Research on several small electrochemical energy sources for emergency use, 68 (AD-B004198)
ELECTRODES
See also ANODES
CATHODES
ELECTRODES/ACID ELECTROLYTE FUEL CELLS
Titanium electrodes for fuel cells and batteries containing acid electrolyte (Patent; acid-resistant coating), 4238
ELECTRODES/CADMIUM OXIDES
Problem on the mechanism of calcium poisonous action on powder cadmium electrode, 3491
ELECTRODES/CHEMICAL ANALYSIS
Chemical analysis of nickel-cadmium electrodes, 4404
ELECTRODES/CHEMICAL REACTION KINETICS
Interpretation of measurements of potential decay on open circuit, 4712
ELECTRODES/ELECTRIC BATTERIES
Active mass of the nickel oxide electrode for an alkaline storage battery (Patent; preparation), 4354
Active substance for the nickel oxide electrode of an alkaline storage battery (Patent; preparation of active material), 4355
Alkaline battery (Patent; improvement consisting in welding their conductive plates to electrodes), 3493
Alkaline battery electrodes (Patent; method for electrode activation), 4673
Analysis of porous alkaline cadmium electrodes. II. Potential recovery transients after a period of discharge (Influence of porosity), 4096
Analysis of porous alkaline cadmium electrodes. III. Application of charge porosity diagrams in electrode design, 4097
Analysis of charge-discharge characteristics of nickel oxide electrodes by infrared spectroscopy, 4606
Analysis of porous electrodes with sparingly soluble reactants. III. Short time transients, 3390
Analysis of porous electrodes with sparingly soluble reactants. IV. Application to particulate bed electrode: Ag/AgCl system, 3391
Analysis of porous electrodes with sparingly soluble reactants IV. Application to particulate bed electrode: Ag/AgCl system. Technical report, 3128 (AD-A-019580)
Analysis of porous alkaline cd-electrodes. IV. Optimization of current efficiency, 3547
Analysis of porous electrodes with sparingly soluble reactants, III short time transients. Technical report, 70 (AD-A-024031)
Anodic behavior of silver in alkaline solutions, 3525
Anodic dissolution of lithium--aluminum alloys in a lithium chloride--potassium chloride melt, 1110
Anodic oxidation of manganese oxides in alkaline electrolytes, 4515
Apparatus and method for making battery electrodes (Patent; pouring suspension of soot, teflon, and cellulose through cylindrical Ni mesh and heat testing) 4020
Application of electron spectroscopy for chemical analysis to the study of iron-based battery electrodes, 3782
Application of autoradiographic techniques to battery research, 4633
Basic research on ceramic materials for energy storage and conversion systems. Progress report, December 1, 1975-November 30, 1976 ($Tl_2ZnI_4$, $In_4CdI_8$, $Tl_4CdI_6$, and $In_2ZnI_4$; solid electrolytes and electrodes), 3182 (COO-2564-2)
Battery electrode made of a number of individual small tubes bound in series (Patent), 3527
Battery electrode support (Patent), 3589
Battery electrode supports (Patent), 3590
Battery electrode matrixes (Patent; fabrication), 4316

Battery paste pumping and metering system (Patent), 4000
Battery paste and battery plate structure (Patent), 3541
Behavior of sintered plate nickel hydroxide electrodes in lithiated electrolyte solutions, 4204
Behavior of nickel oxide electrodes of alkaline cells in concentrated solutions of nickel salts, 4387
Behavior of the silver/silver chloride electrode in concentrated aqueous sodium chlorides, 4179
Beneficial effect of lithiated electrolyte on iron battery electrodes, 4632
Bonded metal electrodes (Patent; improved contact achieved by cold pressing etched collector sheet), 3693
Cadmium paste electrodes for alkaline cells (Patent), 3643
Carbon-coated zinc electrode for laminated batteries (Patent), 3761
Carbon electrode (Paten; fabrication and physical properties), 3701
Carrying out reactions between powdered and gaseous materials (Patent; means for chemical preparation of active materials), 3549
Catalytic paste and electrode (Patent; C, binder, catalyst, $H_2O$, thickener), 3648
Cathodic polarization characteristics of poly(4-vinylpyridine) bromine complex, 4177
Change of the electrolyte concentration in metalloceramic cadmium electrodes of alkaline storage battery, 4034
Charge, discharge, and self-discharge characteristics of thin film nickel oxide electrodes, 2905 (AD-671685)
Chemical and electrochemical behavior of lithium electrodes in dimethyl sulfite, electrolytic solutions ($LiClO_4$--dimethyl sulfide), 4147
Chemoelectric energy conversion for nonaqueous batteries and fuel cells. Quarterly report No. 20, Apr-Jun 1968, 498 (AD-843141)
Chemoelectric energy conversion for nonaqueous batteries and fuel cells, 507 (AD-847137)
Choice of an eddy current transformer for monitoring the quality of the nickel cermet electrode bases of a low-voltage cable storage battery, 4209
Coated nickel electrodes (Preparation by anodization of an active form of Ni), 4419
Comments on current distribution in and on porous electrodes, 4536
Comparison of potential step and triangular voltage sweep methods of double layer capacitance measurements. III. Porous zinc electrodes, 2949 (AD-742219)
Comparison of amalgamated and non-amalgamated zinc electrodes, 4425
Complex apparatus for potential dynamic methods of studying surface condition and kinetics of electrochemical reactions in conjunction with the use of ring-disk electrode, 4128
Composite porous electrode (Patent), 3933
Continuous production of covers for tubular battery electrodes (Patent), 3495
Corrosion in alkali hydroxide solutions of electrolytic zinc powder containing codeposited lead, 3448
Coulogravimetric investigation of zinc electrode in potassium hydroxide, 4492
Crystallographic changes during oxidation (charging) of the silver electrode. Part I. Initial oxidation of an industrial sintered plaque, 2903 (AD-671050)
Crystallographic changes during oxidation (charging) of the silver electrode. Part II. Oxidation following five charge-discharge cycles at a low rate, 2909 (AD-671771)
Current discharge frame for electrodes of lead storage batteries (Alkaline battery; patent), 3096 (AD-910738L)
Current distribution and potential profile at linear wire electrode of significant ohmic resistance, 4508
Cyclic charge-discharge behaviour of sintered plate and planar cadmium electrodes, 3449
Cycling battery electrodes in bulk (Patent; rotating cylinders contain electrodes to be regenerated), 4255
Cycling characteristics of silver electrode in alkaline solutions, 4596
Decomposition of silver oxide in alkaline solutions. Technical report No. 2 (Aqueous KOH), 2851 (AD-603306)
Decomposition of AgO in alkaline solutions, 4456
Determination of the surface area of battery electrodes, 4475
Determination of carbonate impurities in nickel hydroxide, 4069
Determination of parameters of equivalent electrode circuits, 4495
Determination of the degree of reduction of active masses of a storage cell iron electrode ([FeO] proportional to magnetic susceptibility), 4431
Development of physico-chemical methods to study the structure and composition of active electrode materials and electrolytes at All-Union Scientific-Research Project-Construction Technological Storage Battery Institute, 3799
Development of a compact, high-capacity $FeS_2$ electrode, 4139
Development of sintered zinc battery electrodes. Progress report (0.075 to 225 ma/cm²), 3060 (AD-878215)
Development of improved zinc electrodes for secondary batteries. Final report, July 1968-July 1969, 3203 (N-69-40063)
Difference between waterproofed and hydrophilic electrodes. II. Biporous model, 4088
Diffusion-bonded battery electrode plaques (Patent), 3552
Diffusion-bonded battery electrode plaques (Patent; steel fibers), 3553
Disperse catalyst generators, 4478
Dissolution and passivation of metals in alkaline solutions in the presence of surfactants, 4137
Double layer capacitance of zinc electrodes in KOH solutions, 4496
Effect of electrode structure on performance of porous electrodes (Oriented toward primary $Ag/Ag_2O$ cells), 4476
Effect of technological factors on the properties of cast electrodes for chemical current sources with copper(I) chloride. II, 4077
Effect of the increase of porosity on the current distribution in nickel hydroxide electrodes containing Raney nickel, 4001
Effect of the substrate on the anodic behavior of silver oxide electrode, 4110
Effect of zincate ions on the course of cathodic processes on the silver oxide electrode, 4111
Effect of technological factors on the properties of cast electrodes for chemical current sources with copper(I) chloride. I, 4127
Effect of solvent nature on the kinetics of electrochemical reactions of salt and oxide electrodes, 4138
Effect of matrix structure on the electrochemical performance of p/m iron electrodes in an alkaline battery environment, 4140
Effect of the inert component on mass transfer in the gas phase of a porous electrode. II. Oxygen electrode (C hydrophobized electrode), 3819
Effect of various active carbon catalysts on the behavior of carbon gas-diffusion air electrodes. I, II, 3415
Effect of the discharge temperature on operational and structural characteristics of a silver oxide electrode (-10 to +90°), 4430
Effect of the charge time on the life of a silver battery electrode, 4433
Effects of mercury on the surfaces of polycrystalline copper, tin and zinc, 4194
Effects of charge rate and cycling on the morphology of Cd and $Cd(OH)_2$ in sintered plate electrodes, 3392
Electric storage battery with valve metal electrodes (Patent), 3278
Electrochemical characteristics of porous silver/silver chloride electrodes. Final report, 23 Jun 1971-23 Sep 1972, 3083 (AD-904851L)
Electrochemistry of the nickel oxide electrode. V. Self-passivation effects in oxygen-evolution kinetics, 2954 (AD-744605)
Electrochemical electrodes (Patent), 3881
Electrochemical power sources. Final technical report, 18 September 1968-31 January 1974, 3113 (AD/A-001610)
Electrochemical generators (Patent; description of electrode assembly), 3944
Electrochemical processes on nickel oxide, 2902 (AD-667607)
Electrochemical vehicle power plants, 5254
Electrochemical characterization of nonaqueous systems for secondary battery application (1000 electrode-organic electrolyte combinations), 3241 (NASA-CR-1434)
Electrochemical characterization of nonaqueous systems for secondary battery application. Quarterly report, February-April 1968, 3196 (N-68-28554)
Electrochemical properties of $RbAg_4I_5$ solid electrolyte. II. Silver electrode reversibility (Importance of shape), 4301
Electrode for galvanic elements, especially for alkaline storage batteries, 3095 (AD-909885L)
Electrode for secondary storage battery (Ni fibers with iron oxide as active agent, additives; patent), 3925
Electrode bearing plastic strip (Patent; fabrication), 3630
Electrode for alkaline batteries (Patent; fabrication using loaded Ni sponge), 3651
Electrode plate for alkaline batteries (Patent; fabrication method), 3713
Electrode plate of alkaline storage battery (Patent; preparation of Ni or Cd electrode), 3591
Electrode kinetics of the alkali metals in $AlCl_3$-propylene carbonate solution, 2263
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Final report, Dec 1965-Sep 1969, 1897 (AD-862506)
Electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 4, 1 Sep-1 Dec 1966, 2987 (AD-804559)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 7, 1 Jun-1 Sep 1967 (Study of cathodic Zn processes at 50°C), 3008 (AD-820273)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 10, 1 Mar-1 Jun 1968 (Amalgamated and nonamalgamated zinc in KOH), 3024 (AD-834995)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 12, 1 Sep-1 Dec 1968, 3039 (AD-

847067)
Electrode passivation studies. Quarterly report No. 2, 1 Mar-31 May 1966, 2838 (AD-484216)
Electrode phenomena of cadmium in alkaline battery: discharge mechanism, 4695
Electrode for electrochemical power sources (Patent), 3387
Electrode mechanisms using reflection and electron spectroscopy. Final report 15 Jan 1972-14 Jan 1976, 3134 (AD-A-027694)
Electrode-separator combination for use in batteries (Patent), 4315
Electrodes for alkaline batteries (Patent; preparation), 3613
Electrodes for electrochemical cells (Patent; nickel powder in solidified poly(vinyl acetate)), 4333
Electrolytic cell for x-ray diffraction studies of electrode phenomena, 2852 (AD-605707)
Electromagnetic monitoring of the degree of oxidation of powder-metallurgy nickel [for electrodes for alkaline batteries], 4130
Electrophoretic method of preparation of electrodes from nickel(II) hydroxide, 3780
Energetics of the organic electrodes of accumulators, 3659
Evaluation of porous electrodes through cell power maximum measurements, 4178
Experimental study of reaction profiles in porous electrodes, 3770
Experimental current distribution in porous battery electrodes (Ways to ensure uniformity), 4572
Fabricating zinc oxide electrodes for secondary batteries (Patent), 4486
Failure analysis of porous electrodes. Final report (Ag/AgCl electrodes; output of Li/LiClO$_4$, DMSU/C, LiF cell), 3100 (AD-912458)
Failure analysis of porous electrodes. Final report, 3101 (AD-912458)
Feasibility of microscopy for investigating the silver oxide electrode, 2900 (AD-664993)
Feasibility of using magnetic measurements for the selection of concentrations of sulfur additives in the active mass of an iron electrode, 4432
Formation of electrodes for alkaline batteries (Patent), 3542
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Framework for electrodes in electric cells (Patent), 3860
Gas diffusion electrode for batteries (Mixture of conducting material (e.g. powdered metal) and hologenated material (e.g. teflon;patent), 3909
Halogen hydrates (Patent; halogen storage by means of hydrates), 3513
High-energy system (organic electrolyte). Quarterly report No. 1, 15 June-15 September 1965, 334 (AD-628961)
High-rate batteries (Effects of plate porosity on efficiency; study included Zn, Cd, Pb, $Ag_2O$, and AgO), 2890 (AD-645942)
Hydrating a battery plaque impregnated with a metal nitrate in a hydroxide solution and subsequent recovery of the nitrate by-product as crystals (Patent; preparation), 4249
Hydrogen energy storage electrode, 4164
Hydrophilic electrode and its fabrication (Patent), 3509
Hydrophilic electrode (Patent; preparation), 3545
Improvement of the technology of sintered cadmium [battery] electrodes, 4067
In-situ preparation of electrodes for batteries (Patent), 3896
Influence of sinter temperature on capacity of silver electrodes, 4556
Influence of electrode reaction kinetics on polarization of flooded porous electrodes, 4615
Influence of ultrasound and of other precipitation conditions on the particle-size composition of nickelous hydroxide precipitates, 4452
Influence of the porous structure of a zinc electrode on its electrical characteristics, 4391
Infrared spectroscopic study of the properties of a nickel oxide electrode. I. Effect of charging conditions on the ir spectra of a nickel oxide electrode in charged and discharged states, 4092
Introduction of active materials into porous electrode frameworks for alkaline batteries, 3908
Investigation of porous lithium battery electrodes. Final technical report, 15 July 1965-15 November 1966, 2996 (AD-808937)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 8, 1 Sep-1 Dec 1967, 3014 (AD-824687)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report. No. 9, 1 Dec 1967-1 Mar 1968, 3019 (AD-829092)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 11, 1 Jun-1 Sep 1968 (Polarographic study of zincate solutions), 3034 (AD-841829)
Investigation of porous lithium battery electrodes. Quarterly technical progress report No. 1, 15 Jul-15 Oct 1965, 2826 (AD-474692)
Investigation of porous lithium battery electrodes. Quarterly technical progress report No. 2, 15 Oct 1965-15 Jan 1966 (Rechargeable spacecraft batteries), 2830 (AD-478016)
Investigation of porous lithium battery electrodes. Quarterly technical progress report No. 3, 15 Jan-15 Apr 1966, 2839 (AD-484218)
Investigation of porous lithium battery electrodes. Quarterly technical progress report No. 4, 15 Apr-15 Jul 1966, 2840 (AD-487623)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 1, 1 Dec 1965-1 Mar 1966, 1697 (AD-480149)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 3, 1 Jun-1 Sep 1966, 2842 (AD-488605)
Investigation toward the development of carbonyl nickel powder suitable for the manufacture of sintered nickel plaques for use in alkaline storage batteries, 2873 (AD-622916)
Kinetic study of the zinc electrode by modified pulse techniques and concentration gradients. Final technical report, 3040 (AD-847223)
Kinetic study of the zinc electrode by modified techniques, 4424
Lead alloys of high creep rupture strength, 3907
Lead-calcium wrought alloys (Patent), 3973
Lead perchlorate cell based on $HClO_4$ instead of $H_2SO_4$ (Patent), 816
Life capability of the silver electrode in alkaline electrochemical cells (Ag-$H_2$), 3235 (N-76-28648)
Lignocellulose batteries. Potential sources of stored electrical energy, 1126
Liquid metal electrodes in secondary batteries (Review of developments in batteries of various types), 3175 (CONF-760503-10)
Lithium amalgam-lithium chloride and thallium amalgam-thallous chloride electrodes in lithium chloride-dimethyl sulfoxide solutions (Dissolution and deposition of Li comparatively irreversible), 1504
Lithium electrode (Patent; fabrication, improved cycle life), 3622
Long-life stable zinc electrode for alkaline secondary battery. Quarterly report No. 2, 1 March-31 May 1967, 3015 (AD-824719)
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly report No. 3, 1 June-3 August 1967, 3018 (AD-828224)
Long-life stable zinc electrode for alkaline secondary battery. Quarterly report No. 5, 1 December 1967-29 February 1968 (5 Ah), 3028 (AD-837262)
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly technical progress report No. 6, 1 March-30 May 1968, 3038 (AD-847053)
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly technical progress report No. 7, 1 June-31 August 1968, 3042 (AD-849523)
Low temperature cycling behavior of the silver electrode. Technical report No. 3, 2854 (AD-609876)
Macrokinetics of the processes at the zinc electrode of an alkali current source, 3800
Manufacture of a dry-charged nickel oxide electrode by chemical oxidation (KOH--$K_2S_2O_8$ solution), 4083
Mechanism of current generation in waterproofed electrodes, 4126
Metal lattice for electrolyte supports of storage batteries (Patent; Pb or alkaline storage batteries), 3751
Method for preparing electrodes for an electrochemical storage cell (Patent), 3405
Method for making nickel and cadmium electrodes for batteries (Patent), 3375
Method of manufacturing a nonlamellar cadmium electrode of an alkali storage battery (USSR patent), 2966 (AD-759754)
Method of manufacturing a nonlamellar cadmium electrode of an alkali storage battery, 4822 (AD-759754)
Method of producing electrodes (Patent), 3400
Methods for determining the structural and stoichiometric changes of $Ni(OH)_2$ electrodes during polarization in alkaline electrolyte, 4565
Methods of producing electrodes for alkaline batteries (Patent; oxidative pretreatment of nickel plaque before impregnation), 3287
Mixed conductor materials for electrodes in advanced secondary batteries, 3131 (AD-A-024658)
Mixture containing powdered lead, lead oxide, and a pore-forming additive, for preparing electrodes for lead storage batteries (Patent), 3611
Mixture for making porous electrodes (Patent), 3968
Moessbauer spectroscopy investigation of the iron electrode during cycling in alkaline solution, 3810
Morphology and capacity of a cadmium electrode, 4198
New experimental technique for study of films produced at electrochemical interfacees (Corrosion films), 4722
New results from the technological development of an industrial concern (Catalytic activity of tungsten carbide electrode), 3091 (AD-908400L)
New secondary electrochemical systems (Mg/AgCl--Ag; Al/NiO-Ni; Mg/Ni), 4688

New type of reversible negative electrode for alkaline storage batteries based on metal alloy hydrides, 4201
Nickel-base electrodes for alkaline batteries (Patent; preparation procedure), 3750
Nickel electrodes for alkaline cells (Patent), 3663
Nickel hydroxide battery electrode development. Final technical report, 1 Jan 1971-31 Jan 1972, 2958 (AD-746335)
Nickel hydroxide electrode research. Interim technical report No. 1, 1 January 1969-2 February 1970 (Effects of cation additions to active material), 3056 (AD-866147)
Nickel hydroxide electrode (Patent), 4334
Nickel or cadmium electrodes for alkaline cells (Patent; chemical preparation), 3588
Nonacid battery paste (Patent), 3540
Oxidation of powder-metallurgical electrodes by potassium hypochlorite, 4076
Oxidation of organic components in a hermetic storage battery and the stability of its characteristics (Accumulation of Cd on electrodes during cycling), 3815
Oxidation of hydrogen on a porous nickel electrode, 2860 (AD-612497)
Oxidation of sintered nickel bases with ozone (Chemical preparation), 4434
Oxygen reduction on porous cadmium electrodes of alkaline accumulators, 3402
Patent; preparation of Ni oxide, Ni hydroxide, and Fe oxide electrodes, 3762
Perforator of lamellar tapes for alkaline storage battery electrodes (Patent), 4304 (FSTC-HT-23-0343-74)
Polarization of manganese dioxide electrode, 4683
Polarization studies on sintered plate electrodes containing various amounts of $Ni(OH)_2$, 4579
Porous cadmium metal for alkaline storage batteries (Patent; Cd powder + urea heated and washed), 3606
Porous carbon material for use as a battery or fuel cell electrode (Patent), 4245
Porous carbon material for use as a battery or fuel cell electrode (Patent; chemical preparation), 4250
Porous cobalt electrodes for alkaline accumulators and hybrid cell therewith and air electrode (Patent), 3376
Porous-electrode theory with applications to batteries (and fuel cells), 3765
Porous electrode bodies for primary and secondary cells (Patent;fabrication), 4679
Porous nickel alkaline-battery electrodes made from woven cotton cloth (Fabrication and testing, porous structure derived from woven cotton cloth), 4349
Porous structure of a sintered nickel oxide electrode, 2960 (AD-748109)
Possibilities of improving the electrical characteristics of nonlamellar nickel oxide electrodes of alkaline storage batteries, 4068
Potassium distribution in nickel oxide electrodes, 4577
Potentiodynamic study of the effect of aluminum on the behavior of an iron electrode in alkaline solution, 4298
Powder-metallurgy electrode of an alkaline storage battery (Patent), 3853
Power sources conference (22nd annual) held 14-16 May 1968. Proceedings, 41 (AD-696427)
Practical aspects of electrode modeling (Reaction profiles, Ag/AgCl system), 4048
Preparation and structure of electrodeposited sponge cadmium electrodes, 4488
Preparation of an alkaline iron electrode material using sulfur acids (Patent), 4180
Preparation of highly porous nickel substrates for sintered electrodes of storage batteries, 4428
Problem on the mechanism of calcium poisonous action on powder cadmium electrode, 3491
Process for making electrochemical electrodes (Patent), 3879
Processes at the silver oxide electrode of an alkali current source (State-of-the-art review (1975)), 3798
Processes occurring in electrochemical systems with a solid silver-conducting electrolyte (Behavior of polyiodide electrode in $RbAg_4I_5$ electrolyte), 2321
Producing porous metal structures for battery electrodes (Patent; Zn, Cd), 4254
Production of a cadmium electrode for the alkaline storage battery (Patent), 3998
Production of porous membranes for batteries and fuel cells (Nickel), 4620
Production of porous nickel for alkaline-battery and fuel-cell electrodes: practical and economic considerations, 4611
Production of porous nickel electrodes for gas-tight batteries, 4604
Products of oxidation of nickel with ozone (Chemical preparation of nickel oxide electrode active mass), 4436
Quinone electrodes for primary and secondary batteries (Patent), 4319
Rational degree of filling of pores of powder-metallurgical nickel oxide electrode by the active media, 4118
Reaction possibilities in electrodes of solid-state batteries, 4108
Reasons for the poisoning effect of small quantities of some impurities on the cathode reduction process for metal oxides and hydroxides in an alkali solution, 4134
Rechargeable lithium electrodes in a propylene carbonate electrolyte, 1251
Rechargeable cell having ceramic--metal terminal seal resistant to alkali electrolyte (Patent), 3934
Rechargeable zinc electrodes (Patent; fabrication), 3532
Rechargeability of manganese dioxide electrode (KOH solution), 4510
Reduction of the silver oxide electrode in CsOH solutions (Comparison with KOH), 4003
Relating structural variables of porous electrodes (Method gives specific surface area), 1089
Reproducible and stable silver-silver oxide electrode, 4744
Reproducibility of lead electrode and electromotive force of lead stick-lead amalgam cell at 0 to 60°C, 4817
Reserve battery electrodes using bonded active materials (Patent), 4310
Reserve battery electrodes using bonded active materials (Patent; preparation), 4312
Reversible electrode reactions of difficult-to-dissolve materials in nonaqueous electrolytes (a contribution to the knowledge on potential cathodes for secondary high-energy-density batteries with special consideration of graphite compounds, 3221 (N-74-30505)
Review of fundamental investigations of silver oxide electrodes, 2831 (AD-478632)
Rugged silver--silver chloride electrode for field use (2.7 M KCl filling solution saturated with AgCl), 4175
Scanning electron-microscopy studies of silver oxide electrodes, 4093
Scanning electron microscope investigations on silver oxide electrodes (Morphological changes in sintered powder metallurgy electrodes due to oxidation during cycling), 4024
Scanning electron microscope investigations on silver oxide electrodes, 4025
Scientific research on improving the characteristics of iron and nickel oxide electrodes, 3792
Self-discharge of nickel oxide electrodes, 4213
Self-discharge mechanism of a powder-metallurgy nickel oxide electrode in concentrated potassium hydroxide solutions, 4135
Self-discharge of a nickel oxide electrode, 4417
Self-discharge of the alkaline iron electrode, 3442
Sheath for tubular storage battery electrodes and method for their production (Patent), 3399
Sheath for tubular storage battery electrodes and method for their production (Patent), 3319
Sheet-like electrodes for storage batteries (Patent; manufacturing method), 4678
Silver electrodes for chemical sources of electric power (Patent), 3942
Silver electrode for battery (Patent; fabrication), 3914
Silver oxide battery electrode (Patent; preparation by electrochemical oxidation of Ag powder), 3739
Silver oxide electrode (Electrochemistry), 4725
Silver/silver chloride electrode: charging of a porous structure, 3769
Silver/silver chloride electrodes: surface morphology on charging and discharging (37.2-μm Ag spheres, transport modes for oxidation and reduction), 4005
Silver-tungsten carbide electrode (Patent), 4021
Sintered electrodes for batteries (Patent), 3683
Sintered electrode plate for alkaline storage battery (Patent; fabrication), 3600
Sintered-metal nickel oxide electrode for an alkali storage cell, 2959 (AD-748047)
Sintered type alkaline storage battery. XV. Effect of lithium ion on the formation of active material from nickel plaque at various temperatures, 4087
Sintered zinc electrode (Patent; fabrication), 4323
Solid electrolyte battery materials. Technical report, 3145 (AD-A-039899)
Storage-battery electrodes (Patent; preparation), 4694
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730
Structure of a double electric layer and features of the electrode processes on a sodium nickelate single crystal, 4136
Studies on the stability of oxides of silver, 2875 (AD-626229)
Studies on silver oxide. I. Analytical techniques. II. Thermal decomposition of AgO. III. Charging efficiency studies, 2993 (AD-806861)
Studies on the silver/silver oxide electrode, 3837
Study of electrodes and electrode reactions. II. The relation of the energy necessary to remove an oxygen molecule from charged nickel oxide electrodes in vacua and solutions of potassium hydroxide, 2876 (AD-627216)
Study of electrodes and electrode reactions. I. The energy necessary to remove an oxygen molecule from a charged nickel oxide electrode in a vacuum, 2877 (AD-627248)
Study of electrode phenomena in storage batteries, 4743
Study of some charge transfer complexes as electrodes in solid-state cells, 3436
Study of the electrochemical properties of solid-state conjugated amines with respect to their use as electrode active materials in secondary batteries, 3331
Support frame for the active material of electrodes for batteries or fuel cells (Patent), 4011
Surface coverage during hydrogen and oxygen evolution,

2639
Susceptibility to oxidation of coal and graphite electrodes, 3080 (AD-902658L)
Texture of a zinc oxide residue formed during the anodic oxidation of porous zinc in an alkaline solution, 2228
Thermogalvanic potentials. II. Nickel in neutral subgate solution, 4769
Thickness optimization of powder-metallurgical battery electrodes, 4074
Transport processes in porous electrodes, 2229
Two-layer casing for tubular electrodes for storage batteries (Patent), 3573
Use of compound binders in the production technology of carbon battery electrodes, 3788
Use of Mg instead of Zn in electric batteries (advantages), 4794
Use of stereometric metallography for determination of structural characteristics of porous nickel bodies for alkaline storage cell plates, 4463
Viscosity, density, and electrical conductivity of aqueous NaOH solutions at low temperatures, 4451
Wrapped-electrode battery (Patent), 3317
Zinc-container electrode (Patent; design and performance), 3667
Zinc electrode investigation. Quarterly technical progress report No. 7, 1 Jan-1 Apr 1966, 2835 (AD-480735)
Zinc electrodes for rechargeable batteries (Patent; synthetic latex coating to prevent dendrite formation), 3585
Zinc electrode investigation. Quarterly technical progress report No. 5, 1 Jul-1 Oct 1965, 2818 (AD-471222)
Zinc electrode investigation. Quarterly technical progress report No. 6, 1 Oct 1965-1 Jan 1966, 2829 (AD-476991)
Zinc electrode investigation. Quarterly technical progress report No. 7, 1 Jan-1 Apr 1966, 2836 (AD-480735)
Zinc electrode investigation, 2843 (AD-489498)
Zinc electrode investigation. Quarterly technical progress report No. 1, 1 Jul-1 Oct 1964 (Pd-on-alumina catalyst), 2853 (AD-606999)
Zinc electrode investigation. Quarterly technical progress report No. 2, 1 Oct 1964-1 Jan 1965 (Effects of catalysts, pressure, and impurities), 2856 (AD-609984)
Zinc electrode investigation. Quarterly technical progress report No. 3, 1 Jan-1 Apr 1965, 2863 (AD-614119)
Zinc electrodes in alkaline medium, 1464
Zinc powder for batteries (Patent), 3679

ELECTRODES/ELECTRIC GENERATORS
Swaged generator pole shoes conserve copper wire, 4783

ELECTRODES/ELECTRIC POTENTIAL
Interpretation of measurements of potential decay on open circuit, 4712

ELECTRODES/ELECTROCHEMICAL CELLS
Diffusion electrode (Patent), 3519
Electrode for electrochemical cells (Patent; preparation of 2-layer electrode), 4258
Electrodes for electrochemical cells, comprising metal chlorides as active material (Patent), 4337
Metal electrodes containing acrylonitrile-butadiene-styrene copolymer binders (Patent; fabrication), 4262
Power cell (Patent, Ag/AgI/α-TeI/Te), 834
Procedure for fabricating electrodes for galvanic elements and accumulators using porous frameworks which are made surface conductive or designed with conducting inserts (Patent), 3510

ELECTRODES/ELECTROCHEMISTRY
Periodic electrode processes, 220
Problem on the mechanism of calcium poisonous action on powder cadmium electrode, 3491

ELECTRODES/ELECTROLYTIC CELLS
Electrodes for use in zinc-halogen electrolytic cells and (or) batteries (Patent), 4307
Method for the production of galvanic primary elements and device to carry out the method (Patent), 3432
Nickel based alloys as electrocatalysts for oxygen evolution from alkaline solutions, 3166 (BNL-22275)

ELECTRODES/EQUIVALENT CIRCUITS
Determination of parameters of equivalent electrode circuits, 4495

ELECTRODES/FUEL CELLS
Basic research on ceramic materials for energy storage and conversion systems. Progress report, December 1, 1975-November 30, 1976 ($Tl_2ZnI_2$, $In_4CdI_6$, $Tl_4CdI_6$, and $In_2ZnI_4$; solid electrolytes and electrodes), 3182 (COO-2564-2)
Complex apparatus for potential dynamic methods of studying surface condition and kinetics of electrochemical reactions in conjunction with the use of ring-disk electrode, 4128
Composite nickel powder for preparing plaques for nickel cadmium batteries (Also applicable to fuel cells), 4224
Continuous wet-proofing process for the cross sections of electrodes used in fuel cells and hybrid systems (Patent), 4256
Current distribution and potential profile at linear wire electrode of significant ohmic resistance, 4508
Discussion of various types of test electrodes for the evaluation of catalysts for the electroreduction of oxygen, 4279
Disperse catalyst generators, 4478
Electrochemical instrumentation and cell evaluation. Final report, Feb-Aug 1966, 1857 (AD-816711L)
Electrochemical processes on nickel oxide, 2902 (AD-667607)
Energetics of the organic electrodes of accumulators, 3659
Fuel cells with carbon electrodes, 5081
Gas-diffusion electrode for batteries (Patent; fabrication procedure), 3712
Gas diffusion electrodes for batteries (Patent; slurry of active C, resin, and solvent on support), 3691
Gas-diffusion electrode for batteries (Patent), 3714
Gas electrode (Patent), 3597
Hydrophilic electrode (Patent; preparation), 3545
Influence of the structure of silver-activated gas electrodes on the electrochemical performance of fuel cells and metal-air cells (Pore size effects), 4221
Measurement of pore size and surface area of porous electrodes by nondestructive means, 4656
Metal electrodes containing acrylonitrile-butadiene-styrene copolymer binders (Patent; fabrication), 4262
New results from the technological development of an industrial concern (Catalytic activity of tungsten carbide electrode), 3091 (AD-908400L)
Oxygen reduction in alkaline solutions at porous nickel electrodes which have been activated with several precious metals, 3088 (AD-907721L)
Porous carbon material for use as a battery or fuel cell electrode (Patent), 4245
Porous carbon material for use as a battery or fuel cell electrode (Patent; chemical preparation), 4250
Porous-electrode theory with applications to batteries (and fuel cells), 3765
Porous nickel for alkaline battery and fuel cell electrodes: production by roll-compaction (Roll-compaction of carbonyl nickel powders), 4506
Process for making electrochemical electrodes (Patent), 3879
Production of porous membranes for batteries and fuel cells (Nickel), 4620
Production of porous nickel for alkaline-battery and fuel-cell electrodes: practical and economic considerations, 4611
Silver-tungsten carbide electrode (Patent), 4021
Support frame for the active material of electrodes for batteries or fuel cells (Patent), 4011
Transport processes in porous electrodes, 2229
Zinc electrode investigation, 2843 (AD-489498)

ELECTRODES/HYDRAZINE FUEL CELLS
Electrochemical application of amalgamated-nickel bodies, 4196

ELECTRODES/HYDROGEN FUEL CELLS
Dispersed-catalyst electrodes for fuel cells and batteries, 4481
Zinc electrode investigation. Quarterly technical progress report No. 7, 1 Jan-1 Apr 1966, 2835 (AD-480735)
Zinc electrode investigation. Quarterly technical progress report No. 7, 1 Jan-1 Apr 1966, 2836 (AD-480735)

ELECTRODES/IMPURITIES
Effect of cationic impurities on the silver-silver oxide electrode: the silver-copper-iron-palladium system, 1996 (AD-921643)

ELECTRODES/IRON-NICKEL BATTERIES
Determining the capacity of electrodes of the nickel--iron storage battery (Patent), 3997
Diffusion-bonded battery electrode plaques (Patent), 3552
Electrochemistry of the nickel oxide electrode. V. Self-passivation effects in oxygen-evolution kinetics, 2954 (AD-744605)
Electrochemical behavior of iron in alkaline sulphate solutions, 3903
Electrode plate for alkaline batteries (Patent; fabrication method), 3713
Electrode plate of alkaline storage battery (Patent; preparation of Ni or Cd electrode), 3591
Hydrating a battery plaque impregnated with a metal nitrate in a hydroxide solution and subsequent recovery of the nitrate by-product as crystals (Patent; preparation), 4249
Influence of heat treatment of iron on its behavior in the electrodes of alkaline storage cells, 4450
Nickel-base electrodes for alkaline batteries (Patent; preparation procedure), 3750
Nickel hydroxide battery electrode development. Final technical report, 1 Jan 1971-31 Jan 1972, 2958 (AD-746335)
Patent; preparation of Ni oxide, Ni hydroxide, and Fe oxide electrodes, 3762
Porous structure of a sintered nickel oxide electrode, 2960 (AD-748109)
Preparation of highly porous nickel substrates for sintered electrodes of storage batteries, 4428
Scientific research on improving the characteristics of iron and nickel oxide electrodes, 3792
Sintered electrode plate for alkaline storage battery (Patent; fabrication), 3600
Sintered-metal nickel oxide electrode for an alkali storage cell, 2959 (AD-748047)
Storage-battery electrodes (Patent; preparation), 4694

Strain electrometry and corrosion. IV (Film properties and strain potential), 4730
ELECTRODES/LEAD-ACID BATTERIES
Alloy composition and its use in preparing parts for lead storage batteries (Patent), 3637
Amount and forms of adsorbed hydrogen on a platinum electrode, 3089 (AD-908040L)
Basic lead sulphate and its formation in preparation of electrodes for lead storage batteries, 4718
Behavior of lead-base electrodes, with and without a $PbO_2$ layer, in sulfuric acid as used in batteries, 3419
Behaviour of lead dioxide electrode (Reactions at Pb electrodes), 4757
Bipolar battery electrodes based on the system metal oxide--metal (Patent; preparation of such as Pb oxide--Pb), 3857
Bipolar lead acid battery having titanium and zirconium electrode supports (Patent; Ti and Zr form gridwork to retain paste), 3279
Calculation of several characteristics of passivating sulfate films and maximum utilization coefficients of active mass of lead storage batteries, 3796
Carbon dioxide curing of plates for lead-acid batteries (Patent), 938
Cells for automobile batteries (Patent; shock-resistant spring-supported electrodes), 967
Charge acceptance of the lead cell at various charging rates and temperatures (0 to 40°C), 2457
Compartmented electrode structure (Patent application), 3452
Creation of batteries for deep-sea apparatus (Pressure effects (200 kg/cm²)), 3816
Cycling of a positive lead electrode in the area of lead sulfate and oxygen formation potentials, 4439
Disintegration of lead cathodes. II, 4738
Double-layer capacity determination of porous electrodes, 3773
Dry-charge electrodes for lead storage batteries (Patent; preparation with addition of resin derivatives), 4326
Effect of the electrolyte temperature during charging of plates on the characteristics of electrodes and cells of lead-acid automotive storage batteries (20 to 64°), 4286 (AD/A-006079)
Effect of temperature and current density on the utilization of lead and lead oxide electrodes (-50 to +40°C), 2458
Effect of copper on anodic corrosion rate in $H_2SO_4$, mechanical properties, and fluidity of lead and lead antimony alloys, 4236
Effects of metallurgical structure on hydrogen evolution on lead alloys, 3828
Electric storage battery (Patent; electrodes on metal substrates), 3724
Electrical connectors and electrode holder integrated in a glass fiber mat for lead secondary batteries, 3972
Electrode for lead storage battery, 3945
Electrode for electrical lead accumulators (Patent), 3669
Electrode of lead storage battery (Patent), 3593
Electrodes, especially control and gas-consuming electrodes for lead storage batteries (Patent; graphite, teflon, WC), 3948
Electrodes for lead storage batteries (Patent; formation in glass fiber mat), 3876
Electrodes for storage batteries (Patent; fabrication of sheath for active material), 3486
Electron microprobe study of the active materials in the lead-acid storage battery, 4445
Encasing the active masses of a lead storage battery (Patent), 3548
Envelope for the tubular electrodes of storage batteries (Patent), 1201
Envelope for the tubular electrodes of storage batteries (Patent), 3439
Evaluation of the corrosion rate of lead and its alloys used for storage batteries, 3918
Gassing rates of automotive batteries, 3824
Granular active material for lead-acid battery electrodes (Patent), 3861
High-rate battery electrodes (Performance of plates produced by electrolytic reduction), 4550
Intensifying the process of lamellae formation for lead batteries, 4324
Lead--acid battery. 3. Reconfirmation of the electrode formation method. III, 4082
Lead--calcium alloy grids for lead storage battery electrodes (Patent), 3674
Lead accumulator with positive ''fabric bag'' plate (Comparison of lifetime and weight with those of conventional batteries), 4670
Lead alloys of high creep rupture strength, 3907
Lead base cadmium-tin alloy useful for forming battery components (Patent; for straps which weld together grid lugs, etc.), 3322
Lead battery alloy (Patent), 3913
Lead battery electrodes (Patent), 3900
Lead-calcium wrought alloys (Patent), 3973
Lead perchlorate cell based on $HClO_4$ instead of $H_2SO_4$ (Patent), 816
Lead storage battery (Patent; performance after 55,000 km with Pb--2.5 Sb--0.8 percent As cathode and Pb--0.09 percent Ca anode), 1054
Lead storage battery (Patent), 3721
Lead storage battery (Patent), 3722
Lead storage battery cell (Patent; plate design), 3872
Light-weight lead-acid battery with laminated electrodes (Patent), 3397
Lightweight electrodes for batteries (Patent), 3754
Maintenance-free lead secondary cell (Patent; recommends relative electrode weights and electrolyte additives), 3383
Making electrodes for lead-acid storage batteries (Patent), 4246
Mechanism of the processes of formation of lead--acid battery positive and negative plates, 4284
Method for producing battery terminal (Patent; side wall terminals), 3889
Method of preparing porous, active material for use in electrodes of secondary electrochemical cells (Patent application; carbonaceous matrices contain embedded active material), 3455
Method of treating storage battery electrodes (Patent), 4716
Microstructural control in lead alloys for storage battery application, 3783
Mixture containing powdered lead, lead oxide, and a pore-forming additive, for preparing electrodes for lead storage batteries (Patent), 3611
New storage battery promises longer life, 4398
Periodic observation of the same pin-point of battery plants with the scanning electron microscope, 3825
Phase composition of electrode pastes in lead storage batteries, 4148
Plate materials of the lead-acid cell. Part 3. Anodic oxidation of tetragonal PbO. Final report, 2899 (AD-664827)
Polarization of partly wetted porous electrodes, 4448
Polarization characteristics of alloyed lead anodes, 4359
Porous carbonaceous electrode structure and method for secondary electrochemical cell (Patent), 3311
Sheath for tubular storage battery electrodes and method for their production (Patent), 3399
Sheath for tubular storage battery electrodes and method for their production (Patent), 3319
Solution-precipitation mechanism in lead--acid cell electrode reactions (Electron photomicrogrphs of electrodes), 2299
Some aspects of gas recombination in lead--acid systems, 4043
Sponge lead electrodes for plumic acid battery (Russian Patent), 4821 (AD-763939)
Spongy lead electrodes for lead--acid battery, 2969 (AD-763939)
Storage battery plate having a core of aluminium (Patent) 3605
Storage battery with electrodes of nonwoven fabric of lead fibers (Patent), 3505
Storage-battery electrodes (Patent; preparation), 4694
Strain hardening of Pb-Sb alloys (1 to 7% Sb, <0.2% As), 3727
Study of lead-rich Pb-Cd-Sb alloys, 4263
Surface changes of lead electrodes caused by electrolysis, 4583
Surface conductivity of storage-battery lead powder, cadmium and nickel hydroxide in relation to their structural and electrochemical properties, 4497
Tests on battery terminal posts (Improved means of waterproofing terminals), 2846 (AD-494974)
Titanium electrodes for fuel cells and batteries containing acid electrolyte (Patent; acid-resistant coating), 4238
Transport processes in porous electrodes, 2229
Tubular electrode for electrical storage battery (Patent; construction), 3989
Tubular electrode plates for lead storage batteries (Patent), 3958
Tubular electrode plates for lead storage batteries (Patent), 3959
Tubular electrode plates for batteries (Patent; methods for preparation), 3636
Use of lead storage batteries at low temperatures (Effects of surfactants and inhibitors on electrode properties, -20 to -50°), 3844
Volume change in the active substances of a lead battery, 4120
Working surface of electrodes in a lead battery, 4693
X-ray study of active materials in lead-acid storage battery, 2506
ELECTRODES/LITHIUM-CHLORINE BATTERIES
Diffusion of lithium in lithium--zinc alloy, 2279
Halogen hydrates (Patent; halogen storage by means of hydrates), 3513
ELECTRODES/LITHIUM-COPPER CHLORIDE BATTERIES
Research and development of a high-energy nonaqueous battery. Quarterly progress report No. 7, 18 Sep-18 Dec 1964 (Electrolyte properties and electrode kinetics), 249 (AD-359290)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 4, 1 June-31 August 1968, 501 (AD-843741)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 6, 1 December 1968-28 February 1969, 514 (AD-853976)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 1, 1 Dec 1965-1 Mar 1966, 294 (AD-484014)
ELECTRODES/LITHIUM-SULFUR BATTERIES

$^{7}Li$ self diffusion in LiAl: an NMR study (Electrodes in Li-S battery system), 3467
Compartmented electrode structure (Patent application), 3452
Design and performance of Li-Al/iron sulfide cells for utility energy storage and electric vehicles (140 W/kg, 115 Wh/kg), 656 (CONF-760617-3)
Development of lithium/metal sulfide batteries at Argonne National Laboratory: summary report for 1974 (Li--Al/FeS and Li--Al/$FeS_2$), 606 (ANL-75-20)
Development of prototype lithium/sulfur cells for application to load-leveling devices in electric utilities (Li-Al/$FeS_2$), 1246
Development of uncharged Li-Al/FeS/sub x/ cells (Made from Al negative and Fe + $Li_2S$ positive), 892
Development status of lithium-silicon-iron sulfide load-leveling batteries ($Li_5Si$/LiCl-KCl/FeS or $FeS_2$, 400°C), 893
Development of lithium-metal sulfide batteries for load leveling. Progress report, 3262 (PB-253164)
Electrode structure for electrical energy storage device (Patent; alkali metal/chlorides/transition metal chalcogenides), 3334
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period July-December 1974, 605 (ANL-75-1)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-June 1975 (Li-Al/KCl-LiCl/Fe sulfide, 42 kWh), 607 (ANL-75-36)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, July-December 1975 (Li-Al/LiCl-KCl/FeS or $FeS_2$), 617 (ANL-76-9)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, April-June 1976 (Li-Al/LiCl-KCl/FeS or $FeS_2$, operate at 400 to 450 C; some work on Na/$FeS_2$ and $CaMg_2$/$CaCl_2$-$LiCl_2$KCl/FeS cells), 621 (ANL-76-81)
Lithium battery with inorganic electrolyte. Quarterly progress report No. 2, 1 Feb-30 Apr 1972, 415 (AD-746633)
Materials development in the lithium-aluminum/iron sulfide battery program at Argonne National Laboratory, 3152 (ANL-76-8)
Method of preparing electrodes with porous current collector structures and solid reactants for secondary electrochemical cells (Patent), 3657
Method of preparing electrodes with porous current collector structures and solid reactants for secondary electrochemical cells (Patent; Li-Al-Si/LiF-LiCl-KCl/$FeS_2$), 3457
Method of preparing porous, active material for use in electrodes of secondary electrochemical cells (Patent application; carbonaceous matrices contain embedded active material), 3455
Porous carbonaceous electrode structure and method for secondary electrochemical cell (Patent), 3311
Review of electrode designs and fabrication techniques for lithium-aluminium/iron sulfide cells, 3466

ELECTRODES/LITHIUM-WATER-AIR BATTERIES
Investigation of the kinetics of the Li/LiOH(aq) electrode: coulombic efficiency, electrode polarization, 3270 (UCID-17457)

ELECTRODES/METAL-GAS BATTERIES
Adsorption of cadmium ions from KOH solution at a platinum electrode (Cadmium--air batteries), 2963 (AD-757288)
Composite gas diffusion electrode for rechargeable metal-air cells (Patent), 4322
Continuous wet-proofing process for the cross sections of electrodes used in fuel cells and hybrid systems (Patent), 4256
Discussion of various types of test electrodes for the evaluation of catalysts for the electroreduction of oxygen, 4279
Electrochemical behavior of iron in alkaline sulphate solutions, 3903
Electrochemical application of amalgamated-nickel bodies, 4196
Electrode for a zinc--halogen battery (Patent; fabrication), 3689
Exploratory study of hydrogen/silver oxide batteries for space application. Final report, 711 (N-76-26702)
Forming an electrode of mixed catalyst powder (Patent), 4031
Gas-diffusion electrode for batteries (Patent; fabrication procedure), 3712
Gas diffusion electrodes for batteries (Patent; slurry of active C, resin, and solvent on support), 3691
Gas-diffusion electrode for batteries (Patent), 3714
Gas electrode (Patent; metal--air battery with gelled KOH electrolyte), 3577
Gas electrode (Patent), 3597
Halogen retention vent means for battery (Patent; rechargeable metal halide battery), 3979
Hybrid oxygen electrode for metal--air batteries, 4205
Hydrogen storage electrode (Patent), 4172
Impurity effects in high current density $Cl_2$ electrodes, 4541
Influence of the structure of silver-activated gas electrodes on the electrochemical performance of fuel cells and metal-air cells (Pore size effects), 4221
Iron electrodes for alkaline batteries (Fe/KOH/air; patent), 3687
Low temperature electrochemical systems. Semiannual technical report No. 2, 1 Jul-31 Dec 1972 (Tyco Labs., Inc., Waltham, MA), 2965 (AD-758171)
Metal--halogen batteries (Protection of Ti electrodes against corrosion), 3875
Oxygen electrode. I (Isotopic investigation of electrode mechanisms), 4731
Porous electrode structures for metal--air batteries (Methods for determining mass-transfer properties), 4281
Predicted energy densities for nickel-hydrogen and silver-hydrogen cells embodying metallic hydrides for hydrogen storage, 4061
Secondary cells based on reversible hydrogen transfer between electrodes capable of absorbing large volumes of hydrogen in interstitial solid solutions, 3832

ELECTRODES/METAL-METAL BATTERIES
Development of sintered zinc battery electrodes. Progress report (0.075 to 225 ma/cm²), 3060 (AD-878215)
Electric cell (Patent; Zn/$H_2NCONHSO_3H$/C, Ni/Zn, Fe/Zn, Cu/Zn), 1383
Investigations of high energy density electrochemical systems. Part 2 - Electrode behavior in organic solvent-Lewis acid electrolytes (Li/Cu or other), 2591
Lithium battery with inorganic electrolyte. Quarterly progress report No. 2, 1 Feb-30 Apr 1972 (Li/$LiBCl_4$/cathode = sulfur, metals, metal halides, metal oxides, metal sulfides), 415 (AD-746633)
Rechargeable mercury electrode (Hg|HgO electrode; patent) 3420

ELECTRODES/METAL-METAL OXIDE BATTERIES
Anodic behavior of a copper electrode in a lead--copper battery, 3802
High-rate batteries (Effects of plate porosity on efficiency; study included Zn, Cd, Pb, $Ag_2O$, and AgO), 2890 (AD-645942)
Mercury cell battery investigation. Final report, 16 Dec 1962-15 Dec 1963 (Zn/KOH/HgO), 252 (AD-430404)
Method for the fabrication of galvanic elements sealed against external and/or internal influences by a cup-shaped container with a top made of thermoplastic materials (Patent), 3735
Procedure for fabricating electrodes for galvanic elements and accumulators using porous frameworks which are made surface conductive or designed with conducting inserts (Patent), 3510
Rechargeable mercury electrode (Hg|HgO electrode; patent) 3420

ELECTRODES/METAL-NONMETAL BATTERIES
Bipolar electrode for secondary battery of high energy density (Patent), 3682
Cell element for electrical storage batteries (Patent; $PbO_2$/Zn), 3891
Compartmented electrode structure (Patent application), 3452
Development of lithium/sulfur cells for application to electric automobiles (Li/LiCl--KCl/$FeS_2$), 663 (CONF-740805-7)
Electric cell (Patent; Zn/$H_2NCONHSO_3H$/C, Ni/Zn, Fe/Zn, Cu/Zn), 1383
Electrode structure for electrical energy storage device (Patent; alkali metal/chlorides/transition metal chalcogenides), 3334
Fundamental battery studies. Quarterly report No. 4 (Pb cathode, graphite anode), 307 (AD-499471)
High-energy storage system (organic electrolyte). Quarterly report No. 3, 15 December 1965-15 March 1966 (Li/$CuF_2$), 340 (AD-634491)
Investigations of high energy density electrochemical systems. Part 3 - Development of the copper-fluoride-lithium couple for limited-cycle secondary batteries, 1540
Limited-cycle secondary battery using lithium anode. Final report (Li/$CuF_2$ and Li/$CoF_2$, sodium hexafluorophosphate in butyrolactone and propylene carbonate), 1721 (AD-601128)
Lithium battery with inorganic electrolyte. Quarterly progress report No. 2, 1 Feb-30 Apr 1972 (Li/$LiBCl_4$/cathode = sulfur, metals, metal halides, metal oxides, metal sulfides), 415 (AD-746633)
Lithium battery development. Annual report No. 3, 1 Apr 1970-31 Mar 1971, 397 (AD-726607)
Lithium-nickel fluoride secondary battery investigation. Final report, 27 April 1966-27 April 1968, 489 (AD-836554)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 2 (Li/$NiCl_2$), 314 (AD-601148)
Lithium-nickel halide secondary battery investigation. Final technical report, December 1963-December 1964 (Compatibility tests, recommendations for components), 2859 (AD-612492)
Method of preparing porous, active material for use in electrodes of secondary electrochemical cells (Patent application; carbonaceous matrices contain embedded active material), 3455
Porous carbonaceous electrode structure and method for secondary electrochemical cell (Patent), 3311
Research and development of a high-energy nonaqueous battery. Quarterly progress report No. 7, 18 Sep-18 Dec 1964 (Electrolyte properties and electrode

kinetics), 249 (AD-359290)
Secondary battery or cell with composite electrode (Patent; separate portions of electrode optimized for charging and discharging), 3365
Structural, thermodynamic, and kinetic properties of solid electrodes, 3148 (ANL-76-8)
ELECTRODES/NICKEL-CADMIUM BATTERIES
Alkaline battery (Patent; improvement consisting in welding their conductive plates to electrodes), 3493
Auxiliary electrode for alkaline nickel--cadmium storage battery sealed hermetically (Patent), 3858
Auxiliary electrode for charge control of sealed nickel-cadmium batteries. Quarterly progress report No. 1, 15 Jun-14 Sep 1964, 2800 (AD-456849)
Auxiliary electrode for charge control of sealed nickel-cadmium batteries. Quarterly progress report No. 2, 15 Sep-14 Dec 1964, 2801 (AD-458044)
Charge control of nickel-cadmium batteries. Auxiliary electrodes for overcharge and overdischarge control, 4623
Chemical analysis of nickel-cadmium electrodes, 4404
Controlled porosity and pore size substrates for nickel--cadmium cells, 4150
Development of nickel-alkaline batteries for aerospace lightweight secondary power. Final report, 1 Dec 1972-30 Jun 1975 (50Ah, 20Wh/lb), 587 (AD-A-022350)
Diffusion-bonded battery electrode plaques (Patent), 3552
Effect of electrode structures on capacity of sealed cells during cycling (Cd electrode), 4264
Effect of tetra-alkyl ammonium compounds on the performance of electrodes of sintered plate nickel-cadmium cells, 3417
Effects of radiation on nickel-cadmium battery electrodes. II. Midpoint report for 13 Mar-13 Jun 1964, 1725 (AD-604037)
Effects of foreign ions on nickel hydroxide and cadmium electrodes. Revised ed. ($CO_3^{--}$, $NO_3^-$, $Ag^+$, $Sb^+$, $Al^+$, $As^+$, $Li^+$), 2865 (AD-618255)
Effects of gamma radiation on the behavior of nickel and cadmium electrodes, 4454
Effects of foreign ions on nickel hydroxide and cadmium electrodes (87 references), 4619
Electrochemical engineering of battery systems. Final report, 10 Nov 1971--9 Nov 1972 (Use of scattered light to determine battery operation without disturbance), 3104 (AD-914248)
Electrochemistry of the nickel oxide electrode. V. Self-passivation effects in oxygen-evolution kinetics, 2954 (AD-744605)
Electrochemical power sources, 3112 (AD/A-001610)
Electrode supports for alkaline batteries (Patent; preparation by sintering), 3740
Electrode for battery (Patent), 3728
Electrode pack for storage batteries (Patent; flexible conductor/insulating-separator/conductor assembly), 3634
Electrode plate for alkaline batteries (Patent; fabrication method), 3713
Electrode plate of alkaline storage battery (Patent; preparation of Ni or Cd electrode), 3591
Electrodes for storage batteries (Patent; treatment with $H_2O_2$ for improved storage stability), 3607
Evaluation of auxiliary electrode materials, 4624
Failure mechanisms in sealed batteries. Semiannual technical report No. 5, 1 July-31 December 1968, 1887 (AD-851056)
Formation of electrodes for alkaline batteries (Patent), 3542
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Heat sterilizable and impact reistant Ni-Cd battery development. Quarterly report, 1 April-30 June 1969 (Electrochemistry), 3204 (N-69-40742)
High-temperature impregnation of sintered-metal alkaline-battery electrodes, 2962 (AD-754257)
High temperature impregnation of sintered metal bases of alkaline battery electrodes, 2953 (AD-744254)
Hydrating a battery plaque impregnated with a metal nitrate in a hydroxide solution and subsequent recovery of the nitrate by-product as crystals (Patent; preparation), 4249
Improvement of the production of cermet electrodes for nickel-cadmium storage batteries, 4289
Laboratory investigations and research toward the development of nickel-cadmium alkaline storage batteries. Quarterly progress report, 1 Oct-31 Dec 1947 (Electrode processes, quantity production of sintered plates), 299 (AD-491831)
Measurement of pore size and surface area of porous electrodes by nondestructive means, 4656
Method for making nickel and cadmium electrodes for batteries (Patent), 3375
Method of producing electrodes (Patent), 3400
Methods of producing electrodes for alkaline batteries (Patent; oxidative pretreatment of nickel plaque before impregnation), 3287
New technique for manufacturing electrodes by hot pressing, 1304
Nickel-base electrodes for alkaline batteries (Patent; preparation procedure), 3750
Nickel hydroxide battery electrode development. Final technical report, 1 Jan 1971-31 Jan 1972, 2958 (AD-746335)
Nickel or cadmium electrodes for alkaline cells (Patent; chemical preparation), 3588
Optimum structures for miniature Ni-Cd sealed cells and batteries. Report No. 4 (final), October 1967-November 1968 (Optimization of electrochemical aspects of cell design), 387 (AD-688520)
Oxidation of organic components in a hermetic storage battery and the stability of its characteristics (Accumulation of Cd on electrodes during cycling), 3815
Patent; preparation of Ni oxide, Ni hydroxide, and Fe oxide electrodes, 3762
Performance of 3rd electrode cells in OAO, 2377
Porous structure of a sintered nickel oxide electrode, 2960 (AD-748109)
Preparation of highly porous nickel substrates for sintered electrodes of storage batteries, 4428
Relationship of electrode structures and cell performance in sealed, sintered-type nickel--cadmium button cells during cycling, 2276
Scientific research on improving the characteristics of iron and nickel oxide electrodes, 3792
Sealed nickel-cadmium batteries, 4687
Sintered electrode plate for alkaline storage battery (Patent; fabrication), 3600
Sintered-metal nickel oxide electrode for an alkali storage cell, 2959 (AD-748047)
Sintered plaque nickel cadmium batteries for ground services, 2906 (AD-671685)
Storage-battery electrodes (Patent; preparation), 4694
Study of processes in the gas-tight nickel-cadmium accumulator, 2660
Surface conductivity of storage-battery lead powder, cadmium and nickel hydroxide in relation to their structural and electrochemical properties, 4497
ELECTRODES/NICKEL-HYDROGEN BATTERIES
Hydrogen storage electrode (Patent), 4172
Nickel electrode for alkaline batteries (Patent; preparation by polarizing Ni sponge in aqueous metal nitrate solution), 3619
Predicted energy densities for nickel-hydrogen and silver-hydrogen cells embodying metallic hydrides for hydrogen storage, 4061
Specific surface and activity of nickel hydrogen electrodes, 3818
ELECTRODES/NICKEL-ZINC BATTERIES
Advances in component technology for nickel-zinc cells (300 Ah, approaching 1000 deep cycles and $50/kWh; electrode testing in Ni/$H_2$ cells), 3464
Alkaline battery (Patent; improvement consisting in welding their conductive plates to electrodes), 3493
Apparatus and method for producing rechargeable zinc electrodes (Patent; Raney Ni or NiO aux. electrode for occasional additional discharge results in improved cycle life), 2199
Comparison of potential step and triangular voltage sweep methods of double layer capacitance measurements. III. Porous zinc electrodes, 2949 (AD-742219)
Development of improved zinc electrodes for secondary batteries. Final report, July 1968-July 1969, 3203 (N-69-40063)
Electrode plate for alkaline batteries (Patent; fabrication method), 3713
Electrode plate of alkaline storage battery (Patent; preparation of Ni or Cd electrode), 3591
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Final report, Dec 1965-Sep 1969, 1897 (AD-862506)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical report No. 5, 1 Dec 1966-1 Mar 1967 (Effects of cycling and of circulating the electrolyte), 2997 (AD-809279)
Electrodes for alkaline zinc storage batteries (G.D.R. patent), 3094 (AD-909496L)
Evolutionary developments in nickel-zinc cell technology, 2213
Formation of electrodes for alkaline batteries (Patent), 3542
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Hydrating a battery plaque impregnated with a metal nitrate in a hydroxide solution and subsequent recovery of the nitrate by-product as crystals (Patent; preparation), 4249
Method of producing electrodes (Patent), 3400
Methods of producing electrodes for alkaline batteries (Patent; oxidative pretreatment of nickel plaque before impregnation), 3287
Nickel-base electrodes for alkaline batteries (Patent; preparation procedure), 3750
Patent; preparation of Ni oxide, Ni hydroxide, and Fe oxide electrodes, 3762
Preparation of highly porous nickel substrates for sintered electrodes of storage batteries, 4428
Scientific research on improving the characteristics of iron and nickel oxide electrodes, 3792
Sealed nickel-zinc cells (Nonsintered Ni electrodes, inorganic separators), 1346
Sintered electrode plate for alkaline storage battery (Patent; fabrication), 3600
Storage-battery electrodes (Patent; preparation), 4694
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730

Zinc electrode shape change in secondary cells, 4269
ELECTRODES/PRIMARY BATTERIES
Corrosion of pure and amalgamated zinc in concentrated alkali hydroxide solutions, 3905
Method for the fabrication of galvanic elements sealed against external and/or internal influences by a cup-shaped container with a top made of thermoplastic materials (Patent), 3735
ELECTRODES/SILVER-CADMIUM BATTERIES
Controlled potential reactions of cadmium and silver in alkaline solution, 2645
Design, fabrication of prototypes and testing of vented, rechargeable silver-cadmium cells. Interim quarterly report (12 Ah, development of pasted Ag and pressed Cd and CdO electrodes), 2883 (AD-640387)
Diffusion-bonded battery electrode plaques (Patent), 3552
Dissolution and passivation of metals in alkaline solutions in the presence of surfactants, 4137
Effect of cationic impurities on the silver-silver oxide electrode: the silver-copper-iron-palladium system, 1996 (AD-921643)
Electrode plate for alkaline batteries (Patent; fabrication method), 3713
Electrode plate of alkaline storage battery (Patent; preparation of Ni or Cd electrode), 3591
Formation of electrodes for alkaline batteries (Patent), 3542
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
High-rate batteries (Effects of plate porosity on efficiency; study included Zn, Cd, Pb, $Ag_2O$, and AgO), 2890 (AD-645942)
High-rate battery electrodes (Performance of plates produced by electrolytic reduction), 4550
Method of producing electrodes (Patent), 3400
Methods of producing electrodes for alkaline batteries (Patent; oxidative pretreatment of nickel plaque before impregnation), 3287
Microstructure of sintered silver electrodes. IV. Formation of AgO during charges (KOH electrolyte), 2938 (AD-728894)
Oxidation of organic components in a hermetic storage battery and the stability of its characteristics (Accumulation of Cd on electrodes during cycling), 3815
Self-discharge of silver--cadmium storage batteries (Especially during storage at elevated temperature), 2221
Studies on the stability of oxides of silver, 4626
ELECTRODES/SILVER-ZINC BATTERIES
Alkaline battery (Patent; improvement consisting in welding their conductive plates to electrodes), 3493
Applied research investigation of sealed silver-zinc batteries (Study of ZnO/Ag ratio and electrolyte composition), 316 (AD-603023)
Comparison of potential step and triangular voltage sweep methods of double layer capacitance measurements. III. Porous zinc electrodes, 2949 (AD-742219)
Development of improved zinc electrodes for secondary batteries. Final report, July 1968-July 1969, 3203 (N-69-40063)
Diffusion-bonded battery electrode plaques (Patent), 3552
Dissolution and passivation of metals in alkaline solutions in the presence of surfactants, 4137
Distribution of current density on electrodes of silver-zinc storage battery during discharge, 3374
Dry process electrodes for Zn-AgO batteries, 4627
Effect of cationic impurities on the silver-silver oxide electrode: the silver-copper-iron-palladium system, 1996 (AD-921643)
Effects of KOH concentration on morphology and electrical characteristics of sintered silver electrodes, 4203
Effects of silver complex ion on the electrode reaction of silver--silver oxide systems in alkaline solution, 3092 (AD-909331L)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Final report, Dec 1965-Sep 1969, 1897 (AD-862506)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 7, 1 Jun-1 Sep 1967 (Study of cathodic Zn processes at 50°C), 3008 (AD-820273)
Electrode assembly for bipolar battery (Patent application), 3470
Electrodes for alkaline zinc storage batteries (G.D.R. patent), 3094 (AD-909496L)
Failure mechanisms in sealed batteries. Semiannual technical report No. 5, 1 July-31 December 1968, 1887 (AD-851056)
Formation of electrodes for alkaline batteries (Patent), 3542
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Heat sterilizable battery, 1489
High-rate batteries (Effects of plate porosity on efficiency; study included Zn, Cd, Pb, $Ag_2O$, and AgO), 2890 (AD-645942)
High-rate battery electrodes (Performance of plates produced by electrolytic reduction), 4550
Investigation of the transport and reaction process occurring within silver oxide-zinc batteries. Quarterly technical progress report No. 1, 1 Jan-1 Apr 1965, 2802 (AD-461102)
Investigation of electrode materials for alkaline batteries. Quarterly report, 3211 (N-70--32647)
Long-life stable zinc electrode for alkaline secondary battery. Quarterly report No. 2, 1 March-31 May 1967, 3015 (AD-824719)
Method of producing electrodes (Patent), 3400
Methods of producing electrodes for alkaline batteries (Patent; oxidative pretreatment of nickel plaque before impregnation), 3287
Nonleaking battery terminals (KOH electrolytes), 4268
Sealed zinc--silver oxide batteries. I (Development studies on electrodes and separators), 1530
Selected articles, 4689 (AD-655021)
Self-discharge of silver-zinc storage batteries, 2433
Silver batteries. 2. Improved Zn electrodes for secondary batteries, 4590
Silver-zinc electrodes and separator research. Quarterly technical progress report No. 6, 1 Oct 1967-1 Jan 1968 (Phenolic membrane with methacrylic acid graft), 3017 (AD-826328)
Silver-zinc electrodes and separator research, 3031 (AD-839883)
Silver-zinc electrodes and separator research. Quarterly technical progress report No. 10, 1 Oct 1968-1 Jan 1969, 3041 (AD-847742)
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730
Studies on the stability of oxides of silver, 4626
Zinc electrode shape change in secondary cells, 4269
ELECTRODES/SODIUM-SULFUR BATTERIES
Ford/ERDA sodium-sulfur battery development, Phase I. Final report, June 15, 1975-March 31, 1976, 752 (TID-27055)
Method of preparing electrodes with porous current collector structures and solid reactants for secondary electrochemical cells (Patent), 3657
Performance of shaped graphite electrodes in sodium sulfur cells, 3160 (ANL-76-8)
Porous carbonaceous electrode structure and method for secondary electrochemical cell (Patent), 3311
Research on electrodes and electrolyte for the Ford sodium--sulfur battery. Quarterly report, 30 Jun--30 Sep 1973, 3217 (N-74-19713)
Research on electrodes and electrolyte for the Ford sodium--sulfur battery. Quarterly report, 1 Jan-31 Mar 1974, 3251 (PB-234561)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Quarterly report covering the period January 1, 1974 to March 31, 19754, 723 (PB-234561)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Quarterly report covering the period January 1, 1974 to March 31, 19754, 3252 (PB-234561)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Quarterly report, June 30, 1973-September 30, 1973, 3247 (NSF/RA/N-73-109)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Annual report, 30 June 1973-29 June 1974, 3253 (PB-235484)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Annual report, 30 Jun 1974-29 Jun 1975, 3255 (PB-244289)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Semiannual report, 30 Jun-30 Dec 1975, 3261 (PB-252827)
Research on electrodes and electrolyte for Ford sodium-sulfur battery. Appendix a. List of research contributors. Report for 30 Jun 1974-29 Jun 1975, 3256 (PB-244290)
Secondary battery or cell with composite electrode (Patent; separate portions of electrode optimized for charging and discharging), 3365
Sintering processes and heat treatment schedules for conductive, lithia-stabilized β''-$al_2o_3$, 3330
ELECTRODES/WATERPROOFING
Continuous wet-proofing process for the cross sections of electrodes used in fuel cells and hybrid systems (Patent), 4256
ELECTRODES/ZINC-AIR BATTERIES
Development of improved zinc electrodes for secondary batteries. Final report, July 1968-July 1969, 3203 (N-69-40063)
Electrodes for alkaline zinc storage batteries (G.D.R. patent), 3094 (AD-909496L)
Low temperature electrochemical systems. Semiannual technical report No. 2, 1 Jul-31 Dec 1972 (Tyco Labs., Inc., Waltham, MA), 2965 (AD-758171)
New mechanically rechargeable zinc/air battery design. Interim technical report No. 2, 1 Nov 1971-1 Feb 1972, 1816 (AD-748455)
Oxygen reduction in alkaline solutions at porous nickel electrodes which have been activated with several precious metals, 3088 (AD-907721L)
Secondary zinc-oxygen batteries (6v, 25 A-hr; selection of materials), 670 (ECOM-0272-F-72)
Study of Ag--Ni catalyzed bifunctional and Ag-amalgam-catalyzed monofunctional O electrodes for zinc--oxygen batteries, 3097 (AD-911460L)
Use of third electrodes in a secondary zinc-air battery, 4390
Zinc-air generators, 4477
Zinc electrode investigation. Quarterly technical

progress report No. 7, 1 Jan-1 Apr 1966, 2835 (AD-480735)
Zinc-oxygen batteries (Poly(tetrafluoroethylene) (I)/Ag or poly(phenylene oxide)/Ag electrodes), 1370
ELECTRODES/ZINC-CHLORINE BATTERIES
Batteries comprising vented electrodes and method of using same (Patent), 3506
Chlorine electrodes in the zinc-chlorine battery system (Up to 60 kW-hr), 4207
Development of improved zinc electrodes for secondary batteries. Final report, July 1968-July 1969, 3203 (N-69-40063)
Diffusion of lithium in lithium--zinc alloy, 2279
Electrode for a zinc--halogen battery (Patent; fabrication), 3689
Electrodes for alkaline zinc storage batteries (G.D.R. patent), 3094 (AD-909496L)
Halogen hydrates (Patent; halogen storage by means of hydrates), 3513
ELECTRODES/ZINC-MANGANESE BATTERIES
Comparison of potential step and triangular voltage sweep methods of double layer capacitance measurements. III. Porous zinc electrodes, 2949 (AD-742219)
Development of improved zinc electrodes for secondary batteries. Final report, July 1968-July 1969, 3203 (N-69-40063)
Electrodes for alkaline zinc storage batteries (G.D.R. patent), 3094 (AD-909496L)
Zinc electrode shape change in secondary cells, 4269
ELECTROLYSIS/MEETINGS
Energy workshop on electrochemistry. A report on discussion of energy-related basic research in electrochemistry, June 27-28, 1974. Final report, 119 (PB-240132)
ELECTROLYTES/ALCOHOL FUEL CELLS
Properties of LiCl and $(CH_3)_4NCl$ solutions in water--methanol mixtures, 4174
ELECTROLYTES/CHEMICAL ANALYSIS
Methods for chemical analysis of thermal battery components, 3189 (GEPP-299)
ELECTROLYTES/CRYSTAL STRUCTURE
Neutron scattering studies of solid electrolytes, 3165 (BNL-21367)
ELECTROLYTES/ELECTRIC BATTERIES
Alumina solid electrolyte for secondary batteries (Patent; fabrication), 3736
Apparatus for indicating density threshold value and its use with storage batteries (Patent), 3947
Basic and applied research in materials. Annual technical report, 1 Jun 1975-30 Jun 1976, 3138 (AD-A-034074)
Basic research on ceramic materials for energy storage and conversion systems. Progress report, April 1, 1975-November 30, 1975, 667 (COO-2564-1)
Basic research on ceramic materials for energy storage and conversion systems. Progress report, December 1, 1975-November 30, 1976 ($Tl_2ZnI_2$, $In_4CdI_8$, $Tl_4CdI_6$, and $In_2ZnI_4$; solid electrolytes and electrodes), 3182 (COO-2564-2)
Battery additive hearings (Testimony concerning AD-X2), 4760
Battery with negative electrode of alkali metal (Li anode with $LiClO_4$ electrolyte in mixed solvent), 4006
Battery with alkaline electrolyte (Wetting prevented by covering with polyaminoamide;patent), 1043
Behavior of dimethyl sulfite as potential nonaqueous battery solvent, 4491
Beneficial effect of lithiated electrolyte on iron battery electrodes, 4632
Conductivity of beta-alumina and its dependence on sodium and magnesium content, 4225
Considerations in the use of electrical measurement techniques to evaluate potential new electrolytes and mixed conductors (Emphasis on interpretation of frequency-dependent ac measurements), 3162 (ANL-76-8)
Determination of hydroxide and carbonate contents of alkaline electrolytes containing zinc, 3245 (NASA-TN-D-8007)
Determination of hydroxide and carbonate contents of alkaline electrolytes containing zinc, 2086 (N-75-24866)
Determination of the electronic transference numbers of solid electrolytes, 4441
Development program for solid electrolyte batteries. Interim report, 729 (PB-248326)
Electrical conductivity measurements in anhydrous hydrogen fluoride (LiF, NaF, $KF.2H_2O$, $SrF_2$, $KNO_3$), 4339
Electrical conductivity of electrolytes used in alkaline storage cells (dc measuring method, -40 to +50°), 4364
Electrochemical power sources. Final technical report, 18 September 1968-31 January 1974, 3113 (AD/A-001610)
Electrochemical generator with a zinc electrode (Patent), 3888
Electrochemical studies of mass transport in high-temperature electrolytes (Chromopotentiometric determination of interdiffusion coefficients for $BeF_2$-LiF and NaCl-$AlCl_3$ melts), 3174 (CONF-760312-1)
Electrochemical vehicle power plants, 5254
Electrochemical behavior of $H_2O$ in nonaqueous electrolyte (Propylene carbonate-$LiClO_4$), 2503
Electrochemical characterization of nonaqueous systems for secondary battery application (1000 electrode-organic electrolyte combinations), 3241 (NASA-CR-1434)
Electrochemical characterization of nonaqueous systems for secondary battery application. Quarterly report, February-April 1968, 3196 (N-68-28554)
Electrochemical studies of mass transport in high temperature electrolytes (Molten $BeF_2$-LiF mixtures), 3342
Electrode reactions in molten sodium nitrate-barium nitrate eutectic at 350 degrees C, 2927 (AD-703842)
Electroinitiated polymerization of tetrahydrofuran, 3939
Electrolyte for high-temperature sodium source of electric energy (Patent; NaOH + NaI and/or NaBr), 3511
Energetics of the organic electrodes of accumulators, 3659
Fabrication and inspection procedures for gas generators, 950 cc and 8000 cc (instantaneous and delay) (For displacing electrolytes in batteries), 2815 (AD-469277)
Feasibility of electrolyte regeneration in Al batteries (80 Ah = 3x amount without regeneration), 1551
Gaseous electrolytes for batteries and fuel cells. Final report, 21 August 1964-31 July 1967, 3199 (N-69-29708)
Growth of monocrystals of the gallium analog of β''-$Al_2O_3$ by $Na_2O$ evaporation, 3314
Hexamethonium--silver iodide reversible cell, 1295
High conductivity cuprous halide-metal halide systems (AC conductivity measurements), 3291
High-energy system (organic electrolyte). Quarterly report No. 1, 15 June-15 September 1965, 334 (AD-628961)
High energy batteries. Final report, 472 (AD-823304)
Immobilizing agents for electrolyte solutions in batteries (Patent; keolin), 4009
Improvements to multicelled electric batteries (Patent; automatic electrolyte level control), 3533
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 11, 1 Jun-1 Sep 1968 (Polarographic study of zincate solutions), 3034 (AD-841829)
Investigations on a high conductivity solid electrolyte system, RbCl + CuCl, 3292
Ionic conduction in beta-alumina. Interim technical report No. 6, 8 Feb-8 Aug 1969, 2926 (AD-702938)
Iron--alkaline battery (Patent; effects of EDTA addition to KOH electrolyte on utilization coefficient of anode-active mass), 3639
Iron--alkali batteries (Patent; effect of tartrate addition on utilization coefficient of Fe anode-active mass), 3640
Lead-nickel glass of controlled chemical durability for storage battery use (Adds Ni ions to electrolyte to decrease end-of-charge voltage), 4814
Lithium battery electrolyte additive and method of improving discharge rate (Patent; hexamethyl phosphoramide added to lithium perchlorate-propylene carbonate electrolyte), 4190
Lithium battery development. Annual report No. 3, 1 April 1970-31 March 1971, 2935 (AD-726607)
Lithium ion conductive electrolyte composition (Patent; $Li_2SO_4$-LiOH), 3300 (SAND-77-6008)
Lithium ion conductive electrolyte composition (Patent), 3303 (SAND-77-6009)
Method of measuring conductivity of electrolytes by induced currents (Electrolyte placed in alternating or rotating magnetic field), 4804
Migrational polarization in high-current density molten salt electrochemical devices, 658 (CONF-770531-6)
Mixed solvents for high and low temperature organic electrolyte batteries (Patent), 4149
Molten-salt electrolytes-transport properties, 2540
Neutron scattering studies of solid electrolytes, 3165 (BNL-21367)
New solid conductors of $Na^+$ and $K^+$ ions ($NaTaWO_6$; $NaTa_2O_5F$; $NaSbO_3$; Na and K niobates), 3433
Nonaqueous electrolyte systems: ionic transport in nonaqueous media. Final report (For development of new battery and fuel cell systems), 2948 (AD-741804)
Nonaqueous electrolyte systems: ionic transport in nonaqueous media. Interim technical report No. 7, 2931 (AD-714680)
Organic and molten salt electrolytes (Discussion of present problems with these electrolytes), 4533
Performance characteristics of solid electrolytes under steady-state conditions (Yttria-doped thoria, 1600°C), 3111 (AD/A-001572)
Phase equilibrium studies of lithium halide-containing electrolytes, 1440
Power sources conference (22nd annual) held 14-16 May 1968. Proceedings, 41 (AD-696427)
Preparation of highly conductive β-alumina and electrochemical measurements, 4214
Properties of LiCl and $(CH_3)_4NCl$ solutions in water--methanol mixtures, 4174
Properties of some mixed organic electrolyte solutions and their effects on the anodic performances of Mg electrodes (Polarization characteristics of Mg anodes), 3461
Recent progress in the development of solid electrolyte batteries, 4373
Rechargeable galvanic cell (Patent), 1229
Rechargeable galvanic cell and electrolyte therefor-II (Patent; Zn anode, aqueous electrolyte containing soluble Zn and quaternary ammonium compound), 4377

