol.2))
SOILS/DECONTAMINATION
Chemical treatments of soil to decrease radiostrontium leachability, 1436 (CONF-800416--1)
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Chemistry research and development. Progress report, November 1978-April 1979, 971 (RFP--2952)
SOILS/ENTRAINMENT
Potential airborne release from soil-working operations in a contaminated area, 3345 (PNL--3498)
SOILS/RADIATION MONITORING
Energy systems group environmental monitoring and facility effluent. Annual report 1979, 3321 (ESG--80-7)
Soil monitoring instrumentation, 3327 (LA-UR--80-616)
SOILS/RADIOACTIVITY
Aerial radiological survey of the area surrounding the Edwin I. Hatch Nuclear Plant, Baxley, Georgia, 3199 (EGG--1183-1726)
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
Environmental sampling program for a solar evaporation pond for liquid radioactive wastes, 1551 (LA--8177)
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
Radiological survey of the inactive uranium-mill tailings at Slick Rock, Colorado, 3229 (ORNL--5452)
SOILS/RADIOCHEMICAL ANALYSIS
Radiological survey of the radioactive sands and residues at Lowman, Idaho, 3342 (ORNL--5465)
SOILS/RADIONUCLIDE MIGRATION
Adsorption of Co and selected actinides by Mn and Fe oxides in soils and sediments, 3355
Analysis of Pu-release consequences on the environmental geochemistry, 2582
Assessment of two-filter technique for correlating actinium-227 concentrations in soils, 3343 (ORNL/MIT--299)
Borehole assay for plutonium using delayed-neutron activation analysis, 3303
Characterization of uranium tailings cover materials for radon flux reduction, 2439 (NUREG/CR--1081)
Chemical migration of radionuclides in soil, 3350
Chemical treatments of soil to decrease radiostrontium leachability, 1436 (CONF-800416--1)
Compartment model for assessing chronic radioactive releases (Use of BIODOSE program to compute biosphere transport parameters and doses to individuals and populations), 3381
Containment of gaseous fission products in caverns, 3356
Control of radionuclide migration in soil by the application of dc electric current, 1429 (CONF-791112--28)
Geochemical aspect for the evaluations of radioelements transfers in subterranean porous media, 1409 (CEA-R--4937)
Geologic waste disposal and a model for the surface movement of radionuclides, 1904 (SAND--79-0907C)
Inspection and evaluation of Nuclear Fuel Services high-level waste storage system. Program plan, 1856 (RHO-CD--882)
Interactions of radioactive wastes with soils. A review, October 1976-May 1979, 3328 (NUREG/CR--1155)
Laboratory measurement of diffusion constants for mill tailings covers and its application, 2509
Long-term subsurface migration of radionuclides from buried INEL transuranic waste, 1437 (CONF-800607--6)
Low level waste management: a compilation of models and monitoring techniques. Volume 1, 1668 (ORNL/Sub--79/13617/2)
Mathematical simulation for safety assessment of nuclear waste repositories, 1780 (PNL-SA--7897)
Methods for predicting the effectiveness of uranium mill tailings covers, 2569
Migration of transuranic nuclides in earthen burial trenches at the Savannah River Plant, 1465 (DP-MS--79-20)
Migration of transuranic nuclides in earthen burial trenches at the Savannah River Plant, 2310
Migration of radionuclides following shallow land burial, 2523 (CONF-800304--11)
Physical migration of radionuclides in soil, 3349
Preliminary evaluation of the BIODOSE computer program (For simulating radionuclide transport through aquatic ecosystems and predicting the dose to humans), 3478 (UCID--18267)
Preliminary study of the migration of technetium in soil under hydrous conditions, 3346 (UCRL--52832)
Radioactive waste/soil interactions-migration potential of radionuclides through four soils, 2309
Radiological survey of the inactive uranium-mill tailings at Rifle, Colorado, 3230 (ORNL--5455)
Radiological survey of the inactive uranium-mill tailings at Ambrosia Lake, New Mexico, 3231 (ORNL--5458)
Radionuclide migration resulting from site intrusion, 3353
Radium-226 in vegetation and substrates at inactive uranium mill sites, 3326 (LA--8183-T)
Sensitivity studies of the swift radionuclide transport model, 2473 (SAND--79-0896C)
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
Sorption and migration studies of fission products for ground waste disposal, 2335
Statistical considerations and survey of plutonium concentration variability in some terrestrial ecosystem components, 3310
Studies concerning the conditions for underground storage of short-lived radioactive wastes, 2019 (STUDSVIK-SA--78/34)
Subsurface-migration studies at the Radioactive Waste Management Complex, Idaho, 1426 (CONF-791103--42)
Subsurface migration studies at the Radioactive Waste Management Complex, Idaho, 2508
Uptake of trace elements and radionuclides from uranium mill tailings by four-wing saltbush (Atriplex canescens) and alkali sacaton (Sporobolus airoides) (Radium 226; Uranium; Molybdenum; Selenium; Vanadium; Astatine), 3374 (LA-UR--79-3045)
Variables affecting sorption and transport of radionuclides in Hanford subsoils, 2274
Waste pipe calculus extensions, 2480 (UCID--18136)
SOILS/SAMPLING
Detailed working procedure for taking core samples from RMDF leach field, 3362 (DOE/SF/00701--T61)
Migration of transuranic nuclides in earthen burial trenches at the Savannah River Plant, 1465 (DP-MS--79-20)
SOILS/SOIL CHEMISTRY
Soil (sediment) properties of twelve Hanford wells with geologic interpretation, 1862 (RHO-LD--82)
SOILS/SOIL MECHANICS

Soil (sediment) properties of twelve Hanford wells with geologic interpretation, 1862 (RHO-LD--82)
SOILS/SORPTIVE PROPERTIES
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions, 2413 (BM-RI--8396)
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions. Report of investigations, 920 (PB--80-122740)
Adsorption of radiostrontium by soil treated with alkali metal hydroxides, 3347
Effect of ionizing radiation on the sorptive capacity of soils, 1516 (INIS-mf--5572)
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
SOILS/THERMODYNAMIC PROPERTIES
Inspection and evaluation of Nuclear Fuel Services high-level waste storage system. Program plan, 1856 (RHO-CD--882)
SOLID FUELS/REPROCESSING
Types and properties of solid and gaseous wastes produced during experimental fluoride-gaseous regeneration of the BOR-60 reactor fuel, 61 (INIS-mf--5571)
SOLID SCINTILLATION DETECTORS

Abstracts: NRC Waste Management Program reports, 2023 (UCID--18133(Rev.1))
Activities of the IAEA in the fields of radioactive wastes handling, 456 (INIS-mf--5570)
Activity levels of transuranic nuclides in low-level solid wastse from US power reactors. Final report, 446 (EPRI-NP--1494)
Activity measurements at a waste volume reduction facility, 926 (PB--296947)
Activity report 1978, 48 (ETR--299)
Alteration of reactor installations (Unit 1 and 2 reactor facilities and spent fuel disposal) in Hamaoka Nuclear Power Station of The Chubu Electric Power Co., Ltd., 2821
Annual report on radioactive discharges and monitoring of the environment, 1977, 2429 (INIS-mf--5194)
Aspects of nuclear waste management. Volume 1. Pre-emplacement risks, 2043 (UCRL--15167(Vol.1))
Attenuation of radon flux from uranium mill tailings by consolidation, 3263
Background on leach testing of solifified radioactive wastes, 1269
Behavior of radioactive wastes incorporated in concrete and stored on open-air bed at CAMEN, 2115 (PNL-TR--408)
Benefit-cost analysis for the commercial disposal of low-level radioactive solid wastes, 2195
Beta-gamma contaminated solid waste incinerator facility, 747 (DPSTD--79-34)
Calculation of radionuclides in the defense waste processing facility, 434 (DP-MS--79-55)
Calculation of the temperature field during burial of radioactive wastes, 1518 (INIS-mf--5572)
Calculation of temperature field of media, containing radioactive wastes, 1519 (INIS-mf--5572)
Calculations on heat generation and temperature rise during storage and solidification of MLW/LLW in large capacity caverns. Reference systems A and B of the in-situ-project, 1544 (KFK--2857)
Challenges of nuclear effluent management in the national perspective, 584
Characterization of glass and glass ceramic nuclear waste forms, 1230
Characterisation, handling and treatment of waste arisings from the Winfrith SGHWR, 2973
Collect and treatment of radioactive wastes in low activity laboratories, 626 (CEA-CONF--4677)
Community's R and D programme on radioactive waste management and storage. 1977 2. annual progress report, 1480 (EUR--6128)
Comparative evaluation of radioactive materials management by different methods: Pt. 1. Quantitative comparison of the different methods used for the reduction of the volume of α contaminated solid wastes, 772 (EUR--5785)
Conceptual design of a shipping cask for rail transport of solidified high level waste, 245 (PNL-SA--6526)
Conceptual design report for alpha waste incinerator, 744 (DPE--3584)
Conceptual design of a shipping cask for rail transport of solidified high level waste, 165 (CONF-780506--(Vol.1))
Construction of new installation for processing and burial of radioactive wastes in Hungarian Peoples Republic, 829 (INIS-mf--5571)
Control of radionuclide migration in soil by the application of dc electric current, 1429 (CONF-791112--28)
Controlled-air incineration of alpha-bearing solid wastes, 883 (LA-UR--80-1428)
Crud removal equipment using a centrifugal clarifier, 2982
Decontamination and disposal of radioactive wastes from nuclear facilities, 694 (CS-INIS--258)
Defense high-level waste and spent fuel characterization for geologic waste repositories, 1889 (SAND--79-0172)
Defense transuranic waste at the Savannah River Plant, Aiken, South Carolina. Supplemental alternatives for long-term management, 423 (DOE/SR-WM--79-1(Suppl.))
Design of an experimental incinerator for alpha waste, 716 (DP--1521)
Determination of performance criteria for high-level solidified nuclear waste, 534 (UCID--18121)
Determination of nuclear waste-form leach rates by activation analysis, 2596
Development and characterization of solidified forms for high-level wastes: 1978. Annual report, 939 (PNL--3060)
Development of a stand-depository for storage and investigation of high-activity solid wastes behaviour, 1511 (INIS-mf--5571)
Development of improved leaching techniques for vitrified radioactive waste products, 2412 (BARC--1032)
Developments in the management of liquid and solid radioactive wastes from the irradiated fuel cooling pond at Trawsfynydd power station, 2969
Development of a pelleted waste form for high-level alumina wastes, 770 (ENICO--1051)
Development and verification test on remote plasma cutting of large metallic waste, 1131
Disposal of hazardous wastes, 592
Disposal of radioactive wastes. Chapter 11, 2282
Disposal of waste resulting from the dismantling of nuclear facilities, 2318
Dry recovery of ceramic uranium dioxide waste material, 1145
Durability of containers for storing solidified radioactive wastes, 2347
Elaboration and operation experience of two chamber plant for wastes burning, 814 (INIS-mf--5570)
Electric controlled air incinerator for radioactive wastes, 1380
Electromagnetic filtration of cruds in primary circuits of pressurized water nuclear reactors, 2744
Energy: what about the waste., 2567
Environmental effects from disposal of defense high-level radioactive wastes in a generic geologic repository, 1428 (CONF-791112--24)
Environmental monitoring and disposal of radioactive waste from naval nuclear vessels and support facilities in 1978, 2175
Escape probability of gamma from radioactive contaminated solid waste, 452 (INIS-mf--4789)
Evaluation and review of alternative waste forms for immobilization of high level radioactive wastes, 713 (DOE/TIC--11219)
Experience in decontamination and waste handling at a shut-down plant for regeneration of spent fuel elements, 1243
Experimental procedure for proposed ANS standard on low-level waste leachability, 2313
Figure-of-merit determined from the ANS leachability standard, 2314
Final storage in concrete of activated metal parts, 1537 (KBS-TR--119)
Final storage vessel for radioactive waste, 2217
Fluidized bed incineration process design for transuranic waste, 970 (RFP--2945)
Fourth Calcined Solids Storage Facility. Final safety analysis report, 1475 (ENICO--1031)
Geohydrologic investigations of buried metamorphic rock and mudstone for the storage of radioactive waste, 3537
Geomorphic and erosion studies at the Western New York Nuclear Service Center, West Valley, New York, 1605 (NUREG/CR--0795)
Great Britain prepares permanent storage of radioactive waste, 2384
Guidelines for sea dumping packages of radioactive waste, 2228
Handbook of key Federal regulations and criteria for multimedia environmental control. Final report, September 1978-June 1979, 3296 (PB--80-107998)

SOLID WASTES/CIRUS REACTOR
Radioactive solid waste management at Trombay, 2789

SOLID WASTES/COAL MINES
Coal mine waste (a bibliography with abstracts). Report for 1964-January 1979, 3611 (NTIS/PS--79/0080)

SOLID WASTES/ENERGY RECOVERY
Overview of solid waste generation in the United States, 3100 (LA--8172-MS)

SOLID WASTES/HEATING
Method of processing radioactive wastes (Patent), 1134

SOLID WASTES/IMPACT STRENGTH
Preliminary test program for impact resistance of solid waste forms, 2594

SOLID WASTES/MATERIALS HANDLING
Process for introducing radioactive articles into a transport and/or storage container and transporting and/or storing the container and later extraction of the article from the container, and container for transporting and/or storing radioactive articles (Patent), 2168

SOLID WASTES/PRODUCTION
Overview of solid waste generation in the United States, 3100 (LA--8172-MS)

SOLID WASTES/RADIOACTIVE WASTE DISPOSAL
Final storage in concrete of activated metal parts, 1537 (KBS-TR--119)

SOLID WASTES/RADIOACTIVE WASTE MANAGEMENT
Practical guidelines for radioactive waste management, 576

SOLID WASTES/RADIOACTIVE WASTE PROCESSING
Activity measurements at a waste volume reduction facility, 926 (PB--296947)
Community's R and D programme on radioactive waste management and storage. 1977 2. annual progress report, 1480 (EUR--6128)
Controlled-air incineration of alpha-bearing solid wastes, 883 (LA-UR--80-1428)
Development and verification test on remote plasma cutting of large metallic waste, 1131
Method of processing radioactive wastes (Patent), 1125
Radioactive solid waste management at Trombay, 2789
Radioactive waste incineration studies at the Los Alamos Scientific Laboratory, 1268
Storage preparation process of fractionated solid materials (compacting; patent), 1364
Waste management program. Technical progress report, April-June 1979, 429 (DP--79-125-2)
Waste treatment research and development, 704 (DOE/EV--0046(Vol.2))

SOLID WASTES/RADIOACTIVE WASTE STORAGE
Durability of containers for storing solidified radioactive wastes, 2347
Leaching properties and chemical compositions of calcines produced at the Idaho Chemical Processing Plant, 1441 (CONF-800987--1)
Multibarrier storage of Savannah River Plant waste (Borosilicate glass in canister), 1468 (DP-MS--79-31)
Nuclear power plant approach to temporary on-site storage of radioactive waste, 1711 (PB--296947)
Storage time evaluation for active solid waste produced in hospitals, 2164

SOLID WASTES/TRANSPORT
Process for introducing radioactive articles into a transport and/or storage container and transporting and/or storing the container and later extraction of the article from the container, and container for transporting and/or storing radioactive articles (Patent), 2168

SOLID WASTES/USA
Overview of solid waste generation in the United States, 3100 (LA--8172-MS)

SOLID WASTES/WASTE DISPOSAL
Coal mine waste (a bibliography with abstracts). Report for 1964-January 1979, 3611 (NTIS/PS--79/0080)

SOYBEANS/BIOLOGICAL RADIATION EFFECTS
Technetium: a toxic waste product of the nuclear fuel cycle: effects on soybean growth and development, 2485
SPAIN/RADIOACTIVE WASTE MANAGEMENT
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)
SPAIN/SPENT FUEL STORAGE
Prospects of spent management in Spain, 358
SPENT FUEL CASKS/ACCIDENTS
Numerical analysis of impact-penetration problems for nuclear reactor safety, 3092
SPENT FUEL CASKS/AVAILABILITY
Opportunities to increase the productivity of spent fuel shipping casks in the United States, 237 (PNL--3017)
SPENT FUEL CASKS/CLOSURES
Methods for evaluating the leak tightness of spent fuel container closures, 228 (NUREG/CR--1312)
SPENT FUEL CASKS/COOLING
Method for cooling a fuel element transport cask (Patent), 3650
SPENT FUEL CASKS/CORROSION
Strength and water-tightness of the closure head and valves of a model cask under high external pressure, 163 (CONF-780506--(Vol.1))
SPENT FUEL CASKS/COST
Alara assessment of spent fuel and nuclear waste transportation systems, 2553 (SAND--80-0794C)
SPENT FUEL CASKS/CRITICALITY
Criticality experiments with subcritical clusters of low enriched UO_2 rods in water with uranium or lead reflecting walls, 282
Regulatory history and status of nuclear criticality safety research, 3669
SPENT FUEL CASKS/DECONTAMINATION
Cooling and decontamination installation for fuel element transport containers (Patent), 324
Device for the cooling and/or decontamination of fuel element transport containers (Patent), 325
Facility for the decontamination of fuel element transport casks (Patent), 3648
SPENT FUEL CASKS/DEMAND FACTORS
Worldwide spent fuel transportation logistics, 170 (CONF-780506--(Vol.2))
SPENT FUEL CASKS/DESIGN
Assessment of LMFBR spent fuel shipping cask concepts for the CRBRP and the US conceptual design study, 262 (SAND--80-0085C)
Considerations for designing a spent-fuel shipping system for commercial LMFBR plants, 3606 (GEFR-SP--204)
Container for transport of radioactive materials (Patent), 366
Container for transporting spent fuel elements (Patent), 3695
Device for the cooling and/or decontamination of fuel element transport containers (Patent), 326
Empirical equations for puncture analysis of lead-shielded spent fuel shipping casks, 158 (CONF-780506--(Vol.1))
Fire resistant nuclear fuel cask (Patent), 3649
Fuel element transport container (Patent), 3651
HZ-75T spent fuel shipping cask, 146 (CONF-780506--(Vol. 1))
Improved assembly for the transport of fuel elements, 3640
Improvements in nuclear fuel transportation containers (Patent), 3675
Improvements of containers for heat producing materials (Patent), 370
Internal receptacle for a radioactive material transport cask and discharge process of this cask (Patent), 3691
Method to transport and store radioactive radiating articles or substances. System to perform this method and transportable transport or storage containers to carry out the method and for use in connection with such a system (Patent), 3647
Nuclear fuel transportation containers (Patent), 3634
Probabilistic approach to design of the spent fuel cask handling system of a nuclear plant, 3088
Process for extracting and preparing fuel elements from a reactor for transport and device for carrying out the process (Patent), 2875
Spent fuel shipping and storage system for Atucha Nuclear Power Station, 157 (CONF-780506--(Vol.1))
Spent nuclear fuel shipment, 219 (INIS-mf--5569)
Standardize or not to standardize: the pros and cons of standardized designs for casks and cask transport systems, 164 (CONF-780506--(Vol.1))
Steel container for accommodating spent fuel elements (Patent), 3641
Transport of storage container for radioactive materials, particularly for irradiated nuclear reactor fuel elements (Patent), 332
Transport container for spent nuclear reactor fuel elements (Patent), 3646
Transport and storage device for radioactive materials (Patent), 290
SPENT FUEL CASKS/FIRE RESISTANCE
Post test evaluation of a fire tested rail spent fuel cask, 263 (SAND--80-0761C)
SPENT FUEL CASKS/FIRES
Postmortem metallurgical examination of a fire-exposed spent fuel shipping cask (After impact test), 256 (SAND--79-1424)
Thermal analysis of HNPF spent fuel shipping container in torch environments, 260 (SAND--80-0061C)
SPENT FUEL CASKS/HEAT TRANSFER
Assessment of the heat transfer properties of spent fuel shipping casks, 169 (CONF-780506--(Vol.1))
Cooldown testing of nuclear fuel casks, 131 (AGNS--35900-CONF-7)
SPENT FUEL CASKS/IMPACT TESTS
Correlation of experimental shipping cask model structural behavior by computer analysis, 160 (CONF-780506--(Vol.1))
Determination of allowable maximum acceleration loads for the transport of irradiated fuel, 161 (CONF-780506--(Vol.1))
Empirical equations for puncture analysis of lead-shielded spent fuel shipping casks, 158 (CONF-780506--(Vol.1))
Inelastic response of metallic impact limiters, 3091
Model testing of heavy spent fuel casks and waste packagings, 168 (CONF-780506--(Vol.1))
Scale model experiments of energy material shipping containers, 3602 (DOE/EV--0046(Vol.2))
SPENT FUEL CASKS/LICENSING
1st amendment to the licence for storage of transport containers for spent fuel elements in the storage facility of the Gemeinschaftskernkraftwerk Neckar (GKN) and their handling there, 335
Experience in licensing of a spent-fuel shipping cask for MURR fuel elements, 342
Publication of the first amendment of the licence for the transfer of transport containers for spent fuel elements into the facilities of the Gemeinschaftskraftwerk Neckar and their handling there. May 28, 1979, 308
SPENT FUEL CASKS/MANAGEMENT
Studies and research concerning BNFP: advanced cask handling studies (Minimizing turnaround times at loading/unloading sites), 126 (AGNS--35900-1-1-49)
SPENT FUEL CASKS/NATURAL CONVECTION
Experimental study of the steady natural convection in a horizontal annulus with irregular boundaries, 3620 (SAND--79-2354C)
SPENT FUEL CASKS/NEUTRON REFLECTORS
Criticality experiments with subcritical clusters of low enriched UO_2 rods in water with uranium or lead reflecting walls, 282
SPENT FUEL CASKS/PERFORMANCE TESTING
Rail tiedown tests with heavy casks for radioactive shipments, 3603 (DP--1536)
Solid neutron shield material tests, 3668
Thermal evaluation facility for LMFBR spent fuel transport, 2793 (SAND--79-1366)
SPENT FUEL CASKS/PRODUCTION
Opportunities to increase the productivity of spent fuel shipping casks in the United States, 237 (PNL--3017)
SPENT FUEL CASKS/REGULATIONS
Effects of proposed changes in regulations on low-level radwaste shipments, 2671
Evolution in structural design methods for large quantity packages, 2643 (CONF-780506--(Vol.2))
SPENT FUEL CASKS/REMOTE HANDLING
Spent fuel handling and storage facility for an LWR fuel reprocessing plant, 44 (DPSTD-AFCT--77-7)
SPENT FUEL CASKS/REMOTE HANDLING EQUIPMENT
Method and arrangement for loading and unloading spent fuel shipping casks (Patent), 3682
Probabilistic approach to design of the spent fuel cask handling system of a nuclear plant, 3088
Seismic analysis of a dry spent fuel cask handling system, 369
SPENT FUEL CASKS/RESTRAINTS
Rail tiedown tests with heavy casks for radioactive shipments, 3603 (DP--1536)
SPENT FUEL CASKS/SAFETY
Considerations for designing a spent-fuel shipping system for commercial LMFBR plants, 3606 (GEFR-SP--204)
Scale model experiments of energy material shipping containers, 3602 (DOE/EV--0046(Vol.2))
Spent fuel cask (Patent), 352
SPENT FUEL CASKS/SEALS
Dry containment of radioactive materials (Patent), 3644
SPENT FUEL CASKS/SHIELDING MATERIALS
Solid neutron shield material tests, 3668
Uranium-lead shielding for nuclear material transportation systems, 166 (CONF-780506--(Vol.1))
SPENT FUEL CASKS/SHIELDS
ALARA studies on spent fuel and waste casks, 257 (SAND--79-1841)
SPENT FUEL CASKS/SIMULATION
Model testing of heavy spent fuel casks and waste packagings, 168 (CONF-780506--(Vol.1))
SPENT FUEL CASKS/SPECIFICATIONS
Effects of proposed changes in regulations on low-level radwaste shipments, 2671
Improvements in and relating to drums for storing fuel assemblies of nuclear reactors (Patent), 2888
SPENT FUEL CASKS/STANDARDIZATION
Standardize or not to standardize: the pros and cons of standardized designs for casks and cask transport systems, 164 (CONF-780506--(Vol.1))
SPENT FUEL CASKS/STORAGE
Basket for storing nuclear fuels in a cooling pool (Patent), 2716