Reduction of the silver oxide electrode in CsOH solutions (Comparison with KOH), 4003
Role of molten salts in the energy problems, 4065
Sealed alkaline batteries (Patent; addition of LiOH and NaOH to KOH), 3660
Secondary alkaline batteries (Patent; Zn anode, addition of polycationic polymers enables charging without Zn deposition), 1000
Solid electrolyte battery materials. Technical report, 2977 (AD-782365)
Solid electrolyte composition for secondary battery (NaI-$-(CH_2)_6N_4CH_3I$ for Na batteries; patent), 3920
Solid electrolyte (Patent; β-alumina, fabrication), 3697
Solid electrolyte (Patent; improved electrolyte), 3698
Solid electrolytes for batteries, 4287
Solid electrolyte element (Patent), 3437
Solid electrolytes: alkali-ion transport in skeleton structures. Semiannual technical summary report, 1 Jan-30 Jun 1976 ($Na_3Zr_2Si_2PO_{12}$ and $K_{1.9}Mg_{0.95}Si_{1.05}O_4$), 3136 (AD-A-032342)
Solid-state ionics - solids with high ionic conductivity in the systems silver iodide--silver oxyacid salts, 4242
Studies of reserve batteries. Semiannual report (Physical properties at -40°F), 3001 (AD-813774)
Study, selection, and preparation of solid cationic conductors. Final report, 13 November 1972-12 November 1973, 3219 (N-74-26498)
Study of the composition of nonaqueous solutions of potential use in high energy density batteries. Final report, 1 Sep 1966-31 Aug 1969 (Organic batteries), 2925 (AD-699589)
Substitution of silver by various metal ions in modified agi solid electrolytes, 3984
Sulphate based solid electrolytes with some applications (Performance of $Mg/Li_{1.72}Mg_{0.14}SO_4/MnO_2$ cell), 3835
Technical comment on the behavior of electrolyte in a wet-cell electrochemical battery in free fall, 1626 (AD-429357)
Tellurium chloride thermoregenerative galvanic cell. Final report, 1 Mar 1968-28 Feb 1969 (Development problems), 582 (AD-A-016770)
Thermodynamic properties of solid electrolyte $RbAg_4I_5$, 4465
Water-absorbing porous materials for battery-electrolyte support (Patent), 3892
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627

ELECTROLYTES/ELECTROCHEMICAL CELLS
Application of oxidic and metallic protective layers on the solid electrolyte Th/sub 0.8/Y/sub 0.2/O/sub 1.9/, 3274 (ZfK-293)
Developments in application of oxygen-ion conducting solid electrolytes, 4458
Influence of the chemical reaction of the solid electrolyte material with liquid sodium on the electromotive force of solid electrolyte cells, 3273 (ZfK-292)
Migrational polarization in high-current density molten salt electrochemical devices, 658 (CONF-770531-6)
Power cell (Patent, Ag/AgI/α-TeI/Te), 834
Preparation of vacuum-deposited films on rubidium silver iodide, 4188

ELECTROLYTES/FUEL CELLS
Basic research on ceramic materials for energy storage and conversion systems. Progress report, April 1, 1975-November 30, 1975, 667 (COO-2564-1)
Basic research on ceramic materials for energy storage and conversion systems. Progress report, December 1, 1975-November 30, 1976 ($Tl_2ZnI_2$, $In_4CdI_6$, $Tl_4CdI_6$, and $In_2ZnI_4$; solid electrolytes and electrodes), 3182 (COO-2564-2)
Considerations in the use of electrical measurement techniques to evaluate potential new electrolytes and mixed conductors (Emphasis on interpretation of frequency-dependent ac measurements), 3162 (ANL-76-8)
Energetics of the organic electrodes of accumulators, 3659
Gaseous electrolytes for batteries and fuel cells. Final report, 21 August 1964-31 July 1967, 3199 (N-69-29708)
Ionic superconductors (review of applications), 3776
Nonaqueous electrolyte systems: ionic transport in nonaqueous media. Final report (For development of new battery and fuel cell systems), 2948 (AD-741804)
Nonaqueous electrolyte systems: ionic transport in nonaqueous media. Interim technical report No. 7, 2931 (AD-714680)
Solid electrolytes (67 references), 4220

ELECTROLYTES/HIGH-TEMPERATURE FUEL CELLS
Developments in application of oxygen-ion conducting solid electrolytes, 4458
Electrochemistry of molten salts (312 references), 4290
Migrational polarization in high-current density molten salt electrochemical devices, 658 (CONF-770531-6)

ELECTROLYTES/IRON-NICKEL BATTERIES
Beneficial effect of lithiated electrolyte on iron battery electrodes, 4632
Iron--alkaline battery (Patent; effects of EDTA addition to KOH electrolyte on utilization coefficient of anode-active mass), 3639
Iron--alkali batteries (Patent; effect of tartrate addition on utilization coefficient of Fe anode-active mass), 3640

ELECTROLYTES/LEAD-ACID BATTERIES
Acid dispensers for dry charged batteries (Patent), 3521
Apparatus for determining the density of electrolyte in lead storage batteries (Patent), 3922
Automatic registration of electrolyte specific gravity in lead-acid batteries, 4566
Battery electrolyte ($CuSO_4$ X $5H_2O$, $Al_2(SO_4)_3$ X $18H_2O$, $H_2SO_4$), 4014
Colloidal electrolyte lead storage batteries (Patent), 3662
Densimeter for liquids especially battery electrolytes (Patent), 3982
Diffusion processes in lead storage cells, 3793
Gelled acid water-activated lead-acid batteries, 1345
Immobilized electrolyte feasibility study. Final report, 25 June-25 December 1965, 2915 (AD-678594)
Immobilized battery electrolyte (Patent), 3988
Indicator in use with a lead storage battery for indicating the overdischarge of the same and the lowered level of the electrolyte therein (Patent), 3395
Investigation of the electrical conductivity and structural--rheological properties of gellike sulfuric acid electrolyte, 3787
Iron contamination of storage batteries (100 Ah, 15 plates, 6 V), 4759
Lead--acid battery. 4. Addition of cadmium sulfate and zinc sulfate to lead--acid battery electrolyte, 2300
Lead-calcium sulfuric acid batteries and their application to Minuteman. Technical report, Nov 1964-Jun 1965, 1685 (AD-471769)
Lead storage battery (Patent; improved results with controlled electrolyte density), 3652
Liquid electrolyte for storage batteries (Patent; equal amounts of $NH_3$, $H_2SO_4$, and $H_2O$; performance), 3706
Maintenance-free lead secondary cell (Patent; recommends relative electrode weights and electrolyte additives), 3383
Measuring acid density in storage batteries (Patent), 3500
New water-activated lead-acid battery concept (Gel electrolyte), 4294
Progress report of the Technical Division Gas Service, A. .F., for the week ending June 8, 1918, 2847 (AD-498814)
Progress report of the Technical Division Gas Service, A. .F., for the week ending June 15, 1918 ($H_2SO_4$ testing), 2848 (AD-498820)
Reclaiming electrolyte for reuse in batteries (Patent), 3931
Refractometric sensing of $H_2SO_4$ specific gravity in lead-acid cell operation, 2896 (AD-658747)
Restoring battery electrolyte, 4762
Some aspects of charge and discharge processes in lead-acid storage batteries, 4755
Stabilization of boron phosphate sulfuric acid gels (Patent), 4163
Storage battery for vehicles (Patent; colored float indicates level or specific gravity of electrolyte), 3551
Sulphuric acid and water for lead storage batteries (Physical and chemical characteristics, analysis, purification), 4811
Techniques for the use of phosphoric acid additive in the lead-calcium grid battery. Progress report No. 3, 2799 (AD-456245)
Thermodynamic properties of the nickel-cadmium alkaline and lead-lead oxide acid cells (Effect of electrolyte composition and concentration), 4503
Water activated lead acid storage battery cell having dry discharged electrodes (Patent), 1177
Water-activated dry-charged lead-acid batteries, 4414

ELECTROLYTES/LITHIUM-CHLORINE BATTERIES
Battery with negative electrode of alkali metal (Li anode with $LiClO_4$ electrolyte in mixed solvent), 4006

ELECTROLYTES/LITHIUM-COPPER CHLORIDE BATTERIES
Research and development of a high-energy nonaqueous battery. Quarterly progress report No. 7, 18 Sep-18 Dec 1964 (Electrolyte properties and electrode kinetics), 249 (AD-359290)

ELECTROLYTES/LITHIUM-SULFUR BATTERIES
Battery with negative electrode of alkali metal (Li anode with $LiClO_4$ electrolyte in mixed solvent), 4006
Cell is used as energy source of wrist-watches (Patent), 3621
Ceramics in advanced batteries, 3170 (CONF-751194-)
Composition gradient during electrolysis in mixtures analogous to molten salt battery electrolytes, 2045 (CONF-770814-5)

ELECTROLYTES/METAL-GAS BATTERIES
Anodes for refuelable magnesium-air batteries, 4443
Carbon air electrode with regenerative short time overload capacity. II. Effects of duroquinone and 2-amino-1,4-naphthoquinone (Concentrated KOH), 3842
Secondary battery with indate ion in the electrolyte (Patent), 1330
Studies on air battery with caustic alkaline electrolyte, 4393

ELECTROLYTES/METAL-METAL BATTERIES
Batteries with solid ion exchange electrolytes. I, 1578
Factors influencing the lifetime of pure β-alumina electrolyte (Na/S and Na/Na cells, charge transfer of 1700 A-hr/$cm^2$), 3779
Molten salt batteries (Patent; Ca/LiCl--KCl ($Na_2CO_3$)/Ni,

small voltage fluctuation), 1038
Molten salt batteries (Patent; Ca/LiCl--KCl($K_2SO_4$)/Ni, small voltage fluctuation), 1039
Solid electrolyte sintered matter such as impermeable β-alumina (Chemical preparation for alkali metal--Na batteries), 3974
Thin-film rechargeable solid-electrolyte batteries (Ag/AgI/Pt, operable at 100°C), 1521
ELECTROLYTES/METAL-METAL OXIDE BATTERIES
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 7, 31 May-31 Aug 1949 (Cd/Pb oxides), 284 (AD-471979)
Lead dioxide-zinc rechargeable-type cell and battery and electrolyte therefor (Patent), 863
Non-aqueous battery system (Lewis acid-type solute in nitrobenzene or substitutions; patent), 3381
ELECTROLYTES/METAL-NONMETAL BATTERIES
Cell is used as energy source of wrist-watches (Patent), 3621
Composition of nonaqueous solutions of potential use in high energy density batteries. Final report, 15 Nov 1969-14 Nov 1972 (Solubility equilibria of $CuF_2$, $NiF_2$, $ZnF_2$, $CdF_2$, $AgF_2$), 432 (AD-763140)
Electrochemistry of molten salts (312 references), 4290
Electrolytes for non-aqueous batteries (Li/$LiClO_4$, propylene carbonate/$CuF_2$: electrolytic conductance), 4584
Galvanic cell with solid fluoride ion-conductive electrolyte (Patent; M/sub n/Pb/sub 1-n/F/sub 2-n/, where M is K or Rb, Pb is lead or lead alloy, F is fluorine, 300°C), 3398
High-energy system (organic electrolyte). Final report, 15 June 1965-14 June 1966 (Li/$CuF_2$ with electrolyte of $LiClO_4$ and propylene carbonate, dimethyl carbonate, or dimethyl sulfite), 349 (AD-639709)
High-energy system (organic electrolyte). Quarterly report No. 3, 15 December 1966-15 March 1967 (Li/$CuF_2$, study of tetramethylurea and 1,2-propylene glycol sulfite), 352 (AD-653785)
High-energy system (organic electrolyte). (Evaluation of new electrolytes), 2892 (AD-648920)
High temperature rechargeable cells with doped $CaF_2$ as a solid electrolyte (Ca/$CaF_2$/$CuF_2$, 3.37 V at 450°C), 615 (ANL-76-8)
Improvements of electrolyte and seal technology for sodium-sulfur and sodium antimony trichloride load leveling batteries. Final report, 3187 (EPRI-EM-413(6-77))
Investigations of high energy density electrochemical systems. Part 3 - Development of the copper-fluoride-lithium couple for limited-cycle secondary batteries, 1540
Ionic conductivity of solid and liquid $LiAlCl_4$, 3340
Lithium-anode limited cycle battery investigation. Annual report, Feb-Dec 1965 (Development of Li/$CuF_2$ and Li/$CoF_3$ batteries), 290 (AD-481543)
Lithium battery development. Annual report No. 3, 1 Apr 1970-31 Mar 1971, 397 (AD-726607)
Lithium battery research. Annual report No. 2, 1 April 1969-31 March 1970 (Li/$CdCl_2$, Li/$CuF_2$, Li/AgF with propylene carbonate), 526 (AD-870688)
Lithium battery research. Annual report No. 1, 1 April 1968-31 March 1969 (Li/halide, most promising were AgF, $CuF_2$ and $CdCl_2$), 515 (AD-854368)
Lithium cells based on silver salts as cathodes (Performances of $Ag_2CrO_4$, $Ag_3PO_4$, and $AgIO_3$ cathodes with different electrolytes), 3362
Lithium/chalcogen secondary cells for components in electric vehicular-propulsion generating systems. Interim technical summary report No. 3, May 23-November 22, 1970 (Se-Tl and S-Tl mixtures, fabrication of paste electrolytes), 2035 (ANL-7777)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 3, 27 October 1966-27 January 1967, 2995 (AD-808839)
Lithium-nickel fluoride secondary battery investigation. Supplement to quarterly technical progress report No. 3 (Propylene carbonate), 3004 (AD-816378)
Lithium-nickel fluoride secondary battery investigation. Final report, 27 April 1966-27 April 1968, 489 (AD-836554)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 2, 27 July-27 October 1966 ($NiF_2$ preparation; physical properties of electrolyte), 2986 (AD-803529)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 6, 27 July-27 October 1967 (Electrode porosities), 3013 (AD-824659)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 2 (Li/$NiCl_2$), 314 (AD-601148)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 3 for period ending 15 Sep 1965 (Li/$NiCl_2$, doped electrodes), 2824 (AD-474394)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 1, 27 Apr-27 Jul 1966, 2841 (AD-487828)
Lithium-nickel halide secondary battery investigation. Final technical report, December 1963-December 1964 (Compatibility tests, recommendations for components), 2859 (AD-612492)
Method for calculating the conductivity of simulated silver chloride-magnesium battery electrolytes (sea water-$MgCl_2$ solutions), 3052 (AD-860591)
Non-aqueous battery system (Lewis acid-type solute in nitrobenzene or substitutions; patent), 3381
Nonaqueous electrolyte systems. Interim report No. 2 (Li/Cu fluoride, AgCl, I, or potassium persulfate with $LiClO_4$ electrolyte in tetramethylene sulfoxide or dimethyl sulfite solvent), 478 (AD-826554)
Nonaqueous electrolyte studies for high energy batteries. Final report, 14 July 1966-13 Oct 1968 (Li/graphite in dimethyl sulfite and propylene carbonate solutions), 392 (AD-701411)
Properties of a solid electrolyte from β-alumina synthesized by a gas-flame method, 4098
Research and development of a high-energy nonaqueous battery. Quarterly technical report No. 3, 18 Sep-18 Dec 1963 (Li/$CuF_2$), 244 (AD-347494)
Research and development of a high-energy nonaqueous battery. Quarterly progress report No. 7, 18 Sep-18 Dec 1964 (Electrolyte properties and electrode kinetics), 249 (AD-359290)
Research for preparation of cation-conducting solids by high-pressure synthesis and other methods. Final report, 1 Aug 1973-28 Feb 1975, 3226 (N-75-24504)
Solid electrolytes (67 references), 4220
Solid sulfate electrolyte for batteries (Patent; Ag/Li, Na, Ag, Mg, Zn, or Ca sulfate/I), 3885
Thermodynamics of lithium and potassium iodide in anhydrous propylene carbonate, 4389
ELECTROLYTES/NICKEL-CADMIUM BATTERIES
Action of ultrasound on nickel--cadmium storage batteries, 2230
Effect of carbonated electrolyte on the performance of sintered plate nickel-cadmium cells, 1733 (AD-614104)
Effect of carbonate on the performance of sealed nickel-cadmium cells, 2418
Electrochemical power sources, 3112 (AD/A-001610)
Electrolyte carbonate contamination versus electrical performance of sintered plate nickel-cadmium aircraft batteries. Summary report, April 1965-January 1966, 2992 (AD-806812)
Electrolyte concentration changes during operation of the nickel-cadmium cell (6-, 12-, and 20-Ah cells), 3230 (N-75-33497)
Electrophoretic mobilities of cadmium hydroxide, nickel hydroxide, and silver oxide in NiCd and Ag--Zn battery electrolytes. Interim report, 2980 (AD-783853)
Electrophoretic mobilities of cadmium hydroxide, nickel hydroxide, and silver oxide in Ni-Cd and Ag-Zn battery electrolytes, 3453
Flexible nickel cadmium batteries for meteorological balloons (Electrolyte performance at -30 and -60°C), 1458
Investigation of hermetically sealed, maintenance-free, high-rate, nickel-cadmium batteries for aircraft applications. Quarterly technical progress report No. 6, 2833 (AD-479652)
Nickel/cadmium aircraft batteries: rapid electrolyte exchange technique. Technical note, 3142 (AD-A-039335)
Removal of calcium impurity from the electrolyte of an alkaline storage battery with a cadmium anode (Patent), 3854
Thermodynamic properties of the nickel-cadmium alkaline and lead-lead oxide acid cells (Effect of electrolyte composition and concentration), 4503
ELECTROLYTES/NICKEL-ZINC BATTERIES
Electrochemical generator with a zinc electrode (Patent), 3888
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical report No. 5, 1 Dec 1966-1 Mar 1967 (Effects of cycling and of circulating the electrolyte), 2997 (AD-809279)
Electrolyte for zinc--anode batteries (Patent; $H_2SO_4$ with N-decylpyridinium chloride), 3715
Secondary alkaline batteries (Patent; Zn anode, addition of polycationic polymers enables charging without Zn deposition), 1000
Secondary battery with indate ion in the electrolyte (Patent), 1330
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
ELECTROLYTES/PRIMARY BATTERIES
Experimental optimization of Li/$SOCl_2$ primary cells with respect to the electrolyte and the cathode compositions, 3393
Leclanche electrolyte compositional studies for thin film batteries., 3446
New type of Leclanche battery. II. Study of an intermittent regime (Improvements when Cl- is added to $Mg(ClO_4)_2$ + $Mg(OH)_2$), 3458
ELECTROLYTES/PRIMARY-SECONDARY HYBRID BATTERIES
Alkaline electrolyse for galvanic cells containing hydrogen-storage electrodes (Patent), 3700
ELECTROLYTES/SILVER-CADMIUM BATTERIES
Influence of membrane transport characteristics on electrolyte concentration and consequent plate performance, 1898 (AD-862540)
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Quarterly progress report No.

1, Jun-30 Sep 1965, 2821 (AD-473358)
Reduction of the silver oxide electrode in CsOH solutions (Comparison with KOH), 4003
Removal of calcium impurity from the electrolyte of an alkaline storage battery with a cadmium anode (Patent), 3854
ELECTROLYTES/SILVER-ZINC BATTERIES
Applied research investigation of sealed silver-zinc batteries. Quarterly technical progress report No. 3, 1 Nov 1963-1 Feb 1964, 2788 (AD-430588)
Applied research investigation of sealed silver-zinc batteries (Study of ZnO/Ag ratio and electrolyte composition), 316 (AD-603023)
Applied research investigation of sealed silver-zinc batteries (LiOH in electrolyte), 2805 (AD-463102)
Effect of lead salt additions on the properties of a zinc oxide electrode in alkaline electrolytes, 4143
Electrochemical generator with a zinc electrode (Patent), 3888
Electrolyte for zinc--anode batteries (Patent; $H_2SO_4$ with N-decylpyridinium chloride), 3715
Electrophoretic mobilities of cadmium hydroxide, nickel hydroxide, and silver oxide in NiCd and Ag--Zn battery electrolytes. Interim report, 2980 (AD-783853)
Electrophoretic mobilities of cadmium hydroxide, nickel hydroxide, and silver oxide in Ni-Cd and Ag-Zn battery electrolytes, 3453
Influence of membrane transport characteristics on electrolyte concentration and consequent plate performance, 1898 (AD-862540)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 1, 1 Dec 1965-1 Mar 1966, 1697 (AD-480149)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 2, 1 Mar-1 Jun 1966, 1702 (AD-484279)
Physical-chemical studies of KOH-ZnO electrolytes (Vapor pressure 100 to 145C, 30 to 46 percent KOH; electric conductivity 10 to 55C; ZnO solubility, 10 to 145C), 4502
Physical properties and chemical analyses of electrolytes for sealed silver-zinc batteries. Special technical report, July 1966-March 1969, 3044 (AD-853490)
Reduction of the silver oxide electrode in CsOH solutions (Comparison with KOH), 4003
Research and development directed toward the development of gas generators. Final report for Jul 1961-May 1963, 2867 (AD-620212)
Secondary alkaline batteries (Patent; Zn anode, addition of polycationic polymers enables charging without Zn deposition), 1000
Silver migration and transport mechanism studies in silver oxide-zinc batteries. Quarterly progress report No. 2, 1 Mar-1 Jun 1964 (Effect of surfactants in electrolyte), 1722 (AD-601471)
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
ELECTROLYTES/SODIUM-SULFUR BATTERIES
β-alumina sintered matter for solid electrolyte (Chemical preparation), 3980
β-alumina solid electrolyte (Patent; preparation), 3758
β-alumina electrolyte (Patent), 3695
Alkali metal ion-conductive solid electrolyte (Patent; preparation), 3744
Alumina solid electrolyte for secondary batteries (Patent; fabrication), 3736
Beta alumina ceramic (Chemical preparation), 3877
Cell is used as energy source of wrist-watches (Patent), 3621
Ceramics in advanced batteries, 3170 (CONF-751194-)
Ceramics in the sodium-sulfur battery (Properties, requirements, fabrication, performance), 3172 (CONF-751194-)
Comparison of the thermal stability of a β- and β''-alumina at high pressures, 3325
Conductive ceramics for use in the sodium-sulfur battery ($Al_2O_3$ with 8.5 to 10% $Na_2O$ and 0.6 to 1.1% $Li_2O$), 3841
Conductivity of beta-alumina and its dependence on sodium and magnesium content, 4225
Deterioration in ceramic electrolytes for sodium-sulfur batteries, 3629
Deterioration in ceramic electrolytes for sodium--sulfur batteries (Screening test for electrolyte evaluation), 3777
Development program for solid electrolyte batteries. Final report, 1 January 1973-30 June 1974, 672 (EPRI-127-1)
Development program for solid electrolyte batteries. Final report, 1 January 1973-30 June 1974, 3254 (PB-238691)
Development of sodium/sulfur - cells (MgO-dope β-alumina tubular electrolyte), 895
Factors influencing the lifetime of pure β-alumina electrolyte (Na/S and Na/Na cells, charge transfer of 1700 A-hr/cm²), 3779
Function and performance of beta alumina in sodium/sulfur cells, 3817
Hot pressed beta-alumina for sodium-sulfur batteries (Production, performance), 4047
Hot pressed beta alumina for sodium--sulfur batteries (Expected achievements: 50 W/lb, 50-W-hr/lb, 20 A-hr, 100 cycles), 4105
Improvements of electrolyte and seal technology for sodium-sulfur and sodium antimony trichloride load leveling batteries. Final report, 3187 (EPRI-EM-413(6-77))
Ionic conduction in beta-alumina. Interim technical report No. 6, 8 Feb-8 Aug 1969, 2926 (AD-702938)
Ionic superconductors (review of applications), 3776
Model for degradation of ceramic electrolytes in Na-S batteries, 3767
New solid conductors of $Na^+$ and $K^+$ ions ($NaTaWO_6$; $NaTa_2O_5F$; $NaSbO_3$; Na and K niobates), 3433
Optimization of MgO-doped β-$Al_2O_3$ with respect to electrical conductivity, 3150 (ANL-76-8)
Performance of β-alumina ceramic electrolyte in sodium-sulfur cells (30 A current capacity), 4370
Preparation and properties of beta-alumina/glass composites. Final report, 3263 (PB-255549)
Producing β-alumina electrolytes (Patent), 4314
Research and development concerning the sodium-sulfur battery. Subproject: development of unconventional processes for the production of the β alumina solid electrolyte and development of the sodium electrode, 3164 (BMFT-FB-T-76-40)
Research on electrodes and electrolyte for the Ford sodium--sulfur battery. Quarterly report, 30 Jun--30 Sep 1973, 3217 (N-74-19713)
Research on electrodes and electrolyte for the Ford sodium--sulfur battery. Quarterly report, 1 Jan-31 Mar 1974, 3251 (PB-234561)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Quarterly report, June 30, 1973-September 30, 1973, 3247 (NSF/RA/N-73-109)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Annual report, 30 June 1973-29 June 1974, 3253 (PB-235484)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Annual report, 30 Jun 1974-29 Jun 1975, 3255 (PB-244289)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Semiannual report, 30 Jun-30 Dec 1975, 3261 (PB-252827)
Research on electrodes and electrolyte for Ford sodium-sulfur battery. Appendix a. List of research contributors. Report for 30 Jun 1974-29 Jun 1975, 3256 (PB-244290)
Sintering processes and heat treatment schedules for conductive, lithia-stabilized β''-$al_2o_3$, 3330
Sodium-sulfur battery development. Final report, 1 April 1973-30 April 1974, 673 (EPRI-128-0-0)
Sodium/sulfur battery: a progress report (Fabrication of β''-$Al_2O_3$ elctrolyte), 613 (ANL-76-8)
Solid electrolyte (Patent; β-alumina, fabrication), 3697
Solid electrolyte (Patent; improved electrolyte), 3698
Solid electrolytes and photoelectrolysis. Semiannual technical summary report, 1 Mar-31 Dec 1974 ($KSbO_3$, $NaSbO_3$), 3119 (AD-A-009145)
Solid electrolytes: alkali-ion transport in skeleton structures. Semiannual technical summary No. 2, 1 Jul-31 Dec 1975 (Compounds of for $Na_3Zr_2PSi_2O_{12}$), 3129 (AD-A-022199)
Solid electrolyte battery materials. Technical report, 3131 (AD-A-024658)
Solid electrolyte battery materials. Technical report, 3145 (AD-A-039899)
Some studies on sodium/sulfur cells (Magnesia-doped Na β-alumina electrolyte), 3358
Study of a beta-alumina electrolyte for sodium--sulfur battery, 4155
Study of a beta-alumina electrolyte for sodium--sulfur battery, 4156
Substructure and properties of sodium β-alumina solid electrolytes. Interim report, 3258 (PB-244648)
Substructure and properties of sodium beta alumina solid electrolytes, 3149 (ANL-76-8)
Substructure and properties of sodium beta alumina solid electrolytes. Interim report, June 1, 1974-May 31, 1975, 3183 (EPRI-252)
Substructure and properties of sodium beta-alumina solid electrolytes. Interim report, June 1, 1975-May 31, 1976, 3188 (EPRI-EM-494)
ELECTROLYTES/THERMAL BATTERIES
Improved thermal battery (Patent; Ca anodes), 3472
Phase diagram of system LiCl-KCl-$CaCrO_4$, 4447
ELECTROLYTES/ZINC-AIR BATTERIES
25- and 48-ampere hour anode/electrolyte composite production program. Final report, Jan 1968-Feb 1969, 2923 (AD-696790)
Alkaline electrolyte solutions containing indium and vanadium for air--zinc type secondary batteries (Patent; prevention of dendrite growth), 3672
Potassium silicate electrolyte for cells with negative zinc electrode (Increased lifetime;patent), 3986
Recovery of zinc and potassium hydroxide from spent electrolytes (Patent), 2208
Zinc-air alkaline battery (Patent; ZnO-free electrolyte, or one for charging and another for operation), 1390
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
ELECTROLYTES/ZINC-CHLORINE BATTERIES
Chlorine electrodes in the zinc-chlorine battery system (Up to 60 kW-hr), 4207

Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
ELECTROLYTES/ZINC-MANGANESE BATTERIES
Electrochemical generator with a zinc electrode (Patent), 3888
Electrolyte for zinc--anode batteries (Patent; $H_2SO_4$ with N-decylpyridinium chloride), 3715
Use of ion-exchange compounds in chemical current sources, 2301
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
ELECTROLYTIC CELLS/CATHODES
Protective coatings on positive nickel electrodes (Patent), 4170
ELECTROLYTIC CELLS/DESIGN
Electrolytic cell for x-ray diffraction studies of electrode phenomena, 2852 (AD-605707)
ELECTROLYTIC CELLS/ELECTRIC CURRENTS
Current distributions in electrolytic cells. VI. The influence of change of size on current distributions in galvanic cells or corrosion cells, 2714
ELECTROLYTIC CELLS/ELECTRODES
Electrodes for use in zinc-halogen electrolytic cells and (or) batteries (Patent), 4307
Method for the production of galvanic primary elements and device to carry out the method (Patent), 3432
Nickel based alloys as electrocatalysts for oxygen evolution from alkaline solutions, 3166 (BNL-22275)
ELECTROLYTIC CELLS/ELECTROMOTIVE FORCE

FUEL CELLS/CONTAINERS
Manufacturing methods and technology measure for standard battery cases. Quarterly report No. 9, 1 Nov 1971-31 Jan 1972, 3073 (AD-894816L)
Manufacturing methods and technology measure for standard battery cases. Final report, 14 Oct 1969-30 Sep 1972, 3084 (AD-904964L)
Manufacturing methods and technology measure for standard battery cases. Quarterly report No. 3, 1 May-31 July 1970, 3059 (AD-877313)
Manufacturing methods and technology measure for standard battery cases. Quarterly report No. 4, 1 August-31 October 1970, 3063 (AD-880896)

FUEL CELLS/CONTROL SYSTEMS
Power sources conference (22nd annual) held 14-16 May 1968. Proceedings, 41 (AD-696427)

FUEL CELLS/COOLING
Intercell heat pipe for fuel cell and battery cooling. Final report, Jun 1972-Jul 1973, 2979 (AD-782888)

FUEL CELLS/COST
Nuclear power systems for spacecraft (Weights, sizes, and costs of nuclear and nonnuclear spacecraft power systems with references to mission duration), 201

FUEL CELLS/DESIGN
Air depolarization cell or battery (Patent), 808
Auxiliary services for a fuel-cell hybrid electric car, 5189
Battery stack (Patent; electrode configuration with internal passageways), 1293
Integrated cell stacks (Thermally and electrically integral cell stack of fuel cell and storage battery), 376 (AD-681178)
Optimum design of a space vehicle storage system, 1573

FUEL CELLS/ECONOMICS
Batteries and fuel cells in future energy handling, 190
Economic selection of undersea powerplants, 2495
Economical fuel cell, 4464
Energy storage, 2609

FUEL CELLS/EFFICIENCY
Efficiency of power accumulators of different types, 173
Electrolytic and electronic processes (Further development of fuel cell and electrochemical storage technology needed), 133
Meaning of ''effectiveness'' when applied to electric batteries, 2403

FUEL CELLS/ELECTRIC CONDUCTORS
Considerations in the use of electrical measurement techniques to evaluate potential new electrolytes and mixed conductors (Emphasis on interpretation of frequency-dependent ac measurements), 3162 (ANL-76-8)

FUEL CELLS/ELECTRICAL INSULATION
High-temperature insulation, 4386

FUEL CELLS/ELECTROCHEMISTRY
Adsorption of molecules at the electrodes of batteries and fuel cells. Final technical report 1 Jan 1968--30 Jun 1973, 1836 (AD-778968)
Advances in electrochemistry and electrochemical engineering. Volume 8. Electrochemical engineering (Book), 1402
Batteries and fuel cells, 1091
Chemoelectric energy conversion for nonaqueous batteries and fuel cells. Quarterly report No. 20, Apr-Jun 1968, 498 (AD-843141)
Detection of elementary processes within porous electrodes. Interim report, 2026 (AD-A-038915)
Mechanism of reduction of oxygen at air electrode, 237
Periodic electrode processes, 220
Role of the electron in batteries and fuel cells, 50 (AD-740616)

FUEL CELLS/ELECTRODES
Basic research on ceramic materials for energy storage and conversion systems. Progress report, December 1, 1975-November 30, 1976 ($Tl_2ZnI_2$, $In_4CdI_6$, $Tl_4CdI_6$, and $In_2ZnI_4$; solid electrolytes and electrodes), 3182 (COO-2564-2)
Complex apparatus for potential dynamic methods of studying surface condition and kinetics of electrochemical reactions in conjunction with the use of ring-disk electrode, 4128
Composite nickel powder for preparing plaques for nickel cadmium batteries (Also applicable to fuel cells), 4224
Continuous wet-proofing process for the cross sections of electrodes used in fuel cells and hybrid systems (Patent), 4256
Current distribution and potential profile at linear wire electrode of significant ohmic resistance, 4508
Discussion of various types of test electrodes for the evaluation of catalysts for the electroreduction of oxygen, 4279
Disperse catalyst generators, 4478
Electrochemical instrumentation and cell evaluation. Final report, Feb-Aug 1966, 1857 (AD-816711L)
Electrochemical processes on nickel oxide, 2902 (AD-667607)
Energetics of the organic electrodes of accumulators, 3659
Fuel cells with carbon electrodes, 5081
Gas-diffusion electrode for batteries (Patent; fabrication procedure), 3712
Gas diffusion electrodes for batteries (Patent; slurry of active C, resin, and solvent on support), 3691
Gas-diffusion electrode for batteries (Patent), 3714
Gas electrode (Patent), 3597
Hydrophilic electrode (Patent; preparation), 3545
Influence of the structure of silver-activated gas electrodes on the electrochemical performance of fuel cells and metal-air cells (Pore size effects), 4221
Measurement of pore size and surface area of porous electrodes by nondestructive means, 4656
Metal electrodes containing acrylonitrile-butadiene-styrene copolymer binders (Patent; fabrication), 4262
New results from the technological development of an industrial concern (Catalytic activity of tungsten carbide electrode), 3091 (AD-908400L)
Oxygen reduction in alkaline solutions at porous nickel electrodes which have been activated with several precious metals, 3088 (AD-907721L)
Porous carbon material for use as a battery or fuel cell

electrode (Patent), 4245
Porous carbon material for use as a battery or fuel cell electrode (Patent; chemical preparation), 4250
Porous-electrode theory with applications to batteries (and fuel cells), 3765
Porous nickel for alkaline battery and fuel cell electrodes: production by roll-compaction (Roll-compaction of carbonyl nickel powders), 4506
Process for making electrochemical electrodes (Patent), 3879
Production of porous membranes for batteries and fuel cells (Nickel), 4620
Production of porous nickel for alkaline-battery and fuel-cell electrodes: practical and economic considerations, 4611
Silver-tungsten carbide electrode (Patent), 4021
Support frame for the active material of electrodes for batteries or fuel cells (Patent), 4011
Transport processes in porous electrodes, 2229
Zinc electrode investigation, 2843 (AD-489498)
FUEL CELLS/ELECTROLYTES
Basic research on ceramic materials for energy storage and conversion systems. Progress report, April 1, 1975-November 30, 1975, 667 (COO-2564-1)
Basic research on ceramic materials for energy storage and conversion systems. Progress report, December 1, 1975-November 30, 1976 ($Tl_2ZnI_2$, $In_4CdI_6$, $Tl_4CdI_6$, and $In_2ZnI_4$; solid electrolytes and electrodes), 3182 (COO-2564-2)
Considerations in the use of electrical measurement techniques to evaluate potential new electrolytes and mixed conductors (Emphasis on interpretation of frequency-dependent ac measurements), 3162 (ANL-76-8)
Energetics of the organic electrodes of accumulators, 3659
Gaseous electrolytes for batteries and fuel cells. Final report, 21 August 1964-31 July 1967, 3199 (N-69-29708)
Ionic superconductors (review of applications), 3776
Nonaqueous electrolyte systems: ionic transport in nonaqueous media. Final report (For development of new battery and fuel cell systems), 2948 (AD-741804)
Nonaqueous electrolyte systems: ionic transport in nonaqueous media. Interim technical report No. 7, 2931 (AD-714680)
Solid electrolytes (67 references), 4220
FUEL CELLS/ELECTRONIC CIRCUITS
Energy source requirements for reliable circuitry. Scientific report, 2861 (AD-613692)
FUEL CELLS/FABRICATION
Sealant for galvanic batteries and cells (Patent), 1215
Sealing of silver oxide-zinc storage cells. Final report (Use of miniature fuel cells to control pressure in sealed silver oxide-zinc batteries), 3197 (N-69-12309)
FUEL CELLS/FEASIBILITY STUDIES
Weapon system 107A-1. Mark 3 advanced re-entry vehicle program. Chemical energy sources. Final summary report (Performance at zero G), 312 (AD-600634)
FUEL CELLS/FLOW REGULATORS
Metal-air batteries and fuel cells (Patent; continuation-in-part of US Patent 3,554,810; electrolyte flow regulator), 4040
FUEL CELLS/FORECASTING
Della Mussia, J.P., 1335
Storage batteries for electrically driven vehicles, 2432
FUEL CELLS/HEAT PIPES
Intercell heat pipe for fuel cell and battery cooling. Final report, June 1972-July 1973, 2978 (AD-782888)
FUEL CELLS/HYBRID SYSTEMS
Fuel battery-rechargeable accumulator combination (Patent; fuel cell for base power and accumulator for peak power requirements), 1449
Fuel cell-battery power sources, 1435
Spacelab power supply systems (7 kw continuous 12 kw peak fuel cell with Ag--Zn battery), 994
FUEL CELLS/INVERTERS
Ac/dc power conditioning and control equipment for advanced conversion and storage technology. Key phase report No. 1, 3259 (PB-247217)
ac/dc power conditioning and control equipment for advanced conversion and storage technology. Final report, 3186 (EPRI-EM-271)
Development of a low-cost, light-weight, efficient, 1.5 kW inverter. Final report, 3123 (AD-A-016792)
FUEL CELLS/ION EXCHANGE MATERIALS
Ion exchange membranes in electrochemical cells, 3490
FUEL CELLS/LEAKS

Electrochemical cell assembled in discharged state (Patent; 3 to 13Ah), 881
Method of preparing an electrode material of lithium-aluminum alloy (Patent), 3429
HYBRID ELECTRIC-POWERED VEHICLES/MATHEMATICAL MODELS
Design and performance characteristics of hybrid vehicle power train, 5252
HYBRID ELECTRIC-POWERED VEHICLES/MECHANICAL TRANSMISSIONS
Analysis and advanced design study of an electromechanical transmission, 4992 (NP-20357)
Electric- and hybrid-vehicle powertrain development, 4960 (CONF-770430-P4(Draft))
Flywheel electric motor hybrid power train for electric vehicles, 4961 (CONF-770430-P4(Draft))
HYBRID ELECTRIC-POWERED VEHICLES/MEETINGS
NEREM 72 record, part 1: technical papers, 5191
Noteworthy achievements instead of sensations. A report on the fourth international electric-vehicle symposium, 5038
Proceedings of the second international electric vehicle symposium, Atlantic City, NJ, 8-10 Nov 1971, 5222
Proceedings of the symposium on batteries for traction and propulsion, Columbus, Ohio, 7-8 Mar 1972, 5192
HYBRID ELECTRIC-POWERED VEHICLES/METAL-NONMETAL BATTERIES
Calcium alloy as active material in secondary electrochemical cell ( Patent; Ca alloy/halide/oxides, sulfides), 3354
High performance zinc-bromine secondary battery system, 651 (CONF-711166-)
Lithium/chalcogen secondary cells for components in electric vehicular propulsion generating systems. Interim technical summary report No. 5, 23 May-22 Nov 1971, 1810 (AD-741801)
Secondary cells using lithium anodes and sulfur--selenium-thallium cathodes (Li/LiF--LiCl--KCl/(S + Se), paste and liquid electrolytes), 1350
HYBRID ELECTRIC-POWERED VEHICLES/NICKEL-CADMIUM BATTERIES
Batteries for the hybrid heat engine/electric vehicle, 5200
Dual turbine--battery electric vehicle drive system, 5184
Nickel-zinc batteries for hybrid vehicle operation, 4968 (EPA-460/3-74-025)
Power transfer characteristics of a secondary battery for integrated system design, 1455
HYBRID ELECTRIC-POWERED VEHICLES/NICKEL-ZINC BATTERIES
Batteries for the hybrid heat engine/electric vehicle, 5200
Characteristics of conventional design nickel--zinc batteries for hybrid vehicle operation. Research and development technical report, 426 (AD-756431)
Novel nickel electrode for electric vehicles (Fuel cell or metal-air battery + secondary Ni-Zn battery for acceleration), 3168 (CONF-711166-)
Space technology applicable to hybrid vehicle batteries, 1397
Space technology applicable to hybrid vehicle batteries, 1401
HYBRID ELECTRIC-POWERED VEHICLES/NUCLEAR POWER
Some aspects of the application of nuclear energy to small portable and automotive power supplies, 72 (ANL-6483)
HYBRID ELECTRIC-POWERED VEHICLES/OPERATION
Wpi electric hybrid (Battery + constant-speed generator), 5233
HYBRID ELECTRIC-POWERED VEHICLES/PERFORMANCE
Clean air car race. The Worcester Gremlin KVA-SST, 5212
Design and performance characteristics of hybrid vehicle power train, 5252
Dual turbine--battery electric vehicle drive system, 5184
Noteworthy achievements instead of sensations. A report on the fourth international electric-vehicle symposium, 5038
Performance analyses of heat engine--battery hybrid vehicles, 5183
System design implications of electric and hybrid vehicles, 5261
HYBRID ELECTRIC-POWERED VEHICLES/PERFORMANCE TESTING
Development of a combination power installation and electric drive system for a city bus, 5188 (AD-786813)
Electric vehicle performance with alternate batteries, 5064
Test results on hybrid vehicles, 4918 (CONF-711166-)
HYBRID ELECTRIC-POWERED VEHICLES/PLANNING
Electric car-coming revolution, 5268
HYBRID ELECTRIC-POWERED VEHICLES/RESEARCH PROGRAMS
Battery-flywheel power system for an urban automobile, 4963 (CONF-770430-P4(Draft))
Development of the electric vehicle at Nissan Motor Co., Ltd., 4896 (CONF-711166-)
HYBRID ELECTRIC-POWERED VEHICLES/REVIEWS
Overview of hybrid vehicles, 4916 (CONF-711166-)
HYBRID ELECTRIC-POWERED VEHICLES/SODIUM-SULFUR BATTERIES
Case for electric and fuel-cell powered vehicles, 5139
HYBRID ELECTRIC-POWERED VEHICLES/SPECIFICATIONS
Development of the electric vehicle at Nissan Motor Co., Ltd., 4896 (CONF-711166-)
HYBRID ELECTRIC-POWERED VEHICLES/TECHNOLOGY ASSESSMENT
Systematic approach to the evolution of high performance electric vehicles, 4957 (CONF-770430-P4(Draft))
HYBRID ELECTRIC-POWERED VEHICLES/ZINC-AIR BATTERIES
Experimental vehicular zinc-air battery with replaceable anodes, 1398
HYDRAZINE
Synthetic fuels. Where we stand today (Review), 160
HYDRAZINE FUEL CELLS/CATALYSTS
Chemoelectric energy conversion for nonaquaous batteries and fuel cells. Quarterly report No. 20, Apr-Jun 1968, 498 (AD-843141)
HYDRAZINE FUEL CELLS/CATHODES
Fuel cells, 4131
HYDRAZINE FUEL CELLS/DESIGN

60/240 watt hydrazine fuel cell system (Hybrid with nickel--cadmium battery), 379 (AD-681201)
60-watt liquid hydrazine fuel cell. Technical information report (For recharging storage batteries), 3025 (AD-835257)
HYDRAZINE FUEL CELLS/ELECTRODES
Electrochemical application of amalgamated-nickel bodies, 4196
HYDRAZINE FUEL CELLS/FUEL SYSTEMS
Fuel cells, 4131
HYDRAZINE FUEL CELLS/PERFORMANCE
60/240 watt hydrazine fuel cell system (Nickel-cadmium battery recharged by hydrazine air fuel cell), 2523
Fuel cell manpack power source. Technical report (30-W hydrogen and 60-W hydrazine hybrid fuel cells with nickel--cadmium batteries), 1764 (AD-680894)
HYDRAZINE FUEL CELLS/POWER CONDITIONING CIRCUITS
Power conditioning and control module for hydrazine-air battery, type I, PP-6204( )/U (60 W), 2940 (AD-732339)
HYDRAZINE FUEL CELLS/USES
Fuel-cell/lead--acid-battery hybrid car, 5185
HYDRIDES
Synthetic fuels. Where we stand today (Review), 160
HYDROCARBON FUEL CELLS/CATHODES
Gas diffusion electrode for a battery (Patent), 3382
HYDROCARBON FUEL CELLS/DESIGN
Battery--fuel cell system (For electric-powered vehicles), 359 (AD-662234)
Battery--fuel cell system (For electric-powered vehicles), 362 (AD-662960)
Fuel cell, battery power sources for electric cars, 360 (AD-662235)
Fuel cell - energy storage hybrid systems for vehicles, 361 (AD-662236)
Integrated cell stacks (Fuel cell--battery hybrid system), 1475
HYDROCARBON FUEL CELLS/FORECASTING
General state of advancement of battery technology, 2629
HYDROCARBON FUEL CELLS/USES
Battery--fuel cell system (For electric-powered trucks), 5281
HYDROCARBONS
Synthetic fuels. Where we stand today (Review), 160
HYDROCARBONS/AUTOMOTIVE FUELS
Synthetic fuels: where we stand today, 5104
HYDROCARBONS/OXIDATION
Advances in electrochemistry and electrochemical engineering. Volume 8. Electrochemical engineering (Book), 2430
HYDROGEN
Synthetic fuels. Where we stand today (Review), 160
HYDROGEN/AUTOMOTIVE FUELS
Electric car, 4921 (CONF-730848-1)
Synthetic fuels: where we stand today, 5104
HYDROGEN/ENERGY STORAGE
Energy storage. II. Developing advanced technologies, 1214
Storage and transportation of electrical energy using hydrogen fuel or batteries (Review with 45 references), 179
HYDROGEN/MEETING
8th intersociety energy conversion engineering conference held at Philadelphia, Pennsylvania, August 13-17, 1973, 178
HYDROGEN/MEETINGS
*Proceedings, 18th Annual Power Sources Conference*, 19-21 May 1964, Fort Monmouth, NJ, 35 (AD-696423)
Proceedings, 20th Annual Power Sources Conference, 24-26 May 1966, Fort Monmouth, NJ, 39 (AD-696425)
HYDROGEN/OFF-PEAK ENERGY STORAGE
Economic study of electrical peaking alternatives, 5084
Storage of high-grade energy (No references), 161
HYDROGEN/RESEARCH PROGRAMS
Research group activity report for the period 1 Jan 1968-31 Mar 1969, 64 (AD-914449)
HYDROGEN 2
See *DEUTERIUM*
HYDROGEN FUEL CELLS
Electric power systems for space: a progress report, 2187
Hydrogen and the electric economy, 5216
HYDROGEN FUEL CELLS/ANODES
Influence of certain additives to activated carbon on its properties as hydrogen electrode material, 4644
Mixed powder hydrogen electrode (Al-Ni alloy), 4597
Studies on the bipolar liquid metal electrode, 3159 (ANL-76-8)
HYDROGEN FUEL CELLS/CATHODES
Gas diffusion electrode for a battery (Patent), 3382
Metal/air cells and improved air electrodes for use therein (Patent), 3394
Method to produce a protective oxide on the surface of positive nickel electrodes for galvanic cells (Patent), 3428
HYDROGEN FUEL CELLS/CHEMICAL REACTION KINETICS
Electrochemical fuel cells, 3444
HYDROGEN FUEL CELLS/DESIGN
30-watt lithium hydride fuel cell. Technical information report (For recharging storage batteries), 3032 (AD-840361)
30-watt lithium hydride fuel cell (Hybrid fuel cell-electric battery), 494 (AD-840361)
Biosatellite fuel cell/battery power system, 691 (N-70-11022)
Design of cylindrical regenerative fuel cell, 1352
Hydrogen--air/lead battery hybrid system for vehicle propulsion (6 kW hydrogen--air fuel cell and 4 kW/hr lead battery), 1389
Low power metal hydride fuel cell/battery hybrid systems. Final report, 15 June 1973-15 October 1974, 571 (AD/A-005079)
Regenerative fuel cell system (Patent; hydrogen fuel cell-secondary battery combination; $H_2O$ produced in fuel cell used by battery), 1336
Solid-electrolyte battery, particularly for the storage of electrical energy (Patent; also relevant to fuel cells), 776
HYDROGEN FUEL CELLS/EFFICIENCY
Electrolytic and electronic processes, 181
HYDROGEN FUEL CELLS/ELECTROCHEMISTRY
*Electrochemical engineering*, 684 (N-68-21038)
HYDROGEN FUEL CELLS/ELECTRODES
Dispersed-catalyst electrodes for fuel cells and batteries, 4481
Zinc electrode investigation. Quarterly technical progress report No. 7, 1 Jan-1 Apr 1966, 2835 (AD-480735)
Zinc electrode investigation. Quarterly technical progress report No. 7, 1 Jan-1 Apr 1966, 2836 (AD-480735)
HYDROGEN FUEL CELLS/FORECASTING
*General state of advancement of battery technology*, 2629
HYDROGEN FUEL CELLS/HYBRID SYSTEMS
Electric storage unit consisting of a fuel cell and storage battery with a common negative electrode connected in parallel (Patent), 1270
Fuel cell-secondary cell combination (Patent), 825
Low power metal hydride fuel cell/battery hybrid systems (Steady 2 mA at 32 V or 430 mA-60 ms pulses at 24 V), 669 (ECOM-0227-F)
Maintenance-free storage battery having an electrolyte dissolved in water and a hydrogen-oxygen fuel cell above the electrode plates (Patent), 1376
HYDROGEN FUEL CELLS/OPTIMIZATION
Biosatellite fuel cell/battery power system., 1424
HYDROGEN FUEL CELLS/PERFORMANCE
Chemoelectric energy conversion for nonaqueous reserve batteries. Quarterly report No. 11, January-March 1966 (Quarterly report), 339 (AD-633957)
City car with H--air fuel cell/lead battery (one year operating experiences) (33 kWh fuel cell battery and 25 kW peak power lead battery), 5210
Design of cylindrical regenerative fuel cell, 1352
Electrochemical sources of pulse power, 371 (AD-671685)
Fuel cell manpack power source. Technical report (30-W hydrogen and 60-W hydrazine hybrid fuel cells with nickel--cadmium batteries), 1764 (AD-680894)
General Motors looks to future, 5288
One watt 30-day plus power sources. Research paper (Comparison of silver-zinc batteries, zinc-air batteries, hydrogen fuel cells, and solar cells), 1762 (AD-675936)
Sealing of silver oxide-zinc storage cells. Quarterly report, 23 September-23 December 1967 (Micro fuel cells for pressure control), 3193 (N-68-16346)
HYDROGEN FUEL CELLS/PERFORMANCE TESTING
Sealing of silver oxide-zinc storage cells. Quarterly report, 23 December 1967-23 March 1968 (Miniature hybrid fuel cells for pressure control), 3195 (N-68-27645)
HYDROGEN FUEL CELLS/REVIEWS
Special purpose batteries, 1249
HYDROGEN FUEL CELLS/TESTING
Sealing of silver oxide-zinc storage cells. Quarterly report, June 23-September 23, 1967 (Miniature hybrid fuel cells for pressure control), 3192 (N-68-11839)
HYDROGEN FUEL CELLS/THERMODYNAMICS
Electrochemical fuel cells, 3444
HYDROGEN FUEL CELLS/USES
Battery-power passenger cars, and van powered by fuel cell, 5287
Current developments in electric ground propulsion systems, research and development worldwide (Review, 40 references), 5128
Hybrid power source for material handling equipment (Hydrogen fuel cell--lead-acid battery system for electric fork lift trucks), 5083
Promise and potential of electric automobiles, 5278
HYDROGEN FUELS
IEEE Power Engineering Society papers. Energy development, 156
*HYDROGEN FUELS/BIBLIOGRAPHIES*
Energy, 130
HYDROGEN FUELS/MEETINGS
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
HYDROGEN FUELS/USES
Synthetic fuels. Where we stand today (Review, many references, on properties and application potentials of hydrocarbons and alcohols, H, inorganic H compounds (metallic hydrides, $NH_3$, and hydrazine), secondary batteries, and fuel cells), 5129

Special purpose urban cars, 5248
INTERNAL COMBUSTION ENGINES/EXHAUST GASES
Emission optimization of heat engine/electric vehicle, 100 (NP-20354)
INTERNAL COMBUSTION ENGINES/FUEL CONSUMPTION
Long term energy alternatives for automotive propulsion: synthetic fuel versus battery/electric system. Executive summary, 5013 (PB-262512)
INTERNAL COMBUSTION ENGINES/HYBRID SYSTEMS
Analysis and advanced design study of an electromechanical transmission, 4992 (NP-20357)
INTERNAL COMBUSTION ENGINES/LEAD-ACID BATTERIES
Battery for ignition of internal combustion engines, 1149
Lead-acid starter batteries-2,3 (6 and 12 V), 1550
INVERTERS/COMPARATIVE EVALUATIONS
ac/dc power conditioning and control equipment for advanced conversion and storage technology. Final report, 3186 (EPRI-EM-271)
INVERTERS/COST
Power conversion equipment for storage batteries, 5012 (PB-251490)
INVERTERS/DESIGN
Ac/dc power conditioning and control equipment for advanced conversion and storage technology. Key phase report No. 1, 3259 (PB-247217)
Development of a low-cost, light-weight, efficient, 1.5 kW inverter. Final report, 3123 (AD-A-016792)
INVERTERS/PERFORMANCE TESTING
ac/dc power conditioning and control equipment for advanced conversion and storage technology. Final report, 3186 (EPRI-EM-271)
ION EXCHANGE MATERIALS/USES
Ion exchange membranes in electrochemical cells, 3490
IRIDIUM ALLOYS/CHEMICAL REACTION KINETICS
Nickel based alloys as electrocatalysts for oxygen evolution from alkaline solutions, 3166 (BNL-22275)
IRON/CORROSION
Electrode passivation studies. Quarterly report No. 2, 1 Mar-31 May 1966, 2838 (AD-484216)
IRON/MAGNETIC PROPERTIES
Effect of initial raw material and the method of preparing the negative electrode masses of an iron--nickel storage battery on their magnetic characteristics, 4129
IRON/SURFACE PROPERTIES
Surface analysis of pyrotechnic material, 3190 (GEPP-324)
IRON ALLOYS
See also STEELS
IRON ALLOYS/SORPTIVE PROPERTIES
Absorption and desorption rates of $H_2$ and $D_2$ for $LaNi_5$, $LaCo_5$, $LaNi_2Co_3$, and FeTi. Interim report, 3143 (AD-A-039518)
IRON OXIDES/CHEMICAL PREPARATION
Electrodes including mixed transition metal oxides (Patent), 3539
IRON OXIDES/THERMODYNAMIC PROPERTIES
Corrosion in alkali hydroxide solutions of electrolytic zinc powder containing codeposited lead, 3448
IRON-AIR BATTERIES/ADDITIVES
Procedure to stabilize an iron air battery (Patent; 100 Wh/kg, 20 to 40 W/kg, addition of sulfur-containing additive to electrolyte), 3286
IRON-AIR BATTERIES/ANODES
Formation of porous metal plates by electrolytic reduction, 4680
High performance, rechargeable sintered iron electrodes. I. The effect of preparative methods and additives on the structure and performance of sintered iron electrodes, 3443
IRON-AIR BATTERIES/CATHODES
Air-metal cell systems, 1434
Influence of certain additives to activated carbon on its properties as hydrogen electrode material, 4644
Metal/air cells and air cathodes for use therein (Patent) 3477
Metal/air cells and improved air electrodes for use therein (Patent), 3394
Oxygen electrode. I (Isotopic investigation of electrode mechanisms), 4731
IRON-AIR BATTERIES/DESIGN
Iron-air battery systems for traction purposes, 1120
Performance of iron-air secondary cells under practical operation conditions, 1119
IRON-AIR BATTERIES/PERFORMANCE
Secondary batteries for electric vehicles, 4854 (ANL-76-8)
IRON-AIR BATTERIES/PERFORMANCE TESTING
Iron-air battery systems for traction purposes, 1120
IRON-AIR BATTERIES/RESEARCH PROGRAMS
Development of an iron-air battery system for electric vehicles. Progress report, August 1, 1976-August 31, 1976 (Westinghouse Electric Corp. Research and Development Lab., Pittsburgh, PA), 753 (TID-27211)
IRON-AIR BATTERIES/REVIEWS
Characteristics of metal-air systems (67 references; 10 different anodes described), 1366
IRON-NICKEL BATTERIES/ANODES
Active iron mass for electrodes (Patent fabrication), 3949
Alkaline iron electrode (History, performance, fabrication), 4525
Application of electron spectroscopy for chemical analysis to the study of iron-based battery electrodes, 3782
Beneficial effect of lithiated electrolyte on iron battery electrodes, 4632
Determination of the degree of reduction of active masses of a storage cell iron electrode ([FeO] proportional to magnetic susceptibility), 4431
Effect of initial raw material and the method of preparing the negative electrode masses of an iron--nickel storage battery on their magnetic characteristics, 4129
Effect of matrix structure on the electrochemical performance of p/m iron electrodes in an alkaline battery environment, 4140
Electrode for secondary storage battery (Ni fibers with iron oxide as active agent, additives; patent), 3925
Electrode for alkaline storage battery and method for manufacture thereof (Patent), 3349
Feasibility of using magnetic measurements for the selection of concentrations of sulfur additives in the active mass of an iron electrode, 4432
Formation of porous metal plates by electrolytic reduction, 4680
Influence of conductivity and porosity on the behavior

of the iron plate in an alkaline storage cell (Effects of introducing As, Sb, Ni, Cd, or Sn), 4157
Influence of electrical conductivity of the active material on the behavior of the iron plate in an alkaline storage cell, 4158
Iron--alkaline battery (Patent; effects of EDTA addition to KOH electrolyte on utilization coefficient of anode-active mass), 3639
Iron--alkali batteries (Patent; effect of tartrate addition on utilization coefficient of Fe anode-active mass), 3640
Iron electrode paste for alkaline battery plates, 3886
Iron electrode for an alkaline battery (Patent; Fe/air batteries, electrode fabrication), 3615
Iron electrodes (Patent; preparation by mixing Fe or Fe oxides, C black, and resin, casting, and heating), 3520
Iron electrode (Process for preparing electrodes (Patent)), 3544
Magnetic separation of active materials of an iron electrode (For electrode fabrication), 4435
Mechanisms of self-discharge of negative of alkaline accumulators, 4751
Moessbauer spectroscopy investigation of the iron electrode during cycling in alkaline solution, 3810
Negative iron active mass adhering toan electrically conducting carrier (Patent; preparation), 3702
Performance of nonlaminated iron plates in alkaline storage cells, 4459
Potentiodynamic study of the effect of aluminum on the behavior of an iron electrode in alkaline solution, 4298
Preparation of an alkaline iron electrode material using sulfur acids (Patent), 4180
Reasons for the poisoning effect of small quantities of some impurities on the cathode reduction process for metal oxides and hydroxides in an alkali solution, 4134
Scientific research on improving the characteristics of iron and nickel oxide electrodes, 3792
Self-discharge of iron electrodes with hydrogen evolution in alkaline solutions, 4276
Self-discharge of the alkaline iron electrode, 3442
SEM studies of discharge products from alkaline iron electrodes, 3370
Sintered iron electrode, 4526
Slow potentiodynamic studies of porous alkaline iron electrodes, 3424

IRON-NICKEL BATTERIES/BATTERY CHARGING
Accumulators for traction: new accumulators charging processes, 2326
Apparatus and method for terminating the charge of storage batteries (Patent), 3531
Maintenance of electrical cap lamps, 2680
Principles of battery charging, 2746
Study of operating modes of Diesel locomotive alkaline storage batteries, 2416 (AD-781224)

IRON-NICKEL BATTERIES/CATHODES
Activation of nickel battery plates (Patent; electrolytic process), 3871
Activation of nickel battery plates (Patent; electrolytic process), 3557
Active mass of the nickel oxide electrode for an alkaline storage battery (Patent; preparation), 4354
Active substance for the nickel oxide electrode of an alkaline storage battery (Patent; preparation of active material), 4355
Analysis of charge-discharge characteristics of nickel oxide electrodes by infrared spectroscopy, 4606
Applications of nickel. Annual report (Ni production and consumption; possibility for substitutions in event of shortage), 3037 (AD-846999)
Battery electrode support (Patent), 3589
Battery electrode supports (Patent), 3590
Behavior of nickel oxide electrodes of alkaline cells in concentrated solutions of nickel salts, 4387
Cathodes for alkaline batteries (Patent), 3926
Characteristics in charged or discharged condition of pressed-type nickel positive electrodes made by using polystyrene as a binder (Comparison with polyethylene), 4053
Charge, discharge, and self-discharge characteristics of thin film nickel oxide electrodes, 2905 (AD-671685)
Coated nickel electrodes (Preparation by anodization of an active form of Ni), 4419
Determination of carbonate impurities in nickel hydroxide, 4069
Effect of the increase of porosity on the current distribution in nickel hydroxide electrodes containing Raney nickel, 4001
Effect of lithium hydroxide additions on the electrochemical behavior of nickel(II) hydroxide thin-layer electrodes, 4101
Electrochemical processes on nickel oxide, 2902 (AD-667607)
Electrochemical properties of nickel hydroxide electrodes, 4363
Electrodes for alkaline batteries (Patent; preparation), 3613
Electrophoretic method of preparation of electrodes from nickel(II) hydroxide, 3780
Formation of electrodes for alkaline batteries (Patent), 3542
Forming process in nickel positive electrodes, 4622
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Information about nickel hydroxide electrode (Chemical reactions), 4571
Infrared spectroscopic study of the properties of a nickel oxide electrode. I. Effect of charging conditions on the ir spectra of a nickel oxide electrode in charged and discharged states, 4092
Investigation toward the development of carbonyl nickel powder suitable for the manufacture of sintered nickel plaques for use in alkaline storage batteries, 2873 (AD-622916)
Laminated diffusion bonded battery plaques (Patent; preparation), 3952
Manufacture of a dry-charged nickel oxide electrode by chemical oxidation ($KOH$--$K_2S_2O_8$ solution), 4083
Method for making nickel and cadmium electrodes for batteries (Patent), 3375
Method for making a nickel positive electrode for an alkaline battery (Patent; suspension of nickel hydroxide, cobalt hydroxide, and graphite entrained in polyvinylidene fluoride binder), 3353
Method of manufacturing positive nickel hydroxide electrodes (Patent), 3473
Method of producing electrodes (Patent), 3400
Method to produce a protective oxide on the surface of positive nickel electrodes for galvanic cells (Patent), 3428
Methods for determining the structural and stoichiometric changes of $Ni(OH)_2$ electrodes during polarization in alkaline electrolyte, 4565
Modulation-spectroscopic investigations on nickel electrodes (Structure of semiconducting passive layers) 4360
Nickel cathode for alkaline batteries (Patent), 3705
Nickel cathodes for alkaline cells (Patent; fabrication), 3708
Nickel cathodes for alkaline batteries (Patent), 3598
Nickel electrodes for alkali batteries (Patent; preparation), 3902
Nickel electrodes for alkaline batteries (Patent), 3704
Nickel electrodes for alkaline cells (Patent), 3663
Nickel electrode for alkaline batteries (Patent; preparation by polarizing Ni sponge in aqueous metal nitrate solution), 3619
Nickel electrode for an alkaline battery (Patent; fabrication), 4327
Nickel hydroxide electrode (Chemical preparation;patent), 3680
Nickel hydroxide cathodes for storage batteries (Patent; fabrication), 3755
Nickel hydroxide cathodes for storage batteries (Patent; fabrication), 3756
Nickel hydroxide electrode research. Interim technical report No. 1, 1 January 1969-2 February 1970 (Effects of cation additions to active material), 3056 (AD-866147)
Nickel hydroxide electrode (Patent), 4334
Nickel or cadmium electrodes for alkaline cells (Patent; chemical preparation), 3588
Nonlaminated nickel oxide electrode with plastic binder, 4569
Oxidation of powder-metallurgical electrodes by potassium hypochlorite, 4076
Oxidation of hydrogen on a porous nickel electrode, 2860 (AD-612497)
Oxidation of sintered nickel bases with ozone (Chemical preparation), 4434
Polarization studies on sintered plate electrodes containing various amounts of $Ni(OH)_2$, 4579
Porous nickel plates for electrodes (Method for fabrication), 3965
Porous nickel alkaline-battery electrodes made from woven cotton cloth (Fabrication and testing, porous structure derived from woven cotton cloth), 4349
Porous nickel for alkaline battery and fuel cell electrodes: production by roll-compaction (Roll-compaction of carbonyl nickel powders), 4506
Possibilities of improving the electrical characteristics of nonlamellar nickel oxide electrodes of alkaline storage batteries, 4068
Potassium distribution in nickel oxide electrodes, 4577
Powder-metallurgy electrode of an alkaline storage battery (Patent), 3853
Production of porous membranes for batteries and fuel cells, 4620
Production of porous nickel for alkaline-battery and fuel-cell electrodes: practical and economic considerations, 4611
Production of porous nickel electrodes for gas-tight batteries, 4604
Products of oxidation of nickel with ozone (Chemical preparation of nickel oxide electrode active mass), 4436
Protective coatings on positive nickel electrodes (Patent), 4170
Rational degree of filling of pores of powder-metallurgical nickel oxide electrode by the active media, 4118
Relations of the structural characteristics of the powder metallurgical nickel oxide electrode, 4063
Removal of nitrates from sintered nickel storage-battery plaques impregnated with nickel salts (Patent), 4247
Sealed type alkaline storage battery (Patent; improved