SPENT FUEL CASKS/THERMAL INSULATION
Container for irradiated fuel (Patent), 350
SPENT FUEL CASKS/THERMAL STRESSES
Thermal evaluation facility for LMFBR spent fuel transport, 2793 (SAND--79-1366)
SPENT FUEL CASKS/TRANSPORT
Evaluation of FSV-1 cask for the transport of LWR irradiated fuel assemblies, 205 (GA-A--15828)
SPENT FUEL CASKS/UNLOADING
Loading pond for a fuel element transport container (Patent), 330
SPENT FUEL ELEMENTS/ACTIVITY LEVELS
Spent fuel data base: commercial light water reactors (PWR; BWR), 2678 (UCRL--15186)
SPENT FUEL ELEMENTS/AFTER-HEAT
Properties of spent fuel elements, 2009 (SGAE--3035)
SPENT FUEL ELEMENTS/CHEMICAL COMPOSITION
Collection of gamma spectra data and correlated isotopic data of irradiated mixed oxide fuel and study of the applicability for safeguards. Final report for the period 1 December 1975 - 31 March 1979, 2775 (IAEA-R--1710-F)
SPENT FUEL ELEMENTS/COOLING
Cooling system for cooling a set of fuel elements in nuclear reactor containments (Patent), 2873
SPENT FUEL ELEMENTS/COOLING SYSTEMS
Cooling system for cooling a set of fuel elements in nuclear reactor containment vessels, 2880
SPENT FUEL ELEMENTS/CORROSION
Proposal to study the stability of zircaloy-clad UO_2 fuel elements during long-term storage, 124 (AECL--6356)
Purification of the high activity water from long time storage pool for fuel element clusters, 809 (INIS-mf--5570)
SPENT FUEL ELEMENTS/DECLADDING
System for receiving and shearing LWR spent fuel, 107
SPENT FUEL ELEMENTS/DESTRUCTIVE TESTING
Remote characterization of spent LWR fuel for geologic disposal demonstrations, 1484 (HEDL-SA--2055)
Spent fuel characterization for the commercial waste and spent fuel packaging program, 1487 (HEDL-TC--1384(Rev. 1))
SPENT FUEL ELEMENTS/ENCAPSULATION
Ceramic encapsulation of nuclear fuel wastes, 1041
Encapsulating spent nuclear fuel (Patent), 2130
Method for encapsulation of high level radioactive nuclear fuels or wastes (Patent), 1062
Method to encapsulate spent fuel elements or high-level radioactive wastes (Patent), 1177
SPENT FUEL ELEMENTS/ENVIRONMENTAL IMPACTS
Observations on the use of the consequence model CRAC for small nonreactor atmospheric releases, 2947 (SAND--80-0366)
SPENT FUEL ELEMENTS/EVALUATION
Remote characterization of spent LWR fuel for geologic disposal demonstrations, 1484 (HEDL-SA--2055)
SPENT FUEL ELEMENTS/FISSION PRODUCT RELEASE
Fission product release. Progress report, January 1-March 31, 1980, 2864 (LA--8389-PR)
SPENT FUEL ELEMENTS/FISSION PRODUCTS
Radionuclide inventories in spent fuel from LWR and in high-level waste from plutonium recycle in PWR, 868 (KBS-TR--111)
SPENT FUEL ELEMENTS/GAMMA FUEL SCANNING
Gamma ray measurement of spent HIFAR fuel elements for safeguards verification. 1. Experimental evaluation of method., 3019 (ASO/R--2)
Gamma ray measurement of spent HIFAR fuel elements for safeguards verification. 2. Theoretical evaluation of method, 2846 (ASO/R--3)
SPENT FUEL ELEMENTS/HEAD END PROCESSES
Head-end process for waste disposal within the fuel cycle, 84
SPENT FUEL ELEMENTS/INSPECTION
Irradiated fuel inspection in a storage pond with no fuel movement and an uncollimated detector, 224 (LA--8463-MS)
SPENT FUEL ELEMENTS/INVENTORIES
Nonintrusive irradiated fuel inventory confirmation technique, 2625 (LA-UR--80-689)
SPENT FUEL ELEMENTS/LAND TRANSPORT
European spent fuel expertise, 278
Individual and collective doses associated with the transport of irradiated magnox fuel within the UK, 2522 (CEGB-RD/B/N--4440)
SPENT FUEL ELEMENTS/MATERIALS HANDLING
Commercial waste and spent fuel packaging program. Quarterly report, July through September 1980, 194 (DOE/NV/10061--4)
SPENT FUEL ELEMENTS/MECHANICAL DECLADDING
Spent-fuel disassembly and canning programs at the Barnwell Nuclear Fuel Plant (BNFP), 683 (CONF-800943--(Summ.))
Underwater fuel disassembly and rod storage summary, 684 (CONF-800943--(Summ.))
SPENT FUEL ELEMENTS/NONDESTRUCTIVE ANALYSIS
Spent fuel characterization for the commercial waste and spent fuel packaging program, 1487 (HEDL-TC--1384(Rev. 1))
SPENT FUEL ELEMENTS/NONDESTRUCTIVE TESTING
Remote characterization of spent LWR fuel for geologic disposal demonstrations, 1484 (HEDL-SA--2055)
SPENT FUEL ELEMENTS/PACKAGING
Encapsulation of magnox type fuel elements for extended storage in cooling ponds, 2770
Spent-fuel disassembly and canning programs at the Barnwell Nuclear Fuel Plant (BNFP), 683 (CONF-800943--(Summ.))
Underwater fuel disassembly and rod storage summary, 684 (CONF-800943--(Summ.))
SPENT FUEL ELEMENTS/RADIATION HAZARDS
Individual and collective doses associated with the transport of irradiated magnox fuel within the UK, 2522 (CEGB-RD/B/N--4440)
SPENT FUEL ELEMENTS/RADIOACTIVE EFFLUENTS
Observations on the use of the consequence model CRAC for small nonreactor atmospheric releases, 2947 (SAND--80-0366)
SPENT FUEL ELEMENTS/RADIOACTIVE WASTE DISPOSAL
Fission product release. Progress report, January 1-March 31, 1980, 2864 (LA--8389-PR)
SPENT FUEL ELEMENTS/RADIOACTIVE WASTE PROCESSING
Processing of spent nuclear fuel from HTGR reactors. Review of current state of art, 2764 (UJV--4666-CH)
SPENT FUEL ELEMENTS/RADIOACTIVITY
Properties of spent fuel elements, 2009 (SGAE--3035)
SPENT FUEL ELEMENTS/RAIL TRANSPORT
Considerations for designing a spent-fuel shipping system for commercial LMFBR plants, 3606 (GEFR-SP--204)
SPENT FUEL ELEMENTS/REMOTE HANDLING
Process for extracting and preparing fuel elements from a reactor for transport and device for carrying out the process (Patent), 2875
Remote characterization of spent LWR fuel for geologic disposal demonstrations, 1484 (HEDL-SA--2055)
SPENT FUEL ELEMENTS/REPROCESSING
Part 5. Fuel cycle options (LMFBR), 2835 (ANL--80-40)
Processing of spent nuclear fuel from light water reactors, 77 (UJV--4620-D,CH,E)
SPENT FUEL ELEMENTS/SPENT FUEL CASKS
Process for extracting and preparing fuel elements from a reactor for transport and device for carrying out the process (Patent), 2875
SPENT FUEL ELEMENTS/TESTING
Elevated temperature testing of spent nuclear fuel rods, 208 (HEDL-SA--2054-FP)
SPENT FUEL ELEMENTS/TRANSPORT
Container for transporting spent fuel elements (Patent), 3695
Fuel element transport container (Patent), 328
Improved assembly for the transport of fuel elements, 3640
Internal receptacle for a radioactive material transport cask and discharge process of this cask (Patent), 3691
Method for cooling a fuel element transport cask (Patent) 3650
Problems of spent nuclear fuel transport, 218 (INIS-mf--5565)
Publication of the Minister for Economic Affairs, Trade, and Transportation concerning the 2nd supplement on the transport of spent fuel element casks to the site of Gemeinschaftskernkraftwerk Neckar (GKN) and its handling there, 280
Scale model experiments of energy material shipping containers, 3602 (DOE/EV--0046(Vol.2))
Storage and shipment of spent fuel elements. INFCE working group 6, 277
SPENT FUEL STORAGE

SPENT FUEL STORAGE/COMPARATIVE EVALUATIONS
Alternatives for water basin spent fuel storage: executive summary and comparative evaluation, 267 (SRO--1051-1)
Economics of spent LWR fuel storage, 182 (CONF-800943--(Summ.))
Spent nuclear fuel: a comparison of at-reactor basin storage and away-from-reactor storage (Macro-economic comparison), 190 (DOE/NE--0010)

SPENT FUEL STORAGE/COMPATIBILITY
Materials interaction test summary description, 1486 (HEDL-TC--1331(Rev.1))
Survey test of canister, geology, and fuel cladding material interactions, 1483 (HEDL-SA--1892-FP)

SPENT FUEL STORAGE/CONFIGURATION
Nuclear fuel storage arrangement (Patent), 368

SPENT FUEL STORAGE/CONTAINERS
Arrangement for the prevention of the contamination of a fuel element storage pool. (Supplement to: P 27 18 305.7 - VPA 77 P 9317) (Patent), 336 (RISLEY-Trans--4086)
Densification of calcines and direct containment of spent nuclear fuel in ceramics by hot isostatic pressing, 651 (CONF-790420--)
Issues relevant to nuclear waste canister materials, 1521 (IS-M--273)
Preliminary corrosion test of a glass-ceramic candidate for a nuclear waste canister, 2263
Process for introducing radioactive articles into a transport and/or storage container and transporting and/or storing the container and later extraction of the article from the container, and container for transporting and/or storing radioactive articles (Patent), 2168

SPENT FUEL STORAGE/CONTAINMENT SYSTEMS
Cooling system for cooling a set of fuel elements in nuclear reactor containments (Patent), 2873

SPENT FUEL STORAGE/CONTAMINATION
Arrangement for the prevention of contamination of a fuel element storage pool (Patent), 2856

SPENT FUEL STORAGE/CONTRACTS
Federal fees and contracts for storage and disposal of spent LWR fuel, 201 (DP-MS--79-71)

SPENT FUEL STORAGE/COOLING SYSTEMS
Determination of the stationary temperature level in an intermediary storage of spent nuclear fuel elements, 279
Spent fuel storage facility having forced recycle device (Patent), 323

SPENT FUEL STORAGE/CORROSION
Spent fuel and fuel pool component integrity. Annual report, FY 1979, 239 (PNL--3171)

SPENT FUEL STORAGE/COST
Regulatory problems with nuclear fuel storage and disposal costs, 302
Spent fuel storage capacity in new reactors, 198 (DOE/SR-SF--2003)
Spent LWR fuel storage costs: reracking, AR basins, and AFR basins, 197 (DOE/SR-SF--2002(Rev.1))

SPENT FUEL STORAGE/CRITICALITY
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, October 1, 1977-December 31, 1977, 136 (BAW--1484-1)
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, April 1, 1978-June 30, 1978, 138 (BAW--1484-3)
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, July 1, 1978-September 30, 1978, 140 (BAW--1484-4)
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, October 1, 1978-December 31, 1978, 141 (BAW--1484-5)
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, January 1-March 31, 1979, 143 (BAW--1484-6)
Criticality safety considerations in the geologic disposal of spent nuclear fuel assemblies, 241 (PNL--3268)
Criticality safety determination of spent fuel storage vault, 2605
Neutron physical aspects of the storage of BWR fuel elements, 287
Regulatory history and status of nuclear criticality safety research, 3669

SPENT FUEL STORAGE/DEMONSTRATION PROGRAMS
Commercial Waste and Spent Fuel Packaging Program. Quarterly technical progress report, April-June 1979, 251 (RHO-LO--79-83-3Q)
Spent fuel characterization plan for dry surface storage demonstration tests, 211 (HEDL-TC--1334(Rev.1))

SPENT FUEL STORAGE/DESIGN
Alternative concepts for spent fuel storage basin expansion at Morris Operation, 1598 (NEDG--24749)
Commentary on spent fuel storage at Morris operation, 227 (NUREG/CR--0956)
U.S. Department of Energy Program to support the design and licensing of a spent fuel storage basin, 361

SPENT FUEL STORAGE/DISSOLUTION
Waste form dissolution in bedded salt, 2032 (UCID--18678)

SPENT FUEL STORAGE/ECONOMIC ANALYSIS
Back-end fuel cycle costs for alternative fuels, 2837 (CONF-800943--(Summ.))

SPENT FUEL STORAGE/ECONOMICS
American proposals for long range storage of irradiated fuel, 344
Economics of spent LWR fuel storage, 182 (CONF-800943--(Summ.))
Economics of spent LWR fuel storage, 2674 (DP-MS--80-24)

SPENT FUEL STORAGE/EFFICIENCY
Studies and research concerning BNFP: spent fuel disassembly and canning programs at the Barnwell Nuclear Fuel Plant (BNFP) (For more efficient storage), 127 (AGNS--35900-1.2-45)

SPENT FUEL STORAGE/ENVIRONMENTAL IMPACT STATEMENTS
Final environmental impact statement: US Spent Fuel Policy. Executive summary, 1445 (DOE/EIS--0015(Vol.1)
Final environmental impact statement: US Spent Fuel Policy. Storage of US spent power reactor fuel, 1446 (DOE/EIS--0015(Vol.2))

Final environmental statement: US Spent Fuel Policy. Storage of foreign spent power reactor fuel, 1447 (DOE/EIS--0015(Vol.3))
Final environmental impact statement: US Spent Fuel Policy. Charge for spent fuel storage, 1448 (DOE/EIS--0015(Vol.4))
Final environmental impact statement: US Spent Fuel Policy. Comment letters on draft statements and major comments with DOE responses, 1449 (DOE/EIS--0015(Vol.5))
SPENT FUEL STORAGE/ENVIRONMENTAL IMPACTS
Dry Well Storage Facility conceptual design study: environmental assessment. Report No. 79-8-R, 250 (RHO-C--25(Vol.2)(Draft))
Final environmental impact statement: US Spent Fuel Policy. Storage of US spent power reactor fuel, 1446 (DOE/EIS--0015(Vol.2))
Final environmental statement: US Spent Fuel Policy. Storage of foreign spent power reactor fuel, 1447 (DOE/EIS--0015(Vol.3))
Near surface spent fuel storage: environmental issues, 246 (PNL-SA--7344)
SPENT FUEL STORAGE/EQUIPMENT
Equipment designs for the spent LWR fuel dry storage demonstration, 1438 (CONF-800607--80)
SPENT FUEL STORAGE/EVALUATION
Alternatives for water basin spent fuel storage using pin storage, 268 (SRO--1051-3)
Alternatives for water basin spent fuel storage using racked and unracked concepts (Core plate storage (poison rods); horizontal racks; stacked racks; unracked storage), 269 (SRO--1051-4)
Alternatives for water basin spent fuel storage: generic issues (Criticality; licensing, materials, water chemistry), 270 (SRO--1051-5)
SPENT FUEL STORAGE/FAILED ELEMENT DETECTION
Fuel-clad failure detection. Final report, task 1, 188 (DOE/ET/47906--2)
SPENT FUEL STORAGE/FEASIBILITY STUDIES
Assessment of LWR spent fuel disposal options. Volume 1. Summary and conclusions, 230 (ONWI--39(Vol.1))
SPENT FUEL STORAGE/FIELD TESTS
CLIMAX at NTS, 1617 (NVO--196-14)
Safety Assessment Document for the Spent Reactor Fuel Geologic Storage Test in the Climax Granite Stock at the Nevada Test site, 229 (NVO--210)
Test storage of spent reactor fuel in the Climax granite at the Nevada Test Site, 274 (UCRL--83976)
SPENT FUEL STORAGE/FORECASTING
Assumptions and ground rules used in nuclear waste projections and source term data, 1626 (ONWI--24)
Computer model for LWR fuel storage, 204 (OPST--77-458)
Spent fuel storage -- The magnitude of the problems, 356
SPENT FUEL STORAGE/FUEL ASSEMBLY DISMANTLING
Demonstrate fuel disassembly/encapsulation. Technical progress report, April 1980-June 1980 (For storage), 134 (AGNS--47921-3026-TPR-1)
Spent fuel disassembly and canning programs at the Barnwell Nuclear Fuel Plant (BNFP) (For more efficient storage), 132 (AGNS--35900-CONF-41)
Studies and research concerning BNFP. Spent fuel disassembly: increasing hot-cell storage capacity at the Barnwell Nuclear Fuel Plant, 128 (AGNS--35900-1.3-47)
SPENT FUEL STORAGE/FUEL ELEMENT FAILURE
Spent fuel resistance to internally produced cladding degradation, 209 (HEDL-SA--2138)
SPENT FUEL STORAGE/FUEL POOLS
Comparison of concepts for independent spent fuel storage facilities, 355
Device for the storage of long nuclear reactor fuel elements in a water-filled pond (Patent), 2872
Expansion of capacity of spent fuel pools and associated problems, 2885
Fuel element pond (Patent), 327
Publication of the 5th partial license to increase the storage capacity of the fuel storage pool of Kernkraftwerk Isar, 2681
Publication of one partial license each for an increase of the spent fuel storage capacity from five thirds of a core charge to nine thirds of a core charge in the Biblis A and B units, 2726
Waterfilled storage pond (Patent), 2729
SPENT FUEL STORAGE/FUEL RACKS
Behavior of B_4C materials in spent-fuel storage pools, 2854
Design and operation of a dry spent-fuel storage installation, 297
Device and process for storing groups of fission elements (Patent), 2871
Device for storing nuclear fuel elements (Patent), 2881
Device for the storage of long nuclear reactor fuel elements in a water-filled pond (Patent), 2872
Dynamic analysis of storage racks for spent fuel assemblies, 291
Normal and compact spent fuel storage in light water reactor power plants, 2708
Nuclear fuel storage (Patent), 2869
Public hearing on compact storage racks in the Ohu and Grafenrheinfeld power plants, 2740
Publication concerning the planned inclusion and operation of compact storage devices for spent fuel elements in the Philippsburg-1 reactor. Dated 17th July, 1979, 2688
Publication concerning the planned inclusion and operation of compact storage devices for spent fuel elements in the Neckar reactor. Dated 17th July, 1979, 2728
Storage rack for holding spent fuel elements from nuclear power plants, 343
Storage rack for taking used fuel elements for nuclear power stations, 2884
Study of the sensitivity and influence of the design parameters of a high density spent fuel rack in regard of the safety against criticality, 2866 (SGAE--2971)
Swivel base for fuel assembly storage (Patent), 2876
SPENT FUEL STORAGE/FUEL RODS
Storage rack for fuel element sets (Patent), 3082
SPENT FUEL STORAGE/GAMMA FUEL SCANNING
Scintillator spent fuel monitor, 2626 (LA-UR--80-1797)
SPENT FUEL STORAGE/GAS COOLING
Wylfa dry store, 2765
SPENT FUEL STORAGE/GOVERNMENT POLICIES
Final environmental impact statement: US Spent Fuel Policy. Executive summary, 1445 (DOE/EIS--0015(Vol.1)
Final environmental impact statement: US Spent Fuel Policy. Storage of US spent power reactor fuel, 1446 (DOE/EIS--0015(Vol.2))
Final environmental statement: US Spent Fuel Policy. Storage of foreign spent power reactor fuel, 1447 (DOE/EIS--0015(Vol.3))
Final environmental impact statement: US Spent Fuel Policy. Charge for spent fuel storage, 1448 (DOE/EIS--0015(Vol.4))
Final environmental impact statement: US Spent Fuel Policy. Comment letters on draft statements and major comments with DOE responses, 1449 (DOE/EIS--0015(Vol.5))
Proposed rulemaking on the storage and disposal of nuclear waste. Cross-statement of the United States Department of Energy, 2644 (DOE/NE--0007(Supp.1))
U.S. spent fuel policy: a status report, 357
SPENT FUEL STORAGE/HEALTH HAZARDS
Model for evaluation of thyroid dose from spent fuel on postulated loss of fuel pool cooling system, 2576
SPENT FUEL STORAGE/HEARINGS
Nuclear spent fuel storage in the Pacific. Hearing before the Committee on Interior and Insular Affairs, House of Representatives, Ninety-Sixty Congress, First Session on S. 1119. Hearing held in Honolulu, Hawaii, December 27, 1979, 288
SPENT FUEL STORAGE/HEAT TRANSFER
Advanced three-dimensional thermal modeling of a baseline spent fuel repository, 272 (UCID--18660)
Method for calculating internal radiation and ventilation with the ADINAT heat-flow code, 273 (UCRL--52918)
SPENT FUEL STORAGE/HEATING
Areal thermal loading recommendations for nuclear waste repositories in salt, 2096 (Y/OWI/TM--37)
SPENT FUEL STORAGE/HYDROGEN PRODUCTION
Note on the consequence of hydrogen production in the repository, 1539 (KBS-TR--120)
SPENT FUEL STORAGE/INTERNATIONAL COOPERATION
International view of spent fuel storage as one aspect of fuel cycle safety, 364
SPENT FUEL STORAGE/LEGAL ASPECTS
Licensing considerations and experience with applications for independent spent-fuel storage installations, 300
Participation of the public in the licensing procedure under Section 6 of the Atomic Energy Act. Licensing procedure for intermediate storage, 2813
Status of pertinent regulations and regulatory guides for independent spent-fuel storage installations, 299
Storage of spent fuels in the USA. Some thoughts on the legal position, 346
SPENT FUEL STORAGE/LICENSING
U.S. Department of Energy Program to support the design and licensing of a spent fuel storage basin, 361
SPENT FUEL STORAGE/MAINTENANCE
Commentary on spent fuel storage at Morris operation, 227 (NUREG/CR--0956)
SPENT FUEL STORAGE/MATERIALS HANDLING
Equipment designs for the spent LWR fuel dry storage demonstration, 1438 (CONF-800607--80)
SPENT FUEL STORAGE/MATHEMATICAL MODELS
Spent Nuclear Fuel Storage Program user's guide (SNFSM Code), 2838 (DOE/EIA/8589--2)
SPENT FUEL STORAGE/MECHANICAL STRUCTURES
Nuclear fuel storage arrangement (Patent), 368
SPENT FUEL STORAGE/MEETINGS
Fuel cycles for the 80's, 40 (CONF-800943--(Summ.))
Storage of spent fuel elements, 2772
SPENT FUEL STORAGE/OPERATION
Commentary on spent fuel storage at Morris operation, 227 (NUREG/CR--0956)
SPENT FUEL STORAGE/OPTIMIZATION
Alternative concepts for spent fuel storage basin expansion at Morris Operation, 1598 (NEDG--24749)
Facility for storing elongated nuclear fuel assemblies, 367
SPENT FUEL STORAGE/PACKAGING
Closure weld development for spent fuel canisters. Interim report, 252 (RHO-LD--95)
Spent fuel Receiving and Packaging Facility conceptual