Ni hydroxide cathode containing $Ba(OH)_2$), 3565
Selected articles (Effects of ultrasonics), 4689 (AD-655021)
Self-discharge of nickel oxide electrodes, 4213
Self-discharge mechanism of a powder-metallurgy nickel oxide electrode in concentrated potassium hydroxide solutions, 4135
Self-discharge of a nickel oxide electrode, 4417
Sintered nickel matrix cathode (Performance), 4734
Sintered type alkaline storage battery. XV. Effect of lithium ion on the formation of active material from nickel plaque at various temperatures, 4087
Stable nickel oxyhydroxide (NiOOH) (Patent; chemical preparation), 3499
Structure of a double electric layer and features of the electrode processes on a sodium nickelate single crystal, 4136
Study of electrodes and electrode reactions. II. The relation of the energy necessary to remove an oxygen molecule from charged nickel oxide electrodes in vacua and solutions of potassium hydroxide, 2876 (AD-627216)
Study of electrodes and electrode reactions. I. The energy necessary to remove an oxygen molecule from a charged nickel oxide electrode in a vacuum, 2877 (AD-627248)
Thermal decomposition of nickel ammine complexes for producing the positive active mass in sintered electrodes (Fabrication), 4350
Thermogalvanic potentials. II. Nickel in neutral subgate solution, 4769
Use of stereometric metallography for determination of structural characteristics of porous nickel bodies for alkaline storage cell plates, 4463

IRON-NICKEL BATTERIES/COMPARATIVE EVALUATIONS
Batteries for electrocars, 2173
Batteries for battery-powered vehicles (Service life, care, space requirements, initial costs), 2448
Economic comparison of four electric power sources for forklift trucks, 2003 (AD/A-006479)
Operating characteristics of storage batteries for use on ground support equipment, 1684 (AD-470655)

IRON-NICKEL BATTERIES/DESIGN
Alkaline batteries, 1439
Alkaline storage batteries (Patent), 1015
Chemoelectric battery (Patent; Fe, Cd, or Zn with hydroxide of Ni, Fe, or Co and/or oxides of Pb or Ag, gas release feature), 809
Evaluation of Ni-Fe and Ni-Zn batteries. Semiannual report No. 1, 1 November 1967-30 April 1968, 493 (AD-840290)
Evaluation of Ni-Fe and Ni-Zn batteries. Report No. 2 (final), 1 November 1967-30 January 1969 (Effects of design modifications on output), 1891 (AD-852691)
Hermetic alkaline storage battery (Patent; positive electrodes are discharge limiting, negative electrodes contain Raney metal), 812
New nickel-iron battery gives 25% more power (MC-8), 1592
Nickel--iron secondary batteries (Patent), 995

IRON-NICKEL BATTERIES/ELECTROCHEMISTRY
Study of operating modes of diesel locomotive alkaline storage batteries, 444 (AD-781224)
Study of operating modes of Diesel locomotive alkaline storage batteries, 2416 (AD-781224)

IRON-NICKEL BATTERIES/ELECTRODES
Determining the capacity of electrodes of the nickel--iron storage battery (Patent), 3997
Diffusion-bonded battery electrode plaques (Patent), 3552
Electrochemistry of the nickel oxide electrode. V. Self-passivation effects in oxygen-evolution kinetics, 2954 (AD-744605)
Electrochemical behavior of iron in alkaline sulphate solutions, 3903
Electrode plate for alkaline batteries (Patent; fabrication method), 3713
Electrode plate of alkaline storage battery (Patent; preparation of Ni or Cd electrode), 3591
Hydrating a battery plaque impregnated with a metal nitrate in a hydroxide solution and subsequent recovery of the nitrate by-product as crystals (Patent; preparation), 4249
Influence of heat treatment of iron on its behavior in the electrodes of alkaline storage cells, 4450
Nickel-base electrodes for alkaline batteries (Patent; preparation procedure), 3750
Nickel hydroxide battery electrode development. Final technical report, 1 Jan 1971-31 Jan 1972, 2958 (AD-746335)
Patent; preparation of Ni oxide, Ni hydroxide, and Fe oxide electrodes, 3762
Porous structure of a sintered nickel oxide electrode, 2960 (AD-748109)
Preparation of highly porous nickel substrates for sintered electrodes of storage batteries, 4428
Scientific research on improving the characteristics of iron and nickel oxide electrodes, 3792
Sintered electrode plate for alkaline storage battery (Patent; fabrication), 3600
Sintered-metal nickel oxide electrode for an alkali storage cell, 2959 (AD-748047)
Storage-battery electrodes (Patent; preparation), 4694
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730

IRON-NICKEL BATTERIES/ELECTROLYTES
Beneficial effect of lithiated electrolyte on iron battery electrodes, 4632
Iron--alkaline battery (Patent; effects of EDTA addition to KOH electrolyte on utilization coefficient of anode-active mass), 3639
Iron--alkali batteries (Patent; effect of tartrate addition on utilization coefficient of Fe anode-active mass), 3640

IRON-NICKEL BATTERIES/FABRICATION
High-energy-density iron-nickel battery (Patent), 1139
High energy density long life alkaline battery (Patent), 989
Method of forming iron-nickel storage batteries with nonlamellar negative electrode (Patent), 1207 (AD/A-001218)

IRON-NICKEL BATTERIES/FEASIBILITY STUDIES
Development of electrochemical power sources for electric traction, 820

IRON-NICKEL BATTERIES/HEATING
Study of operating modes of Diesel locomotive alkaline storage batteries, 2416 (AD-781224)

IRON-NICKEL BATTERIES/LEAKS
Leak rates in sealed cells, 2334

IRON-NICKEL BATTERIES/LIFETIME
Prolonging the service life of an alkaline nickel--iron battery (Patent; rinsing plates and treating with organic acid), 2266

IRON-NICKEL BATTERIES/MAINTENANCE
Maintenance of electrical cap lamps, 2680
Well-planned battery shop keeps walkie truck fleet on the go at Gallon Iron Works, 2684

IRON-NICKEL BATTERIES/MATERIALS
Applications of nickel. Annual report (Ni production and consumption; possibility for substitutions in event of shortage), 3037 (AD-846999)
Electric batteries described in recent patents, 4788

IRON-NICKEL BATTERIES/OPERATION
Reconditioning process for a nickel--iron battery (USSR patent), 1832 (AD-776101)

IRON-NICKEL BATTERIES/OPTIMIZATION
Traction batteries for existing and future electric road vehicles (Approx 40 Wh/kg), 819

IRON-NICKEL BATTERIES/PERFORMANCE
Development of an alkaline nickel--iron storage battery for electromobiles (32 Wh/kg for 5 h discharge time, for trucks), 1113
Performance of nickel-iron cells operating under pulse conditions (Pulsed loads), 2496 (AD-692361)
Present position of electric storage battery, 1598
Secondary batteries for electric vehicles, 4854 (ANL-76-8)
Traction batteries for existing and future electric road vehicles, 603 (AED-Conf-76-444-016)

IRON-NICKEL BATTERIES/PERFORMANCE TESTING
Evaluation of Ni-Fe and Ni-Zn batteries. Report No. 2 (final), 1 November 1967-30 January 1969 (Effects of design modifications on output), 1891 (AD-852691)

IRON-NICKEL BATTERIES/PLATES
Current distribution in storage battery plates with tubular components, 4608
Rapid determination of iron in highly reduced active material in iron plates of alkaline storage batteries, 4487

IRON-NICKEL BATTERIES/PRODUCTION
Alkaline batteries, 1601
Producing storage battery parts with special equipment, 4785

IRON-NICKEL BATTERIES/PYROLYSIS
Thermal decomposition of nickel ammine complexes for producing the positive active mass in sintered electrodes (Fabrication), 4350

IRON-NICKEL BATTERIES/REGENERATION
Reconditioning process for a nickel-iron battery (Patent) 2782 (AD-776101)

IRON-NICKEL BATTERIES/REVIEWS
Applied electrochemistry (Book in Russian), 167
Chemical compositions, structures, performance, and uses of batteries; (review with 108 references), 233
Present state and future possibilities of alkaline battery, 1596
Progress in electric battery industry, 231

IRON-NICKEL BATTERIES/SILVER-ZINC BATTERIES
Progress in electric battery industry, 231

IRON-NICKEL BATTERIES/SPECIFICATIONS
Development of alkaline battery, 306 (AD-499435)

IRON-NICKEL BATTERIES/SUPPORTS
Carbonyl nickel powder (Chemical preparation of B type), 3868

IRON-NICKEL BATTERIES/TESTING
Laboratory investigations and research toward the improvement of sintered-plate alkaline storage batteries. Progress report No. 1 for period ending 31 Oct 1948, 300 (AD-493497)

IRON-NICKEL BATTERIES/USES
Another chance for electrics, 5117
Bureau of Mines approval system as applied to permissible storage-battery locomotives (first complete investigation under Schedule 15), 4862 (BM-RI-2449)
Camden Refrigerating and Terminals Company applies pallet-fork-truck system to cold-storage rooms, 5357
Miller Brewing Company adopts industrial trucking to meet demands of increased production (10-cell D4A

Edison batteries), 5366
Philadelphia Steel and Wire handles 95% of receipts, 60% of shipments in unit loads (10-, 24-, and 30-cell C8 batteries), 5362
Philblack plant of Phillips Chemical Company receives and ships in unit piallet loads, 5355
Pontiac parts warehouse shipments to G.M. parts warehouses now more than 75% palletized (10-cell D4S (3.6 kW) to 30-cell D8S (21.6 kW) batteries), 5368
Post Office Department applied power trucking to handling of parcel post in Baltimore (10-cell, 12-V D6A Edison batteries of 450-Ah capacity), 5361
Power Trucking handles all LCL ''floating freight'' in Southern Railway's Norfolk-Pinners Point terminals (42-cell A8 batteries), 5360
Studebaker foundry's industrial trucking system is modernized to keep pace with increased production, 5356
Timbering machine built by Maintenance Department of Hudson Coal Co. operates on battery power, 5367
IRON-NICKEL BATTERIES/VENTS
Pressure vent-sealed primary and secondary alkaline cells (Patent; thermoplastic, polyamides, silicone, etc.), 3320
ISRAEL/RESEARCH PROGRAMS
Energy research at Technion, 716 (NP-20116)

J

JETS/FLUID FLOW
Problem of a system of jets mixing in a transverse restricted flow, 2179

L

LANTHANUM ALLOYS/SORPTIVE PROPERTIES
Absorption and desorption rates of $H_2$ and $D_2$ for $LaNi_5$, $LaCo_5$, $LaNi_2Co_3$, and FeTi. Interim report, 3143 (AD-A-039518)
Chemical storage of hydrogen in Ni/$H_2$ cells, 4046
Heat transfer analysis of metal hydrides in metal-hydrogen secondary batteries, 3462
Investigation of metal hydride materials as hydrogen reservoirs for metal-hydrogen batteries, 3233 (N-76-27667)
LANTHANUM HYDRIDES/SORPTIVE PROPERTIES
Low pressure nickel hydrogen cell (Patent), 3880
LASERS/POWER SUPPLIES
New laser power supply, 293 (AD-483724)
LASERS/RESEARCH PROGRAMS
Independent research, 1975. Final report (Naval Surface Weapons Center, Silver Spring, Md.), 69 (AD-A-015337)
Review 1969 (Defence Research Board, Ottawa), 523 (AD-868205)
LAWRENCE LIVERMORE LABORATORY/RESEARCH PROGRAMS
Energy and technology review, 765 (UCRL-52000-76-8)
LEAD/BIOLOGICAL EFFECTS
Behavioral effects of occupational exposure to lead, 147
LEAD/CORROSION
Anodic corrosion and hydrogen and oxygen overvoltage on lead and lead antimony alloys, 4742
Effect of grid cast structure on the anodic corrosion of lead, 4234
Ion selectivity and diffusion potentials in corrosion layers: $PbSO_4$ films on Pb in $H_2SO_4$, 2335
LEAD/CORROSION RESISTANCE
Effect of copper on anodic corrosion rate in $H_2SO_4$, mechanical properties, and fluidity of lead and lead antimony alloys, 4236
LEAD/DISPERSION HARDENING
Development trends in lead materials, 4303
Dispersion strengthened lead in batteries, 4640
LEAD/ELECTROCHEMISTRY
Differential capacitance and cyclic voltametric studies on smooth lead in $H_2SO_4$ solutions, 2470
LEAD/HEALTH HAZARDS
Behavioral effects of occupational exposure to lead, 147
LEAD/MECHANICAL PROPERTIES
Development trends in lead materials, 4303
Effect of copper on anodic corrosion rate in $H_2SO_4$, mechanical properties, and fluidity of lead and lead antimony alloys, 4236
Effects of calcium, tin, and bismuth on the early strength of calcium-lead alloys, 3906
LEAD/OXIDATION
Electrochemical behavior of lead in sulfuric acid solutions, 2442
LEAD/RECOVERY
Obtaining crude lead from materials consisting essentially of oxides and sulfides (Patent), 2196
LEAD/USES
Development trends in lead materials, 4303
LEAD/WASTE PROCESSING
Waste lead oxide treatment of lead acid battery manufacturing wastewater, 168
LEAD ALLOYS
See also LEAD BASE ALLOYS
'EAD ALLOYS/CORROSION
Corrosion of lead alloys at high anodic potentials, 3434
Magnesium and magnesium alloys as anodes in electrochemical alkaline-electrolyte power sources, 3852
LEAD ALLOYS/MECHANICAL PROPERTIES
Development trends in lead materials, 4303
LEAD ALLOYS/METALLOGRAPHY
Corrosion of lead alloys at high anodic potentials, 3434
LEAD ALLOYS/OXIDATION
Corrosion of lead alloys at high anodic potentials, 3434
Electrochemical behavior of lead in sulfuric acid solutions, 2442
LEAD ALLOYS/USES
Development trends in lead materials, 4303
LEAD BASE ALLOYS/CASTING
Casting and properties of grid alloys for maintenance-free batteries, 3389
Electric storage battery grids (Patent; alloy with improved casting properties), 3642
Lead--antimony alloy for battery grids (Sb 0.5-3.0, Cu 0.1-0.07, As 0.10-0.30, S 0.002-0.005, Sn 0.02-0.08, Te 0.05-0.1 percent; patent), 3723
Lead-acid batteries with low antimony alloys (1 to 4% Sb with Se additions), 3418
Lead alloy and battery grid prepared from it (Patent; 0.06 to 0.1 Ca and 0.1 to 0.4 percent Sn), 3646
Low-antimony maintenance-free batteries, 3179 (CONF-7610115-)
Recent results on lead--calcium alloys as grid materials for lead--acid batteries (Gravity and pressure casting) 4199
LEAD BASE ALLOYS/CHEMICAL REACTIONS
Role of antimony in the lead--acid battery. 1. Effect of antimony on the anodic behavior of lead, 2319
LEAD BASE ALLOYS/CORROSION
Behavior of lead alloys as $PbO_2$ electrodes, 3327
Effect of grid cast structure on the anodic corrosion of lead (Pb--0.09 Ca, Pb--0.46 Ag, Pb--6 Sb, Pb--11.6 Sb, Pb--6 Sb--0.2 Ag--0.2 As--0.5 Sn), 4234
Effect of copper on anodic corrosion rate in $H_2SO_4$, mechanical properties, and fluidity of lead and lead antimony alloys, 4236
Investigation of the intergranular corrosion of lead-antimony grid alloys, 2879 (AD-633078)
Mechanical and corrosion properties of low antimony lead alloys, 3459
Mechanical and corrosion properties of low antimony lead alloys, 3460
Mechanism of the effect of arsenic on the corrosion behavior of lead--antimony storage battery alloys, 3794
LEAD BASE ALLOYS/CREEP
Creep resistance of lead casting alloys for battery grids (5 to 9% Sb, additions of As, Cu, Ca), 4159
LEAD BASE ALLOYS/FABRICATION
Alloys for electrode grids for lead--acid batteries, 4169
Development of low antimony lead alloys for starter batter grids, 4090
Lead base alloy for use in a storage battery grid (Patent; 0.5 to 2% Zr and Sr), 3281
LEAD BASE ALLOYS/MANUFACTURING
Microstructural control in lead alloys for storage battery application, 1085
LEAD BASE ALLOYS/MECHANICAL PROPERTIES
Development of low antimony lead alloys for starter battery grids (1.6 to 3.5 percent Sb), 3963
Effect of copper on anodic corrosion rate in $H_2SO_4$, mechanical properties, and fluidity of lead and lead antimony alloys, 4236
Maintenance-free batteries: the lead-calcium-tin approach, 3178 (CONF-7610115-)
Mechanical and corrosion properties of low antimony lead alloys, 3459
LEAD BASE ALLOYS/METALLURGY
Effect of base lead composition on metallurgical properties of maintenance-free battery alloys (Pb-Ca; Pb-Ca-Sn; additions of Bi, Sb, Cu, Ag), 3410
LEAD BASE ALLOYS/PICKLING
Removal of surface antimony from antimony lead alloys by sulfuric acid-hydrogen peroxide pickling, 4235
LEAD BASE ALLOYS/POROSITY
Microporosity in lead-antimony grid alloys, 2910 (AD-672889)
LEAD BASE ALLOYS/RECOVERY
Investigation of lead storage batteries scrap processing by melting with antimony trisulfide (Recovery of antimonial lead), 1276
LEAD BASE ALLOYS/REVIEWS
Microstructural control in lead alloys for storage battery application, 3783
LEAD BASE ALLOYS/STRAIN HARDENING
Strain hardening of Pb-Sb alloys (1 to 7% Sb, <0.2% As), 3727
LEAD BASE ALLOYS/TENSILE PROPERTIES
Development of low antimony lead alloys for starter batter grids, 4090
Lead alloy for producing attention-free lead--acid batteries, 3581
Lead-calcium wrought alloys (Patent), 3973
Mechanical and corrosion properties of low antimony lead alloys, 3460
Study of lead-rich Pb-Cd-Sb alloys (Pb-3.0Cd-2.5Sb), 4263
LEAD BASE ALLOYS/YIELD STRENGTH
Lead alloy for producing attention-free lead--acid batteries, 3581

LEAD COMPOUNDS/THERMODYNAMIC PROPERTIES
Corrosion in alkali hydroxide solutions of electrolytic zinc powder containing codeposited lead, 3448
LEAD FLUORIDES/CRYSTAL STRUCTURE
Neutron scattering studies of solid electrolytes, 3165 (BNL-21367)
LEAD OXIDES/CHEMICAL PROPERTIES
Positive plate of the lead-acid cell. A critical review of recent literature, 2920 (AD-684765)
LEAD OXIDES/CHEMICAL REACTIONS
Stability and reactivity of lead oxides ($\alpha$- and $\beta$-$PbO_2$), 4669
LEAD OXIDES/CRYSTAL STRUCTURE
Plate materials of the lead-acid cell. Part 3. Anodic oxidation of tetragonal PbO. Final report, 2899 (AD-664827)
Structural transformations of lead(IV) oxide active material during cycling, 4125
LEAD OXIDES/ELECTRICAL PROPERTIES
Electrical properties of electrodeposited $PbO_2$ films, 4455
LEAD OXIDES/ELECTRODEPOSITION
Function of ac superimposed on dc in anodic oxidation of lead in sulfuric acid, 4674
LEAD OXIDES/ENTROPY
Thermodynamics of lead storage cell: heat capacity and entropy of lead dioxide from 15 to 318°K, 4511
LEAD OXIDES/MATERIALS RECOVERY
Waste lead oxide treatment of lead acid battery manufacturing wastewater, 168
LEAD OXIDES/PHASE DIAGRAMS
Investigation of the plate materials of the lead-acid cell: compound formation between lead monoxide and lead sulfate. Report No. 1, 2869 (AD-620552)
LEAD OXIDES/PHASE STUDIES
Phase composition of electrode pastes in lead storage batteries, 4148
LEAD OXIDES/REDUCTION
Pollution-free electrochemical power generation from low grade coal (Pb/air battery with PbO reduced by coke), 3250 (PB-228006/3)
LEAD OXIDES/SPECIFIC HEAT
Thermodynamics of lead storage cell: heat capacity and entropy of lead dioxide from 15 to 318°K, 4511
LEAD OXIDES/STABILITY
Stability and reactivity of lead oxides ($\alpha$- and $\beta$-$PbO_2$), 4669
LEAD SULFATES/CHEMICAL PREPARATION
Variable composition of basic lead sulfates, 4038
LEAD SULFATES/CHEMICAL PROPERTIES
Basic sulfates of lead, 4803
LEAD SULFATES/CRYSTAL STRUCTURE
Plate materials of the lead-acid cell. Part I. Anodic oxidation of the basic sulfates of lead. Final report, 2874 (AD-625693)
LEAD SULFATES/ENTHALPY
Lead sulfate: heat capacity and entropy from 15 to 330°K, 4714
LEAD SULFATES/ENTROPY
Lead sulfate: heat capacity and entropy from 15 to 330°K, 4714
LEAD SULFATES/OXIDATION
Plate materials of the lead-acid cell. Part I. Anodic oxidation of the basic sulfates of lead. Final report, 2874 (AD-625693)
LEAD SULFATES/PHASE DIAGRAMS
Basic lead sulphate and its formation in preparation of electrodes for lead storage batteries, 4718
Investigation of the plate materials of the lead-acid cell: compound formation between lead monoxide and lead sulfate. Report No. 1, 2869 (AD-620552)
LEAD SULFATES/PHASE STUDIES
Phase composition of electrode pastes in lead storage batteries, 4148
LEAD SULFATES/SPECIFIC HEAT
Lead sulfate: heat capacity and entropy from 15 to 330°K, 4714
LEAD-ACID BATTERIES
Electrical battery (Design of carrying handle sub-assembly; patent), 3498
Power sources for compact communications and electronic equipment (Brief history of development), 1593
Varta Technical Book Series, Volume 1: lead storage batteries, 162
LEAD-ACID BATTERIES/ADDITIVES
Lead-calcium grid battery with phosphoric acid additive, 2559
New substance is intended to increase battery life (AD-X2), 4801
LEAD-ACID BATTERIES/ALTERNATORS
Alternators: types, advantages, and applications, 4703
Alternator and control systems (40- to 100-amp systems), 4692
Chrysler alternator (Summary of research work), 4705
Electronic alternator system-isolation diode (Blocks current from battery back to alternator), 4690
Flat current-generation system, 4605
Rectifiers for automotive alternator systems, 4704
LEAD-ACID BATTERIES/ANODES
1971 F. M. Becket Memorial Award report. Preliminary investigation into the behavior of lead alloy anodes in sulfuric and chromic acid solutions (Effects of alloying with tin and antimony), 4300
Addition agents for negative plates of lead-acid storage batteries. II (Carbohydrates, phenols), 4765
Anode for lead batteries (Patent; Sn coating for Cu grid to prevent undesirable electrochemical reactions), 3537
Anode of lead storage battery (Patent), 3592
Anodic behavior of ternary lead-calcium alloys in lead storage batteries, 4809
Anodic corrosion of large-surface plates of lead, 4790
Anomalies of the negative plate in the lead-acid battery, 4412
Autoradiographic recording of partially discharged negative grid plates of lead storage batteries, 4484
Battery paste expander material (Patent), 4331
Battery performance negative-plate improvements, 4603
Behavior of some surface-active materials in the lead storage batteries, 4345
Corrosion: Tension factor in the anodic peroxidation of lead, 4709
Cyclic voltammetry on lead electrodes in sulphuric acid solution, 3305
Cycling anodic coatings on pure and antimonial lead in $H_2SO_4$, 2936 (AD-728431)
Device for drying negative plates and plates made therewith (Patent), 3703
Differential capacitance and cyclic voltametric studies on smooth lead in $H_2SO_4$ solutions, 2470
Discharge characteristics of lead/lead sulfate electrode, 4578
Dry-charged, storable negative plates for lead storage batteries (Patent; preparation), 4257
Drying of battery plates (Patent; inducting heating), 3747
Effect of the anode thickness on the operation of a lead--acid storage battery at high discharge current densities, 4052
Effect of additives on the reaction mechanism of the Pb/$PbSO_4$ electrode ($BaSO_4$, lignin), 4023
Effect of an industrial expander on the discharge process of a lead microelectrode in 4.5 M sulfuric acid (Vanisperce), 3369
Effect of pressure on discharge characteristics of a negative electrode, 2466
Effect of surface-active additions on the polarization distribution in the depth of porous electrodes, 4344
Evaluation of fillers used in the negative lead battery electrode (Acetylene black, $BaSO_4$, lignin, humic acid, wood flours), 4073
Evaluation of expanders used in the negative lead battery electrode, 3904
Expander action in the lead--acid battery. 2. Inhibition of nucleation processes, 4017
Expander for lead battery anode (Patent), 3899
Expander for the negative electrode of a lead-acid storage battery (Patent; chemical preparation), 4356
Expander for the negative electrode of a lead-acid storage battery (Patent; procedure for preparation), 4357
Extruding an electrode and a cell having an electrode made thereby (Patent), 3887
Formation processes of the lead--acid battery negative plates (Processes within bulk of the negative plate), 3993
Forming lead-based anodes (Patent), 4291
Functions and behavior of components of expanders for negative plates of lead-acid storage batteries, 4779
Highly active dense pastes made from lead powder, 4401
Hydrogen overpotential on porous lead electrodes, 4726
Influence of surface-active agents on passivation of lead electrode, 4618
Instantly usable storage battery (Patent; anode with oxidation-preventing resin coating decomposed by electrolyte), 1164
Ion selectivity and diffusion potentials in corrosion layers. $PbSO_4$ films on Pb in $H_2SO_4$, 4277
Ion selectivity and diffusion potentials in corrosion layers: $PbSO_4$ films on Pb in $H_2SO_4$, 2335
Kinetics of anodic lead dissolution of $H_2SO_4$, 3822
Lead battery storable without electrolyte (Patent; oxidation of anode prevented by Pb--10 percent Na alloy), 2258
Lead dioxide--titanium composite anodes (Patent), 3681
Lead-platinum bi-electrodes (Change in electrode behavior effected by introducing small piece of Pt into Pb electrode), 4727
Lead storage battery (Patent; fabrication), 3632
Lead sulfate distribution in discharged negative electrode plates of lead batteries (Dependence on discharge current density and degree of discharge), 4233
Mechanical and corrosion properties of low antimony lead alloys, 3459
Mechanism of formation of lead anodes in $H_2SO_4$-$HClO_4$ mixtures, 4612
Mechanism of the formation of blisters on the lead electrode of the lead-acid battery, 4292
Mechanism of the effect of organic additives on the operation of a negative lead battery electrode (Effects on $PbSO_4$ crystallization), 2467
Method of manufacturing lead electrodes for storage cells (Patent), 3515
Migration of arsenic and antimony on the negative electrode of a lead battery and self-discharge of the negative electrode, 4100

Negative electrode plate for lead storage batteries (Patent; lignin and PVA additives extend battery lifetime), 4173
Negative plates for dry-charged lead storage batteries (Patent; higher charging capacity when impregnated with tannin solution), 4378
New experimental technique for study of films produced at electrochemical interfacees (Corrosion films), 4722
New technology for manufacture of dry-charged lead batteries, 1250
Oxidation of Pb in $H_2SO_4$, 4271
Physicochemical properties of oxide films on lead and its alloys, 3801
Polymer-bonded negative electrodes for lead--acid batteries (Evaluation vis a vis conventional posted electrodes), 4054
Positive grid design principles, 4379
Reproducibility of lead electrode and electromotive force of lead stick-lead amalgam cell at 0 to 60°C, 4817
Role of barium sulfate in negative plate of lead storage battery, 4645
Some aspects of charge and discharge processes in lead-acid storage batteries, 4755
Storage battery plates (Patent), 3976
Structure of the lead/lead sulfate electrode in the reduced state and the changes produced by lignin derivatives and barium sulfate, 4085
Studies on active materials for lead storage battery plates (on the relation between acid absorption curves and anode performances), 4775
Theory of the lead storage battery, 2577
Theory of porous electrodes. XII. Negative plate of the lead--acid battery, 4066
Theory of porous electrodes. XII. Negative plate of the lead--acid battery (Transport of mass and electricity), 4070
Tubular electrodes for batteries (Patent; Pb or Pb-Sb alloys), 3633
Voltammetric investigations of negative lead battery electrodes: the effect of organic expanders (Formation process of Pb sheets in $H_2SO_4$), 4230
Volumetric determination of lead sulfate content in the active masses of lead battery electrodes, 4429

LEAD-ACID BATTERIES/ANTIMONY HYDRIDES
Decomposition of stibine (Stibine evolved from lead storage batteries), 2652

LEAD-ACID BATTERIES/BATTERY CHARGERS
Advances in automobile battery charging equipment, 4609
Application of semiconductors to automotive charging circuitry, 4691
Automatic battery charger, 4033
Automatic charging of lead acid batteries using silicon controlled rectifiers, 4036
Automatic charging of unspillable lead accumulators, 4621 (AD-807778)
Automatic control of lead-acid battery charging equipment, 4784
Automatic control of lead-acid-battery charging equipment, 4798
Automotive electrical equipment, its operation and maintenance (Book), 4791
Avostat-controlled dry plate rectifiers with battery reserve, 4813
Charging equipment, mobile (CEM). Final report Oct 1972-Nov 1974, 3139 (AD-A-036071)
Charging nickel--cadmium and lead--acid batteries from common generator, 4270
Charging system design can cut vehicle maintenance costs, 4507
C[illegible]loride unveils the ''Silent Rider'' (Battery-powered 30-passenger city bus), 5120
Conveyorized testing of generator regulators, 4780
Electrical equipment, 4650
High speed production of automobile generator frames by automatic metallic arc welding, 4816
Industrial battery charger for mobile equipment use (20 A), 4227
It's still 12 volts, 4737
Keeping car batteries charged, 4778
No-break power supply for radio link stations in Venezuela, 5226
Storage battery charging system with alternator output fault indicating circuit (Patent), 3350
Swaged generator pole shoes conserve copper wire, 4783
Thermoelectric silent battery charger, 4531
Thyristor battery charger for ships, 3106 (AD-914883L)
Transistorized regulator gives reliable control of battery charging rate, 4672
Trends and development of automotive electric equipment, 4749
Understanding chargers for motive-power batteries: basic principles, 3285
Understanding chargers for motive-power batteries: optional features, 3277
Uninterrupted power supply for radio relay stations in Venezuela, 5227

LEAD-ACID BATTERIES/BATTERY CHARGING
Accumulators for traction: new accumulators charging processes, 2326
Apparatus and method for terminating the charge of storage batteries (Patent), 3531
Automotive battery cars (Series of monthly articles), 1618
Batteries used with law enforcement communications equipment: chargers and charging techniques, 3249 (PB-221475)
Battery charging at low temperature, 2242
Battery charge condition monitoring: techniques and applications, 4946 (CONF-740215-P2)
Battery emergency lighting plant, 2654
Charge acceptance of the lead cell at various charging rates and temperatures (0 to 40°C), 2457
Charge acceptance characteristics of the lead-acid cell, 2041 (CONF-711166-)
Charging Ni-Cd and Pb-acid batteries from common generator, 2375
Charging performance of over-discharged lead-acid batteries, 2421
Clean transportation for new towns: DAIHATSU electric vehicles in the Senboku area, 5044
Custom chargers and matched cells increase life of sealed batteries, 2160
Design of vibrating type regulator for automobiles, 4676
Desulfation of the lead storage-battery plates (Patent), 2250
Desulphurization of electric storage batteries, 2679
Development of effective means of low-temperture charging of lead-acid batteries. Progress report No. 1, 1 Mar-1 Jun 1949, 1686 (AD-471952)
Development of effective means of low-temperature charging of lead-acid batteries. Quarterly progress report No. 2, 1 Jun-1 Sep 1949 (Behavior of positive plates), 1687 (AD-471953)
Development of effective means of low-temperature charging of lead-acid batteries. Quarterly progress report No. 3, 1 Sep-1 Dec 1949 (-40°), 1688 (AD-471954)
Development of effective means of low-temperature charging of lead-acid batteries. Quarterly progress report No. 4, 1 Dec 1949-1 Mar 1950 (-40°), 1689 (AD-471955)
Effect of the electrolyte temperature during charging of plates on the characteristics of electrodes and cells of lead-acid automotive storage batteries (20 to 64°), 4286 (AD/A-006079)
Electric vehicle batteries: usage and abusage, 2042 (CONF-711166-)
Emergency lighting battery systems, 2658
Engineering analysis of thermal phenomena for lead-acid batteries during recharge processes, 2033 (ANL-77-24)
Expander action in the lead--acid battery. 2. Inhibition of nucleation processes, 4017
Fast charging lead storage batteries (Evaluated mathematical model for cathode), 2224
Fast charging of car batteries (Recommendations), 2743
Float behavior of the lead-acid battery system, 2436
Fluctuation of the voltage of batteries during charging with an asymmetrical alternating current, 1820 (AD-756557)
Gas liberation in a lead-acid storage battery (*Recommendations for reducing*), 2049 (EPRI-EM-448-SR)
How to keep your battery happy while charging (Constant-current vs modified-constant-potential methods), 2668
Interferometric study of low temperature charging of the lead-acid cell, 2147
Investigation on floating voltage of lead-acid storage batteries, 4353
Lead-acid battery and its associated controlgear: survey of applications and operating principles, 2682
Low temperature recharge of the lead--acid system (Effects of temp. and $H_2SO_4$ concn. on formation of peroxydisulfuric acid at $PbO_2$ electrode), 2006 (AD-A-011027)
Low temperature oxidation kinetics of anodic films on lead in sulfuric acid solution (0° to -50°C), 2141
Mechanism of the formation of blisters on the lead electrode of the lead-acid battery, 4292
New battery state-of-charge indicator especially for use in electric vehicles, 3829
Principles of battery charging, 2746
Rapid charging of lead acid batteries, 2360
Rapid charging batteries for electric propulsion systems (24-Ah Ni/Cd in 5 to 10 min, 190-Ah lead-acid in 20 to 30 min.), 2396
Reducing dendrite formation when charging accumulator batteries (Patent), 2251
Regular battery PM gives you lift trucks when you need them, 2569
Safety device against overcharging for mainenance-free storage batteries, 3956
Some aspects of charge and discharge processes in lead-acid storage batteries, 4755
Specific properties of small closed lead accumulators using an immobilized electrolyte, 2459
Storage batteries: review of recent patents (Patents from 1944 to 1947), 2753
Storage battery: its part in engine tune-up, 2758
Storage batteries (Effects of charging temperature on life and low-temperature performance), 2772
Studies on charging performance of over-discharged lead--acid batteries, 1964 (AD-912262L)
Temperature dependence of charging rate of $Pb/PbO_2$ storage batteries, 2550
Temperature influences battery life and performance, 2138
Voltage at end of charge of lead plate accumulators, 2748

LEAD-ACID BATTERIES/BATTERY PASTE

Basic lead sulphate and its formation in preparation of electrodes for lead storage batteries, 4718
Basic sulfates of lead, 4803
Dependence of the properties of the lead-acid battery positive plate paste on the processes occurring during its production, 3412
Dependence of the properties of the lead-acid battery positive plate paste on the processes occurring during its production, 3413
Lead-acid storage battery paste (Patents), 3476
Phase composition of negative pastes of lead storage batteries, 3843
Pore volume and density of unformed pastes of lead-acid battery plates, 3409
Use of magnetically treated sulfuric acid solutions in the production of lead storage batteries, 2468
LEAD-ACID BATTERIES/BATTERY SEPARATORS
Acid-resistant glass fiber for battery separators (Fabrication), 4369
Battery separator manufacturing process (Patent; improved retention of wetting agent), 3685
Battery separator (Patent; fabrication from nonwoven mats of polypropylene), 3488
Current trends in battery separators, 3846
Lead storage battery (Patent; acid- and oxidation-resistant separator with improved performance), 3957
Lead storage battery (Patent), 3964
Micropore: sintered PVC separator for lead storage batteries, 4580
Microporous thermoplastic separators for lead acid batteries, 4763
Microstructure of storage battery separators, 4707
Note on the stability of impregnated paper separators, 3771
Patent; production of lead batteries with envelope-type separators of synthetic resin, 3535
Phenolic resin and battery separator impregnated therewith (Patent), 3474
Recent patents on electric batteries, 4758
Separator for lead storage battery (Patent), 3655
Separator for a storage battery (Patent), 3602
Separator for a dry-charge lead storage battery (Patent), 4325
Separators for lead storage batteries (Patent), 3603
Separators for a storage battery (Patent; fibrous material impregnated with organopolysiloxane), 3367
Water-activated dry-charged lead-acid batteries, 4414
X-ray diffraction, scanning electron microscopy study of separator failure (Resin-bonded paper separators), 3423
LEAD-ACID BATTERIES/BIBLIOGRAPHIES
Lead batteries (a bibliogrphy with abstracts). Period covered: 1964-May 1975, 103 (NTIS/PS-75/472)
Lead batteries (citations from the NTIS data base). Report for 1964-May 1976 (74 abstracts), 109 (NTIS/PS-76/0549)
Lead batteries (citations from the Engineering Index data base). Report for 1970-May 1976 (178 abstracts), 110 (NTIS/PS-76/0550)
LEAD-ACID BATTERIES/BONDING
Positive seal for batteries employing plastic casings (Patent), 3503
LEAD-ACID BATTERIES/CATHODES
Antimony plating of lead-acid storage batteries grids (Patent), 4022
Application of autoradiographic techniques to battery research, 4633
Autoradiographic recording of partially discharged negative grid plates of lead storage batteries, 4484
Behavior of lead alloys as $PbO_2$ electrodes (Corrosion behavior), 3327
Cathodes for lead--acid batteries (Patent; fabrication), 3967
Characterization of the cycled cathode-active mass of the lead storage battery (Phase compn., crystallite size, sp. surface area, pore vol., pore-size distribution), 3791
Characterization of positive plates of lead batteries by x-ray diffraction, 4575
Clad-type electrodes for lead storage batteries (Patent; fabrication), 3583
Composition and performance of positive plate material in lead-acid battery (Influence of $\alpha$-$PbO_2$), 4696
Computer-aided determination of physical parameters of porous electrode materials by porosity measurements, 3775
Crystallographic changes encountered in processing of positive lead-acid battery active material, 4558
Current distribution in the porous lead dioxide electrode, 4192
Cyclovoltametric study of lead--acid battery electrodes ($\alpha$- and $\beta$-$PbO_2$), 4086
Dependence of the properties of the lead-acid battery positive plate paste on the processes occurring during its production, 3412
Dependence of the properties of the lead-acid battery positive plate paste on the processes occurring during its production, 3413
Development of effective means of low-temperature charging of lead-acid batteries. Quarterly progress report No. 2, 1 Jun-1 Sep 1949 (Behavior of positive plates), 1687 (AD-471953)
Double walled tubes for positive plates of lead cells (Patent; fabrication method), 3497
Effect of depth of discharge on the cycle life of positive lead-acid plates, 2904 (AD-671685)
Effect of technological factors on the structure of pastes and the formed active substance of the positive electrode of a lead battery, 4119
Effect of sample configuration on its corrosion deformation (Behavvior of grid fibers, polygonal shapes), 4121
Effect of the addition of polypropylene fiber on the strength of the positive electrode material of a lead storage battery, 3795
Effect of some inorganic additives on the cycle life of the positive electrodes in the lead-acid cell ($Sb_2O_3$, $As_2O_3$, $P_2O_5$), 3315
Effect of low-frequency acoustical vibrations on the formation of active materials of a lead battery positive electrode (100 Hz), 4437
Effect of lead structure of the positive electrode of secondary electric batteries on its electric efficiency, 3492
Effects of technological parameters on changes in phase composition of pastes and positive electrodes of acid storage batteries (27 to 100°), 2302
Effects of discharges on positive plates in lead batteries, 3361
Electrical properties of electrodeposited $PbO_2$ films, 4455
Electrochemical behavior of the lead dioxide electrode, 3826
Electrolytic behavior of lead dioxide, 2620
Fast charging lead storage batteries (Evaluated mathematical model for cathode), 2224
Formation of negative plates of lead accumulators. IV. Effect of raw materials and mixing solutions on the conditions of formation, 4776
Function of ac superimposed on dc in anodic oxidation of lead in sulfuric acid, 4674
Hydrogen-loss concept of battery failure: the $PbO_2$ electrode, 4151
Important factors that influence composition of positive plate material in lead-acid battery, 4697
Investigation of the surface structure of some lead dioxide and related electrodes, 3301
Kinetics of the $PbSO_4/PbO_2$ electrode at low temperatures (-50° to 0°C), 3827
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 4 (annual), 282 (AD-471973)
Lead-acid storage batteries (Investigation of possible contamination of cathode with negative paste mixture), 4753
Lead-acid storage batteries. Changes in positive active material density during various conditions of service (15 plates, 100 Ah), 2649
Lead-acid batteries: use of carbon fiber-lead wire grids at the positive electrode (Advantages of use), 3526
Lead calcium battery. Part 4. Comparison of lead calcium and lead antimony cells in float (Performance comparison for Ca and Sb in grids), 1723 (AD-602378)
Lead dioxide as a soluble electrode (Cathodic dissolution and anodic deposition), 3768
Lead dioxide battery plate (Patent), 3625
Lead oxide sulfuric acid battery having a positive electrode comprising a titanium-molybdenum-zirconium alloy grid (Patent), 4328
Lead storage battery (Patent; electrode fabrication), 3594
Lead storage battery oxides with metallic additions, 2662
Lead storage battery electrode and method (Patent; lacquer coating to reduce peak effect in tube-type plates), 3295
Lead-tin-barium alloy for positive grids of lead/acid batteries, 4724
Low-rate cathodic linear sweep voltammetry (LSV) studies on anodized lead, 3571
Low temperature recharge of the lead--acid system (Effects of temp. and $H_2SO_4$ concn. on formation of peroxydisulfuric acid at $PbO_2$ electrode), 2006 (AD-A-011027)
Mechanism of the effect of arsenic on the corrosion behavior of lead--antimony storage battery alloys, 3794
Mechanism of the processes of formation of lead-acid battery positive plates, 4299
Method and apparatus for filling adjacent insulating tubes forming the positive plate of a lead--acid storage battery (Patent), 970
Method for the production of lead storage battery electrodes (Patent), 3422
Microstructural aspects of grid corrosion in the $PbO_2$ electrode, 3357
Microstructural comparison of positive float and trickle discharge operations on the positive electrodes of submarine storage batteries with lead-calcium alloy grids. Master's thesis, 3110 (AD-A032298)
Morphology of $PbO_2$ in the positive plates of lead-acid cells, 2857 (AD-609966)
New grid casting improves battery life, 4799
New technology for manufacture of dry-charged lead batteries, 1250
Oxygen overvoltage and electrode potentials of $\alpha$ and $\beta$-$PbO_2$, 4720

$PbO_2$ in lead-acid cell. I (Fabrication), 4470
Phase properties of positive active elements of lead storage batteries, 4543
Plate materials of the lead-acid cell. Part 4. Anodic oxidation of three representative oxides. Final report, 2914 (AD-677033)
Positive electrodes for lead storage batteries (Patent), 3610
Positive plate of the lead-acid cell. A critical review of recent literature, 2920 (AD-684765)
Positive plate sulfation characteristics of the lead-calcium grid battery. Final report, 2828 (AD-476224)
Positive plate sulfation processes in thin- and thick-plate Pb-Ca grid batteries, 4560
Positive-plate self-discharge in lead-acid cell, 4770
Positive plates for lead-acid storage battery cells (Patent; formation), 4313
Potentiostatic forming of positive lead electrodes, 4493
Prevention of adhesion of piled pasted lead--acid battery cathodes (Patent), 1152
Progress of the discharge reaction of positive active masses of the lead-acid storage battery, 3359
Reaction layers and electrochemical properties in tubular electrodes due to engineering design, 4273
Recent developments in the NRL-ILZRO investigation of the porous $PbO_2/PbSO_4$ electrode, 3823
Reserve battery electrodes using bonded active materials (Patent; preparation), 4312
Role of antimony in positive plate behavior in lead-acid cell, 4643
Role of porosity in the modern technology of batteries, 4376
Self-discharge of lead-acid batteries, 2647
SEM [scanning electron microscope] observation of the charge-discharge process at the positive electrode in a lead--acid battery, 3813
Some properties of electrodeposited lead dioxide (Supremacy of deposition from nickel chloride electrolyte), 3572
Stability of lead dioxide electrode stock during storage at 160°F, 3082 (AD-903317L)
Stability and reactivity of lead oxides ($\alpha$- and $\beta$-$PbO_2$), 4669
Structural transformations of lead(IV) oxide active material during cycling, 4125
Study of some of the crystallographic and microscopic aspects of the curing of positive lead-acid battery plates, 4415
Study of the cyclic performance of submarine type lead-acid storage batteries by examination of the positive plate structures, 3137 (AD-A-033764)
Techniques for bonding the positive plates, 4381
Tetrabasic lead sulfate as a paste material for positive plates, 4384
Theoretical model for the porous lead(IV) oxide electrode in the lead--acid battery, 4282
Theory of porous electrodes. XI. Positive plate of the lead--acid battery, 4160
Theory of the positive plate of the lead-acid battery, 3778
Thermal decomposition mechanism of formed and cycled lead dioxide electrodes and its relation to capacity loss and battery failure, 2306
Transfer of lead in positive electrode of lead battery, 4651
Tubular-type positive plates for use in lead-acid storage batteries (Patent), 4248
Unusual exposure to oxidation for polyethylene (Polyethylene container for lead peroxide cathodes in lead-acid batteries), 4666
Use of an antimony cathode for production of a unified storage battery alloy, 4218
Use of cathode antimony for a standard battery alloy, 4210
Use of humic acids in storage batteries, 4200
Use of ion exchangers as an addition to the mass of positive plates in lead storage batteries, 4080
Water-activated battery (Patent; hydrophilic resin on cathode), 986

LEAD-ACID BATTERIES/CHEMICAL REACTION KINETICS
Effect of additives on the reaction mechanism of the $Pb/PbSO_4$ electrode ($BaSO_4$, lignin), 4023
Effect of temperature and current density on the utilization of lead and lead oxide electrodes (-50 to +40°C), 2458
Electrolytic behavior of lead dioxide, 2620
Expander action in the lead-acid battery. I. Effects upon the mechanism of the oxidation process, 2322
Hydrodynamic instabilities in a lead acid battery, 2172
Kinetics of the $PbSO_4/PbO_2$ electrode at low temperatures (-50° to 0°C), 3827
Kinetics on the potentiostatic oxidation of lead sulfate films on lead in sulfuric acid solution, 2140
Low temperature oxidation kinetics of anodic films on lead in sulfuric acid solution (0° to -50°C), 2141
Maintenance-free lead-acid batteries, 2198
Microscopic observations supporting the theory of lead ion supersaturation as the cause of the initial voltage minimum in the discharge curve of the lead-acid battery, 1675 (AD-466483)
Migration of arsenic and antimony on the negative electrode of a lead battery and self-discharge of the negative electrode, 4100
Study of the cyclic performance of submarine type lead-acid storage batteries by examination of the positive plate structures, 3137 (AD-A-033764)
The cyclic voltammetry of lead and lead-antimony battery grid alloy in aqueous sulphuric acid at 25 to -40 C, 3140 (AD-A-036290)

LEAD-ACID BATTERIES/CHEMICAL REACTIONS
Basic sulfates of lead, 4803
Effects of technological parameters on changes in phase composition of pastes and positive electrodes of acid storage batteries (27 to 100°), 2302
Electrochemical behavior of lead in sulfuric acid solutions, 2442
Fundamentals of battery operation and care, 2762
Investigation of the transfer of arsenic and antimony at the negative electrode of lead storage battery and self-discharge of negative electrode, 2317
Lead-lead II sulfate system in sulfuric acid studied by the impedance measuring method, 2246
Model for discharge of storage batteries, 2328
Positive plate sulfation processes in thin- and thick-plate Pb-Ca grid batteries, 4560
Positive-plate self-discharge in lead-acid cell, 4770
Principles of lead storage batteries, 2756
Radioisotope techniques in study of lead-acid battery reaction phenomena, 1479
Role of antimony in the lead--acid battery. 1. Effect of antimony on the anodic behavior of lead, 2319
Self-discharge reactions in lead-acid batteries (Rates for 7 reactions), 2650
Self-discharge of lead-acid batteries, 2647
SEM [scanning electron microscope] observation of the charge-discharge process at the positive electrode in a lead--acid battery, 3813
Storage batteries: construction, care, maintenance (Principles of operation and chemical reactions involved), 2651
Theory of lead storage battery, 2779
Use of radioisotopes in battery research, 1505
What is happening to the lead storage battery (Brief review), 2424

LEAD-ACID BATTERIES/CLOSURES
Battery vent plug (Patent; designed to extinguish flaming battery gas), 3641
Evaluation of lead--acid storage battery vent plugs to proposed revision of Mil-V-8800, 3102 (AD-913488L)
Filter cap for storage batteries (Patent), 3538
Storage battery for vehicles (Patent; colored float indicates level or specific gravity of electrolyte), 3551

LEAD-ACID BATTERIES/COMPARATIVE EVALUATIONS
Batteries for battery-powered vehicles (Service life, care, space requirements, initial costs), 2448
Choice and rational utilization of lead traction batteries, 5172
Choice of battery systems (100 Ah, 12 V), 2628
Critical considerations of integrating electricity driven commercial vehicles with city traffic (Economics of various energy sources), 5154
Custom chargers and matched cells increase life of sealed batteries, 2160
Economic comparison of four electric power sources for forklift trucks, 2003 (AD/A-006479)
Electrochemical power sources for vehicle propulsion, 5186
Industrial trucks: what to look for and hope for in battery power, 5269
Is lead-acid storage battery obsolete, 2622
Lead calcium battery. Part 4. Comparison of lead calcium and lead antimony cells in float (Performance comparison for Ca and Sb in grids), 1723 (AD-602378)
New assault on battery vehicles, 5103
NiCd and lead acid D-size cells meet in the rechargeable arena, 2190
Operating characteristics of storage batteries for use on ground support equipment, 1684 (AD-470655)
Study of electric automobile traction with reference to silver batteries, 2673
Survey of continuous sources of electrical power for under-ice propulsion of small submersibles. Part I. Conventional secondary batteries (300 and 800 Ah), 2024 (AD-A-035996)
Technical analysis, 5010 (PB-251490)

LEAD-ACID BATTERIES/CONDUCTOR DEVICES
Electrical conductor for lead storage batteries (Patent), 3921

LEAD-ACID BATTERIES/CONNECTORS
Alloy composition and its use in preparing parts for lead storage batteries (Patent), 3637
Battery plate connection in SLI batteries, 3346
Lead base cadmium-tin alloy useful for forming battery components (Patent; for straps which weld together grid lugs, etc.), 3322

LEAD-ACID BATTERIES/CONTAINERS
Automotive battery cars (Series of monthly articles), 1618
Battery cover (Patent), 3987
Battery with almost unlimited life has rigid PVC casing, 4397
Cell or battery housing of synthetic resin for maintenance-free batteries (Patent), 4171
New grids improve lead-acid cells (Also, use of plastic components and containers), 1587

Plastics: Styrene cases for better batteries. Modern plastics, 4747
Polyvinyl chloride battery jars and covers, 4380
Selection and utilization of batteries for deep submergence vehicles (Characteristics, design of container system, tests to 2700 psi), 2517
LEAD-ACID BATTERIES/CONTROL SYSTEMS
Study of the auxiliaries for lead-acid battery systems for peaking power. Final report for the period ending October 1976, 3180 (CONS/2114-3)
LEAD-ACID BATTERIES/COOLING
Battery cell cooling system (Patent; excess battery heat usable to warm vehicle, cooling system can also cool vehicle), 3321
Battery recombination reactor system (Patent; recombination of $H_2$ abd $O_2$), 3396
Heat removal from large batteries for load leveling, 5133
Study of the auxiliaries for lead-acid battery systems for peaking power. Final report for the period ending October 1976, 3180 (CONS/2114-3)
LEAD-ACID BATTERIES/CORROSION
Corrosion: Tension factor in the anodic peroxidation of lead, 4709
Corrosion of lead alloys at high anodic potentials, 3434
LEAD-ACID BATTERIES/CORROSION PROTECTION
Evaluation of acid eaters (Alkaline impregnated fiber glass pads for battery terminals), 2793 (AD-442706)
LEAD-ACID BATTERIES/COST
Cost and design study for electric vehicle lead-acid batteries, 640 (ANL-K-77-3621-1(Vol.1))
Design and cost study for state-of-the-art lead acid load leveling and peaking batteries. Final report (2500 cycles, 10 MW, 100 MWh), 675 (EPRI-EM-375)
Executive summary study of lead-acid battery systems for peaking power. Final report for the period ending October 1976, 664 (CONS/2114-1)
Lead-acid battery load leveling configuration: Gould presentation (20-MW, 200-MWh system), 734 (PB-251490)
State-of-the-art design study of a lead-acid load leveling battery: the ESB concept, 733 (PB-251490)
LEAD-ACID BATTERIES/COVERINGS
Polyvinyl chloride battery jars and covers, 4380
LEAD-ACID BATTERIES/CRYSTAL GROWTH
Electron microscopy of the formation of lead sulfate on lead in a lead-acid cell, 2420
LEAD-ACID BATTERIES/DESIGN
12-volt-dry-charged lead-acid batteries (45 and 100 Ah), 503 (AD-845913)
Accumulator industry, 1595
Acid dispensers for dry charged batteries (Patent), 3521
Automotive batteries, 880
Auxiliary services for a fuel-cell hybrid electric car, 5189
Battery, components, and method of making (Patent), 1172
Battery construction (Patent), 796
Battery for ignition of internal combustion engines, 1149
Battery with recessed terminals and fuse (Patent), 886
Cathodic oxygen reduction in the sealed lead-acid cell, 1442
Cells for lead--acid starter batteries (Patent), 1281
Chrysler long life battery concept (5 years or 50,000 miles), 821
Corrosion of lead alloys at high anodic potentials, 3434
Cost and design study for electric vehicle lead-acid batteries, 640 (ANL-K-77-3621-1(Vol.1))
Cylindrical lead--acid storage battery cell (Patent; $H_2SO_3$), 953
Descriptions of inventions (Collection of USSR patents), 1447 (AD-694885)
Design and fabrication of 300 volt, 3.6 kilowatt pile-type bipolar lead-acid battery for pulse duty. Final report, 29 December 1967-29 September 1968, 383 (AD-686115)
Design and cost study for state-of-the-art lead acid load leveling and peaking batteries. Final report (2500 cycles, 10 MW, 100 MWh), 675 (EPRI-EM-375)
Design and cost study for development of lead-acid batteries suitable for electric vehicle propulsion. Final report (Goals of 60 Wh/kg and 1000 cycles), 641 (ANL-K-77-3624-1)
Develop high charge and discharge rate lead/acid battery technology. Final report, 643 (APTD-1345)
Develop high charge and discharge rate lead/acid battery technology. Final report, 28 April 1971-18 March 1972, 5003 (PB-213257)
Electric propulsion for road vehicles, state of the art and present problems, 5155
Engineering study of a 20 MW lead-acid battery energy storage demonstration plant. Final report for the period ending October 1976, 663 (CONS/1205-1)
Gould Drynamic battery (Plates and separators are moist), 1129
High-impact, plastic case, lead-acid storage battery, type 2HN, 457 (AD-804814)
High power density lead-acid battery (Patent), 1176
Hydrogen--air/lead battery hybrid system for vehicle propulsion (6 kW hydrogen--air fuel cell and 4 kW/hr lead battery), 1389
Impact-resistant cell for lead-acid storage batteries (Patent; electrodes at angle do not block gas bubbles), 930
Instantly usable storage battery (Patent; anode with oxidation-preventing resin coating decomposed by electrolyte), 1164
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 1, 280 (AD-471971)
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 4 (annual), 282 (AD-471973)
Lead--acid storage battery (Patent), 1286
Lead--acid batteries (Patent), 1083
Lead--acid battery with resealable vent valve (Patent), 1073
Lead/acid battery development for heat engine/electric hybrid vehicles. Final report, 645 (APTD-1346)
Lead-acid storage battery capable of activation by the addition of electrolyte (Patent), 1200
Lead-acid reserve battery. Final report, 447 (AD-782910)
Lead-acid reserve battery, 446 (AD-782910)
Lead-acid battery load leveling configuration: Gould presentation (20-MW, 200-MWh system), 734 (PB-251490)
Lead/acid battery development for heat engine/electric hybrid vehicles. Final report, 722 (PB-221280/1)
Lead-acid battery: a new shape for an old workhorse, 1320
Lead-acid battery and its associated controlgear: survey of applications and operating principles, 2682
Lead perchlorate cell based on $HClO_4$ instead of $H_2SO_4$ (Patent), 816
Lead storage battery (Patent; performance after 55,000 km with Pb--2.5 Sb--0.8 percent As cathode and Pb--0.09 percent Ca anode), 1054
Lead storage cells (Patent; measures potential and stops discharge before dissolution of grid metals), 935
Light-weight lead-acid battery with laminated electrodes (Patent), 3397
Low-maintenance lead-acid batteries having electrolyte reservoir in vapor contact with the cells (Patent), 1328
Maintenance-free lead acid cells. Part 1, 1496
Maintenance-free lead acid cells. Part 2, 1497
Maintenance-free light lead-acid battery (Patent), 1056
Maintenance free lead storage battery (Patent; excess positive active mass), 787
Method of activating storage batteries (Patent), 980
Modular battery construction (Patent), 1161
New lead-acid battery design proposed for utility peaking and load leveling applications (Goal of 100-MWh facility), 732 (PB-251490)
New lead-acid batteries for electric vehicles and approach to their evaluation method, 74 (CONF-740215-P1)
Optimization of the lead-acid battery for powering electric road vehicles, 818
Patent; improved liquid supply device and gas exhausting device, 1029
Plural cell battery (Patent; rod-shaped electrodes which may pass straight through common wall between cells), 908
Recent patents on electric batteries, 4758
Recommended practice for installation design and installation of large stationary generating station and substation lead storage batteries, 1261
Regenerative fuel cell system (Patent; hydrogen fuel cell-secondary battery combination; $H_2O$ produced in fuel cell used by battery), 1336
Report on an engineering study of a 20-MW, 200-MWh lead-acid battery energy storage demonstration plant, 5009 (PB-251490)
Reserve batteries for Bell System use, 1411
Round shape doubles battery life, 1418
Sealed lead storage battery (Patent; overcomes problems due to generation of $H_2$ and $O_2$), 933
Sealed lead-acid battery "HI-SEAL" for stationary use, 1417
State-of-the-art design study of a lead-acid load leveling battery: the ESB concept, 733 (PB-251490)
Storage battery having spiral electrodes (Patent), 932
Storage battery (Patent; sealed, maintenance-free with cylindrical electrodes), 1153
Storage battery cells (Patent), 973
Storage battery (Patent; replacment of active elements), 955
Storage battery and method of forming the same (Patent; maintenance-free, vibration-resistant battery), 781
Vehicle storage battery cell (Patent; resilient plate supports), 830
Vibration-proof battery (Patent; for motorcycles, etc), 920
Vibration-proof lead-acid batteries, 1563
Water-activated lead-acid dry-charged battery (Polyethylene container, 93 percent of $H_2SO_4$ immobilized in phenolic foam block), 742 (SAE-TP-720040)
Water activated lead acid storage battery cell having dry discharged electrodes (Patent), 1178
Water-activated battery (Patent; hydrophilic resin on cathode), 986
Water activated lead-acid storage battery cell having dry discharged electrodes (Patent; $NaHSO_4$ pellet to produce uniform electrolyte and reduce dendrite formation), 1179

Water activation and pressure equalization of electrochemical batteries (Patent; electrolyte restoration after deployment in deep water), 802
LEAD-ACID BATTERIES/ECONOMICS
Batteries for storage of wind-generated energy, 2075 (N-74-16784)
Capital cost credits for battery energy storage: comments on workshop results and discussions, 2105 (PB-251490)
Case for lead-acid storage battery peaking systems, 2214
Economic analysis, 5011 (PB-251490)
Economic impacts of electric cars in St. Louis and Philadelphia, 5019 (TEC-75/006c)
Study of the auxiliaries for lead-acid battery systems for peaking power. Final report for the period ending October 1976, 3180 (CONS/2114-3)
LEAD-ACID BATTERIES/EFFICIENCY
Operating efficiency of lead-acid batteries (Temperature and discharge-rate effects), 2687
Principles of lead storage batteries, 2756
LEAD-ACID BATTERIES/ELECTRIC CABLES
Aluminium battery cable (Patent), 3626
LEAD-ACID BATTERIES/ELECTRIC CONDUCTIVITY
Comparison between calculated and measured behavior of a lead acid battery and reasons for the deviations, 2386
Resistance and polarization in storage battery (100-Ah battery studied at 30 to 16000 Hz), 2675
LEAD-ACID BATTERIES/ELECTRIC CURRENTS
Discharge of chemical constant-current sources storage batteries, 2514
Investigation into the pulsed and steady discharge of lead acid batteries, using a thyristor chopper circuit (electric vehicles), 5163
LEAD-ACID BATTERIES/ELECTRIC GENERATORS
Generator and battery system evaluation in city traffic, 2625
Voltage and current regulation of generators with permanent magnets, 4710
LEAD-ACID BATTERIES/ELECTRIC IMPEDANCE
Evaluation of the effective grid resistance in lead-acid secondary battery cells, 2401
Fluctuation of the voltage of batteries during charging with an symmetrical alternating current, 2500 (AD-756557)
Internal resistance of the lead and silver-zinc storage batteries during short circuits, 2399
Internal resistance of lead and silver-zinc storage batteries during short circuits, 2400
LEAD-ACID BATTERIES/ELECTRIC MEASURING INSTRUMENTS
Apparatus for determining the state of charge of storage batteries (Patent), 3558
LEAD-ACID BATTERIES/ELECTRIC POTENTIAL
Battery charge condition monitoring, 3962
Battery life cycle tester, 1667 (AD-462305)
Calculation of the discharge behavior of lead batteries, 137
Contribution to the problem of the initial voltage drop of ''Spannugsack'' in the discharge curve of the lead-acid battery, 2576
Initial discharge voltage of lead-acid storage batteries with synthetic separators (-40 to +30 C), 2516
Microscopic observations supporting the theory of lead ion supersaturation as the cause of the initial voltage minimum in the discharge curve of the lead-acid battery, 1675 (AD-466483)
Thermodynamics of lead storage cell: heat capacity and entropy of lead dioxide from 15 to 318°K, 4511
Voltage at end of charge of lead plate accumulators, 2748
Voltage drop in discharges of lead storage batteries, 2212
LEAD-ACID BATTERIES/ELECTRICAL PROPERTIES
Battery, essential element of safe supplies (Battery as buffer between sensitive load and lines), 2332
LEAD-ACID BATTERIES/ELECTROCHEMISTRY
A review of materials and mechanisms which affect the performance of lead-acid storage batteries. Interim report Jun-Sep 76, 1997 (AD-A032299)
Anodic behavior of ternary lead-calcium alloys in lead storage batteries, 4809
Anodic dissolution of lead in oxygenated and deoxygenated sulphuric acid solutions, 2134
Differential capacitance and cyclic voltametric studies on smooth lead in $H_2SO_4$ solutions, 2470
Electron microscopy of the formation of lead sulfate on lead in a lead-acid cell, 2420
Limitations of present storage batteries and the chances of developing new systems, 1272
Limitations of present storage batteries and the chances of developing new systems, 1273
Mechanism of the effect of organic additives on the operation of a negative lead battery electrode (Effects on $PbSO_4$ crystallization), 2467
$PbO_2$ in the lead--acid cell. II. Cycling and overcharge on pure and antimonial lead grids, 1777 (AD-707192)
Physicochemical properties of oxide films on lead and its alloys, 3801
Role of porosity in the modern technology of batteries, 4376
Solution-precipitation mechanism in lead--acid cell electrode reactions (Electron photomicrogrphs of electrodes), 2299
Some discharge characteristics of lead acid batteries (Fundamental processes; method of determining correct size of battery for given use), 2688
Studies on charging performance of over-discharged lead--acid batteries, 1964 (AD-912262L)
Theory of the lead storage battery, 2577
LEAD-ACID BATTERIES/ELECTRODES
Alloy composition and its use in preparing parts for lead storage batteries (Patent), 3637
Amount and forms of adsorbed hydrogen on a platinum electrode, 3089 (AD-908040L)
Basic lead sulphate and its formation in preparation of electrodes for lead storage batteries, 4718
Behavior of lead-base electrodes, with and without a $PbO_2$ layer, in sulfuric acid as used in batteries, 3419
Behaviour of lead dioxide electrode (Reactions at Pb electrodes), 4757
Bipolar battery electrodes based on the system metal oxide--metal (Patent; preparation of such as Pb oxide--Pb), 3857
Bipolar lead acid battery having titanium and zirconium electrode supports (Patent; Ti and Zr form gridwork to retain paste), 3279
Calculation of several characteristics of passivating sulfate films and maximum utilization coefficients of active mass of lead storage batteries, 3796
Carbon dioxide curing of plates for lead-acid batteries (Patent), 938
Cells for automobile batteries (Patent; shock-resistant spring-supported electrodes), 967
Charge acceptance of the lead cell at various charging rates and temperatures (0 to 40°C), 2457
Compartmented electrode structure (Patent application), 3452
Creation of batteries for deep-sea apparatus (Pressure effects (200 kg/cm²)), 3816
Cycling of a positive lead electrode in the area of lead sulfate and oxygen formation potentials, 4439
Disintegration of lead cathodes. II, 4738
Double-layer capacity determination of porous electrodes, 3773
Dry-charge electrodes for lead storage batteries (Patent; preparation with addition of resin derivatives), 4326
Effect of the electrolyte temperature during charging of plates on the characteristics of electrodes and cells of lead-acid automotive storage batteries (20 to 64°), 4286 (AD/A-006079)
Effect of temperature and current density on the utilization of lead and lead oxide electrodes (-50 to +40°C), 2458
Effect of copper on anodic corrosion rate in $H_2SO_4$, mechanical properties, and fluidity of lead and lead antimony alloys, 4236
Effects of metallurgical structure on hydrogen evolution on lead alloys, 3828
Electric storage battery (Patent; electrodes on metal substrates), 3724
Electrical connectors and electrode holder integrated in a glass fiber mat for lead secondary batteries, 3972
Electrode for lead storage battery, 3945
Electrode for electrical lead accumulators (Patent), 3669
Electrode of lead storage battery (Patent), 3593
Electrodes, especially control and gas-consuming electrodes for lead storage batteries (Patent; graphite, teflon, WC), 3948
Electrodes for lead storage batteries (Patent; formation in glass fiber mat), 3876
Electrodes for storage batteries (Patent; fabrication of sheath for active material), 3486
Electron microprobe study of the active materials in the lead-acid storage battery, 4445
Encasing the active masses of a lead storage battery (Patent), 3548
Envelope for the tubular electrodes of storage batteries (Patent), 1201
Envelope for the tubular electrodes of storage batteries (Patent), 3439
Evaluation of the corrosion rate of lead and its alloys used for storage batteries, 3918
Gassing rates of automotive batteries, 3824
Granular active material for lead-acid battery electrodes (Patent), 3861
High-rate battery electrodes (Performance of plates produced by electrolytic reduction), 4550
Intensifying the process of lamellae formation for lead batteries, 4324
Lead--acid battery. 3. Reconfirmation of the electrode formation method. III, 4082
Lead--calcium alloy grids for lead storage battery electrodes (Patent), 3674
Lead accumulator with positive ''fabric bag'' plate (Comparison of lifetime and weight with those of conventional batteries), 4670
Lead alloys of high creep rupture strength, 3907
Lead base cadmium-tin alloy useful for forming battery components (Patent; for straps which weld together grid lugs, etc.), 3322
Lead battery alloy (Patent), 3913
Lead battery electrodes (Patent), 3900
Lead-calcium wrought alloys (Patent), 3973
Lead perchlorate cell based on $HClO_4$ instead of $H_2SO_4$ (Patent), 816
Lead storage battery (Patent; performance after 55,000 km with Pb--2.5 Sb--0.8 percent As cathode and Pb--0.