design (For SURF Program), 253 (RHO-SA--136)
Standardized experimental package for spent fuel, 254 (RHO-SA--141)
SPENT FUEL STORAGE/PERFORMANCE
Role of spent fuel characterization in the development of safe repositories, 206 (HEDL-SA--1890-FP)
Spent fuel: prediction model development, 207 (HEDL-SA--1891-FP)
SPENT FUEL STORAGE/PLANNING
Spent-fuel disassembly and canning programs at the Barnwell Nuclear Fuel Plant (BNFP), 133 (AGNS--35900-CONF-63)
SPENT FUEL STORAGE/QUALITY ASSURANCE
Quality assurance program requirements for post reactor nuclear fuel cycle facilities, 118
SPENT FUEL STORAGE/RADIATION HAZARDS
Dose and dose commitment from radioactive substances carried by groundwater from a nuclear fuel repository, 2479 (STUDSVIK-K2--79/92)
Time integrated spent fuel storage biological doses, 3090
SPENT FUEL STORAGE/REGULATORY GUIDES
Status of pertinent regulations and regulatory guides for independent spent-fuel storage installations, 299
SPENT FUEL STORAGE/REMOTE HANDLING
Pacific Northwest Laboratory (PNL) spent fuel transportation and handling facility models, 238 (PNL--3105)
SPENT FUEL STORAGE/RESEARCH PROGRAMS
Commercial waste and spent fuel packaging program. Quarterly report, July through September 1980, 194 (DOE/NV/10061--4)
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, October 1-December 31, 1978, 137 (BAW--1484-1)
Critical experiments supporting close proximity water storage of power reactor fuel, 139 (BAW--1484-3)
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, October 1-December 31, 1978, 142 (BAW--1484-5)
Critical experiments supporting close proximity water storage of power reactor fuel. Technical progress report, 144 (BAW--1484-7)
DOE program for the management of radioactive waste and spent reactor fuel, 2382
Spent fuel handling and packaging program. Quarterly report, October-December 1979, 191 (DOE/NV/10061--1)
Spent fuel handling and packaging program. Quarterly report, January-March 1980, 192 (DOE/NV/10061--2)
SPENT FUEL STORAGE/RETRIEVAL SYSTEMS
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 1. 25-year retrievability, 1688 (ORO--5366-T4)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 3. Waste retrieval from backfilled regions, 1690 (ORO--5366-T6)
SPENT FUEL STORAGE/RISK ASSESSMENT
Use of risk assessment in evaluating ISFSI design criteria, 298
SPENT FUEL STORAGE/SAFEGUARDS
Laser surveillance system for spent fuel, 2616 (BNL--28054)
Spent-Fuel Storage Facility Project. Progress report, June 1-September 30, 1979, 223 (LA--8237-PR)
SPENT FUEL STORAGE/SAFETY
Handling final storage of unreprocessed spent nuclear fuel. I. General, 215 (INIS-mf--4765)
International view of spent fuel storage as one aspect of fuel cycle safety, 364
SPENT FUEL STORAGE/SAFETY ENGINEERING
Compact storage of spent fuel elements in nuclear power plants with LWR reactors, 3037 (INIS-mf--5181)
SPENT FUEL STORAGE/SAFETY STANDARDS
Principles of safety criteria for nuclear fuel facilities, 2580
SPENT FUEL STORAGE/SALT DEPOSITS
Review of information on the radiation chemistry of materials around waste canisters in salt and assessment of the need for additional experimental information, 1661 (ORNL--5607)
SPENT FUEL STORAGE/SHROUDS
Shroud for storing radioactive spent nuclear fuel elements, 314
SPENT FUEL STORAGE/SIMULATION
Materials interaction test summary description (Canister/rock interaction), 210 (HEDL-TC--1331)
SPENT FUEL STORAGE/SPECIFICATIONS
Fuel storage and handling system of 'JOYO' spent fuel facility, 3012
SPENT FUEL STORAGE/SPENT FUEL CASKS
Spent fuel shipping and storage system for Atucha Nuclear Power Station, 157 (CONF-780506--(Vol.1))
SPENT FUEL STORAGE/STABILITY
Hydrothermal stability of spent fuel and high-level waste ceramics in the geologic repository environment, 1419 (CONF-790420--)
SPENT FUEL STORAGE/STORAGE FACILITIES
Design and operational characteristics of high-density fuel storage facilities, 316
Fuel storage tank (Patent), 320
Permanent storage facility for spent fuel assemblies, 351 (PNL-TR--399)
Spent fuel receipt and storage at the Morris Operation, 225 (NEDG--21889)
Study on separate spent fuel storage facility, 363
SPENT FUEL STORAGE/STRESSES
Stressmeter placement at spent fuel test in climax granite, 271 (UCID--18629)
SPENT FUEL STORAGE/SURVEILLANCE
Laser surveillance system for spent fuel, 2616 (BNL--28054)
SPENT FUEL STORAGE/TECHNOLOGY ASSESSMENT
Spent fuel storage experience, 318
Statement of position of the United States Department of Energy in the matter of proposed rulemaking on the storage and disposal of nuclear waste (waste confidence rulemaking), 1457 (DOE/NE--0007)
Status of nuclear fuel reprocessing, spent fuel storage, and high-level waste disposal. Nuclear Fuel Cycle Committee, California Energy Resources Conservation and Development Commission. Draft report, 117
Storage and shipment of spent fuel elements. INFCE working group 6, 277
SPENT FUEL STORAGE/TEMPERATURE DISTRIBUTION
Possibility of multiple temperature maxima in geologic repositories for spent fuel from nuclear reactors, 232 (ORNL/TM--7024)
SPENT FUEL STORAGE/THERMAL ANALYSIS
Three-dimensional thermal analysis of a baseline spent fuel repository, 2081 (UCRL--84153)
SPENT FUEL STORAGE/UNDERGROUND STORAGE
Calculated hydrogeologic pressures and temperatures resulting from radioactive waste in the Eleana argillite, 1945 (SAND--79-2019C)
Criticality in a spent fuel repository in wet crystalline rock, 221 (KBS-TR--108)
Dose and dose commitment from radioactive substances carried by groundwater from a nuclear fuel repository, 2479 (STUDSVIK-K2--79/92)
Effects of brine migration on waste storage systems. Final report (Thermomechanical effects), 2481 (UCRL--15102)
Long-term geologic storage of spent fuel, 2099
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Volume I. Conceptual design report, 1684 (ORO--5366-T1(Vol.1)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Volume II. Conceptual design report, 1685 (ORO--5366-T1(Vol. 2))
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 1. Twenty-five-year retrievability capital equipment cost estimate, 1687 (ORO--5366-T3)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Quality assurance program for licensing, 1689 (ORO--5366-T5)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel. Special study No. 3. Waste retrieval from backfilled regions, 1690 (ORO--5366-T6)
National waste terminal storage repository in a bedded salt formation for spent unreprocessed fuel: construction accounting manual, 1692 (ORO--5366-T8)
Recoverable test storage of spent fuel elemments from the AVR Asse - Concept and measuring programme, 286
Spent fuel handling system for a geologic storage test at the Nevada Test Site, 2077 (UCRL--83728)
Subsurface storage of commercial spent nuclear fuel, 317
Thermal analysis for a spent reactor fuel storage test in granite, 2079 (UCRL--83995)
Thermoelastic analyses of spent fuel repositories in bedded and dome salt. Technical memorandum report RSI-0054, 276 (Y/OWI/SUB--77-22303/4)
SPENT FUELS/AFTER-HEAT
Decay heat, 2847
SPENT FUELS/CHARGES
Evaluation of alternative spent-fuel management fees, 303
SPENT FUELS/CONTAINERS
Hot isostatic pressing for the consolidation and containment of radioactive waste, 1235
SPENT FUELS/DISSOLUTION
Iodine evolution from nuclear fuel dissolver solutions by air sparging, 39 (CONF-800802--18(Draft))
SPENT FUELS/ENCAPSULATION
Demonstrate fuel disassembly/encapsulation. Technical progress report, July 1980-September 1980, 614 (AGNS--47921-3026-TPR-2)
Effects of gaseous radioactive nuclides on the design and operation of repositories for spent LWR fuel in rock salt, 1660 (ORNL--5578)
Method to encapsule spent nuclear fuel in a safety cladding enabling long-term storage (Patent), 289
Spent LWR fuel encapsulation and dry storage demonstration, 677 (CONF-800607--79)
Study of the encapsulation of spent nuclear fuels for final storage without reprocessing, 867 (KBS-TR--39)
Successful encapsulation of nuclear waste, 1194
SPENT FUELS/FISSION PRODUCT RELEASE
Fission product release. Progress report, April 1-June 30, 1979, 222 (LA--7969-PR)
Fission product release. Progress report, October 1-December 31, 1979, 62 (LA--8272-PR)
Fission product release. Progress report, April 1-June 30, 1980, 2436 (LA--8539-PR)

SPENT FUELS/FORECASTING
Projections of commercial nuclear capacity and spent-fuel accumulation in the United States, 89
Reprocessing of irradiated fuels (France), 97
SPENT FUELS/FUEL-CLADDING INTERACTIONS
Determination of allowable maximum acceleration loads for the transport of irradiated fuel, 161 (CONF-780506--(Vol.1))
SPENT FUELS/GAMMA SPECTROSCOPY
Gamma spectrometric measurements of LWR power reactor spent fuel, 2634
Study of gamma-ray spectroscopy for spent-fuel verification at the Bruce CANDU reactors, 2633
SPENT FUELS/GOVERNMENT POLICIES
Evaluation of alternative spent-fuel management fees, 303
Management of high-level nuclear wastes, 519 (PNL-SA--7072/T1)
SPENT FUELS/HEAT TRANSFER
Cooldown testing of nuclear fuel casks, 131 (AGNS--35900-CONF-7)
Heat transfer analysis of the geologic disposal of spent fuel and high-level waste storage canisters, 1873 (RHO-SA--160)
SPENT FUELS/INVENTORIES
Determination of away-from-reactor storage requirements, 183 (CONF-800943--(Summ.))
Spent fuel and waste inventories and projections, 495 (ORO--778)
SPENT FUELS/LAND TRANSPORT
Experience in complying with quality assurance requirements for cask lifting devices, 178 (CONF-780506--(Vol.2))
HZ-75T spent fuel shipping cask, 146 (CONF-780506--(Vol.1))
Operations experience with the NAC-1 legal weight truck cask, 175 (CONF-780506--(Vol.2))
Radiological risk analysis of truck and rail transportation of nuclear wastes, 179 (CONF-780506--(Vol.2))
Risk of transporting spent nuclear fuel by truck, 243 (PNL-SA--6520)
Spent fuel transportation accident: a state's involvement, 177 (CONF-780506--(Vol.2))
Transportation of nuclear fuel, 123 (AECL--6331)
Truck vs rail shipment of spent nuclear fuel, 173 (CONF-780506--(Vol.2))
SPENT FUELS/LEACHING
Fission product release. Progress report, October 1-December 31, 1979, 62 (LA--8272-PR)
Fission product release. Progress report, April 1-June 30, 1980, 2436 (LA--8539-PR)
Long-term leaching of irradiated spent fuel, 247 (PNL-SA--7734)
Spent fuel leach tests, 1793 (PNL-SA--7992)
Spent LWR fuel leach tests: Waste Isolation Safety Assessment program, 236 (PNL--2982)
Status report on LWR spent fuel IAEA leach tests, 1751 (PNL--3173)
SPENT FUELS/MARITIME TRANSPORT
A generic assessment of barge transportation of spent nuclear fuel, 235 (PB--292599)
All aboard the Rainbow Warrior, 2107
Considerations in the transportation of spent fuel and other radioactive materials by sea, 2551 (PNL-SA--6523)
HZ-75T spent fuel shipping cask, 146 (CONF-780506--(Vol.1))
Licensing experiences, risk assessment, demonstration test on nuclear fuel packages and design criteria for sea going vessel carrying spent fuel in Japan, 148 (CONF-780506--(Vol.1))
Motor vessel HONOURA MARU: a specialized carrier for spent fuel, 162 (CONF-780506--(Vol.1))
Safety evaluation on transport of fuel at sea and test program on full scale cask in Japan, 149 (CONF-780506--(Vol.1))
Safety in marine transport of spent fuel in Japan, 333
Spent fuel carrier ''Hinoura Maru'', 347
Survey and research report on the safe transport of spent nuclear fuels, 354
Transportation of spent fuel by barge and by rail: a comparison of risk, 307
US perspective of transporting radioactive materials by sea, 150 (CONF-780506--(Vol.1))
SPENT FUELS/MATERIALS HANDLING
Equipment designs for the spent LWR fuel dry storage demonstration, 1438 (CONF-800607--80)
Spent fuel handling and packaging program. Quarterly report, April-June 1980, 193 (DOE/NV/10061--3)
SPENT FUELS/MOTOR VEHICLE ACCIDENTS
Spent fuel transportation accident: a state's involvement, 177 (CONF-780506--(Vol.2))
SPENT FUELS/NONDESTRUCTIVE ANALYSIS
Monte Carlo calculational design of an NDA instrument for the assay of waste products from high enriched uranium spent fuels, 2624 (LA-UR--79-3218)
Nondestructive measurements on spent fuel for away-from-reactor storage facilities, 2617 (CONF-800943--(Summ.))
SPENT FUELS/PACKAGING
Commercial Waste and Spent Fuel Packaging Program. Quarterly technical progress report, April-June 1979, 251 (RHO-LD--79-83-3Q)
Empirical equations for puncture analysis of lead-shielded spent fuel shipping casks, 158 (CONF-780506--(Vol.1))
Licensing experiences, risk assessment, demonstration test on nuclear fuel packages and design criteria for sea going vessel carrying spent fuel in Japan, 148 (CONF-780506--(Vol.1))
Oak Ridge National Laboratory shipping containers for radioactive materials, 234 (ORNL/TM--7179)
Spent fuel shipping and storage system for Atucha Nuclear Power Station, 157 (CONF-780506--(Vol.1))
Spent fuel handling and packaging program. Quarterly report, April-June 1980, 193 (DOE/NV/10061--3)
SPENT FUELS/POWER GENERATION
System to make use of atomic waste (Patent), 566
SPENT FUELS/RADIATION MONITORING
Irradiated fuel monitoring by Cerenkov glow intensity measurements, 2622 (LA--7838-MS)
SPENT FUELS/RADIOACTIVE WASTE MANAGEMENT
Spent-fuel disposition: European strategies, 2841
SPENT FUELS/RAIL TRANSPORT
A generic assessment of barge transportation of spent nuclear fuel, 235 (PB--292599)
Analysis of freight train accident statistics for 1972-1974, 244 (PNL-SA--6521)
Compatibility of radioactive materials transportation with railroad operations: two views, 155 (CONF-780506--(Vol.1))
Government's duty, as shipper and regulator, to keep spent fuel and waste on track: the ICC cases, 152 (CONF-780506--(Vol.1))
Placing the special trains issue in perspective, 242 (PNL-SA--6519)
Placing the special trains issue in perspective (Rail shipment of spent fuels), 154 (CONF-780506--(Vol.1))
Private shippers' efforts to transport spent nuclear fuel and waste by rail: the Interstate Commerce Commission cases, 153 (CONF-780506--(Vol.1))
Radiological risk analysis of truck and rail transportation of nuclear wastes, 179 (CONF-780506--(Vol.2))
Railroad perspective on transportation of spent fuel and high level waste and recent ICC decisions, 151 (CONF-780506--(Vol.1))
Transportation of spent fuel by barge and by rail: a comparison of risk, 307
Truck vs rail shipment of spent nuclear fuel, 173 (CONF-780506--(Vol.2))
SPENT FUELS/REMOTE HANDLING
Fuel storage and handling system of 'JOYO' spent fuel facility, 3012
Pacific Northwest Laboratory (PNL) spent fuel transportation and handling facility models, 238 (PNL--3105)
Unloading and transfer-techniques of spent fuel, 283
SPENT FUELS/REPROCESSING
APEX accelerator cycle for transmutation of long-lived fission wastes, 622 (BNL--28282)
Development of enrichment and reprocessing technologies in Japan, 116
Economic study of spent fuel reprocessing using the SYWA computer program, 59 (INIS-mf--5568)
Extraction process of fission products from spent nuclear fuel elements (Patent), 119
Exxon nuclear fuel recovery and recycling center: process description, 95
Fuel-cycle facilities: preliminary safety and environmental information document. Volume VII, 2839 (DOE/NE--0003/7)
Ion chromatographic determination of dibutylphosphoric acid in nuclear fuel reprocessing streams, 1282
Management of high-level radioactive wastes, 1106
Nuclear fuel cycle. Vol. 2. Waste management in nuclear power plants. Environmental aspects and economic considerations, 600
Outline of the Chemical Processing Facility (CPF), 1315
Plutonium recovery goes on-steam, 86
Process for enriching nuclear fuel from breeder and fission waste material (Patent), 23
Process technology and process development. Rockwell Hanford Operations semiannual report, October 1978-March 1979, 73 (RHO-LD--79-3A)
Prospects of spent management in Spain, 358
Rockwell Hanford Operations process technology and process development. Semiannual report, April-September 1979, 74 (RHO-LD--79-3B)
Spent-fuel disposition: European strategies, 2841
State of development and problems of chemistry and process technology in nuclear fuel processing, 78 (WINDSCALE-TRANS--813)
Status of nuclear fuel reprocessing, spent fuel storage, and high-level waste disposal. Nuclear Fuel Cycle Committee, California Energy Resources Conservation and Development Commission. Draft report, 117
Survey of nuclear fuel reprocessing technologies, 104
Waste arisings from a high-temperature reactor with a uranium-thorium fuel cycle, 2759 (INFCE/DEP/WG--7/3)
Waste management as the central task of nuclear energy policy, 1498 (INIS-mf--4782)
West German R + D activities, in the field of LWR fuel element reprocessing and disposal. Status and outlook, 1337
SPENT FUELS/RETRIEVAL SYSTEMS
Retrieval system for emplaced spent unreprocessed fuel (SURF) in salt bed depository: accident event

analysis and mechanical failure probabilities. Final report, 2037 (UCRL--15111)
SPENT FUELS/SAFEGUARDS
Safeguards assessment of spent fuel disposal alternatives, 2641
SPENT FUELS/STORAGE
US defines nuclear fuel storage costs, 3141
SPENT FUELS/THERMAL ANALYSIS
Some aspects of the thermal analysis of metal-encapsulated spent fuel, 319
SPENT FUELS/THOREX PROCESS
Behaviour of Np and Pu in the reprocessing of thorium-containing nuclear fuels, 31 (AED-Conf--78-274-000)
SPENT FUELS/TRANSPORT
Application of ALARA principles to shipment of spent nuclear fuel, 341
Application of ALARA principles to shipment of spent nuclear fuel, 240 (PNL--3261)
Determination of allowable maximum acceleration loads for the transport of irradiated fuel, 161 (CONF-780506--(Vol.1))
DOE transportation technology center: a program for nuclear transportation, 338
Empirical equations for puncture analysis of lead-shielded spent fuel shipping casks, 158 (CONF-780506--(Vol.1))
Environmental effects sssociated with the transportation of radioactive material, 258 (SAND--79-1929C)
Evolution in structural design methods for large quantity packages, 2643 (CONF-780506--(Vol.2))
Fuel transporting device (Patent), 321
Interstation transfer of spent nuclear fuel, 176 (CONF-780506--(Vol.2))
Pacific Northwest Laboratory (PNL) spent fuel transportation and handling facility models, 238 (PNL--3105)
Proceedings of the nuclear materials transportation program development seminar, 259 (SAND--79-2262)
Public acceptance of radioactive waste transportation systems, 174 (CONF-780506--(Vol.2))
Selected legal and regulatory concerns affecting domestic energy transportation systems, 3171 (PNL--2989)
Spent fuel transportation in the fuel cycle, 353
Spent-fuel transportation required to implement the DOE spent-fuel policy, 305
Spent fuel integrity during transportation, 212 (HEDL-TME--78-58)
Spent fuel transportation: a requisite for any alternative in the back-end of the nuclear fuel cycle, 147 (CONF-780506--(Vol.1))
Spent fuel shipping and storage system for Atucha Nuclear Power Station, 157 (CONF-780506--(Vol.1))
Spent nuclear fuel shipment, 219 (INIS-mf--5569)
Standardize or not to standardize: the pros and cons of standardized designs for casks and cask transport systems, 164 (CONF-780506--(Vol.1))
Strength and water-tightness of the closure head and valves of a model cask under high external pressure, 163 (CONF-780506--(Vol.1))
Studies and research concerning BNFP. Nuclear spent fuel transportation studies (Impact of new regulations and uncertainty), 129 (AGNS--35900-1.4-59)
Technology Information Center, 533 (SAND--80-0023C)
Transport of irradiated fuel in the European Community, 1975-1985, 171 (CONF-780506--(Vol.2))
Transport of irradiated fuels within the Italian electronuclear power program, 172 (CONF-780506--(Vol.2))
Transportation analysis for the concept of regional repositories, 233 (ORNL/TM--7170)
Transportation of postfission radioactive wastes from the commercial LWR fuel cycle, 180 (CONF-780506--(Vol. 2))
Unloading and transfer-techniques of spent fuel, 283
Worldwide spent fuel transportation logistics, 170 (CONF-780506--(Vol.2))
SPENT FUELS/TRANSPORT REGULATIONS
Transport of radioactive materials, 349
SPENT FUELS/TRANSPORTATION SYSTEMS
Program strategy document for the Nuclear Materials Transportation Technology Center, 255 (SAND--79-1402)
Risk assessment of energy material transportation systems, 2525 (DOE/EV--0046(Vol.2))
SPENT FUELS/UNDERGROUND DISPOSAL
Disposal of spent nuclear fuel, 1630 (ONWI--59)
SPENT FUELS/USES
System to make use of atomic waste (Patent), 566
SQUIRRELS/POPULATION DYNAMICS
Species composition and local movement of small mammals on the Radioactive Waste Management Complex, Idaho National Engineering Laboratory Site, 3366 (IDO--12088)
SRE REACTOR/DECOMMISSIONING
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
Post-retirement plan for radiological decontamination of the SRE site, 707 (DOE/SF/00701--T57)
SRE activity requirement No. 18 and 19 decontamination and dismantling of Mark I and Mark II Fuel Handling Machines, 708 (DOE/SF/00701--T60)
SRE REACTOR/DECONTAMINATION
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
Post-retirement plan for radiological decontamination of the SRE site, 707 (DOE/SF/00701--T57)
SRE activity requirement No. 18 and 19 decontamination and dismantling of Mark I and Mark II Fuel Handling Machines, 708 (DOE/SF/00701--T60)
STACK DISPOSAL/AERIAL MONITORING
Monitoring methods for radioactive noble gases in airborne effluents from nuclear power plants, 2998
STACK DISPOSAL/RADIATION MONITORING
Monitoring of the release of radioactive substances from nuclear facilities into surface waters, 2907
Monitoring methods for radioactive noble gases in airborne effluents from nuclear power plants, 2998
STACK DISPOSAL/RADIATION MONITORS
Measurement of carbon-14 in gaseous effluents, 3689
STACKS/RADIATION MONITORING
Regular control of monitors for effluents from nuclear power plant stacks, 2948 (STUDSVIK/K2--79/79)
STADE REACTOR/REACTOR OPERATION
Results of German nuclear power plant operation in 1978. Pt. 1. Industrial nuclear power stations. Data from the annual report by the ABE committee, 2833
STAINLESS STEEL-304/CORROSION
Properties of light water reactor spent fuel cladding. Interim report, 1488 (HEDL-TME--78-70)
STAINLESS STEEL-304/MECHANICAL PROPERTIES
Properties of light water reactor spent fuel cladding. Interim report, 1488 (HEDL-TME--78-70)
STAINLESS STEEL-304/PHYSICAL PROPERTIES
Properties of light water reactor spent fuel cladding. Interim report, 1488 (HEDL-TME--78-70)
STAINLESS STEEL-304L/COMPATIBILITY
Canister compatibility with Carlsbad salt, 1467 (OP-MS--79-30)
STAINLESS STEEL-304L/CORROSION
Attack of high-strength, oxidation-resistant alloys during in-can melting of simulated waste glasses, 722 (OP-MS--79-39)
STAINLESS STEEL-310/CORROSION
Attack of high-strength, oxidation-resistant alloys during in-can melting of simulated waste glasses, 722 (OP-MS--79-39)
STAINLESS STEEL-347/CORROSION
Attack of high-strength, oxidation-resistant alloys during in-can melting of simulated waste glasses, 722 (OP-MS--79-39)
STAINLESS STEELS
See also STAINLESS STEEL-304
STAINLESS STEEL-304L
STAINLESS STEEL-310
STAINLESS STEEL-347
STAINLESS STEELS/CORROSION RESISTANCE
Behavior of spent LWR fuel assemblies, 2709
STAINLESS STEELS/CREEP
Contribution of Dounreay to the development of fast reactors, 2796
STAINLESS STEELS/DECONTAMINATION
Decontamination of metals containing plutonium and americium, 615 (ANL--78-13)
Electrodecontamination using a basic electrolyte, 973 (RFP--2972)
STAINLESS STEELS/PHYSICAL RADIATION EFFECTS
Contribution of Dounreay to the development of fast reactors, 2796
STAINLESS STEELS/THERMAL CONDUCTIVITY
Thermal conductivity of granules, 1001 (SGAE--3012)
STANDARDS/RECOMMENDATIONS
Sandia's activities in uranium mill tailings remedial action, 1996 (SAND--80-1319C)
STANDING CROP
See BIOMASS
STANFORD LINEAR ACCELERATOR CENTER/RADIATION MONITORING
Annual environmental monitoring report, January-December 1979, 3247 (SLAC--228)
STATE GOVERNMENT/DECISION MAKING
Science and technology advice for the executive the Michigan experience, 3174 (PB--294738)
STEAM GENERATING HEAVY WATER REACTOR
See SGHWR REACTOR
STEEL-KH18N10T/CORROSION RESISTANCE
Results of investigation into corrosion resistance of certain structural steels and nickel in fluoride products of fast reactor fuel reprocessing, 796 (INIS-mf--5565)
STEELS
See also CARBON STEELS
STAINLESS STEELS
STEELS/COMPATIBILITY
Canister compatibility with Carlsbad salt, 1467 (OP-MS--79-30)
STEELS/CORROSION
Corrosion of mild steel waste form containers, 2208
STEELS/DECONTAMINATION
Decontaminaion of metals containing plutonium and americium, 615 (ANL--78-13)
STIR REACTOR/DECOMMISSIONING
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
STIR REACTOR/DECONTAMINATION
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
STORAGE FACILITIES
See also NATURAL GAS
PETROLEUM

STORAGE FACILITIES/DESIGN
AFR spent fuel storage program. Technical progress report, July 1980-September 1980, 135 (AGNS--47921-TPR-5)
Report of conceptual design for TRU solid waste facilities adjacent to 200H Area: Savannah River Plant, 1473 (DPE--3519)
STORAGE FACILITIES/LICENSING
AFR spent fuel storage program. Technical progress report, July 1980-September 1980, 135 (AGNS--47921-TPR-5)
STORAGE FACILITIES/STANDARDS
Quality assurance program requirements for post reactor nuclear fuel cycle facilities, 118
STORAGE (SPENT FUEL)

STR REACTOR (SHIELD TEST)
See STIR REACTOR
STRAIN GAGES/DESIGN
Borehole-inclusion stressmeter measurements in bedded salt, 1900 (SAND--79-0377)
STRESS ANALYSIS/MEASURING INSTRUMENTS
Borehole-inclusion stressmeter measurements in bedded salt, 1900 (SAND--79-0377)
STRESSES
(Mechanics.)
STRESSES/MEASURING INSTRUMENTS
Review of current capabilities for the measurement of stress, displacement, and in situ deformation modulus, 3555 (ONWI--95)
STRESSES/MEASURING METHODS
Review of current capabilities for the measurement of stress, displacement, and in situ deformation modulus, 3555 (ONWI--95)
STRONTIUM/ACTIVATION ANALYSIS
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
STRONTIUM/ADSORPTION
Adsorption of radiostrontium by soil treated with alkali metal hydroxides, 3347
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Chromatographic K/sub d/ values of radionuclides and the effect of redox potentials on sorption of radionuclides by geologic media, 2459 (PNL-SA--7352(Vol.1))
Effects of hydrogen peroxide pretreatment of clay minerals on the adsorption of Sr-85 and Tc-95m under anoxic conditions, 2469 (PNL-SA--8571(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1978, 1774 (PNL-SA--7352(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1979, 2468 (PNL-SA--8571(Vol.2))
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Monitoring and physical characterization of unsaturated zone transport. Laboratory analysis, 2457 (PNL--3304)
Nuclear waste chemistry, 488 (ORNL--5665)
Nuclide transport by groundwater in Swedish bedrock, 2581
Parameters affecting radionuclide migration in geologic media, 1560 (LA-UR--79-2992)
Preliminary rate expressions for analysis of radionuclide migration resulting from fluid flow through jointed media, 1909 (SAND--79-0989C)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, July 1-September 30, 1979, 1550 (LA--8152-PR)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, October 1-December 31, 1979, 2435 (LA--8309-PR)
Sorption behavior of ^{85}Sr, ^{137}Cs and /sup 95m/Tc under normal atmospheric and reduced oxygen levels, 2470 (PNL-SA--8571(Vol.2))
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Studies of radionuclide availability and migration at the Nevada Test Site relevant to radioactive waste disposal, 1769 (PNL-SA--7352(Vol.1))
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
Systematic study of nuclide adsorption on selected geologic media. Annual progress report, October 1, 1978-September 17, 1979, 2463 (PNL-SA--8571(Vol.2))
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
STRONTIUM/CHEMICAL REACTIONS
Hydrothermal interactions of cesium and strontium phases from spent unreprocessed fuel with basalt phases and basalts, 1821 (RHO-BWI-C--70)
STRONTIUM/DESORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
STRONTIUM/DISTRIBUTION FUNCTIONS
Distribution of Cs, Sr, Ce, Eu and Tb into Na- and H-type zeolites, 1291
STRONTIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
STRONTIUM/ENVIRONMENTAL EXPOSURE PATHWAY
Geochemistry of radioactive waste disposal, 2135
STRONTIUM/ENVIRONMENTAL TRANSPORT
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
STRONTIUM/GEOCHEMISTRY
Geochemistry of radioactive waste disposal, 2135
STRONTIUM/ION EXCHANGE
Distribution of Cs, Sr, Ce, Eu and Tb into Na- and H-type zeolites, 1291
Small-scale integrated demonstration of high-level radioactive waste processing and vitrification using actual SRP waste, 742 (DP-MS--80-60)
STRONTIUM/LEACHING
Immobilization of strontium and cesium in intermediate-level liquid wastes by solidification in cements, 1238
Material investigations on solidification of intermediate-level waste solutions in cement: leachability of strontium and cesium, 875 (KFK--2842)
Material studies on solidification of medium-level waste solutions with cement: leachability of cesium and strontium, 1039 (PNL-TR--387)
Measuring the hydrolytic resistance of solidification products, 2134
Preliminary mini experiments on leaching of glass. A report of the situation 1979-03-15, 2016 (STUDSVIK/E2--79/38)
STRONTIUM/RADIOACTIVE WASTE PROCESSING
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
STRONTIUM/RADIONUCLIDE MIGRATION
Preliminary rate expressions for analysis of radionuclide migration resulting from fluid flow through jointed media, 1909 (SAND--79-0989C)
STRONTIUM/SOLUBILITY
Hydrothermal glass reactions in salt brine, 2268
STRONTIUM/SOLVENT EXTRACTION
Extraction of americium, curium, strontium and rare earths from aqua-tail solutions of WWER spent fuel element reprocessing, 58 (INIS-mf--5567)
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
STRONTIUM/SORPTION
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
STRONTIUM/X-RAY FLUORESCENCE ANALYSIS
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
STRONTIUM 85/ADSORPTION
Evaluation of isotope migration: land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Quarterly progress report, October-December 1979, 1613 (NUREG/CR--1325)
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)

Variables affecting sorption and transport of radionuclides in Hanford subsoils, 2274
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
STRONTIUM 85/DESORPTION
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
STRONTIUM 85/DISTRIBUTION FUNCTIONS
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
STRONTIUM 85/ENVIRONMENTAL TRANSPORT
Shallow land disposal of low-level radioactive waste: radionuclide sorption (Determination of sorptive distribution coefficient (K/sub d/) for selected radionuclides in site specific soils at various water contents), 3351
STRONTIUM 85/EVAPORATION
Some studies of nuclide losses. 2. Cold finger, 1289
STRONTIUM 85/SORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
STRONTIUM 89/FLOTATION
Ionic flotation of strontium 89, 1161
STRONTIUM 90/ADSORPTION
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
STRONTIUM 90/COPRECIPITATION
Effects studies of H_2SO_4/Na_2SO_4 on separation of Sr-90 from liquid Sr-90 waste by coprecipitation method using $BaSO_4$ as a carrier, 962 (PPGM-L--181-78)
STRONTIUM 90/DESORPTION
Sorption-desorption processes of radioisotopes with solid materials from liquid releases and atmosphere deposits. The distribution coefficient (Ksub(d)), its uses, limitations, and practical applications, 3431 (CEA-R--4952)
STRONTIUM 90/DIALYSIS
Removal of radioactive ions from nuclear waste solutions by electrodialysis, 1307
STRONTIUM 90/ENVIRONMENTAL TRANSPORT
Adsorption of radiostrontium by soil treated with alkali metal hydroxides, 3347
Engineering safeguard for accidental release of radionuclides from radioactive waste ground disposal site, (1). Feasibility of contaminated groundwater zone control by underground impermeable wall, 3459
Investigation of radiation substances migration in the surface waters of land, seas and oceans for the purpose of study of radiation situation changes in the fresh and sea-waters in connection with nuclear power plants and nuclear industry enterprises activity, 3417 (INIS-mf--5574)
Physical migration of radionuclides in soil, 3349
Radiological safety studies on the ground disposal of radioactive wastes. Distribution and migration of radionuclides in an aerated zone, 1525 (JAERI-M--8044)
Sorption and migration studies of fission products for ground waste disposal, 2335
STRONTIUM 90/LEACHING
Chemical treatments of soil to decrease radiostrontium leachability, 1436 (CONF-800416--1)
Effect of dimension of specimen on amounts of cesium-137, strontium-90, and cobalt-60 leached from matrix of hardened cement grout, 2346
Leach and soil column tests with stored redox sludge, 2411 (ARH--1733)
Leach rates of high activity waste from borosilicate glass, 2226
Physical migration of radionuclides in soil, 3349
Thermal, chemical and radiation stability of vitrificated radioactive wastes, 1513 (INIS-mf--5571)
STRONTIUM 90/MIGRATION
Physical migration of radionuclides in soil, 3349
STRONTIUM 90/PERSONNEL MONITORING
Urinary ^{90}SR concentration in occupationally exposed and nonexposed persons in Austria, 2573
STRONTIUM 90/PLUMES
Liquid waste disposal at the Idaho National Engineering Laboratory and resultant waste plumes in the Snake River Plain aquifer, 3436 (IDO--12088)
STRONTIUM 90/RADIATION MONITORING
1978 environmental monitoring report, 3190 (BNL--51031)
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)
STRONTIUM 90/RADIOCHEMICAL ANALYSIS
Continuous-flow apparatus for determination of ^{90}Sr in mixtures of fission products, 75 (RHO-SA--122)
Radiochemical analyses of samples from beneath a solid radioactive waste disposal pit at Los Alamos, New Mexico, 1558 (LA--8422-MS)
STRONTIUM 90/RADIOECOLOGICAL CONCENTRATION
Measurement of environmental radioactivity. Ispra 1976, 3206 (EUR--5805)
Some aspects of accumulation of radionuclides in coastal sediments, 3439 (INIS-mf--5372)
STRONTIUM 90/RADIOISOTOPE HEAT SOURCES
Quarterly report on the strontium heat source development program, Advanced Nuclear Systems and Projects Division for July-September 1979, 3617 (PNL--1845-44)
STRONTIUM 90/RADIONUCLIDE MIGRATION
^{90}Sr and ^{137}Cs in coyote scats from the Hanford Reservation, 3384
Evaluation of isotope migration, land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
STRONTIUM 90/REMOVAL
Removal of radionuclides from Hanford defense waste solutions, 983 (RHO-SA--51)
Removal of radionuclides from the water-soluble fraction of Hanford Nuclear Defense Wastes, 988 (RHO-SA--145)
STRONTIUM 90/SOLVENT EXTRACTION
Continuous-flow apparatus for determination of ^{90}Sr in mixtures of fission products, 75 (RHO-SA--122)
Methods for solvent extraction of strontium 90 with carboxylic acids and separation of americium and curium by quaternary ammonium compounds, 791 (INIS-mf--5564)
STRONTIUM 90/SORPTION
Sorption studies at Hanford for the control of radioactive wastes, 1872 (RHO-SA--155)
STRONTIUM 90/UPTAKE
Cesium-137 in coots (Fulica americana) on Hanford waste ponds: contribution to population dose and offsite transport estimates, 3614 (PB--296947)
STRONTIUM COMPOUNDS/ION EXCHANGE
Ion-exchange properties of cesium and strontium into zeolites from sodium salt solutions, 3686
STRONTIUM ISOTOPES/ENVIRONMENTAL TRANSPORT
Chemical migration of radionuclides in soil, 3350
STRONTIUM ISOTOPES/LEACHING
Chemical migration of radionuclides in soil, 3350
STRONTIUM ISOTOPES/MIGRATION
Chemical migration of radionuclides in soil, 3350
STRONTIUM OXIDES/SOLUBILITY
Hydrothermal interactions of cesium and strontium phases from spent unreprocessed fuel with basalt phases and basalts, 1821 (RHO-BWI-C--70)
STRUCTURAL BUCKLING
See DEFORMATION
SUBCRITICAL FLOW
See LAMINAR FLOW
SUBSURFACE STRUCTURES/DESIGN
Nuclear waste repository in basalt project B-301 preconceptual design report, 1825 (RHO-BWI-CD--35)
SUBSURFACE STRUCTURES/SEISMIC EFFECTS
Earthquake related displacement fields near underground facilities, 1463 (DP--1533)
SULFATES/CHROMATOGRAPHY
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
SULFITES/OXIDATION
Other projects, 474 (LBL--10000)
SULFUR DIOXIDE/MONITORING
1978 environmental monitoring report, 3190 (BNL--51031)
Environmental surveillance at Hanford for CY-1979, 3241 (PNL--3283)
SULFUR DIOXIDE/REMOVAL
Other projects, 474 (LBL--10000)
SUPPORTS
See also FOUNDATIONS
SUPPORTS/DESIGN
Nuclear fuel rack lateral support and preload device (Patent), 2874
SURFACE AIR
See also AIR
EARTH ATMOSPHERE
SURFACE AIR/CONTAMINATION
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
SURFACE AIR/RADIOACTIVITY
Aerial radiological survey of the area surrounding the Edwin I. Hatch Nuclear Plant, Baxley, Georgia, 3199 (EGG--1183-1726)
Air radioactivity in the NRI and its surroundings during 1974, 2425 (INIS-mf--4551)
Airborne radioactivity measurement at Nuclear Research Institute, 3211 (INIS-mf--4637)
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
Graphic overview system for DOE's effluent and environmental monitoring programs, 3202 (EGG--1183-1760)
Measured hourly and daily average ^{85}Kr concentrations within 10 km of the Savannah River Plant (1976), 3204 (EML--373)
Potential importance of resuspension during chronic releases to the atmosphere (Contribution of resuspension of radioisotopes to air concentrations and radiation exposures), 3259
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
SURFACE AIR/RADIONUCLIDE MIGRATION
Radionuclide migration resulting from site intrusion, 3353
SURFACE AIR/THERMOLUMINESCENT DOSIMETRY
Energy systems group environmental monitoring and