09 percent Ca anode), 1054
Lead storage battery (Patent), 3721
Lead storage battery (Patent), 3722
Lead storage battery cell (Patent; plate design), 3872
Light-weight lead-acid battery with laminated electrodes (Patent), 3397
Lightweight electrodes for batteries (Patent), 3754
Maintenance-free lead secondary cell (Patent; recommends relative electrode weights and electrolyte additives), 3383
Making electrodes for lead-acid storage batteries (Patent), 4246
Mechanism of the processes of formation of lead--acid battery positive and negative plates, 4284
Method for producing battery terminal (Patent; side wall terminals), 3889
Method of preparing porous, active material for use in electrodes of secondary electrochemical cells (Patent application; carbonaceous matrices contain embedded active material), 3455
Method of treating storage battery electrodes (Patent), 4716
Microstructural control in lead alloys for storage battery application, 3783
Mixture containing powdered lead, lead oxide, and a pore-forming additive, for preparing electrodes for lead storage batteries (Patent), 3611
New storage battery promises longer life, 4398
Periodic observation of the same pin-point of battery plants with the scanning electron microscope, 3825
Phase composition of electrode pastes in lead storage batteries, 4148
Plate materials of the lead-acid cell. Part 3. Anodic oxidation of tetragonal PbO. Final report, 2899 (AD-664827)
Polarization of partly wetted porous electrodes, 4448
Polarization characteristics of alloyed lead anodes, 4359
Porous carbonaceous electrode structure and method for secondary electrochemical cell (Patent), 3311
Sheath for tubular storage battery electrodes and method for their production (Patent), 3399
Sheath for tubular storage battery electrodes and method for their production (Patent), 3319
Solution-precipitation mechanism in lead--acid cell electrode reactions (Electron photomicrogrphs of electrodes), 2299
Some aspects of gas recombination in lead--acid systems, 4043
Sponge lead electrodes for plumic acid battery (Russian Patent), 4821 (AD-763939)
Spongy lead electrodes for lead--acid battery, 2969 (AD-763939)
Storage battery plate having a core of aluminium (Patent), 3605
Storage battery with electrodes of nonwoven fabric of lead fibers (Patent), 3505
Storage-battery electrodes (Patent; preparation), 4694
Strain hardening of Pb-Sb alloys (1 to 7% Sb, <0.2% As), 3727
Study of lead-rich Pb-Cd-Sb alloys, 4263
Surface changes of lead electrodes caused by electrolysis, 4583
Surface conductivity of storage-battery lead powder, cadmium and nickel hydroxide in relation to their structural and electrochemical properties, 4497
Tests on battery terminal posts (Improved means of waterproofing terminals), 2846 (AD-494974)
Titanium electrodes for fuel cells and batteries containing acid electrolyte (Patent; acid-resistant coating), 4238
Transport processes in porous electrodes, 2229
Tubular electrode for electrical storage battery (Patent; construction), 3989
Tubular electrode plates for lead storage batteries (Patent), 3958
Tubular electrode plates for lead storage batteries (Patent), 3959
Tubular electrode plates for batteries (Patent; methods for preparation), 3636
Use of lead storage batteries at low temperatures (Effects of surfactants and inhibitors on electrode properties, -20 to -50°), 3844
Volume change in the active substances of a lead battery, 4120
Working surface of electrodes in a lead battery, 4693
X-ray study of active materials in lead-acid storage battery, 2506

LEAD-ACID BATTERIES/ELECTROLYTES
Acid dispensers for dry charged batteries (Patent), 3521
Apparatus for determining the density of electrolyte in lead storage batteries (Patent), 3922
Automatic registration of electrolyte specific gravity in lead-acid batteries, 4566
Battery electrolyte ($CuSO_4$ X $5H_2O$, $Al_2(SO_4)_3$ X $18H_2O$, $H_2SO_4$), 4014
Colloidal electrolyte lead storage batteries (Patent), 3662
Densimeter for liquids especially battery electrolytes (Patent), 3982
Diffusion processes in lead storage cells, 3793
Gelled acid water-activated lead-acid batteries, 1345
Immobilized electrolyte feasibility study. Final report, 25 June-25 December 1965, 2915 (AD-678594)
Immobilized battery electrolyte (Patent), 3988
Indicator in use with a lead storage battery for indicating the overdischarge of the same and the lowered level of the electrolyte therein (Patent), 3395
Investigation of the electrical conductivity and structural--rheological properties of gellike sulfuric acid electrolyte, 3787
Iron contamination of storage batteries (100 Ah, 15 plates, 6 V), 4759
Lead--acid battery. 4. Addition of cadmium sulfate and zinc sulfate to lead--acid battery electrolyte, 2300
Lead-calcium sulfuric acid batteries and their application to Minuteman. Technical report, Nov 1964-Jun 1965, 1685 (AD-471769)
Lead storage battery (Patent; improved results with controlled electrolyte density), 3652
Liquid electrolyte for storage batteries (Patent; equal amounts of $NH_3$, $H_2SO_4$, and $H_2O$; performance), 3706
Maintenance-free lead secondary cell (Patent; recommends relative electrode weights and electrolyte additives), 3383
Measuring acid density in storage batteries (Patent), 3500
New water-activated lead-acid battery concept (Gel electrolyte), 4294
Progress report of the Technical Division Gas Service, A. .F., for the week ending June 8, 1918, 2847 (AD-498814)
Progress report of the Technical Division Gas Service, A. .F., for the week ending June 15, 1918 ($H_2SO_4$ testing), 2848 (AD-498820)
Reclaiming electrolyte for reuse in batteries (Patent), 3931
Refractometric sensing of $H_2SO_4$ specific gravity in lead-acid cell operation, 2896 (AD-658747)
Restoring battery electrolyte, 4762
Some aspects of charge and discharge processes in lead-acid storage batteries, 4755
Stabilization of boron phosphate sulfuric acid gels (Patent), 4163
Storage battery for vehicles (Patent; colored float indicates level or specific gravity of electrolyte), 3551
Sulphuric acid and water for lead storage batteries (Physical and chemical characteristics, analysis, purification), 4811
Techniques for the use of phosphoric acid additive in the lead-calcium grid battery. Progress report No. 3, 2799 (AD-456245)
Thermodynamic properties of the nickel-cadmium alkaline and lead-lead oxide acid cells (Effect of electrolyte composition and concentration), 4503
Water activated lead acid storage battery cell having dry discharged electrodes (Patent), 1177
Water-activated dry-charged lead-acid batteries, 4414

LEAD-ACID BATTERIES/ELECTROMOTIVE FORCE
Principles of lead storage batteries, 2756

LEAD-ACID BATTERIES/ENTHALPY
Thermodynamic properties of the nickel-cadmium alkaline and lead-lead oxide acid cells (Effect of electrolyte composition and concentration), 4503

LEAD-ACID BATTERIES/ENVIRONMENTAL EFFECTS
Waste lead oxide treatment of lead acid battery manufacturing wastewater, 168

LEAD-ACID BATTERIES/FABRICATION
Automated post burn station (Patent), 848
Automotive batteries, 880
Automotive battery cars (Series of monthly articles), 1618
Batteries, 4513
Battery matrix (Patent; mixture of resin and silica gel to hold electrodes and prevent leakage), 1283
Battery plate forming apparatus (Patent; design of $H_2SO_4$-holding tank for proper forming of plates by charge--discharge cycles), 3677
Continuous manufacture of tubular textile receptacles, especially for lead-acid storage batteries (Patent), 1382
Design and fabrication of 300 volt, 3.6 kilowatt pile-type bipolar lead-acid battery for pulse duty. Final report, 29 December 1967-29 September 1968, 383 (AD-686115)
Developing for manufacture of the Bell system lead--acid battery, 1298
Development of an immobilized-electrolyte, water-activated, dry-charged, lead-acid 6TN storage battery. Final report, 29 June 1967-30 August 1968, 509 (AD-849009)
Drum programer ups battery production, 1412
Dry-charged lead storage battery (Patent), 1044
Dry charge processing: its effect on battery performance, 1518
Electric equipment for automotive use (Textbook), 2733
Electrical connection between groups of lead plates for electrical accumulator elements and method for forming the same (Patent), 1274
Evaluation of the use of biological indicators in an atmospheric lead survey (Moss and grass samples taken near factory), 1107
Industrial accidents and hygiene series, No. 6. Lead poisoning in the manufacture of storage batteries. Final report, 735 (PB-254596)
Influence of lead dust on quality of storage batteries, 4658

Laminated lead storage battery (Patent; composite bipolar electrodes), 1017
Lead-acid bipolar battery for multisecond pulse discharge, 1468
Leak-proof lead storage battery (Patent), 1168
Manufacture and use of storage batteries, 1614
Method and apparatus for filling adjacent insulating tubes forming the positive plate of a lead--acid storage battery (Patent), 970
Method of making a lead-acid storage battery, and cell, capable of activation by the addition of electrolyte (Patent; additive renders total drying after formation unnecessary), 839
Method of filling tubes of accumulator plates with active mass (Patent), 1058
Mineral needs and problems of lead-acid storage battery industry in California, 1600
New technology for manufacture of dry-charged lead batteries, 1250
Plant cells, 1317
Possibilities for increasing the technical level and specific weight and volumetric electrical rating characteristics of chemical sources of current, 1460 (AD-777665)
Side-entering storage battery terminal construction (Patent), 1338
Storage battery (Patent), 1034
Storage batteries: construction, care, maintenance (Principles of operation and chemical reactions involved), 2651
Storage battery and method of making the same (Patent), 788

LEAD-ACID BATTERIES/FAILURES
Battery, voltage regulator, and need for system concept (12-V starter batteries on vehicles), 2583
Causes and remedies for troubles with lead-acid storage batteries, 2739
Chrysler long life battery concept (5 years or 50,000 miles), 821
Rapid test for sulfaction, 2669
Research and development study of field performance of ordnance batteries to determine the major and minor electrochemical and physical types of failures of ordnance lead-acid storage batteries. Final report, 19 May 1960-19 May 1963, 1858 (AD-820160)
Study of batteries returned from field service, 2632
Thermal decomposition mechanism of formed and cycled lead dioxide electrodes and its relation to capacity loss and battery failure, 2306

LEAD-ACID BATTERIES/FEASIBILITY STUDIES
Development of electrochemical power sources for electric traction, 820
Secondary batteries for load leveling (Technical and cost criteria), 4853 (ANL-76-8)
Thin-cell storage battery. Final technical report (Power source for electric gun), 309 (AD-499967)

LEAD-ACID BATTERIES/FORECASTING
General state of advancement of battery technology, 2629
Starting lead batteries: a constant progress toward service-free batteries, 1158

LEAD-ACID BATTERIES/FUNCTIONAL MODELS
Modeling and testing of storage batteries, 2359

LEAD-ACID BATTERIES/GASES
Battery recombination reactor system (Patent; recombination of $H_2$ abd $O_2$), 3396
Effect of temperature on the rate of hydrogen evolution from lead storage batteries, 2545
Effects of metallurgical structure on hydrogen evolution on lead alloys, 3828
Electrochemical mechanism of stibine formation when charging a lead-acid battery, 2050 (EPRI-EM-448-SR)
Gas liberation in a lead-acid storage battery (Recommendations for reducing), 2049 (EPRI-EM-448-SR)
Gassing rates of automotive batteries, 3824
Maintenance-free batteries: some aspects of gassing (Correlations between water loss and positive grid composition (low-bismuth virgin lead or refined scrap)), 2249
Reaction catalyst for the elimination of oxyhydrogen gas in lead-acid storage batteries (Patent; metal of Pt group), 4184
Removal of arsine and stibine by lead-acid battery flash arrestors, 2047 (EPRI-EM-448-SR)
Research on safety of electric battery locomotives, 2661
Some aspects of gas recombination in lead--acid systems, 4043
Stibine formation and detection in lead acid batteries, 2046 (EPRI-EM-448-SR)
Stibine generation in the lead-acid battery (Literature review), 2048 (EPRI-EM-448-SR)
Study of methods of removing stibine from submarine storage battery ventilation gas, 1720 (AD-499599)

LEAD-ACID BATTERIES/GRIDS
Abnormal corrosion of pressure-cast, lead-calcium battery grids, 4537
Alloys for electrode grids for lead--acid batteries (Patet), 4169
Anodic corrosion and hydrogen and oxygen overvoltage on lead and lead antimony alloys, 4742
Apparatus and method for making expanded metal lead-acid battery grids (Patent), 3867
Apparatus and method for making oxidized expanded lead battery grids (Patent), 3711
Battery electrode grids from a lead-calcium-lithium-tin alloy (Patent; fabrication), 3624
Battery grid (Patent; vertical and diagonal grid wires), 3368
Battery plate grids (Patent; fabrication method), 3749
Battery plate grid (Patent; thinner grid structure), 3738
Battery plate grid (Patent), 3332
Cadmium--antimony--lead alloy (2.0 to 2.5 percent Sb, 2.0 to 4.0 percent Cd, increased tensile strength), 3760
Casting and properties of grid alloys for maintenance-free batteries, 3389
Corrosion. Application of radiography and microscopy in battery grid studies (Design changes to improve lifetime), 4706
Corrosion problems in lead acid batteries, 4681
Corrosion: Tension factor in the anodic peroxidation of lead, 4709
Creep resistance of lead casting alloys for battery grids, 4159
Current trends in lead alloys for battery grid fabrication, 3806
Deformation hardening of lead-antimony alloys, 3772
Development of low antimony lead alloys for starter batter grids, 4090
Development of low antimony lead alloys for starter battery grids (1.6 to 3.5 percent Sb), 3963
Dispersion strengthened lead in batteries, 4640
Distribution of potential over discharging lead-acid battery plates, 4416
Effect of different factors on the quality of grids cast from an arsenic alloy, 4400
Effect of base lead composition on metallurgical properties of maintenance-free battery alloys (Pb-Ca; Pb-Ca-Sn; additions of Bi, Sb, Cu, Ag), 3410
Effect of grid cast structure on the anodic corrosion of lead (Pb--0.09 Ca, Pb--0.46 Ag, Pb--6 Sb, Pb--11.6 Sb, Pb--6 Sb--0.2 Ag--0.2 As--0.5 Sn), 4234
Effects of calcium, tin, and bismuth on the early strength of calcium-lead alloys, 3906
Electric storage battery grids (Patent; alloy with improved casting properties), 3642
Evaluation of the effective grid resistance in lead-acid secondary battery cells, 2401
Gas liberation in a lead-acid storage battery (Recommendations for reducing), 2049 (EPRI-EM-448-SR)
Grain refinement of hypoeutectic lead-antimony casting alloys by additions of copper and sulfur (Pb-2.5Sb), 3726
Grid plates for lead storage batteries (Patent; fabrication), 3566
Grid structure for lead/acid battery (Patent), 3737
Grid structure for high rate lead/acid battery (Patent; maximizes mechanical support while minimizing electrical resistance), 3481
Investigation of the intergranular corrosion of lead-antimony grid alloys, 2879 (AD-633078)
Laminar plate lead acid batteries for electric vehicles, 3169 (CONF-711166-)
Lead--antimony alloy for battery grids (Sb 0.5-3.0, Cu 0.1-0.07, As 0.10-0.30, S 0.002-0.005, Sn 0.02-0.08, Te 0.05-0.1 percent; patent), 3723
Lead--calcium--aluminum alloy for battery grids (Patent), 3764
Lead-acid batteries: use of carbon fiber-lead wire grids at the positive electrode, 3524
Lead-acid storage batteries in telephone service (Improved grids using Ca instead of Sb), 4713
Lead-acid batteries with low antimony alloys (1 to 4% Sb with Se additions), 3418
Lead alloy for grids of lead--acid batteries (Casting), 3932
Lead alloy for producing attention-free lead--acid batteries (Patent), 3581
Lead alloy and battery grid prepared from it (Patent; 0.06 to 0.1 Ca and 0.1 to 0.4 percent Sn), 3646
Lead-antimony-cadmium alloys for battery grids, 4482
Lead base alloy for use in a storage battery grid (Patent; 0.5 to 2% Zr and Sr), 3281
Lead calcium grid casting, 3849
Life cycle testing of SLI batteries with Pb-Ca-Sn grids containing various amounts of bismuth, 2153
Low-antimony maintenance-free batteries, 3179 (CONF-7610115-)
Maintenance-free batteries: the lead-calcium-tin approach, 3178 (CONF-7610115-)
Maintenance free batteries: evolution or revolution, 3847
Maintenance-free batteries: some aspects of gassing (Correlations between water loss and positive grid composition (low-bismuth virgin lead or refined scrap)) 2249
Mechanical and corrosion properties of low antimony lead alloys, 3460
Method for manufacturing lead grid plates for batteries (Patent), 3859
Method of manufacturing battery plate grids (Patent), 3504
Method of making battery plate grids for lead-acid batteries and alloys therefor (Patent), 4027
Microporosity in lead-antimony grid alloys, 2910 (AD-672889)
New grid casting improves battery life, 4799
New grid design and casting process lengthen battery

life, 4793
New grids improve lead-acid cells (Also, use of plastic components and containers), 1587
Plate grid for lead storage batteries (Patent), 3574
Plate grid in use for a plate for a lead storage battery (Patent), 4013
Plate grid for lead storage batteries (Patent), 3927
Process for casting a plate grid for a lead-acid storage battery (Patent), 3283
Recent results on lead--calcium alloys as grid materials for lead--acid batteries (Gravity and pressure casting), 4199
Removal of surface antimony from antimony lead alloys by sulfuric acid-hydrogen peroxide pickling (Effects of treatment on battery performance), 4235
Stress corrosion in grids of lead-acid storage battery, 4549
Structural change of lead storage battery porous grids during operation, 3814
The cyclic voltammetry of lead and lead-antimony battery grid alloy in aqueous sulphuric acid at 25 to -40 C, 3140 (AD-A-036290)
Wound-wire storage battery grid (Patent; fabrication), 3631
LEAD-ACID BATTERIES/HEALTH HAZARDS
Behavioral effects of occupational exposure to lead, 147
ILZRO health studies, 1130
LEAD-ACID BATTERIES/HEAT TRANSFER
Engineering analysis of thermal phenomena for lead-acid batteries during recharge processes, 2033 (ANL-77-24)
LEAD-ACID BATTERIES/IMPACT SHOCK
Cells for automobile batteries (Patent; shock-resistant spring-supported electrodes), 967
LEAD-ACID BATTERIES/IMPEDANCE
Battery impedance: farads, milliohms, microbenrys, 2644
Internal resistance of lead batteries and its measurement, 2754
LEAD-ACID BATTERIES/IMPURITIES
Determination of acceptable contaminant ion concentration levels in a truly maintenance-free lead acid battery, 2239
LEAD-ACID BATTERIES/INVERTERS
Power conversion equipment for storage batteries, 5012 (PB-251490)
LEAD-ACID BATTERIES/LIFETIME
Battery life cycle tester, 1667 (AD-462305)
LEAD-ACID BATTERIES/MAINTENANCE
Automobile storage batteries in winter, 2749
Automotive electrical equipment, its operation and maintenance (Book), 4791
Automotive battery cars (Series of monthly articles), 1618
Control batteries (lead--acid): past, present, and future predictions (1882 to 1973), 1313
Determination of acceptable contaminant ion concentration levels in a truly maintenance-free lead acid battery, 2239
Electric vehicle batteries: usage and abusage, 2042 (CONF-711166-)
Emergency lighting battery systems, 2658
Hints for curing sulfated batteries, 2699
Improvement of lead-acid battery maintenance, 2202
Indicator in use with a lead storage battery for indicating the overdischarge of the same and the lowered level of the electrolyte therein (Patent), 3395
Lead-acid batteries: their installation and maintenance (Review article), 2431
Lead-calcium sulfuric acid batteries and their application to Minuteman. Technical report, Nov 1964-Jun 1965, 1685 (AD-471769)
Maintenance and repair. Adjusting specific gravity of repaired batteries, 2702
Modern maintenance methods assure dependable battery power, 2435
Options in maintenance-free batteries, 2152
Peripheric equipment for reducing maintenance of electric vehicle lead-acid batteries, 4955 (CONF-770430-P4(Draft))
Rapid test for sulfaction, 2669
Regular battery PM gives you lift trucks when you need them, 2569
Service tips from Detroit. Maintenance-free battery, 2165
Shop repair and reconditioning of storage batteries, 2724
Special features of lead storage batteries (Overcoming problems due to improper maintenance), 2530
Storage batteries: construction, care, maintenance (Principles of operation and chemical reactions involved), 2651
Storage battery: its part in engine tune-up, 2758
LEAD-ACID BATTERIES/MANUALS
A.B.C. of storage battery management, 240
LEAD-ACID BATTERIES/MANUFACTURING
Lead-acid battery: a new shape for an old workhorse, 1320
Microstructural control in lead alloys for storage battery application, 1085
Waste lead oxide treatment of lead acid battery manufacturing wastewater, 1268
LEAD-ACID BATTERIES/MARKET
Market place: America rushes screaming into maintenance-free, 837
Marketing and maintenance-free batteries, 659 (CONF-7610115-)
Replacement battery. Industry forecast 1975-1979, a report by the BCI Statistical Committee, 1127
LEAD-ACID BATTERIES/MATERIALS
A review of materials and mechanisms which affect the performance of lead-acid storage batteries. Interim report Jun-Sep 76, 1997 (AD-A032299)
Batteries, 4513
Battery materials, 1970, 4427
Battery materials: prognosis and supply, 3850
Electric batteries in recent patents, 1580
Electric batteries described in recent patents, 4788
Expander action in the lead--acid battery. III. Impedance and passivation studies of some tanning agents as potential expanders, 4107
Improved telephone battery, 4782
Influence of lead dust on quality of storage batteries, 4658
Mineral needs and problems of lead-acid storage battery industry in California, 1600
Some aspects of the cycling behavior of maintenance-free batteries (Effects of using recycled battery scrap on battery performance), 3851
Variable composition of basic lead sulfates, 4038
LEAD-ACID BATTERIES/MATERIALS RECOVERY
A new sulfur dioxide-free process for recovering lead from battery scrap. Report of investigations, 1976, 3260 (PB-252615)
Recovery of lead from battery scrap (Patent), 884
LEAD-ACID BATTERIES/MATHEMATICAL MODELS
Mathematical description of the electrochemical processes in lead storage batteries, 1360
Mathematical modeling of lead-acid batteries, 1125
LEAD-ACID BATTERIES/MATRIX MATERIALS
Battery matrix (Patent; mixture of resin and silica gel to hold electrodes and prevent leakage), 1283
LEAD-ACID BATTERIES/MECHANICAL VIBRATIONS
Cells for automobile batteries (Patent; shock-resistant spring-supported electrodes), 967
LEAD-ACID BATTERIES/MEETINGS
Battery Council International convention: 1975 (Hollywood-by-the-Sea, Florida), 150
Near-term energy storage technologies: the lead-acid battery. A compilation of workshop papers presented on November 18-19, 1975 (November 18-19, 1975, Palo Alto, CA), 730 (PB-251490)
LEAD-ACID BATTERIES/METALLURGICAL EFFECTS
Tin and bismuth in lead-calcium alloy (Metallurgical effects), 3848
LEAD-ACID BATTERIES/NONDESTRUCTIVE TESTING
Battery workshop, 2054 (N-67-26364)
LEAD-ACID BATTERIES/NONRADIOACTIVE WASTE DISPOSAL
Assessment of industrial hazardous waste practices, storage and primary batteries industries. Final report, Apr-Sep 1974, 725 (PB-241204)
LEAD-ACID BATTERIES/OFF-PEAK ENERGY STORAGE
Can lead-acid batteries shave utility peaks, 5056
LEAD-ACID BATTERIES/OPERATION
Aircraft storage batteries, 2637
Automotive battery cars (Series of monthly articles), 1618
Charging performance of over-discharged lead-acid batteries, 2421
Diagnosing sulfated battery condition, 2695
Electric equipment for automotive use (Textbook), 2733
Lead acid storage batteries as standby power supply, 5313
Lead-acid battery and its associated control gear: survey of applications and operating principles, 2672
Microstructural comparison of positive float and trickle discharge operations on the positive electrodes of submarine storage batteries with lead-calcium alloy grids. Master's thesis, 3110 (AD-A032298)
Military storage batteries (Use at temperatures below -40°), 1604
Modern cells and batteries used in communications equipment, 2713
Modern chargers protect your battery investment, 4517
Plant cells, 1317
Structural change of lead storage battery porous grids during operation, 3814
T-28 battery system investigation. Final report Apr--Oct 1973 (Need for replacing lead--acid by nickel--cadmium batteries), 1978 (AD-916042L)
LEAD-ACID BATTERIES/OPTIMIZATION
Discharge data of lead batteries and their influence on the optimization of the storage capacity of electrical vehicles, 904 (N-76-14611)
Optimization of lead--acid batteries for high power-short pulse operation, 1356
Traction batteries for existing and future electric road vehicles (Approx 40 Wh/kg), 819
LEAD-ACID BATTERIES/PACKAGING
Big change in product calls for innovative cushioning, packaging, 4145
LEAD-ACID BATTERIES/PERFORMANCE
A review of materials and mechanisms which affect the performance of lead-acid storage batteries. Interim report Jun-Sep 76, 1997 (AD-A032299)
Advanced batteries spur progress in electric cars, 5157
Analytic representation of discharge characteristics of commercial secondary batteries (Peukert equation), 2606
Anodic corrosion of large-surface plates of lead, 4790
Automobile batteries: selection, service life, new

developments, 1597
Automobile storage batteries in winter, 2749
Batteries. 1. Virtues of nickel--cadmium, 2271
Batteries for energy storage, 890
Batteries for electric vehicles in western Europe (30 to 40 Wh/kg, 500 to 1600 cycles), 2030 (ANL-76-8)
Batteries for electric vehicles, 2039 (CONF-711166-)
Battery development in Japan, 4855 (ANL-76-8)
Battery emergency lighting plant, 2654

Battery systems for peaking power generation, 5132
Behavior of storage batteries during and after long idleness, 2741
Car battery (Factors involved in choosing battery for specific engine), 2774
Characteristics of lead acid and silver--zinc batteries in the deep ocean environment (Pressure-compensated batteries), 2354
Chloride unveils the ''Silent Rider'' (Battery-powered 50-passenger city bus), 5120
City car with H--air fuel cell/lead battery (one year operating experiences) (33 kWh fuel cell battery and 25 kW peak power lead battery), 5210
Construction and performance of a quasi-bipolar lead--acid battery plate for electric propulsion (9.7 Wh/lb at 100 W/lb), 5196
Construction and service testing of cells made with grids of dispersion-strengthened lead (Less than 250 Ah), 2501
Cycling of a positive lead electrode in the area of lead sulfate and oxygen formation potentials, 4439
Cylindrical shape doubles battery life, 2472
Data and performance required of the lead acid battery by the electric vehicle designer, 5195
Developments in electrochemical energy: conversion devices, batteries, and fuel cells, 1524
Development of a sealed lead-acid battery for use in space. Final report, 2051 (N-66-23780)
Discharge data of lead batteries and their influence on the optimization of the storage capacity of electric vehicles, 5160
Dynamic characterization of lead--acid batteries for vehicle applications, 2358
Effect of depth of discharge on the cycle life of positive lead-acid plates, 2904 (AD-671685)
Effect of pressure on discharge characteristics of a negative electrode, 2466
Evaluation of external battery power supply for bathyscaph Trieste (Performance at pressures to 16,000 psi), 1748 (AD-652340)
Feasibility of creating a chemical current source based on the copper--sulfuric acid--lead(IV) oxide system, 2298
High-pressure performance of voltaic cells. Final technical report, January-February 1965 (Mg/Cu seawater battery (18,000 psi); Pb--acid cell (20,000 psi)), 1739 (AD-627931)
High-rate lead--acid batteries for hybrid vehicles, 5205
Improvement in the electrical characteristics of lead accumulators by ultrasonic treatment of the electrolytes, 2387
Improvement on starter batteries, 2720
Japanese lead-acid batteries: new technology and recent products, 2184
Lead--acid battery. 4. Addition of cadmium sulfate and zinc sulfate to lead--acid battery electrolyte, 2300
Lead-acid bipolar battery for multisecond pulse discharge, 1468
Lead-acid batteries: use of carbon fiber-lead wire grids at the positive electrode, 3524
Lead-acid battery for cordless electrical appliances, 2446
Lead-acid battery: a new shape for an old workhorse, 1320
Lead dioxide--titanium composite anodes (Patent), 3681
Lead storage battery (Patent; performance after 55,000 km with Pb--2.5 Sb--0.8 percent As cathode and Pb--0.09 percent Ca anode), 1054
Lead storage battery (Patent; addition of Tl sulfates), 2200
Lead storage battery (Patent), 3721
Lead storage battery (Patent), 3722
Lead storage battery oxides with metallic additions, 2662
Leak-proof lead storage battery (Patent), 1168
Long-life lead--fluoroboric acid battery (90 mAh), 1263
Maintenance-free lead acid cells. Part 1, 1496
Maintenance-free lead acid cells. Part 2, 1497
Maintenance-free lead acid cells. Part 3, 2537
More power for the battery, 1206
Optimum performance from lead-acid battery, 2630
Performance capabilities of electric highway vehicles utilizing lead acid batteries, 5201
Plant cells, 1317
Present position of electric storage battery, 1598
Relationship of physico-chemical properties of active materials to capacity for lead-acid batteries, 2631
Research and future for lead-acid battery, 5255
Review of battery systems for electrically powered vehicles, 2527
Secondary batteries for electric vehicles, 4854 (ANL-76-8)
Shortcomings of starter storage batteries, 2587
Simulation of lead-acid cells, 4940 (CONF-740215-P2)
Solution electric batteries (Completely exploit active mass), 1227
Specific properties of small closed lead accumulators using an immobilized electrolyte, 2459
System design implications of electric and hybrid vehicles, 5261
Test of low discharge-type storage batteries. Report No. 1, 1841 (AD-787125)
Traction batteries for existing and future electric road vehicles, 603 (AED-Conf-76-444-016)
Update: maintenance-free batteries, 2166
Urban electrical vehicle (45 Wh/kg, 600 cycles), 5164
Use, maintenance and storage properties of lead/acid starter batteries (Historical review and state of the art), 2260
Use of magnetically treated sulfuric acid solutions in the production of lead storage batteries, 2468
Using gelled lead-acid batteries to power portable instruments, 2273
Water-activated dry-charged lead-acid batteries, 4414
What car expects of battery, 2627

LEAD-ACID BATTERIES/PERFORMANCE TESTING

Accelerated life testing of lead--acid industrial motive power cells, 2211
Accelerated life testing of stationary batteries, 2528
Actual operating experience of lead-acid batteries for electric milk delivery cars, 5043
Actual service life and bench cycle life of lead-acid battery for electric vehicle use, 2247
Arinc Research Corporation evaluation of electric power equipment on aircraft, technical administration of. Final report, 1636 (AD-439635)
Arinc Research Corporation evaluation of electric power equipment on aircraft, technical administration of. Final report, 1637 (AD-439635)
Automotive battery requirements today and tomorrow, 2561
Battery powered jeep and van performance, 5042
Characteristics of thin-plate lead--calcium grid positives, 1511
Clean transportation for new towns: DAIHATSU electric vehicles in the Senboku area, 5044
Develop high charge and discharge rate lead/acid battery technology. Final report, 28 April 1971-18 March 1972, 5003 (PB-213257)
Dual battery electric powerplant, 5224
Electric car and lead acid batteries (Two-man summer research study), 5228
Electric equipment of motor cycles, 2667
Electrochemical characterization of the Bell System battery. Field trials of the battery, 2437
Endurance tests of storage batteries for use in permissible mine locomotives, 2036 (BM-RI-2358)
Engineering evaluation of aircraft batteries. Research and development technical report, 1796 (AD-733289)
Evaluation of water-activated lead--acid aircraft storage batteries, 1917 (AD-901714L)
Evaluation tests on batteries, storage, lead-acid, type TB-1275, 1638 (AD-440717)
Evaluation tests on batteries, storage, lead-acid, type 2S-60, 1641 (AD-446461)
Evaluation tests on batteries, storage, lead-acid, type 2S-70, 1645 (AD-448872)
Evaluation tests on batteries, storage, lead-acid, type 2SM, 1656 (AD-457447)
Evaluation tests on batteries, storage, lead-acid, type HDD-2SM, 1657 (AD-457674)
Evaluation tests on batteries, storage, lead-acid, type BB-248/U, 1668 (AD-462380)
Evaluation tests on batteries, storage, lead-acid, type BB-248/U, 1671 (AD-465487)
Evaluation tests on batteries, storage, lead-acid, type SMR-2SM, 1682 (AD-470200)
Evaluation tests of batteries, storage, lead-acid, type BB-46, 1683 (AD-470201)
Gas recombination lead-acid batteries, 2241
Generator and battery system evaluation in city traffic, 2625
High power density bipolar lead-acid battery for electric vehicle propulsion, 5062
Lead-acid starter battery 6ST-81 EMS, 1619
Life cycle testing of SLI batteries with Pb-Ca-Sn grids containing various amounts of bismuth, 2153
Maintenance-free lead acid batteries (Retained 70 percent of capacity after 30 days at 125°f), 1771 (AD-695626)
New rating standards for automotive batteries. II, 2135
Optimization of lead--acid batteries for high power-short pulse operation, 1356
Qualification tests of two type BB-638/A batteries, 1938 (AD-906172L)
Qualification test of five aircraft batteries, lead-acid, type MS25211-2, manufactured by Gill Electric Manufacturing Corporation (24 V, 20 Ah), 1628 (AD-430864)
Qualification test of five aircraft batteries, lead-acid, type MS25211-2, manufactured by Gou'd-National Batteries, Inc., 1635 (AD-438889)
Qualification tests on batteries, storage, lead-acid, type BB-249/U, 1629 (AD-433360)
Qualification tests on batteries, storage, lead-acid, type BB-249/U, 1632 (AD-437071)
Qualification tests on batteries, storage, lead-acid, type BB-46, 1652 (AD-455450)

Qualification tests of two aircraft batteries, lead-acid, type MS 18045-42(WEP), manufactured by Gill Electric Manufacturing Corporation, 1703 (AD-484519)
Sampling and life cycle costing tests of type MS 18045-42, lead--acid, aircraft batteries from 22 production lots manufactured by Teledyne Inc., Teledyne Battery Products Division under contract N00383-72-C-4027, 1986 (AD-917329L)
Shock and vibration tests on Gould-National Batteries, Inc., lead-acid batteries, 1870 (AD-832535)
Shock and vibration tests on C and D Batteries, Inc., lead-acid batteries, WS 133A, 1871 (AD-832538)
Shock and vibration tests on Electric Storage Battery Company lead-acid batteries, 1872 (AD-832539)
Special purpose urban cars, 5248
LEAD-ACID BATTERIES/PLANNING
Fundamental research on the selection of new electrochemical generators of medium power, 1033
Near-term utility energy-storage technologies. I. Workshop on the lead-acid battery: workshop objectives, 731 (PB-251490)
LEAD-ACID BATTERIES/PLATES
Accumulator plate manufacture, 1602
Active material retention in the lead-acid battery. The role of $PbSO_4$.4PbO and alpha-$PbO_2$, 2808 (AD-466484)
Adsorption mechanism of expander action, 4641
Apparatus and method for preparing grid plates for lead storage batteries (Patent), 3579
Apparatus for manufacturing tubular storage battery plates (Patent), 3732
Apparatus for pasting battery plates (Patent), 3556
Automotive battery cars (Series of monthly articles), 1618
Battery grid plate (Patent; low-Sb alloys), 3512
Battery plate grid (Patent; thinner grid structure), 3738
Battery plate forming apparatus (Patent; design of $H_2SO_4$-holding tank for proper forming of plates by charge--discharge cycles), 3677
Better permanent mold techniques improve casting quality, 4754
Compacting of active material for batteries (Patent), 3930
Construction and performance of a quasi-bipolar lead--acid battery plate for electric propulsion (9.7 Wh/lb at 100 W/lb), 5196
Curing of lead-acid battery plates (Methods for accelerating), 4413
Curing of lead storage battery plates (Use of litharge), 4777
Current distribution in storage battery plates with tubular components, 4608
Design of optimum lead cores for armored plates in lead accumulators, 4616
Discharge characteristics of lead-acid battery plates (Single plate discharged at high rates outside of battery), 4661
Formation of battery plates (Patent; 20 to 100 times the usual formation current), 3469
Formation of negative plates of lead accumulators. V. The relation between the solubility of lead sulphate in the forming solutions and the capacity of plates, 4774
Forming tank for lead-acid battery plates (Patent), 4161
Investigation of the plate materials of the lead-acid cell: compound formation between lead monoxide and lead sulfate. Report No. 1, 2869 (AD-620552)
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 2, 281 (AD-471972)
Lead-acid plate with low dusting characteristics (Patent), 3522
Lead alloys for storage-battery plates (Patent), 3946
Longitudinal current distribution on storage battery plates consisting of tubular elements (Plate fabrication), 4637
Manufacture of battery plates (Patent; production of enveloped plates), 3276
Mathematical description of the electrochemical processes in lead storage batteries, 1360
Method and apparatus for pasting battery plates (Patent), 4018
Microscopic examination of active materials from lead-acid cells, 4614
Molding and hardening grids for lead storage battery plates (Patent), 3912
Oxidation kinetics of freshly pasted lead storage battery plates during drying, 4115
Pasted lead-acid plate for an electric storage battery (Patent; structure and manufacturing method), 3654
Plante battery plates (Characteristics and fabrication), 3290
Plate materials of the lead-acid cell. Part I. Anodic oxidation of the basic sulfates of lead. Final report, 2874 (AD-625693)
Plate materials of the lead-acid cell. Part II. Anodic oxidation of $PbSO_4$, $Pb_3SO_4$, $^2PbCO_3$, $Pb(OH)_2$, and orthorhombic PbO. Final report, 2868 (AD-644599)
Recent patents on electric batteries, 4758
Scanning electron microscope as a tool for battery plate research (Microstructure), 4362
Sheathing the active mass of a lead storage battery (Patent), 3656
Storage battery plates (Patent), 3976
Storage battery plate (Patent), 3938
Storage battery plate and manufacturing process therefor (Patent), 4039
Storage batteries: construction, care, maintenance (Principles of operation and chemical reactions involved), 2651
Studies of more rapid electroforming of lead storage battery plates with current which changes polarity (Advantages of new method), 3347
Tubular storage battery plates (Patent; paste composition, fabrication method), 3733
Varying the internal resistance in the electroformation of storage-battery plates with current of changing polarity, 4032
LEAD-ACID BATTERIES/PRODUCTION
Accumulator plate manufacture, 1602
Battery construction (Patent), 796
Battery production handling methods, 1599
Carbon dioxide curing of plates for lead-acid batteries (Patent), 938
Environmental control problems, 1131
Executive summary study of lead-acid battery systems for peaking power. Final report for the period ending October 1976, 664 (CONS/2114-1)
Fully mechanized battery plant has automatic assembly line, 1589
Health and safety, 662 (CONF-7610115-)
Patent; production of lead batteries with envelope-type separators of synthetic resin, 3535
Pollution control and safety workshop, 661 (CONF-7610115-)
Possibilities for increasing the technical level and specific weight and volumetric electrical rating characteristics of chemical sources of current, 438 (AD-777665)
Prescription for battery workers, 739 (PB-266261)
Problems in production of lead and nickel/cadmium storage batteries, 1506
Scrap battery plate reclaiming process (Patent; for plates with manufacturing defects), 805
Storage battery factory (Equipment and methods), 1607
Study of the manufacturing costs of lead-acid batteries for peaking power. Final report for the period ending Oct. 1976, 665 (CONS/2114-2)
Towards fully automated assembly of storage batteries, 1485
LEAD-ACID BATTERIES/RELIABILITY
Determination of reliability and electric losses in independent power supply sets, using static simulation, 2507
Reliability of lead storage batteries (Computation by statistical methods), 2552
LEAD-ACID BATTERIES/REPAIR
Automotive battery cars (Series of monthly articles), 1618
Make battery repairs promptly (Broken covers, connectors, jars, and separators), 2704
Repair of stationary lead--acid storage batteries, 1827 (AD-763931)
Repair of stationary lead-acid storage batteries, 2783 (AD-763931)
Shop repair and reconditioning of storage batteries, 2724
LEAD-ACID BATTERIES/RESEARCH PROGRAMS
Batteries: today and tomorrow, 131
Electrical Power Sources Division. Quarterly progress notes, 1 October 1974-31 December 1974, 740 (PD-18289)

Candidate batteries for electric vehicles, 1363
Chemical compositions, structures, performance, and uses of batteries; (review with 108 references), 233
Control batteries (lead--acid): past, present, and future predictions (1882 to 1973), 1313
Current and future applications of lead batteries (4-page status report), 1157
Dry charged lead-acid batteries, 1462
Electric vehicles and lead storage batteries, 5134
Lead--acid battery research, 180
Lead-acid battery (Current state of the art and research programs), 608 (ANL-76-8)
Lead-acid storage batteries for load leveling (Summary of basic concepts and operational characteristics), 120 (PB-251490)
Lead-acid cell, 1406
Plant cells, 1317
Primary and secondary galvanic cells: history and state-of-the-art summary, 29 (AD-671685)
Progress in electric battery industry, 231
Storage batteries: review of recent patents (Patents from 1944 to 1947), 2753

LEAD-ACID BATTERIES/SAFETY
Explosion-proof venting device for electrical storage batteries (Patent), 3954
Research on safety of electric battery locomotives, 2661
Study of the auxiliaries for lead-acid battery systems for peaking power. Final report for the period ending October 1976, 3180 (CONS/2114-3)
LEAD-ACID BATTERIES/SEALS
Post seals for the new Bell System battery, 4383
LEAD-ACID BATTERIES/SIMULATION
Simulation of lead-acid cells, 4940 (CONF-740215-P2)
LEAD-ACID BATTERIES/SIZE
Some discharge characteristics of lead acid batteries (Fundamental processes; method of determining correct size of battery for given use), 2688
LEAD-ACID BATTERIES/SOLID WASTES
Hydrometallurgical reprocessing of the scrap lead--battery paste using diethylenetriamine, 2297
LEAD-ACID BATTERIES/SPECIFIC HEAT
Thermodynamic properties of electrochemical storage cells (20- to 75-Ah cells), 2593
LEAD-ACID BATTERIES/SPECIFICATIONS
Batteries for the hybrid heat engine/electric vehicle, 5200
Batteries for utility load leveling (Typical spec: 50,000 Ah, 10 Wh/lb, 2000 cycles, 100 MWh, >80 percent efficiency), 4953 (CONF-760469-3)
Battery unit, emergency power supply, WS-133A/M, 263 (AD-445415)
Development of the 12TN 24 volt storage battery. Final report, May 1972--Feb 1974, 560 (AD-917525L)
LEAD-ACID BATTERIES/STANDARDS
Lead-acid starter batteries-2,3 (6 and 12 V), 1550
New rating standards for automotive batteries, 2150
New rating standards for automotive batteries, 2136
State standards of the USSR, lead-acid automotive storage batteries GOST 959.0-71, 1183 (AD/A-006093)
LEAD-ACID BATTERIES/STORAGE
Behavior of storage batteries during and after long idleness, 2741
Care and feeding of the "new baby" (Guides for service station attendants), 2156
Lead battery storable without electrolyte (Patent; oxidation of anode prevented by Pb--10 percent Na alloy), 2258
Preservation of a lead-acid storage battery (Patent), 2392
Requirements for battery rooms housing lead-acid storage batteries, 4453
LEAD-ACID BATTERIES/SWITCHES
Breaker switch for auto battery (Patent), 3351
LEAD-ACID BATTERIES/TEMPERATURE COEFFICIENT
Thermodynamics of lead storage cell: heat capacity and entropy of lead dioxide from 15 to 318°K, 4511
LEAD-ACID BATTERIES/TESTING
Adequate control voltage from storage batteries, 2757
Care and feeding of the "new baby" (Guides for service station attendants), 2156
Checking starting motor circuit, 2771
First article tests of two 12-volt, type MS 90379-1A lead--acid batteries, manufactured by Teledyne Inc., Gill Electric Division, under contract N00383-72-C-5202. Final report, 1983 (AD-916499L)
Laminated lead storage battery (Patent; composite bipolar electrodes), 1017
Lead/acid battery development for heat engine/electric hybrid vehicles. Final report, 645 (APTD-1346)
Molded plastisol battery tester, 4746
New lead-acid batteries for electric vehicles and approach to their evaluation method, 74 (CONF-740215-P1)
New rating standards for automotive batteries, 2150
Preproduction tests of two aircraft batteries, lead-acid, type MS 18045-42 (WEP), manufactured by Gould-National Batteries, Inc., 1704 (AD-485498)
Preproduction tests of two aircraft batteries, lead-acid, type MS 18045-41 (WEP), manufactured by Gould-National Batteries, Inc., 1705 (AD-485499)
Report of Committee on Battery Additives of the National Academy of Sciences (Quality of NBS testing of AD-X2), 2705
Research on starting batteries, including new test requirements, 2701
Sample testing of five 12-volt, type MS90379-1, lead--acid batteries manufactured by Teledyne Battery Products, a division of Teledyne, Inc., under contract N00383-72-C-5202. Final report, 1992 (AD-917760L)
Sampling and life cycle costing tests of 53 production lots of types MS 18045-41 and MS 18045-42 lead--acid aircraft batteries, manufactured by Teledyne, Inc. Final report, 1934 (AD-905686L)
Selection and utilization of batteries for deep submergence vehicles (Characteristics, design of container system, tests to 2700 psi), 2517
Storage battery: its part in engine tune-up, 2758
Study of batteries returned from field service, 2632
Tests of electric storage batteries of lead acid type, 2737
Tests of electric batteries of lead-acid type, 2735
Tests on experimental batteries with cells of alloys containing impurities, 2653
Transistorized current controller (For testing starter batteries), 4568
What car expects of battery, 2627
X-ray study of active materials in lead-acid storage battery, 2506
LEAD-ACID BATTERIES/THERMODYNAMIC PROPERTIES
Thermodynamic characteristics of $Pb^{2+}$ ion in an aqueous solution, 2417
LEAD-ACID BATTERIES/USES
Assessment of the hybrid heat engine/electric powertrain for use in urban buses, 4917 (CONF-711166-)
Batteries for ground transportation systems, 5193
Battery cars today: some theory and some practice, 5075
British electric vehicles in commercial and municipal use, 4898 (CONF-711166-)
Case history and economic study of an electric commuter vehicle, 4908 (CONF-711166-)
Copper Electric town car, 5067
Current developments in electric ground propulsion systems, research and development worldwide (Review, 40 references), 5128
Czechoslovak electric car EMA 1 and EMA 2, 4899 (CONF-711166-)
Design and development of a van with an a-c electric drive, 4907 (CONF-711166-)
Design considerations for an electric car, 5239
Development of high performance electric vehicles and support systems, 5217
Development of the electric road vehicle, 5213
Development of the electric vehicle at Nissan Motor Co., Ltd., 4896 (CONF-711166-)
Development of a second generation electric highway vehicle and support equipment, 4909 (CONF-711166-)
Electric automobiles (citations from the NTIS data base). Report for 1964-Jun 1976, 4994 (NTIS/PS-76/0560)
Electric automobiles (citations from the Engineering Index data base). Report for 1970-Jun 1976, 4995 (NTIS/PS-76/0561)
Electric car: world survey, 5130
Electric vehicle activity a Georgia Tech, 4914 (CONF-711166-)
Experimental electric vehicles, 4878 (CONF-691143-)
Feasibility study of the electric car for Hawaii, 4912 (CONF-711166-)
Fuel-cell/lead--acid-battery hybrid car, 5185
Hybrid battery/gasoline-powered taxi, 5029
Hybrid power source for material handling equipment (Hydrogen fuel cell--lead-acid battery system for electric fork lift trucks), 5083
Impact of future use of electric cars in the St. Louis and Philadelphia regions. Volume I. Executive summary and technical report. Final report, 5015 (TEC-75-006a)
Lead-acid storage batteries in telephone service (Improved grids using Ca instead of Sb), 4713
Lucas Midi-bus to be evaluated in Manchester, 5080
NEMO provides new look at ocean depths, 5229
NEMO provides new look at ocean depths, 5230
New generation of combination locomotives for underground mining, 5072
No assault on lead-acid battery until 1980, 5112
No-break, 1.5-kW, direct-current, 22- to 28-volt power supply, 4836 (AD-699351)
Performance analyses of heat engine--battery hybrid vehicles, 5183
Physical limits to modern storage batteries and the chances of the development of new systems, 1271
Plant cells, 1317
Post Office tries Lucas electrics, 5071
Power for underwater vehicles and systems, 5315
Progress on voltmobiles (2952-lb, 2-passenger car uses Pb-acid battery; 5850-lb, 4-passenger car uses Pb/Co battery), 5074
Promise and potential of electric automobiles, 5278
Prospects for electric vehicles: a study of low-pollution-potential vehicles-electric, 5001 (PB-194814)
Replacement of lead acid storage batteries with alkaline ones on 'rocket' type ships, 5422 (AD-639489)
Role of small battery-powered stacker in materials handling, 5300
Some deep sea vehicle personnel hulls and energy storage subsystems, 4837 (AD-717950)
State of development of the electric street vehicle and its future trends, 5209
Storage batteries in generating stations and substations, 5393
Storage of electric energy, 1108
Studies by Fiat on the electrically-driven automobile, 4889 (CONF-710233-)
Study of the energy utilization of gasoline and battery-electric powered special purpose vehicles, 5069
Test results on hybrid vehicles, 4918 (CONF-711166-)
UNH electric-hybrid vehicle, 5235
Urban car for the 1980's, 4920 (CONF-711166-)
What's available (In battery-powered emergency lighting), 5115
LEAD-ACID BATTERIES/VALVES
Storage battery with single fill valve (Patent), 3567
LEAD-ACID BATTERIES/VENTILATION
Study of methods of removing stibine from submarine storage battery ventilation gas, 1720 (AD-499599)
LEAD-ACID BATTERIES/VENTS
Explosion-proof venting device for electrical storage batteries (Patent), 3954
Explosion-proof vent barrel for a battery (Patent), 3335

Gas vent for lead batteries (Patent), 3928
Lead--acid battery with resealable vent valve (Patent), 1073
LEAD-ACID BATTERIES/VOLTAGE REGULATORS
Design of vibrating type regulator for automobiles, 4676
Use of direct-current voltage converter to maintain constant 27.5-volt terminal voltage from lead--acid battery power supply, 2930 (AD-710249)
LEAD-ACID BATTERIES/WASTE MANAGEMENT
Battery production handling methods, 1599
Pilot plant studies on the hydrometallurgical treatment of waste lead battery paste using diethylenetriamine, 1086
LEAD-ACID BATTERIES/WASTE PROCESSING
Apparatus and method for separating the constituents of lead-acid storage batteries (Patent), 2195
Apparatus and method for recovering useful constituents of worn-out storage batteries (Patent; recovery of Pb and PbO), 2366
Furnace to recover lead from old storage batteries, 1202
Hydrometallurgical treatment of waste lead pastes in storage batteries using ethylene diamine, 2304
Investigation of lead storage batteries scrap processing by melting with antimony trisulfide, 1276
Metallurgical treatment of used lead batteries, 1311
Obtaining crude lead from materials consisting essentially of oxides and sulfides (Patent), 2196
Processing technology for scrap storage battery lead, 1109
Reactions of some oxygenated compounds of lead with antimony trisulfide, 1323
Removal of sulfur from battery wrecker material using ammonium carbonate solution (Patent), 988
Use of an adhesion process for separating solid particles suspended in a liquid (Patent), 2367
LEVEL INDICATORS/DESIGN
Indicator in use with a lead storage battery for indicating the overdischarge of the same and the lowered level of the electrolyte therein (Patent), 3395
LIGHT SOURCES/NICKEL-CADMIUM BATTERIES
Durability of D-size sealed nickel-cadmium cells, 2327
LIGHTING SYSTEMS/ELECTRIC BATTERIES
Batteries. 2. Virtues of gelled electrolyte, 2270
Batteries. 3. Comparison of cost, maintenance, and life tradeoffs, 2272
Battery emergency lighting plant, 2654
Manufacture and use of storage batteries, 1614
New lighting batteries for Swiss Federal Railroads, 1553
Optimum voltage of a battery for emergency illumination, 5055
Storage batteries in marine service, 2744
Storage battery operation and maintenance, 2760
Storage battery operation and maintenance, 2761
LIGHTING SYSTEMS/ELECTRIC GENERATORS
Portable generating set and low-voltage electrical aids for external work, 4750
LIGHTING SYSTEMS/LEAD-ACID BATTERIES
Batteries. 1. Virtues of nickel--cadmium, 2271
Battery plate grid (Patent), 3332
Construction and service testing of cells made with grids of dispersion-strengthened lead, 2501
Emergency lighting battery systems (British regulations), 2658
What's available (In battery-powered emergency lighting), 5115
LIGHTING SYSTEMS/NICKEL-CADMIUM BATTERIES
Batteries. 1. Virtues of nickel--cadmium, 2271
Batteries. 3. Comparison of cost, maintenance, and life tradeoffs, 2272
What's available (In battery-powered emergency lighting), 5115
LIGHTING SYSTEMS/POWER SUPPLIES
Standby power for railroad-highway grade crossing warning systems. Final report Jun 1975-Jun 1976, 5014 (PB-263592)
LIQUID METAL COOLED REACTORS/SPACECRAFT POWER SUPPLIES
Power systems, 213
LITHIUM/CHEMICAL PREPARATION
Lithium-water-air battery project: progress during the month of August 1976, 759 (UCID-17426-76-8)
LITHIUM/CHEMICAL REACTION KINETICS
Activity coefficients of dilute solutions of lithium in liquid aluminum-tin alloys: electromotive force measurements and interpretation, 3341
LITHIUM/CORROSION
Corrosion of lithium in alkaline solution, 2137
LITHIUM/ELECTROCHEMISTRY
Chemical and electrochemical behavior of lithium electrodes in dimethyl sulfite, electrolytic solutions, 4147
Investigation of porous lithium battery electrodes. Quarterly technical progress report No. 4, 15 Apr-15 Jul 1966, 2840 (AD-487623)
LITHIUM/PHASE DIAGRAMS
Equilibrium phases in the lithium--sulfur system, 1318
Phase equilibria in lithium--chalcogen systems, 4226
LITHIUM/RESERVES
Lithium requirements for high-energy lithium-aluminum/iron sulfide batteries for load-leveling and electric-vehicle applications, 3173 (CONF-760112-3)
Lithium requirements for electric vehicles using lithium-water-air batteries, 5026 (UCRL-77440)
LITHIUM 7/NUCLEAR MAGNETIC RESONANCE
$^7$Li self diffusion in LiAl: an NMR study (Electrodes in Li-S battery system), 3467
LITHIUM 7/SELF-DIFFUSION
$^7$Li self diffusion in LiAl: an NMR study (Electrodes in Li-S battery system), 3467
LITHIUM ALLOYS
See also LITHIUM BASE ALLOYS
LITHIUM ALLOYS/CHEMICAL PREPARATION
Lithium--magnesium electrodes in propylene, carbonate, 4002
LITHIUM ALLOYS/CORROSION
Magnesium and magnesium alloys as anodes in electrochemical alkaline-electrolyte power sources, 3852
LITHIUM ALLOYS/DISSOLUTION
Anodic dissolution of lithium--aluminum alloys in a lithium chloride--potassium chloride melt, 1110
LITHIUM ALLOYS/ELECTROMOTIVE FORCE
Thermodynamic properties of the lithium-silicon system, 3356
LITHIUM ALLOYS/FABRICATION
Anodic dissolution of lithium--aluminum alloys in a lithium chloride--potassium chloride melt, 1110
Lithium-water-air battery project: progress during the month of May 1976, 756 (UCID-17426-76-5)
LITHIUM ALLOYS/PHASE DIAGRAMS
Thermodynamic properties of the lithium-silicon system, 3356
LITHIUM ALLOYS/SELF-DIFFUSION
$^7$Li self diffusion in LiAl: an NMR study (Electrodes in Li-S battery system), 3467
LITHIUM ALLOYS/THERMODYNAMIC PROPERTIES
Thermodynamic properties of the lithium-silicon system, 3356
LITHIUM BASE ALLOYS/CHEMICAL PREPARATION
Method of preparing a negative electrode including lithium alloy for use within a secondary electrochemical cell (Patent), 3478
Method of preparing an electrode material of lithium-aluminum alloy (Patent), 3429
LITHIUM CHLORIDES/PHASE DIAGRAMS
Phase diagram of system LiCl-KCl-$CaCrO_4$, 4447
LITHIUM CHLORIDES/THERMODYNAMIC PROPERTIES
Structure and anodic discharge behavior of lithium-boron alloys in the licl-kcl eutectic melt., 3447
LITHIUM COMPOUNDS/ELECTRIC CONDUCTIVITY
Ionic conductivity of solid and liquid $LiAlCl_4$, 3340
LITHIUM FLUORIDES/DIFFUSION
Electrochemical studies of mass transport in high temperature electrolytes (Molten $BeF_2$-LiF mixtures), 3342
LITHIUM FLUORIDES/ELECTRIC CONDUCTIVITY
Electrical conductivity measurements in anhydrous hydrogen fluoride, 4339
LITHIUM HALIDES/PHASE STUDIES
Phase equilibrium studies of lithium halide-containing electrolytes, 1440
LITHIUM HYDROXIDES/ELECTRIC CONDUCTIVITY
Lithium ion conductive electrolyte composition (Patent), 3303 (SAND-77-6009)
LITHIUM HYDROXIDES/FABRICATION
Lithium ion conductive electrolyte composition (Patent), 3303 (SAND-77-6009)
LITHIUM IODIDES/ELECTRIC CONDUCTIVITY
Lithium ion conductive electrolyte composition (Patent), 3303 (SAND-77-6009)
LITHIUM IODIDES/FABRICATION
Lithium ion conductive electrolyte composition (Patent), 3303 (SAND-77-6009)
LITHIUM SULFATES/ELECTRIC CONDUCTIVITY
Lithium ion conductive electrolyte composition (Patent), 3303 (SAND-77-6009)
LITHIUM SULFATES/FABRICATION
Lithium ion conductive electrolyte composition (Patent), 3303 (SAND-77-6009)
LITHIUM SULFIDES/MELTING POINTS
Equilibrium phases in the lithium--sulfur system, 1318
LITHIUM SULFIDES/PHASE DIAGRAMS
Equilibrium phases in the lithium--sulfur system, 1318
LITHIUM-CHLORINE BATTERIES/ANODES
Activity coefficients of dilute solutions of lithium in liquid aluminum-tin alloys: electromotive force measurements and interpretation, 3341
Investigation of porous lithium battery electrodes. Final technical report, 15 July 1965-15 November 1966, 2996 (AD-808937)
Lithium electrode (Patent; fabrication, improved cycle life), 3622
Metal-air batteries symposium: compendium of papers presented for publication, 32 (AD-684898)
Preparing lithium-filled foraminous metal substrates (Patent), 4261
Studies on the negative alloy electrode (Li-Al, Li-Zn, Li-Sn-Zn electrodes), 3157 (ANL-76-8)
Studies on the bipolar liquid metal electrode, 3159 (ANL-76-8)
Studies on the alkali metal alloy-chlorine secondary battery (Liquid and solid electrodes), 3360
LITHIUM-CHLORINE BATTERIES/BATTERY CHARGING
Lithium-chlorine electrochemical energy storage system. Final technical report, 13 December 1965-13 March 1967 (Attempts to increase charge rate), 469 (AD-822442)
LITHIUM-CHLORINE BATTERIES/BATTERY SEPARATORS

Alkali metal voltaic cells (Na(Sn) or Li(Sn)/$CaCl_2$, NaCl, KCl, or LiCl/Ni or $Cl_2$-C), 4647
Separator materials for the lithium-chlorine battery, 2921 (AD-686285)
LITHIUM-CHLORINE BATTERIES/BIBLIOGRAPHIES
Lithium batteries (a bibliography with abstracts). Period covered: 1964-June 1975, 102 (NTIS/PS-75/471)
Lithium batteries. Vol. II. 1975-May 1976 (citations from the NTIS data base). Report for 1975-May 1976 (74 abstracts), 107 (NTIS/PS-76/0543)
Lithium batteries (citations from the Engineering Index data base). Report for 1970-May 1976 (115 abstracts), 108 (NTIS/PS-76/0544)
Lithium batteries (citations from the Engineering Index data base). Report for 1970, 118 (NTIS/PS-77/0639)
LITHIUM-CHLORINE BATTERIES/CATHODES
Battery electrode (Li/LiCl/$Cl_2$; patent), 4466
Impurity effects in high current density $Cl_2$ electrodes, 4541
Influence of certain additives to activated carbon on its properties as hydrogen electrode material, 4644
New reversible chlorine electrode (Employs certain properties of iodine), 4792
Physico-chemical changes at the interface of a graphite chlorine electrode with lithium chloride electrolyte, 4122
Valve electrode for use in fused salts (Fabrication), 4555
LITHIUM-CHLORINE BATTERIES/CHEMICAL REACTIONS
High-temperature batteries, 610 (ANL-76-8)
LITHIUM-CHLORINE BATTERIES/COMPARATIVE EVALUATIONS
Battery power for electric vehicles. 2. Novel high-energy power sources, 1223
Economic comparison of four electric power sources for forklift trucks, 2003 (AD/A-006479)
LITHIUM-CHLORINE BATTERIES/CORROSION
Case for electric and fuel-cell powered vehicles, 5139
Corrosion and related problems in high-temperature cells, 1257
LITHIUM-CHLORINE BATTERIES/DESIGN
Electrochemical vehicle powerplants (Review of GMC work on high-power and -energy density batteries), 1478
Enclosed electrical energy storage device with halogen absorbing means (Patent; halogen oxidant), 1081
Lithium-chlorine battery design (Patent), 921
Lithium-inorganic electrolyte battery systems, 429 (AD-758856)
Regulating the generation of chlorine from chlorine hydrate for metal--chlorine batteries (Patent), 1068
LITHIUM-CHLORINE BATTERIES/ELECTRIC POTENTIAL
Inorganic electrolyte based, room temperature, lithium/chlorine, sodium/chlorine, lithium/sulfur, sodium/sulfur, and lithium/cupric fluoride cells, 1358
LITHIUM-CHLORINE BATTERIES/ELECTRICAL INSULATION
High-temperature insulation, 4386
LITHIUM-CHLORINE BATTERIES/ELECTROCHEMISTRY
Diffusion of lithium in lithium--zinc alloy, 2279
Ltihium alloys-chlorine battery. II. Charge and discharge reaction and diffusion of lithium in alloy at negative electrode of the lithium zinc alloy-chlorine secondary battery (Li-Zn(liq)/LiCl-KCl molten salt/C-$Cl_2$), 2419
LITHIUM-CHLORINE BATTERIES/ELECTRODES
Diffusion of lithium in lithium--zinc alloy, 2279
Halogen hydrates (Patent; halogen storage by means of hydrates), 3513
LITHIUM-CHLORINE BATTERIES/ELECTROLYTES
Battery with negative electrode of alkali metal (Li anode with $LiClO_4$ electrolyte in mixed solvent), 4006
LITHIUM-CHLORINE BATTERIES/FEASIBILITY STUDIES
Lithium alloys-chlorine secondary battery. I. Basic studies on a lithium alloys-chlorine secondary battery using a molten salt as the electrolyte (Li(Zn,Sn,Pb) /LiCl-KCl/C-$Cl_2$, 130 W/kg), 1405
Lithium-chlorine electrochemical energy storage system. Interim technical report, 13 December 1965-13 June 1966 (1250 lb, 200 kWhr), 347 (AD-639302)
LITHIUM-CHLORINE BATTERIES/FLOW REGULATORS
Mass flow rate control of chlorine content of electrolyte for high energy density battery (Patent), 3623
LITHIUM-CHLORINE BATTERIES/MATERIALS
Corrosion and related problems in high-temperature cells, 1257
LITHIUM-CHLORINE BATTERIES/PERFORMANCE
Batteries kick off new markets-1. Dry batteries with high energy density, minimal self-discharge promise solid demand from ME, 2167
Description of lithium--chlorine molten electrolyte battery to be used in electric automobiles, 1493
Development of electrochemical energy storage unit for vehicle propulsion. Final technical report No. 3, 3 March 1966-30 June 1968 (Li-Al/LiCl-KCl/C, 355 to 550C, for vehicle with 200-mile range), 496 (AD-841130)
Fast charge molten salt batteries, 1494
General Motors looks to future, 5288
Lithium-chlorine battery (Li/LiCl/Cl with porous C or graphite gas electrode, operates at 650°C), 2571
Lithium-inorganic electrolyte battery systems, 429 (AD-758856)
Rechargeable lithium-chlorine cell with mixed ionic molten salt electrolyte (Li/LiF + LiCl + KCl/$Cl_2$), 1235
Studies on the lithium alloys--chlorine secondary battery (Molten LiCl--KCl electrolyte), 2278
LITHIUM-CHLORINE BATTERIES/POLARIZATION
Diffusion of lithium in lithium--zinc alloy, 2279
LITHIUM-CHLORINE BATTERIES/SAFETY
Preliminary safety analysis of lithium batteries. Technical report, 2002 (AD/A-006149)
Safety shell for retention and detoxication of chlorine released from metal--chlorine batteries, 3729
LITHIUM-CHLORINE BATTERIES/TESTING
Transportation. 2. Two for the road, 5176
LITHIUM-COPPER CHLORIDE BATTERIES/ANODES
Activity coefficients of dilute solutions of lithium in liquid aluminum-tin alloys: electromotive force measurements and interpretation, 3341
Investigation of porous lithium battery electrodes. Final technical report, 15 July 1965-15 November 1966, 2996 (AD-808937)
Investigation of porous lithium battery electrodes. Quarterly technical progress report No. 1, 15 Jul-15 Oct 1965, 2826 (AD-474692)
Preparing lithium-filled foraminous metal substrates (Patent), 4261
Research and development of a high-energy nonaqueous battery. Quarterly technical report No. 2, 18 Jun-18 Sep 1963 (Li anode fabrication), 245 (AD-347495)
Research and development of a high-energy nonaqueous battery. Quarterly technical report No. 5, 18 Mar-18 Jun 1964 (40 to 50 Wh/lb), 247 (AD-354554)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 4, 1 September-30 November 1966 (4 Ah), 458 (AD-808475)
LITHIUM-COPPER CHLORIDE BATTERIES/BATTERY SEPARATORS
Development of a high-temperature battery. Final report (Li-Mg/CuCl with zeolite separator), 681 (N-65-36781)
Evaluation of rechargeable lithium-copper chloride organic electrolyte battery system. Final report, March-October 1967 (Use of ion exchange membrane as separator to retard diffusion of chlorocuprate complexes), 3016 (AD-825241)
Ion-exchange membranes as separators for organic electrolyte rechargeable systems (Feasibility to retard diffusion of chlorocuprate complexes), 4421
Organic electrolyte permselective membranes. Report No. 2 (annual), 1 April 1968-1 April 1969 (Propylene carbonate), 3050 (AD-859386)
Organic electrolyte permselective membranes. Report No. 4 (final), 1 Apr 68-15 Sep 70 (Li-Cu halide cells), 3068 (AD-882890)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 4, 1 September-30 November 1966 (4 Ah), 458 (AD-808475)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 5, 1 December 1966-28 February 1967, 460 (AD-813321)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 6, 1 December 1968-28 February 1969, 514 (AD-853976)
LITHIUM-COPPER CHLORIDE BATTERIES/CATHODES
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 4, 1 September-30 November 1966 (4 Ah), 458 (AD-808475)
LITHIUM-COPPER CHLORIDE BATTERIES/CORROSION
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 5, 1 December 1966-28 February 1967, 460 (AD-813321)
LITHIUM-COPPER CHLORIDE BATTERIES/DESIGN
High-energy nonaqueous battery system. Final report, 1 December 1965-31 August 1967, 477 (AD-825181)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 4, 1 September-30 November 1966 (4 Ah), 458 (AD-808475)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 2, 1 December 1967-29 February 1968 (Study of components and wet-stand characteristics), 486 (AD-832005)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 3, 1 March-31 May 1968, 3029 (AD-837458)
LITHIUM-COPPER CHLORIDE BATTERIES/ELECTROCHEMISTRY
Research on electrochemical parameters for nonaqueous batteries: task I. Quarterly progress report No. 2, 525 (AD-870181)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 5, 1 September-30 November 1968, 508 (AD-848884)
LITHIUM-COPPER CHLORIDE BATTERIES/ELECTRODES
Research and development of a high-energy nonaqueous battery. Quarterly progress report No. 7, 18 Sep-18 Dec 1964 (Electrolyte properties and electrode kinetics), 249 (AD-359290)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 4, 1 June-31 August 1968, 501 (AD-843741)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 6, 1 December 1968-28 February 1969, 514 (AD-853976)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 1, 1 Dec 1965-1 Mar 1966, 294 (AD-484014)
LITHIUM-COPPER CHLORIDE BATTERIES/ELECTROLYTES
Research and development of a high-energy nonaqueous battery. Quarterly progress report No. 7, 18 Sep-18

Dec 1964 (Electrolyte properties and electrode kinetics), 249 (AD-359290)
LITHIUM-COPPER CHLORIDE BATTERIES/GRIDS
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 5, 1 December 1966-28 February 1967, 460 (AD-813321)
LITHIUM-COPPER CHLORIDE BATTERIES/HEATING
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 5, 1 December 1966-28 February 1967, 460 (AD-813321)
LITHIUM-COPPER CHLORIDE BATTERIES/PERFORMANCE
High-rate nonaqueous lithium battery (Organic aprotic solvent electrolyte, 30 to 62 Wh/lb in 5-Ah cells lasting up to an hour), 1387
High-rate nonaqueous lithium battery (Li/CuCl, 503 Wh/lb theoretical, 30 to 62 Wh/lb for 4- to 6-Ah cells at 10 to 60 min. rate), 1388
Research and development of a high-energy nonaqueous battery. Quarterly technical report No. 2, 18 Jun-18 Sep 1963 (Li anode fabrication), 245 (AD-347495)
Research and development of a high-energy nonaqueous battery. Quarterly technical report No. 4, 18 Dec 1963-18 Mar 1964 (Improvement in performance characteristics of components), 246 (AD-352854)
Research and development of a high-energy nonaqueous battery. Quarterly technical report No. 5, 18 Mar-18 Jun 1964 (40 to 50 Wh/lb), 247 (AD-354554)
Research and development of a high-energy nonaqueous battery. Quarterly technical report No. 6, 18 Jun-18 Sep 1964 (75 to 85 Wh/lb), 248 (AD-356992)
Research and development of a high-energy nonaqueous battery. Final report, 18 Mar 1963-18 Mar 1965 (Li/$CuF_2$; goals of 100 Wh/lb, 7.5 Wh/in.$^3$, greater than 10 kW for 5 min), 250 (AD-369426)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 3, 1 June-31 August 1966, 452 (AD-802208)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 4, 1 September-30 November 1966 (4 Ah), 458 (AD-808475)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 6, 1 March-31 May 1967, 464 (AD-818935)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 7, 1 March-31 May 1969, 516 (AD-856423)
Research on a high-energy nonaqueous battery system. Quarterly progress report No. 2, 1 Mar-31 May 1966 (503 Wh/lb (theo.), 75 Wh/lb achieved in 1Ah), 295 (AD-484015)
LITHIUM-COPPER CHLORIDE BATTERIES/SAFETY
Preliminary safety analysis of lithium batteries. Technical report, 2002 (AD/A-006149)
LITHIUM-SULFUR BATTERIES
Comeback for Reddy Kilowatt (Descriptive review article on alternative means of power generation), 185
LITHIUM-SULFUR BATTERIES/ANODES
Activity coefficients of dilute solutions of lithium in liquid aluminum-tin alloys: electromotive force measurements and interpretation, 3341
Anode for a secondary, high-temperature electrochemical cell (Patent; method of preparation), 3717
Anode for a secondary, high-temperature electrochemical cell (Patent; Li/LiF-LiCl-KCl/$FeS_2$-$Li_2S$), 3456
Anodic dissolution of lithium--aluminum alloys in a lithium chloride--potassium chloride melt, 1110
Bonded metal electrodes (Patent; improved contact achieved by cold pressing etched collector sheet), 3693
Characterization of porous Li-Al alloy electrodes (Effects of electrolyte void fraction, electrode thickness, and type of current collector), 2032 (ANL-76-8)
Development of lithium-metal sulfide batteries for load leveling (Li/KCl-LiCl/Fe sulfides, Li and Li-Si negative electrodes), 671 (EPRI-116)
Effects of metal additives on the performance characteristics of lithium-aluminum alloy electrodes (Sn, Pb, Cu, In), 3176 (CONF-770531-4)
Electrode formed of lithium and a metal conductor metallurgically bound (Patent), 4026
Electrode of lithium-aluminum alloy (Patent; preparation), 3996
Investigation of porous lithium battery electrodes. Final technical report, 15 July 1965-15 November 1966, 2996 (AD-808937)
Kinetic study of the aluminium electrode in molten 60 mole percent aluminium chloride--40 mole percent sodium chloride at 453°K, 4071
Lithium-aluminum electrode (Voltage-time curves), 3454
Lithium electrode (Patent; fabrication, improved cycle life), 3622
Lithium electrode and an electrical energy storage device containing the same ( Li-Si/Li and other halide/sulfide; patent), 3404
Lithium-silicon electrodes for the lithium-iron sulfide battery, 3158 (ANL-76-8)
Metal-air batteries symposium: compendium of papers presented for publication, 32 (AD-684898)
Method of preparing a negative electrode including lithium alloy for use within a secondary electrochemical cell (Patent), 3478
Method of preparing an electrode material of lithium-aluminum alloy (Patent), 3429
Method of preparing a negative electrode including lithium alloy for use within a secondary electrochemical cell (Patent; Li-Al/KCl-LiCl/FeS), 3309
Performance characteristics of solid lithium-aluminum alloy electrodes (Li-Al/$FeS_2$), 3371
Physical changes at lithium electrodes during charge-discharge cycling, 4406
Rechargeable lithium/iron sulfide battery (Li--Si/KCl--LiCl/Fe sulfide), 3785
Structure of lithium-boron alloys and their performance as potential anodes for high power molten salt batteries. Progress report, 1 Aug 1974-30 Jun 1975, 3132 (AD-A-025202)
Thermodynamic properties of the lithium-silicon system (Feasibility study), 3356
LITHIUM-SULFUR BATTERIES/BATTERY SEPARATORS
Ceramic separators for a high temperature lithium battery ($CaZrO_3$ was best), 4232
Ceramics in advanced batteries, 3170 (CONF-751194-)
Ceramics in lithium alloy/metal sulfide batteries, 3171 (CONF-751194-)
Development of lithium/sulfur cells for application to electric automobiles (>200 W-hr/kg), 1307
Interelectrode separator for electrochemical cell (Patent), 3494
Separators for lithium alloy-iron sulfide fused salt batteries. First annual report, 3248 (ORO-4874-2)
Separators for lithium alloy-iron sulfide fused salt batteries (Li-Al/LiCl-KCl/Fe sulfide), 3151 (ANL-76-8)
Stable inorganic matrix materials for high temperature batteries. Final report No. 1, 2 June 1967-2 February 1968, 2913 (AD-676106)
Wettability of high-temperature cell separators by molten salt (Li-Al/LiCl-KCl/Fe sulfide cells with molten electrolyte), 3153 (ANL-76-8)
LITHIUM-SULFUR BATTERIES/BIBLIOGRAPHIES
Lithium batteries (a bibliography with abstracts). Period covered: 1964-June 1975, 102 (NTIS/PS-75/471)
Lithium batteries. Vol. II. 1975-May 1976 (citations from the NTIS data base). Report for 1975-May 1976 (74 abstracts), 107 (NTIS/PS-76/0543)
Lithium batteries. Volume 2. 1975-July 1977 (citations from the NTIS data base). Report for 1975-Jul 77, 117 (NTIS/PS-77/0638)
Lithium batteries (citations from the Engineering Index data base). Report for 1970, 118 (NTIS/PS-77/0639)
LITHIUM-SULFUR BATTERIES/CATHODES
Alkali metal/sulfur cell with gas fuel cell electrode (Patent), 937
Cathode composition for electrochemical cell (Patent; Li/LiCl-KCl/FeS-$Cu_2S$), 3445
Cathode for a secondary electrochemical cell (Li/LiF--LiCl--KCl/$FeS_2$, $Li_2S$; patent), 3514
Cathodes for secondary electrochemical power-producing cells (Patent; layers of porous substrates impregnated with S alternate with layers containing electrolyte), 4191
Ceramics in advanced batteries, 3170 (CONF-751194-)
Design work on lithium-sulfur battery (and others), 647 (CONF-691143-)
Development of high-performance iron sulfide electrodes with porous current collector structures (Li-Al/Fe sulfides), 3790
Development of a compact, high-capacity $FeS_2$ electrode, 4139
Development of a compact, high-capacity $FeS_2$ electrode (Li-Al/LiCl-KCl/$FeS_2$, Mo current collector, 430°C, >150 Wh/kg), 3463
Development of uncharged Li-Al/FeS cells (Cathode formed by hot-pressing $Li_2S$ and Fe powder), 612 (ANL-76-8)
Development of lithium-metal sulfide batteries for load leveling. Interim report (FeS; KCl-LiCl electrolyte; Li-Si alloy cathode), 728 (PB-244390)
Development of lithium-metal sulfide batteries for load leveling (Li/KCl-LiCl/Fe sulfides, Li and Li-Si negative electrodes), 671 (EPRI-116)
Engineering evaluation of solid transition-metal sulfide electrodes for use in high energy-density batteries, 3191 (LBL-5186)
Engineering evaluation of solid transition-metal sulfide electrodes for use in high energy-density batteries, 3465
Increasing the energy storage capacity of an electrode of amorphous carbon (Patent), 3898
Lithium--molten salt cell with transition metal chalcogenide positive electrode (Patent; Li/alkali or alkaline earth metal halides with $Li^+$/transition metal chalcogenide), 941
Low temperature lithium/sulfur secondary battery. Annual progress report, December 1, 1974-December 1, 1975 (Ambient-temperature battery with dissolved S), 666 (COO-2520-2)
Low temperature lithium/sulfur secondary battery. Semiannual progress report, December 1, 1974-June 1, 1975 (Development of dissolved sulfur cathode operable at ambient temperatures), 3181 (COO-2520-1)
Metal sulfide electrodes for secondary lithium batteries (Li/$FeS_2$ and Li/CuS with LiCl-KCl electrolyte, 400°, 77 and 52 Wh/lb), 3811
Metallic sulfide additives for positive electrode material within a secondary electrochemical cell (Patent; Fe sulfide electrode with sulfide additives of Co, Ni, Cu, Ce, Mn), 3366

Method of preparing an electrochemical cell in uncharged state (Patent; cathode of Li sulfide, transition metal, and electrolytic salt), 811
Multicomponent cathodes for a cell with molten lithium chloride--potassium chloride electrolytes (Patent; C + $Sb_2S_3$, $WS_2$, or $MoS_2$, >210 Wh/lb at 450°), 3528
Overcharge studies of the $FeS_2$ electrode in Li/$FeS_2$ cells (Both Li and Li-Al alloy anodes used in study of performance and reaction mechanism), 3154 (ANL-76-8)
Rechargeable lithium/iron sulfide battery (Li--Si/KCl--LiCl/Fe sulfide), 3785
Sulfur-based lithium-organic electrolyte secondary batteries. Quarterly report, 3 Dec 1973-3 Mar 1974 (Development of positives based on higher sulfides), 2976 (AD-782241)
Sulfur-based lithium-organic electrolyte secondary batteries. Final report, 3 Dec 1973-29 Aug 1975, 588 (AD-A-023496)
Sulfur electrode (Li/organic electrolyte/S), 2929 (AD-709272)
Sulfur electrode (Li(Ni)/DMSO-$KClO_4$/S-C(M)), 1431
Sulfur-sulfide electrode in molten salts. I. Chronopotentiometric behavior in lithium chloride-potassium chloride eutectic, 3482
Uncharged positive electrode composition (Patent), 3310
LITHIUM-SULFUR BATTERIES/CHEMICAL REACTIONS
High-temperature batteries, 610 (ANL-76-8)
Overcharge studies of the $FeS_2$ electrode in Li/$FeS_2$ cells (Both Li and Li-Al alloy anodes used in study of performance and reaction mechanism), 3154 (ANL-76-8)
LITHIUM-SULFUR BATTERIES/COMPARATIVE EVALUATIONS
Batteries for electrocars, 2173
Lightweight laser designator battery evaluation tests. Final report, 2017 (AD-A-019511)
LITHIUM-SULFUR BATTERIES/CONNECTORS
Ceramics in lithium alloy/metal sulfide batteries, 3171 (CONF-751194-)
Materials development in the lithium-aluminum/iron sulfide battery program at Argonne National Laboratory, 3152 (ANL-76-8)
LITHIUM-SULFUR BATTERIES/CONTAINERS
Battery construction capable of safely venting internal pressure (Patent), 3745
LITHIUM-SULFUR BATTERIES/CORROSION
Corrosion and related problems in high-temperature cells, 1257
Materials corrosion in molten-salt lithium-sulfur cells (Li--Al/LiCl--KCl/Fe sulfides with BN fabric separators), 1262
Materials development in the lithium-aluminum/iron sulfide battery program at Argonne National Laboratory, 3152 (ANL-76-8)
LITHIUM-SULFUR BATTERIES/DESIGN
Advanced battery design, 1012
Alkali metal/sulfur cell with gas fuel cell electrode (Patent), 937
Battery design and cell testing for electric-vehicle propulsion (Li-Al/LiCl-KCl/Fe sulfides), 1103
Design and testing of lithium/iron sulfide batteries for electric vehicle propulsion (Li-Al/KCl-LiCl-$FeS_2$), 657 (CONF-760866-2)
Design and performance of Li-Al/iron sulfide cells for utility energy storage and electric vehicles (140 W/kg, 115 Wh/kg), 656 (CONF-760617-3)
Design work on lithium-sulfur battery (and others), 647 (CONF-691143-)
Development of prototype lithium/sulfur cells for application to load-leveling devices in electric utilities (Li-Al/$FeS_2$), 1246
Development of compact lithium/iron disulfide electrochemical cells ($Li_4Si/FeS_2$: 130 Wh/kg, 59 Wh/kg, 80 Ah, 77 cycles; Li-Al/$FeS_2$: 7800 h, 445 cycles; 425 to 500°C, KCl-LiCl electrolyte), 894
Development of lithium-metal sulfide batteries for load leveling. Progress report, 3262 (PB-253164)
Electrochemical cell assembled in discharged state (Patent; Li-Al/Fe, Co, Ni, Cu, or Mo sulfide), 1180
Electrochemical cell assembled in discharged state (Patent; 3 to 13Ah), 881
Electrolytic cells (Patent; Li, Li-Na, or Li-Al anodes, S or Se cathode), 800
Evaluation of lithium/sulfur batteries for automobiles, 79 (DOT-TSC-OST-75-31)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period July-December 1974, 605 (ANL-75-1)
High-performance batteries for off-peak energy storage. Progress report, July-December 1973 (Li--Al/LiCl--KCl/Fe sulfide, 400°C, 121 Whr/kg, brief testing of Li/LiCl--KCl/$Cu_2S$ cells), 632 (ANL-8057)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-June 1975 (Li-Al/KCl-LiCl/Fe sulfide, 42 kWh), 607 (ANL-75-36)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, July-December 1975 (Li-Al/LiCl-KCl/FeS or $FeS_2$), 617 (ANL-76-9)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, April-June 1976 (Li-Al/LiCl-KCl/FeS or $FeS_2$, operate at 400 to 450 C; some work on Na/$FeS_2$ and $CaMg_2/CaCl_2$-$LiCl_2KCl$/FeS cells), 621 (ANL-76-81)
High temperature secondary batteries (Patent), 801
Lithium--molten salt cell with transition metal chalcogenide positive electrode (Patent; Li/alkali or alkaline earth metal halides with $Li^+$/transition metal chalcogenide), 941
Lithium/metal - sulfur advanced batteries, 677 (ERDA-76-136)
Lithium/sulfur batteries for marine application (Li-Al/$FeS_2$ with LiF-LiCl-KCl electrolyte), 159
Lithium/sulfur cells and their potential for vehicle propulsion, 648 (CONF-691143-)
Low temperature lithium/sulfur secondary battery. Annual progress report, December 1, 1974-December 1, 1975 (Ambient-temperature battery with dissolved S), 666 (COO-2520-2)
Modular electrochemical cell (Li or Na/LiF--LiCl--KCl/S, As, C mixture; patent), 960
Modular electrical energy storage device (Patent application; means to maintain some components fixed relative to others during operation), 879
Modular electrical energy storage device (Patent; resilient body of compressed C fibers allows for differential thermal expansion), 829
Modular electrical energy storage device (Patent), 803
RANN utilization experience (case studies 22 through 31). Final report, 738 (PB-263682)
Rechargeable lithium/iron sulfide battery (Li--Si/KCl--LiCl/Fe sulfide), 3785
Research and development on a lithium-sulfur battery, 649 (CONF-710233-)
Sealed lithium-sulfur monochloride cell (Patent), 877
Secondary electrochemical power-producing cells having mixed cathode composition (Li/LiF--LiCl--KCl/S--As--C and Li/Se with cathode additives; patent), 977
Secondary cells with a lithium anode and salt melt (Patent; Li or alloy/$Li^+$ electrolyte/transition metal chalcogenide or oxide ($FeS_2$, $Cr_2S_3$, CuSe; high energy density), 1070
Secondary electrochemical power-producing cells having mixed cathode composition (Patent; alkali metal/alkali metal ions/chalcogen mixed with inhibitor of chalcogen activity (e.g. Se, S + Al, As, Pb, or Tl)), 979
Storage battery with lithium electrode (Patent), 1065
LITHIUM-SULFUR BATTERIES/ECONOMICS
Economic impacts of electric cars in St. Louis and Philadelphia, 5019 (TEC-75/006c)
LITHIUM-SULFUR BATTERIES/ELECTRIC CONDUCTORS
Ceramics in lithium alloy/metal sulfide batteries, 3171 (CONF-751194-)
LITHIUM-SULFUR BATTERIES/ELECTRIC CURRENTS
Lithium-titanium disulfide secondary battery (Saturated $LiPF_6$--propylene carbonate electrolyte;patent), 2203
LITHIUM-SULFUR BATTERIES/ELECTRIC POTENTIAL
Inorganic electrolyte based, room temperature, lithium/chlorine, sodium/chlorine, lithium/sulfur, sodium/sulfur, and lithium/cupric fluoride cells, 1358
LITHIUM-SULFUR BATTERIES/ELECTROCHEMISTRY
Chemical investigations of lithium--sulfur cells, 1090
Electrochemistry of lithium/metal sulfide and calcium/metal sulfide cells using molten salt electrolytes (Li/LiCl-KCl/sulfide and Ca/LiCl-KCl-$CaCl_2$/sulfide, 700 K), 2044 (CONF-770531-1)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period July-December 1974, 605 (ANL-75-1)
Sulfur-based lithium-organic electrolyte secondary batteries. Quarterly report No. 4, 4 September-3 December 1974, 576 (AD/A-008044)
LITHIUM-SULFUR BATTERIES/ELECTRODES
$^7Li$ self diffusion in LiAl: an NMR study (Electrodes in Li-S battery system), 3467
Compartmented electrode structure (Patent application), 3452
Design and performance of Li-Al/iron sulfide cells for utility energy storage and electric vehicles (140 W/kg, 115 Wh/kg), 656 (CONF-760617-3)
Development of lithium/metal sulfide batteries at Argonne National Laboratory: summary report for 1974 (Li--Al/FeS and Li--Al/$FeS_2$), 606 (ANL-75-20)
Development of prototype lithium/sulfur cells for application to load-leveling devices in electric utilities (Li-Al/$FeS_2$), 1246
Development of uncharged Li-Al/FeS/sub x/ cells (Made from Al negative and Fe + $Li_2S$ positive), 892
Development status of lithium-silicon-iron sulfide load-leveling batteries ($Li_5Si$/LiCl-KCl/FeS or $FeS_2$, 400°C), 893
Development of lithium-metal sulfide batteries for load leveling. Progress report, 3262 (PB-253164)
Electrode structure for electrical energy storage device (Patent; alkali metal/chlorides/transition metal chalcogenides), 3334
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period July-December 1974, 605 (ANL-75-1)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-June 1975 (Li-Al/KCl-LiCl/Fe sulfide, 42 kWh), 607 (ANL-75-36)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, July-December 1975 (Li-Al/LiCl-KCl/FeS or $FeS_2$), 617 (ANL-76-9)

High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, April-June 1976 (Li-Al/LiCl-KCl/FeS or $FeS_2$, operate at 400 to 450 C; some work on $Na/FeS_2$ and $CaMg_2/CaCl_2$-$LiCl_2KCl/FeS$ cells), 621 (ANL-76-81)
Lithium battery with inorganic electrolyte. Quarterly progress report No. 2, 1 Feb-30 Apr 1972, 415 (AD-746633)
Materials development in the lithium-aluminum/iron sulfide battery program at Argonne National Laboratory, 3152 (ANL-76-8)
Method of preparing electrodes with porous current collector structures and solid reactants for secondary electrochemical cells (Patent), 3657
Method of preparing electrodes with porous current collector structures and solid reactants for secondary electrochemical cells (Patent; Li-Al-Si/LiF-LiCl-KCl/$FeS_2$), 3457
Method of preparing porous, active material for use in electrodes of secondary electrochemical cells (Patent application; carbonaceous matrices contain embedded active material), 3455
Porous carbonaceous electrode structure and method for secondary electrochemical cell (Patent), 3311
Review of electrode designs and fabrication techniques for lithium-aluminium/iron sulfide cells, 3466

LITHIUM-SULFUR BATTERIES/ELECTROLYTES
Battery with negative electrode of alkali metal (Li anode with $LiClO_4$ electrolyte in mixed solvent), 4006
Cell is used as energy source of wrist-watches (Patent), 3621
Ceramics in advanced batteries, 3170 (CONF-751194-)
Composition gradient during electrolysis in mixtures analogous to molten salt battery electrolytes, 2045 (CONF-770814-5)

LITHIUM-SULFUR BATTERIES/FABRICATION
Development of uncharged Li-Al/FeS/sub x/ cells (Made from Al negative and Fe + $Li_2S$ positive), 892
Electrochemical cell assembled in discharged state (Patent; Li-Al/Fe, Co, Ni, Cu, or Mo sulfide), 1180
High power battery for American electric cars, 993
Lithium requirements for high-energy lithium-aluminum/iron sulfide batteries for load-leveling and electric-vehicle applications, 3173 (CONF-760112-3)
Method of preparing an electrochemical cell in uncharged state (Patent; cathode of Li sulfide, transition metal, and electrolytic salt), 811

LITHIUM-SULFUR BATTERIES/FEASIBILITY STUDIES
Sulfur-based lithium-organic electrolyte secondary batteries. Quarterly report No. 2, March 3-June 3, 1974, 569 (AD/A-002701)

LITHIUM-SULFUR BATTERIES/MATERIALS
Corrosion and related problems in high-temperature cells, 1257
Equilibrium phases in the lithium--sulfur system, 1318
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period July-December 1974, 605 (ANL-75-1)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, April-June 1976 (Li-Al/LiCl-KCl/FeS or $FeS_2$, operate at 400 to 450 C; some work on $Na/FeS_2$ and $CaMg_2/CaCl_2$-$LiCl_2KCl/FeS$ cells), 621 (ANL-76-81)
Materials corrosion in molten-salt lithium-sulfur cells (Li--Al/LiCl--KCl/Fe sulfides with BN fabric separators), 1262
Materials development in the lithium-aluminum/iron sulfide battery program at Argonne National Laboratory, 3152 (ANL-76-8)
Phase equilibria in lithium--chalcogen systems, 4226

LITHIUM-SULFUR BATTERIES/MATHEMATICAL MODELS
Modeling approaches for molten-salt lithium/sulfide batteries, 616 (ANL-76-8)

LITHIUM-SULFUR BATTERIES/MEMBRANES
Sodium borate glass compositions and batteries containing same (Patent), 3975

LITHIUM-SULFUR BATTERIES/PERFORMANCE
Batteries kick off new markets-1. Dry batteries with high energy density, minimal self-discharge promise solid demand from ME, 2167
Chemoelectric energy conversion for nonaqueous reserve batteries. Quarterly report No. 11, January-March 1966 (Quarterly report), 339 (AD-633957)
Current status of the Atomics Internationsl lithium-iron sulfide battery development ($Li_5Si$/KCl-LiCl/FeS or $FeS_2$, 2.5 kWh modular cell), 614 (ANL-76-8)
Design and performance of Li-Al/iron sulfide cells for utility energy storage and electric vehicles (140 W/kg, 115 Wh/kg), 656 (CONF-760617-3)
Development of lithium/sulfur cells for application to electric automobiles (>200 W-hr/kg), 1307
Development of lithium/sulfur cells for application to electric automobiles (Li/LiCl-KCl/$FeS_2$), 1245
Development of high-energy batteries for electric vehicles. Progress report for the period February 1969-June 1970 (Lithium halide electrolytes, Li in S or phosphorus sulfide cathodes; 0.5 A-h/$cm^2$ at 0.5 A/$cm^2$), 642 (APTD-1126)
Development of uncharged Li-Al/FeS cells (Cathode formed by hot-pressing $Li_2S$ and Fe powder), 612 (ANL-76-8)
High rate primary lithium--sulphur battery, 2342
High-temperature batteries, 610 (ANL-76-8)
Lithium battery with inorganic electrolyte. Quarterly progress report No. 2, 1 Feb-30 Apr 1972, 415 (AD-746633)
Lithium/chalcogen secondary cells for components in electric vehicular propulsion generating systems. Interim technical summary report No. 5, 23 May-22 Nov 1971, 1810 (AD-741801)
Lithium power may put electric car in your future, 5114
Lithium/sulfur batteries for electric vehicle propulsion (Li halide electrolyte), 2408
Lithium/sulfur batteries for electric vehicle propulsion (0.52 A-hr/$cm^2$ at 0.52 A/$cm^2$), 2411
Lithium/sulfur cells and their potential for vehicle propulsion, 648 (CONF-691143-)
Patent; button-type, cell, electrolyte of dimethyl carbonate, 1,2-dimethoxyethane, $BF_3$, and $LiBF_4$, 1071
Performance of lithium/iron sulfide cells, 1236
Preliminary investigation of high temperature lithium/iron sulfide secondary cells (Lig. Li in stainless steel/LiCl-KCl/$FeS_2$($Li_2S$, FeS)), 1218
Rechargeable lithium--sulfur battery executive summary progress report through 1973 (Development of 25- and 100-Whr cells for design of kWhr batteries, metal sulfide cathode, 1400 cycles), 724 (PB-237672)
Research and development on a lithium-sulfur battery, 649 (CONF-710233-)
Secondary batteries for electric vehicles, 4854 (ANL-76-8)
Sulfur-based lithium-organic electrolyte secondary batteries. Quarterly report No. 6, 4 Mar 1975-3 Jun 1975 (To be operable at -40 to +160 F), 583 (AD-A-017642)
Transportation. 2. Two for the road (220 Wh/kg and 220 W/kg), 5176

LITHIUM-SULFUR BATTERIES/PERFORMANCE TESTING
Battery design and cell testing for electric-vehicle propulsion (Li-Al/LiCl-KCl/Fe sulfides), 1103
Development of uncharged Li-Al/FeS/sub x/ cells (Made from Al negative and Fe + $Li_2S$ positive), 892
Development of compact lithium/iron disulfide electrochemical cells ($Li_xSi/FeS_2$: 130 Wh/kg, 59 Wh/kg, 80 Ah, 77 cycles; $Li-Al/FeS_2$: 7800 h, 445 cycles; 425 to 500°C, KCl-LiCl electrolyte), 894
Electric vehicle performance with alternate batteries, 5064
Evaluation of lithium/sulfur batteries for automobiles, 79 (DOT-TSC-OST-75-31)
Instrumentation for automatic cycling of lithium-aluminum/iron sulfide secondary cells, 3163 (ANL-76-119)
Lithium/sulfur secondary cells (Li in Si steel or Ni/LiF--LiCl--KCl/S in C), 2385

LITHIUM-SULFUR BATTERIES/PLANNING
Batteries for energy storage, 890
Need for development of high-energy batteries for electric automobiles, 4857 (ANL-8075)

LITHIUM-SULFUR BATTERIES/PRODUCTION
Cost estimate for the commercial manufacture of lithium/iron sulfide cells for load-leveling, 618 (ANL-76-12)

LITHIUM-SULFUR BATTERIES/RESEARCH PROGRAMS
Aerolyte battery program. Summary report, December 1967-May 1968, 741 (RN-NC-0018)
Battery research sponsored by the U.S. Energy Research and Development Administration, 4952 (CONF-760112-1)
Comparison of U.S. and European high-temperature battery programs, 611 (ANL-76-8)
Development of high-energy batteries for electric vehicles. Progress report for the period July 1970-June 1971 (ANL), 749 (TID-26731)
Development of lithium/metal sulfide batteries at Argonne National Laboratory: summary report for 1975, 620 (ANL-76-45(Rev.))
Development of high-specific-energy batteries for electric vehicles. Progress report, August 1972-January 1973, 628 (ANL-7998)
Development of lithium/metal sulfide batteries at Argonne National Laboratory: summary report, 1976 (Li-Al/LiCl-KCl/FeSorFeS$_2$, 400 to 450°C), 624 (ANL-77-18)
Development of lithium-metal sulfide batteries for load leveling. Progress report No. 3, July 1, 1975-September 30, 1976 (25 to 1000 Wh, >1000 cycles), 676 (EPRI-EM-460)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period January-June 1974 (Li--Al/LiCl--KCl/$FeS_2$; ANL), 635 (ANL-8109)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-June 1975 (Li-Al/KCl-LiCl/Fe sulfide, 42 kWh), 607 (ANL-75-36)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, July-December 1975 (Li-Al/LiCl-KCl/FeS or $FeS_2$), 617 (ANL-76-9)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-March 1976 (Li-Al/LiCl-KCl/FeS or $FeS_2$; some work on $CaAl_2$, $Ca_2Si$, and Mg anodes and FeS, $Fe_3O_4$ and $FeS_2$ cathodes; ANL), 619 (ANL-76-35)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, April-June 1976 (Li-Al/LiCl-KCl/FeS or $FeS_2$, operate at 400 to 450 C; some work on $Na/FeS_2$ and $CaMg_2/CaCl_2$-

$LiCl_2KCl/FeS$ cells), 621 (ANL-76-81)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period July-September 1976 (Li-Al/Kcl-LiCl/Fes or $FeS_2$; tests of $Li/TiS_2$, $Na/FeS_2$, and $CaMg_2/FeS$ cells), 622 (ANL-76-98)
High-performance batteries for stationary energy storage and electric-vehicle propulsion. Progress report, October-December 1976 (Li--Al/LiCl--KCl/FeS or $FeS_2$, operate at 400 to 450 C), 623 (ANL-77-17)
High-performance batteries for stationary energy storage and electric-vehicle propulsion. Progress report, January-March 1977 (Li-Al/LiCl-KCl/FeS or $FeS_2$), 625 (ANL-77-35)
LITHIUM-SULFUR BATTERIES/SAFETY
Preliminary safety analysis of lithium batteries. Technical report, 2002 (AD/A-006149)
LITHIUM-SULFUR BATTERIES/SEALS
Insulating seal for molten salt battery (Patent), 3895
LITHIUM-SULFUR BATTERIES/SPECIFICATIONS
Need for development of high-energy batteries for electric automobiles, 4857 (ANL-8075)
LITHIUM-SULFUR BATTERIES/TESTING
Design and testing of lithium/iron sulfide batteries for electric vehicle propulsion (Li-Al/KCl-LiCl-$FeS_2$), 657 (CONF-760866-2)
Development of lithium/metal sulfide batteries at Argonne National Laboratory: summary report for 1974 (Li--Al/FeS and Li--Al/$FeS_2$), 606 (ANL-75-20)
Secondary lithium-metal sulfide battery (CuS, $FeS_2$), 1237
LITHIUM-SULFUR BATTERIES/USES
Current developments in electric ground propulsion systems, research and development worldwide (Review, 40 references), 5128
Electric automobiles (citations from the Engineering Index data base). Report for 1970-Jun 1976, 4995 (NTIS/PS-76/0561)
Impact of advanced batteries on electric power generation, 5138
Secondary alkali metal-chalcogen batterels in urban transportation, 5225
LITHIUM-WATER-AIR BATTERIES/ANODES
Activity coefficients of dilute solutions of lithium in liquid aluminum-tin alloys: electromotive force measurements and interpretation, 3341
Anodic behavior of lithium in aqueous electrolytes. II. Mechanical passivation, 3408
Metal-air batteries symposium: compendium of papers presented for publication, 32 (AD-684898)
Preparing lithium-filled foraminous metal substrates (Patent), 4261
LITHIUM-WATER-AIR BATTERIES/BIBLIOGRAPHIES
Lithium batteries. Vol. II. 1975-May 1976 (citations from the NTIS data base). Report for 1975-May 1976 (74 abstracts), 107 (NTIS/PS-76/0543)
Lithium batteries. Volume 2. 1975-July 1977 (citations from the NTIS data base). Report for 1975-Jul 77, 117 (NTIS/PS-77/0638)
LITHIUM-WATER-AIR BATTERIES/DESIGN
Researchers study new batteries, 2155
LITHIUM-WATER-AIR BATTERIES/ELECTROCHEMISTRY
Corrosion of lithium in alkaline solution, 2137
LITHIUM-WATER-AIR BATTERIES/ELECTRODES
Investigation of the kinetics of the Li/LiOH(aq) electrode: coulombic efficiency, electrode polarization, 3270 (UCID-17457)
LITHIUM-WATER-AIR BATTERIES/PERFORMANCE
Lithium requirements for electric vehicles using lithium-water-air batteries (Mechanically rechargeable), 5026 (UCRL-77440)
Lithium-water-air batteries for automotive energy, 5024 (UCRL-52000-75-9)
LITHIUM-WATER-AIR BATTERIES/PERFORMANCE TESTING
Researchers study new batteries, 2155
LITHIUM-WATER-AIR BATTERIES/RESEARCH PROGRAMS
Lithium-water-air battery project: progress during the month of February 1977 (LLL), 760 (UCID-17426-77-2)
Lithium-water-air battery project: progress during the month of March 1977 (LLL), 761 (UCID-17426-77-3)
Lithium-water-air battery project: progress during the month of April 1977, 762 (UCID-17426-77-4)
Lithium-water-air battery project: progress during the month of May 1976, 756 (UCID-17426-76-5)
Lithium-water-air battery project: progress during the month of June 1976, 757 (UCID-17426-76-6)
Lithium-water-air battery project: progress during the month of August 1976, 759 (UCID-17426-76-8)
Lithium-water-air battery project: progress during the month of March 1976, 3267 (UCID-17426-76-3)
Lithium-water-air battery project: progress during the month of April 1976, 3268 (UCID-17426-76-4)
Lithium-water-air battery project: progress during the month of October 1976, 3269 (UCID-17426-76-10)
Lithium-water-air battery project: progress during the month of July 1976, 758 (UCID-17426-76-7)
Lithium-water-air battery project: progress during the months of May-July, 763 (UCID-17426-77-5.6.7)
Summary of the lithium-air battery research program (LLL-LMSC), 755 (UCID-17425)
LITHIUM-WATER-AIR BATTERIES/SAFETY
Preliminary safety analysis of lithium batteries. Technical report, 2002 (AD/A-006149)
LOAD MANAGEMENT
Can lead-acid batteries shave utility peaks, 5056
LOAD MANAGEMENT/PLANNING
Electric vehicles: next major appliance and load management tool, 129

M

MAGNESIUM/ABSORPTION SPECTROSCOPY
Determination of sodium and magnesium in β-aluminate materials by atomic absorption spectrophotometry, 4072
MAGNESIUM/CORROSION
Electrode passivation studies. Quarterly report No. 2, 1 Mar-31 May 1966, 2838 (AD-484216)
MAGNESIUM ALLOYS/CHEMICAL PREPARATION
Lithium--magnesium electrodes in propylene, carbonate, 4002
MAGNESIUM ALLOYS/CORROSION
Magnesium and magnesium alloys as anodes in electrochemical alkaline-electrolyte power sources, 3852
MAGNESIUM OXIDES/CHEMICAL PREPARATION
Electrodes including mixed transition metal oxides (Patent), 3539
MAGNESIUM OXIDES/ELECTRICAL PROPERTIES
High-temperature insulation, 4386
MAGNETOHYDRODYNAMIC CHANNELS
See MHD CHANNELS
MAGNETOHYDRODYNAMIC GENERATORS
See MHD GENERATORS
MAGNETOHYDRODYNAMICS/BIBLIOGRAPHIES
Direct energy conversion literature abstracts, 26 (AD-635584)
Direct energy conversion literature abstracts, 8 (AD-430693)
MAGNETOHYDRODYNAMICS/MEETINGS
Workshop proceedings on ceramics for energy applications, 77 (CONF-751194-)
MANGANESE/CORROSION
Electrode passivation studies. Quarterly report No. 2, 1 Mar-31 May 1966, 2838 (AD-484216)
MANGANESE ORES/LEACHING
Extraction of battery-grade manganese dioxide from low-grade manganese ores, 4187
MANGANESE OXIDES/CHEMICAL PREPARATION
Electrode potentials and related properties of some potassium-containing α-manganese dioxides, 4423
Extraction of battery-grade manganese dioxide from low-grade manganese ores, 4187
Manganese dioxide (Patent; chemical preparation), 3929
MANGANESE OXIDES/CHEMICAL PROPERTIES
Electrochemistry of manganese dioxide and production and properties of electrolytic manganese dioxide (EMD), 4109
MANGANESE OXIDES/ELECTRIC CONDUCTIVITY
Electric conductivity of Braunstein powder under compression, 4044
MANGANESE OXIDES/ELECTROCHEMISTRY
Electrochemistry of manganese dioxide and production and properties of electrolytic manganese dioxide (EMD), 4109
MANGANESE OXIDES/PHYSICAL PROPERTIES
Pore dimensions and surface capacity of manganese dioxide, 4698
MANGANESE OXIDES/PRODUCTION
Electrochemistry of manganese dioxide and production and properties of electrolytic manganese dioxide (EMD), 4109
MATERIALS/INFORMATION SYSTEMS
Research leading to the production and early use of numeric data banks of material properties and system analyses. Second quarterly progress report, April-June 1976 (Data bases for energy storage: flywheels, storage batteries), 121 (UCRL-50038-76-2)
MATERIALS/RESEARCH PROGRAMS
Basic and applied research in materials. Annual technical report, 1 Jun 1975-30 Jun 1976 (Materials Research Center, Northwestern Univ.), 3138 (AD-A-034074)
MATERIALS HANDLING/ELECTRIC-POWERED VEHICLES
Unmanned electric trolleys in practical service, 5317
MATHEMATICS/RESEARCH PROGRAMS
Independent research, 1975. Final report (Naval Surface Weapons Center, Silver Spring, Md.), 69 (AD-A-015337)
MECHANICAL HEART/CONTROL SYSTEMS
Power units used in an implanted artificial heart and auxiliary circulation systems, 136
MECHANICAL HEART/ELECTRIC BATTERIES
Power units used in an implanted artificial heart and auxiliary circulation systems, 136
MECHANICAL HEART/ELECTRIC MOTORS
Power units used in an implanted artificial heart and auxiliary circulation systems, 136
MECHANICAL HEART/FLYWHEELS
Power units used in an implanted artificial heart and auxiliary circulation systems, 136
MECHANICAL HEART/METAL-NONMETAL BATTERIES
Development of lithium/selenium secondary cells and batteries for implantation, 1421
Implantable battery (Li/Se; patent), 1197
Lithium/selenium secondary battery for implantation.

Annual technical progress report No. 1, 23 June 1969-22 June 1970, 719 (PB-202374)
Lithium/selenium secondary battery for implantation. Annual report, 23 June 1970-30 July 1971, 721 (PB-215623)
MECHANICAL HEART/MONITORING
Power units used in an implanted artificial heart and auxiliary circulation systems, 136
MECHANICAL HEART/NICKEL-CADMIUM BATTERIES
Internal energy storage for circulatory assist devices (Studies of implantable nickel--cadmium cells for heart assist devices), 1451
MECHANICAL HEART/PUMPS
Power units used in an implanted artificial heart and auxiliary circulation systems, 136
MECHANICAL HEART/RANKINE CYCLE ENGINES
Power units used in an implanted artificial heart and auxiliary circulation systems, 136
MECHANICAL HEART/STIRLING ENGINES
Power units used in an implanted artificial heart and auxiliary circulation systems, 136
MECHANICAL HEART/THERMOELECTRIC GENERATORS
Power units used in an implanted artificial heart and auxiliary circulation systems, 136
MECHANICAL HEART/VALVES
Power units used in an implanted artificial heart and auxiliary circulation systems, 136
MECHANICAL HEART/WORKING FLUIDS
Power units used in an implanted artificial heart and auxiliary circulation systems, 136
MEDICAL SUPPLIES/NICKEL-CADMIUM BATTERIES
Test and evaluation of the Ohio air-vac transport incubator for use in aeromedical airlift. Final report 1972--73, 1990 (AD-917455L)
MEETINGS/BATTERY CHARGERS
Power sources conference (22nd annual) held 14-16 May 1968. Proceedings, 41 (AD-696427)
MEETINGS/COAL GASIFICATION
Workshop proceedings on ceramics for energy applications, 77 (CONF-751194-)
MEETINGS/COAL LIQUEFACTION
Workshop proceedings on ceramics for energy applications, 77 (CONF-751194-)
MEETINGS/CORROSION
Energy workshop on electrochemistry. A report on discussion of energy-related basic research in electrochemistry, June 27-28, 1974. Final report, 119 (PB-240132)
MEETINGS/DIRECT ENERGY CONVERTERS
Advanced energy sources and conversion techniques. Proceedings of a seminar, Pasadena, California, 3-7 November 1958, 4 (AD-209301)
MEETINGS/ELECTRIC BATTERIES
1973 GSFC battery workshop, second day, 92 (N-75-17808)
1973 GSFC battery workshop, first day, 90 (N-75-15152)
AMU-ANL conference on direct energy conversion, Nov 4-5, 1963, 4974 (N-64-19826)
Battery Council International, 83rd Annual Convention (Phoenix, Arizona, April 26-28, 1971), 196
Energy workshop on electrochemistry. A report on discussion of energy-related basic research in electrochemistry, June 27-28, 1974. Final report, 119 (PB-240132)
Fast ion transport in solids, solid state batteries and devices. [Proceedings of the NATO-sponsored advanced study institute of fast ion transport in solids, solid state batteries and devices, Belgirate, Italy 5-15 September 1972], 182
GSFC battery workshop, 91 (N-75-16976)
IBMA 39th annual convention, 78 (CONF-7610115-)
International Symposium (5th) of the Joint Services Electrical Power Sources Committee, 1966 (Review of 38 papers on batteries, fuel cells, and thermal electricity), 55 (AD-801852)
International Power Sources Symposium (7th) held in Brighton, Sussex on 15-17 Sep 1970. Conference report, 47 (AD-718833)
International symposium (5th) of the Joint Services Electrical Power Sources Committee, 1966, 56 (AD-801852)
Performance forecast of selected static conversion devices. Meeting of Agard propulsion and energetics panel 29th, Liege, Belgium, June 12-16, 1967, 1760 (AD-671685)
Power sources. Volume 3 (39 papers; electric batteries, fuel cells, and solar cells), 205
Power sources conference (18th annual), held 19-21 May 1964. Proceedings, 36 (AD-696423)
Power sources conference (19th annual), held 18-20 May 1965. Proceedings, 38 (AD-696424)
Power sources conference (21st annual) held 16-18 May 1967. Proceedings, 40 (AD-696426)
Power sources conference (22nd annual) held 14-16 May 1968. Proceedings, 41 (AD-696427)
Power sources conference (23rd annual) held 20-22 May 1969. Proceedings, 42 (AD-696428)
Power sources 2. Research and development in non-mechanical electrical power sources. Proceedings of the 6th international symposium held at Brighton, September 1968 (Brighton, England), 206
Power sources 5. Research and development in non-mechanical electrical power sources. Proceedings of the 9th international symposium held at Brighton, England, September 1974 (Electric power sources other than rotating machinery), 146
Proc. 16. Annual Power Sources Conference, 22-24 May 1962; Army Electronic Command, Fort Monmouth, NJ, 87 (N-70-72939)
Proceedings of the 18th annual power sources conference; Army Electronics Command, Fort Monmouth, NJ, 88 (N-70-73385)
Proceedings, 14th Annual Power Sources Conference, 17-19 May 1960, Fort Monmouth, NJ, 23 (AD-607425)
Proceedings, 15th Annual Power Sources Conference, 9-11 May 1961, Fort Monmouth, NJ, 7 (AD-421601)
Proceedings, 16th Annual Power Sources Conference, 22-24 May 1962, Fort Monmouth, NJ, 33 (AD-696421)
Proceedings, 17th Annual Power Sources Conference, 21-23 May 1963, Fort Monmouth, NJ, 34 (AD-696422)
Proceedings, 18th Annual Power Sources Conference, 19-21 May 1964, Fort Monmouth, NJ, 35 (AD-696423)
Proceedings, 19th Annual Power Sources Conference, 18-20 May 1965, Fort Monmouth, NJ, 37 (AD-696424)
Proceedings, 20th Annual Power Sources Conference, 24-26 May 1966, Fort Monmouth, NJ, 39 (AD-696425)
Proceedings of 14th annual power sources conference, 17-19 May 1960, 4830 (AD-607425)
Proceedings of 17th annual power sources conference held 21-23 May 1963, 4835 (AD-696422)
Proceedings of the second international electric vehicle symposium, Atlantic City, NJ, 8-10 Nov 1971, 5222
Proceedings of the symposium and workshop on advanced battery research and design, March 22-24, 1976 (Held at ANL), 71 (ANL-76-8)
Space power systems: energy storage (6th Esro Summer School, Noordwijk, Netherlands, 1968), 86 (N-70-26430)
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
Workshop proceedings on ceramics for energy applications, 77 (CONF-751194-)
MEETINGS/ELECTRIC GENERATORS
Proceedings, 18th Annual Power Sources Conference, 19-21 May 1964, Fort Monmouth, NJ, 35 (AD-696423)
Proceedings, 20th Annual Power Sources Conference, 24-26 May 1966, Fort Monmouth, NJ, 39 (AD-696425)
MEETINGS/ELECTRIC-POWERED VEHICLES
International electric vehicle symposium, Phoenix, Arizona, 5-7 November 1969 (54 papers), 4866 (CONF-691143-)
International electric vehicle symposium, Atlantic City, New Jersey, 8-10 November 1971 (Fifty-five papers), 4892 (CONF-711166-)
NEREM 72 record, part 1: technical papers, 5191
Proceedings of the second international electric vehicle symposium, Atlantic City, NJ, 8-10 Nov 1971, 5222
Proceedings of the symposium on batteries for traction and propulsion, Columbus, Ohio, 7-8 Mar 1972, 5192
MEETINGS/ELECTROCHEMISTRY
Electrochemical Society Spring meeting. Extended abstracts (Electrochemical Society Spring Meeting, Philadelphia, Pa., May 8-13, 1977), 128
Energy workshop on electrochemistry. A report on discussion of energy-related basic research in electrochemistry, June 27-28, 1974. Final report, 119 (PB-240132)
MEETINGS/ELECTROLYSIS
Energy workshop on electrochemistry. A report on discussion of energy-related basic research in electrochemistry, June 27-28, 1974. Final report, 119 (PB-240132)
MEETINGS/ENERGY CONVERSION
Advanced energy sources and conversion techniques. Volume 1 (35 papers), 1 (AD-209301)
Energy development; proceedings of the Energy Sources Conference, Anaheim, CA, 14-19 Jul 1974, 158
Intersociety Energy Conversion Engineering Conference, 7th, San Diego, CA, Sep 25-29, 1972, proceedings, 188
Performance forecast of selected static energy conversion devices. 29th meeting of Agard Propulsion and Energetics Panel, Liege, Belgium, June 12-16, 1967 (Batteries, fuel cells, and solar cells), 30 (AD-671685)
Power sources conference (23rd annual) held 20-22 May 1969. Proceedings, 42 (AD-696428)
Proceedings, 14th Annual Power Sources Conference, 17-19 May 1960, Fort Monmouth, NJ, 23 (AD-607425)
Proceedings, 15th Annual Power Sources Conference, 9-11 May 1961, Fort Monmouth, NJ, 7 (AD-421601)
Proceedings, 16th Annual Power Sources Conference, 22-24 May 1962, Fort Monmouth, NJ, 33 (AD-696421)
Proceedings, 17th Annual Power Sources Conference, 21-23 May 1963, Fort Monmouth, NJ, 34 (AD-696422)
Proceedings, 18th Annual Power Sources Conference, 19-21 May 1964, Fort Monmouth, NJ, 35 (AD-696423)
Proceedings, 19th Annual Power Sources Conference, 18-20 May 1965, Fort Monmouth, NJ, 37 (AD-696424)
Proceedings, 20th Annual Power Sources Conference, 24-26 May 1966, Fort Monmouth, NJ, 39 (AD-696425)
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
MEETINGS/ENERGY SOURCES
Advanced energy sources and conversion techniques. Proceedings of a seminar, Pasadena, California, 3-7 November 1958, 4 (AD-209301)
Energy development; proceedings of the Energy Sources Conference, Anaheim, CA, 14-19 Jul 1974, 158

Proc. 16. Annual Power Sources Conference, 22-24 May 1962; Army Electronic Command, Fort Monmouth, NJ, 87 (N-70-72939)
MEETINGS/ENERGY STORAGE
Proceedings, 14th Annual Power Sources Conference, 17-19 May 1960, Fort Monmouth, NJ, 23 (AD-607425)
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
MEETINGS/FUEL CELLS
AMU-ANL conference on direct energy conversion, Nov 4-5, 1963, 4974 (N-64-19826)
Battery Council International, 83rd Annual Convention (Phoenix, Arizona, April 26-28, 1971), 196
Energy workshop on electrochemistry. A report on discussion of energy-related basic research in electrochemistry, June 27-28, 1974. Final report, 119 (PB-240132)
International Symposium (5th) of the Joint Services Electrical Power Sources Committee, 1966 (Review of 38 papers on batteries, fuel cells, and thermal electricity), 55 (AD-801852)
International Power Sources Symposium (7th) held in Brighton, Sussex on 15-17 Sep 1970. Conference report, 47 (AD-718833)
International symposium (5th) of the Joint Services Electrical Power Sources Committee, 1966, 56 (AD-801852)
Performance forecast of selected static conversion devices. Meeting of Agard propulsion and energetics panel 29th, Liege, Belgium, June 12-16, 1967, 1760 (AD-671685)
Power sources. Volume 3 (39 papers; electric batteries, fuel cells, and solar cells), 205
Power sources conference (18th annual), held 19-21 May 1964. Proceedings, 36 (AD-696423)
Power sources conference (19th annual), held 18-20 May 1965. Proceedings, 38 (AD-696424)
Power sources conference (21st annual) held 16-18 May 1967. Proceedings, 40 (AD-696426)
Power sources conference (22nd annual) held 14-16 May 1968. Proceedings, 41 (AD-696427)
Power sources conference (23rd annual) held 20-22 May 1969. Proceedings, 42 (AD-696428)
Power sources 2. Research and development in non-mechanical electrical power sources. Proceedings of the 6th international symposium held at Brighton, September 1968 (Brighton, England), 206
Proc. 16. Annual Power Sources Conference, 22-24 May 1962; Army Electronic Command, Fort Monmouth, NJ, 87 (N-70-72939)
Proceedings of the 18th annual power sources conference; Army Electronics Command, Fort Monmouth, NJ, 88 (N-70-73385)
Proceedings, 14th Annual Power Sources Conference, 17-19 May 1960, Fort Monmouth, NJ, 23 (AD-607425)
Proceedings, 15th Annual Power Sources Conference, 9-11 May 1961, Fort Monmouth, NJ, 7 (AD-421601)
Proceedings, 16th Annual Power Sources Conference, 22-24 May 1962, Fort Monmouth, NJ, 33 (AD-696421)
Proceedings, 17th Annual Power Sources Conference, 21-23 May 1963, Fort Monmouth, NJ, 34 (AD-696422)
Proceedings, 18th Annual Power Sources Conference, 19-21 May 1964, Fort Monmouth, NJ, 35 (AD-696423)
Proceedings, 19th Annual Power Sources Conference, 18-20 May 1965, Fort Monmouth, NJ, 37 (AD-696424)
Proceedings, 20th Annual Power Sources Conference, 24-26 May 1966, Fort Monmouth, NJ, 39 (AD-696425)
Proceedings of 14th annual power sources conference, 17-19 May 1960, 4830 (AD-607425)
Proceedings of 17th annual power sources conference held 21-23 May 1963, 4835 (AD-696422)
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
MEETINGS/HYBRID ELECTRIC-POWERED VEHICLES
NEREM 72 record, part 1: technical papers, 5191
Noteworthy achievements instead of sensations. A report on the fourth international electric-vehicle symposium, 5038
Proceedings of the second international electric vehicle symposium, Atlantic City, NJ, 8-10 Nov 1971, 5222
Proceedings of the symposium on batteries for traction and propulsion, Columbus, Ohio, 7-8 Mar 1972, 5192
MEETINGS/HYDROGEN
Proceedings, 18th Annual Power Sources Conference, 19-21 May 1964, Fort Monmouth, NJ, 35 (AD-696423)
Proceedings, 20th Annual Power Sources Conference, 24-26 May 1966, Fort Monmouth, NJ, 39 (AD-696425)
MEETINGS/HYDROGEN FUELS
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
MEETINGS/LEAD-ACID BATTERIES
Battery Council International convention: 1975 (Hollywood-by-the-Sea, Florida), 150
Near-term energy storage technologies: the lead-acid battery. A compilation of workshop papers presented on November 18-19, 1975 (November 18-19, 1975, Palo Alto, CA), 730 (PB-251490)
MEETINGS/MAGNETOHYDRODYNAMICS
Workshop proceedings on ceramics for energy applications, 77 (CONF-751194-)
MEETINGS/METAL-GAS BATTERIES
Metal-air batteries symposium: compendium of papers presented for publication (Interagency Advanced Power Group, 11 Sep 1968), 32 (AD-684898)
MEETINGS/METAL-METAL BATTERIES
Power sources 4: Research and development in non-mechanical electrical power sources; Proceedings of the Eighth International Symposium, Brighton, Sussex, England, September 24-26, 1972, 1300
MEETINGS/METAL-NONMETAL BATTERIES
Power sources 4: Research and development in non-mechanical electrical power sources; Proceedings of the Eighth International Symposium, Brighton, Sussex, England, September 24-26, 1972, 1300
MEETINGS/NICKEL-CADMIUM BATTERIES
1976 Goddard Space Flight Center battery workshop, 122 (X-711-77-28)
Space power systems: energy storage (6th Esro Summer School, Noordwijk, Netherlands, 1968), 86 (N-70-26430)
MEETINGS/PHOTOELECTRIC CELLS
Power sources conference (18th annual), held 19-21 May 1964. Proceedings, 36 (AD-696423)
Power sources conference (19th annual), held 18-20 May 1965. Proceedings, 38 (AD-696424)
MEETINGS/POWER CONDITIONING CIRCUITS
Proceedings, 20th Annual Power Sources Conference, 24-26 May 1966, Fort Monmouth, NJ, 39 (AD-696425)
MEETINGS/POWER GENERATION
Transactions of the seventh world energy conference, Moscow, 1968. Volume 13. Section C4. New sources and methods of producing electricity., 211
MEETINGS/POWER SUPPLIES
Power sources. Volume 3 (39 papers; electric batteries, fuel cells, and solar cells), 205
MEETINGS/SILVER-CADMIUM BATTERIES
Space power systems: energy storage (6th Esro Summer School, Noordwijk, Netherlands, 1968), 86 (N-70-26430)
MEETINGS/SILVER-ZINC BATTERIES
Power sources conference (22nd annual) held 14-16 May 1968. Proceedings, 41 (AD-696427)
Space power systems: energy storage (6th Esro Summer School, Noordwijk, Netherlands, 1968), 86 (N-70-26430)
Zinc-silver oxide batteries, 199
MEETINGS/SOLAR CELLS
International Power Sources Symposium (7th) held in Brighton, Sussex on 15-17 Sep 1970. Conference report, 47 (AD-718833)
Performance forecast of selected static conversion devices. Meeting of Agard propulsion and energetics panel 29th, Liege, Belgium, June 12-16, 1967, 1760 (AD-671685)
Power sources. Volume 3 (39 papers; electric batteries, fuel cells, and solar cells), 205
Power sources conference (18th annual), held 19-21 May 1964. Proceedings, 36 (AD-696423)
Power sources conference (19th annual), held 18-20 May 1965. Proceedings, 38 (AD-696424)
MEETINGS/SOLAR ENERGY
Proc. 16. Annual Power Sources Conference, 22-24 May 1962; Army Electronic Command, Fort Monmouth, NJ, 87 (N-70-72939)
Proceedings of the 18th annual power sources conference; Army Electronics Command, Fort Monmouth, NJ, 88 (N-70-73385)
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
MEETINGS/SOLAR ENERGY CONVERSION
AMU-ANL conference on direct energy conversion, Nov 4-5, 1963, 4974 (N-64-19826)
Proceedings, 15th Annual Power Sources Conference, 9-11 May 1961, Fort Monmouth, NJ, 7 (AD-421601)
Proceedings, 16th Annual Power Sources Conference, 22-24 May 1962, Fort Monmouth, NJ, 33 (AD-696421)
Proceedings, 17th Annual Power Sources Conference, 21-23 May 1963, Fort Monmouth, NJ, 34 (AD-696422)
Proceedings, 18th Annual Power Sources Conference, 19-21 May 1964, Fort Monmouth, NJ, 35 (AD-696423)
Proceedings, 19th Annual Power Sources Conference, 18-20 May 1965, Fort Monmouth, NJ, 37 (AD-696424)
Proceedings, 20th Annual Power Sources Conference, 24-26 May 1966, Fort Monmouth, NJ, 39 (AD-696425)
Proceedings of 14th annual power sources conference, 17-19 May 1960, 4830 (AD-607425)
Proceedings of 17th annual power sources conference held 21-23 May 1963, 4835 (AD-696422)
MEETINGS/SPACECRAFT POWER SUPPLIES
Space power systems. Part II, 43 (AD-698653)
MEETINGS/STIRLING ENGINES
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
MEETINGS/SYNTHETIC FUELS
Symposium on non-fossil chemical fuels. Vol. 16, No. 4, 1371
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
MEETINGS/THERMIONIC CONVERTERS
Power sources conference (18th annual), held 19-21 May 1964. Proceedings, 36 (AD-696423)
Power sources conference (19th annual), held 18-20 May 1965. Proceedings, 38 (AD-696424)
Power sources conference (21st annual) held 16-18 May 1967. Proceedings, 40 (AD-696426)
Proceedings, 16th Annual Power Sources Conference, 22-24 May 1962, Fort Monmouth, NJ, 33 (AD-696421)
Proceedings, 18th Annual Power Sources Conference, 19-21 May 1964, Fort Monmouth, NJ, 35 (AD-696423)

Proceedings, 20th Annual Power Sources Conference, 24-26 May 1966, Fort Monmouth, NJ, 39 (AD-696425)
MEETINGS/THERMOELECTRIC GENERATORS
International symposium (5th) of the Joint Services Electrical Power Sources Committee, 1966, 56 (AD-801852)
Power sources conference (18th annual), held 19-21 May 1964. Proceedings, 36 (AD-696423)
Power sources conference (19th annual), held 18-20 May 1965. Proceedings, 38 (AD-696424)
Power sources conference (21st annual) held 16-18 May 1967. Proceedings, 40 (AD-696426)
Power sources conference (23rd annual) held 20-22 May 1969. Proceedings, 42 (AD-696428)
MEETINGS/THERMOPHOTOVOLTAIC CONVERSION
Proceedings, 19th Annual Power Sources Conference, 18-20 May 1965, Fort Monmouth, NJ, 37 (AD-696424)
MEETINGS/WIND POWER
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
MEETINGS/ZINC-AIR BATTERIES
Metal-air batteries symposium: compendium of papers presented for publication (Interagency Advanced Power Group, 11 Sep 1968), 32 (AD-684898)
Power sources conference (22nd annual) held 14-16 May 1968. Proceedings, 41 (AD-696427)
Power sources conference (23rd annual) held 20-22 May 1969. Proceedings, 42 (AD-696428)
MERCURY/CHEMICAL REACTIONS
Effects of mercury on the surfaces of polycrystalline copper, tin and zinc, 4194
MERCURY ALLOYS/CORROSION
Magnesium and magnesium alloys as anodes in electrochemical alkaline-electrolyte power sources, 3852
MERCURY ALLOYS/ELECTRIC CONDUCTIVITY
Electrical resistivity of K-Hg and Na-Hg systems and diffusivity of K-Hg system at high temperatures, 1532
METAL-GAS BATTERIES
See also CADMIUM-AIR BATTERIES
IRON-AIR BATTERIES
LITHIUM-CHLORINE BATTERIES
LITHIUM-WATER-AIR BATTERIES
NICKEL-HYDROGEN BATTERIES
ZINC-CHLORINE BATTERIES
Standard family of power sources. Technical report, 44 (AD-710951)
METAL-GAS BATTERIES/AIR CLEANING
Removal of carbon dioxide from air required for fuel cells (Patent), 3863
METAL-GAS BATTERIES/ANODES
Alkaline cadmium anode studies. Research and development technical report (Cadmium--air batter), 2942 (AD-732830)
Aluminium anode for biogalvanic metal-oxygen -cells (Patent), 3710
Anodes for refuelable magnesium-air batteries, 4443
Anodic oxidation of sodium and lithium amalgams, 4288
Biogalvanic metal--oxygen battery (Poly (vinyl alc.) membranes on anode; patent), 3716
Disposable anode package (Patent; for mechanically rechargeable metal-air batteries), 4253
Electrical resistivity of K-Hg and Na-Hg systems and diffusivity of K-Hg system at high temperatures, 1532
Electrodes for iron-air secondary cells (Emphasis on iron), 4275
Iron electrodes for metal/air cells, 4195
Iron electrode for an alkaline battery (Patent; Fe/air batteries, electrode fabrication), 3615
Liquid metal cells (Differential K-Hg cells), 1541
Magnesium and magnesium alloys for anodes in alkaline batteries, 3809
Metal--air systems as sources of electric current (Al, Mg, Zn anode corrosion), 2217
Porous cobalt electrodes for alkaline accumulators and hybrid cell therewith and air electrode (Patent), 3376
Rechargeable metal-air cell. Final report, 1 May 1967-30 November 1968 (Study of Cd, Pb, and Zn anodes), 513 (AD-853037)
Sodium reaction powers new fuel cell, 1564
State-of-the-art alkaline cadmium anodes (0.30 A-hr/g), 2916 (AD-680169)
Studies on the alkali metal alloy-chlorine secondary battery (Liquid and solid electrodes), 3360
Survey and analysis on metal-air cells. Technical report (final), 20 January 1966-4 January 1968, 482 (AD-829289)
METAL-GAS BATTERIES/BATTERY CHARGING
Hydraulically rechargeable,depolarized metal--gas battery system (Gas-Zn system), 2254
Recharging of metal-air batteries (Patent), 2206
METAL-GAS BATTERIES/BATTERY SEPARATORS
Alkali metal voltaic cells (Na(Sn) or Li(Sn)/$CaCl_2$, NaCl, KCl, or LiCl/Ni or $Cl_2$-C), 4647
Anodes for refuelable magnesium-air batteries, 4443
Oxygen (air) waterproofed gas-diffusion electrodes for electrochemical power sources operating with liquid fuels or solid fuels dispersed in an electrolyte, 4099
METAL-GAS BATTERIES/CATALYSTS
Discussion of various types of test electrodes for the evaluation of catalysts for the electroreduction of oxygen, 4279
METAL-GAS BATTERIES/CATHODES
Active carbons for use in fuel cell air electrodes or metal-air systems, 4222
Air electrode (Patent; preparation), 3595
Air-metal cell systems, 1434
Battery cell (Patent; air- or oxygen-depolarized cathode) 4468
Carbon air electrode with regenerative short time overload capacity. II. Effects of duroquinone and 2-amino-1,4-naphthoquinone (Concentrated KOH), 3842
Carbon-based oxygen electrodes for metal-air batteries. II. Operation in bicells with magnesium or zinc anodes (Mechanically rechargeable over 25 times), 1905 (AD-890113)
Carbon-based oxygen electrodes for metal-air batteries. I. Experimental electrodes, 3071 (AD-887653)
Carbon oxygen electrode in electrochemical current sources and transducers, 3812
Catalyst suitable for an oxygen electrode (Patent), 3873
Cathode for metal-air-type fuel cells (Patent), 4042
Cathodes for metal-air-type fuel cells (Patent), 4041
Charge-discharge cycling of DREO air electrodes (Sintered Ni surface containing Ag, Hg, and teflon), 3122 (AD-A-016721)
Current distribution at gas-electrode-electrolyte interface (Electrolyte film above intrinsic meniscus on Ni and Ag oxygen cathodes), 4574
Electrochemistry of interhalogen cathodes. Final report, 21 April 1969-21 March 1970 (Li/$ClF_3$ in NaF--HF electrolyte, theoretical 2120 Wh/lb), 527 (AD-870799)
Electrode structures for metal/oxygen batteries and fuel cells (Patent), 4241
Electrodes for iron-air secondary cells (Emphasis on iron), 4275
Electrolyte distribution and shift through carbon electrodes for the electroreduction of air oxygen, 4274
Experimental approach to reversible oxygen electrode, 4648
Gas diffusion of electrodes for air cells (Patent), 3690
Halogen storage by means of hydrates; patent, 3451
High-energy electrochemical couples. II. Gas electrodes in organic solvents (Li/air), 2894 (AD-653779)
Hybrid electrodes for metal--air cells (Patent), 3550
Hybrid electrode for metal/air cells (Patent), 3734
Hydrophilic treatment for hydrophobic gas electrodes (Patent), 4372
Increasing the catalytic activity of rare metal-doped activated carbon for oxygen electrodes of electrochemical cells with acid electrolytes (Patent), 3969
Investigation of active carbon for use in fuel cell air electrode or metal-air systems, 4206
Life capability of the silver electrode in alkaline electrochemical cells (Ag-$H_2$), 3235 (N-76-28648)
Lithium-moist air battery. Semiannual report No. 2 (Mechanism of air electrode in phenyltrimethyl ammonium hexafluorophosphate--nitrosodimethylamine), 2893 (AD-653774)
Lithium-moist air battery. Final report, March 1966-July 1967, 473 (AD-823679)
Low cost oxygen electrodes (Evaluation of various materials), 4407
Metal/air cells and air cathodes for use therein (Patent) 3477
Metal/air cells and improved air electrodes for use therein (Patent), 3394
Nickel based alloys as electrocatalysts for oxygen evolution from alkaline solutions (Metal-air batteries) 3166 (BNL-22275)
Novel air electrode (For use in free liquid electrolyte or matrix-electrolyte cells), 4551
Oxygen (air) waterproofed gas-diffusion electrodes for electrochemical power sources operating with liquid fuels or solid fuels dispersed in an electrolyte, 4099
Oxygen electrode for alkaline battery (Patent), 3653
Oxygen electrode material (Patent), 4019
Oxygen evolution on semiconducting oxides (Air), 3343
Raney metal sheet material for use as electrodes (Patent; Ag, Ni, Pt, Fe, Co, preparation of sheets), 4260
Rare earth cobaltites as oxygen electrode materials for alkaline solution, 3312
Rechargeable metal-air cell. Quarterly report No. 2, 1 August-31 October 1967 (Pb/air), 480 (AD-828589)
Reduction of oxtgen on nickel-cobalt oxides. II. Correlation between crystal structure and activity of $Co_2NiO_4$ and related oxides, 4141
Reduction of oxygen on nickel-cobalt oxides. I. The influence of composition and preparation method on the activity of nickel-cobalt oxides, 4142
Study of gas evolution in teflon bonded porous electrodes. II. Factors affecting the mechanical strength (Effect of electrocatalyst preparation method and catalyst/Teflon ratio), 3501
Study of gas evolution in teflon bonded porous electrodes. I. The mechanical and chemical stability of teflon bonded graphite electrodes (Air cathode mechanical disintegration), 3502
Study of gas evolution in teflon bonded porous electrodes. III. Performance of teflon bonded Pt black electrodes for $H_2$ evolution (Metal-air type), 3441
Support for electrode plates of air batteries (Patent),

3731
Use of radioisotopes in battery research (Improved electrochemical activity), 1505
Wetproofed oxygen (air)--carbon electrodes. II. Effect of the wetproofing agent on the structural, physical, and electrochemical characteristics of the electrodes, 4091
METAL-GAS BATTERIES/CHEMICAL REACTION KINETICS
Electrochemical fuel cells, 3444
Lithium-moist air battery. Semiannual report No. 1, 350 (AD-642248)
Rechargeable Al/$Cl_2$ battery with molten $AlCl_4$- electrolyte (Al/$AlCl_3$-KCl-NaCl/$Cl_2$ system using carbon electrodes; 650 Wh/lb, 120 to 150°C), 1365
METAL-GAS BATTERIES/CHEMICAL REACTIONS
Rechargeable aluminum/chlorine battery with molten $AlCl_4$- electrolyte, 1373
Sodium reaction powers new fuel cell, 1564
METAL-GAS BATTERIES/COMPARATIVE EVALUATIONS
Battery power for electric vehicles. 2. Novel high-energy power sources, 1223
Electric vehicles: revival of 50-year old memory, 2534
Metals: key to battery-powered auto, 4490
New assault on battery vehicles, 5103
METAL-GAS BATTERIES/CONTAINERS
Manufacturing methods and technology measure for standard battery cases. Quarterly report No. 3, 1 May-31 July 1970, 3059 (AD-877313)
Manufacturing methods and technology measure for standard battery cases. Quarterly report No. 4, 1 August-31 October 1970 (Metal-air batteries), 3063 (AD-880896)
METAL-GAS BATTERIES/COOLING
Heat removal from large batteries for load leveling, 5133
METAL-GAS BATTERIES/DESIGN
1973 GSFC battery workshop, second day (Ag/$H_2$ cell), 92 (N-75-17808)
Air cell (Patent), 992
Airtight alkaline storage battery (Ag/$H_2$;patent), 1076
Airtight storage battery (Cd anode, O cathode; patent), 1059
Cell with circulating electrolyte (Patent; primarily for Zn/air batteries, but adaptable to other types), 841
Control of generation of chlorine feed from chlorine hydrate for use in a metal chlorine electric energy storage device (Patent), 797
Design and fabrication of silver-hydrogen cells (20 Ah), 709 (N-75-33496)
Development of cadmium--air cell capable of deep discharging, 403 (AD-733290)
Electrochemical cell of a rechargeable nature (Silver (oxide)/KOH(aq)/H, H and electrolyte storage means within battery; patent), 814
Enclosed electrical energy storage device with halogen absorbing means (Patent; halogen oxidant), 1081
Halogen fueled organic electrolyte fuel cell (Patent), 783
High-energy-density silver--hydrogen cells for space and terrestrial applications, 1308
Lead--oxygen dc power supply system (Patent application), 1133
Lead-oxygen dc power supply system having a closed loop oxygen and water system (Patent), 5050
Lithium-water-air battery: a new concept for automotive propulsion (Modified lithium--water battery, mechanically rechargeable), 754 (UCID-16751)
Making and operating a gas-depolarized cell (Patent), 1339
Mercury (sodium amalgam)-oxygen fuel cell (Patent), 1386
Metal--air systems. 1. Magnesium--air cells (Mg/air: general description), 1514
Metal--air secondary battery, 1187
Metal--air or metal--oxide secondary batteries (Patent; metal/air element and metal/metal oxide element with common electrolyte and common metal anode), 1208
Metal-gas battery with axial reactant gas storage cavity (Patent), 856
Metal halogen hydrate battery system (Patent; improved halogen hydrate forming and storage system), 833
Metal-hydrogen battery designs, 1234
Metal-oxygen fuel cell (Patent), 1441
Method and apparatus for electrochemical generation of power from cabonaceous fuels (Oxidized metal (Pb, Sb, or Bi) reduced to element by carbonaceous fuel; cell consumes C and $O_2$; patent), 860
Method for producing electrical energy with consumable aluminium anode (Patent; Al/chloride/Cl 135 W-hr/lb, 2 W-hr/$in.^3$), 961
Rechargeable metal-air battery systems (Iron anode), 1359
Rechargeable metal-air cell. Quarterly report No. 1, 1 May-31 July 1967 (Pb/air), 475 (AD-824467)
Rechargeable electrochemical cell (Silver (oxide)/KOH(aq)/H, means to retrieve evaporated electrolyte; patent), 813
Recharging of metal-air batteries (Patent), 2206
Refuelable batteries (Zn, Al, Mg, Fe, or Cd/air; present technology reviewed), 1372
Regulating the generation of chlorine from chlorine hydrate for metal--chlorine batteries (Patent), 1068
Sealed, rechargeable silver-hydrogen battery, 1123
Sealed lithium-reducible gas cell (Patent; cathode comprises $SO_2$ in propylene carbonate containing $LiClO_4$ tetrabutylammonium tetrafluoroborate), 836
Sealed lithium-sodium electrochemical cell (Patent; many cathodes tested including $Cl_2$, $Br_2$, $I_2$, S, P, $NiCl_2$, PbS, AgO, $CuF_2$, $PbI_2$, $SO_2$, $SOCl_2$, Fe(III), and $O_2$), 791
Seawater battery experiments. Technical memo (Li/seawater/Cl), 408 (AD-735864)
Secondary lithium/chloride batteries, 1529
Secondary zinc--halogen battery (Patent), 1037
Secondary cadmium-air cells, 378 (AD-681200)
Secondary, rechargeable metal/air cell (Patent; 50 to 60 Wh/lb, 100 cycles), 1324
Studies in fundamental chemistry of fuel cell reactions. Semiannual progress report, 1 January-30 June 1968, 688 (N-69-25396)
Study of multiple reserve electrochemical power sources. Final report (Li/CuS, Li/Se, metal/$O_2$ cells), 686 (N-69-13030)
System and method for operation of a metal-air secondary battery (Patent), 915
Zinc--halogen electric cell (Patent; reservoir for halogen solvent, 1 to 10 atm), 1021
Zinc-bromine storage Battery for electric vehicles, 1118
METAL-GAS BATTERIES/ECONOMICS
Quiet automobiles of the future (Fe/air), 4848 (AD-915740L)
METAL-GAS BATTERIES/EFFICIENCY
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 October-31 December 1969 (Mg/C, discharge characteristics; Fe/O), 693 (N-70-25303)
METAL-GAS BATTERIES/ELECTRIC POTENTIAL
Inorganic electrolyte based, room temperature, lithium/chlorine, sodium/chlorine, lithium/sulfur, sodium/sulfur, and lithium/cupric fluoride cells, 1358
METAL-GAS BATTERIES/ELECTROCHEMISTRY
Aluminum chlorine battery (Al/$AlCl_3$-KCl-NaCl/$Cl_2$), 715 (NASA-CR-1541)
Lithium-water-air battery: a new concept for automotive propulsion (Modified lithium--water battery, mechanically rechargeable), 754 (UCID-16751)
Mechanism of reduction of oxygen at air electrode, 237
Metal--air systems as sources of electric current (Al, Mg, Zn anode corrosion), 2217
Studies on the lithium alloys--chlorine secondary battery (Li alloys/LiCl--KCl/Cl), 1351
METAL-GAS BATTERIES/ELECTRODES
Adsorption of cadmium ions from KOH solution at a platinum electrode (Cadmium--air batteries), 2963 (AD-757288)
Composite gas diffusion electrode for rechargeable metal-air cells (Patent), 4322
Continuous wet-proofing process for the cross sections of electrodes used in fuel cells and hybrid systems (Patent), 4256
Discussion of various types of test electrodes for the evaluation of catalysts for the electroreduction of oxygen, 4279
Electrochemical behavior of iron in alkaline sulphate solutions, 3903
Electrochemical application of amalgamated-nickel bodies, 4196
Electrode for a zinc--halogen battery (Patent; fabrication), 3689
Exploratory study of hydrogen/silver oxide batteries for space application. Final report, 711 (N-76-26702)
Forming an electrode of mixed catalyst powder (Patent), 4031
Gas-diffusion electrode for batteries (Patent; fabrication procedure), 3712
Gas diffusion electrodes for batteries (Patent; slurry of active C, resin, and solvent on support), 3691
Gas-diffusion electrode for batteries (Patent), 3714
Gas electrode (Patent; metal--air battery with gelled KOH electrolyte), 3577
Gas electrode (Patent), 3597
Halogen retention vent means for battery (Patent; rechargeable metal halide battery), 3979
Hybrid oxygen electrode for metal--air batteries, 4205
Hydrogen storage electrode (Patent), 4172
Impurity effects in high current density $Cl_2$ electrodes, 4541
Influence of the structure of silver-activated gas electrodes on the electrochemical performance of fuel cells and metal-air cells (Pore size effects), 4221
Iron electrodes for alkaline batteries (Fe/KOH/air; patent), 3687
Low temperature electrochemical systems. Semiannual technical report No. 2, 1 Jul-31 Dec 1972 (Tyco Labs., Inc., Waltham, MA), 2965 (AD-758171)
Metal--halogen batteries (Protection of Ti electrodes against corrosion), 3875
Oxygen electrode. I (Isotopic investigation of electrode mechanisms), 4731
Porous electrode structures for metal--air batteries (Methods for determining mass-transfer properties), 4281
Predicted energy densities for nickel-hydrogen and silver-hydrogen cells embodying metallic hydrides for hydrogen storage, 4061
Secondary cells based on reversible hydrogen transfer between electrodes capable of absorbing large volumes of hydrogen in interstitial solid solutions, 3832
METAL-GAS BATTERIES/ELECTROLYTES
Anodes for refuelable magnesium-air batteries, 4443
Carbon air electrode with regenerative short time