facility effluent. Annual report 1979, 3321 (ESG--80-7)
SURFACE WATERS
See also COASTAL WATERS
ESTUARIES
RIVERS
SEAS
SURFACE WATERS/CONTAMINATION
Preliminary evaluation of the BIODOSE computer program (For simulating radionuclide transport through aquatic ecosystems and predicting the dose to humans), 3478 (UCID--18267)
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
SURFACE WATERS/RADIATION MONITORING
1978 annual environmental report. Volume 2. Radiological, 3195 (DOE/PNRO--0292-T1)
Energy systems group environmental monitoring and facility effluent. Annual report 1979, 3321 (ESG--80-7)
Master schedule for CY-1980 Hanford Environmental Surveillance Routine Program, 3240 (PNL--3222)
SURFACE WATERS/RADIOACTIVITY
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)
Graphic overview system for DOE's effluent and environmental monitoring programs, 3202 (EGG--1183-1760)
Radioactivity in surface and coastal waters of the British Isles, 1976. Part 2. Areas other than the Irish Sea and its environs, 3435 (FRL--14)
Surface water contamination with radionuclides caused by nuclear power engineering, 3438 (INIS-mf--5319)
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
SURFACE WATERS/RADIONUCLIDE MIGRATION
Compartment model for assessing chronic radioactive releases (Use of BIODOSE program to compute biosphere transport parameters and doses to individuals and populations), 3381
Investigation of radiation substances migration in the surface waters of land, seas and oceans for the purpose of study of radiation situation changes in the fresh and sea-waters in connection with nuclear power plants and nuclear industry enterprises activity, 3417 (INIS-mf--5574)
Low level waste management: a compilation of models and monitoring techniques. Volume 1, 1668 (ORNL/Sub--79/13617/2)
Plutonium contamination of the 'Altrhein'. The contamination of the sediments, 3440 (KFK--2892)
Radiological survey of the inactive uranium-mill tailings at Rifle, Colorado, 3230 (ORNL--5455)
Solution species of plutonium in the environment, 3445
Study of radium state and behaviour in surface and waste waters, 3433 (CS-INIS--258)
Technology assessments, 3232 (ORNL--5595)
SURFACES/DECONTAMINATION
Decontamination of waste radioactive polluted solutions in radiation treatment, 3659
SWEDEN/ENERGY SOURCES
Vote no. A book about alternatives to nuclear power and oil, 3176
SWEDEN/GEOLOGIC STRUCTURES
Complementary investigations of the bedrock in the Finnsjoe and Karlshamn areas, Sweden, 3523 (SKBF/KBS--79-05)
SWEDEN/GEOLOGY
Bedrock and the soil types in the Finnsjoearea, Sweden, 3524 (SKBF-KBS-TR--79-02)
Evaluation of the hydrogeologic and bed rock geologic conditions at Sternoe, Sweden, 2013 (SKBF/KBS-TR--79-09)
SWEDEN/GRANITES
Complementary measurements of the permeability in the area around Karlshamn, Sweden, 3525 (SKBF/KBS-TR--79-06)
SWEDEN/GROUND WATER
Influence of the temperature on groundwater movements in jointed rock masses with applications to radioactive waste disposal, 2322
SWEDEN/HYDROLOGY
Evaluation of the hydrogeologic and bed rock geologic conditions at Sternoe, Sweden, 2013 (SKBF/KBS-TR--79-09)
SWEDEN/NUCLEAR POWER
Situation of nuclear power generation in Sweden, 3166
SWEDEN/RADIATION PROTECTION
Statistical information 1971-76. From the National Institute of Radiation Protection, 2529 (INIS-mf--5012)
SWEDEN/RADIOACTIVE WASTE DISPOSAL
Evaluation of the hydrogeologic and bed rock geologic conditions at Sternoe, Sweden, 2013 (SKBF/KBS-TR--79-09)
Swedish nuclear fuel safety project for long-term disposal of high-level waste, 2187
Vitrified radwaste from reprocessing. Material concerning the examination by the Swedish Nuclear Power Inspectorate of the supplementary geology report from the KBS-project, 1504 (INIS-mf--5298)
Vitrified radwaste from reprocessing. Supplementary geological investigations of the KBS-project, Sweden, 1505 (INIS-mf--5299)
SWEDEN/RADIOACTIVE WASTE MANAGEMENT
Nuclear power plant waste management, 554
Plans for the waste management at Studsvik, Sweden, 1004 (STUDSVIK/K1--79/4)
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)
Survey of the arrangements for waste management at Studsvik, Sweden, 1005 (STUDSVIK/K1/3--79/11)
Swedes develop new system for nuclear waste storage, 2170
SWEDEN/RADIOACTIVE WASTE STORAGE
Influence of the temperature on groundwater movements in jointed rock masses with applications to radioactive waste disposal, 2322
Pilot heater test of the Swedish Nuclear Fuel Safety Program, 2321
SWEDEN/SPENT FUEL STORAGE
Central spent fuel storage in Sweden, 362
SWITZERLAND/ATOMIC ENERGY LAWS
'YES' to the partial revision of the law on atomic energy, 3139
SWITZERLAND/ELECTRIC POWER
Presidential address before the annual general meeting of the VSE of 31 August 1979 in Zofingen, 3126
SWITZERLAND/RADIOACTIVE WASTE DISPOSAL
Atomic waste disposal - the Swiss way. Environmental and landscape protection are mandatory, 2145
SWITZERLAND/RADIOACTIVE WASTE MANAGEMENT
CEDRA Informe: National Cooperative Association for the Storage of Radioactive Wastes, 2116 (PNL-TR--384)
Summary of non-US national and international radioactive waste management programs 1980, 1758 (PNL--3333)
SWITZERLAND/RADIOACTIVE WASTE STORAGE
Safety above everything, 2166
SYDSVENSKA KRAFT AB REACTOR 1
See BARSEBAECK-1 REACTOR
SYNROC PROCESS
High-level waste program progress report, January 1, 1980-March 31, 1980, 916 (ORNL/TM--7371)
Nuclear waste immobilization. Progress report, 1007 (UCRL--15147)
Synthetic mineral nuclear waste ceramics, 1262
SYSTEMS ANALYSIS/COMPUTER CODES
Systems engineering programs for geologic nuclear waste disposal, 1983 (SAND--80-0440)

T

TANDEM ACCELERATORS
See VAN DE GRAAFF ACCELERATORS
TANKS/CHEMICAL REACTIONS
Structural evaluations of existing underground reinforced concrete tanks for radioactive waste storage, 1867 (RHO-SA--108)
TANKS/ELECTROCHEMICAL CORROSION
Possible microbial corrosion of decay tanks for liquid radioactive wastes in nuclear power plants, 1501 (INIS-mf--5101)
TANKS/EVALUATION
Inspection and evaluation of Nuclear Fuel Services high-level waste storage system. Program plan, 1856 (RHO-CD--882)
TANKS/INSPECTION
Inspection and evaluation of Nuclear Fuel Services high-level waste storage system. Program plan, 1856 (RHO-CD--882)
TANKS/LEVEL INDICATORS
Coaxial cavity for measuring level of liquid in a container (Patent), 2150
TANKS/MANUFACTURING
Manufacturing high-integrity stainless-steel waste storage tanks, 2339
TANKS/PERFORMANCE TESTING
Interim report on status of containment integrity studies for continued in-tank storage of Hanford high-level defense waste, 1854 (RHO-CD--773)
Waste tank core drilling demonstration results, 1858 (RHO-CD--980)
TANKS/SEISMIC EFFECTS
Structural evaluations of existing underground reinforced concrete tanks for radioactive waste storage, 1867 (RHO-SA--108)
TANKS/SPECIFICATIONS
Functional design criteria additional high-level waste storage facilities, 1398 (ARH-CD--362)
Functional design criteria additional high-level waste handling and storage facilities, 1399 (ARH-CD--549)
TANKS/STRESS ANALYSIS
Structural analysis and evaluation of a horizontal reservoir, 1184
TANKS/TEMPERATURE EFFECTS
Structural evaluations of existing underground reinforced concrete tanks for radioactive waste storage, 1867 (RHO-SA--108)
TANTALUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
TARAPUR-1 REACTOR/GAMMA FUEL SCANNING
Non-destructive gamma scanning measurement on discharged fuel bundles from Tarapur reactors, 2711
TARAPUR-1 REACTOR/MARINE DISPOSAL

Control of radioactive pollutants in liquid effluents from large nuclear power plants, 2713
TARAPUR-1 REACTOR/RADIOACTIVE WASTE DISPOSAL
Radwaste process system experience at Tarapur, 2714
TARAPUR-1 REACTOR/RADIOACTIVE WASTE PROCESSING
Management of radioactive waste from Tarapur Atomic Power Station, 2715
Radioactive waste treatment experiences at Tarapur, 2978
Radwaste process system experience at Tarapur, 2714
TARAPUR-2 REACTOR/GAMMA FUEL SCANNING
Non-destructive gamma scanning measurement on discharged fuel bundles from Tarapur reactors, 2711
TARAPUR-2 REACTOR/MARINE DISPOSAL
Control of radioactive pollutants in liquid effluents from large nuclear power plants, 2713
TARAPUR-2 REACTOR/RADIOACTIVE WASTE DISPOSAL
Radwaste process system experience at Tarapur, 2714
TARAPUR-2 REACTOR/RADIOACTIVE WASTE PROCESSING
Management of radioactive waste from Tarapur Atomic Power Station, 2715
Radioactive waste treatment experiences at Tarapur, 2978
Radwaste process system experience at Tarapur, 2714
TBP
(Tributyl phosphate.)
Incineration of contaminated organic solvents in a fluidized-bed calciner, 687 (CONF-801038--6)
TBP/ACTIVATION ANALYSIS
Trace elements retained in washed nuclear fuel reprocessing solvents, 43 (DP--1527)
TBP/CHEMICAL ANALYSIS
Trace elements retained in washed nuclear fuel reprocessing solvents, 43 (DP--1527)
TBP/DECOMPOSITION
Alkaline pyrohydrolysis of TBP with formation of calcium phosphate and butene, 1054
TBP/RECOVERY
Method of recovering and regenerating organic solvents used for the reprocessing of radioactive wastes (Patent), 1199
TEA
See BEVERAGES
TECHNETATES/SOLVENT EXTRACTION
Cyclohexanone solvent extraction of $^{99}TcO_4$ from alkaline nuclear waste solutions, 987 (RHO-SA--123)
TECHNETIUM/ADSORPTION
Batch Kd determinations with common minerals and representative groundwaters, 1776 (PNL-SA--7352(Vol.2))
Chromatographic K/sub d/ values of radionuclides and the effect of redox potentials on sorption of radionuclides by geologic media, 2459 (PNL-SA--7352(Vol.1))
Effects of hydrogen peroxide pretreatment of clay minerals on the adsorption of Sr-85 and Tc-95m under anoxic conditions, 2469 (PNL-SA--8571(Vol.2))
Kinetics and reversibility of radionuclide sorption reactions with rocks. Progress report for fiscal year 1978, 1774 (PNL-SA--7352(Vol.2))
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Monitoring and physical characterization of unsaturated zone transport. Laboratory analysis, 2457 (PNL--3304)
Nuclide transport by groundwater in Swedish bedrock, 2581
Parameters affecting radionuclide migration in geologic media, 1560 (LA-UR--79-2992)
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0988C)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, July 1-September 30, 1979, 1550 (LA--8152-PR)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, October 1-December 31, 1979, 2435 (LA--8309-PR)
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
Sorption behavior of ^{85}Sr, ^{137}Cs and /sup 95m/Tc under normal atmospheric and reduced oxygen levels, 2470 (PNL-SA--8571(Vol.2))
Sorption-desorption of long-lived radionuclide species on geologic media. Annual report, 2466 (PNL-SA--8571(Vol.2))
Statistical investigation of the mechanics controlling radionuclide sorption. Part II. Final technical report, 1777 (PNL-SA--7352(Vol.2))
Studies of radionuclide availability and migration at the Nevada Test Site relevant to radioactive waste disposal, 1769 (PNL-SA--7352(Vol.1))
Technetium: reduction and sorption in granitic bedrock, 2500
TECHNETIUM/ENVIRONMENTAL EXPOSURE PATHWAY
Geochemistry of radioactive waste disposal, 2135
TECHNETIUM/ENVIRONMENTAL TRANSPORT
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
TECHNETIUM/GEOCHEMISTRY
Geochemistry of radioactive waste disposal, 2135
TECHNETIUM/LEACHING
Leaching of actinides and technetium from simulated high-level waste glass, 513 (PNL--3152)
TECHNETIUM/RADIOACTIVE WASTE PROCESSING
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
Recovery of palladium and technetium values (Patent), 1123
TECHNETIUM/RADIONUCLIDE MIGRATION
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0988C)
TECHNETIUM/SOLVENT EXTRACTION
Method for recovering palladium and technetium values from nuclear fuel reprocessing waste solutions (Patent) 1112
Modern state of technology of extraction of transuranium and certain fission elements from high-activity raffinates, 795 (INIS-mf--5565)
Recovery of palladium and technetium values (Patent), 1123
Solvent extraction of technetium from nitric acid solutions with tributyl phosphate and tri-n-octylamine in tetrachloromethane, 792 (INIS-mf--5564)
TECHNETIUM/SORPTION
Assessment of potential radionuclide transport in site-specific geologic formations, 1962 (SAND--79-2468)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
TECHNETIUM/VOLATILITY
Volatilities of ruthenium, iodine, and technetium on calcining fission product nitrate wastes, 686 (CONF-801038--4)
TECHNETIUM 95/ADSORPTION
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
TECHNETIUM 99/ADSORPTION
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
Variables affecting sorption and transport of radionuclides in Hanford subsoils, 2274
TECHNETIUM 99/BIOLOGICAL EFFECTS
Technetium: a toxic waste product of the nuclear fuel cycle: effects on soybean growth and development, 2485
TECHNETIUM 99/DISTRIBUTION FUNCTIONS
Interaction of radionuclides with geomedia from the Nevada Test Site, 1913 (SAND--79-1019C)
TECHNETIUM 99/ENVIRONMENTAL TRANSPORT
Geologic migration potentials of technium-99 and neptunium-237, 3425
Preliminary study of the migration of technetium in soil under hydrous conditions, 3346 (UCRL--52832)
TECHNETIUM 99/ISOTOPE PRODUCTION
Method for the recovery of palladium and technetium, 1122
TECHNETIUM 99/PARTITION
Actinide partitioning-transmutation program final report. I. Overall assessment, 63 (ORNL--5566)
TECHNETIUM 99/RADIATION MONITORING
Terrestrial studies, 3317 (DP--1557)
TECHNETIUM 99/REMOVAL
Removal of radionuclides from Hanford defense waste solutions, 983 (RHO-SA--51)
Removal of radionuclides from the water-soluble fraction of Hanford Nuclear Defense Wastes, 988 (RHO-SA--145)
TECHNETIUM 99/SOLUBILITY
Geologic migration potentials of technium-99 and neptunium-237, 3425
TECHNETIUM 99/SOLVENT EXTRACTION
Cyclohexanone solvent extraction of $^{99}TcO_4$ from alkaline nuclear waste solutions, 987 (RHO-SA--123)
Extraction of technetium from fission product mixtures, 94
TECHNETIUM 99/TRANSMUTATION
Actinide partitioning-transmutation program final report. I. Overall assessment, 63 (ORNL--5566)
TECHNETIUM 99/VOLATILITY
Volatility of ruthenium-106, technetium-99, and iodine-129, and the evolution of nitrogen oxide compounds during the calcination of high-level, radioactive nitric acid waste, 903 (ORNL--5562)
TECTONICS/RISK ASSESSMENT
State-of-the-art for evaluating the potential impact of tectonism and volcanism on a radioactive waste repository, 3541 (UCRL--15269)
TEKTITES/STABILITY
Naturally occurring glasses: analogues for radioactive waste forms, 1729 (PNL--2776)
TELLURIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
TELLURIUM/RECOVERY
Radioactive liquid waste processing method (Patent), 1064
TELLURIUM 122/EVAPORATION
Some studies of nuclide losses. 2. Cold finger, 1289
TEMPERATURE GRADIENTS/MATHEMATICAL MODELS
Climax granite test results, 2024 (UCID--18502)
TEMPERATURE MEASUREMENT/ONE-DIMENSIONAL CALCULATIONS
Preliminary one-dimensional thermal analysis of waste emplacement in tuffs, 1923 (SAND--79-1265)
TENNESSEE/RADIOACTIVE WASTE MANAGEMENT

Office of Integrated Assessment and Policy Analysis, 3101 (ORNL--5595)
TENNESSEE VALLEY AUTHORITY/NUCLEAR POWER PLANTS
Facing the challenge of nuclear waste, 3136
TERBIUM/DISTRIBUTION FUNCTIONS
Distribution of Cs, Sr, Ce, Eu and Tb into Na- and H-type zeolites, 1291
TERBIUM/ION EXCHANGE
Distribution of Cs, Sr, Ce, Eu and Tb into Na- and H-type zeolites, 1291
TERRESTRIAL ECOSYSTEMS/BIOLOGICAL RADIATION EFFECTS
^{129}I distribution in vegetation on the Idaho National Engineering Laboratory Site, 3368 (IDO--12088)
TERRESTRIAL ECOSYSTEMS/CONTAMINATION
Analysis of the 1957-58 Soviet nuclear accident, 3233 (ORNL--5613)
TERRESTRIAL ECOSYSTEMS/NATURAL RADIOACTIVITY
Some aspects of the accumulation of natural radionuclides in aquatic products and vegetation around a uranium complex, 3322 (INIS-mf--5372)
TERRESTRIAL ECOSYSTEMS/RADIONUCLIDE MIGRATION
Analysis of the 1957-58 Soviet nuclear accident, 3233 (ORNL--5613)
Ecology studies at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3365 (IDO--12088)
Plutonium/americium inventory of a pond ecosystem near the Rocky Flats Facility, 3378 (RFP--3052)
Species composition and local movement of small mammals on the Radioactive Waste Management Complex, Idaho National Engineering Laboratory Site, 3366 (IDO--12088)
Statistical analysis of selected parameters for predicting food chain transport and internal dose of radionuclides. Final report, 3375 (NUREG/CR--1004)
TEST FACILITIES/DECOMMISSIONING
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
TEST FACILITIES/DECONTAMINATION
Decontamination and disposition of facilities program, 705 (DOE/SF/00701--T52)
TEST FACILITIES/DESIGN
Field test facility for monitoring water/radionuclide transport through partially saturated geologic media: design, construction, and preliminary description. Appendix I. Engineering drawings, 1754 (PNL--3226(App.1))
TEST REACTORS/DECOMMISSIONING
INEL waste cleanup, 671 (CONF-791234--7)
TEST REACTORS/DECONTAMINATION
INEL waste cleanup, 671 (CONF-791234--7)
TEST REACTORS/RADIATION MONITORING
Laboratory computer system for routine, plant, and environmental radiation-monitoring applications, 3014
TEST REACTORS/REACTOR ACCIDENTS
INEL waste cleanup, 671 (CONF-791234--7)
TEXAS/GEOLOGICAL SURVEYS
Precipitation and lake-level changes in the West and Midwest over the past 10,000 to 24,000 years. Final report, 2044 (UCRL--15173)
TEXAS/GEOLOGY
Locating field confirmation study areas for isolation of nuclear waste in the Texas Panhandle. Annual report, October 1, 1978-September 30, 1979, 1635 (ONWI--79/E511-00300-4)
TEXAS/GEOMORPHOLOGY
Assessment of effectiveness of geologic isolation systems. Geologic factors in the isolation of nuclear waste: evaluation of long-term geomorphic processes and catastrophic events, 1734 (PNL--2854)
TEXAS/HYDROLOGY
Hydrologic stability of salt domes, 2398
Locating field confirmation study areas for isolation of nuclear waste in the Texas Panhandle. Annual report, October 1, 1978-September 30, 1979. 1635 (ONWI--79/E511-00300-4)
TEXAS/RADIATION MONITORING
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)
TEXAS/SALT DEPOSITS
Potential of Gulf Coast salt domes for isolation of radioactive wastes, 2395
TEXAS/STRATIGRAPHY
Locating field confirmation study areas for isolation of nuclear waste in the Texas Panhandle. Annual report, October 1, 1978-September 30, 1979, 1635 (ONWI--79/E511-00300-4)
THALLIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
THERMAL POLLUTION
(Environmental temperature rise due to waste heat disposal)
THERMAL POLLUTION/PLUMES
Liquid waste disposal at the Idaho National Engineering Laboratory and resultant waste plumes in the Snake River Plain aquifer, 3436 (IDO--12088)
THERMAL PROPERTIES
See THERMODYNAMIC PROPERTIES
THERMAL STORAGE
See HEAT STORAGE
THERMODYNAMIC PROPERTIES/MATHEMATICAL MODELS
Proceedings of a workshop on thermomechanical modeling for a hardrock waste repository, 1658 (ONWI--98)
THERMOELASTICITY/MATHEMATICAL MODELS
Calculated thermally induced displacements and stresses for heater experiments at Stripa, Sweden. Linear thermoelastic models using constant material properties, 1562 (LBL--7061)
THERMONUCLEAR DEVICES/RADIOACTIVE WASTE DISPOSAL
Nuclear fusion. Another choice for solving the energy problem in the long run. An analysis of thermonuclear reactor concepts and a number of selected fusion experiments, 3583 (INIS-mf--5173)
THERMONUCLEAR FUELS/REVIEWS
Nuclear primary energy carriers. Pt. 2. Energy from nuclear fusion, 3582 (ASA-ZE--09/78)
THERMONUCLEAR POWER PLANTS/HEALTH HAZARDS
Environmental health studies, 2658 (ORNL--5308)
THERMONUCLEAR REACTIONS/RADIOACTIVE WASTE DISPOSAL
Nuclear fusion. Another choice for solving the energy problem in the long run. An analysis of thermonuclear reactor concepts and a number of selected fusion experiments, 3583 (INIS-mf--5173)
THERMONUCLEAR REACTIONS/REVIEWS
Nuclear primary energy carriers. Pt. 2. Energy from nuclear fusion, 3582 (ASA-ZE--09/78)
THERMONUCLEAR REACTOR WALLS/RADIOACTIVITY
Induced activities of fusion reactor structural materials, 3584 (JAERI-M--7582)
THERMONUCLEAR REACTORS
(For use in cases where certain aspects of either hypothetical or real thermonuclear reactors are discussed.)
See also LASER FUSION REACTORS
THERMONUCLEAR REACTOR WALLS
THERMONUCLEAR REACTORS/PARAMETRIC ANALYSIS
Hyper fuse: a novel inertial confinement system utilizing hypervelocity projectiles for fusion energy production and fission waste transmutation, 3587 (BNL--27118)
THERMONUCLEAR REACTORS/RADIOACTIVE WASTE DISPOSAL
Nuclear fusion. Another choice for solving the energy problem in the long run. An analysis of thermonuclear reactor concepts and a number of selected fusion experiments, 3583 (INIS-mf--5173)
Reduction in the toxicity of fission product wastes through transmutation with deuterium-tritium fusion neutrons, 3585
THERMONUCLEAR REACTORS/RADIOACTIVE WASTE PROCESSING
HYPERFUSE: a novel inertial confinement system utilizing hypervelocity projectiles for fusion energy production and fission waste transmutation, 2659 (BNL--27784)
HYPERFUSE: a hypervelocity inertial confinement system for fusion energy production and fission waste transmutation, 2660 (BNL--28067)
THERMONUCLEAR REACTORS/REVIEWS
Nuclear primary energy carriers. Pt. 2. Energy from nuclear fusion, 3582 (ASA-ZE--09/78)
THERMONUCLEAR WEAPONS
See NUCLEAR WEAPONS
THOREX PROCESS/RADIOACTIVE WASTE PROCESSING
Advanced waste forms research and development. Final report, October 1, 1978-September 30, 1979 (Supercalcine-ceramics: Soxhlet leachability), 691 (COO--2510-15)
THORIUM/ACTIVATION ANALYSIS
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
THORIUM/ADSORPTION
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions, 2413 (BM-RI--8396)
Absorption of radium and thorium from Wyoming and Utah uranium mill tailings solutions. Report of investigations, 920 (PB--80-122740)
Absorption of radium and thorium from New Mexico uranium mill tailing solutions, 620 (BM-RI--8463)
Nuclide transport by groundwater in Swedish bedrock, 2581
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
THORIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
THORIUM/ENVIRONMENTAL TRANSPORT
Microcrack technology. Progress report, 1 April 1979-29 February 1980, 1453 (DOE/ER/04972--2)
THORIUM/MATERIALS RECOVERY
Removal of hazardous radionuclides from uranium ore and/or mill tailings. Progress report, October 1, 1978-September 30, 1979, 913 (ORNL/TM--7065)
THORIUM/MINING
Fuel-cycle facilities: preliminary safety and environmental information document. Volume VII, 2839 (DOE/NE--0003/7)
THORIUM/X-RAY FLUORESCENCE ANALYSIS
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
THORIUM 230/ENVIRONMENTAL TRANSPORT
Migration behavior of the ^{238}U → ^{230}Th → ^{226}Ra → decay chain, 2593
THORIUM 230/RADIOECOLOGICAL CONCENTRATION