overload capacity. II. Effects of duroquinone and 2-amino-1,4-naphthoquinone (Concentrated KOH), 3842
Secondary battery with indate ion in the electrolyte (Patent), 1330
Studies on air battery with caustic alkaline electrolyte, 4393
METAL-GAS BATTERIES/FABRICATION
Assembling electrodes in electrochemical cells (Patent), 1219
Battery with electrolyte composed of fused mineral salts and with chlorine electrode (Patent; Al/NaCl--$AlCl_3$/Cl--metal, where the metal is Fe, Ni, Cr, Ti, Mo, W, or V or an alloy or cermet of one of them), 1186
Iron--oxygen battery (Patent; S-containing KOH electrolyte), 984
Method of manufacturing a metal--air battery (Patent), 1147
METAL-GAS BATTERIES/FAILURES
Secondary cadmium--air cells, 1774 (AD-699480)
METAL-GAS BATTERIES/FEASIBILITY STUDIES
Lithium-moist air battery. Final report, March 1966-July 1967, 473 (AD-823679)
METAL-GAS BATTERIES/FLOW REGULATORS
Mass flow rate control of chlorine content of electrolyte for high energy density battery (Patent), 3623
Metal-air batteries and fuel cells (Patent; continuation-in-part of US Patent 3,554,810; electrolyte flow regulator), 4040
METAL-GAS BATTERIES/FORECASTING
Some problems on the application and development of electrochemical power source (Possible solid-electrolyte batteries (e.g. Li--air) of 1000 W-hr/kg), 1143
METAL-GAS BATTERIES/GASES
Research on electrochemical energy conversion systems. Semiannual research report No. 5, November 1967-May 1968, 505 (AD-846063)
Storage of chlorine on activated charcoal in low-pressure, high-performance secondary batteries, 4552
METAL-GAS BATTERIES/HYDROGEN STORAGE
Heat transfer analysis of metal hydrides in metal-hydrogen secondary batteries, 3462
Investigation of metal hydride materials as hydrogen reservoirs for metal-hydrogen batteries, 3233 (N-76-27667)
Predicted energy densities for nickel-hydrogen and silver-hydrogen cells embodying metallic hydrides for hydrogen storage, 4061
METAL-GAS BATTERIES/MATERIALS
Pollution-free electrochemical power generation from low grade coal (Pb/air battery with PbO reduced by coke), 3250 (PB-228006/3)
METAL-GAS BATTERIES/MEETINGS
Metal-air batteries symposium: compendium of papers presented for publication (Interagency Advanced Power Group, 11 Sep 1968), 32 (AD-684898)
METAL-GAS BATTERIES/OPERATION
Cadmium--air batteries, 1822 (AD-757438)
Storage of chlorine on activated charcoal in low-pressure, high-performance secondary batteries, 4552
METAL-GAS BATTERIES/PERFORMANCE
1973 GSFC battery workshop, second day ($Ag/H_2$ cell), 92 (N-75-17808)
Design work on lithium-sulfur battery (and others), 647 (CONF-691143-)
Development of Cd--air and Zn--air cells, 1344
Exploratory study of hydrogen/silver oxide batteries for space application. Final report, 711 (N-76-26702)
High energy density silver-hydrogen cells for space and terrestrial applications, 2350
Influence of the structure of silver-activated gas electrodes on the electrochemical performance of fuel cells and metal-air cells (Pore size effects), 4221
Lightweight high-energy battery ($Al/AlCl_3$--NaCl/Cl), 400 (AD-732198)
Lithium battery with inorganic electrolyte. Final report, 1 Dec 1971--31 May 1973 (Li/Cl cells with halogen/Pt halogen/graphite, nonmetallic and metallic cathode systems), 2068 (N-74-12745)
Lithium-water-air battery: a new concept for automotive propulsion (Modified lithium--water battery, mechanically rechargeable), 754 (UCID-16751)
Lithium-water-air battery: a new concept for automotive propulsion, 764 (UCRL-51811)
Metal--air systems. 1. Magnesium--air cells (Mg/air: general description), 1514
Metal--air systems. 2. Metal--air battery systems (Zn/air, Mg/air, Ca/air), 2554
Metal--air (oxygen) batteries (Cd/air, Zn/O), 2383
Metal--gas rechargeable batteries, 1352
Metal-air cells (Cd/air, Mg/air, and Fe/air systems), 381 (AD-683461)
One watt 30-day plus power sources. Research paper (Comparison of silver-zinc batteries, zinc-air batteries, hydrogen fuel cells, and solar cells), 1762 (AD-675936)
Problems of the electric automobile state of the art in the field of light electric accumulator research, 2333
Rechargeable metal-air battery systems (Iron anode), 1359
Rechargeable metal oxide-hydrogen cells. Research and development technical report (approx. 1 Ah), 592 (AD-A-036280)
Review of some modern power supplies, 499 (AD-843245)
Review of battery systems for electrically powered vehicles, 2527
Secondary lithium/chloride batteries, 1529
Secondary cadmium--air cells (Development), 1471
Studies on air battery with caustic alkaline electrolyte, 4393
Zinc-bromine storage Battery for electric vehicles, 1118
METAL-GAS BATTERIES/PERFORMANCE TESTING
Film and battery tests. Final report (Ag/H), 1833 (AD-776234)
Film and battery tests. Final report (Ag/H), 1834 (AD-776234)
High-energy-density silver--hydrogen cells for space and terrestrial applications, 1308
Sealed metal oxide-hydrogen secondary cells ($Ag-H_2$), 1122
Silver-hydrogen life testing, 2130 (X-711-77-28)
METAL-GAS BATTERIES/PLANNING
Batteries for energy storage ($Al-Cl_2$), 890
Fundamental research on the selection of new electrochemical generators of medium power, 1033
Iron-air battery bus could go further, 5102
METAL-GAS BATTERIES/PRESSURE VESSELS
Chlorine storage and distribution system for the lithium--chlorine battery. Annual progress report, 3090 (AD-908253L)
METAL-GAS BATTERIES/RESEARCH PROGRAMS
Batteries: today and tomorrow, 131
Studies in fundamental chemistry of fuel cell reactions. Semiannual progress report, 1 July-31 December 1968, 689 (N-69-25397)
METAL-GAS BATTERIES/REVIEWS
Characteristics of metal-air systems (67 references; 10 different anodes described), 1366
Metal--air cells, 1240
Progress in metal/air batteries (Zn, Cd, Mg, Na, other primary batteries; replaceable anode and true secondary batteries), 370 (AD-671685)
METAL-GAS BATTERIES/SAFETY
Safety shell for retention and detoxication of chlorine released from metal--chlorine batteries, 3729
METAL-GAS BATTERIES/THERMODYNAMICS
Electrochemical fuel cells, 3444
METAL-GAS BATTERIES/USES
Prospects for electric vehicles. A study of low-pollution potential vehicles: electric (Batteries, fuel cells, and engine-generator-battery hybrids), 5000 (PB-193254)
Prospects for electric vehicles: a study of low-pollution-potential vehicles-electric, 5001 (PB-194814)
System design implications of electric and hybrid vehicles, 5261
METALLURGY
(Use of a more specific term is recommended; see also EXTRACTIVE METALLURGY or FABRICATION.)
METALLURGY/RESEARCH PROGRAMS
Independent research, 1975. Final report (Naval Surface Weapons Center, Silver Spring, Md.), 69 (AD-A-015337)
METAL-METAL BATTERIES/BATTERY CHARGERS
Computer-controlled battery pulse charging (Hg/Cd), 4035
METAL-METAL BATTERIES/BATTERY SEPARATORS
Alkali metal voltaic cells (Na(Sn) or Li(Sn)/$CaCl_2$, NaCl, KCl, or LiCl/Ni or $Cl_2$-C), 4647
METAL-METAL BATTERIES/CHEMICAL REACTIONS
Investigations of high energy density electrochemical systems. Part 2 - Electrode behavior in organic solvent-Lewis acid electrolytes (Li/Cu or other), 2591
METAL-METAL BATTERIES/CORROSION PROTECTION
Electrochemical investigations on iron/zinc local cells, 2236
METAL-METAL BATTERIES/DESIGN
Characteristics and development of the TC-765 thermal battery (Ca/LiCl--KCl/$CaCrO_4$--Fe), 744 (SAND-74-0041)
Development and performance of a miniature, high-voltage thermal battery (Ca/LiCl--KCl/$CaCrO_4$-$K_2CrO_4$ (Fe)), 747 (SLA-74-5363)
Fused salt battery (Ca/KCl--LiCl/Ni; patent), 1005
Long-life low-voltage power thermal battery (4.5 A at 28 V), 1258
Novel method of electrical storage (Transfer of hydrogen between electrodes of Pd alloys), 1543
Primary or secondary electrochemical cell (Li/apratic electrolyte/As, Sb or other semimetal, metalloid, or semiconductor; patent), 869
Sealed battery and method for its activation (2 Metal electrodes, anode electrolyte of solid KOH mixed with Zn; patent), 999
Sixty-minute thermal battery: a feasibility study (Ca/LiCl--KCl, $CaCrO_4$/Fe), 746 (SLA-73-5888)
Standard line of secondary batteries, 1536
Thermal battery (Patent; Ca anode, electrolyte disk with calcium chromate depolarizer, $SiO_2$ binder, and KCl--LiCl--$Ca(OH)_2$ electrolyte; 16 and 65 $mA/cm^2$), 968
Thermal battery (Patent; $Ca(OH)_2$-coated Ca anode, DEB pellet), 940
Thermally activated power cells (Glass or porcelain electrolyte (Austin cells)), 1535
Thin-film rechargeable solid-electrolyte batteries. Revised ed. (Ag/AgI/Pt, operate at 100 C), 335 (AD-629501)
METAL-METAL BATTERIES/ELECTRIC POTENTIAL
Abnormal behaviors of some hydrochloric acid

electrochemical systems (Cu/HCl/Pt), 2227
Electrochemical studies of the sodium-bismuth system (Na/NaCl/Na-Bi thermally regenerative galvanic cell using heat from, e.g., a nuclear reactor), 1502
Self-discharge in alkali metal-containing bimetallic cells, 2508
METAL-METAL BATTERIES/ELECTROCHEMISTRY
Batteries with solid ion exchange electrolytes. I, 1578
Canadian research on secondary batteries (Pb/Zn), 2615
METAL-METAL BATTERIES/ELECTRODES
Development of sintered zinc battery electrodes. Progress report (0.075 to 225 ma/cm$^2$), 3060 (AD-878215)
Electric cell (Patent; Zn/$H_2NCONHSO_3H$/C, Ni/Zn, Fe/Zn, Cu/Zn), 1383
Investigations of high energy density electrochemical systems. Part 2 - Electrode behavior in organic solvent-Lewis acid electrolytes (Li/Cu or other), 2591
Lithium battery with inorganic electrolyte. Quarterly progress report No. 2, 1 Feb-30 Apr 1972 (Li/LiBCl$_4$/cathode = sulfur, metals, metal halides, metal oxides, metal sulfides), 415 (AD-746633)
Rechargeable mercury electrode (Hg|HgO electrode; patent), 3420
METAL-METAL BATTERIES/ELECTROLYTES
Batteries with solid ion exchange electrolytes. I, 1578
Factors influencing the lifetime of pure β-alumina electrolyte (Na/S and Na/Na cells, charge transfer of 1700 A-hr/cm$^2$), 3779
Molten salt batteries (Patent; Ca/LiCl--KCl ($Na_2CO_3$)/Ni, small voltage fluctuation), 1038
Molten salt batteries (Patent; Ca/LiCl--KCl($K_2SO_4$)/Ni, small voltage fluctuation), 1039
Solid electrolyte sintered matter such as impermeable β-alumina (Chemical preparation for alkali metal--Na batteries), 3974
Thin-film rechargeable solid-electrolyte batteries (Ag/AgI/Pt, operable at 100°C), 1521
METAL-METAL BATTERIES/FABRICATION
Fabrication of ultrathin solid electrolyte batteries. Quarterly progress report No. 1, 1 April-1 July 1967 (Pt/AgI/Ag), 466 (AD-820687)
Fabrication of ultrathin solid electrolyte batteries. Quarterly progress report No. 2, 1 July-1 October 1967 (Pt/AgI/Ag, Au/AgBr/Ag, Pt/$KAg_4I_5$/Ag, Ag/AgI/Ag), 474 (AD-824398)
Fabrication of ultrathin solid electrolyte batteries. Quarterly progress report No. 3, 1 October 1967-1 January 1968 (Au/AgBr/Ag), 483 (AD-829655)
Fabrication of ultrathin solid electolyte batteries. Report No. 4 (final), 1 April 1967-31 March 1968 (Ag/Pt or Au with AgI, KI, AgBr, or AgCl electrolyte), 492 (AD-840076)
Pellet-type thermal battery (Fe--Ca, with $CaCrO_4$ depolarizer and LiCl--KCl electrolyte), 743 (SAND-74-0007)
METAL-METAL BATTERIES/FEASIBILITY STUDIES
Low temperature liquid sulfur dioxide cell (Na (or Mg) /$IBr_3$, $FeCl_3$, $SO_2$/Fe), 1613
METAL-METAL BATTERIES/FUNCTIONAL MODELS
Rechargeable thin-film solid-electrolyte battery (Ag/AgI/Pt), 341 (AD-634626)
METAL-METAL BATTERIES/MEETINGS
Power sources 4: Research and development in non-mechanical electrical power sources; Proceedings of the Eighth International Symposium, Brighton, Sussex, England, September 24-26, 1972, 1300
METAL-METAL BATTERIES/PERFORMANCE
Development and performance of a miniature, high-voltage thermal battery (Ca/LiCl--KCl/$CaCrO_4$-$K_2CrO_4$ (Fe)), 747 (SLA-74-5363)
Fabrication of ultrathin solid electrolyte batteries. Quarterly progress report No. 2, 1 July-1 October 1967 (Pt/AgI/Ag, Au/AgBr/Ag, Pt/$KAg_4I_5$/Ag, Ag/AgI/Ag), 474 (AD-824398)
High-pressure performance of voltaic cells. Final technical report, January-February 1965 (Mg/Cu seawater battery (18,000 psi); Pb--acid cell (20,000 psi)), 1739 (AD-627931)
Lithium battery with inorganic electrolyte. Final report, 1 Dec 1971--31 May 1973 (Li/Cl cells with halogen/Pt halogen/graphite, nonmetallic and metallic cathode systems), 2068 (N-74-12745)
Lithium battery with inorganic electrolyte. Quarterly progress report No. 2, I Feb-30 Apr 1972 (Li/LiBCl$_4$/cathode = sulfur, metals, metal halides, metal oxides, metal sulfides), 415 (AD-746633)
Lithium-silver chloride secondary battery investigation. Quarterly technical progress report No. 1 (Li/AgCl, 25 Wh/lb), 258 (AD-439399)
Long-life low-voltage power thermal battery (4.5 A at 28 V), 1258
Reasons for the capacity reduction of high-temperature nickel-nickel batteries during cycling, 2318
Reversibility of lead electrodes in alkaline electrolytes, 1393 (N-74-16817)
Thermal battery for artillery (Ca/LiCl--KCl/$CaCrO_4$/Fe), 1259
METAL-METAL BATTERIES/PERFORMANCE TESTING
Development of a soluble reactants and products secondary battery (Fe/Cr, Fe/Sn, Sn/Cr, and Fe/Ti), 1241
Electrochemical characterization of nonaqueous systems for secondary battery application (Testing of electrode-organic electrolyte combinations by cyclic voltammetry), 690 (N-69-36829)
Evaluation of OZX-47, SARGO I, lead--antimony submarine main storage battery cells. Final report, 1956 (AD-910857L)
Preliminary study into the feasibility of a sixty-minute thermal battery (Fe--Ca with depolarizer--electrolyte--binder pellets), 745 (SLA-73-0412A)
Sixty-minute thermal battery: a feasibility study (Ca/LiCl--KCl, $CaCrO_4$/Fe), 746 (SLA-73-5888)
METAL-METAL BATTERIES/REGENERATION
Regeneration of electric cells with solid electrolytes (Patent), 2194
METAL-METAL BATTERIES/REVIEWS
Review of thermal battery technology (Ca/LiCl--KCl/$CaCrO_4$ electrochemical system), 748 (SLA-74-5381)
METAL-METAL BATTERIES/SEALS
Sealing closure for electric batteries (Patent), 1199
METAL-METAL BATTERIES/TESTING
Pellet-type thermal battery (Fe--Ca, with $CaCrO_4$ depolarizer and LiCl--KCl electrolyte), 743 (SAND-74-0007)
Results of thermal battery cell testing (Description of single-cell tester), 4124
METAL-METAL BATTERIES/USES
EFP preproduction electric prototypes, 4911 (CONF-711166-)
Progress on voltmobiles (2952-lb, 2-passenger car uses Pb-acid battery; 5850-lb, 4-passenger car uses Pb/Co battery), 5074
METAL-METAL OXIDE BATTERIES
See also IRON-NICKEL BATTERIES
NICKEL-ZINC BATTERIES
SILVER-CADMIUM BATTERIES
SILVER-ZINC BATTERIES
ZINC-MANGANESE BATTERIES
R and d for hybrid battery and cell studies. Final report, 1 Apr 1973-15 Apr 1975 (Li-organic;Zm-HgO; $MgMnO_2$), 580 (AD-A-015520)
Special purpose batteries (Review), 1603
METAL-METAL OXIDE BATTERIES/ANODES
Engineering analysis of shape change in zinc secondary electrodes. I. Theoretical, 3372
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 8 (final) (Pb/Pb oxides), 283 (AD-471978)
Long-life stable zinc electrodes for alkaline secondary battery. Quarterly report No. 4, 1 September-30 November 1967 (Teflonated anodes), 3026 (AD-835961)
METAL-METAL OXIDE BATTERIES/BATTERY CHARGING
Lead-silver oxide cell, 2428
METAL-METAL OXIDE BATTERIES/CATHODES
Cathodic behavior of CuS, $MoO_3$, and $MnO_2$in lithium cells, 4015
Electrochemistry of $V_2O_5$ in LiCl-KCl eutectic melt, 4682
High voltage organic electrolyte batteries (Patent; Li/$LiClO_4$/$CrO_3$ with tetrahydrofuran), 828
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 8 (final) (Pb/Pb oxides), 283 (AD-471978)
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 7, 31 May-31 Aug 1949 (Cd/Pb oxides), 284 (AD-471979)
Method for making a nickel positive electrode for an alkaline battery (Patent; suspension of nickel hydroxide, cobalt hydroxide, and graphite entrained in polyvinylidene fluoride binder), 3353
Method of producing electrodes (Patent), 3400
Role of ternary phases in cathode reactions. (Li/oxides or sulfides), 2174
METAL-METAL OXIDE BATTERIES/CHEMICAL REACTIONS
Role of ternary phases in cathode reactions. (Li/oxides or sulfides), 2174
METAL-METAL OXIDE BATTERIES/COMPARATIVE EVALUATIONS
Effect of high pressure on the voltage and current output of silver oxide-zinc and mercury oxide-zinc miniature batteries, 2475
Transition metal compounds as cathodic materials in rechargeable lithium cells. Technical report, 595 (AD-A-037676)
METAL-METAL OXIDE BATTERIES/DESIGN
Chemical source of electric power (Patent; Cu/$H_2SO_4$/$PbO_2$) 1134
High voltage organic electrolyte batteries (Patent; Li/$LiClO_4$/$CrO_3$ with tetrahydrofuran), 828
Investigations leading to the design and development of magnesium/magnesium perchlorate batteries. Quarterly progress report No. 3, 1 Jan-31 Mar 1965, 327 (AD-618497)
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 4 (annual) (Zn/Pb oxide, Pb/Pb oxide), 282 (AD-471973)
Metal--air or metal--oxide secondary batteries (Patent; metal/air element and metal/metal oxide element with common electrolyte and common metal anode), 1208

Multilayer batteries having indium anodes (Patent; In/$MnO_2$ with C separators), 975
Rechargeable power source (Li/$LiClO_4$+ propylene carbonate/$V_2O_5$; patent), 902
METAL-METAL OXIDE BATTERIES/ELECTRIC POTENTIAL
High-temperature nickel--nickel storage battery (80° to 150°, 0.1 to 10 A), 1114
Potential and coulombic capacity of some galvanic cell systems, 2712
METAL-METAL OXIDE BATTERIES/ELECTRODES
Anodic behavior of a copper electrode in a lead--copper battery, 3802
High-rate batteries (Effects of plate porosity on efficiency; study included Zn, Cd, Pb, $Ag_2O$, and AgO), 2890 (AD-645942)
Mercury cell battery investigation. Final report, 16 Dec 1962-15 Dec 1963 (Zn/KOH/HgO), 252 (AD-430404)
Method for the fabrication of galvanic elements sealed against external and/or internal influences by a cup-shaped container with a top made of thermoplastic materials (Patent), 3735
Procedure for fabricating electrodes for galvanic elements and accumulators using porous frameworks which are made surface conductive or designed with conducting inserts (Patent), 3510
Rechargeable mercury electrode (Hg|HgO electrode; patent), 3420
METAL-METAL OXIDE BATTERIES/ELECTROLYTES
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 7, 31 May-31 Aug 1949 (Cd/Pb oxides), 284 (AD-471979)
Lead dioxide-zinc rechargeable-type cell and battery and electrolyte therefor (Patent), 863
Non-aqueous battery system (Lewis acid-type solute in nitrobenzene or substitutions; patent), 3381
METAL-METAL OXIDE BATTERIES/ENERGY
Creation of a standby current source using a copper--sulfuric acid--lead(IV) oxide galvanic system (24 Wh/kg, 44 Wh/$dm^3$), 2234
METAL-METAL OXIDE BATTERIES/FABRICATION
Alkaline mercuric oxide cells (Patent; amalgamated Zn/HgO), 1408
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 9 ($PbO_2/H_2SO_4$/Cd; Pb/$HBF_4/PbO_2$), 278 (AD-471947)
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 10 ($Ag_2O_2$/KOH/Zn), 279 (AD-471950)
METAL-METAL OXIDE BATTERIES/HYBRID SYSTEMS
Electric storage unit consisting of a fuel cell and storage battery with a common negative electrode connected in parallel (Patent), 1270
METAL-METAL OXIDE BATTERIES/PERFORMANCE
Batteries kick off new markets-1. Dry batteries with high energy density, minimal self-discharge promise solid demand from ME, 2167
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 9 ($PbO_2/H_2SO_4$/Cd; Pb/$HBF_4/PbO_2$), 278 (AD-471947)
METAL-METAL OXIDE BATTERIES/PLATES
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 2, 281 (AD-471972)
METAL-METAL OXIDE BATTERIES/POLARIZATION
Discharge characteristics of cells with titanium anodes (Ti/$PbO_2$), 2356
METAL-METAL OXIDE BATTERIES/STORAGE
Lead-silver oxide cell, 2428
METAL-NONMETAL BATTERIES
See also LITHIUM-COPPER CHLORIDE BATTERIES
SODIUM-SULFUR BATTERIES
R and d for hybrid battery and cell studies. Final report, 1 Apr 1973-15 Apr 1975 (Li-organic;Zm-HgO; $MgMnO_2$), 580 (AD-A-015520)
METAL-NONMETAL BATTERIES/ANODES
Anode for a secondary, high-temperature electrochemical cell (Patent; method of preparation), 3717
Anodic behavior of lithium in aqueous electrolytes. II. Mechanical passivation (Li/$H_2O$), 3408
Calcium alloy as active material in secondary electrochemical cell ( Patent; Ca alloy/halide/oxides, sulfides), 3354
Calcium/iron sulfide secondary cells (Ca-Mg-Si), 3177 (CONF-770531-5)
Electrodes for use in zinc-halogen electrolytic cells and (or) batteries (Patent), 4307
Lithium-anode limited cycle battery investigation. Annual report, Feb-Dec 1965 (Development of Li/$CuF_2$ and Li/$CoF_3$ batteries), 290 (AD-481543)
Lithium anode limited-cycle battery investigation. Quarterly technical progress report No. 3 (Li/$CuF_2$, Li/$CoF_3$), 2822 (AD-474219)
Lithium anode properties in a nonaqueous cell (Li/$AlCl_3$ in propylene carbonate/AgCl), 4442
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 1 (1.24 Ah/in.$^2$), 255 (AD-433616)
Negative electrode for solid electrolyte cells (Patent; negative electrode liquid at room temperature), 3496
Patent; improved aluminum anode for Al or Al-Li/S battery, 3518
Porous cobalt electrodes for alkaline accumulators and hybrid cell therewith and air electrode (Patent), 3376
Production and engineering methods for Carb-Tek (trade name) batteries in fork lift trucks. Interim report Mar 1975-Mar 1976, 591 (AD-A-035983)
Scanning electron microscopic studies of lithium and cycle behavior of lithium nonaqueous cells with transition metal chalcogenide cathodes, 3836
Zinc-halide battery with molten electrolyte (Patent; method for preventing dendrite formation during charging), 2191
METAL-NONMETAL BATTERIES/BATTERY CHARGING
Zinc-halide battery with molten electrolyte (Patent; method for preventing dendrite formation during charging), 2191
METAL-NONMETAL BATTERIES/BATTERY SEPARATORS
Development of a high-temperature battery. Final report (Li-Mg/CuCl with zeolite separator), 681 (N-65-36781)
Exploratory development of non-aqueous high rate batteries. Phase I. Quarterly progress report No. 2, 15 Apr-15 Jun 1972 (Li/$CuCl_2$), 3081 (AD-903276L)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 1, 10 Mar 1965 (Protection of $NiCl_2$ electrode tabs from Cl corrosion), 2806 (AD-464485)
Lithium-nickel halide secondary battery investigation. Final technical report, December 1963-December 1964 (Compatibility tests, recommendations for components), 2859 (AD-612492)
Organic electrolyte permselective membranes. Report No. 4 (final), 1 April 1968-15 September 1970 (Li/electrolyte in propylene carbonate/Cu halide), 3067 (AD-882890)
Organic electrolyte permselective membranes. Report No. 4 (final), 1 Apr 68-15 Sep 70 (Li-Cu halide cells), 3068 (AD-882890)
METAL-NONMETAL BATTERIES/CATHODES
Alkali metal/sulfur cell with gas fuel cell electrode (Patent), 937
Alkali metal, sulfur battery or cell with single phase sulfur electrode (Patent; additive to cathodic reactant to improve charge/discharge capacity), 3338
Cathode for a cell (Light metal anode, nonaqueous Cl-containing electrolyte, metal halide cathode;patent), 3718
Cathode systems for aluminum-molten chloroaluminate batteries, 3156 (ANL-76-8)
Cathodic behavior of CuS, $MoO_3$, and $MnO_2$in lithium cells, 4015
Cell with light metal anode (Halide cathode, nonaqueous Cl-containing electrolyte;patent), 1051
Composition of nonaqueous solutions of potential use in high energy density batteries. Final report, 15 Nov 1969-14 Nov 1972 (Solubility equilibria of $CuF_2$, $NiF_2$, $ZnF_2$, $CdF_2$, $AgF_2$), 432 (AD-763140)
Discharge reaction mechanism of the $MoO_3$ electrode in organic electrolytes (Li/$MoO_3$), 3306
Effect of the Lewis basicity of organic solvents on the electrochemical behavior of metal halide electrodes (Study of suitability of various cathode materials with Li in propylene carbonate), 4239
Effect of the Lewis basicity of organic solvents on the electrochemical behavior of metal halide electrodes, 4240
Electrodes based on copper(II) sulfide (Patent; 205 Wh/kg in Li/CuS battery), 4336
Engineering evaluation of solid transition-metal sulfide electrodes for use in high energy-density batteries, 3191 (LBL-5186)
Engineering evaluation of solid transition-metal sulfide electrodes for use in high energy-density batteries, 3465
High energy cathodes for fused salt batteries (Al anode; fluorinated graphite, $WCl_6$, quinones, I, S tested as cathodes), 2975 (AD-779385)
Homogeneous cathode mixtures for secondary electrochemical power-producing cells (Patent), 3977
Lithium--molten salt cell with transition metal chalcogenide positive electrode (Patent; Li/alkali or alkaline earth metal halides with Li+/transition metal chalcogenide), 941
Lithium anode limited cycle battery investigation. Quarterly technical progress report No. 7 (Li/$CuF_2$ >25 Ah, 70 to 75 Wh/lb), 455 (AD-804103)
Lithium-anode limited cycle battery investigation. Final report, 1 January 1966-1 June 1967 (Li/$CuF_2$ with $LiClO_4$-propylene carbonate electrolyte, 30 V, 25 Ah, 50 Wh/lb, improved $CuF_2$ utilization), 467 (AD-821051)
Lithium anode limited-cycle battery investigation. Quarterly technical progress report No. 4 (Li/$CuF_2$, Li/$CoF_3$), 289 (AD-477937)
Lithium anode limited-cycle battery investigation. Quarterly technical progress report No. 5 (Development of Li/$CuF_2$ and Li/$CoF_3$ batteries, 25 Ah), 292 (AD-483237)
Lithium anode limited-cycle battery investigation.

Quarterly technical progress report No. 3 ($Li/CuF_2$, $Li/CoF_3$), 2822 (AD-474219)
Lithium battery research. Annual report No. 2, 1 April 1969-31 March 1970 ($Li/CdCl_2$, $Li/CuF_2$, Li/AgF with propylene carbonate), 526 (AD-870688)
Lithium battery research. Annual report No. 1, 1 April 1968-31 March 1969 (Li/halide, most promising were AgF, $CuF_2$ and $CdCl_2$), 515 (AD-854368)
Lithium cells based on silver salts as cathodes (Performances of $Ag_2CrO_4$, $Ag_3PO_4$, and $AgIO_3$ cathodes with different electrolytes), 3362
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 3, 27 October 1966-27 January 1967, 2995 (AD-808839)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 4, 27 January-27 April 1967 (Problems in obtaining pure anhydrous nickel fluoride), 3003 (AD-815027)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 5, 27 April-27 July 1967 (Factorial testing of $NiF_2$ electrodes), 3007 (AD-820259)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 2, 27 July-27 October 1966 ($NiF_2$ preparation; physical properties of electrolyte), 2986 (AD-803529)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 6, 27 July-27 October 1967 (Electrode porosities), 3013 (AD-824659)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 7, 27 October 1967-27 January 1968, 3020 (AD-829093)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 1, 10 Mar 1965 (Protection of $NiCl_2$ electrode tabs from Cl corrosion), 2806 (AD-464485)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 2 for period ending 15 Jun 1965 ($Li/NiCl_2$), 2813 (AD-468352)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 3 for period ending 15 Sep 1965 ($Li/NiCl_2$, doped electrodes), 2824 (AD-474394)
Lithium-nickel halide secondary battery investigation. Final technical report, Dec 1964-Nov 1965 (Corrosion protection for tabs of $NiCl_2$ electrode), 2832 (AD-478992)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 1, 27 Apr-27 Jul 1966, 2841 (AD-487828)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 3, 317 (AD-605754)
Low-cost, high-energy cathodes for magnesium perchlorate batteries ($Mg/MgClO_4/MnO_2$, CuO, or meta-dinitrobenzene, -40 to +125 F), 2880 (AD-634100)
Metal permanganate and metal periodate organic electrolyte cells (Patent), 3523
Method of producing electrodes (Patent), 3400
New cathode material for high energy density batteries ($Li/Li$ perchlorate/$CdF_2$ or $ZnF_2$), 2964 (AD-757883)
New electrode material (M/sub x/(graphite-CrO/sub n/) where M is K, Na, or L, Na/β-alumina/$CaCrO_3$ produced 3.9 V, storage capacity of 1.1 kWh/kg), 4217
New niobium selenide cathode for nonaqueous lithium batteries ($LiClO_4$ in propylene carbonate electrolyte), 3313
Nickel fluoride (Patent; $Li/NiF_2$ cathode preparion), 3951
Production of nickel fluoride (Patent; for lithium-nickel fluoride batteries), 3953
Rechargeable nonaqueous batteries (Patent; $Li/LiClO_4$ in propylene carbonate/NbSe/sub 4+x/, x = 0 to 0.5), 784
Research and development of a high-energy nonaqueous battery. Quarterly technical report No. 3, 18 Sep-18 Dec 1963 ($Li/CuF_2$), 244 (AD-347494)
Role of ternary phases in cathode reactions. (Li/oxides or sulfides), 2174
Secondary electrochemical cells with a chalogen cathode (Li/S or similar materials; patent), 3961
Secondary battery with nonconsumable silicon cathode (Patent; Zn/Br with $RuO_2$- coated Si cathode; preparation), 1023
Secondary battery with separate charge and discharge zones (Patent; alkali metal/sulfur), 832
Secondary battery or cell (Patent; additive to cathodic reactant to improve charge/discharge capacity), 3337
Semiconducting cathode for storage batteries (Patent), 4182
Some aspects of lithium-copper compound cells in LiCl-KCl eutectic (Li/CuS), 798
Storage battery comprising positive electrode of a graphite and lithium fluoride compound (Patent; Li/(C/sub n/F)/sub x/), 3318
Sulfur-based lithium-organic electrolyte secondary batteries. Quarterly report No. 5, 4 Dec 19743-Mar 1975 ($Li/LiAlCl_4$, $LiClO_4$, $LiBF_4$ in propylene carbonate/Nb, Ti, or V sulfide: -40 to +160°F, 100 Wh/lb, 500 cycles; development program), 578 (AD-A-014881)
Thermodynamic study of lithium metal-organic electrolyte batteries (29 substances), 4366
Transition metal sulfides as cathodes for secondary Li batteries. I. Niobium sulfides ($Li/LiAlCl_4$--propylene carbonate/Nb sulfides), 3784
Use of a hydrovibroabrasive erosion method to study the surface strength of silver oxide electrodes of chemical current sources, 4081
Use of perovskites and perovskite-related compounds as battery cathodes (Patent), 3720

METAL-NONMETAL BATTERIES/CHEMICAL REACTION KINETICS
High-energy system (organic electrolyte). Quarterly report No. 1, 15 June-15 September 1965 ($Li/CuF_2$), 334 (AD-628961)

METAL-NONMETAL BATTERIES/CHEMICAL REACTIONS
High-temperature batteries, 610 (ANL-76-8)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 3, 1727 (AD-605754)
Role of ternary phases in cathode reactions. (Li/oxides or sulfides), 2174

METAL-NONMETAL BATTERIES/CONTAINERS
Lithium-silver chloride secondary battery investigation. Quarterly technical progress report No. 2 (Nonaqueous electrolyte), 1647 (AD-450428)

METAL-NONMETAL BATTERIES/DESIGN
Alkali metal--metal chloride battery (Patent; typical example, Na/alkali metal chloroaluminate/$SbCl_3$, cell temperature 180-200°), 1002
Alkali metal/sulfur cell with gas fuel cell electrode (Patent), 937
Alkaline batteries (Sn/KOH/$Ag_2O$, NiO, or HgO; patent; 1.5 V), 1221
Aluminum bromide fused-salt battery (Patent; Al/Al+ alkali halides/C, 50 to 250° operating temp.), 1325
Batteries incorporating water scavengers (Patent; Li, Na, or Zn/propylene carbonate + $LiClO_4$/graphite fluoride), 1060
Battery with chromic acid--sulfuric acid electrolyte feeding at first use (Zn/C; patent), 1282
Battery with nonaqueous electrolyte ( Patent; alkali metal (Li)/$LiClO_4$--propylene carbonate/$MoO_3$ or $CuF_3$; molecular sieve), 1013
Battery with a solid fluoride ion conducting electrolyte (Patent; Pb, Zn, Mg, or Cd/KRbPbR electrolyte/$PhF_4$, $CuF_2$, or teflon), 947
Bromine-zinc secondary cells, 1533
Button type galvanic cell (Patent; Li/dioxolane/CuS), 978
Chalcogenide battery (Patent; $Li/LiClO_4$ in tetrahydrofuran + dimethoxyethane/$TiS_2$ is preferred embodiment), 807
Chemical source of electric power (Patent; Ag/organic electrolyte with Ca halide/Ca halide-coated Cd), 1192
Design of $Zn/ZnBr_2/Br$ battery with several cells in series; 430 Wh/kg; patent, 914
Development of high-specific-energy batteries for electric vehicles. Progress report, August 1973-January 1974 (Li--$FeS_2$ with lithium halide-containing electrolyte), 633 (ANL-8058)
Development of electrochemical energy storage unit for vehicle propulsion. Final technical report, 30 June 1966-30 September 1967 (Li-Al/LiCl-KCl/C, 100 Wh/lb), 476 (AD-825167)
Development of electrochemical energy storage unit for vehicle propulsion. Final technical report, 3 March 1966-30 June 1968 (Li-Al/LiCl-KCl/C), 497 (AD-841130)
Electrochemical cell with catalyzed acid peroxide electrolyte ($Mg/HCl--H_2O_2--MgCl_2--FeCl_3--CuCl_2/C$), 1194
Electrochemical generator (Li/Li perchlorate in organic solvent/Cu oxide, Ag chromate, Pb chromate, or fluorinated C; patent), 867
Electrochemical vehicle powerplants (Review of GMC work on high-power and -energy density batteries), 1478
Electrochemical power-producing cell (Li/Se; patent), 1322
Electrolytic cells (Patent; Li, Li-Na, or Li-Al anodes, S or Se cathode), 800
Enclosed electrical energy storage device with halogen absorbing means (Patent; halogen oxidant), 1081
Energy conversion devices with improved electrode shapes (Patent), 849
Evaluation of electrochemical energy storage systems for vehicle propulsion. Interim technical report, 3 March-3 December 1966 (Li alloys /LiCl--KCl/C, 100 Wh/lb possible), 353 (AD-653790)
Filter/store for electric energy storage device (Aqueous electrolyte storage and circulation system; patent), 1212
Galvanic power supply device with at least one galvanic cell to be activated by addition of an aqueous solution, and method for activating this cell (Patent), 928
Halogen hydrates (Patent), 1297
High energy cells with a lithium electrode (Li/Cl-COO-$CH_3$/Cu chlorides), 1456
High performance zinc-bromine secondary battery system, 651 (CONF-711166-)
Homogeneous cathode mixtures for secondary electrochemical power-producing cells (Alkali metal/chalcogen; patent), 1189
Hydrogen--bromine secondary battery (Patent; water-$H_2SO_4$-LiBr electrolyte), 949
Implantable battery (Li/Se; patent), 1197
Investigations leading to the design and development of magnesium/magnesium perchlorate batteries. Report No. 4 (final), 1 July 1964-30 June 1965, 330 (AD-622822)
Lithium--molten salt cell with transition metal

chalcogenide positive electrode (Patent; Li/alkali or alkaline earth metal halides with $Li^+$/transition metal chalcogenide), 941
Lithium anode limited-cycle battery investigation. Quarterly technical progress report No. 2 for 15 Aug 1965 ($Li/CoF_3$, $LiCuF_2$), 274 (AD-468674)
Lithium-nickel halide secondary battery investigation. Final technical report, Dec 1973-Dec 1974 ($Li/AlCl_3$ + propylene carbonate/$NiCl_2$), 323 (AD-612492)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 3, 317 (AD-605754)
Lithium/selenium secondary cells for components in electric vehicular propulsion generating systems. Interim technical summary report No. 2, 23 November 1969-22 May 1970, 532 (AD-876828)
Lithium/selenium secondary battery for implantation. Annual report, 23 June 1970-30 July 1971 (Li/Se and Li-Al/S-Se-Tl, 400 C, 30 W), 721 (PB-215623)
Lithium-silver chloride secondary battery investigation. Quarterly technical progress report No. 3, 318 (AD-607968)
Lithium-silver chloride secondary battery investigation. Final report, Dec 1963-Nov 1964, 321 (AD-612189)
Lithium-water-air battery: a new concept for automotive propulsion (Modified lithium--water battery, mechanically rechargeable), 754 (UCID-16751)
Metal halogen hydrate battery system (Patent; improved halogen hydrate forming and storage system), 833
Molten salt electrochemical systems for battery applications (Patent: $Al/AlCl_3$-NaCl/S or I), 861
New batteries with sodium and bromine electrodes operating at room temperature (Na amalgam/$\beta$-$Al_2O_3$ tubes immersed in amalgam and packed with C impregnated with Br-containing solutions), 1253
Nonaqueous battery electrolyte (Patent; $Li/ICl_3$ in $LiClO_4$--propylene carbonate/$IC_3$ in C), 1174
Nonaqueous battery using chalcogenide electrode (Patent), 1061
Primary or secondary electrochemical cell (Li/epratic electrolyte/As, Sb or other semimetal, metalloid, or semiconductor; patent), 869
Process for operating a galvanic cell arrangement with negative electrodes reacting electrochemically with halogens (Patent), 929
Rechargeable lithium-sulfur battery. Executive summary, progress through 1973 (Metal sulfide cathodes, LiCl--KCl electrolyte), 604 (AI-74-55)
Rechargeable electrochemical cell having complex metal fluoride electrolyte (Patent; Be/alkali metal fluoroberyllate/$NiF_2$, AgF, or $AgF_2$), 1142
Rechargeable battery containing a lithium anode (Patent; $Li/CuSO_4$ with $(Bu_4N)_2SO_4$ + $Bu_4NClO_4$ in methyl sulfate electrolyte), 1385
Regenerative metal--water battery (Patent; K or Na), 1185
Research on electrochemical parameters for nonaqueous batteries: task 1. Quarterly progress report No. 1 ($Li$--$Al/AlCl_3$--$LiCl/CuCl_2$), 524 (AD-868947)
Sealed lithium-iodine cells (Patent), 855
Sealed lithium-sodium electrochemical cell (Patent; many cathodes tested including $Cl_2$, $Br_2$, $I_2$, S, P, $NiCl_2$, PbS, AgO, $CuF_2$, $PbI_2$, $SO_2$, $SOCl_2$, Fe(III), and $O_2$), 791
Sealed sodium--iodine battery (Patent; solid electrolyte and electrodes 120°C operating temp, $\beta$-alumina electrolyte), 1148
Secondary electrochemical power-producing cells having mixed cathode composition (Li/LiF--LiCl--KCl/S--As--C and Li/Se with cathode additives; patent), 977
Secondary cells with a lithium anode and salt melt (Patent; Li or alloy/$Li^+$ electrolyte/transition metal chalcogenide or oxide ($FeS_2$, $Cr_2S_3$, CuSe; high energy density), 1070
Secondary battery (Patent; Li, Na, Ca, or Al/propylene carbonate with $I^-$/Ag, Ni, Cu, or Pb halide), 1052
Secondary electrochemical power-producing cells having mixed cathode composition (Patent; alkali metal/alkali metal ions/chalcogen mixed with inhibitor of chalcogen activity (e.g. Se, S + Al, As, Pb, or Tl)), 979
Secondary electrochemical cell having non-consumable silicon cathode (Patent; $Zn/ZnBr_2/Si$ is preferred embodiment, but other constituents may be used), 844
Secondary battery or cell with dual electrode (Patent; alkali metal/S, usually Na/S), 842
Secondary battery with separate charge and discharge zones (Patent; alkali metal/sulfur), 832
Secondary cells with lithium anodes and immobilized fused-salt electrolytes (Bi or Te cathodes, LiF-LiCl-LiI paste electrolyte, liquid electrodes, 380° to 485°C, 360 W/lb, 80 Wh/lb), 1480
Sodium-halogen battery (Patent; operates at -48 to +20°C), 910
Sodium-mixture of metal halides, sulfur battery (Patent; Na/sodium haloaluminate/sulfur + mixed halides with dispersed C powder), 838
Sodium-sulfur type electric cell (Patent; cathode may also be P or Se, capable of complete recharging), 780
Solid-state reserve battery ($Ag/Ag_3SBr$/AuBr/sub 2.4+-0. 1/, 10 Wh/lb), 1296
Storage battery (Patent), 1284
Study of multiple reserve electrochemical power sources. Final report (Li/CuS, Li/Se, metal/$O_2$ cells), 686 (N-69-13030)
Zinc-bromide secondary cell (Patent; C anode, C or Zr cathode with ion exchange diaphragm between), 901
Zinc halide storage batteries ($Zn/Br_2$ with recirculating aqueous electrolyte), 2449

METAL-NONMETAL BATTERIES/EFFICIENCY

Nonaqueous lithium--bromine secondary galvanic cell, 2274

METAL-NONMETAL BATTERIES/ELECTRIC CONDUCTIVITY

Lithium sulfuryl chloride battery. Semiannual report, 1 Dec 1974-31 May 1975 (Replacing cathode of this primary battery renewed cell activity), 2015 (AD-A-018852)

METAL-NONMETAL BATTERIES/ELECTRIC CURRENTS

Lithium-titanium disulfide secondary battery (Saturated $LiPF_6$--propylene carbonate electrolyte;patent), 2203

METAL-NONMETAL BATTERIES/ELECTRIC POTENTIAL

Effect of brine level on the voltage of mercury-type chlor-alkali cells, 2257
Electrical energy storage and intercalation chemistry ($Li/TiS_2$ with $LiPF_6$ or $LiClO_4$ electrolyte: ambient temp), 865
Failure analysis of porous electrodes. Final report, 3101 (AD-912458)
Inorganic electrolyte based, room temperature, lithium/chlorine, sodium/chlorine, lithium/sulfur, sodium/sulfur, and lithium/cupric fluoride cells, 1358
Lithium-inorganic electrolyte batteries. Quarterly progress report No. 13, 1 January-31 March 1977 ($Li/SOCl_2$, voltage delay and depression after storage), 2028 (AD-A-041867)

METAL-NONMETAL BATTERIES/ELECTROCHEMISTRY

Copper sulfide electrodes in organic electrolyte solutions. I. Increase of the sulfide content in electrolytes by polyethers and Lewis acids (Li/CuS), 1087
Electrochemistry of lithium/metal sulfide and calcium/metal sulfide cells using molten salt electrolytes (Li/LiCl-KCl/sulfide and Ca/LiCl-KCl-$CaCl_2$/sulfide, 700 K), 2044 (CONF-770531-1)
Lithium anode limited-cycle battery investigation. Quarterly technical progress report No. 1 ($Li/CuF_2$, $Li/CoF_3$; goal of 1500 Ah and 300 Wh/lb), 272 (AD-463556)
Lithium-graphite secondary battery. Technical report ($Li/LiClO_4$, DMSU/graphite), 2022 (AD-A-035409)
Lithium-inorganic electrolyte batteries. Quarterly progress report No. 13, 1 January-31 March 1977 ($Li/SOCl_2$, voltage delay and depression after storage), 2028 (AD-A-041867)
Lithium-silver chloride secondary battery investigation. Quarterly technical progress report No. 2 (Nonaqueous electrolyte), 1647 (AD-450428)
Lithium-silver chloride secondary battery investigation. Quarterly technical progress report No. 2, 718 (PB-167327)
Lithium-silver chloride secondary battery investigation. Quarterly technical progress report No. 3, 1728 (AD-607968)
Lithium-water-air battery: a new concept for automotive propulsion (Modified lithium--water battery, mechanically rechargeable), 754 (UCID-16751)
Process for forming and storing halogen hydrate in a battery (Patent), 1217
Research and development of a high capacity, nonaqueous secondary battery. Final report, October 1964-December 1965 ($Li/CuF_2$, Li/AgCl), 2053 (N-66-35218)
Research on electrochemical parameters for nonaqueous batteries: task I. Quarterly progress report No. 3 ($Li/CuCl_2$), 530 (AD-874598)
Secondary lithium batteries (Brief sketch of development problems), 1238
Some aspects of lithium-copper compound cells in LiCl-KCl eutectic (Li/CuS), 798

METAL-NONMETAL BATTERIES/ELECTRODES

Bipolar electrode for secondary battery of high energy density (Patent), 3682
Cell element for electrical storage batteries (Patent; $PbO_2/Zn$), 3891
Compartmented electrode structure (Patent application), 3452
Development of lithium/sulfur cells for application to electric automobiles ($Li/LiCl$--$KCl/FeS_2$), 653 (CONF-740805-7)
Electric cell (Patent; $Zn/H_2NCONHSO_3H/C$, Ni/Zn, Fe/Zn, Cu/Zn), 1383
Electrode structure for electrical energy storage device (Patent; alkali metal/chlorides/transition metal chalcogenides), 3334
Fundamental battery studies. Quarterly report No. 4 (Pb cathode, graphite anode), 307 (AD-499471)
High-energy storage system (organic electrolyte). Quarterly report No. 3, 15 December 1965-15 March 1966 ($Li/CuF_2$), 340 (AD-634491)
Investigations of high energy density electrochemical systems. Part 3 - Development of the copper-fluoride-lithium couple for limited-cycle secondary batteries, 1540
Limited-cycle secondary battery using lithium anode. Final report ($Li/CuF_2$ and $Li/CoF_3$, sodium hexafluorophosphate in butyrolactone and propylene carbonate), 1721 (AD-601128)
Lithium battery with inorganic electrolyte. Quarterly progress report No. 2, 1 Feb-30 Apr 1972 ($Li/LiBCl_4$/cathode = sulfur, metals, metal halides, metal oxides, metal sulfides), 415 (AD-746633)

Lithium battery development. Annual report No. 3, 1 Apr 1970-31 Mar 1971, 397 (AD-726607)
Lithium-nickel fluoride secondary battery investigation. Final report, 27 April 1966-27 April 1968, 489 (AD-836554)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 2 ($Li/NiCl_2$), 314 (AD-601148)
Lithium-nickel halide secondary battery investigation. Final technical report, December 1963-December 1964 (Compatibility tests, recommendations for components), 2859 (AD-612492)
Method of preparing porous, active material for use in electrodes of secondary electrochemical cells (Patent application; carbonaceous matrices contain embedded active material), 3455
Porous carbonaceous electrode structure and method for secondary electrochemical cell (Patent), 3311
Research and development of a high-energy nonaqueous battery. Quarterly progress report No. 7, 18 Sep-18 Dec 1964 (Electrolyte properties and electrode kinetics), 249 (AD-359290)
Secondary battery or cell with composite electrode (Patent; separate portions of electrode optimized for charging and discharging), 3365
Structural, thermodynamic, and kinetic properties of solid electrodes, 3148 (ANL-76-8)

METAL-NONMETAL BATTERIES/ELECTROLYTES
Cell is used as energy source of wrist-watches (Patent), 3621
Composition of nonaqueous solutions of potential use in high energy density batteries. Final report, 15 Nov 1969-14 Nov 1972 (Solubility equilibria of $CuF_2$, $NiF_2$, $ZnF_2$, $CdF_2$, $AgF_2$), 432 (AD-763140)
Electrochemistry of molten salts (312 references), 4290
Electrolytes for non-aqueous batteries ($Li/LiClO_4$, propylene carbonate/$CuF_2$: electrolytic conductance), 4584
Galvanic cell with solid fluoride ion-conductive electrolyte (Patent; M/sub n/Pb/sub 1-n/F/sub 2-n/, where M is K or Rb, Pb is lead or lead alloy, F is fluorine, 300°C), 3398
High-energy system (organic electrolyte). Final report, 15 June 1965-14 June 1966 ($Li/CuF_2$ with electrolyte of $LiClO_4$ and propylene carbonate, dimethyl carbonate, or dimethyl sulfite), 349 (AD-639709)
High-energy system (organic electrolyte). Quarterly report No. 3, 15 December 1966-15 March 1967 ($Li/CuF_2$, study of tetramethylurea and 1,2-propylene glycol sulfite), 352 (AD-653785)
High-energy system (organic electrolyte). (Evaluation of new electrolytes), 2892 (AD-648920)
High temperature rechargeable cells with doped $CaF_2$ as a solid electrolyte ($Ca/CaF_2/CuF_2$, 3.37 V at 450°C), 615 (ANL-76-8)
Improvements of electrolyte and seal technology for sodium-sulfur and sodium antimony trichloride load leveling batteries. Final report, 3187 (EPRI-EM-413(6-77))
Investigations of high energy density electrochemical systems. Part 3 - Development of the copper-fluoride-lithium couple for limited-cycle secondary batteries, 1540
Ionic conductivity of solid and liquid $LiAlCl_4$, 3340
Lithium-anode limited cycle battery investigation. Annual report, Feb-Dec 1965 (Development of $Li/CuF_2$ and $Li/CoF_3$ batteries), 290 (AD-481543)
Lithium battery development. Annual report No. 3, 1 Apr 1970-31 Mar 1971, 397 (AD-726607)
Lithium battery research. Annual report No. 2, 1 April 1969-31 March 1970 ($Li/CdCl_2$, $Li/CuF_2$, Li/AgF with propylene carbonate), 526 (AD-870688)
Lithium battery research. Annual report No. 1, 1 April 1968-31 March 1969 (Li/halide, most promising were AgF, $CuF_2$ and $CdCl_2$), 515 (AD-854368)
Lithium cells based on silver salts as cathodes (Performances of $Ag_2CrO_4$, $Ag_3PO_4$, and $AgIO_3$ cathodes with different electrolytes), 3362
Lithium/chalcogen secondary cells for components in electric vehicular-propulsion generating systems. Interim technical summary report No. 3, May 23-November 22, 1970 (Se-Tl and S-Tl mixtures, fabrication of paste electrolytes), 2035 (ANL-7777)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 3, 27 October 1966-27 January 1967, 2995 (AD-808839)
Lithium-nickel fluoride secondary battery investigation. Supplement to quarterly technical progress report No. 3 (Propylene carbonate), 3004 (AD-816378)
Lithium-nickel fluoride secondary battery investigation. Final report, 27 April 1966-27 April 1968, 489 (AD-836554)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 2, 27 July-27 October 1966 ($NiF_2$ preparation; physical properties of electrolyte), 2986 (AD-803529)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 6, 27 July-27 October 1967 (Electrode porosities), 3013 (AD-824659)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 2 ($Li/NiCl_2$), 314 (AD-601148)
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 3 for period ending 15 Sep 1965 ($Li/NiCl_2$, doped electrodes), 2824 (AD-474394)
Lithium-nickel fluoride secondary battery investigation. Quarterly technical progress report No. 1, 27 Apr-27 Jul 1966, 2841 (AD-487828)
Lithium-nickel halide secondary battery investigation. Final technical report, December 1963-December 1964 (Compatibility tests, recommendations for components), 2859 (AD-612492)
Method for calculating the conductivity of simulated silver chloride-magnesium battery electrolytes (sea water-$MgCl_2$ solutions), 3052 (AD-860591)
Non-aqueous battery system (Lewis acid-type solute in nitrobenzene or substitutions; patent), 3381
Nonaqueous electrolyte systems. Interim report No. 2 (Li/Cu fluoride, AgCl, I, or potassium persulfate with $LiClO_4$ electrolyte in tetramethylene sulfoxide or dimethyl sulfite solvent), 478 (AD-826554)
Nonaqueous electrolyte studies for high energy batteries. Final report, 14 July 1966-13 Oct 1968 (Li/graphite in dimethyl sulfite and propylene carbonate solutions), 392 (AD-701411)
Properties of a solid electrolyte from β-alumina synthesized by a gas-flame method, 4098
Research and development of a high-energy nonaqueous battery. Quarterly technical report No. 3, 18 Sep-18 Dec 1963 ($Li/CuF_2$), 244 (AD-347494)
Research and development of a high-energy nonaqueous battery. Quarterly progress report No. 7, 18 Sep-18 Dec 1964 (Electrolyte properties and electrode kinetics), 249 (AD-359290)
Research for preparation of cation-conducting solids by high-pressure synthesis and other methods. Final report, 1 Aug 1973-28 Feb 1975, 3226 (N-75-24504)
Solid electrolytes (67 references), 4220
Solid sulfate electrolyte for batteries (Patent; Ag/Li, Na, Ag, Mg, Zn, or Ca sulfate/I), 3885
Thermodynamics of lithium and potassium iodide in anhydrous propylene carbonate, 4389

METAL-NONMETAL BATTERIES/FABRICATION
Aluminum--chlorine battery ($Al/AlCl_3$--NaCl/Cl, 2.55 V open circuit), 416 (AD-747775)
Building batteries for space (Li/AgCl, operate at -30 to 150°F), 1507
Cell with light metal anode (Halide cathode, nonaqueous Cl-containing electrolyte;patent), 1051
Flat alkaline cell construction and method for assembling the same (Patent), 1031
Hermetically sealed secondary battery with lanthanum nickel anode (Patent; Ni hydroxide/KOH/$LaNi_5$), 1010
High-energy system (organic electrolyte). Quarterly report No. 2, 15 September-15 December 1965 ($Li/CuF_2$), 336 (AD-630691)
Method for fabricating electrochemical cells (Na/Na chloroaluminate/Sb chloride; Patent), 868
Method for the fabrication of a high-temperature secondary cell (Patent; alkali metal negative electrode, ion-conducting separator, halide electrolyte), 827
Nonaqueous battery (Patent; Li/Li salt ($LiCF_3SO_3$, $LiClO_4$, $LiBF_4$) in dimethyl sulfide or propylene carbonate/graphite), 1160
Organic electrolyte batteries (Lithium--nickel halide battery in parallel with nickel--cadmium battery), 2536
Production and engineering methods for Carb-Tek (trademark) batteries in fork lift trucks. Interim report, Jul 1973-Jan 1974 (Li--Al/KCl--LiCl/C), 443 (AD-780940)
Production and engineering methods for Carb-Tek (trade name) batteries in fork-lift trucks. Final report, Jul 1973-Dec 1974 (Li-Al/KCl-LiCl/C), 573 (AD/A-006548)
Rechargeable nonaqueous batteries (Patent; $Li/LiClO_4$ in propylene carbonate/NbSe/sub 4+x/, x = 0 to 0.5), 784
Secondary battery with nonconsumable silicon cathode (Patent; Zn/Br with $RuO_2$- coated Si cathode; preparation), 1023

METAL-NONMETAL BATTERIES/FEASIBILITY STUDIES
Experimental aluminum-sulphur cell, 1124
Feasibility of creating a chemical current source based on the copper--sulfuric acid--lead(IV) oxide system, 2298
Lithium anode limited cycle battery investigation. Quarterly technical progress report No. 6 ($Li/CuF_2$), 298 (AD-489624)
Sulfur-based lithium-organic electrolyte secondary batteries. Quarterly report No. 3, 4 June-3 September 1974 (Li/organic electrolyte/Nb, Ti, V sulfides), 570 (AD/A-003309)

METAL-NONMETAL BATTERIES/IMPACT TESTS
Temperature and shock testing of lithium-organic electrolyte cells ($Li/LiAsF_6$ + $LiBF_4$ in methyl formate/$V_2O_5$, Honeywell G2655, performance from -40° to +70°C, shock levels up to 17,000 g's), 2109 (SAND-75-0536)

METAL-NONMETAL BATTERIES/MASS TRANSFER
Potential-time study of the mass transfer phenomena due to the lithium ions in non-aqueous electrolytes ($LiClO_4$ in propylene carbonate; concentration polarizations), 4422

METAL-NONMETAL BATTERIES/MATERIALS
Corrosion and compatibility of materials in inorganic oxyhalides ($Li/SOCl_2$--$LiAlCl_4$/C and $Li/SO_2Cl_2$--

$LiAlCl_4$/C cells, operate at ambient temperature), 4123
High-energy density lithium-nickel fluoride non-aqueous batteries, 1430
Limited-cycle secondary battery using lithium anode. Final report (Li/$CuF_2$ and Li/$CoF_3$, 4 to 15 Wh/lb), 313 (AD-601128)

METAL-NONMETAL BATTERIES/MEETINGS
Power sources 4: Research and development in non-mechanical electrical power sources; Proceedings of the Eighth International Symposium, Brighton, Sussex, England, September 24-26, 1972, 1300

METAL-NONMETAL BATTERIES/OPERATION
Zinc-halide battery with molten electrolyte (Patent; method for preventing dendrite formation during charging), 2191

METAL-NONMETAL BATTERIES/ORGANIC SOLVENTS
Lithium-nickel halide secondary battery investigation. Quarterly technical progress report No. 1 (1.24 Ah/in.$^2$), 255 (AD-433616)

METAL-NONMETAL BATTERIES/PERFORMANCE
Aluminum--hydrogen peroxide power source ($H_2O_2$-rich electrolyte substituted for air in Al--air battery), 1453
Bromine-zinc secondary cells, 1533
Chemical power for the electric car (Alkaline Ni K borate/Zr battery should achieve 48 Wh/kg), 1403
Commercial applications of advanced battery technology (Li/$NiF_2$ combined with Ni/Cd for electric cars), 5260
Development of lithium/sulfur cells for application to electric automobiles (Li/LiCl--KCl/$FeS_2$), 653 (CONF-740805-7)
Development of lithium/selenium secondary cells and batteries for implantation (Electrolyte = LiF--LiCl--LiI + $LiAlO_2$), 1421
Development of a potassium-sulfide glass fiber cell and studies on impurities in alkali metal-sulfur cells, 714 (N-77-23602)
ESB-Sohio Carb Tex/sup R/ molten salt cell (Li--Al/LiCl--KCl/C), 1095
Evaluation of rechargeable lithium-copper chloride organic electrolyte battery system. Technical report No. 2, March 1966-March 1967 ($LiAlCl_4$--propylene carbonate), 356 (AD-654451)
Failure analysis of porous electrodes. Final report (Ag/AgCl electrodes; output of Li/$LiClO_4$, DMSU/C, LiF cell), 3100 (AD-912458)
Feasibility of creating a chemical current source based on the copper--sulfuric acid--lead(IV) oxide system, 2298
High energy cells with a lithium electrode (Li/Cl-COO-$CH_3$/Cu chlorides), 1456
High-temperature batteries, 610 (ANL-76-8)
Homogeneous cathode mixtures for secondary electrochemical power-producing cells (Alkali metal/chalcogen; patent), 1189
Inorganic electrolyte solvents for alkali metal batteries (Patent; Li, Na, or K/C), 1277
Limited-cycle secondary battery using lithium anode. Final report (Li/$CuF_2$ and Li/$CoF_3$, sodium hexafluorophosphate in butyrolactone and propylene carbonate), 1721 (AD-601128)
Lithium--silver difluoride secondary battery (Development of Li/$AgF_2$ system), 1515
Lithium-anode limited cycle battery investigation. Final report, 1 January 1966-1 June 1967 (Li/$CuF_2$ with $LiClO_4$-propylene carbonate electrolyte, 30 V, 25 Ah, 50 Wh/lb, improved $CuF_2$ utilization), 467 (AD-821051)
Lithium battery with inorganic electrolyte. Final report, 1 Dec 1971--31 May 1973 (Li/Cl cells with halogen/Pt halogen/graphite, nonmetallic and metallic cathode systems), 2068 (N-74-12745)
Lithium battery with inorganic electrolyte. Quarterly progress report No. 2, 1 Feb-30 Apr 1972 (Li/$LiBCl_4$/cathode = sulfur, metals, metal halides, metal oxides, metal sulfides), 415 (AD-746633)
Lithium batteries, 2171
Lithium/chalcogen secondary cells for components in electric vehicular propulsion generating systems. Interim technical summary report No. 5, 23 May-22 Nov 1971 (Li/LiF--LiCl--KCl/(S+Se)), 1810 (AD-741801)
Lithium/selenium secondary cells for components in electric vehicular-propulsion generating systems. First semiannual technical summary report, May 23-November 22, 1969 (Up to 2 W/cm$^2$, 10 cycles), 2034 (ANL-7663)
Lithium/selenium secondary battery for imp.antation. Annual technical progress report No. 1, 23 June 1969-22 June 1970 (10 W, 120 Wh, 1.1 kg, LiF-LiCl-LiI + $LiAlO_2$ electrolyte), 719 (PB-202374)
Lithium-silver chloride secondary battery investigation. Final report, December 1963-November 1964, 322 (AD-612189)
Lithium-silver chloride secondary battery investigation. Quarterly technical progress report No. 3, 1728 (AD-607968)
Lithium-water-air battery: a new concept for automotive propulsion (Modified lithium--water battery, mechanically rechargeable), 754 (UCID-16751)
Lockheed electric power source (Na or Li/$H_2O$), 2388
Metadinitrobenzene-zinc cell performance in ammonia-methanol-ammonium thiocyanate electrolyte, 1899 (AD-866617)
New lithium nonaqueous secondary battery (Li/LiI/dichalogenide), 1305
Organic electrolyte, high energy density batteries: status report (Li/metal halides), 1508
Organic electrolyte batteries (Lithium--nickel halide battery in parallel with nickel--cadmium battery), 2536
Organic electrolyte battery with high energy density (Li/$LiBf_4$/fluorinated graphite; patent), 990
Preparation of highly conductive β-alumina and electrochemical measurements ($Na/\beta-Al_2O_3/Na_2O$. $11(FeAlO_3)$), 4214
Rechargeable lithium-sulfur battery. Executive summary, progress through 1973 (Metal sulfide cathodes, LiCl--KCl electrolyte), 604 (AI-74-55)
Rechargeable calcium high-temperature cells ($CaAl_4$, $CaAl_2$, or $Ca_2Si$/FeS with $CaCl_2$-NaCl or $CaCl_2$-LiCl-KCl electrolyte), 2031 (ANL-76-8)
Research and development of a high-energy nonaqueous battery. Quarterly technical report No. 4, 18 Dec 1963-18 Mar 1964 (Improvement in performance characteristics of components), 246 (AD-352854)
Research and development of a high-energy nonaqueous battery. Final report, 18 Mar 1963-18 Mar 1965 (Li/$CuF_2$; goals of 100 Wh/lb, 7.5 Wh/in.$^3$, greater than 10 kW for 5 min), 250 (AD-369426)
Secondary cells using lithium anodes and sulfur--selenium-thallium cathodes (Li/LiF--LiCl--KCl/(S + Se), paste and liquid electrolytes), 1350
Secondary cells with lithium anodes and paste electrolytes (Emphasis on Li/LiF--LiCl--LiI/Li in Se and (Se + Te)), 1452
Secondary battery based on the copper(II)--(I) and (I)--(0) couples in acetonitrile ($Cu/CuClO_4$, AN//$Cu(ClO_4)_2$, $CuClO_4$, AN/C, where AN is asetonitrile), 1205
Secondary batteries with molten alkali metal anodes (Patent; 50 to 150 W-hr/lb, Na/$NaAlCl_4$/C), 1072
Secondary cells with lithium anodes and immobilized fused-salt electrolytes (Li/Bi and Li/Te), 2483
Secondary, nonaqueous solvent battery (Li/$LiClO_4$-dimethyl sulfite/graphite), 1404
Secondary cells with lithium anodes and immobilized fused-salt electrolytes (Bi or Te cathodes, LiF-LiCl-LiI paste electrolyte, liquid electrodes, 380° to 485°C, 360 W/lb, 80 Wh/lb), 1480
Solid-state electric batteries (Patent; alkaline earth metal/transition metal fluoride with electrolyte formed by chemical reaction in situ), 1171
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 October-31 December 1969 (Mg/C, discharge characteristics; Fe/O), 693 (N-70-25303)
Zinc halide storage batteries (Zn/$Br_2$ with recirculating aqueous electrolyte), 2449
Zinc-polybromide batteries, 1100

METAL-NONMETAL BATTERIES/PERFORMANCE TESTING
Advanced lithium-water battery for electronic countermeasure devices. Report for 1 November 1972-1 November 1973 (Development studies on electrolytes and cathodes), 441 (AD-778825)
Ambient temperature electric vehicle batteries based on lithium and titanium disulfide, 5063
Development of high-specific-energy batteries for electric vehicles. Progress report, August 1973-January 1974 (Li--$FeS_2$ with lithium halide-containing electrolyte), 633 (ANL-8058)
Development of a lightweight secondary battery system (Li, Li ion/Li salt in organic solvent/quinone, Li salt of hydroquinone), 243 (AD-290326)
Evaluation of rechargeable lithium-copper chloride organic electrolyte battery system. Technical report No. 1, March-September 1966 ($LiAlCl_4$ in propylene carbonate), 1743 (AD-643378)
Experimental aluminum-sulphur cell, 1124
Investigations of high energy density electrochemical systems. Part 3 - Development of the copper-fluoride-lithium couple for limited-cycle secondary batteries, 1540
Lithium/calcogen secondary cells for components in electric vehicular propulsion generating systems. Interim technical summary report No. 3, 23 May-22 November 1970 (Se, Se--Ti, S--Ti), 533 (AD-880894)
Lithium sulfuryl chloride battery. Semiannual report, 1 Dec 1974-31 May 1975 (Replacing cathode of this primary battery renewed cell activity), 2015 (AD-A-018852)
New cathode material for high-energy-density batteries. Final report, 1 Sep 1972--30 Jun 1973 (Li/fluorides), 440 (AD-777857)

METAL-NONMETAL BATTERIES/PLANNING
Advanced design battery power source for aircrew survival transceivers and beacons. Interim technical report, March 1968-August 1969 (Screening of Li/$CdF_2$, Li/$ZnF_2$, and Li/Ag sulfide couples), 519 (AD-861947)
Lithium anode limited-cycle secondary battery. Quarterly technical progress report No. 3 (Li/$CuF_2$, Li/$CoF_3$, goal of 22 to 30 V, 300 Wh/lb), 254 (AD-433543)
Sodium chloride battery development program for load leveling. Interim report, 1 Apr-31 Dec 1974 (Na/β-alumina/Na chloroaluminate), 726 (PB-243872/9ST)

METAL-NONMETAL BATTERIES/PRODUCTION
Production and engineering methods for Carb-Tek (trade name) batteries in fork lift trucks. Final report, July 1973-December 1974 (Li-Al/KCl-LiCl/C with $TeCl_4$ additive), 574 (AD/A-006548)

Production and engineering methods for Carb-Tek (trade name) batteries in fork lift trucks. Interim report Sep 1974-Feb 1975 (Molten salt Li/Cl), 584 (AD-A-018106)
Production and engineering methods for Carb-Tek (trade name) batteries in fork lift trucks. Interim report Mar 1975-Mar 1976, 591 (AD-A-035983)
METAL-NONMETAL BATTERIES/RESEARCH PROGRAMS
Development of high-specific-energy batteries for electric vehicles. Progress report, August 1972-January 1973, 628 (ANL-7998)
High-energy battery program at Argonne National Laboratory (Li--Al/LiCl--KCl/$FeS_2$), 634 (ANL-8064)
High-performance batteries for off-peak energy storage. Progress report for the period January-June 1973 (Li--Al/LiCl--KCl/S--As--C), 630 (ANL-8038)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-March 1976 (Li-Al/LiCl-KCl/FeS or $FeS_2$; some work on $CaAl_2$, $Ca_2Si$, and Mg anodes and FeS, $Fe_3O_4$, and $FeS_2$ cathodes; ANL), 619 (ANL-76-35)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, April-June 1976 (Li-Al/LiCl-KCl/FeS or $FeS_2$, operate at 400 to 450 C; some work on Na/$FeS_2$ and $CaMg_2/CaCl_2$-$LiCl_2KCl$/FeS cells), 621 (ANL-76-81)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period July-September 1976 (Li-Al/Kcl-LiCl/Fes or $FeS_2$; tests of Li/$TiS_2$, Na/$FeS_2$, and $CaMg_2$/FeS cells), 622 (ANL-76-98)
Lithium/chalcogen secondary cells for components in electric vehicular-propulsion generating systems. Interim technical summary report No. 4, November 23, 1970-May 22, 1971 (ANL), 627 (ANL-7863)
Lithium/chalogen secondary cells for components in electric vehicular-propulsion generating systems. Interim technical summary report No. 5, May 23, 1971-November 11, 1971, 629 (ANL-7999)
Lithium/selenium secondary cells for components in electric vehicular-propulsion generating systems. Interim technical summary report No. 2, November 23, 1969-May 22, 1970 (ANL), 626 (ANL-7745)
Lithium-water-air battery project: progress during the month of May 1976 (Study of Li/Br analog), 756 (UCID-17426-76-5)
Lithium-water-air battery project: progress during the month of October 1976 (Characterization of Li/$I_2$ and Li/$Br_2$ batteries), 3269 (UCID-17426-76-10)
METAL-NONMETAL BATTERIES/REVIEWS
Solid state battery systems (Ag/$RbAg_4I_5$/$RbI_3$ and Li/LiI(doped)/$PbI_2$), 183
METAL-NONMETAL BATTERIES/SEALS
Alkaline battery seal and protective coating comprising a fatty acidamide (Patent), 3484
Improvements of electrolyte and seal technology for sodium-sulfur and sodium antimony trichloride load leveling batteries. Final report, 3187 (EPRI-EM-413(6-77))
Seal for energy conversion devices (Patent), 3377
METAL-NONMETAL BATTERIES/SPECIFICATIONS
High energy lithium battery system in electric vehicle propulsion (Li/$NiF_2$ and Ni/Cd in hybrid system), 5264
Lithium batteries, 2171
METAL-NONMETAL BATTERIES/STORAGE LIFE
Sealed primary lithium-inorganic electrolyte cell. Quarterly report No. 7, 1 Sep-30 Nov 1975, 2019 (AD-A-023437)
METAL-NONMETAL BATTERIES/TESTING
Aluminum--chlorine battery (Al/$AlCl_3$--NaCl/Cl, 2.55 V open circuit), 416 (AD-747775)
Characteristics of a tellurium-lithium/aluminum battery (LiAl/KCl--LiCl/C with Te halide additive), 1396
Characteristics of a tellurium-lithium/aluminum battery (Li-Al anode/KCl-LiC/C cathode with Te tetrachloride additive, 36 W-hr/lb), 1400
Lithium/chalcogen secondary cells for components in electric vehicular-propulsion generating systems. Interim technical summary report No. 3, May 23-November 22, 1970 (Se-Tl and S-Tl mixtures, fabrication of paste electrolytes), 2035 (ANL-7777)
Lithium-nickel fluoride secondary battery investigation. Final report, 27 April 1966-27 April 1968, 489 (AD-836554)
Sealed cadmium-silver oxide batteries, 1547
METAL-NONMETAL BATTERIES/THERMAL TESTING
Temperature and shock testing of lithium-organic electrolyte cells (Li/$LiAsF_6$ + $LiBF_4$ in methyl formate/$V_2O_5$, Honeywell G2655, performance from -40° to +70°C, shock levels up to 17,000 g's), 2109 (SAND-75-0536)
METAL-NONMETAL BATTERIES/USES
MARS II electric car (Pb/Co battery; 60 mph, 70 to 120 mi, recharged to 80 percent capacity in 46 min), 5265
Superconducting motors and lithium-water batteries for torpedo propulsion. Technical note, 4851 (AD-A-031704)
METHANE/INFORMATION
Homegrown energy: power for the home and homestead, 145
METHANE/PRODUCTION
RANN utilization experience (case studies 22 through 31). Final report, 738 (PB-263682)
MHD CHANNELS/ELECTRICAL INSULATION
High-temperature insulation, 4386
MHD GENERATORS
Advanced electrical power generation and distribution concepts for military facilties, 433 (AD-765476)
Comeback for Reddy Kilowatt (Descriptive review article on alternative means of power generation), 185
Defense Research Institute briefing on current sources (stromkallor). Edited translation, 57 (AD-806927)
Energy sources of future, 226
Transactions of the Seventh World Energy Conference, Moscow, 1968. Volume 13. Section C4. New Sources and methods of producing electricity, 208
MHD GENERATORS/BIBLIOGRAPHIES
Applied research programs abstract bulletin, flight vehicle power and materials. Volume II, Part I. Abstracts 2-122 through 2-207, 24 (AD-609098)
Applied research programs abstract bulletin, flight vehicle power and materials. Volume II, Part I. Abstracts 2-1 through 2-81, 22 (AD-605699)
Applied research management. Abstract bulletin, abstracts 1-1448 through 1-1552, 10 (AD-448091)
Space vehicle (missile) power supplies. An annotated bibliography, 28 (AD-666251)
MHD GENERATORS/INVERTERS
Ac/dc power conditioning and control equipment for advanced conversion and storage technology. Key phase report No. 1, 3259 (PB-247217)
MHD GENERATORS/PERFORMANCE
Investigation of electrical power sources for missile-borne applications (1 to 10 kW), 1662 (AD-459406)
Research and investigation on satellite attitude control. Part III. Power sources, 1677 (AD-469206)
MHD GENERATORS/RESEARCH PROGRAMS
Project MALLARD. Communications plan and proposals for research and development. Volume IV. Technical background and constraints. Section 1, Annex A, Appendix 16, power sources. Final report on Phase 1, 58 (AD-812841L)
RCA's role in direct energy conversion (Solar cells, MHD, batteries, and thermionics), 679 (N-64-19376)
MHD GENERATORS/REVIEWS
Brief study of rocket-powered magnetohydrodynamic generators and energy-storage devices, 5 (AD-251281)
Spaceborne sources of electric power, 177
MHD GENERATORS/SPACECRAFT POWER SUPPLIES
Electric power generation (Batteries, solar cells, thermoelectric and MHD generators, fuel cells, and thermionic converters for space vehicles), 4976 (N-64-32767)
Spaceborne sources of electric power (Book, in Russian), 176
MICROWAVE EQUIPMENT/NICKEL-CADMIUM BATTERIES
dc charger and recondition charger for tellurometer batteries, 3055 (AD-863309)
MILITARY EQUIPMENT/POWER SUPPLIES
Preliminary survey of mobile electric power sources for application to rapid warning system (BIO), Army 75-80, 63 (AD-886125L)
Quarterly progress notes, 1 July 1974-30 September 1974 (Power supplies for military applications and for satellites), 597 (AD-B-002753)
MINES
See also COAL MINES
MINES/ELECTRIC-POWERED VEHICLES
Selection, design, construction, and performance of approved type battery mining locomotives, 5316
MISSILES/ELECTRIC BATTERIES
Astronautics flight proofing test report for telemetering battery, Yardney secondary type, missileborne, 1865 (AD-830943)
Astronautics flight proofing test report for telemetering battery, Cook secondary type, missileborne, 1868 (AD-832071)
Diode control research. Quarterly technical progress report No. 1, 1 Jun-1 Sep 1966, 2844 (AD-489882)
Engineering evaluation test report, cartridge, gas generator electronic battery, 1936 (AD-905944L)
Engineering evaluation test report: Destruct battery, 1910 (AD-900696L)
Guided missile batteries: an annotated bibliography (243 references), 15 (AD-478826)
Survey of power sources, 229
TOW. Monthly technical report No. 118, 1-31 May 1972, 3075 (AD-900561L)
MISSILES/LEAD-ACID BATTERIES
Lead-calcium sulfuric acid batteries and their application to Minuteman. Technical report, Nov 1964-Jun 1965, 1685 (AD-471769)
Power for underwater vehicles and systems, 5315
MISSILES/LITHIUM-COPPER CHLORIDE BATTERIES
Research and development of a high-energy nonaqueous battery. Final report, 18 Mar 1963-18 Mar 1965, 250 (AD-369426)
MISSILES/METAL-NONMETAL BATTERIES
Research and development of a high-energy nonaqueous battery. Final report, 18 Mar 1963-18 Mar 1965, 250 (AD-369426)
MISSILES/NICKEL-CADMIUM BATTERIES
Electrochemical energy sources, 2618
Power for underwater vehicles and systems, 5315
MISSILES/POWER SUPPLIES
Space vehicle (missile) power supplies. An annotated bibliography, 28 (AD-666251)

MISSILES/SILVER-CADMIUM BATTERIES
Power for underwater vehicles and systems, 5315
MISSILES/SILVER-ZINC BATTERIES
Battery, 28 volt, remotely activated, hermetically sealed, dual section, 1644 (AD-448165)
Battery assembly, missile electrical power subsystem, GAM-87A, 1621 (AD-355102)
Chemical heating for automatically activated batteries, 1528
Dry process divalent silver oxide electrodes, 2882 (AD-640053)
Electrochemical energy sources, 2618
Initial report of evaluation of sealed silver oxide-zinc batteries, 1639 (AD-441821)
Power for underwater vehicles and systems, 5315
Silver oxide batteries: present and future, 369 (AD-671685)
Silver-zinc missile power supply. Quarterly technical progress report No. 5, 1 July-1 October 1966 on Phase 1, 456 (AD-804558)
Silver-zinc missile power supply. Quarterly technical progress report No. 6, 1 October-31 December 1966, 459 (AD-811343)
Silver-zinc missile power supply. Quarterly progress report No. 7, 1 January-31 March 1967, 461 (AD-814021)
Silver-zinc power supply. Quarterly progress report No. 8, 31 March-30 June 1967 on Phase 2B, 465 (AD-819494)
Silver-zinc missile power supply. Quarterly progress report No. 9, 30 June-30 September 1967 (95 V), 471 (AD-823190)
Silver-zinc missile power supply. Quarterly technical progress report No. 10, 1 October 1967-1 January 1968 (95 V, 200 Wh), 485 (AD-831452)
Silver-zinc missile power supply. Quarterly technical progress report No. 3, 1 Jan-31 Mar 1966, 291 (AD-482897)
Silver-zinc missile power supply. Quarterly technical progress report No. 4, 1 Apr-30 Jun 1966, 297 (AD-488983)
Silver-zinc battery characteristic report, 2021 (AD-A-027770)
Standard Agena program load sharing characteristics between IH, IC, ID, and VI cells and capacity testing on IH cells. Final report, 1710 (AD-488119)
MOLTEN SALTS/ELECTROCHEMISTRY
Electrochemistry of molten salts (312 references), 4290
Molten-salt electrolytes-transport properties, 2540
MOLTEN SALTS/POLARIZATION
Migrational polarization in high-current density molten salt electrochemical devices, 658 (CONF-770531-6)
MOLYBDENUM OXIDES/REDUCTION
Discharge reaction mechanism of the $MoO_3$ electrode in organic electrolytes, 3306

N

NERVA NUCLEAR ROCKET ENGINE
See NERVA REACTOR
NERVA REACTOR/ALTERNATORS
Engine electrical power source, trade study 419, 5022 (TID/SNA-581)
NERVA REACTOR/ELECTRIC BATTERIES
Engine electrical power source, trade study 419, 5022 (TID/SNA-581)
NERVA REACTOR/FUEL CELLS
Engine electrical power source, trade study 419, 5022 (TID/SNA-581)
NEUTRONS/ELASTIC SCATTERING
Neutron scattering studies of solid electrolytes, 3165 (BNL-21367)
NEUTRONS/INELASTIC SCATTERING
Neutron scattering studies of solid electrolytes, 3165 (BNL-21367)
NICKEL/FABRICATION
Production of porous membranes for batteries and fuel cells, 4620
Production of porous nickel for alkaline-battery and fuel-cell electrodes: practical and economic considerations, 4611
NICKEL/OXIDATION
Electromagnetic monitoring of the degree of oxidation of powder-metallurgy nickel [for electrodes for alkaline batteries], 4130
NICKEL/SINTERING
Electrolytic sintering of nickel powder, 4489
NICKEL ALLOYS
See also NICKEL BASE ALLOYS
NICKEL ALLOYS/FABRICATION
Mixed powder hydrogen electrode (Al-Ni alloy), 4597
NICKEL ALLOYS/SORPTIVE PROPERTIES
Absorption and desorption rates of $H_2$ and $D_2$ for $LaNi_5$, $LaCo_5$, $LaNi_2Co_3$, and FeTi. Interim report, 3143 (AD-A-039518)
Chemical storage of hydrogen in Ni/$H_2$ cells, 4046
Heat transfer analysis of metal hydrides in metal-hydrogen secondary batteries, 3462
Investigation of metal hydride materials as hydrogen reservoirs for metal-hydrogen batteries, 3233 (N-76-27667)
NICKEL BASE ALLOYS/CHEMICAL REACTION KINETICS
Nickel based alloys as electrocatalysts for oxygen evolution from alkaline solutions, 3166 (BNL-22275)
NICKEL COMPLEXES/FABRICATION
Suspension containing carbonyl nickel, binder, and a solvent for a powder-metallurgical base of an alkaline battery nonlamellar electrode (Patent), 3893
NICKEL COMPOUNDS/CHEMICAL PREPARATION
Investigation toward the development of carbonyl nickel powder suitable for the manufacture of sintered nickel plaques for use in alkaline storage batteries, 2873 (AD-622916)
NICKEL FLUORIDES/CHEMICAL PREPARATION
Production of nickel fluoride (Patent; for lithium-nickel fluoride batteries), 3953
NICKEL FLUORIDES/SOLUBILITY
Composition of nonaqueous solutions of potential use in high energy density batteries. Final report, 15 Nov 1969-14 Nov 1972 (Solubility equilibria of $CuF_2$, $NiF_2$, $ZnF_2$, $CdF_2$, $AgF_2$), 432 (AD-763140)
NICKEL HYDRIDES/SORPTIVE PROPERTIES
Low pressure nickel hydrogen cell (Patent), 3880
NICKEL HYDROXIDES/OXIDATION
Optical study of the growth and oxidation of nickel hydroxide films, 2967 (AD-761281)
NICKEL OXIDES/CHEMICAL REACTIONS
Electrochemical processes on nickel oxide, 2902 (AD-667607)
NICKEL OXIDES/CRYSTAL STRUCTURE
Reduction of oxtgen on nickel-cobalt oxides. II. Correlation between crystal structure and activity of $Co_2NiO_4$ and related oxides, 4141
NICKEL OXIDES/FABRICATION
Reduction of oxygen on nickel-cobalt oxides. I. The influence of composition and preparation method on the activity of nickel-cobalt oxides, 4142
NICKEL OXIDES/SURFACE PROPERTIES
Surface analysis of pyrotechnic material, 3190 (GEPP-324)
NICKEL-CADMIUM BATTERIES
Coated nickel electrodes, 4419
Summary on miniature Ni--Cd batteries, 45 (AD-713047)
NICKEL-CADMIUM BATTERIES/ANODES
Alkaline cadmium anode studies. Research and development technical report, 2942 (AD-732830)
Analysis of porous alkaline cadmium electrodes. I. Anodic high rate transients, 4095
Analysis of porous alkaline cadmium electrodes. II. Potential recovery transients after a period of discharge (Influence of porosity), 4096
Analysis of porous alkaline cadmium electrodes. III. Application of charge porosity diagrams in electrode design, 4097
Analysis of porous alkaline cd-electrodes. IV. Optimization of current efficiency, 3547
Anode for nickel--cadmium batteries (Patent; Ni-plated nylon fabric coated with $H_2O$, CdO dextrose, and ethylene glycol), 3617
Anode of alkaline storage battery (Patent; Cd with 1 to 5 percent of a nitrate), 3599
Anodes for alkaline storage batteries (Patent; 165 mAh/g, 700 mAh/cm³), 3608
Anodic passivation by ''CdO'' studied by ESR (Aqueous KoH), 3570
Cadmium anodes for alkaline batteries (Patent; fabrication method for improved mechanical strength), 3670
Cadmium anodes for alkaline cells (Patent), 3671
Cadmium anode for alkaline storage batteries (Patent; fabrication), 3618
Cadmium anode for alkaline batteries (Patent), 3587
Cadmium-containing active material for negative electrodes of alkaline storage batteries (Patent; chemical preparation), 4343
Cadmium electrodes (Preparation;patent), 3666
Cadmium electrodes, 4167
Cadmium fibers and galvanic cell anodes made from them (Patent; prepared by electrolysis of electrolyte of Cd salt), 3578
Cadmium migration in aerospace nickel cadmium cells, 2095 (N-76-24703)
Cadmium paste electrodes for alkaline cells (Patent), 3643
Cell having anode containing silver additive for enhanced oxygen recombination (Patent), 3647
Change of the electrolyte concentration in metalloceramic cadmium electrodes of alkaline storage battery, 4034
Charging behavior of cadmium hydroxide electrodes at low temperatures, 4563
Commutator bar-free cadmium electrode for an alkaline battery (Patent), 3507
Controlled potential reactions of cadmium and silver in alkaline solution, 2645
Current-density effects in single-pore electrodes, 3046 (AD-854593)
Current distribution and pH gradients in a model of a battery plate, 4418
Cyclic charge-discharge behaviour of sintered plate and planar cadmium electrodes, 3449
Cylindrical nickel--cadmium battery (Patent; anode = substrate posted with CdO, electroconductive material, $H_2O$, organic solvent, and binder), 985
Depths of discharge for accelerated life tests of cadmium electrodes. Special technical report, 2951 (AD-743017)

Direct electrochemical reduction of cadmium oxide in alkaline electrolyte, 4089
Dissolution and passivation of metals in alkaline solutions in the presence of surfactants, 4137
Distribution of the active mass on the power-metallurgical anode of nickel--cadmium batteries, 4104
Effect of state-of-charge of cadmium electrode on oxygen recombination in sealed nickel-cadmium cells, 2592
Effect of the method of production on the capacity of sintered nickel electrodes for alkaline electric storage batteries, 4396
Effects of charge rate and cycling on the morphology of Cd and $Cd(OH)_2$ in sintered plate electrodes, 3392
Electrochemically active cadmium composition for battery elements (Patent), 3575
Electrochemical impregnation of sintered nickel structures with cadmium using constant current step and alternating-current pulse techniques. Interim report, Jan 1971-Jun 1974 (9.8 Ah/in.$^3$, retained 80% of capacity after 750 cycles at 100% depth of discharge), 3121 (AD-A-013931/1ST)
Electrochemical engineering of battery systems. Final report, 10 Nov 1971-9 Nov 1972 (Changes in diffusely reflected light from electrode monitor battery performance), 1970 (AD-914248)
Electrochemically active cadmium mass for galvanic elements (Patent), 3576
Electrochemical engineering of battery systems. Final report, 10 Nov 1971-9 Nov 1972 (Monitoring by changes in diffusely reflected light from electrodes), 3105 (AD-914248)
Electrode phenomena of cadmium in alkaline battery: discharge mechanism, 4695
Electron microbeam probe analyses of nickel-cadmium battery plates, 4564
Exchange reaction at polycrystalline cadmium electrodes. I, 2471
Formation of porous metal plates by electrolytic reduction, 4680
Forming a high surface area metallic cadmium powder and an electrode therefrom (Patent), 3580
High-rate battery electrodes (Performance of plates produced by electrolytic reduction), 4550
Impregnation of electrodes for nickel cadmium batteries (Patent), 3421
Improvement of the technology of sintered cadmium [battery] electrodes, 4067
Investigations into the mechanism of capacity loss by porous cadmium electrodes during cycling, 3830
Investigation of new cell components for vented nickel-cadmium batteries. Technical report, 3124 (AD-A-017117)
Manufacturing variables (20 Wh/lb), 768 (X-711-77-28)
Mechanisms of self-discharge of negative of alkaline accumulators, 4751
Method of incorporating an electro-chemically active cadmium compound into a porous nickel plaque (Patent), 4715
Morphology and capacity of a cadmium electrode, 4198
Oxygen reduction on porous cadmium electrodes of alkaline accumulators, 3402
Paste type cadmium anodes for alkaline batteries (Patent; CdS base, mixed with $H_2O$, $H_2O$-miscible organic solvent, and binder), 3645
Porous cadmium metal for alkaline storage batteries (Patent; Cd powder + urea heated and washed), 3606
Preparation of cadmium electrodes (Patent), 3943
Preparation and structure of electrodeposited sponge cadmium electrodes, 4488
Pressed-type alkaline storage battery. V. Addition of antimony to the negative active material of the pressed-type nickel-cadmium storage battery, 4306
Producing porous metal structures for battery electrodes (Patent; Zn, Cd), 4254
Production of a cadmium electrode for the alkaline storage battery (Patent), 3998
Reasons for changes in the characteristics of hermetic nickel--cadmium storage batteries under long-term operation (Formation of $Cd_{21}Ni_5$ in anode, gas adsorption rate instability, shorting, case corrosion), 2233
Reasons for the poisoning effect of small quantities of some impurities on the cathode reduction process for metal oxides and hydroxides in an alkali solution, 4134
Rechargeable cell having improved cadmium negative electrode and method of producing same (Patent), 3649
Rechargeable cell having improved cadmium negative electrode and method of producing same (Patent), 3582
State-of-the-art alkaline cadmium anodes (0.30 A-hr/g), 2916 (AD-680169)
Trial preparation of negative plates of pressed-type alkaline storage battery (CdO, $Cd(O)_2$, polyethylene and polyethylene oxide), 4540
Use of nickel hydroxide in pressed plate electrodes (Patent), 3686

NICKEL-CADMIUM BATTERIES/BATTERY CHARGERS

Automatic charger for nickel-cadmium batteries, 3483
Battery chargers and nand crank generators, 4553
Battery charger PP-7041( ). Final report, 30 Apr 1974-31 Jan 75, 3118 (AD-A-009116)
Battery charger PP-4126( )/U. Final report, 1 Jul 1971-Jun 1974, 3120 (AD-A-013364)
Cd-Cd coulometer controls battery charge (Prevents overcharging), 4542
Cell equalization techniques. Quarterly technical progress report, 1 Jan-1 Mar 1964, 2790 (AD-435833)
Cell equalization techniques. Quarterly technical progress report, 1 Apr-1 Jul 1964 (Stabistors for charge control), 2794 (AD-443065)
Cell equalization techniques, 1664 (AD-461856)
Cell equalization techniques. Quarterly technical progress report No. 1, 1 Feb-1 May 1965 (Stabistor as charge control device), 2807 (AD-465239)
Cell equalization techniques. Quarterly technical progress report No. 2, 1 May-1 Aug 1965 (Stabistors as charge control devices), 2811 (AD-467872)
Cell equalization techniques. Quarterly technical progress report No. 3, 1 Aug-1 Nov 1965 (Stabistor for charge control), 2823 (AD-474282)
Cell equalization techniques. Final technical report, Feb 1965-Feb 1966 (Charge control of Ni/Cd cells by stabistor composed of forward-biased diodes), 2837 (AD-482052)
Cell equalization techniques. Quarterly technical progress report No. 3, 1 Jul-1 Oct 1964 (5 to 20 Ah), 2855 (AD-609895)
Characteristics of sealed nickel-cadmium rechargeable batteries ''PANANICA'', 2444
Charge control devices. 4. Coulometric control of charging of Ni-Cd secondary batteries, 2994 (AD-807067)
Charge-current control circuit for nickel-cadmium cells with control electrodes. Final report, 2804 (AD-462426)
Charger/analyzer for battery maintenance, 4051
Charging nickel--cadmium and lead--acid batteries from common generator, 4270
Controls for charging secondary cells, 4474
dc charger and recondition charger for tellurometer batteries, 3055 (AD-863309)
Demand pulse charging for nickel--cadmium batteries, 4472
Design and fabrication of sounding rocket payloads. Final report, 1 Jan 1970-31 May 1972, 2957 (AD-745977)
Development of an aircraft battery conditioner/analyzer. Final report, 19 June 1972-18 December 1973, 3116 (AD/A-005055)
Development of an aircraft battery conditioner/analyzer. Final report, 9 June 1972-18 December 1973, 3117 (AD/A-005055/9ST)
Diode control research. Quarterly technical progress report No. 2, 1 September-1 December 1966 (Solid-state charge control system), 2988 (AD-805146)
Diode control research. Quarterly technical progress report No. 3, 1 December 1966-1 March 1967, 2998 (AD-810831)
Diode control research. Quarterly progress report No. 5, 1 June-1 September 1967 (Stabistor diodes for control of battery charging), 3009 (AD-821811)
Diode control research. Quarterly technical progress report No. 4, 1 March-1 June 1967 (Stabistor diode charge control system), 3011 (AD-822337)
Diode control research. Quarterly technical progress report No. 11, 1 December 1968-1 March 1969 (Testing of 12-Ah battery with automatic charge-control by means of stabistor diodes), 3045 (AD-854317)
Diode control research. Final report, May 1966-15 July 1969 (Method for fast evaluation of cells for use in stabistor diode-controlled batteries capable of high-rate charging), 3054 (AD-861077)
Diode control research. Quarterly technical progress report No. 1, 1 Jun-1 Sep 1966, 2844 (AD-489882)
Fast charging techniques for mass charging of nickel--cadmium batteries. Technical report, 3074 (AD-896566L)
Fast charging systems for NiCd batteries, 4535
High rate battery charger system, 4524
Improvement to automatic NiCd battery charger, 3450
Investigation of unregulated converters as battery charges in A-6 aircraft. Report No. 1 (final), Nov 1971-Jun 1972, 3086 (AD-905612L)
Investigation of maintenance-free high-rate, nickel-cadmium batteries for aircraft application. Quarterly technical progress report No. 7, 1 September 1967-29 February 1968, 484 (AD-831150)
Investigation of maintenance-free, high-rate, nickel-cadmium battery power system for aircraft application. Quarterly technical progress report No. 8, 1 March-31 May 1968 (Breadboard circuit tested from -40 to +140 F) 490 (AD-837598)
Investigation of hermetically sealed, maintenance-free, high-rate, nickel-cadmium batteries for aircraft applications. Quarterly technical progress report No. 6, 2833 (AD-479652)
Investigation of semiconductor equalizer diodes for secondary battery cells, 2870 (AD-621080)
Investigation of maintenance-free, high-rate, nickel-cadmium battery power system for aircraft application. Final technical report, 3062 (AD-879606)
Lightweight automatic charger/controller, 4519
Method and apparatus for reconditioning nickel-cadmium batteries (Patent application), 3238 (N-77-12511)
Method and device for charging and heating at low temperature a sealed storage cell battery (Patent), 3294
Multichannel engine powered battery charger. Final report (6, 12, and 24 V at up to 2.5 A), 2816 (AD-470065)
New charge control system for satellite batteries, 2792

(AD-439673)
Nickel-cadmium battery reconditioner, 2881 (AD-638603)
On-board aircraft battery charging, 4049
OV-10A aircraft Ni--Cd battery and charging system investigation. Report No. 1, (final), Apr-Sep 1973, 3109 (AD-919452L)
Power conditioning and control module for hydrazine-air battery, type I, PP-6204( )/U, 2940 (AD-732339)
Rapid charger for maintenance-free batteries. Final report, 3103 (AD-913957L)
Rapid charger for maintenance free batteries. Final report, 2970 (AD-772072)
Rapid charger for maintenance-free batteries. Semi-annual report, 1 May-31 Dec 1971, 3098 (AD-911508)
Rapid charger for maintenance-free batteries. Semi-annual report 1 May-31 Dec 71, 3099 (AD-911508)
Review of some modern power supplies, 499 (AD-843245)
Secondary battery charge control: an annotated bibliography. Literature search, 1962-1964 (198 references), 2834 (AD-479784)
Service evaluation of aircraft battery charger, Electro Development Corporation model EDC 2-301-3. Report No. 2 (final), Apr 1970-Aug 1972, 3093 (AD-909458L)
Some new electrochemical devices, 2864 (AD-617832)
Temperature responsive battery charging circuit (Patent), 3560
There's no overcharge for fast-charged batteries (Thermal switch to shunt high charge currents when cell is fully charged), 4514
Well regulated battery-solar cell charging, 4660

NICKEL-CADMIUM BATTERIES/BATTERY CHARGING
Adhydrode control of Ni-Cd battery charging to evaluate charging methods, 2519
Alkaline batteries, 1439
Analysis of aircraft battery thermal runaway, 2286
Atmosphere explorer power subsystem, 4056
Auxiliary electrode charge control, 4522
Auxiliary electrode for charge control of sealed nickel-cadmium batteries. Quarterly progress report No. 3, 15 Dec 1964-14 Mar 1965, 1674 (AD-466291)
Auxiliary electrode for charge control of sealed nickel-cadmium batteries. Quarterly progress report No. 4, 15 Mar-14 Jun 1965, 1679 (AD-469278)
Auxiliary electrode for charge control of sealed nickel-cadmium batteries. Quarterly progress report No. 5, 15 Jun-14 Sep 1965, 1692 (AD-475526)
Auxiliary electrode for charge control of sealed nickel-cadmium batteries. Quarterly progress report No. 1, 15 Jun-14 Sep 1964, 2800 (AD-456849)
Auxiliary electrode for charge control of sealed nickel-cadmium batteries. Quarterly progress report No. 2, 15 Sep-14 Dec 1964, 2801 (AD-458044)
Batteries for biotelemetry and other applications, 1477
Batteries used with law enforcement communications equipment: chargers and charging techniques, 3249 (PB-221475)
Battery and third electrode performance characteristics for varying charge and discharge rates (20 A-h, 24 cell, sealed battery), 2409
Battery cell with third electrode performance test results (20 A-h cell), 2410
Battery charge condition monitoring: techniques and applications, 4946 (CONF-740215-P2)
Cadmium--oxygen study on sealed Ni--Cd system, 2642
Cell rechargeability, 2565
Charge control devices. 3. Amp-Gate diode for charge control of sealed rechargeable cells, 4585
Charge control devices. 2. Charge control methods for Ni--Cd batteries, 4586
Charge control devices. 1. Third electrode charge control (VCB Black $O_2$-reduction control system), 4587
Charge control devices. 6. Auxiliary electrode instrumentation, 4591
Charge control devices. 4. Coulometric control of charging of Ni--Cd secondary batteries, 4595
Charge control for secondary batteries. Part 1 - Auxiliary electrode for charge control, 4653
Charge control for secondary batteries. Part 2 - Adhydrode in charge control, 4654
Charge control for secondary batteries. Part 3 - Stabistors, their application in battery operation, 4655
Charge control of nickel-cadmium batteries. Auxiliary electrodes for overcharge and overdischarge control, 4623
Charge control of nickel-cadmium batteries, 2573
Charging behavior of cadmium hydroxide electrodes at low temperatures, 4563
Charging characteristics of a sealed-type nickel-cadmium cell, 2422
Charging methods for nickel--cadmium batteries (Effects of pulsed and direct current charging on battery performance), 2320
Charging Ni-Cd and Pb-acid batteries from common generator, 2375
Chemical charging of nonlamellar cadmium electrode of an alkaline battery (Patent; soaking in Ni chloride, hydrazine as reducing agent), 2781 (AD-781983)
Coulometer control of battery charging, 4521
Coulometric charging control of sealed nickel-cadmium cells, 2803 (AD-462403)
Custom chargers and matched cells increase life of sealed batteries, 2160
DC to dc conversion for improved power sources. Research and development technical report (Charging process for Ni battery electrode), 2968 (AD-762181)
Design and test of the SAS-A power system. Technical memo, 395 (AD-716771)
Determination of state of charge of nickel--cadmium batteries (Reliability of measuring equipment), 4700
Development of a power module using third electrode battery charge control, 2295
Development of a power module using third electrode battery charge control (150 to 250 W, two 6-Ah batteries), 1265
Diode control research. Quarterly progress report No. 6, 1 September-1 December 1967 (Stabistor charge control), 1862 (AD-825660)
Diode control research. Quarterly technical progress report No. 7 (Stabistor-protected 12-Ah Ni-Cd and 25-Ah Ag-Zr batteries), 1867 (AD-832025)
Diode control research. Quarterly technical progress report No. 10, 1 September-1 December 1968 (Stabistor-controlled 12-Ah spacecraft battery), 1885 (AD-850093)
Direct electrochemical reduction of cadmium oxide in alkaline electrolyte, 4089
Dry-charging nickel-cadmium accumulator, 2180
Engineering evaluation of the zinc-mercuric oxide battery/nickel-cadmium battery hybrid system, 2310
Evaluation of auxiliary electrode materials, 4624
Fast charging of sealed nickel-cadmium batteries: theory and practice, 2243
Fast-rechargeable sealed nickel-cadmium battery cells combined with excess pressure and temperature controls (Patent), 4320
Heat generation in sealed batteries, 2520
Heat release in the operation of hermetic nickel--cadmium storage batteries (Heat absorbed during charging), 2219
Hermetically sealed nickel-cadmium batteries for the initial defense communication satellite program/augmentation (IDCSP/A), 1467
High capacity sealed nickel-cadmium batteries, 1554
Investigation of charging methods for nickel-cadmium batteries (Pulsed and direct currents, BB-616 batteries, -40 to 125°F, C/2 to 4C charge rates), 2285
Investigation of maintenance-free, high-rate, nickel-cadmium batteries for aircraft application. Quarterly progress report No. 5, 1 June-31 August 1967 (-40 to -10°F, polypropylene separator), 1861 (AD-822449)
Investigation of maintenance-free, high-rate, nickel-cadmium batteries for aircraft application. Quarterly technical progress report No. 2, 2989 (AD-805274)
Investigation of hermetically sealed maintenance-free, high-rate, nickel-cadmium batteries for aircraft applications. Quarterly technical progress report No. 4, 1676 (AD-468644)
Investigation of hermetically sealed, high-rate, maintenance-free, nickel-cadmium batteries for aircraft applications. Final technical report, Jul 1964-Jun 1966, 1712 (AD-489830)
Investigation of hermetically sealed maintenance-free, high-rate, nickel-cadmium batteries for aircraft applications. Quarterly technical progress report No. 2, 1731 (AD-611404)
Investigation of charging methods for nickel-cadmium batteries. Technical report (-20 to +100 F), 2014 (AD-A-016132)
Investigations leading to the development of the optimum method(s) for charging sealed nickel-cadmium batteries. Final report, 1 Oct 1962-30 Sep 1963 and addendum, 4 May-4 Oct 1964, 1653 (AD-456387)
Methods for charging batteries on aircraft, 2287
Microprocessor-controlled battery protection system, 3786
Nickel--cadmium batteries. 2. High-temperature effects on sealed Ni--Cd batteries (25, 46, 67°C: charging efficiency effects of Li cycling), 2556
Nickel--cadmium battery evaluation for Apollo telescope mount application, 2452
Nickel--cadmium cells for optimum overcharge capability, 2522
Nickel/cadmium aircraft batteries: float charge test equipment. Technical note, 3085 (AD-905408)
Nickel/cadmium aircraft batteries: thermal considerations, 2009 (AD-A-011995)
Optical study of the growth and oxidation of nickel hydroxide films, 2967 (AD-761281)
Optimum charge procedures for sealed nickel-cadmium batteries, 2603
Oxygen evolution during recharging of positive nickel oxide sinter electrodes, 2363
Parametric charge studies for aerospace nickel--cadmium batteries, 2486
Parametric charge studies for aerospace nickel-cadmium batteries, 2460
Peak programmed charge method, 2288
Personality of nickel-cadmium batteries, 2462
Pressure characteristics of sealed nickel-cadmium cells, 2580
Rapid charging batteries for electric propulsion systems (24-Ah Ni/Cd in 5 to 10 min, 190-Ah lead-acid in 20 to 30 min.), 2396
Rapid recharging of nickel-cadmium batteries (Tests up to 4000 C rate), 4420

Sealed nickel-cadmium batteries (Failure study), 1548
Shunt voltage regulator circuit for nickel-cadmium cells with auxiliary electrodes, 2878 (AD-631951)
Space-rated nickel/cadmium batteries and their charge control, 2059 (N-70-30138)
Temperature investigation of OV-10A battery and battery compartment. Report No. 1 (final), 20 May-30 Dec 1971, 1932 (AD-905610L)
Two kilowatt long life battery. Interim technical report, 15 May 1971-15 Sep 1972 (For satellites, solar cell charger), 541 (AD-906407L)
Why nickel-cadmium batteries fail, and how to revive them, 2145

NICKEL-CADMIUM BATTERIES/BATTERY SEPARATORS
An evaluation of potentially useful separator materials for nickel-cadmium (Ni-Cd) satellite batteries. Final report, 3229 (N-75-32597)
Capillary properties of separator fabrics and performance of the fabrics in sealed storage batteries, 4402
Economic aspects of major extensions in spacecraft life (S-2). Volume III. Sections VII and VIII, 2785 (AD-375061)
Electrophoretic mobilities of cadmium hydroxide, nickel hydroxide, and silver oxide in NiCd and Ag--Zn battery electrolytes. Interim report, 2980 (AD-783853)
Evaluation of potentially useful separator materials for nickel--cadmium satellite batteries, 3167 (COM-75-10618)
Investigation of new cell components for vented nickel-cadmium batteries. Technical report, 3124 (AD-A-017117)
Long-life, high energy Ni-Cd aerospace cells, 4266
Manufacturing methods for high performance grafted-polyethylene battery separators. Final report, 1 Dec 1970-30 Jan 1972, 2956 (AD-745571)
Method of making separators for alkaline batteries (Patent), 3555
Nickel/cadmium aircraft batteries: float charge test, 2000 (AD/A-002767)
Nickel/cadmium aircraft batteries: multichannel gassing-rate meter. Technical note (Monitors condition of separators), 3144 (AD-A-039735)
Penetration of cadmium into nylon separators of Ni--Cd batteries, 3218 (N-74-20707)
Polypropylene separators for batteries (Patent), 3664
Rapid method of determining cadmium intergrowth time in alkaline cadmium--nickel battery separators, 4116
Separators for alkaline batteries (Patent; natural or synthetic cellulosic materials, styrene, nylon, glass fiber, Teflon, etc.), 3384
Studies on sealed nickel--cadmium batteries, 4701

NICKEL-CADMIUM BATTERIES/BIBLIOGRAPHIES
Annotated bibliography of the thermal properties of primary and secondary cells, 62 (AD-871108)
Batteries. Report bibliography, Jan 1967--Apr 1973, 697 (N-74-14792)
Nickel cadmium batteries (a bibliography with abstracts). Period covered: 1970-March 1975, 101 (NTIS/PS-75/445)
Nickel-cadmium batteries. Bibliography for 1940-Dec 1965 (Covers 1940 through 1965), 18 (AD-484505)
Nickel cadmium batteries (a bibliography with abstracts). Report for 1970-Apr 1976, 717 (NTIS/PS-76/0466)
Nickel cadmium batteries (a bibliography with abstracts). Report for 1970-Jul 77, 115 (NTIS/PS-77/0555)

NICKEL-CADMIUM BATTERIES/CATHODES
Activation of nickel battery plates (Patent; electrolytic process), 3871
Activation of nickel battery plates (Patent; electrolytic process), 3557
A tive mass of the nickel oxide electrode for an alkaline storage battery (Patent; preparation), 4354
Active substance for the nickel oxide electrode of an alkaline storage battery (Patent; preparation of active material), 4355
Analysis of charge-discharge characteristics of nickel oxide electrodes by infrared spectroscopy, 4606
Anodic corrosion of nickel sinter in positive electrodes of nickel-cadmium batteries containing carbonate, 4561
Applications of nickel. Annual report (Ni production and consumption; possibility for substitutions in event of shortage), 3037 (AD-846999)
Battery electrode support (Patent), 3589
Battery electrode supports (Patent), 3590
Behavior of nickel oxide electrodes of alkaline cells in concentrated solutions of nickel salts, 4387
Carrying out reactions between powdered and gaseous materials (Patent; means for chemical preparation of active materials), 3549
Cathodes for alkaline batteries (Patent), 3926
Characteristics in charged or discharged condition of pressed-type nickel positive electrodes made by using polystyrene as a binder (Comparison with polyethylene), 4053
Charge, discharge, and self-discharge characteristics of thin film nickel oxide electrodes, 2905 (AD-671685)
Coated nickel electrodes (Preparation by anodization of an active form of Ni), 4419
Composite nickel powder for preparing plaques for nickel cadmium batteries, 4224
DC to dc conversion for improved power sources. Research and development technical report (Charging process for Ni battery electrode), 2968 (AD-762181)
Determination of carbonate impurities in nickel hydroxide, 4069
Development of uniform and predictable battery materials for nickel-cadmium aerospace cells. Interim annual report, 8 August 1968-7 July 1969 (Preparation of porous nickel plaques), 3210 (N-70-28473)
Effect of the increase of porosity on the current distribution in nickel hydroxide electrodes containing Raney nickel, 4001
Effect of lithium hydroxide additions on the electrochemical behavior of nickel(II) hydroxide thin-layer electrodes, 4101
Electrochemical impregnation of nickel hydroxide into a porous nickel plate (34 mAlcm$^2$), 4117
Electrochemical processes on nickel oxide, 2902 (AD-667607)
Electrochemical precipitation of $Ni(OH)_2$ into porous electrodes, 4559
Electrochemical impregnation of electrode for rechargeable cell (Patent), 3388
Electrochemical properties of nickel hydroxide electrodes, 4363
Electrode for alkaline batteries (Patent; fabrication using loaded Ni sponge), 3651
Electrodes for alkaline batteries (Patent; preparation), 3613
Electrolytic sintering of nickel powder, 4489
Electrolytic impregnation method: nickel hydroxide electrode, 4599
Electrophoretic method of preparation of electrodes from nickel(II) hydroxide, 3780
Fabrication and investigation of nickel-alkaline cells. Part II. Analysis of ethanolic metal nitrate solutions used in fabrication of nickel hydroxide electrodes. Technical report, Jun 1972-Jan 1975, 3126 (AD-A-018478)
Fabrication and investigation of nickel-alkaline cells. Part I. Fabrication of nickel-hydroxide electrodes using electrochemical impregnation techniques. Technical report, 1 Jan 1971-1 Jan 1974, 3127 (AD-A-018517)
Failure mechanisms in sealed batteries. Part IV. Semiannual technical report No. 4, 1 January-30 June 1968, 1884 (AD-848981)
Forming process in nickel positive electrodes, 4622
High energy density sintered plate type sealed nickel cadmium battery cells. I. The positive electrode/plaque relationships ($Ni(OH)_2$), 4058
High energy density sintered plate type nickel-cadmium battery cells. II. Electrochemical impregnation methods to produce nickel oxide electrodes, 4059
High energy density sintered plate-type nickel-cadmium battery cells. Part II. Electrochemical impregnation methods to produce nickel oxide electrodes. Technical report, December 1972-December 1973, 3114 (AD/A-002142)
Influences of foreign metal ions on the performances of nickel positive electrodes, 4278
Information about nickel hydroxide electrode (Chemical reactions), 4571
Infrared spectroscopic study of the properties of a nickel oxide electrode. I. Effect of charging conditions on the ir spectra of a nickel oxide electrode in charged and discharged states, 4092
Investigation toward the development of carbonyl nickel powder suitable for the manufacture of sintered nickel plaques for use in alkaline storage batteries, 2873 (AD-622916)
Laboratory investigations and research toward the development of nickel-cadmium alkaline storage batteries. Annual progress report, 1 Jul 1946-30 Jun 1947 (Improved plate fabrication), 287 (AD-472061)
Laminated diffusion bonded battery plaques (Patent; preparation), 3952
Lightweight sponge negative plates for nickel-cadmium batteries, 4265
Manufacture of a dry-charged nickel oxide electrode by chemical oxidation (KOH--$K_2S_2O_8$ solution), 4083
Method for making a nickel positive electrode for an alkaline battery (Patent; suspension of nickel hydroxide, cobalt hydroxide, and graphite entrained in polyvinylidene fluoride binder), 3353
Method of manufacturing positive nickel hydroxide electrodes (Patent), 3473
Method to produce a protective oxide on the surface of positive nickel electrodes for galvanic cells (Patent), 3428
Methods for determining the structural and stoichiometric changes of $Ni(OH)_2$ electrodes during polarization in alkaline electrolyte, 4565
Modulation-spectroscopic investigations on nickel electrodes (Structure of semiconducting passive layers) 4360
Nickel--cadmium batteries. 5. Gassing behavior of $Ni(OH)_2$ electrodes, 4592
Nickel--cadmium batteries. 4. Self discharge on $Ni(OH)_2$ electrodes, 4593
Nickel-cadmium batteries. 4. Self-discharge on $Ni(OH)_2$ electrodes, 2886 (AD-643798)
Nickel cathode for alkaline batteries (Patent), 3705
Nickel cathodes for alkaline cells (Patent; fabrication), 3708
Nickel cathodes for alkaline batteries (Patent), 3598

Nickel electrodes for alkali batteries (Patent; preparation), 3902
Nickel electrodes (Patent), 3978
Nickel electrodes for alkaline batteries (Patent), 3704
Nickel electrodes for alkaline cells (Patent), 3663
Nickel electrode for alkaline batteries (Patent; preparation by polarizing Ni sponge in aqueous metal nitrate solution), 3619
Nickel electrode for an alkaline battery (Patent; fabrication), 4327
Nickel hydroxide electrode (Chemical preparation;patent), 3680
Nickel hydroxide cathodes for storage batteries (Patent; fabrication), 3755
Nickel hydroxide cathodes for storage batteries (Patent; fabrication), 3756
Nickel hydroxide battery electrode development. Annual interim report No. 2, 1 January-31 December 1970 (20 Ah), 3069 (AD-883905)
Nickel hydroxide electrode research. Interim technical report No. 1, 1 January 1969-2 February 1970 (Effects of cation additions to active material), 3056 (AD-866147)
Nickel hydroxide electrode (Patent), 4334
Nickel hydroxide electrode. V. Analysis and electrochemical behavior of cadmium-nickel-hydroxides, 4293
Nickel hydroxide electrodes (Migration of active material), 3271 (X-711-77-28)
Nondestructive method of monitoring the quality of powder-metallurgical nickel electrodes of nickel--cadmium batteries, 4084
Nonlaminated nickel oxide electrode with plastic binder, 4569
Optical study of the growth and oxidation of nickel hydroxide films, 2967 (AD-761281)
Oxidation of powder-metallurgical electrodes by potassium hypochlorite, 4076
Oxidation of hydrogen on a porous nickel electrode, 2860 (AD-612497)
Oxidation of sintered nickel bases with ozone (Chemical preparation), 4434
Polarization studies on sintered plate electrodes containing various amounts of $Ni(OH)_2$, 4579
Porous nickel plates for electrodes (Method for fabrication), 3965
Porous nickel alkaline-battery electrodes made from woven cotton cloth (Fabrication and testing, porous structure derived from woven cotton cloth), 4349
Porous nickel for alkaline battery and fuel cell electrodes: production by roll-compaction (Roll-compaction of carbonyl nickel powders), 4506
Positive nickel masses from nickel--cadmium accumulators of variable capacities. 1. X-ray studies, 3789
Possibilities of improving the electrical characteristics of nonlamellar nickel oxide electrodes of alkaline storage batteries, 4068
Potassium distribution in nickel oxide electrodes, 4577
Powder-metallurgy electrode of an alkaline storage battery (Patent), 3853
Pressed-type alkaline storage battery. VII. Behavior of silver oxide added to pressed-type nickel positive electrodes, 2303
Production of porous membranes for batteries and fuel cells, 4620
Production of porous nickel for alkaline-battery and fuel-cell electrodes: practical and economic considerations, 4611
Production of porous nickel electrodes for gas-tight batteries, 4604
Production of uniform nickel-cadmium battery plate materials. Quarterly report, 13 September-12 December 1969 (Effect of material and process variables on plaque and plate characteristics), 3213 (N-71-28053)
Products of oxidation of nickel with ozone (Chemical preparation of nickel oxide electrode active mass), 4436
Protective coatings on positive nickel electrodes (Patent), 4170
Rational degree of filling of pores of powder-metallurgical nickel oxide electrode by the active media, 4118
Relations of the structural characteristics of the powder metallurgical nickel oxide electrode, 4063
Removal of nitrates from sintered nickel storage-battery plaques impregnated with nickel salts (Patent), 4247
Sealed nickel--cadmium alkaline storage battery (Patent; $Ni(OH)_2$ cathode, $Cd(OH)_2$ anode), 958
Sealed nickel--cadmium alkaline storage battery (Patent; cathode impregnated with LiOH), 959
Sealed type alkaline storage battery (Patent; improved Ni hydroxide cathode containing $Ba(OH)_2$), 3565
Selected articles (Effects of ultrasonics), 4689 (AD-655021)
Self-discharge of nickel oxide electrodes, 4213
Self-discharge mechanism of a powder-metallurgy nickel oxide electrode in concentrated potassium hydroxide solutions, 4135
Self-discharge of a nickel oxide electrode, 4417
Sintered nickel electrodes for alkaline storage batteries (Patent), 3694
Sintered nickel matrix cathode (Performance), 4734
Sintered type alkaline storage battery. XV. Effect of lithium ion on the formation of active material from nickel plaque at various temperatures, 4087
Stable nickel oxyhydroxide (NiOOH) (Patent; chemical preparation), 3499
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730
Structure of a double electric layer and features of the electrode processes on a sodium nickelate single crystal, 4136
Studies on sealed nickel--cadmium batteries, 4701
Study of electrodes and electrode reactions. II. The relation of the energy necessary to remove an oxygen molecule from charged nickel oxide electrodes in vacua and solutions of potassium hydroxide, 2876 (AD-627216)
Study of electrodes and electrode reactions. I. The energy necessary to remove an oxygen molecule from a charged nickel oxide electrode in a vacuum, 2877 (AD-627248)
Study of electrode phenomena in storage batteries, 4743
Swelling of the active positive material in a nickel-cadmium alkaline storage battery, 4361
Thermal decomposition of nickel ammine complexes for producing the positive active mass in sintered electrodes (Fabrication), 4350
Thermogalvanic potentials. II. Nickel in neutral subgate solution, 4769
Use of hydrogen-absorbing electrode in alkaline battery (For protection against electrochemical damage due to battery reversal; patent), 3386
Use of stereometric metallography for determination of structural characteristics of porous nickel bodies for alkaline storage cell plates, 4463
Zinc additive in nickel-cadmium cells (Patent), 4330

NICKEL-CADMIUM BATTERIES/CHEMICAL RADIATION EFFECTS
Effects of radiation on nickel-cadmium battery electrodes. II. Midpoint report for 13 Mar-13 Jun 1964, 1725 (AD-604037)
Effects of gamma radiation on the behavior of nickel and cadmium electrodes, 4454

NICKEL-CADMIUM BATTERIES/CHEMICAL REACTIONS
Action of ultrasound on nickel--cadmium storage batteries, 2230
Behavior of nitrate impurity in nickel--cadmium cells, 2305
Carbonate impurities in the active masses of nickel--cadmium batteries, 1829 (AD-770970)
Electrochemical engineering of battery systems. Final report, 10 Nov 1971--9 Nov 1972 (Use of scattered light to determine battery operation without disturbance), 3104 (AD-914248)
Exchange reaction at polycrystalline cadmium electrodes. I, 2471
Pressed-type alkaline storage battery. VII. Behavior of silver oxide added to pressed-type nickel positive electrodes, 2303
Study of processes in the gas-tight nickel-cadmium accumulator, 2660

NICKEL-CADMIUM BATTERIES/COMPARATIVE EVALUATIONS
Batteries. 2. Virtues of gelled electrolyte, 2270
Batteries. 3. Comparison of cost, maintenance, and life tradeoffs, 2272
Batteries for battery-powered vehicles (Service life, care, space requirements, initial costs), 2448
Comparison of silver-cadmium and nickel-cadmium batteries for use on satellites, 1741 (AD-631700)
Custom chargers and matched cells increase life of sealed batteries, 2160
Evaluation tests of a nickel--zinc aircraft storage battery developed by Eagle-Picher Industries, Inc., 1914 (AD-901266L)
Lightweight laser designator battery evaluation tests. Final report, 2017 (AD-A-019511)
$Ni-H_2$ performance versus Ni-Cd, 2244
NiCd and lead acid D-size cells meet in the rechargeable arena, 2190
Nickel cadmium power source for acoustic transponders, 1654 (AD-456992)
Noncommunication expendable jammer investigations. Volume 1. Power sources, 1640 (AD-441993)
Structure, design, and applications of nickel-cadmium cells, 1608
Study of electric automobile traction with reference to silver batteries, 2673
Transition metal compounds as cathodic materials in rechargeable lithium cells. Technical report, 595 (AD-A-037676)

NICKEL-CADMIUM BATTERIES/CONNECTORS
Bipolar nickel-cadmium cells for high-energy pulses, 1482

NICKEL-CADMIUM BATTERIES/CONTAINERS
Plastic case for flat rechargeable cell (Patent), 3323

NICKEL-CADMIUM BATTERIES/COOLING
Experimental investigation of cooling a high rate nickel--cadmium battery with an intercell planar heat pipe. Technical report, Sep-Dec 1970, 2943 (AD-735736)
Intercell planar heat pipe for the removal of heat during the cycling of a high rate nickel--cadmium battery, 2939 (AD-730867)
Nickel/cadmium aircraft batteries: thermal considerations, 2009 (AD-A-011995)

NICKEL-CADMIUM BATTERIES/COVERINGS
Evaluation of Ni-Cd cell covers. Results of testing of covers with protected brazing fillet, 3227 (N-75-29452)

Hermetic covers for European Ni/Cd cells, 3234 (N-76-27697)
NICKEL-CADMIUM BATTERIES/CURRENT DENSITY
Study of high-current densities in nickel cadmium bipolar batteries. Final report (12.5 A/cm²), 1745 (AD-647468)
NICKEL-CADMIUM BATTERIES/DECOMPOSITION
Study of degradation of plates for nickel--cadmium spacecraft cells. Interim report, 3216 (N-74-16808)
NICKEL-CADMIUM BATTERIES/DESIGN
60/240 watt hydrazine fuel cell system (Hybrid with nickel--cadmium battery), 379 (AD-681201)
Advanced development models of sealed nickel-cadmium batteries. Final report for 5 April 1964-16 August 1965, 333 (AD-623024)
Advanced development models of vented nickel-cadmium batteries. Final report for 5 Apr 1964-15 Mar 1965, 326 (AD-617406)
Advanced sealed nickel-cadmium cell design, 898
Advanced sealed nickel-cadmium design (Split negative electrode), 774 (X-711-77-28)
Airtight alkaline nickel--cadmium storage battery containing a gas absorber (Patent), 1066
Alkaline batteries, 1439
Alkaline cell with double collector positive, negative, and third terminal connections (Patent), 846
Alkaline nickel-cadmium accumulator battery (Patent), 923
Battery, nickel--cadmium BB-460( )/U. Final report, Mar 970-Apr 1971, 1797 (AD-733890)
Battery and cell redundancy considerations for long duration space missions, 1267
Battery arrangement (Patent), 1575
Battery design for aerospace power supplies, 393 (AD-709273)
Battery with alkaline electrolyte (Patent; $Ni(OH)_2$/tetraalkylammonium hydroxide/$Cd(OH)_2$; most efficient below 55°), 1062
Bipolar nickel-cadmium cells for high-energy pulses, 1482
Brief description of Ni/Cd storage battery, 1611
Cell design optimization, 1470
Cell design (20 Ah), 770 (X-711-77-28)
Chemoelectric battery (Patent; Fe, Cd, or Zn with hydroxide of Ni, Fe, or Co and/or oxides of Pb or Ag, gas release feature), 809
Cylindrical cadmium--nickel secondary battery (Patent), 1280
Cylindrical electric cell (Patent), 786
Design and development of high charge rate nickel--cadmium batteries. Final report, Mar 1970-Nov 1973 (BB-478 ( )/U, F size, 1.2 V, 6.3 A-h), 559 (AD-917235L)
Design and development of high charge rate nickel cadmium batteries. Interim progress report Oct 1970-Nov 1972, 545 (AD-908765L)
Design and test of a 100 ampere-hour nickel cadmium battery module, 706 (N-75-16974)
Design characteristics of nickel--cadmium batteries, 1557
Design characteristics of nonvented nickel-cadmium cells, 1566
Design details, 50-ampere hour cell, 771 (X-711-77-28)
Design improvement of BB 501( )/U battery assembly. Final report, 29 March 1967-November 1968 (Includes manufacturer's drawings), 386 (AD-687336)
Design of cadmium--nickel batteries of a given size and system of operation, 1255
Development of sintered-electrode batteries (progress report), 302 (AD-495876)
Development of Ni/Cd batteries with sintered electrodes, 304 (AD-495878)
Engineering development and qualification of large sealed nickel-cadmium batteries for long-duration space missions, 1102
Failure mechanisms in sealed batteries. Final technical report, 1 July 1966-30 April 1969, 1620 (AD-85592)
Flat alkaline cell with positive and negative terminal connections and a third terminal connection for an auxiliary electrode (Patent), 852
Flexible nickel cadmium batteries for meteorological balloons (Electrolyte performance at -30 and -60°C), 1458
Gas-tight storage battery (Patent), 972
Gas-tight nickel-cadmium accumulators (Changes to prevent undue pressure rise in overcharging), 1567
Hermetic alkaline storage battery (Patent; positive electrodes are discharge limiting, negative electrodes contain Raney metal), 812
Hermetically sealed nickel-cadmium batteries for the initial defense communication satellite program/augmentation (IDCSP/A), 1467
High capacity sealed nickel--cadmium batteries (Development), 1558
Improved 6TNC 12-volt nickel-cadmium batteries (KOH electrolyte), 511 (AD-849830)
Improved aircraft battery, 1239
Investigation of maintenance-free high-rate, nickel-cadmium batteries for aircraft application. Quarterly technical progress report No. 7, 1 September 1967-29 February 1968, 484 (AD-831150)
Investigation of maintenance-free, high-rate, nickel-cadmium battery power system for aircraft application. Quarterly technical progress report No. 8, 1 March-31 May 1968 (Breadboard circuit tested from -40 to +140 F) 490 (AD-837598)
Investigation of maintenance-free, high-rate, nickel-cadmium batteries for aircraft application. Quarterly technical progress report No. 1, 451 (AD-800799)
Investigation of hermetically sealed, maintenance-free, high-rate, nickel-cadmium batteries for aircraft applications. Quarterly technical progress report No. 7, 296 (AD-484494)
Investigations leading to the design of a reliable sealed nickel-cadmium cell. Report No. 7 (quarterly progress report No. 3), 1 Nov 1963-31 Jan 1964, 310 (AD-600251)
Kilowatt battery systems, 1354
Low earth orbit battery development project. Final report, 1 Jul 1970-30 Jun 1972, 537 (AD-902570L)
Low power metal hydride fuel cell/battery hybrid systems. Final report, 15 June 1973-15 October 1974, 571 (AD/A-005079)
Maintenance-free battery system, model No. EMBC114C. Battery system, sealed cell, nickel cadmium, integral charge control, aircraft. Final report, 428 (AD-757535)
Manpack vented nickel-cadmium batteries, BB-500( )/U, BB-607( )/U, and BB-610( )/U, 510 (AD-849828)
Miniature sealed nickel-cadmium batteries. Final report Mar 71-Jun 72, 552 (AD-913104)
Modular battery construction (Patent), 1161
Multiple source battery-powered apparatus (Patent), 1195
Nickel--cadmium monoblock battery BB-433(X-1)/A. Final report, Apr 1971--Feb 1974, 437 (AD-774811)
Nickel--cadmium cells for optimum overcharge capability, 2522
Nickel--cadmium alkaline battery (Patent), 1074
Nickel-cadmium cells for low earth orbit applications, 1342
Nickel-cadmium cells. Final report, 30 March 1972-30 May 1973, 707 (N-75-21792)
Nickel-cadmium cells for spacecraft battery, 1544
Nickel cadmium battery systems for aerospace support equipment (8 kW, 27.4 to 31 V), 1542
Nickel-cadmium storage batteries for supply of meteorological balloons, 1446
Optimum structures for miniature Ni-Cd sealed cells and batteries. Quarterly report No. 3, 11 February-10 October 1967 (Includes effects of additives to plates), 365 (AD-665443)
Optimum structures for miniature Ni-Cd sealed cells and batteries. Quarterly report No. 2, 11 November 1966-10 February 1967 (1 and 4 Ah), 1749 (AD-652700)
Panel/attendee discussion on cell design, 772 (X-711-77-28)
Permanent gas-tight, sealed nickel-cadmium storage battery (Patent; suppressed H evolution, charging with constant voltage), 1379
Progress report, 303 (AD-495877)
R/D contract for the development of a 20-cell fiberglass cased BB501( )/U battery. Final report, 30 June 1965-15 March 1966 (24 V), 346 (AD-637157)
Redesign of battery BB-433/A, 1459
Reliable dc power systems for standby applications, 1314
Sealed aircraft batteries, 344 (AD-636153)
Sealed cadmium--nickel batteries (Characteristics, tables), 410 (AD-739211)
Sealed nickel--cadmium battery assembly BB-553( )/U. Final report, Jan 1970-Apr 1972, 418 (AD-748454)
Sealed nickel--cadmium battery assembly BB-655( )/U. Report No. 1 (final), 1 Jun 1969-30 Sep 1970 (Development and testing), 394 (AD-714243)
Secondary batteries for energy storage in space, 1562
Some factors of the importance in establishing the ratio of negative to positive plate capacities in sealed nickel-cadmium cells, 2991 (AD-805859)
Standard alkaline cells and secondary batteries (Review of characteristics of battery families), 366 (AD-668654)
Standard line-battery assembly BB-610( )/U nickel cadmium vented. Quarterly report No. 1, 25 June-28 October 1965 (12V), 337 (AD-631271)
Standard line-battery assembly BB-610( )/U nickel cadmium vented. Quarterly report No. 2, 29 October 1965-28 January 1966 (12 V), 338 (AD-633060)
Standard line-battery assembly BB-610( )/U nickel cadmium, vented. Quarterly technical report No. 3, 29 January-28 April 1966 (12 V), 345 (AD-637156)
Standard line-battery assembly BB-610( )/U nickel cadmium vented. Final report, 29 April 1966-17 January 1967, 355 (AD-654130)
Standard line alkaline secondary batteries, 319 (AD-610010)
Storage battery (Patent), 966
Structure, design, and applications of nickel-cadmium cells, 1608
Submersible power supplies, 1057
Thermal and mechanical design of nickel cadmium aerospace batteries, 1436
Truth about Ni-Cd cell reversal, 866
Two kilowatt long life battery. Interim technical report No. 3, 15 Sep 1972-15 Sep 1973, 562 (AD-917874L)
Two kilowatt long life battery. Interim technical report, 15 May 1971-15 Sep 1972 (For satellites, solar cell charger), 541 (AD-906407L)
Two-kilowatt long-life battery. Final technical

documentary report, 1 January 1969-31 July 1970 (50 to 100 Ah), 531 (AD-876484)
Two-kilowatt long-life battery. Interim technical report No. 1, 15 June 1970-15 May 1971, 534 (AD-885799)
Types of alkaline storage batteries, 1591
Vented nickel--cadmium battery assembly BB-500 ( )/U. Final report, 15 Dec 1967-30 May 1969, 391 (AD-698030)
Vented nickel--cadmium battery assembly, BB-651( )/U (24 V and 5.5 A-hr or 12 V and 11 A-hr), 568 (AD/A-002566)
Vented nickel-cadmium battery assembly BB-607( )/U (132 Wh), 375 (AD-674228)
Vented nickel-cadmium battery, BB-501( )/U, 504 (AD-845914)
Viking Lander spacecraft battery. Final report, 713 (N-77-20557)

NICKEL-CADMIUM BATTERIES/ECONOMICS
Commercial applications of advanced battery technology, 5260
Interrelation of logistics costs in managing the nickel--cadmium battery program. Master's thesis, 1818 (AD-750907)

NICKEL-CADMIUM BATTERIES/ELECTRIC CONDUCTIVITY
Nickel/cadmium batteries in aircraft engine starting, 2281

NICKEL-CADMIUM BATTERIES/ELECTRIC CURRENTS
Studies on current distribution at nickel and cadmium electrodes by laser interferometry, 2344

NICKEL-CADMIUM BATTERIES/ELECTRIC POTENTIAL
Battery charge condition monitoring, 3962
C-MOS voltage monitor protects Ni--Cd batteries, 4185
Cyclic voltametry measurements on Ni/Cd cells, 775 (X-711-77-28)
Determination of state of charge of nickel--cadmium batteries (Reliability of measuring equipment), 4700
Method and device for testing Ni-Cd batteries (Type BB-401/U batteries, method to determine state of charge), 1719 (AD-492038)
Nickel--cadmium batteries. 3. Improved sealed Ni--Cd cells (Time dependence of overcharge behavior, 70, 0, and -40°F), 1510
Nickel-cadmium cells. I. Thermodynamics and x-ray studies, 2610
Nickel-cadmium, silver-cadmium, and silver-zinc batteries, 694 (N-70-29061)
State of charge methods for nickel-cadmium batteries, 2602
Studies on sealed nickel--cadmium batteries, 4701

NICKEL-CADMIUM BATTERIES/ELECTRICAL PROPERTIES
Battery, essential element of safe supplies (Battery as buffer between sensitive load and lines), 2332
Prediction of electrical characteristics of nickel--cadmium storage batteries and design calculation for them, 2293

NICKEL-CADMIUM BATTERIES/ELECTROCHEMISTRY
Cadmium migration in aerospace nickel cadmium cells, 2095 (N-76-24703)
Canadian research on secondary batteries, 2615
Controlled potential reactions of cadmium and silver in alkaline solution, 2645
Electro-chemical properties of cadmium in alkaline solutions, 2664 (AD-682564)
Electrode phenomena of cadmium in alkaline battery: discharge mechanism, 4695
Heat sterilizable and impact resistant Ni-Cd battery development. Quarterly report, 1 July-30 September 1969, 692 (N-70-18977)
Heat-sterilizable and impact-resistant Ni-Cd battery development. Volume 1. Electrochemistry of heat-sterilizable sealed cells. Final report, 1 July 1967-31 December 1969, 695 (N-70-34014)
High-energy-density sintered plate-type nickel-cadmium battery cells. Part I. The positive electrode/plaque relationship. Interim report, December 1972-December 1973 (Work toward cells of 20 W-hr/lb and 2 W-hr/in$^3$), 565 (AD/A-000103)
Nickel-cadmium, state-of-the-art assessment of communications satellites, 2120 (X-711-77-28)
Optimum structures for miniature Ni-Cd sealed cells and batteries. Report No. 4 (final), October 1967-November 1968 (Optimization of electrochemical aspects of cell design), 387 (AD-688520)
Rechargeable alkaline electrolyte cells, and methods of restoring the electrical capacity of such cells (Patent; resistance connected across electrodes), 2397

NICKEL-CADMIUM BATTERIES/ELECTRODES
Alkaline battery (Patent; improvement consisting in welding their conductive plates to electrodes), 3493
Auxiliary electrode for alkaline nickel--cadmium storage battery sealed hermetically (Patent), 3858
Auxiliary electrode for charge control of sealed nickel-cadmium batteries. Quarterly progress report No. 1, 15 Jun-14 Sep 1964, 2800 (AD-456849)
Auxiliary electrode for charge control of sealed nickel-cadmium batteries. Quarterly progress report No. 2, 15 Sep-14 Dec 1964, 2801 (AD-458044)
Charge control of nickel-cadmium batteries. Auxiliary electrodes for overcharge and overdischarge control, 4623
Chemical analysis of nickel-cadmium electrodes, 4404
Controlled porosity and pore size substrates for nickel--cadmium cells, 4150
Development of nickel-alkaline batteries for aerospace lightweight secondary power. Final report, 1 Dec 1972-30 Jun 1975 (50Ah, 20Wh/lb), 587 (AD-A-022350)
Diffusion-bonded battery electrode plaques (Patent), 3552
Effect of electrode structures on capacity of sealed cells during cycling (Cd electrode), 4264
Effect of tetra-alkyl ammonium compounds on the performance of electrodes of sintered plate nickel-cadmium cells, 3417
Effects of radiation on nickel-cadmium battery electrodes. II. Midpoint report for 13 Mar-13 Jun 1964, 1725 (AD-604037)
Effects of foreign ions on nickel hydroxide and cadmium electrodes. Revised ed. ($CO_3^{--}$, $NO_3^-$, $Ag^+$, $Sb^+$, $Al^+$, $As^+$, $Li^+$), 2865 (AD-618255)
Effects of gamma radiation on the behavior of nickel and cadmium electrodes, 4454
Effects of foreign ions on nickel hydroxide and cadmium electrodes (87 references), 4619
Electrochemical engineering of battery systems. Final report, 10 Nov 1971--9 Nov 1972 (Use of scattered light to determine battery operation without disturbance), 3104 (AD-914248)
Electrochemistry of the nickel oxide electrode. V. Self-passivation effects in oxygen-evolution kinetics, 2954 (AD-744605)
Electrochemical power sources, 3112 (AD/A-001610)
Electrode supports for alkaline batteries (Patent; preparation by sintering), 3740
Electrode for battery (Patent), 3728
Electrode pack for storage batteries (Patent; flexible conductor/insulating-separator/conductor assembly), 3634
Electrode plate for alkaline batteries (Patent; fabrication method), 3713
Electrode plate of alkaline storage battery (Patent; preparation of Ni or Cd electrode), 3591
Electrodes for storage batteries (Patent; treatment with $H_2O_2$ for improved storage stability), 3607
Evaluation of auxiliary electrode materials, 4624
Failure mechanisms in sealed batteries. Semiannual technical report No. 5, 1 July-31 December 1968, 1887 (AD-851056)
Formation of electrodes for alkaline batteries (Patent), 3542
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Heat sterilizable and impact reistant Ni-Cd battery development. Quarterly report, 1 April-30 June 1969 (Electrochemistry), 3204 (N-69-40742)
High-temperature impregnation of sintered-metal alkaline-battery electrodes, 2962 (AD-754257)
High temperature impregnation of sintered metal bases of alkaline battery electrodes, 2953 (AD-744254)
Hydrating a battery plaque impregnated with a metal nitrate in a hydroxide solution and subsequent recovery of the nitrate by-product as crystals (Patent; preparation), 4249
Improvement of the production of cermet electrodes for nickel-cadmium storage batteries, 4289
Laboratory investigations and research toward the development of nickel-cadmium alkaline storage batteries. Quarterly progress report, 1 Oct-31 Dec 1947 (Electrode processes, quantity production of sintered plates), 299 (AD-491831)
Measurement of pore size and surface area of porous electrodes by nondestructive means, 4656
Method for making nickel and cadmium electrodes for batteries (Patent), 3375
Method of producing electrodes (Patent), 3400
Methods of producing electrodes for alkaline batteries (Patent; oxidative pretreatment of nickel plaque before impregnation), 3287
New technique for manufacturing electrodes by hot pressing, 1304
Nickel-base electrodes for alkaline batteries (Patent; preparation procedure), 3750
Nickel hydroxide battery electrode development. Final technical report, 1 Jan 1971-31 Jan 1972, 2958 (AD-746335)
Nickel or cadmium electrodes for alkaline cells (Patent; chemical preparation), 3588
Optimum structures for miniature Ni-Cd sealed cells and batteries. Report No. 4 (final), October 1967-November 1968 (Optimization of electrochemical aspects of cell design), 387 (AD-688520)
Oxidation of organic components in a hermetic storage battery and the stability of its characteristics (Accumulation of Cd on electrodes during cycling), 3815
Patent; preparation of Ni oxide, Ni hydroxide, and Fe oxide electrodes, 3762
Performance of 3rd electrode cells in OAO, 2377
Porous structure of a sintered nickel oxide electrode, 2960 (AD-748109)
Preparation of highly porous nickel substrates for sintered electrodes of storage batteries, 4428
Relationship of electrode structures and cell performance in sealed, sintered-type nickel--cadmium button cells during cycling, 2276
Scientific research on improving the characteristics of iron and nickel oxide electrodes, 3792
Sealed nickel-cadmium batteries, 4687
Sintered electrode plate for alkaline storage battery (Patent; fabrication), 3600
Sintered-metal nickel oxide electrode for an alkali

storage cell, 2959 (AD-748047)
Sintered plaque nickel cadmium batteries for ground services, 2906 (AD-671685)
Storage-battery electrodes (Patent; preparation), 4694
Study of processes in the gas-tight nickel-cadmium accumulator, 2660
Surface conductivity of storage-battery lead powder, cadmium and nickel hydroxide in relation to their structural and electrochemical properties, 4497

NICKEL-CADMIUM BATTERIES/ELECTROLYTES
Action of ultrasound on nickel--cadmium storage batteries, 2230
Effect of carbonated electrolyte on the performance of sintered plate nickel-cadmium cells, 1733 (AD-614104)
Effect of carbonate on the performance of sealed nickel-cadmium cells, 2418
Electrochemical power sources, 3112 (AD/A-001610)
Electrolyte carbonate contamination versus electrical performance of sintered plate nickel-cadmium aircraft batteries. Summary report, April 1965-January 1966, 2992 (AD-806812)
Electrolyte concentration changes during operation of the nickel-cadmium cell (6-, 12-, and 20-Ah cells), 3230 (N-75-33497)
Electrophoretic mobilities of cadmium hydroxide, nickel hydroxide, and silver oxide in NiCd and Ag--Zn battery electrolytes. Interim report, 2980 (AD-783853)
Electrophoretic mobilities of cadmium hydroxide, nickel hydroxide, and silver oxide in Ni-Cd and Ag-Zn battery electrolytes, 3453
Flexible nickel cadmium batteries for meteorological balloons (Electrolyte performance at -30 and -60°C), 1458
Investigation of hermetically sealed, maintenance-free, high-rate, nickel-cadmium batteries for aircraft applications. Quarterly technical progress report No. 6, 2833 (AD-479652)
Nickel/cadmium aircraft batteries: rapid electrolyte exchange technique. Technical note, 3142 (AD-A-039335)
Removal of calcium impurity from the electrolyte of an alkaline storage battery with a cadmium anode (Patent), 3854
Thermodynamic properties of the nickel-cadmium alkaline and lead-lead oxide acid cells (Effect of electrolyte composition and concentration), 4503

NICKEL-CADMIUM BATTERIES/ELECTROMOTIVE FORCE
Investigations of the reaction mechanism of the nickel-cadmium cell (-40 to +50 C), 2643
Temperature coefficients of the electromotive force in alkali storage cells (-40 to +40 C), 2723

NICKEL-CADMIUM BATTERIES/ENTHALPY
Design and development of a continuous flow calorimeter and measurements of the thermal characteristics of nickel-cadmium batteries (6 Ah), 2544
Thermodynamic properties of the nickel-cadmium alkaline and lead-lead oxide acid cells (Effect of electrolyte composition and concentration), 4503

NICKEL-CADMIUM BATTERIES/EQUIVALENT CIRCUITS
Equivalent circuit for series connected GC23C nickel-cadmium cells. Interim technical report, Apr 1974-Mar 1976, 589 (AD-A-026171)
Power transfer characteristics of a secondary battery for integrated system design, 1455

NICKEL-CADMIUM BATTERIES/EVALUATION
Nickel-cadmium, state-of-the-art assessment of communications satellites, 2120 (X-711-77-28)

NICKEL-CADMIUM BATTERIES/EXPANSION
Clamping structure for battery cells (Patent), 3304

NICKEL-CADMIUM BATTERIES/FABRICATION
1973 GSFC battery workshop, second day, 92 (N-75-17808)
Battery design for aerospace power supplies, 393 (AD-709273)
Controlled porosity and pore size substrates for nickel--cadmium cells, 4150
Cylindrical nickel--cadmium battery (Patent; anode = substrate posted with CdO, electroconductive material, $H_2O$, organic solvent, and binder), 985
Design characteristics of nickel--cadmium batteries, 1557
Development of manufacturing methods and techniques for the production of improved alkaline batteries. Final technical report, 1 April 1965-30 June 1966 (Approximately 15 Ah, operate down to -30°F), 453 (AD-802279)
Development of manufacturing methods and techniques for the production of improved alkaline batteries. Interim engineering progress report, 1 Apr-30 Jun 1965, 288 (AD-472261)
Development of nickel-alkaline batteries for aerospace lightweight secondary power. Final report, 1 Dec 1972-30 Jun 1975 (50Ah, 20Wh/lb), 587 (AD-A-022350)
Fabrication and testing of negative-limited sealed nickel--cadmium cells. Quarterly report, 1 Jul-30 Sep 1973 (3 and 20 Ah), 2066 (N-74-10078)
Flat alkaline cell construction and method for assembling the same (Patent), 1031
Flexible, thin-film nickel-cadmium batteries, 1476
High energy-weight ratio nickel cadmium cells (40 Wh/kg), 1556
Manufacture and use of storage batteries, 1614
Miniature sealed nickel-cadmium batteries. Final report Mar 71-Jun 72, 552 (AD-913104)
Nickel--cadmium battery electrode manufacture with waste water recycling processes (Patent), 1020
Nickel-cadmium batteries for the orbiting astronomical observatory spacecraft-II (OAO) (Increasing cell voltage with life found to be due to high precharge in negative plates; method for alleviating problem), 2455
Nickel-cadmium cells. Final report, 30 March 1972-30 May 1973, 707 (N-75-21792)
Nickel-cadmium NKD storage battery links, 1523 (AD-470357)
Nickel-cadmium cells. Final report, 30 Mar. 1972-30 May 1973, 710 (N-76-13598)
Possibilities for increasing the technical level and specific weight and volumetric electrical rating characteristics of chemical sources of current, 1460 (AD-777665)
Sealed batteries fabricated with evaporated poly(paraxylene) (Patent), 1167
Sealed nickel--cadmium alkaline storage battery (Patent; $Ni(OH)_2$ cathode, $Cd(OH)_2$ anode), 958
Sealed nickel--cadmium alkaline storage battery (Patent; cathode impregnated with LiOH), 959
Sintered porous plaque battery plates and method of making same (Patent), 3289
Small UPS: the battery view (Features of batteries in uninterruptible power supplies), 882
Standard family of cells and battery assemblies, 1526
Study of process variables associated with manufacturing hermetically-sealed nickel--cadmium cells. Final report, 702 (N-74-26501)
Vented nickel--cadmium battery assembly BB-500 ( )/U. Final report, 15 Dec 1967-30 May 1969, 391 (AD-698030)

NICKEL-CADMIUM BATTERIES/FAILURES
Alkaline battery evaluation. Report for Apr 1962-15 Oct 1964, 1672 (AD-465888)
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 1, 15 May-15 Aug 1964, 1642 (AD-447480)
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 2, 15 Aug-15 Nov 1964, 1730 (AD-608666)
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 3, 15 Nov 1964-15 Feb 1965, 1732 (AD-611850)
Battery, secondary, Gulton Industries, P/N D7920, S/N 960, electrical power system, 1919 (AD-902965L)
Causes of failure in sealed nickel--cadmium batteries, 2402
Failure mechanisms in sealed batteries. Semiannual technical summary report No. 1, 30 June-31 December 1966, 1855 (AD-813731)
Failure mechanisms in sealed batteries. Part II. Semiannual technical progress report No. 2, 31 December 1966-30 June 1967, 1860 (AD-821895)
Failure mechanisms in sealed batteries. Final technical report, 1 July 1966-30 April 1969, 1620 (AD-85592)
Failure mechanisms in sealed batteries. Semiannual technical report No. 5, 1 July-31 December 1968, 1887 (AD-851056)
Failure mechanisms and analyses of sealed batteries. Technical report, 1 February 1968-30 April 1969, 1896 (AD-859690)
Nickel/cadmium aircraft batteries: failure prediction in battery shops by gassing rate measurements. Technical note, 2020 (AD-A-026197)
Nickel/cadmium aircraft batteries: battery alarm unit. Technical note, 2027 (AD-A-039521)
Vibrational effects on sealed nickel-cadmium cells, 2114 (X-711-77-28)
Why nickel-cadmium batteries fail, and how to revive them, 2145