Radiological survey of the radioactive sands and residues at Lowman, Idaho, 3342 (ORNL--5465)
THORIUM 232/INVENTORIES
Graphical determination of the radionuclide inventory in the concentrate and tailings from processing facilities, 18 (ORNL/TM--6488)
THORIUM 232/RADIATION MONITORING
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
THORIUM 232/RADIOECOLOGICAL CONCENTRATION
Aerial radiological survey of US Department of Energy sites in Ames, Iowa. Date of survey: May 1977, 3318 (EGG--1183-1686)
Radiological survey of the radioactive sands and residues at Lowman, Idaho, 3342 (ORNL--5465)
THORIUM CYCLE/ENVIRONMENTAL IMPACTS
Environmental implications of thorium use in selected nuclear fuel cycles. Final, 2891 (EPA--520/6-78-009)
THORIUM CYCLE/POLLUTION CONTROL
Environmental control technology for mining, milling, and refining thorium, 2455 (PNL--3253)
THORIUM CYCLE/RADIOACTIVE WASTE MANAGEMENT
Environmental control technology for mining, milling, and refining thorium, 2455 (PNL--3253)
THORIUM ISOTOPES/ENVIRONMENTAL TRANSPORT
Chemical migration of radionuclides in soil, 3350
THORIUM ISOTOPES/LEACHING
Chemical migration of radionuclides in soil, 3350
THORIUM ISOTOPES/MIGRATION
Chemical migration of radionuclides in soil, 3350
THORIUM OXIDES/THOREX PROCESS
Extraction chromatographic removal of Np and Pu during the reprocessing of spent Th-U fuel, 1022
THREE MILE ISLAND-1 REACTOR/ACCIDENTS
Nuclear accident, 3063
THREE MILE ISLAND-2 REACTOR/ACCIDENTS
Assessment of noble gas releases from the Three Mile Island Unit 2 accident, 3278
Harrisburg fallout, 2496
THREE MILE ISLAND-2 REACTOR/DATA PROCESSING
Archiving the paper fallout from Three Mile Island, 2949 (UCID--18243)
THREE MILE ISLAND-2 REACTOR/DECONTAMINATION
Demonstration of alternative decontamination techniques at Three Mile Island, 3044 (PNL-SA--8143)
Flowsheet development studies for the decontamination of high-activity-level water at Three Mile Island Unit 2, 2718 (CONF-800802--13)
Involvement of the ORNL Chemical Technology Division in contaminated air and water handling at the Three Mile Island Nuclear Power Station, 3041 (ORNL/TM--7044)
Post-accident cleanup of radioactivity at the Three Mile Island Nuclear Power Station, 2723 (ORNL/TM--7081)
Recent chemical engineering requirements as the result of TMI on-site experience, 3031 (CONF-800802--10)
THREE MILE ISLAND-2 REACTOR/EMERGENCY PLANS
Accident at Three Mile Island. Comments by the Health and Safety Executive, 3069
Emergency actions concerned with effluent control at TMI, 3030 (CONF-800607--60)
THREE MILE ISLAND-2 REACTOR/ENVIRONMENTAL IMPACTS
Estimates of dose to the population within fifty miles due to noble gas releases from the Three Mile Island incident, 2919 (CONF-800403--13)
Preliminary comparisons between measurements and model calculations for the TMI venting of ^{85}Kr, 2950 (UCID--18783)
THREE MILE ISLAND-2 REACTOR/FISSION PRODUCT RELEASE
^{131}I studies at TMI Unit 2. Final report, 2924 (EPRI-NP--1389)
THREE MILE ISLAND-2 REACTOR/PERSONNEL
Recent chemical engineering requirements as the result of TMI on-site experience, 3031 (CONF-800802--10)
THREE MILE ISLAND-2 REACTOR/RADIATION ACCIDENTS
Utilization of the atmospheric release advisory capability (ARAC) services during and after the Three Mile Island accident, 3250 (UCRL--52959)
THREE MILE ISLAND-2 REACTOR/RADIATION MONITORING
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)
THREE MILE ISLAND-2 REACTOR/RADIATION PROTECTION
Reports of the Public Health and Safety Task Force on public health and safety summary; health physics and dosimetry; radiation health effects; behavioral effects; and public health and epidemiology, 3040 (NP--25109)
THREE MILE ISLAND-2 REACTOR/RADIOACTIVE EFFLUENTS
^{131}I studies at TMI Unit 2. Final report, 2924 (EPRI-NP--1389)
Accident at Three Mile Island. Comments by the Health and Safety Executive, 3069
Archiving the paper fallout from Three Mile Island, 2949 (UCID--18243)
Atmospheric Release Advisory Capability (ARAC) response to the Three Mile Island accident, 3051
Critique of source term and environmental measurement at Three Mile Island, 2918 (BNL--26970)
Emergency actions concerned with effluent control at TMI, 3030 (CONF-800607--60)
Estimates of dose to the population within fifty miles due to noble gas releases from the Three Mile Island incident, 2919 (CONF-800403--13)
Population dose and health impact of the accident at the Three Mile Island Nuclear Station. Final report, 28 March-7 April 1978, 3042 (PB--296197)
Preliminary comparisons between measurements and model calculations for the TMI venting of ^{85}Kr, 2950 (UCID--18783)
Reports of the Public Health and Safety Task Force on public health and safety summary; health physics and dosimetry; radiation health effects; behavioral effects; and public health and epidemiology, 3040 (NP--25109)
Summary and discussion of findings from: population dose and health impact of the accident at the Three Mile Island Nuclear Station (a preliminary assessment for the period March 28-April 7, 1979), 2967
Utilization of the atmospheric release advisory capability (ARAC) services during and after the Three Mile Island accident, 3250 (UCRL--52959)
THREE MILE ISLAND-2 REACTOR/RADIOACTIVE WASTE PROCESSING
Flowsheet development studies for the decontamination of high-activity-level water at Three Mile Island Unit 2, 2718 (CONF-800802--13)
Involvement of the ORNL Chemical Technology Division in contaminated air and water handling at the Three Mile Island Nuclear Power Station, 3041 (ORNL/TM--7044)
Plenary lecture - a special radioelement problem: ORNL assistance to Three Mile Island in handling contaminated air and water, 3025 (CONF-791049--26)
Post-accident cleanup of radioactivity at Three Mile Island, 3032 (DOE/TIC--11023)
Post-accident cleanup of radioactivity at the Three Mile Island Nuclear Power Station, 2723 (ORNL/TM--7081)
THREE MILE ISLAND-2 REACTOR/REACTOR ACCIDENTS
Accident at Three Mile Island. Comments by the Health and Safety Executive, 3069
Atmospheric Release Advisory capability (ARAC) response to the Three Mile Island accident, 3047 (UCRL--83489)
Atmospheric Release Advisory Capability (ARAC) response to the Three Mile Island accident, 3051
Critique of source term and environmental measurement at Three Mile Island, 2918 (BNL--26970)
Evaluation of the Three Mile Island accident in the context of WASH-1400, 3039 (LA-UR--79-2946)
Nuclear energy, 2965
Plenary lecture - a special radioelement problem: ORNL assistance to Three Mile Island in handling contaminated air and water, 3025 (CONF-791049--26)
Post-accident cleanup of radioactivity at Three Mile Island, 3032 (DOE/TIC--11023)
Radioactive plume from the Three Mile Island accident: xenon-133 in air at a distance of 375 kilometers, 2899
Report of the President's Commission on the accident at Three Mile Island, 3067
Reports of the Public Health and Safety Task Force on public health and safety summary; health physics and dosimetry; radiation health effects; behavioral effects; and public health and epidemiology, 3040 (NP--25109)
Scoping studies of the alternative options for defueling, packaging, shipping, and disposing of the TMI-2 spent fuel core, 3024 (AGNS--35900-1.5-79)
Summary and discussion of findings from: population dose and health impact of the accident at the Three Mile Island Nuclear Station (a preliminary assessment for the period March 28-April 7, 1979), 2967
TMI cleanup to cost more, last until 1985, 3048
Week they almost lost Pennsylvania, 3062
THREE MILE ISLAND-2 REACTOR/RISK ASSESSMENT
Evaluation of the Three Mile Island accident in the context of WASH-1400, 3039 (LA-UR--79-2946)
THREE MILE ISLAND-2 REACTOR/SPENT FUEL STORAGE
Scoping studies of the alternative options for defueling, packaging, shipping, and disposing of the TMI-2 spent fuel core, 3024 (AGNS--35900-1.5-79)
THTR-300 REACTOR/SPENT FUEL STORAGE
Device for the storage of irradiated or spent fuel elements from high temperature nuclear reactors (Patent), 2769
THYROID
Radiation hazard monitoring in ^{131}I therapy in and out clinic, 3694
THYROID/BIOLOGICAL RADIATION EFFECTS
^{129}I in thyroids of herbivores on the Idaho National Engineering Laboratory Site, 3369 (IDO--12088)
THYROID/RADIATION DOSES
Model for evaluation of thyroid dose from spent fuel on postulated loss of fuel pool cooling system, 2576
TIDAL POWER
Ocean energy: forms and prospects, 3105
TIN/ADSORPTION
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
TIN/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
TIN/ENVIRONMENTAL TRANSPORT
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
TIN OXIDES/CORROSION RESISTANCE

Interactions between candidate melter electrode materals and defense waste glass melts, 989 (RHO-SA--173)
TITANATES
Titanate waste forms for high level waste: an evaluation of materials and processes, 997 (SAND--80-1376C)
TITANATES/CHEMICAL RADIATION EFFECTS
Radiation stability of sodium titanate ion exchange materials, 996 (SAND--79-0199)
TITANIUM/CORROSION
Corrosion testing of unalloyed titanium in simulated disposal environments for reprocessed nuclear waste, 2015 (SKBF/KBS-TR--79-14)
TITANIUM/CORROSION RESISTANCE
Corrosion resistance of canisters for final disposal of spent nuclear fuel, 2262
TITANIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
TITANIUM/ION IMPLANTATION
Krypton entrapment in pulse biased sputter-deposited metals, 1762 (PNL-SA--6698)
TITANIUM BASE ALLOYS/CORROSION
Titanium alloy corrosion in nuclear waste environments (Ti-50A; TiCode 12; Ti-Pd), 1946 (SAND--79-2023C)
TITANIUM BASE ALLOYS/CORROSION RESISTANCE
Corrosion resistant metallic canisters: an important element of a multibarrier disposal program (TiCode-12 (Ti-0.8% Ni-0.3% Mo)), 1928 (SAND--79-1429C)
TITANIUM OXIDES/CRYSTAL STRUCTURE
Zirconolite - a fluorite-related superstructure, 2662
TOKYO-1 REACTOR
See FUKUSHIMA-1 REACTOR
TOKYO-2 REACTOR
See FUKUSHIMA-2 REACTOR
TOKYO-3 REACTOR
See FUKUSHIMA-3 REACTOR
TOXIC MATERIALS/REVIEWS
Toxic and hazardous waste disposal. Volume 1. Processes for stabilization/solidification, 1276
TOXIC MATERIALS/WASTE PROCESSING
Toxic and hazardous waste disposal. Volume 1. Processes for stabilization/solidification, 1276
TRACER TECHNIQUES/MANUALS
Laboratory training manual on the use of nuclear techniques in animal research, 3658
TRAINS
See also RAILROAD CARS
TRAINS/ACCIDENTS
Analysis of freight train accident statistics for 1972-1974, 244 (PNL-SA--6521)
TRANSCRIPTION/MOLECULAR BIOLOGY
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
TRANSFER (HEAT)
See HEAT TRANSFER
TRANSFER (MASS)
See MASS TRANSFER
TRANSMUTATION/FEASIBILITY STUDIES
Transmutation of radwaste using accelerators, 990 (RHO-SA--174)
TRANSMUTATION/INFORMATION SYSTEMS
Role of the National Nuclear Data Center in the field of nuclear waste transmutation, 623 (BNL-NCS--29103)
TRANSPLUTONIUM ELEMENTS
See also AMERICIUM
CALIFORNIUM
CURIUM
EINSTEINIUM
TRANSPLUTONIUM ELEMENTS/SOLVENT EXTRACTION
Separation of transplutonium and rare-earth elements by extraction with di-isodecyl phosphoric acid from DTPA solution, 1153
Solvent extraction of transplutonium elements from acid solutions by polydentate neutral organophosphorus compounds and from alkaline solutions by quaternary ammonium bases and by alkylpyrocatechols, 1049
TRANSPORT
(Limited to the movement of goods and persons.)
See also LAND TRANSPORT
MARITIME TRANSPORT
RAIL TRANSPORT
WASTE TRANSPORTATION
TRANSPORT/SYSTEMS ANALYSIS
Energy material transport, now through 2000, 3172 (PNL--3300(Pt.5))
TRANSPORTATION SYSTEMS/LEGAL ASPECTS
Selected legal and regulatory concerns affecting domestic energy transportation systems, 3171 (PNL--2989)
TRANSPORTATION SYSTEMS/NUCLEAR MATERIALS MANAGEMENT
Program strategy document for the nuclear materials Transportation Technology Center (FY 80), 264 (SAND--80-0784)
TRANSPORTATION SYSTEMS/REGULATIONS
Selected legal and regulatory concerns affecting domestic energy transportation systems, 3171 (PNL--2989)
TRANSPORTATION SYSTEMS/RISK ASSESSMENT
Risk assessment of energy material transportation systems, 2525 (DOE/EV--0046(Vol.2))
TRANSURANIUM COMPOUNDS
See also NEPTUNIUM COMPOUNDS
PLUTONIUM COMPOUNDS
TRANSURANIUM COMPOUNDS/CHEMICAL PROPERTIES
Long term chemical and physical integrity and stability of condensed phases of actinides, 2400
TRANSURANIUM COMPOUNDS/PHYSICAL PROPERTIES
Long term chemical and physical integrity and stability of condensed phases of actinides, 2400
TRANSURANIUM ELEMENTS
See also NEPTUNIUM
PLUTONIUM
TRANSPLUTONIUM ELEMENTS
TRANSURANIUM ELEMENTS/CHEMICAL ANALYSIS
Recent developments at Los Alamos for the measurement of alpha contaminated waste, 471 (LA-UR--80-1289)
TRANSURANIUM ELEMENTS/COMBUSTION
Defense transuranic waste at the Savannah River Plant, Aiken, South Carolina. Supplemental alternatives for long-term management, 423 (DOE/SR-WM--79-1(Suppl.))
TRANSURANIUM ELEMENTS/DECONTAMINATION
Defense transuranic waste at the Savannah River Plant, Aiken, South Carolina. Supplemental alternatives for long-term management, 423 (DOE/SR-WM--79-1(Suppl.))
TRANSURANIUM ELEMENTS/DEGASSING
Gas generation from transuranic waste degradation: data summary and interpretation, 530 (SAND--79-1245)
TRANSURANIUM ELEMENTS/ENVIRONMENTAL TRANSPORT
Measurement of penetration depths of plutonium and americium in sediment from the ocean floor, 1432 (CONF-791112--52)
Migration of transuranic nuclides in earthen burial trenches at the Savannah River Plant, 2310
TRANSURANIUM ELEMENTS/FLUIDIZED-BED COMBUSTION
Fluidized bed incineration process design for transuranic waste, 970 (RFP--2945)
TRANSURANIUM ELEMENTS/GAMMA SPECTROSCOPY
Activity levels of transuranic nuclides in low-level solid wastse from US power reactors. Final report, 446 (EPRI-NP--1494)
TRANSURANIUM ELEMENTS/INVENTORIES
Spent fuel and waste inventories and projections, 495 (ORO--778)
TRANSURANIUM ELEMENTS/LEACHING
Leach test methodology for the Waste/Rock Interactions Technology Program, 1757 (PNL--3326)
Leaching properties of solidified TRU waste forms (WBS element 0206), 1791 (PNL-SA--7992)
TRANSURANIUM ELEMENTS/MONITORING
Environmental transuranic and moisture assay by passive activation, 3352
TRANSURANIUM ELEMENTS/PACKAGING
Transuranic contaminated waste container characterization and data base. Revision I, 1008 (UCRL--15253)
TRANSURANIUM ELEMENTS/PELLETIZING
Pelletized waste form demonstration program, October 1979-March 1980, 894 (MLM--2717)
TRANSURANIUM ELEMENTS/RADIOACTIVE WASTE MANAGEMENT
Defense transuranic waste at the Savannah River Plant, Aiken, South Carolina. Supplemental alternatives for long-term management, 423 (DOE/SR-WM--79-1(Suppl.))
Transuranic contaminated waste functional definition and implementation, 2058 (UCRL--15229)
TRANSURANIUM ELEMENTS/RADIOACTIVE WASTE PROCESSING
Defense waste cyclone incinerator demonstration program: October 1979-March 1980, 393 (MLM--2716)
TRANSURANIUM ELEMENTS/RADIOACTIVE WASTE STORAGE
Studies of transuranic waste storage under conditions expected in the Waste Isolation Pilot Plant (WIPP). Progress report, October 1-December 31, 1979, 1553 (LA--8224-PR)
TRANSURANIUM ELEMENTS/RADIOMETRIC ANALYSIS
A 1-nCi/g sensitivity transuranic waste assay system using pulsed neutron interrogation, 472 (LA-UR--80-1794)
Application of linear accelerator technology to the detection of trace amounts of transuranics in waste barrels, 470 (LA-UR--80-1274)
Electronics system for transuranic waste assays using a photon interrogation technique, 751 (EGG-PHYS--5076)
TRANSURANIUM ELEMENTS/RADIONUCLIDE MIGRATION
Environmental transuranic and moisture assay by passive activation, 3352
TRANSURANIUM ELEMENTS/TRANSPORT
Transportation of postfission radioactive wastes from the commercial LWR fuel cycle, 180 (CONF-780506--(Vol. 2))
TRANSURANIUM ELEMENTS/VITRIFICATION
Utilization of borosilicate glass for transuranic waste immobilization, 657 (CONF-790420--)
Vitrification of transuranic and beta-gamma contaminated solid wastes, 720 (OP--1553)
TRAPS
See also COLD TRAPS
TRAPS/PERFORMANCE TESTING
Design and evaluation of custom ^{133}Xe trapping and holding system for animal research studies, 3637
TRAWSFYNYDD REACTOR/FUEL POOLS
Developments in the management of liquid and solid radioactive wastes from the irradiated fuel cooling pond at Trawsfynydd power station, 2969
TRAWSFYNYDD REACTOR/RADIOACTIVE WASTE DISPOSAL
Environmental monitoring programme to assess and control

the effects of liquid effluent discharges of low radioactivity to an inland lake, 3482
TRAWSFYNYDD REACTOR/RADIOACTIVE WASTE FACILITIES
Radiological aspects of the design of a facility to solidify radioactive sludge, 2771
TRAWSFYNYDD REACTOR/RADIOACTIVE WASTE PROCESSING
Developments in the management of liquid and solid radioactive wastes from the irradiated fuel cooling pond at Trawsfynydd power station, 2969
TREES
See also PINES
TREES/PLANT GROWTH
Influence of uranium mill tailings on tree growth at Elliot Lake, 2521
TREES/RADIONUCLIDE KINETICS
Environmental tritium in trees, 3354
TRIBUTYL PHOSPHATE
See TBP
TRIGA-3-SEOUL REACTOR/RADIOACTIVE EFFLUENTS
Measurement of airborne radon daughter concentrations in the atmosphere, 3011
TRITICUM
See WHEAT
TRITIUM/ADSORPTION
Fundamental study on decontamination of tritium from gaseous phases by copper oxide, 1095
Method for removing tritium (Patent), 1301
Monitoring and physical characterization of unsaturated zone transport. Laboratory analysis, 2457 (PNL--3304)
TRITIUM/DIFFUSION
Recharge and pollution of the English Chalk: some possible mechanisms, 3528
TRITIUM/DOSIMETRY
Technology assessments, 3232 (ORNL--5595)
TRITIUM/ENVIRONMENTAL EXPOSURE PATHWAY
Determination of safe radioactive releases to the atmosphere fron the nuclear power site, Duynefontein, 3360 (CONF-7604154--)
TRITIUM/ENVIRONMENTAL IMPACTS
Behaviour of tritium in the environment. Report on the international symposium held in San Francisco from 16 to 20 October 1978, 3383
Environmental aspects of tritium from CANDU station releases, 2779
TRITIUM/ENVIRONMENTAL TRANSPORT
Assessment of the radiological impact of tritium released to sea from the Windscale fuel element reprocessing plant, 3455
Impact on the environment of tritium releases from the Karlsruhe Nuclear Research Center, 3272
Migration of radionuclides following shallow land burial, 2523 (CONF-800304--11)
Monitoring for the dispersion of discharged tritium in sea-water around the Tokai-Mura fuel reprocessing plant, 2280
Physical migration of radionuclides in soil, 3349
Terrestrial studies, 3317 (DP--1557)
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1795 (PNL-SA--8571(Vol.1))
TRITIUM/HEALTH HAZARDS
Environmental health studies, 2658 (ORNL--5308)
TRITIUM/ISOTOPE SEPARATION
Extraction method of tritium (Patent), 1067
TRITIUM/ISOTOPIC EXCHANGE
Tritiated water treatment process, 3487
TRITIUM/LEACHING
Investigations of tritiated water fixation in silicagel, zeolites and different types of cement, 1526 (Juel--1581)
Leaching of tritium from a cement composite, 1524 (JAERI-M--7936)
Physical migration of radionuclides in soil, 3349
TRITIUM/LOSSES
Leaching behaviour of tritium from a hardened cement paste, 585
TRITIUM/MIGRATION
Physical migration of radionuclides in soil, 3349
TRITIUM/MONITORING
Environmental monitoring report for calendar year 1979, 3415 (FERMILAB--80/29)
The monitoring system of the Tritium Research Laboratory, Sandia Laboratories, Livermore, California, 3594 (CONF-780110--)
TRITIUM/OXIDATION
Removal of tritium and tritium-containing compounds from a gaseous stream (Patent), 2657
TRITIUM/PLUMES
Liquid waste disposal at the Idaho National Engineering Laboratory and resultant waste plumes in the Snake River Plain aquifer, 3436 (IDO--12088)
TRITIUM/RADIATION DOSES
Large-scale distribution of tritium in a commercial product, 3274
Production and emission of tritium from nuclear facilities, and the resulting problems (Federal Republic of Germany), 2281
TRITIUM/RADIATION HAZARDS
Fifteen years of experience in handling tritium problems in connection with low-energy particle accelerators, 3273
TRITIUM/RADIATION MONITORING
1978 environmental monitoring report, 3190 (BNL--51031)
A study of radioactive airborne effluents from particle accelerators. Technical report (final), 3236 (PB--80-101314)
Behaviour of tritium in the environment. Report on the international symposium held in San Francisco from 16 to 20 October 1978, 3383
Continuous tritium monitor for nuclear facility off-gas streams, 2418 (ENICO--1022)
Environmental aspects of tritium from CANDU station releases, 2779
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)
Method for measuring tritium activity from radioactive solution (Patent), 120
Monitoring of releases from an irradiated fuel reprocessing plant, 2995
Tritium and ^{14}C concentrations in air and waters near nuclear power plant, 3210 (INIS-mf--4637)
TRITIUM/RADIOACTIVE WASTE DISPOSAL
Gas generation by self-radiolysis of tritiated waste materials, 2111
Production and emission of tritium from nuclear facilities, and the resulting problems (Federal Republic of Germany), 2281
Trittium waste control: April-September 1979, 475 (MLM--2669)
TRITIUM/RADIOACTIVE WASTE MANAGEMENT
Assessment of waste management of volatile radionuclides, 496 (ORP/CSD--79-2)
Discharges of tritium to the environment from unrestricted use of consumer products containing this radionuclide, 3275
TRITIUM/RADIOACTIVE WASTE PROCESSING
Capture of ruthenium, iodine and triyium from discharge gases, produced during the process of dissolution at the device SU-2 of spent fuel elements from nuclear power plant with WWR reactors, 843 (INIS-mf--5574)
Evaluation of tritium recycle and buildup in a pressurized water reactor. Technical note, 2724 (PB--295036)
Fundamental study on decontamination of tritium from gaseous phases by copper oxide, 1095
Method of processing radioactive wastes (Patent), 1171
Performance and improvements of the tritium handling facility at the Los Alamos Scientific Laboratory, 881 (LA-UR--80-1265)
Polymer impregnated tritiated concrete. Final report, 884 (MLM--2644)
TRITIUM/RADIOACTIVITY TRANSPORT
Measurement of tritium and tritiated water vapour in nuclear power installations. I. Tritium formation and transport in nuclear power installations, 2751
TRITIUM/RADIOECOLOGICAL CONCENTRATION
Environmental aspects of tritium, 3255
TRITIUM/RADIONUCLIDE KINETICS
Environmental aspects of tritium, 2489
TRITIUM/RADIONUCLIDE MIGRATION
Tatum Dome Project, Lamar County, Mississippi, 3329 (NVO--225)
TRITIUM/RECOVERY
Method and equipment to extract and recover tritium from light and heavy water (FRG patent), 1063
Recovery of tritium from CANDU reactors, its storage and monitoring of its migration in the environment, 2917 (AECL--6544)
Tritium waste control, October 1979-March 1980, 476 (MLM--2714)
TRITIUM/SCINTILLATION COUNTING
Trace elements retained in washed nuclear fuel reprocessing solvents, 43 (DP--1527)
TRITIUM/SEPARATION PROCESSES
Process for separating fission gases from irradiated nuclear fuel (Patent), 112
Removal of tritiated species from gas streams comprised thereof (Patent), 1320
TRITIUM/STACK DISPOSAL
AVR's application for release of tritium and carbon-14 approved, 2958
Impact on the environment of tritium releases from the Karlsruhe Nuclear Research Center, 3272
TRITIUM/UPTAKE
Environmental tritium in trees, 3354
TRITIUM COMPOUNDS/BIOSYNTHESIS
Microbial production of tritiated and carbon-14 methane from radioactive wastes, 2306
TRITIUM COMPOUNDS/LIQUID SCINTILLATION DETECTORS
Atomic Energy of Canada Limited monitoring tritiated water in air and water effluents, 3595 (CONF-780110--)
TRITIUM COMPOUNDS/ON-LINE MEASUREMENT SYSTEMS
Atomic Energy of Canada Limited monitoring tritiated water in air and water effluents, 3595 (CONF-780110--)
TRITIUM COMPOUNDS/OXIDATION
Removal of tritium and tritium-containing compounds from a gaseous stream (Patent), 2657
TRITIUM OXIDES/ADSORPTION
Removal of tritium and tritium-containing compounds from a gaseous stream (Patent), 2657
TRITIUM RECOVERY
Combined Electrolysis Catalytic Exchange (CECE), 897 (MLM--2774)
TROJAN REACTOR/FUEL RACKS

Experience with local/state interventions for reracking Trojan spent-fuel pool, 2815
TROMBAY R-5 REACTOR/EXPERIMENTAL CHANNELS
R-5 Project - an example of experience feedback, 3015
TROMBAY R-5 REACTOR/SPENT FUEL CASKS
Estimation of photo and fission neutron source strengths in the fuel handling flask of the R-5 reactor containing an irradiated fuel rod, 3017
TRUCKS/DECONTAMINATION
Fleet servicing facilities for servicing, maintaining, and testing rail and truck radioactive waste transport systems: functional requirements, technical design concepts and options cost estimates and comparisons, 231 (ORNL/SUB--79/13866/1)
TRUCKS/INSPECTION
Fleet servicing facilities for servicing, maintaining, and testing rail and truck radioactive waste transport systems: functional requirements, technical design concepts and options cost estimates and comparisons, 231 (ORNL/SUB--79/13866/1)
TRUCKS/MAINTENANCE
Fleet servicing facilities for servicing, maintaining, and testing rail and truck radioactive waste transport systems: functional requirements, technical design concepts and options cost estimates and comparisons, 231 (ORNL/SUB--79/13866/1)
TSURUGA REACTOR/PRIMARY COOLANT CIRCUITS
Crud reduction study of primary coolant system at Tsuruga Nuclear Power Station, 2692
TSURUGA REACTOR/RADIOACTIVE WASTE FACILITIES
Radioactive waste treatment system for Tsuruga Nuclear Power Station, 1334
TSURUGA REACTOR/RADIOACTIVE WASTE PROCESSING
Treatment of nuclear drain wastes with an electro magnetic filter and ultrafiltration system, 2685
TSURUGA REACTOR/REACTOR LICENSING
Alteration of reactor installation (reactor facilities) in Tsuruga Nuclear Power Station of The Japan Atomic Power Company, 3084
TSURUGA REACTOR/REACTOR SAFETY
Alteration of reactor installation (reactor facilities) in Tsuruga Nuclear Power Station of The Japan Atomic Power Company, 3084
TUFF
Measurements of parameters essential to predicting nuclide migration, 2271
TUFF/CHEMICAL REACTIONS
Radioactive waste-form and rock interactions: a discussion, 2311
TUFF/EVALUATION
Evaluation of tuff as a medium for a nucolear waste repository: interim status report on the properties of tuff, 1998 (SAND--80-1464)
TUFF/EVAPORATION
Evaporative water loss from welded tuff, 1972 (SAND--80-0201)
TUFF/FLUID MECHANICS
In-situ tuff water migration/heater experiment: experimental plan, 1924 (SAND--79-1276)
TUFF/GEOLOGY
Report on geologic exploration activities, 1458 (DOE/RL/01830--14)
TUFF/HYDRAULICS
Determination of hydraulic conductivity in crushed Bandelier Tuff, 3325 (LA--8147-MS)
TUFF/LITHOLOGY
Preliminary report on the geology and geophysics of drill hole UE25a-1, Yucca Mountain, Nevada Test Site, 2089 (USGS-OFR--79-1244)
TUFF/MINERALOGY
Mineralogy and petrology of tuff units from a UE25a-1 drill site, Yucca Mountain, Nevada, 3548 (LA--8139-MS)
TUFF/PETROLOGY
Research and development related to Nevada nuclear waste storage investigations. Progress report, April 1-June 30, 1979, 1546 (LA--7974-PR)
TUFF/RADIOCHEMICAL ANALYSIS
Radiochemical analyses of samples from beneath a solid radioactive waste disposal pit at Los Alamos, New Mexico, 1558 (LA--8422-MS)
TUFF/RADIONUCLIDE MIGRATION
Determination of hydraulic conductivity in crushed Bandelier Tuff, 3325 (LA--8147-MS)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Quarterly technical progress report, April 1-June 30, 1980, 1559 (LA--8472-PR)
Preliminary rate expressions for analysis of radionuclide migration resulting from fluid flow through jointed media, 1909 (SAND--79-0989C)
Radiochemical analyses of samples from beneath a solid radioactive waste disposal pit at Los Alamos, New Mexico, 1558 (LA--8422-MS)
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
TUFF/ROCK MECHANICS
Technical approach to resolving issues on rock mechanics as applied to development of a nuclear waste repository in a crystalline rock formation, 1840 (RHO-BWI-SA--51)
TUFF/SORPTIVE PROPERTIES
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Quarterly technical progress report, April 1-June 30, 1980, 1559 (LA--8472-PR)
Microautoradiographic studies of the sorption of U and Am on natural rock samples, 2100
Nevada nuclear waste storage investigations. Quarterly report, October-December 1979, 1617 (NVO--196-14)
Parameters affecting radionuclide migration in geologic media, 1560 (LA-UR--79-2992)
Preliminary rate expressions for analysis of radionuclide migration resulting from fluid flow through jointed media, 1909 (SAND--79-0989C)
Research and development related to Nevada nuclear waste storage investigations. Progress report, April 1-June 30, 1979, 1546 (LA--7974-PR)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, July 1-September 30, 1979, 1550 (LA--8152-PR)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, October 1-December 31, 1979, 2435 (LA--8309-PR)
Sorption-desorption studies on tuff. II. Continuation of studies with samples from Jackass Flats, Nevada and initial studies with samples from Yucca Mountain, Nevada, 1549 (LA--8110-MS)
Studies of radionuclide availability and migration at the Nevada Test Site relevant to radioactive waste disposal, 1769 (PNL-SA--7352(Vol.1))
Transport properties of nuclear wastes in geologic media. Annual report, October 1, 1977-September 30, 1978, 1770 (PNL-SA--7352(Vol.1))
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))
TUFF/STRATIGRAPHY
Preliminary report on the geology and geophysics of drill hole UE25a-1, Yucca Mountain, Nevada Test Site, 2089 (USGS-OFR--79-1244)
TUFF/TEMPERATURE EFFECTS
In-situ tuff water migration/heater experiment: experimental plan, 1924 (SAND--79-1276)
Technical approach to resolving issues on rock mechanics as applied to development of a nuclear waste repository in a crystalline rock formation, 1840 (RHO-BWI-SA--51)
TUFF/THERMAL ANALYSIS
Preliminary one-dimensional thermal analysis of waste emplacement in tuffs, 1923 (SAND--79-1265)
Pretest thermal analysis of the Tuff Water Migration/In-Situ Heater Experiment, 1925 (SAND--79-1278)
TUFF/THERMAL CONDUCTIVITY
Thermal conductivity of silicic tuffs: predictive formalism and comparison with preliminary experimental results, 3570 (SAND--80-0769)
TUFF/THERMAL EXPANSION
Preliminary thermal expansion screening data for tuffs, 1888 (SAND--78-1147)
TUFF/THERMODYNAMIC PROPERTIES
In-situ tuff water migration/heater experiment: experimental plan, 1924 (SAND--79-1276)
TUNGSTEN/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
TUNNELS/CLOSURES
Basalt Waste Isolation Project borehole plugging studies: an overview, 1838 (RHO-BWI-SA--49)
Sealing a nuclear waste repository in Columbia River basalt: preliminary results, 1839 (RHO-BWI-SA--50)
TUNNELS/DAMAGE

Studies of the subsurface effects of earthquakes, 3546 (OP-MS--80-16)
TURKEY POINT-3 REACTOR/IRRADIATION CAPSULES
Data package for the Turkey Point material interaction test capsules, 2848 (HEDL-TC--1283)
Data package for the Turkey Point material interaction test capsules, 1485 (HEDL-TC--1283(Rev.1))

UKAEA/RADIOACTIVE WASTE DISPOSAL
Radioactive waste disposal by UKAEA establishments during 1978 and associated environmental monitoring results, 1390 (AERE-R--9445)
UKRAINIAN SSR/GEOLOGY
Geological conditions of the use of the saliferon strata of the Ukrainian SSR for waste disposal, 2330
ULTRAFILTRATION/RESEARCH PROGRAMS
Development of ultrafiltration and adsorbents: October 1979-March 1980, 896 (MLM--2735)
UNDERGROUND DISPOSAL
Corrosion testing of unalloyed titanium in simulated disposal environments for reprocessed nuclear waste, 2015 (SKBF/KBS-TR--79-14)
UNDERGROUND DISPOSAL/COMPARATIVE EVALUATIONS
Comparison of alternatives for low-level radioactive waste disposal, 1719 (PB--296947)
Geologic disposal of nuclear wastes: salt's lead is challenged, 2215
UNDERGROUND DISPOSAL/DECOMMISSIONING
Generic environmental impact statement, 2811 (NUREG/CP--0008)
Low level waste burial ground, 1601 (NUREG/CP--0008)
Residual radioactivity, 2810 (NUREG/CP--0008)
State workshops for review of the Nuclear Regulatory Commission's decommissioning policy, 2806 (NUREG/CP--0008)
Suggested policy and rule changes, 2807 (NUREG/CP--0008)
UNDERGROUND DISPOSAL/ENVIRONMENTAL EFFECTS
Radiation doses to small mammals at the Idaho National Engineering Laboratory Radioactive Waste Management Complex, 3364 (IDO--12088)
Species composition and local movement of small mammals on the Radioactive Waste Management Complex, Idaho National Engineering Laboratory Site, 3366 (IDO--12088)
Theoretical problems in defining dispersal in small mammals occupying the Subsurface Disposal Area, Idaho National Engineering Laboratory Site, 3367 (IDO--12088)
UNDERGROUND DISPOSAL/FEASIBILITY STUDIES
Burying Britain's radioactive waste. The geological areas under investigation, 2151
Very deep hole concept: evaluation of an alternative for nuclear waste disposal, 1570 (LBL--8648)
UNDERGROUND DISPOSAL/LEGAL ASPECTS
Legal problems in the utilization of salt domes, 2394
UNDERGROUND DISPOSAL/RADIOACTIVE WASTE DISPOSAL
Determination of plutonium in man, 3324 (LA--8023-PR)
UNDERGROUND DISPOSAL/RADIONUCLIDE MIGRATION
Subsurface migration of radionuclides at the Radioactive Waste Management Complex: 1978, 3320 (EGG--2026)
UNDERGROUND DISPOSAL/REVIEWS
National and international activities in the field of underground disposal of radioactive wastes, 2991
UNDERGROUND DISPOSAL/SALT DEPOSITS
Identifying suitable piercement salt domes for nuclear waste storage sites, 3558 (PNL--2864)
UNDERGROUND DISPOSAL/SHAFT EXCAVATIONS
Very deep hole concept: evaluation of an alternative for nuclear waste disposal, 1570 (LBL--8648)
UNDERGROUND DISPOSAL/SPECIFICATIONS
Preliminary criteria for shallow-land storage/disposal of low-level radioactive solid waste in an arid environment, 1855 (RHO-CD--810)
UNDERGROUND EXPLOSIONS
See also NUCLEAR EXPLOSIONS
UNDERGROUND EXPLOSIONS/BIBLIOGRAPHIES
Bibliography of reports by US Geological Survey personnel pertaining to underground nuclear testing and radioactive waste disposal at the Nevada Test Site, and radioactive waste disposal at the WIPP Site, New Mexico, January 1, 1979-December 31, 1979, 539 (USGS-OFR--80-817)
UNDERGROUND NUCLEAR STATIONS/REACTOR ACCIDENTS
New test set up for the in situ determination of percolation parameters in rock, 2915
UNDERGROUND NUCLEAR STATIONS/REACTOR SITES
New test set up for the in situ determination of percolation parameters in rock, 2915
UNDERGROUND STORAGE/LEGAL ASPECTS

URANIUM/ACTIVATION ANALYSIS
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
Annual rate of release of radon to the atmosphere as a result of coal combustion in the United Kingdom, 3270
URANIUM/ADSORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progess

report, April 1-June 30, 1979, 2434 (L--7893-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, October 1-December 31, 1979, 1552 (LA--8210-PR)
Nuclide transport by groundwater in Swedish bedrock, 2581
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0988C)
Research and development related to the Nevada nuclear waste storage investigations. Progress report, July 1-September 30, 1979, 1550 (LA--8152-PR)
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
Sorption-desorption of long-lived radionuclide species on geologic media. Annual report, 2466 (PNL-SA--8571(Vol.2))
Theoretical and experimental evaluation of waste transport in selected rocks, 1768 (PNL-SA--7352(Vol.1))
Uranium sorption from aqueous solutions by biological absorbent, 788 (INIS-mf--5320)

URANIUM/AUTORADIOGRAPHY
Autoradiographic studies of actinide sorption in groundwater systems, 3432 (CONF-800433--4)
Autoradiographic study of actinide sorption on climax stock granite, 1662 (ORNL--5617)

URANIUM/CHEMICAL REACTIONS
Status report on the importance of natural organic compounds in groundwater as radionuclide-mobilizing agents, 1636 (ONWI--84)

URANIUM/DESORPTION
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media, 1561 (LA-UR--80-437)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Annual report, October 1, 1978-September 30, 1979, 1548 (LA--8088-PR)

URANIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)

URANIUM/ENVIRONMENTAL TRANSPORT
Microcrack technology. Progress report, 1 April 1979-29 February 1980, 1453 (DOE/ER/04972--2)
Status report on the importance of natural organic compounds in groundwater as radionuclide-mobilizing agents, 1636 (ONWI--84)

URANIUM/FISSION PRODUCTS
Development of ultrafiltration and adsorbents: April-September 1979, 889 (MLM--2684)

URANIUM/LEACHING
Leaching of actinides and technetium from simulated high-level waste glass, 513 (PNL--3152)

URANIUM/MATERIALS RECOVERY
Removal of hazardous radionuclides from uranium ore and/or mill tailings. Progress report, October 1, 1978-September 30, 1979, 913 (ORNL/TM--7065)

URANIUM/METABOLISM
Biological removal of metal ions from aqueous process streams, 1341

URANIUM/MINING
Fuel-cycle facilities: preliminary safety and environmental information document. Volume VII, 2839 (DOE/NE--0003/7)

URANIUM/NONDESTRUCTIVE ANALYSIS
Measurement of uranium and plutonium in solid waste by passive photon or neutron counting and isotopic neutron source interrogation, 469 (LA--8294-MS)
Uranium and plutonium assay of crated waste by gamma-ray, singles-neutron, and slow-neutron coincidence counting, 2635

URANIUM/NUCLEAR REACTION ANALYSIS
Measurement of uranium and plutonium in solid waste by passive photon or neutron counting and isotopic neutron source interrogation, 469 (LA--8294-MS)

URANIUM/PACKAGING
Oak Ridge National Laboratory shipping containers for radioactive materials, 234 (ORNL/TM--7179)

URANIUM/PRECIPITATION
Precipitation of uranium from low-level liquid wastes, 1092

URANIUM/RADIOACTIVE WASTE PROCESSING
Recovery of actinide values (Patent), 1124

URANIUM/RADIOCHEMICAL ANALYSIS
Radiochemical analyses of samples from beneath a solid radioactive waste disposal pit at Los Alamos, New Mexico, 1558 (LA--8422-MS)

URANIUM/RADIONUCLIDE MIGRATION
Radionuclide sorption studies on abyssal red clays, 1908 (SAND--79-0988C)

URANIUM/RECOVERY
Method to recover nuclear fuel from waste material and device to carry out the method (Patent), 1187
Plutonium recovery goas on-steam, 86

URANIUM/REMOVAL
Melting metal waste for volume reduction and decontamination, 680 (CONF-800802--11)
Separation of uranium from process wastewaters using microbial cells as sorbents (Mixed culture of denitrifying bacteria), 35 (CONF-791184--1)

URANIUM/ROOT ABSORPTION
Uptake of trace elements and radionuclides from uranium mill tailings by four-wing saltbush (Atriplex canescens) and alkali sacaton (Sporobolus airoides), 3374 (LA-UR--79-3045)

URANIUM/SEPARATION PROCESSES
Chemistry research and development progress report, May-October, 1978, 968 (RFP--2870)
Technical quarterly progress report, July 1-September 30, 1979, 445 (ENICO--1033)

URANIUM/SOLUBILITY
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, October 1-December 31, 1979, 1552 (LA--8210-PR)

URANIUM/SOLVENT EXTRACTION
Application of extraction chromatography to the recovery of neptunium, plutonium and americium from an industrial waste, 1023
Bidentate organophosphorus solvent extraction process for actinide recovery and partition, 1085
Exxon nuclear fuel recovery and recycling center: process description, 95
Recovery of actinide values (Patent), 1124
Reducing the long-term hazard of reactor waste through actinide removal and destruction in nuclear reactors, 1024
Separation of uranium and plutonium from an aqueous solution containing phosphoric, sulfuric, and nitric acids by solvent extraction, 1240

URANIUM/SORPTION
Autoradiographic studies of actinide sorption in groundwater systems, 3432 (CONF-800433--4)
Autoradiographic study of actinide sorption on climax stock granite, 1662 (ORNL--5617)
Laboratory studies of radionuclide distributions between selected groundwaters and geologic media. Progress report, January 1-March 31, 1980, 1556 (LA--8339-PR)
Microautoradiographic studies of the sorption of U and Am on natural rock samples, 2100
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
Waste isolation safety assessment program. Task 4. Third contractor information meeting, 1799 (PNL-SA--8571(Vol.1))

URANIUM/UPTAKE
Advanced biological treatment of aqueous effluent from the nuclear fuel cycle, 1435 (CONF-800334--3)
Microbial uptake of uranium, cesium, and radium, 681 (CONF-800814--12)

URANIUM/WASTE TRANSPORTATION
Interim report on concreted uranium fines and chips billet curing tests: a basis for resuming shipment of concreted uranium scrap billets, 2085 (UNI--1454)

URANIUM/X-RAY FLUORESCENCE ANALYSIS
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)

URANIUM 233/DIFFUSION
Actinide diffusion in waste glasses, 853 (INKA-Conf--79-003-004)

URANIUM 233/RADIOASSAY
Determination of ^{233}U content in sealed containers and waste packages by gamma counting, 454 (INIS-mf--5372)

URANIUM 234/ENVIRONMENTAL TRANSPORT
Migration behavior of the $^{234}U \rightarrow {}^{230}Th \rightarrow {}^{226}Ra \rightarrow$ decay chain, 2593

URANIUM 235/ACTIVATION ANALYSIS
Savannah River Plant californium-252 Shuffler electronics manual, 2623 (LA--8103-M)

URANIUM 235/INVENTORIES
Graphical determination of the radionuclide inventory in the concentrate and tailings from processing facilities, 18 (ORNL/TM--6488)

URANIUM 235/RADIATION MONITORING
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)

URANIUM 235/RADIOMETRIC ANALYSIS
Control and accountability of special nuclear material waste and scrap by gamma-scan assay, 2637

URANIUM 238/INVENTORIES
Graphical determination of the radionuclide inventory in the concentrate and tailings from processing facilities, 18 (ORNL/TM--6488)

URANIUM 238/RADIATION MONITORING
Environmental monitoring at the Lawrence Livermore Laboratory. 1979 Annual report, 3249 (UCRL--50027-79)

URANIUM 238/RADIOECOLOGICAL CONCENTRATION
Aerial radiological survey of US Department of Energy sites in Ames, Iowa. Date of survey: May 1977, 3318 (EGG--1183-1686)

URANIUM CONCENTRATES/INVENTORIES
Graphical determination of the radionuclide inventory in the concentrate and tailings from processing facilities (^{232}Th, ^{230}U, and ^{235}U decay series members) 18 (ORNL/TM--6488)

URANIUM DIOXIDE/CHEMICAL BONDS
Bonding of metal oxides in sodium silicate glass, 1241

URANIUM DIOXIDE/DISSOLUTION
Fission product release. Progress report, April 1-June

30, 1979, 222 (LA--7969-PR)
Fission product release. Progress report, October 1-December 31, 1979, 62 (LA--8272-PR)
URANIUM DIOXIDE/FISSION PRODUCT RELEASE
Fission product release. Progress report, April 1-June 30, 1979, 222 (LA--7969-PR)
Microstructure-dependent model for fission product gas release and swelling in UO_2 fuel, 2868
URANIUM DIOXIDE/RECOVERY
Dry recovery of ceramic uranium dioxide waste material, 1145
URANIUM DIOXIDE/SWELLING
Microstructure-dependent model for fission product gas release and swelling in UO_2 fuel, 2868
URANIUM DIOXIDE/WASTE PROCESSING
Method and equipment for the dry processing of uranium dioxide nuclear fuel wastes (Patent), 1354
URANIUM HEXAFLUORIDE/RADIATION ACCIDENTS
UF_6 release experience and prevention in United States gaseous diffusion plants, 2433 (KY--690)
URANIUM HEXAFLUORIDE/TRANSPORTATION SYSTEMS
Risk assessment of energy material transportation systems, 2525 (DOE/EV--0046(Vol.2))
URANIUM ISOTOPES/ENVIRONMENTAL TRANSPORT
Chemical migration of radionuclides in soil, 3350
Radioactive waste/soil interactions-migration potential of radionuclides through four soils, 2309
URANIUM ISOTOPES/ISOTOPE DILUTION
Technical quarterly progress report, April 1-June 30, 1979, 444 (ENICO--1013)
URANIUM ISOTOPES/ISOTOPE SEPARATION
Development of enrichment and reprocessing technologies in Japan, 116
Research Establishment progress report 1978 - uranium fuel cycle, 14 (AAEC/PR--45U)
URANIUM ISOTOPES/LEACHING
Chemical migration of radionuclides in soil, 3350
URANIUM ISOTOPES/MIGRATION
Chemical migration of radionuclides in soil, 3350

Pacific Northwest Laboratory (PNL) spent fuel transportation and handling facility models, 238 (PNL--3105)
Packaging of LWR spent fuel for geologic repositories, 214 (INFCE/DEP/WG--7/5)
Power-reactor low-level radioactive waste generation and waste management practices evaluation. Report E. Policy recommendations, conclusions, and summary, 483 (NUS--3383)
Processing of spent nuclear fuel from light water reactors, 77 (UJV--4620-D,CH,E)
Spent fuel disassembly and canning programs at the Barnwell Nuclear Fuel Plant (BNFP) (For more efficient storage), 132 (AGNS--35900-CONF-41)
Spent fuel handling and storage facility for an LWR fuel reprocessing plant, 44 (DPSTD-AFCT--77-7)
Spent fuel and fuel pool component integrity. Annual report, FY 1979, 239 (PNL--3171)
Spent fuel data for waste storage programs, 213 (HEDL-TME--79-20)

WATER COOLED REACTORS/LOWLEVEL RADIOACTIVE WASTES
An analysis of low-level solid radioactive waste from lwrs through 1975, 500 (PB--295408)

WATER COOLED REACTORS/RADIOACTIVE WASTE PROCESSING
Safety aspects of light water reactor radwaste solidification processes, 1061
Unit operations used to treat process and/or waste streams at nuclear power plants, 2921 (CONF-800802--14)
Volume reduction and solidification of liquid and solid low-level radioactive waste, 1273

WATER COOLED REACTORS/REACTOR SAFETY
Nuclear reactor safety, 3060

WATER MODERATED REACTORS
See also BR-2 REACTOR
BWR TYPE REACTORS
KOEBERG-1 REACTOR
MTR REACTOR
MURR REACTOR
PWR TYPE REACTORS
WWR TYPE REACTORS

WATER MODERATED REACTORS/RESEARCH PROGRAMS
Annual scientific report 1977, 2672 (BLG--524)

WATER POLLUTION/ENVIRONMENTAL IMPACTS
Marine pollution - Facts and fiction, the situation in Britain, 3412

WATER POLLUTION/ENVIRONMENTAL TRANSPORT
Transport and transfer rates in the waters of the continental shelf (Atlantic Ocean), 3408 (COO--2185-12)

WATER POLLUTION/HEALTH HAZARDS
Relative potential hazards of radioactive waste in various water systems, 2184

WATER POLLUTION/MONITORING
Industrial safety and applied health physics. Annual report, 1979, 3234 (ORNL--5663)

WATER REMOVAL/EQUIPMENT
Sludge dewatering by belt press, 15

WATER RESOURCES/RADIOACTIVITY
Environmental surveillance at Los Alamos during 1979, 3220 (LA--8200-ENV)

WATER SOLUTIONS
See AQUEOUS SOLUTIONS

WATER TREATMENT/DECONTAMINATION
Method of processing laundry drain (Patent), 1083

WATERSHEDS
See also COLUMBIA RIVER BASIN

WATERSHEDS/RADIONUCLIDE MIGRATION
WATER - a mathematical model for computing population doses in a watershed due to continuous radioactive effluents into water flows, 3479 (UJV--4508-D,CH,A,E)

WAVE POWER
Ocean energy: forms and prospects, 3105

WAZ 16
See NICKEL BASE ALLOYS

WELL CASINGS/CORROSION RESISTANCE
Experiments on the corrosion of materials for borehole casings and for waste packaging canister in salt, 1656 (CONWI--88)

WELL PRESSURE/PRESSURE GAGES
Pressure measurements in low permeability formations, 1990 (SAND--80-0705C)

WEST GERMANY
See FEDERAL REPUBLIC OF GERMANY

WEST VALLEY PROCESSING PLANT/ENVIRONMENTAL EFFECTS
General investigation of radionuclide retention in migration pathways at the West Valley, New York low-level burial site. Annual report, September 1, 1977-September 30, 1978, 1604 (NUREG/CR--0794)

WEST VALLEY PROCESSING PLANT/RADIOACTIVE WASTE DISPOSAL
Evaluation of isotope migration, land burial. Water chemistry at commercially operated low-level radioactive waste disposal sites. Progress report No. 10, July-September 1978, 1612 (NUREG/CR--1037)
Summary report on the low-level radioactive waste burial site, West Valley, New York (1963-1975), 1693 (PB--80-138993)

WEST VALLEY PROCESSING PLANT/RADIOACTIVE WASTE MANAGEMENT
Nuclear fuel services waste characterization and waste removal system, 524 (RHO-CD--883)

WEST VALLEY PROCESSING PLANT/RADIOACTIVE WASTE STORAGE
Project plan for inspection and evaluation of Nuclear Fuel Services high-level waste storage system, 1863 (RHO-LD--97)
Transport through a trench cover of gaseous tritiated compounds from buried radioactive wastes, 2285

WEST VALLEY PROCESSING PLANT/REVIEWS
Situation at West Valley, 2157

WEST VIRGINIA/ECOLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)

WEST VIRGINIA/GEOLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)

WEST VIRGINIA/HYDROLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)

WEST VIRGINIA/METEOROLOGY
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)

WEST VIRGINIA/SOCIO-ECONOMIC FACTORS
Environmental characterization of bedded salt formations and overlying areas of the Salina Basin, 3393 (ONWI--16)

WHEAT/PLANT GROWTH
Emergence and growth of plant species in coal mine soil, 3301

WILD ANIMALS/RADIATION MONITORING
Master schedule for CY-1980 Hanford Environmental Surveillance Routine Program, 3240 (PNL--3222)

WINE
See BEVERAGES

WORKERS
See PERSONNEL

WORKING CONDITIONS/CONTAMINATION
Radiological surveillance of airborne contaminants in the working environment, 3672

WORKING CONDITIONS/RADIATION MONITORING
Radiological surveillance of airborne contaminants in the working environment, 3672

WORKING (MATERIALS)
See MATERIALS WORKING

WUERGASSEN REACTOR/REACTOR OPERATION
Results of German nuclear power plant operation in 1978. Pt. 1. Industrial nuclear power stations. Data from the annual report by the ABE committee, 2833

WWER TYPE REACTORS
See also LOVIISA-1 REACTOR
PAKS-1 REACTOR
PAKS-2 REACTOR

WWER TYPE REACTORS/COOLANT CLEANUP SYSTEMS
Technological system for reception and storage of liquid radioactive concentrated wastes and spent sorbents for the Finish nuclear power plant Loviisa and serial nuclear power plant blocks with WWR-440 type reactors (system TW), 2931 (INIS-mf--5570)

WWER TYPE REACTORS/LIQUID WASTES
Radionuclides from nuclear power facilities operation in hydrosphere, 2719 (CS-INIS--258)

WWER TYPE REACTORS/OFFGAS SYSTEMS
Radiochromatographic system for off-gas decontamination at the WWER nuclear power plants, 2753

WWER TYPE REACTORS/PRIMARY COOLANT CIRCUITS
Measurement of tritium and tritiated water vapour in nuclear power installations. I. Tritium formation and transport in nuclear power installations, 2751

WWER TYPE REACTORS/RADIATION HAZARDS
Assessment of the Kosice nuclear power plant project with regard to radiation burden of the population in the served Kosice industrial and dwelling area, 3072

WWER TYPE REACTORS/RADIOACTIVE WASTE PROCESSING
Technological system for reception and storage of liquid radioactive concentrated wastes and spent sorbents for the Finish nuclear power plant Loviisa and serial nuclear power plant blocks with WWR-440 type reactors (system TW), 2931 (INIS-mf--5570)

WWR TYPE REACTORS/RADIOACTIVE WASTE PROCESSING
Automatic installations with evaporators and ion exchange filters for processing trapped waters and boron containing solutions with regeneration of boric acid from them conformably to the nuclear power plant with WWR-1000 reactor project, 2930 (INIS-mf--5570)

WYLFA NUCLEAR POWER STATION
See WYLFA REACTOR

WYLFA REACTOR/SPENT FUEL STORAGE
Wylfa dry store, 2765

WYOMING/ENERGY CONSUMPTION
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)

WYOMING/ENERGY SOURCE DEVELOPMENT
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)

WYOMING/FEED MATERIALS PLANTS
Radiological survey of the inactive uranium-mill tailings at Riverton, Wyoming, 3339 (ORNL--5461)
Radiological survey of the inactive uranium-mill tailings at the Spook site, Converse County, Wyoming, 3338 (ORNL--5460)
WYOMING/POLLUTION REGULATIONS
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)
WYOMING/POPULATION DYNAMICS
Regional environment-energy data book: Rocky Mountain region, 3099 (DOE/TIC--10114/1)
WYOMING/RADIATION MONITORING
Annual status report on the inactive uranium mill tailings sites remedial action program, 2417 (DOE/EV--0060)

X

XENON/ADSORPTION
Investigation of krypton and xenon capture from discharge gases, produced during the process of dissolution at the device SU-2 spent fuel elements from the nuclear power plant with WWR reactors, 844 (INIS-mf--5574)
Mobile processing unit for krypton-xenon absorption, 866 (K-L--2397)
Removal of noble gases by selective absorption (On fluorocarbon), 2844 (K/ET--5007)
XENON/RADIOACTIVE WASTE PROCESSING
Development of enrichment and reprocessing technologies in Japan, 116
Mobile processing unit for krypton-xenon absorption, 866 (K-L--2397)
Separation of krypton and xenon from the offgas of nuclear facilities, 870 (KFK--2600)
XENON 133/RADIATION MONITORING
Radioactive plume from the Three Mile Island accident: xenon-133 in air at a distance of 375 kilometers, 2899
Utilization of the atmospheric release advisory capability (ARAC) services during and after the Three Mile Island accident, 3250 (UCRL--52959)
XENON 133/REMOVAL
Radioactive krypton and xenon in nuclear power plant fuel cycle, 1206
XENON 133/SEPARATION PROCESSES
Process for separating fission gases from irradiated nuclear fuel (Patent), 112
XENON 133/TRAPS
Design and evaluation of custom ^{133}Xe trapping and holding system for animal research studies, 3637
XENOTIME/RADIOACTIVE WASTE DISPOSAL
EPR investigations of Gd^{3+} in single crystals and powders of the zircon--structure orthophosphates YPO_4, $ScPO_4$, and $LuPO_4$, 1014
X-RAY DIFFRACTION/RESEARCH PROGRAMS
Molecular and Cellular Sciences Section, 3612 (ORNL--5685)
X-RAY RADIOGRAPHY (BIOMEDICAL)
See BIOMEDICAL RADIOGRAPHY

Y

YTTERBIUM/ADSORPTION
Systematic study of metal ion sorption on selected geologic media. Sesquiannual report, April 1977-September 1978, 1766 (PNL-SA--7352(Vol.1))
YTTRIUM/ACTIVATION ANALYSIS
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
YTTRIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
YTTRIUM/X-RAY FLUORESCENCE ANALYSIS
[Relative mobilities and transport mechanisms of trace elements during contact metamorphism of carbonate rocks]. Progress report, 1454 (DOE/ER/10412--2)
YTTRIUM 90/ENVIRONMENTAL TRANSPORT
Radiological safety studies on the ground disposal of radioactive wastes. Distribution and migration of radionuclides in an aerated zone, 1525 (JAERI-M--8044)
YUGOSLAVIA R-A REACTOR VINCA
See R-A REACTOR

Z

ZEOLITES
See also CLINOPTILOLITE
MORDENITE
Distribution of Co, Cr and Fe into Na- and H-type zeolites, 3687
Dynamic properties of ion exchange of cesium into zeolites, 2214
Natural zeolites: occurrence, properties, and use (Book) 3578
ZEOLITES/ION EXCHANGE
Tabulation and evaluation of ion exchange data on smectites, certain zeolites and basalt, 1590 (LBL--10541)
ZEOLITES/SORPTIVE PROPERTIES
Ion-exchange properties of cesium and strontium into zeolites from sodium salt solutions, 3686
ZINC/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
ZINC 65/RADIATION MONITORING
Environmental survey at the AAEC Research Establishment Lucas Heights, results for 1975, 1976 and 1977, 2407 (AAEC/E--467)
ZINC 65/RADIOECOLOGICAL CONCENTRATION
Radionuclide concentrations in a barn swallow population nesting near radioactive leaching ponds, 3469 (IDO--12088)
ZIRCALOY/CORROSION
An assessment of the long-term storage of Zircaloy fuel rods in water. Final report, 2865 (PB--291013)
Assessment of the long-term storage of zircaloy fuel rods in water, 145 (CAEC--012)
Properties of light water reactor spent fuel cladding. Interim report, 1488 (HEDL-TME--78-70)
ZIRCALOY/MECHANICAL PROPERTIES
Properties of light water reactor spent fuel cladding. Interim report, 1488 (HEDL-TME--78-70)
ZIRCALOY/OXIDATION
Assessment of the long-term storage of zircaloy fuel rods in water, 145 (CAEC--012)
ZIRCALOY/PHYSICAL PROPERTIES
Properties of light water reactor spent fuel cladding. Interim report, 1488 (HEDL-TME--78-70)
ZIRCALOY/STRESS CORROSION
Stress corrosion crack growth in unirradiated zircaloy, 2867 (STUDSVIK-K4--78/12)
ZIRCALOY 4/STRESS CORROSION
Long-term storage of fuel in water, 125 (AECL--6577)
ZIRCON/PHYSICAL RADIATION EFFECTS
Metamict state radiation damage in crystalline materials, 399 (CONF-790420--)
ZIRCONIUM/ADSORPTION
Nuclide transport by groundwater in Swedish bedrock, 2581
Some geochemical aspects of the Canadian nuclear waste disposal program, 1779 (PNL-SA--7352(Vol.2))
ZIRCONIUM/EMISSION SPECTROSCOPY
Facility for the analysis of radioactive samples by inductively coupled plasma spectroscopy, 3618 (RHO-SA--81)
ZIRCONIUM/RECOVERY
Radioactive liquid waste processing method (Patent), 1064
ZIRCONIUM/SORPTION
Organic components of nuclear wastes and their potential for altering radionuclide distribution when released to soil, 1728 (PNL--2563)
ZIRCONIUM 95
Sorption of ^{106}Ru and ^{95}Zr from Purex solvent on organic and inorganic ion exchangers, 1019
ZIRCONIUM ALLOYS/CORROSION RESISTANCE
Behavior of spent LWR fuel assemblies, 2709
ZIRCONIUM COMPOUNDS/MOLECULAR STRUCTURE
Polymolybdates as plutonium (IV) hosts, 550
ZIRCONIUM OXIDES/CRYSTAL STRUCTURE
Zirconolite - a fluorite-related superstructure, 2662
ZIRCONIUM OXIDES/SOLUBILITY
Hydrothermal interactions of cesium and strontium phases from spent unreprocessed fuel with basalt phases and basalts, 1821 (RHO-BWI-C--70)
ZOOPLANKTON
See also CRUSTACEANS
ZOOPLANKTON/CONTAMINATION
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)
ZOOPLANKTON/RADIONUCLIDE KINETICS
Chemical and geochemical studies off the coast of Washington. Progress report, September 1978-August 1979, 3467 (DOE/EV/70024--31)

CONTRACT NUMBER INDEX

Numbers assigned to DOE contracts under which reports announced in this publication were prepared are included in this index.

Contract No.	Abstract No.	Report No.
AC-06-77RL01030		Rockwell International Corp., Richland, WA (USA). Rockwell Hanford Operations
	81:3010	RHO-CD-864
AC02-76-CH00016		Brookhaven National Lab., Upton, NY (USA)
	81:2659	BNL-27784
AC02-76CH00016		Brookhaven National Lab., Upton, NY (USA)
	81:621	BNL-28193
	81:622	BNL-28282
	81:623	BNL-NCS-28103
	81:1407	BNL-27841
	81:2616	BNL-28054
	81:2660	BNL-28067
AC02-76ET34205		Dow Chemical Co., Midland, MI (USA)
	81:2673	DNS-D-1-016(Vol.7)
AC02-76ET44206		Colorado Univ., Denver (USA). Center for Environmental Studies
	81:3316	DOE/ET/44206-1
AC02-77RL01030		Idaho Bureau of Mines and Geology, Moscow (USA). Dept. of Lands
	81:1220	RHO-BWI-C-68
AC02-78ER04972		Massachusetts Inst. of Tech., Cambridge (USA). Dept. of Earth and Planetary Sciences
	81:1453	DOE/ER/04972-2
AC02-79ER10412		State Univ. of New York, Stony Brook (USA). Research Foundation
	81:1454	DOE/ER/10412-2
AC02-79EV10305		Colorado State Univ., Fort Collins (USA). Dept. of Radiology and Radiation Biology
	81:3361	DOE/EV/10305-1
AC03-76SF00515		Stanford Linear Accelerator Center, CA (USA)
	81:3247	SLAC-228
AC04-76-DP00789		Sandia Labs., Albuquerque, NM (USA)
	81:1891	SAND-79-0275
AC04-76DP 00789		Sandia Labs., Albuquerque, NM (USA)
	81:1921	SAND-79-1199
AC04-76DP00053		Mound Facility, Miamisburg, OH (USA)
	81:475	MLM-2669
	81:890	MLM-2692
	81:891	MLM-2697

REPORT NUMBER INDEX

The numbers assigned to all reports cited in the publication appear in the first column of the index. The citation numbers are included in the second column. Cross reference information and/or availability are included as appropriate. Abbreviations used in the availability column are elaborated at the end of the index.

Report No.	Abstract No.	Availability
AAEC/E-

Abbreviations Used in Availability Column

Dep. DOE reports so designated are maintained in the organizations listed on the inside back cover.

EM Inquiries regarding the availability of blueline prints of DOE engineering drawings which were formerly available for sale by NTIS should be addressed to Technical Information Center, P. O. Box 62, Oak Ridge, Tennessee 37830.

ETEC Available *only to requesters within the United States* from the Energy Technology Engineering Center, P. O. Box 1449, Canoga Park, California 91304.

GJO Available from DOE Grand Junction Office, P. O. Box 2567, Grand Junction, Colorado 81501.

GPO For sale by the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

NSO Available *only to requesters within the United States* from the Nuclear Standards Office, Oak Ridge National Laboratory, P. O. Box X, Oak Ridge, Tennessee 37830.

NTIS For sale by the National Technical Information Service (NTIS), U. S. Department of Commerce, Springfield, Virginia 22161. Price given is the domestic price for paper copy; foreign purchasers add $2.50 per report copy. Some recent NTIS availability statements will include pricing codes as opposed to prices. These codes are related to actual prices in the table below.

TIC Available from the Technical Information Center, P. O. Box 62, Oak Ridge, Tennessee 37830.

NTIS NORTH AMERICAN PRICE CODES

Most NTIS products and services are now announced by price codes and, therefore, without specific prices in NTIS journals, newsletters and indexes.

The current dollar equivalent for each code is shown in the schedule below. Orders must list the accession number(s) and be accompanied by the total dollar amount from the current schedule.

NORTH AMERICAN CONTINENT PRICE SCHEDULE

Customers in Canada, U.S., and Mexico please use this price schedule; other addressees write for Folder PR-360-4.

A01.....$3.50	E01.....$5.50	T01..... $110.00