NICKEL-CADMIUM BATTERIES/FEASIBILITY STUDIES
Sealed nickel-cadmium batteries for aircraft electrical systems, 342 (AD-634845)

NICKEL-CADMIUM BATTERIES/FORECASTING
General state of advancement of battery technology, 2629

NICKEL-CADMIUM BATTERIES/FUNCTIONAL MODELS
Modeling and testing of storage batteries, 2359

NICKEL-CADMIUM BATTERIES/GASES
Battery-driven motor arrangement (Patent; design to prevent hydrogen explosions), 887
Cell having anode containing silver additive for enhanced oxygen recombination (Patent), 3647
Truth about Ni-Cd cell reversal, 866

NICKEL-CADMIUM BATTERIES/GASKETS
Alkaline cells (Patent; halogenated butyl rubber with blended styrenic and phenolic resins), 3568

NICKEL-CADMIUM BATTERIES/GRIDS
Sinter of uniform, predictable, blemish-free nickel plaque for large aerospace nickel cadmium cells (Grid fabrication), 3225 (N-75-18717)

NICKEL-CADMIUM BATTERIES/HEAT PIPES
Experimental investigation of cooling a high rate nickel--cadmium battery with an intercell planar heat pipe. Technical report, Sep-Dec 1970, 2943 (AD-735736)
Intercell planar heat pipe for the removal of heat during the cycling of a high rate nickel--cadmium battery, 2939 (AD-730867)

NICKEL-CADMIUM BATTERIES/HEAT TRANSFER
Heat transfer in sealed nickel-cadmium spacecraft cells and batteries. Special technical report, March-December 1968, 1889 (AD-851880)
Research into fundamental phenomena associated with

spacecraft electrochemical devices: calorimetry of nickel-cadmium cells. Progress report, 1 July-30 September 1968 (6- and 20-Ah cells), 2057 (N-69-39418)
Research into fundamental phenomena associated with spacecraft-electrochemical devices and calorimetry of nickel-cadmium cells. Progress report, 1 October 1968-31 August 1969, 2058 (N-69-40947)
NICKEL-CADMIUM BATTERIES/HEATING
Determination of the temperature of airtight cadmium-nickel storage batteries (Calculational method), 2309
Heat dissipation of primary and secondary batteries (30-Ah Ni--Cd, 360-Ah Ag--Zn), 2584
Heat generation in sealed batteries, 2520
Heat generation in sealed batteries, 2477
Heat release in the operation of hermetic nickel--cadmium storage batteries (Heat absorbed during charging), 2219
Nickel/cadmium batteries in aircraft engine starting, 2281
Nickel/cadmium batteries in aircraft engine starting, 2308
Nickel/cadmium aircraft batteries: thermal considerations, 2009 (AD-A-011995)
Temperature investigation of OV-10A battery and battery compartment. Report No. 1 (final), 20 May-30 Dec 1971, 1932 (AD-905610L)
NICKEL-CADMIUM BATTERIES/HYBRID SYSTEMS
Fuel cell-secondary cell combination (Patent), 825
Low power metal hydride fuel cell/battery hybrid systems (Steady 2 mA at 32 V or 430 mA-60 ms pulses at 24 V), 669 (ECOM-0227-F)
NICKEL-CADMIUM BATTERIES/IMPEDANCE
Impedance of sealed nickel-cadmium dry cells, 2579
Study of nickel--cadmium batteries for use in applications satellites, Phase 2. Evaluation of electrical impedance as a function of the frequency at various temperatures and charge states of Ni--Cd VO 23S batteries, 2077 (N-74-16813)
NICKEL-CADMIUM BATTERIES/INSPECTION
Study of Sonotone Corporation nickel-cadmium size F battery cells: failure analysis. Addendum to final report (Examination of components), 2797 (AD-449249)
NICKEL-CADMIUM BATTERIES/LEAKS
Leak rates in sealed cells, 2334
Wettability of the casing and electrolyte leakage in airtight nickel-cadmium storage batteries, 2389 (AD/A-005065)
NICKEL-CADMIUM BATTERIES/LIFETIME
Batteries for biotelemetry and other applications, 1477
NICKEL-CADMIUM BATTERIES/MAINTENANCE
Nickel-cadmium battery reconditioner, 2881 (AD-638603)
NICKEL-CADMIUM BATTERIES/MANUALS
Nickel-cadmium battery. Application engineering handbook, 149
Operation and service manual for Blockhouse Power Backup Battery Rack 52E230049 and External Power Control and Monitor Backup Battery Rack 52E230058, 1894 (AD-856788)
NICKEL-CADMIUM BATTERIES/MANUFACTURING
Lightweight cells in batteries (21.4 Wh/kg), 769 (X-711-77-28)
Manufacturing variables (20 Wh/lb), 768 (X-711-77-28)
NICKEL-CADMIUM BATTERIES/MATERIALS
Applications of nickel. Annual report (Ni production and consumption; possibility for substitutions in event of shortage), 3037 (AD-846999)
Battery materials, 1970, 4427
Cadmium: a materials survey, 2917 (AD-680443)
Development of uniform and predictable battery materials for nickel-cadmium aerospace cells. Quarterly report, 8 September-7 December 1969, 3212 (N-70-35576)
Electric batteries described in recent patents, 4788
Feasibility investigation of plastic parts for vented, nickel-cadmium battery BB-607( )/U, 2918 (AD-680893)
Technical and microeconomic analysis of cadmium and its compounds. Final report on Task 1, 3257 (PB-244625)
NICKEL-CADMIUM BATTERIES/MATHEMATICAL MODELS
Analysis and evaluation of spacecraft battery accelerated life test data, 1783 (AD-713457)
Nickel--cadmium battery performance prediction models: Apollo telescope mount application, 2351
Nickel-cadmium battery performance prediction models. Apollo telescope mount application, 2349
Nickel-cadmium cell composite reliability model (Cell failure analysis technique), 2183
NICKEL-CADMIUM BATTERIES/MEETINGS
1976 Goddard Space Flight Center battery workshop, 122 (X-711-77-28)
Space power systems: energy storage (6th Esro Summer School, Noordwijk, Netherlands, 1968), 86 (N-70-26430)
NICKEL-CADMIUM BATTERIES/MONITORING
C-MOS voltage monitor protects Ni--Cd batteries, 4185
MEL research and development phase report (Voltage monitor and switching circuit for satellite power supplies), 2786 (AD-428945)
Method and apparatus for reconditioning nickel-cadmium batteries (Patent application), 3238 (N-77-12511)
Monitor NiCad's with this low-battery detector, 3438
Nickel/cadmium aircraft batteries: single sensor temperature monitoring. Technical note (Detection of short circuits), 2025 (AD-A-037722)
Nickel/cadmium aircraft batteries: battery alarm unit. Technical note, 2027 (AD-A-039521)
NICKEL-CADMIUM BATTERIES/NONDESTRUCTIVE TESTING
Battery workshop, 2054 (N-67-26364)
NICKEL-CADMIUM BATTERIES/NONRADIOACTIVE WASTE DISPOSAL
Assessment of industrial hazardous waste practices, storage and primary batteries industries. Final report, Apr-Sep 1974, 725 (PB-241204)
NICKEL-CADMIUM BATTERIES/OPERATION
Aircraft storage batteries, 2637
Application of nickel-cadmium batteries in deep discharge synchronous orbit applications (7 to 10 years at 75% to 85% depth of discharge), 2182
Electrochemical power sources. Final technical report, 18 September 1968-31 January 1974, 3113 (AD/A-001610)
Electrochemical energy sources, 2618
Low-temperature operation of batteries. Final report, 15 May 1962-14 Jul 1964, 1648 (AD-451940)
Military storage batteries (Use at temperatures below -40°), 1604
Nickel--cadmium aircraft battery run-a-way, 2269
Operation of storage batteries used at very low temperatures (Patent; electrolyte concentration greater than 7N), 2398
Polarity reversal phenomena in nickel-cadmium cells, 2157
Reconditioning of RCA STATCOM batteries in orbit, 2121 (X-711-77-28)
Study of nickel--cadmium batteries for use in applications satellites, Phase 3, 2078 (N-74-16814)
Voltage sensor limits discharge in batteries, 4504
NICKEL-CADMIUM BATTERIES/PERFORMANCE
100 ampere-hour nickel-cadmium battery development program. Volume 1. Final report, 704 (N-75-14266)
100 ampere-hour nickel-cadmium battery development program. Volume 2, 705 (N-75-14267)
60/240 watt hydrazine fuel cell system (Nickel-cadmium battery recharged by hydrazine air fuel cell), 2523
Analysis of the operating parameters of secondary batteries in an orbiting space vehicle application, 2535
Auxiliary electrode for charge control of sealed nickel-cadmium batteries. Quarterly progress report No. 5, 15 Jun-14 Sep 1965, 1692 (AD-475526)
Batteries. 1. Virtues of nickel--cadmium, 2271
Battery and cell redundancy considerations for long duration space missions, 4057
Battery and third electrode performance characteristics for varying charge and discharge rates (20 A-h, 24 cell, sealed battery), 2409
Battery and third electrode performance characteristics for varying charge and discharge rates (20 A-hr, 24-cell, sealed batteries), 2412
Battery considerations for a communications satellite, 2623
Battery system of the Aeros satellite, 1260
Behaviors of negative plates for alkaline storage batteries (Improved performance through addition of Fe to anode), 1565
Canadian research on secondary batteries, 2615
Characterization of the 20-Ah nickel--cadmium cell used for energy storage on the orbiting astronomical observatory, 2346
Characterization of sealed nickel-cadmium cells, 2590
Characteristics affecting the operation of the UK 3 satellite battery, 1696 (AD-478910)
Characteristics of hermetically sealed nickel cadmium batteries, 1754 (AD-661215)
Characteristics of sealed nickel-cadmium rechargeable batteries ''PANANICA'', 2444
Commercial applications of advanced battery technology ($Li/NiF_2$ combined with Ni/Cd for electric cars), 5260
Continuous charge-discharge cycling studies on hermetically sealed nickel-cadmium cells operating at a 10% depth of discharge (1 year, 6000 cycles, -10 to +50°C), 1849 (AD-802841)
Design and performance of the Telesat power subsystem, 2294
Design characteristics of nickel--cadmium batteries, 1557
Design of electric automobile employing nickel-cadmium batteries, 5249
Development of the BB-520( )/U nickel--cadmium battery for hybrid applications. Semi-annual report Nov 1972--May 1973, 556 (AD-915855L)
Development and manufacture of primary--secondary hybrid battery, 542 (AD-906599L)
Development test and evaluation of the AN/PRC-66 uhf manpack transceiver. Final report, 11 September-3 October 1967, 1863 (AD-826132)
Diode control research. Quarterly progress report No. 6, 1 September-1 December 1967 (Stabistor charge control), 1862 (AD-825660)
Durability of D-size sealed nickel-cadmium cells (Over 5600 cycles at depth of discharge $1/3$ nominal capacity) 2327
Effect of carbonated electrolyte on the performance of sintered plate nickel-cadmium cells, 1733 (AD-614104)
Effect of carbonate on the performance of sealed nickel-cadmium cells, 2418
Electric power systems for space: a progress report, 2187
Electrical characteristics of a sealed nickel--cadmium battery having a bipolar construction, 2487
Electrochemical sources of pulse power, 371 (AD-671685)
Electrochemical engineering of battery systems. Final report, 10 Nov 1971-9 Nov 1972 (Changes in diffusely reflected light from electrode monitor battery

performance), 1970 (AD-914248)
Evaluation of INTELSAT IV nickel-cadmium cells, 2379
Evaluation program for secondary spacecraft cells: synchronous orbit testing of General Electric Company 6.0 ampere-hour sealed nickel--cadmium cells, 2070 (N-74-13762)
Evaluation program for secondary spacecraft cells: initial evaluation tests of 20.0 ampere-hour nickel--cadmium spacecraft cells manufactured by Gulton Industries, Incorporated, 2079 (N-74-17803)
Experimental investigation and model development of the skylab ATM secondary nickel--cadmium batteries, 2102 (NASA-CR-120749)
Fuel cell manpack power source. Technical report (30-W hydrogen and 60-W hydrazine hybrid fuel cells with nickel--cadmium batteries), 1764 (AD-680894)
General Electric 20-ampere hour nickel-cadmium battery. Interim test report, 2087 (N-75-25290)
H-3 helicopter battery system investigation. Interim report No. 1, Apr-Sep 1973, 1974 (AD-915448L)
Hermetically sealed nickel-cadmium batteries for the initial defense communication satellite program/augmentation (IDCSP/A), 1467
Hermetically sealed nickel--cadmium batteries for the satellites, Shinsei and Denpa, 1309
Hermetically sealed nickel cadmium batteries for satellites, 1230
Hermetically-sealed nickel-cadmium and silver-cadmium storage batteries, 4685
High capacity sealed nickel--cadmium batteries (Development), 1558
High energy density nickel--cadmium batteries (Ni/KOH/Cd, 27 Wht/lb, 6.7 A-h), 2381
High energy density nickel--cadmium cells, 1422
Investigation of maintenance-free high-rate, nickel-cadmium batteries for aircraft application. Quarterly technical progress report No. 4, 1 March-1 June 1967, 463 (AD-818309)
Investigation of maintenance-free, high-rate, nickel-cadmium batteries for aircraft application. Quarterly technical report No. 3, December 1966-March 1967, 1856 (AD-814002)
Investigation of maintenance-free, high-rate, nickel-cadmium battery power system for aircraft application. Quarterly technical progress report No. 8, 1 March-31 May 1968 (Breadboard circuit tested from -40 to +140 F), 490 (AD-837598)
Investigation of maintenance-free, high-rate, nickel-cadmium batteries for aircraft application. Quarterly technical progress report No. 1, 451 (AD-800799)
Investigation of methods leading to the determination of the state of charge of nickel-cadmium batteries. Final report, 1 Jan-30 Dec 1963 (BB418 cells), 1630 (AD-435989)
Investigation of hermetically sealed maintenance-free, high-rate, nickel-cadmium batteries for aircraft applications. Quarterly technical progress report No. 3 (Effects of plate thickness on performance), 1670 (AD-463855)
Investigation of hermetically sealed, high-rate, maintenance-free, nickel-cadmium batteries for aircraft applications. Final technical report, Jul 1964-Jun 1966, 1712 (AD-489830)
Investigations leading to the design of a reliable sealed nickel-cadmium cell. Final report, 1 May 1963-30 Apr 1964, 271 (AD-460165)
Laboratory investigations and research toward the development of nickel-cadmium alkaline storage batteries. Quarterly progress report No. 1, 332 (AD-622908)
Latest battery improvements and mathematical techniques for their selection, 2582
More power for the battery, 1206
New handle for nickel--cadmium batteries (Gas turbine engine starting capability), 2357
Ni/KOH/Cd battery for heavy diesel equipment, 2648
Nickel--cadmium batteries. 6. Sealed aircraft batteries, 1509
Nickel--cadmium batteries. 2. High-temperature effects on sealed Ni--Cd batteries (25, 46, 67°C: charging efficiency effects of Li cycling), 2556
Nickel--cadmium batteries. 1. Performance prediction for Ni--Cd batteries (Crane Life-Cycle Test Program), 2557
Nickel--cadmium batteries provide long-lasting, portable power (Descriptive, popular-type article), 154
Nickel--cadmium battery performance prediction models: Apollo telescope mount application, 2351
Nickel-cadmium battery performance prediction models. Apollo telescope mount application, 2349
Nickel/cadmium aircraft batteries: high rate discharge equipment. Technical note (Apparatus to study battery performance at high discharge rates), 3135 (AD-A-031866)
Operating characteristics of sealed nickel-cadmium batteries at low temperatures (To -40°F), 2558
Optimization of battery subsystems for earth satellite lifetimes of greater than 5 years, 2485
Optimum structures for miniature Ni-Cd sealed cells and batteries. Quarterly report No. 1, 11 August-10 November 1966 (1 and 4 Ah), 1746 (AD-649628)
Organic electrolyte batteries (Lithium--nickel halide battery in parallel with nickel--cadmium battery), 2536
Performance of 3rd electrode cells in OAO, 2377
Performance characteristics of magnesium-manganese dioxide/nickel-cadmium hybrid system. Technical report, 1946 (AD-908198)
Performance characteristics of reconditioned batteries on the CTS (5 Ah), 2122 (X-711-77-28)
Practical pocket-size powerhouse promises phenomenal performance (Less than 10 percent capacity loss after 3000 cycles), 2692
Present position of electric storage battery, 1598
R and D for hybrid battery and cell studies. Interim report, 1 Apr-1 Oct 1973, 561 (AD-917663L)
Reasons for changes in the characteristics of hermetic nickel--cadmium storage batteries under long-term operation (Formation of $Cd_{21}Ni_5$ in anode, gas adsorption rate instability, shorting, case corrosion), 2233
Recent improvements in high performance secondary batteries for use on offshore platforms, 1105
Recent improvements in high performance secondary batteries for use on offshore platforms, 2238
Rechargeable cell having improved cadmium negative electrode and method of producing same (Patent), 3649
Relationship of electrode structures and cell performance in sealed, sintered-type nickel--cadmium button cells during cycling, 2276
Review of battery systems for electrically powered vehicles, 2527
Sampling tests of one type MS18045-74 nickel--cadmium battery, manufactured by Marathon Battery Company under contract N00383-73-C-1824, 1993 (AD-918123L)
Sampling tests of four type MS17334-2 nickel--cadmium batteries, manufactured by Marathon Battery Company, 1907 (AD-894791L)
Sealed batteries fabricated with evaporated poly(paraxylene) (Patent), 1167
Sealed cells and auxiliary electrodes, 1488
Sealed nickel--cadmium cells for hybrid battery applications. Final report, 10 Jul 1972--31 Dec 1973, 242 (AD-918-041L)
Sealed nickel--cadmium batteries, 1570
Sealed storage batteries (Patent; inhibition of gas generation by Pb or Sb addition), 1045
Sintered-plate nickel-cadmium battery (Large peak currents for miniature battery), 2683
Statistical studies of rechargeable battery systems, 2479
Storage battery cars of Oberhasli power plants, 2769
Studies of available energies in Ni-Cd, Ag-Zn, and Ag-Cd batteries, 1759 (AD-671685)
Study of high-current densities in nickel cadmium bipolar batteries. Final report (12.5 A/cm²), 1745 (AD-647468)
Study of nickel--cadmium batteries for use in applications satellites. Phase 1, 2072 (N-74-15773)
Thermal considerations of sealed nickel--cadmium batteries, 2345
Thermal runaway condition in nickel-cadmium cells and performance characteristics of sealed light-weight cells, 2611
Two year flight performance of the Lockheed type XI nickel--cadmium battery, 2488
Unwanted memory spooks nickel-cadmium cells, 2161
Viking battery ground and flight test results, 2127 (X-711-77-28)
What nickel cadmium battery can do for fleet operators (3000 cycles of complete discharge and recharge with no loss in capacity), 2693

NICKEL-CADMIUM BATTERIES/PERFORMANCE TESTING

Accelerated test program for sealed nickel-cadmium spacecraft batteries/cells. Interim report, 2097 (N-76-26688)
Accelerated test, 2116 (X-711-77-28)
Accelerated life tests on NATO III batteries (20 Wh/lb, effects of reconditioning), 2125 (X-711-77-28)
Advanced development models of vented nickel-cadmium batteries. Acceptance test report (BB-435/U, BB-437/U, BB-438/U, and BB-439/U), 1740 (AD-629419)
Advanced development models of vented nickel-cadmium batteries. Test report (BB-435( )/U, BB-437( )/U, BB-438( )/U, and BB-439( )/U), 1747 (AD-651961)
Advanced development model of sealed nickel-cadmium batteries. Test report (Over 1000 cycles), 1750 (AD-654057)
Alkaline battery evaluation. Final report, 30 Jun 1960-15 Mar 1964 (12- and 20-Ah Ni/Cd, 25-Ah Ag/Zn, and 20-Ah Ag/Cd cells), 1724 (AD-602676)
Arctic troop tests of type 6TNC nickel-cadmium batteries. Final report, 1852 (AD-806478)
Arinc Research Corporation evaluation of electric power equipment on aircraft, technical administration of. Final report, 1636 (AD-439635)
Arinc Research Corporation evaluation of electric power equipment on aircraft, technical administration of. Final report, 1637 (AD-439635)
Battery cell with third electrode performance test results (20 A-h cell), 2410
Battery cell with third electrode performance test results (20 A-hr), 2413
Cell design (6 and 12 Ah), 2118 (X-711-77-28)
Computerized data acquisition system for testing nickel-cadmium batteries, 2510
Cycle life test. Evaluation program for secondary

spacecraft cells. Annual report, 2096 (N-76-26687)
Cycle life performance testing, Heliotek 50-ampere hour cells, 2115 (X-711-77-28)
Cycle life and storage test results, 2124 (X-711-77-28)
Data acquisition test report on OH-58A NiCad battery operation. Final technical report, 1998 (AD/A-001526)
Diode control research. Final report, May 1966-15 July 1969 (Method for fast evaluation of cells for use in stabistor diode-controlled batteries capable of high-rate charging), 3054 (AD-861077)
Engineering evaluation of aircraft batteries. Research and development technical report, 1796 (AD-733289)
Engineering development and qualification of large sealed nickel-cadmium batteries for long-duration space missions, 1102
Evaluation of secondary batteries, 2600
Evaluation program for secondary spacecraft cells. Initial evaluation tests of Eagle-Picher Industries, Incorporated, 3.0 ampere-hour nickel--cadmium spacecraft cells, 2071 (N-74-13763)
Evaluation program for secondary spacecraft cells: initial evaluaton tests of General Electric Company 6. 0 ampere hour nickel--cadmium spacecraft cells with auxiliary electrodes for the atmospheric explorer satellite C and D, 2080 (N-74-19703)
Evaluation program for secondary spacecraft cells. Annual report No. 10; report on cycle life test, 1838 (AD-781835)
Evaluation program for secondary spacecraft cells: initial evaluation tests of General Electric Company 8.0 ampere-hour nickel--cadmium spacecraft cells with auxiliary electrodes for the small astronomy satellite (SAS-C), 1837 (AD-781788)
Evaluation of batteries for satellite applications, 2613
Evaluation of nickel--cadmium batteries with non-cellulosic separators, 1916 (AD-901311L)
Evaluation program for secondary spacecraft cells. Acceptance tests of General Electric 4.5 ampere-hour nickel--cadmium cells, NIMBUS type, 1809 (AD-741704)
Evaluation tests of two MS18045-49 batteries manufactured by Marathon Battery Company to MS90365-1 and -2 requirements, 1963 (AD-912153L)
Evaluation program for secondary spacecraft cells. Acceptance test of Eagle-Picher Industries, Inc. 6.0 ampere-hour nickel--cadmium cells, 1791 (AD-725849)
Evaluation program for secondary spacecraft cells. Synchronous orbit testing of General Electric Company 12.0 ampere-hour nickel--cadmium cells, 1792 (AD-726407)
Evaluation program for secondary spacecraft cells. Acceptance tests of Gulton Industries 100.0 ampere-hour nickel--cadmium cells, 1794 (AD-729291)
Evaluation program for secondary spacecraft cells. Acceptance test of Gulton Industries, Inc., 12 and 20 ampere-hour adhydrode cells, 1795 (AD-732712)
Evaluation program for secondary spacecraft cells. Acceptance tests of Eagle-Picher 12.0 ampere-hour nickel--cadmium cells with auxiliary electrodes. Report for 16 Mar-26 Apr 1971, 1799 (AD-735003)
Evaluation of a forced-air-cooled battery manufactured by Marathon Battery Company, 1944 (AD-907585L)
Evaluation program for secondary spacecraft cells. Annual report No. 8, 1802 (AD-738680)
Evaluation program for secondary spacecraft cells. Acceptance tests of Heliotek Division, Textron, Inc. 20-0 ampere-hour nickel--cadmium cells, 1804 (AD-739740)
Evaluation program for secondary spacecraft cells. Acceptance test of Eagle-Picher 100 ampere-hour nickel--cadmium cells with auxiliary electrodes, 1806 (AD-740061)
Evaluation program for secondary spacecraft cells. Acceptance tests of Eagle-Picher 20.0 ampere-hour nickel--cadmium cells with auxiliary electrodes, 1807 (AD-740105)
Evaluation tests of two MS 18045-49 batteries manufactured by Gulton Industries, Inc., 1918 (AD-902358L)
Evaluation program for secondary spacecraft cells. Synchronous orbit testing of General Electric Company 6.0 ampere-hour nickel--cadmium cells, 1779 (AD-711592)
Evaluation program for secondary spacecraft cells. Acceptance tests of Gulton Industries 6.0 ampere-hour nickel--cadmium cells with Gulton plates, 1780 (AD-711594)
Evaluation program for secondary spacecraft cells. Acceptance test of Gulton Industries, Inc., and General Electric Company 6.0 ampere-hour nickel--cadmium cells, 1781 (AD-711595)
Evaluation program for secondary spacecraft cells. Acceptance test of Sonotone Corporation 20 ampere-hour nickel--cadmium cells (Effect of mechanical pressure on cell plates), 1782 (AD-711847)
Evaluation program for secondary spacecraft cells. Acceptance test of Gulton Industries 5.0 ampere-hour nickel--cadmium spacecraft cells with cobalt additive, 1784 (AD-714161)
Evaluation of maintenance-free battery power system manufactured by Gulton Industries, Inc., 1920 (AD-903374L)
Evaluation of high rate life test employing one type MS 18045-75 nickel--cadmium battery. Final report, 1922 (AD-903420L)
Evaluation of high rate life test employing one type MS 90365-2 nickel--cadmium battery. Final report, 1923 (AD-903421L)
Evaluation of high rate life test, authorized by AIRTASK A05-536-805/323-2/6178, employing one type MS 18045-74 nickel--cadmium battery. Final report, 1924 (AD-903445L)
Evaluation program for secondary spacecraft cells. Annual report No. 7, 1786 (AD-718854)
Evaluation program for secondary spacecraft cells. Acceptance test of 6.0 ampere-hour nickel--cadmium secondary cells (ceramic seals with nickel braze) manufactured by General Electric Company, 1787 (AD-720770)
Evaluation program for secondary spacecraft cells. Acceptance test of General Electric Company 6.0 ampere-hour nickel--cadmium cells w/ signal and recombination electrodes, 1790 (AD-725848)
Evaluation program for secondary spacecraft cells. Initial evaluation tests of General Electric Company standard and teflonated negative electrode 20.0 ampere-hour, nickel-cadmium spacecraft cells with auxiliary electrodes, 2082 (N-74-31530)
Evaluation program for secondary spacecraft cells: general performance test of General Electric Company 6. ampere-hour nickel-cadmium secondary spacecraft cells, 1763 (AD-679699)
Evaluation program for secondary spacecraft cells: acceptance test of General Electric Company 12 ampere-hour auxiliary electrode nickel-cadmium cells, 1770 (AD-694010)
Evaluation program for secondary spacecraft cells. Acceptance test of Sonotone Corporation 3.5 ampere-hour nickel-cadmium cells, 1873 (AD-834213)
Evaluation program for secondary spacecraft cells. Fourth annual report of cycle life test, 1875 (AD-834600)
Evaluation program for secondary spacecraft cells. Acceptance test of Gulton Industries, Inc. 6.0 ampere-hour adhydrode nickel-cadmium cells, 1877 (AD-837084)
Evaluation program for secondary spacecraft cells. General performance test of Gulton Industries, Inc. 20 ampere-hour adhydrode nickel-cadmium cells, 1880 (AD-840860)
Evaluation program for secondary spacecraft cells. General performance test of Svenska Ackumulator Aktiebolaget Jungner of Sweden 4.0 ampere-hour nickel-cadmium cells, 1881 (AD-845234)
Evaluation program for secondary spacecraft cells. Fifth annual report of cycle life test, 1890 (AD-852580)
Evaluation tests on nickel-cadmium batteries, type S-101, Size AA, 1633 (AD-437713)
Evaluation tests on nickel-cadmium batteries type FC-23, 1634 (AD-438094)
Evaluation of two splash-proof aircraft batteries, nickel-cadmium, type MS18122, manufactured by General Electric Company, 1706 (AD-485571)
Evaluation and improvement of a sealed battery system for aircraft. Final technical report, Nov 1971-Jul 1974, 2012 (AD-A-014337)
Evaluation program for secondary spacecraft cells: initial evaluation tests of General Electric Company 6. ampere-hour nickel-cadmium spacecraft cells for the improved Tiros operational satellite (ITOS), 2089 (N-75-30652)
Evaluation program for secondary spacecraft cells: initial evaluation tests of General Electric Company 12.0 ampere-hour nickel-cadmium spacecraft cells for the International Ultraviolet Explorer (12 Ah), 2098 (N-76-26693)
Evaluation program for secondary spacecraft cells. Acceptance test of General Electric Company 12 ampere-hour auxiliary electrode nickel-cadmium cells, 2055 (N-69-37830)
Fabrication and testing of negative-limited sealed nickel-cadmium cells. Final report, 1 Jul 1974-28 Feb 1975 (3 and 20 Ah, 1000 cycles on 30-min regime at 25% depth of discharge), 2091 (N-75-33493)
First article testing of two type MS90321-79W nickel--cadmium cells, manufactured by Marathon Battery Company under contract N00383-73-C-0683, 1987 (AD-917330L)
First article tests of two type MS90321-78W nickel--cadmium cells, manufactured by General Electric Company under contract N00383-72-C-2798, 1952 (AD-910142L)
First article tests of two type MS 17334-2, nickel--cadmium batteries manufactured by Gulton Battery Corporation under contract N00383-72-C-5222, 1980 (AD-916409L)
First article tests of two type MS90365-2 nickel--cadmium aircraft batteries, manufactured by Eagle-Picher Industries, Inc., under contract N00019-72-C-0081. Final report (KOH electrolyte), 1948 (AD-908388L)
First article tests of two type MS90365-2 nickel--cadmium aircraft batteries manufactured by Gulton Industries, Inc. Final report, 1913 (AD-901265L)
First article tests of two type MS90365-1 nickel--cadmium aircraft batteries manufactured by Gulton Industries, Inc. (KOH electrolyte), 1915 (AD-901267L)
First article tests of two type MS 90321-68W nickel--

cadmium cells manufactured by General Electric Company under contract N00383-72-C-1556, 1925 (AD-904366L)
First article testing of one type MS 90365-1 nickel--cadmium battery manufactured by Gulton Battery Corporation under contract N00383-70-C-3625. Addendum. Final report, 1926 (AD-904367L)
First article tests of two type MS 90377-1 nickel--cadmium batteries, manufactured by Gulton Industries, Inc., under contract N00383-71-C-4927, 1928 (AD-904428L)
First article tests of two type MS 3319-1 nickel--cadmium batteries, manufactured by Gulton Battery Corporation, 1930 (AD-904700L)
H-2 battery system investigation. Interim report No. 1, Apr--Oct 1973, 1975 (AD-915478L)
HEAO cell parametric tests (20 A), 2126 (X-711-77-28)
Improved aircraft battery, 1239
Internal energy storage for circulatory assist devices (Studies of implantable nickel--cadmium cells for heart assist devices), 1451
Investigation of switching circuitry and deterioration for NiCad ERX 33 cells. WS 107A, 1869 (AD-832486)
JPL test plan for evaluation of new technology, nickel-cadmium cells, 2117 (X-711-77-28)
Life tests and reconditioning, 2123 (X-711-77-28)
Nickel--cadmium battery evaluation for Apollo telescope mount application, 2452
Nickel--cadmium batteries for Apollo telescope mount (20 Ah), 2101 (NASA-CR-120747)
Nickel cadmium cells for the spacecraft battery, 2594
Nickel/cadmium aircraft batteries: float charge test, 2000 (AD/A-002767)
Nickel-cadmium cells for spacecraft battery, 1544
Novel negative-limited sealed nickel-cadmium cell, 4060
Optimum structures for miniature Ni-Cd sealed cells and batteries. Quarterly report No. 3, 11 February-10 October 1967 (Includes effects of additives to plates), 365 (AD-665443)
Optimum structures for miniature Ni-Cd sealed cells and batteries. Quarterly report No. 2, 11 November 1966-10 February 1967 (1 and 4 Ah), 1749 (AD-652700)
Performance of battery BB-641/A in OH-6A helicopter. Research and development technical report, 1831 (AD-774797)
Power system evaluator operational characteristics, 2454
Qualification tests of two type MS3319-1 nickel--cadmium batteries, manufactured by Marathon Battery Company, 1951 (AD-910115L)
Qualification of Gulton Industries, Inc., type MS90377-1 nickel--cadmium battery, employing modified low frequency vibration test, 1977 (AD-915890L)
Qualification testing of one type MS90365-2 battery, manufactured by Gulton Battery Corporation under contract N00383-70-C-3405. Addendum to final report, 1937 (AD-906102L)
Qualification tests of one type MS18045-75 nickel--cadmium battery, manufactured by Gulton Battery Corporation, 1949 (AD-908534L)
Qualification tests of one type MS 90365-2 nickel--cadmium aircraft battery, manufactured by Marathon Battery Company, under contract N00383-71-C-0063, 1927 (AD-904404L)
Qualification of NiCad battery, LMSC 1614653-1, 1842 (AD-800981)
Rate of discharge of accelerated life tests of nickel--cadmium cells. Special technical report, 1815 (AD-748253)
Report of qualification test for battery, nickel--cadmium, special purpose S-3 satellite, Boeing part number 10-70428-1, Eagle-Picher part number SAR-8088, 1959 (AD-911407L)
Sampling tests of 37 type MS90321-77W nickel--cadmium cells, manufactured by Gulton Battery Corporation under contract N00383-71-C-4998, 1950 (AD-909904L)
Sampling tests of one type MS90365-2 nickel--cadmium battery, manufactured by Gulton Battery Corporation under contract N00383-73-C-0135, 1989 (AD-917332L)
Sampling tests of 17 type MS90321-66W nickel--cadmium cells, manufactured by Marathon Battery Company under contract N00383-73-C-2016 (KOH electrolyte), 1991 (AD-917732L)
Sampling tests of eight type MS90321-78W, nickel--cadmium battery cells, representing lots 1 through 8, manufactured by Gulton Industries, Inc., under contract N00383-73-C-0627, 1976 (AD-915568L)
Sampling tests of one type MS90447-2 nickel--cadmium battery, manufactured by Marathon Battery Company, 1935 (AD-905687L)
Sampling tests of one type MS 90365-2 nickel--cadmium aircraft battery, manufactured by Gulton Battery Corporation, under contract N00383-72-C-4036. Final report, 1965 (AD-912664L)
Sampling tests of one type MS 18045-44 nickel--cadmium battery, manufactured by Marathon Battery Company, 1940 (AD-906369L)
Sampling tests of one type MS90365-1 nickel--cadmium aircraft battery, manufactured by Gulton Battery Corporation under contract N00383-71-C-5767. Final report, 1941 (AD-906370L)
Sampling tests of two type MS18045-44 nickel--cadmium batteries, manufactured by Marathon Battery Company, 1967 (AD-913295L)
Sampling tests of one type MS3319-1 nickel--cadmium battery, manufactured by Marathon Battery Company under contract N00383-71-C-5772 (KOH electrolyte), 1943 (AD-906794L)
Sampling tests of two type MS 90321-86 nickel--cadmium cells, manufactured by Gulton Battery Corporation under contract N00383-72-M-3749, 1982 (AD-916497L)
Sampling tests of one type MS18045-44 nickel--cadmium aircraft battery manufactured by Gulton Industries, Inc., 1906 (AD-894790L)
Sampling tests of one type MS 90365-1 nickel--cadmium aircraft battery, manufactured by Gulton Industries, Inc. under contract N00383-70-C-3625. Final report, 1908 (AD-894797L)
Sampling tests of 80 type MS90321-84W nickel--cadmium cells, manufactured by Gulton Battery Corporation under contract N00383-72-C-1543 (KOH electrolyte), 1947 (AD-908374L)
Sampling tests of one type MS 3319-1 nickel--cadmium battery, manufactured by Gulton Battery Corporation under contract N00383-70-C-2922, 1971 (AD-915258L)
Sampling tests two type MS 90365-2 nickel--cadmium aircraft batteries manufactured by Marathon Battery Company under contract N00019-72-C-0563. Final report, 1972 (AD-915259L)
Sampling tests of eight type MS 90321-86 nickel--cadmium cells, manufactured by Marathon Battery Company under contract N00383-72-C-2039, 1973 (AD-915260L)
Sampling tests of one type MS 90447-2 nickel--cadmium battery, manufactured by Gulton Industries, Inc. under contract N00383-71-C-0012, 1929 (AD-904429L)
Sealed aircraft battery with integral power conditioner, 1347
Sealed nickel-cadmium batteries, 4687
Sealed nickel--cadmium battery assembly BB-655( )/U (engineering evaluation). Research and development technical report, 1789 (AD-723978)
Selection of cells for the U.K. 3 flight satellite battery, 1853 (AD-809237)
Simulated orbital life tests for spacecraft cells. Part II. Automatically acquired data, review, and recommendations. Special technical report, 1813 (AD-748251)
Space environmental testing of ceramic-sealed Ni-Cd secondary batteries, 2513
Spacecraft nickel--cadmium battery cycle life assessment, 2382
Study of nickel--cadmium batteries for use in applications satellites, Phase 2. Evaluation of charge storage of charged Ni--Cd VO 23S batteries, 2076 (N-74-16812)
Test and evaluation of the Ohio air-vac transport incubator for use in aeromedical airlift. Final report 1972--73, 1990 (AD-917455L)
Test on sealed Ni/Cd cells for satellite use, 2092 (N-76-11560)
Testing of NiCd cells over geostationary orbit type cycling period, 2100 (N-77-10661)
TM research program. High-g tests of components, 1735 (AD-622405)
Vented nickel-cadmium battery assembly BB-607( )/U (132 Wh), 375 (AD-674228)
Viking orbiter battery design and performance, 2128 (X-711-77-28)

NICKEL-CADMIUM BATTERIES/PHYSICAL RADIATION EFFECTS
Alkaline battery evaluation. Report for Apr 1962-15 Oct 1964, 1672 (AD-465888)

NICKEL-CADMIUM BATTERIES/PLANNING
Standard line of secondary batteries (6, 12, and 24 V, 3. to 220 Ah), 265 (AD-452481)

NICKEL-CADMIUM BATTERIES/PLATES
Characteristics of nickel-cadmium batteries produced by powder metallurgy, 4771
Current distribution in storage battery plates with tubular components, 4608
Development of uniform and predictable battery materials for nickel-cadmium aerospace cells. Quarterly report, 8 November 1968-7 February 1969 (Sintering of carbonyl nickel powder), 3201 (N-69-38423)
Development of uniform and predictable battery materials for nickel-cadmium aerospace cells. Quarterly report, 8 May-7 August 1968 (Literature survey pertaining to plate manufacture), 3202 (N-69-39395)
Development of uniform and predictable battery materials for nickel-cadmium aerospace cells. Quarterly report, 8 February-7 May 1969 (Plaque preparation), 3205 (N-69-40923)
Distribution of the active mass on the power-metallurgical anode of nickel--cadmium batteries, 4104
Evaluation program for secondary spacecraft cells. Acceptance test of Sonotone Corporation 20 ampere-hour nickel--cadmium cells (Effect of mechanical pressure on cell plates), 1782 (AD-711847)
Formation of battery plates (Patent; 20 to 100 times the usual formation current), 3469
How American Bosch makes nickel-cadmium batteries for automotive equipment, 4756
Investigation of hermetically sealed maintenance-free, high-rate, nickel-cadmium batteries for aircraft applications. Quarterly technical progress report No. 3 (Effects of plate thickness on performance), 1670 (AD-463855)
Investigation of hermetically sealed, maintenance-free, high-rate, nickel-cadmium batteries for aircraft

applications. Quarterly technical progress report No. 6, 2833 (AD-479652)
Laboratory investigations and research toward the development of nickel-cadmium alkaline storage batteries. Quarterly progress report No. 5, 1 Jul-30 Sep 1947, 276 (AD-471546)
Laboratory investigations and research toward the development of nickel-cadmium alkaline storage batteries. Quarterly progress report No. 7, 1 Jan-31 Mar 1948 (Fabrication of porous plaques), 277 (AD-471547)
Optimum structures for miniature Ni-Cd sealed cells and batteries. Quarterly report No. 3, 11 February-10 October 1967 (Includes effects of additives to plates), 365 (AD-665443)
Production of uniform nickel-cadmium battery plate materials. Quarterly report, 13 June-12 September 1969 (Effects of material and process variables on properties of sintered nickel plaque), 3208 (N-70-17675)
Production of uniform nickel-cadmium battery plate materials. Quarterly report, 13 September-12 December 1969 (Effect of material and process variables on plaque and plate characteristics), 3213 (N-71-28053)
Sintered plates for nickel-cadmium batteries (Chemical preparation (+ and - plates)), 4807
Sintered porous plaque battery plates and method of making same (Patent), 3289
Some factors of the importance in establishing the ratio of negative to positive plate capacities in sealed nickel-cadmium cells, 2991 (AD-805859)
Study of degradation of plates for nickel-cadmium spacecraft cells. Final report (Relative merits of coining sintered plates), 3223 (N-75-15164)

NICKEL-CADMIUM BATTERIES/PRODUCTION
Alkaline batteries: some notes on production of C.A.V.-NiFe cells, 1610
Alkaline batteries, 1601
Possibilities for increasing the technical level and specific weight and volumetric electrical rating characteristics of chemical sources of current, 438 (AD-777665)
Problems in production of lead and nickel/cadmium storage batteries, 1506
Sealed cadmium--nickel batteries (Characteristics, tables), 410 (AD-739211)

NICKEL-CADMIUM BATTERIES/QUALITY ASSURANCE
Assuring reliability in aerospace batteries, 1531

NICKEL-CADMIUM BATTERIES/QUALITY CONTROL
Procedure for analysis of nickel-cadmium cell materials, 3215 (N-74-15744)

NICKEL-CADMIUM BATTERIES/RADIATION EFFECTS
Radiation effects on batteries: an annotated bibliography, 1708 (AD-487015)

NICKEL-CADMIUM BATTERIES/REACTION HEAT
Nickel-cadmium cells. I. Thermodynamics and x-ray studies, 2610

NICKEL-CADMIUM BATTERIES/RELIABILITY
Battery, chargeable, 1.90 volts, 1911 (AD-900779L)
NiCd battery reliability for shuttle-serviced spacecraft (empirical model), 2215
Nickel--cadmium cell reliability, 2226
Nickel-cadmium cell composite reliability model (Cell failure analysis technique), 2183
Primary--secondary battery hybrid systems, 427 (AD-757296)

NICKEL-CADMIUM BATTERIES/RELIEF VALVES
Vent valve for nickel-cadmium energy cells (Patent), 3364

NICKEL-CADMIUM BATTERIES/RESEARCH PROGRAMS
Battery research (Institute for Defense Analyses, Arlington, VA), 251 (AD-428659)
Electrical Power Sources Division. Quarterly progress notes, 1 October 1974-31 December 1974, 740 (PD-18289)
Laboratory investigations and research toward the improvement of sintered-plate alkaline storage batteries. Final report, 301 (AD-493498)
Laboratory investigations and research toward the development of nickel-cadmium alkaline storage batteries. Quarterly progress report No. 2, 331 (AD-622907)
Quarterly progress notes, 1 April 1974-30 June 1974, 564 (AD-922405)
Quarterly progress notes, 1 January 1975-31 March 1975, 598 (AD-B-004545)
Quarterly progress notes, 1 October 1975-31 December 1975, 599 (AD-B-009796)
Recent progress in secondary batteries (U.S. and Europe), 1576
Spacecraft power: guidance and control division, 696 (N-71-10258)

NICKEL-CADMIUM BATTERIES/RESISTORS
Electrochemical cell and safety resistor therefor (Patent; prevents high flash currents), 3516

NICKEL-CADMIUM BATTERIES/REVIEWS
Applied electrochemistry (Book in Russian), 167
Chemical compositions, structures, performance, and uses of batteries; (review with 108 references), 233
Present state and future possibilities of alkaline battery, 1596
Primary and secondary galvanic cells: history and state-of-the-art summary, 29 (AD-671685)
Progress in electric battery industry, 231
Short history of Jungner-Nife nickel-cadmium battery, 1516

NICKEL-CADMIUM BATTERIES/SEALS
Alkaline battery seal and protective coating comprising a fatty acidamide (Patent), 3484
Battery having deformations in a metal layer (Patent; avoids wrinkles occurring during fabrication), 864
Economic aspects of major extensions in spacecraft life (S-2). Volume III. Sections VII and VIII, 2785 (AD-375061)
Hermetic compression seals for alkaline batteries, 4295
Hermetically-sealed nickel-cadmium and silver-cadmium storage batteries, 4685
Studies on sealed nickel--cadmium batteries, 4701

NICKEL-CADMIUM BATTERIES/SIMULATION
Simulation of electrochemical reactors, 1361

NICKEL-CADMIUM BATTERIES/SPECIFIC HEAT
Thermodynamic properties of electrochemical storage cells (20- to 75-Ah cells), 2593

NICKEL-CADMIUM BATTERIES/SPECIFICATIONS
Batteries for the hybrid heat engine/electric vehicle, 5200
Battery cell design priorities for geosynchronous orbit communications satellite, 2119 (X-711-77-28)
High energy lithium battery system in electric vehicle propulsion (Li/$NiF_2$ and Ni/Cd in hybrid system), 5264

NICKEL-CADMIUM BATTERIES/STANDARDS
Law enforcement standards program: NILECJ standard for batteries for personal/portable transceivers, 2106 (PB-251594)

NICKEL-CADMIUM BATTERIES/STORAGE
Evaluation program for secondary spacecraft cells. Evaluation of storage methods, open circuit versus continuous trickle charge, for Sonotone 3.5 ampere-hour sealed nickel--cadmium secondary spacecraft cells, 1805 (AD-740060)
Evaluation of storage methods, open circuit versus continuous trickle charge, for Sonotone 3.5 ampere-hour sealed nickel--cadmium secondary spacecraft cells, 1785 (AD-715803)
Evaluation program for secondary spacecraft cells. Evaluation of storage methods, open circuit versus continuous trickle charge, Sonotone 3.5 ampere-hour sealed nickel-cadmium secondary spacecraft cells, 2056 (N-69-38275)
Evaluation program for secondary spacecraft cells. Evaluation of storage methods, open circuit versus continuous trickle charge, Sonotone 3.5 ampere-hour sealed nickel-cadmium secondary spacecraft cells, 2063 (N-71-13426)

NICKEL-CADMIUM BATTERIES/STORAGE LIFE
Investigation of hermetically sealed maintenance-free, high-rate, nickel-cadmium batteries for aircraft applications. Quarterly technical progress report No. 5, 1691 (AD-473883)

NICKEL-CADMIUM BATTERIES/SUPPORTS
Carbonyl nickel powder (Chemical preparation of B type), 3868

NICKEL-CADMIUM BATTERIES/TEMPERATURE DISTRIBUTION
Thermal analysis of hermetically sealed nickel-cadmium cells for space applications (6 and 20 Ah), 2563

NICKEL-CADMIUM BATTERIES/TEMPERATURE EFFECTS
Sealed secondary cells for space power systems (Ambient temperature effects on charge and discharge characteristics), 2564

NICKEL-CADMIUM BATTERIES/TESTING
1973 GSFC battery workshop, second day, 92 (N-75-17808)
A study of short test and charge retention test methods for nickel-cadmium spacecraft cells. Final report, 2088 (N-75-27566)
Accelerated test plan for nickel--cadmium spacecraft batteries, 2067 (N-74-12741)
Accelerated life tests for nickel cadmium cells (Gulton VO6HS cells), 2282
Analysis and evaluation of spacecraft battery life test data (phase 2). Summary report, 1773 (AD-697938)
Analysis and evaluation of spacecraft battery accelerated life test data, 1783 (AD-713457)
Analysis of accelerated life test data for aerospace nickel-cadmium cells. Final report, November 1972-July 1974 (Predictions for future performance), 2001 (AD/A-002848)
Battery, nickel--cadmium BB-460( )/U. Final report, Mar 1970-Apr 1971, 1797 (AD-733890)
Battery vibration investigation on H-3 helicopter. Report No. 1 (final), Dec 1972-Mar 1973, 1955 (AD-910807L)
Controls for charging secondary cells, 4474
Design and performance of Intelsat IV power subsystem, 1357
Design and development of high charge rate nickel--cadmium batteries. Final report, Mar 1970-Nov 1973 (BB-478 ( )/U, F size, 1.2 V, 6.3 A-h), 559 (AD-917235L)
Design and fabrication of sounding rocket payloads. Final report, 1 Jan 1970-31 May 1972, 2957 (AD-745977)
Diode control research. Quarterly technical progress report No. 10, 1 September-1 December 1968 (Stabistor-controlled 12-Ah spacecraft battery), 1885 (AD-850093)
Diode control research. Quarterly technical progress report No. 11, 1 December 1968-1 March 1969 (Testing of 12-Ah battery with automatic charge-control by means of stabistor diodes), 3045 (AD-854317)

Evaluation program for secondary spacecraft cells: initial evaluation tests of 20.0 ampere-hour nickel--cadmium spacecraft cells manufactured by Gulton Industries, Incorporated, 2079 (N-74-17803)
Evaluation program for secondary spacecraft cells: initial evaluation tests of Gulton Industries, Incorporated, 20.0 ampere-hour nickel--cadmium spacecraft cells with auxiliary electrodes, 2069 (N-74-13761)
Evaluation program for secondary spacecraft cells: initial evaluation tests of Eagle--Picher Industries, Incorporated, 20.0-ampere-hour nickel--cadmium spacecraft cells, 1835 (AD-778671)
Fabrication and testing of negative-limited sealed nickel--cadmium cells. Quarterly report, 1 Jul-30 Sep 1973 (3 and 20 Ah), 2066 (N-74-10078)
First article tests of two type MS18045-45 nickel--cadmium batteries, manufactured by Gulton Battery Corporation under contract N00383-73-C-0819, 1988 (AD-91733iL)
First article testing of two type MS 90344-1, nickel--cadmium batteries, manufactured by Marathon Battery Company under contract N00383-73-C-0682 (30 percent KOH electrolyte), 1985 (AD-916826L)
Flexible nickel cadmium batteries for meteorological balloons (Electrolyte performance at -30 and -60°C), 1458
Improved method of high-rate discharge testing of aircraft storage batteries, 1931 (AD-905118L)
Instrumentation for use in storage battery studies, 2663
Investigation of maintenance-free, high-rate, nickel-cadmium batteries for aircraft application. Quarterly progress report No. 5, 1 June-31 August 1967 (-40 to -10°F, polypropylene separator), 1861 (AD-822449)
Investigation of hermetically sealed, maintenance-free, high-rate, nickel-cadmium batteries for aircraft application. Quarterly technical progress report No. 1, 1729 (AD-608662)
Laboratory investigations and research toward the improvement of sintered-plate alkaline storage batteries. Progress report No. 2 for period ending 31 Jan 1949, 275 (AD-471465)
Method and device for testing Ni-Cd batteries (Type BB-401/U batteries, method to determine state of charge), 1719 (AD-492038)
Miniature sealed nickel-cadmium batteries. Final report Mar 71-Jun 72, 552 (AD-913104)
Nickel-cadmium cells for low earth orbit applications, 1342
Nickel/cadmium aircraft batteries: float charge test equipment. Technical note, 3085 (AD-905408)
Nickel-cadmium battery performance prediction models. Apollo telescope mount application, 2349
Nickel-cadmium batteries for the orbiting astronomical observatory spacecraft-II (OAO) (Increasing cell voltage with life found to be due to high precharge in negative plates; method for alleviating problem), 2455
Qualification tests of two aircraft batteries, nickel--cadmium, type MS17334-2(WP), manufactured by the Sonotone Corporation, 1843 (AD-801355L)
Sampling tests of one type MS 3319-1 nickel--cadmium battery, manufactured by Gulton Battery Corporation under contract N00383-72-C-3184, 1981 (AD-916410L)
Sampling tests of eight type MS 90321-86 nickel--cadmium cells, manufactured by Marathon Battery Company, under contract N00383-73-C-1216, 1984 (AD-916703L)
Sealed nickel-cadmium batteries (Failure study), 1548
Sealed nickel-cadmium batteries (Research toward improved performance), 1537
Sealed nickel--cadmium battery assembly BB-553( )/U. Final report, Jan 1970-Apr 1972, 418 (AD-748454)
Short test and charge retention test methods for nickel--cadmium spacecraft cells, 2103 (NASA-CR-143189)
Simulated orbital life tests for spacecraft cells. Part I. Procedures and manually acquired data. Special technical report, 1800 (AD-736471)
Simulation of a synchronous orbit environment for spacecraft batteries, 2325
State of charge determination for aerospace batteries. Final report, Oct 1973-Aug 1975, 2016 (AD-A-019480)
Stellar inertial guidance studies. Volume IIA. Appendices to Vol. II, 1622 (AD-357497)
Study of Sonotone Corporation nickel-cadmium size F battery cells. Final report, 1663 (AD-459797)
Study of the effect of temperature and depth of discharge on the performance and cycle life of hermetically sealed nickel-cadmium cells, 1859 (AD-820467)
Support devices for sounding rocket instrumentation systems. Universal time delay and automatic test system, 2018 (AD-A-020299)
Temperature and temperature gradients for accelerated life tests of nickel--cadmium cells. Technical report (-20 to +40 C ambient, 40 C internal temperature), 1814 (AD-748252)
Test station for Ni-Cd batteries with stabistor charge control, 1882 (AD-845341)
Vented nickel--cadmium battery assembly, BB-651( )/U (24 V and 5.5 A-hr or 12 V and 11 A-hr), 568 (AD/A-002566)
Viking Lander spacecraft battery. Final report, 713 (N-77-20557)

NICKEL-CADMIUM BATTERIES/THERMAL CONDUCTIVITY
Thermal conductivity of sealed nickel--cadmium cells. Technical report, 1801 (AD-737519)
Thermal conductivity measurements of nickel--cadmium aerospace cells. 2. Component conductivities, 2364
NICKEL-CADMIUM BATTERIES/THERMAL INSULATION
High temperature battery package and a method of assembling same (Patent), 3992
NICKEL-CADMIUM BATTERIES/THERMODYNAMIC PROPERTIES
Calorimetric study of nickel-cadmium cells, 2596
Thermal properties and behavior of nickel-cadmium and silver-zinc cells and their components, 1874 (AD-834300)
NICKEL-CADMIUM BATTERIES/ULTRASONIC WAVES
Action of ultrasound on nickel--cadmium storage batteries, 2230
NICKEL-CADMIUM BATTERIES/USES
Alkaline batteries for marine purposes, 5348
Batteries back up new control system, 218
Design considerations for an electric car, 5239
Dual turbine--battery electric vehicle drive system, 5184
Electric automobiles (citations from the Engineering Index data base). Report for 1970-Jun 1976, 4995 (NTIS/PS-76/0561)
Electric car: world survey, 5130
Engineering evaluation of the zinc-mercuric oxide battery/nickel-cadmium battery hybrid system, 1999 (AD/A-001529)
Experimental battery-powered Ford Cortina Estate car, 5238
Performance characteristics of magnesium--manganese dioxide/nickel--cadmium hybrid system. Technical report, 1945 (AD-908198)
Power for underwater vehicles and systems, 5315
What's available (In battery-powered emergency lighting), 5115
NICKEL-CADMIUM BATTERIES/VENTS
Pressure vent-sealed primary and secondary alkaline cells (Patent; thermoplastic, polyamides, silicone, etc.), 3320
Resealable vent for plastic battery case (Patent), 3385
NICKEL-CADMIUM BATTERIES/VOLTAGE REGULATORS
Precision constant current/voltage load for battery studies, 4636
NICKEL-CADMIUM BATTERIES/WASTE MANAGEMENT
Technical and microeconomic analysis of cadmium and its compounds. Final report on Task 1, 3257 (PB-244625)
NICKEL-CADMIUM BATTERIES/WASTE PROCESSING
Recovery of cadmium and nickel from scrap batteries, 720 (PB-204136)
NICKEL-HYDROGEN BATTERIES/ANODES
Absorption and desorption rates of $H_2$ and $D_2$ for $LaNi_5$, $LaCo_5$, $LaNi_2Co_3$, and FeTi. Interim report, 3143 (AD-A-039518)
Activated stable oxygen electrode (Patent; activated transition metal chelate catalyst), 4012
Electrochemical oxidation kinetics of the nickel support of a powder-metallurgical nickel oxide electrode in a high-pressure hydrogen atmosphere, 4075
Influence of certain additives to activated carbon on its properties as hydrogen electrode material, 4644
Low pressure nickel hydrogen cell (Patent; uses rare earth intermetallic hydride capable of absorbing and desorbing hydrogen in response to pressure changes), 3955
Mixed powder hydrogen electrode (Al-Ni alloy), 4597
Negative battery electrodes for reversible storage and regeneration of hydrogen (Patent), 3635
Oxygen equilibrium measurements in nickel-hydrogen cells (Activity of electrodes for oxygen reduction), 2132 (X-711-77-28)
Process for manufacturing a negative accumulator electrode for the reversible storage and restitution of hydrogen (Patent), 3401
Selection of the negative electrode for the nickel-hydrogen secondary cell ($H_2$/KOH/NiOOH), 3284
NICKEL-HYDROGEN BATTERIES/CATHODES
Advances in component technology for nickel-zinc cells (300 Ah, approaching 1000 deep cycles and $50/kWh; electrode testing in Ni/$H_2$ cells), 3464
Analysis of charge-discharge characteristics of nickel oxide electrodes by infrared spectroscopy, 4606
Applications of nickel. Annual report (Ni production and consumption; possibility for substitutions in event of shortage), 3037 (AD-846999)
Coated nickel electrodes (Preparation by anodization of an active form of Ni), 4419
Current generation at the hydrogen electrode of nickel--hydrogen batteries, 4102
Development of nickel oxide electrodes for use in nickel-hydrogen cells, 3272 (X-711-77-28)
Formation of electrodes for alkaline batteries (Patent), 3542
Forming process in nickel positive electrodes, 4622
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Hydrogen energy storage electrode, 4164
Investigation toward the development of carbonyl nickel powder suitable for the manufacture of sintered nickel plaques for use in alkaline storage batteries, 2873 (AD-622916)
Method of producing electrodes (Patent), 3400
Method to produce a protective oxide on the surface of positive nickel electrodes for galvanic cells (Patent),

3428
Methods for determining the structural and stoichiometric changes of $Ni(OH)_2$ electrodes during polarization in alkaline electrolyte, 4565
Nickel cathodes for alkaline cells (Patent; fabrication), 3708
Oxidation of hydrogen on a porous nickel electrode, 2860 (AD-612497)
Polarization studies on sintered plate electrodes containing various amounts of $Ni(OH)_2$, 4579
Porous nickel plates for electrodes (Method for fabrication), 3965
Porous nickel for alkaline battery and fuel cell electrodes: production by roll-compaction (Roll-compaction of carbonyl nickel powders), 4506
Potassium distribution in nickel oxide electrodes, 4577
Production of porous membranes for batteries and fuel cells, 4621
Production of porous nickel for alkaline-battery and fuel-cell electrodes: practical and economic considerations, 4611
Production of porous nickel electrodes for gas-tight batteries, 4604
Selected articles (Effects of ultrasonics), 4689 (AD-655021)
Self-discharge of a nickel oxide electrode, 4417
Sintered nickel matrix cathode (Performance), 4734
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730
NICKEL-HYDROGEN BATTERIES/CHEMICAL RADIATION EFFECTS
Effects of gamma radiation on the behavior of nickel and cadmium electrodes, 4454
NICKEL-HYDROGEN BATTERIES/COMPARATIVE EVALUATIONS
Ni-$H_2$ performance versus Ni-Cd, 2244
NICKEL-HYDROGEN BATTERIES/DESIGN
1973 GSFC battery workshop, second day, 92 (N-75-17808)
Design and testing of cells and complete batteries, 1096
Hermetically sealed nickel--hydrogen storage batteries (Ni oxide/H; patent), 1288
Hydrogen--nickel regenerative fuel cells (50 A-hr), 450 (AD-784902)
Low pressure nickel hydrogen cell (Patent), 3880
Metal-gas battery with axial reactant gas storage cavity (Patent), 856
Metal-hydrogen battery designs, 1234
Nickel--hydrogen secondary cell for synchronous orbit application (Ni hydroxide/KOH/$H_2$), 1353
Nickel-hydrogen battery system, 1242
Nickel hydrogen cell (Patent; pressurized to 100 psi), 1047
Nickel-hydrogen as an alternative to lead-acid and nickel-cadmium systems in non-space applications (System with reduced costs), 1097
Nickel hydrogen energy storage for satellites. Final report, 1 Jul 1973-31 Oct 1974 (50 Ah-battery weighing 2.75 lb), 572 (AD/A-006427)
Nickel-hydrogen storage battery for use on navigation technology Satellite-2 (325 W, 35 Ah, 17.6 Wh/kg, operates at 0 to 24°C), 897
Spacecraft integration and problem area studies on nickel hydrogen cells, 1244
NICKEL-HYDROGEN BATTERIES/ELECTRIC CONDUCTORS
Ligtweight nickel hydrogen cell (Patent; design of system of leads with equal electrical resistance), 3430
NICKEL-HYDROGEN BATTERIES/ELECTRODES
Hydrogen storage electrode (Patent), 4172
Nickel electrode for alkaline batteries (Patent; preparation by polarizing Ni sponge in aqueous metal nitrate solution), 3619
Predicted energy densities for nickel-hydrogen and silver-hydrogen cells embodying metallic hydrides for hydrogen storage, 4061
Specific surface and activity of nickel hydrogen electrodes, 3818
NICKEL-HYDROGEN BATTERIES/FABRICATION
Battery design (Patent; method for securing plates), 826
NICKEL-HYDROGEN BATTERIES/FAILURES
Failure mechanisms in nickel-hydrogen cells, 2131 (X-711-77-28)
Oxygen equilibrium measurements in nickel-hydrogen cells (Activity of electrodes for oxygen reduction), 2132 (X-711-77-28)
NICKEL-HYDROGEN BATTERIES/HYDROGEN STORAGE
Chemical storage of hydrogen in Ni/$H_2$ cells ($LaNi_5$ hydride), 4046
Heat transfer analysis of metal hydrides in metal-hydrogen secondary batteries, 3462
Predicted energy densities for nickel-hydrogen and silver-hydrogen cells embodying metallic hydrides for hydrogen storage, 4061
NICKEL-HYDROGEN BATTERIES/MATERIALS
Applications of nickel. Annual report (Ni production and consumption; possibility for substitutions in event of shortage), 3037 (AD-846999)
NICKEL-HYDROGEN BATTERIES/PERFORMANCE
1973 GSFC battery workshop, second day, 92 (N-75-17808)
Electric power systems for space: a progress report, 2187
Metal--gas rechargeable batteries, 1352
Nickel--hydrogen secondary cell for synchronous orbit application (Ni hydroxide/KOH/$H_2$), 1353
Nickel-hydrogen secondary batteries, 2280
Nickel-hydrogen battery development for synchronous satellites, 1243
Nickel-hydrogen battery system development, 1101
Rechargeable metal oxide-hydrogen cells. Research and development technical report (approx. 1 Ah), 592 (AD-A-036280)
Sealed nickel--hydrogen secondary cell (50 Ah, 28 Wh/lb), 2209
Sealed nickel-hydrogen secondary cell (28 Wh/lb, 50 Ah, 800 cycles to 70 percent depth of discharge), 2210
NICKEL-HYDROGEN BATTERIES/PERFORMANCE TESTING
Design and testing of cells and complete batteries, 1096
Evaluation of a nickel-hydrogen battery for space application. Final report, 2094 (N-76-20643)
Hydrogen-nickel regenerative fuel cells, 1839 (AD-784902)
Sealed metal oxide-hydrogen secondary cells, 1122
NICKEL-HYDROGEN BATTERIES/PLATES
Current distribution in storage battery plates with tubular components, 4608
NICKEL-HYDROGEN BATTERIES/RESEARCH PROGRAMS
GSFC's position on the nickel-hydrogen system, 775 (X-711-77-28)
NICKEL-HYDROGEN BATTERIES/TEST FACILITIES
Nickel hydrogen battery hazardous test facility, 2129 (X-711-77-28)
NICKEL-HYDROGEN BATTERIES/TESTING
Cycle life test and thermal vacuum test results in nickel-hydrogen cells, 2133 (X-711-77-28)
Hydrogen--nickel regenerative fuel cells (50 A-hr), 450 (AD-784902)
Nickel hydrogen energy storage for satellites. Supplement to final report, Dec 1974-Feb 1975, 2010 (AD-A-012303)
NICKEL-ZINC BATTERIES/ANODES
Accumulator battery apparatus and method (Patent; prevents dendrite buildup by causing vibrations and turbulence in electrolyte), 3293
Alkaline cell (Patent; Zn anode and alkaline electrolyte) 1036
Alkaline cells with anodes made from zinc fibers and needles (Patent), 3915
Alkaline cells with anodes made from zinc fibers and needles (Patent; process for preparing fibers and needles), 3917
Alkaline storage battery and zinc negative electrode therefor (Patent), 3487
Amalgamation of zinc powders (Patent), 3665
Anode collectors for zinc alkaline batteries (Patent; fabrication as coated Fe nets), 3752
Anode for galvanic cells (Patent; gas-permeable matrix of cross-linked polyacrylamide saturated with electrolyte and incorporating Zn particles), 3604
Anodic behavior of zinc electrodes in potassium hydroxide electrolytes. Technical report, 2928 (AD-706596)
Anodic behavior of zinc in flowing electrolyte systems, 3781
Anodic behavior of zinc in potassium hydroxide solution, 4457
Apparatus and method for charging a zinc electrode (Patent; bubbling of air to prevent dendrite formation and slope change), 3650
Battery zinc electrode kinetics investigation. Annual report No. 2, 15 Dec 1970--15 Dec 1971 (KOH electrolyte), 2945 (AD-736460)
Comparison of amalgamated and non-amalgamated zinc electrodes, 4425
Corrosion in alkali hydroxide solutions of electrolytic zinc powder containing codeposited lead, 3448
Coulogravimetric investigation of zinc electrode in potassium hydroxide, 4492
Dissolution and passivation of metals in alkaline solutions in the presence of surfactants, 4137
Double layer capacitance of zinc electrodes in KOH solutions, 4496
Effect of the method of production on the capacity of sintered nickel electrodes for alkaline electric storage batteries, 4396
Effect of OP-45 additives and a copolymer of styrene with maleic anhydride on the properties of a zinc electrode in alkaline solutions, 4367
Electrochemical generator with a zinc electrode (Patent), 3888
Electrochemical behavior of zinc in alkaline media, 4462
Electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 4, 1 Sep-1 Dec 1966, 2987 (AD-804559)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 10, 1 Mar-1 Jun 1968 (Amalgamated and nonamalgamated zinc in KOH), 3024 (AD-834995)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 12, 1 Sep-1 Dec 1968, 3039 (AD-847067)
Electrode passivation studies. Quarterly report No. 2, 1 Mar-31 May 1966, 2838 (AD-484216)
Evolution of polarization curves of monocrystalline zinc electrodes as function of crystallographic orientation, 4728
Formation of porous metal plates by electrolytic reduction, 4680
Fundamental studies connected with electro-chemical

energy storage. Final report (Adsorption of dendrite inhibitors on Zn), 708 (N-75-30647)
Gel-type zinc anode for alkaline batteries (Patent), 3584
High-rate battery electrodes (Performance of plates produced by electrolytic reduction), 4550
Influence of sulfur-containing additives on characteristics of cast zinc anodes in alkaline cells, 4499
Influence of the porous structure of a zinc electrode on its electrical characteristics, 4391
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 13, 1 Dec 1968-1 Mar 1969, 1886 (AD-850474)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 6, 1 Mar-1 Jun 1967 (Solubility of ZnO in KOH), 3005 (AD-816527)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 8, 1 Sep-1 Dec 1967, 3014 (AD-824687)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 1, 1 Dec 1965-1 Mar 1966, 1697 (AD-480149)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 3, 1 Jun-1 Sep 1966, 2842 (AD-488605)
Kinetic study of the zinc electrode by modified techniques, 4424
Long-life stable zinc electrode for alkaline secondary battery. Quarterly report No. 2, 1 March-31 May 1967, 3015 (AD-824719)
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly report No. 3, 1 June-3 August 1967, 3018 (AD-828224)
Long-life stable zinc electrodes for alkaline secondary battery. Quarterly report No. 4, 1 September-30 November 1967 (Teflonated anodes), 3026 (AD-835961)
Long-life stable zinc electrode for alkaline secondary battery. Quarterly report No. 5, 1 December 1967-29 February 1968 (5 Ah), 3028 (AD-837262)
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly technical progress report No. 6, 1 March-30 May 1968, 3038 (AD-847053)
Long-life stable zinc electrodes for alkaline secondary batteries. Report No. 8 (final), December 1966-February 1969, 3049 (AD-857500)
Macrokinetics of the processes at the zinc electrode of an alkali current source, 3800
Method for preparing electrodes for an electrochemical storage cell (Patent), 3405
Negative electrode for electrochemical generator (Patent), 3676
Point of passivation of a zinc electrode in alkali, 3302
Producing porous metal structures for battery electrodes (Patent; Zn, Cd), 4254
Rechargeable electrochemical cells (Additive to suppress dendritic growth on Zn; patent), 2261
Rechargeable zinc electrodes (Patent; fabrication), 3532
Rechargeable electric accumulator cell with at least one zinc electrode (Patent; means to vibrate anode and/or separator to prevent dendrite formation), 3308
Rechargeable nickel-zinc battery (Patent; improved zinc electrode construction), 782
Storage battery with zinc electrodes containing titanium dioxide (Patent; anode preparation), 3707
Storage cell with dissoluble negative line electrodes (Patent; means the vibrate anodes during charging), 925
Storage cell with dissoluble negative line electrodes (Patent; means for vibrating anodes and stirring Zn oxide deposit on bottom of battery), 926
Studies in fundamental chemistry of fuel cell reactions. Semiannual progress report, 1 January-30 June 1968 (Dendritic deposition of zinc from alkaline solution), 688 (N-69-25396)
Studies in fundamental chemistry of fuel cell reactions. Semiannual progress report, 1 July-31 December 1968 (Formation mechanisms of zinc dendrites), 689 (N-69-25397)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 April-30 June 1969 (Dendritic deposition of zinc from alkaline solution), 3206 (N-70-10779)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 April-30 June 1969 (Dendritic deposition of zinc from alkaline solution), 3207 (N-70-16379)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 July-30 September 1969 (Dendritic deposition of zinc from alkaline solution), 3209 (N-70-25705)
Texture of a zinc oxide residue formed during the anodic oxidation of porous zinc in an alkaline solution, 2228
Zinc--alkaline battery containing carbazole as a zinc corrosion inhibitor (Patent), 1001
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
Zinc anodes for secondary batteries (Patent; 13.4 W-hr/kg, 1.54 V, 500 cycles, controlled dendritic growth), 3709
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981
Zinc anodes for secondary batteries (Patent; fabrication, polyethyleneimine to prevent electrodeposition of Zn on anode), 3675
Zinc anodic mixes for alkaline batteries (Patent), 3638
Zinc as a secondary battery electrode (Review of attempts to improve cycling behavior), 4405
Zinc-container electrode (Patent; design and performance) 3667
Zinc-container electrode (Patent; support with chemically active mass on each side), 3668
Zinc-containing electrode (Patent; preparation by electrodeposition), 4030
Zinc electrodes for rechargeable batteries (Patent; preparation), 3742
Zinc electrodes for rechargeable batteries (Patent; synthetic latex coating to prevent dendrite formation), 3585
Zinc electrode investigation. Quarterly technical progress report No. 4, 1 Apr-1 Jul 1965 (Recombining gases formed during overcharge), 2810 (AD-467031)
Zinc electrode investigation. Quarterly technical progress report No. 5, 1 Jul-1 Oct 1965, 2818 (AD-471222)
Zinc electrode investigation. Quarterly technical progress report No. 6, 1 Oct 1965-1 Jan 1966, 2829 (AD-476991)
Zinc electrode investigation, 2843 (AD-489498)
Zinc electrode investigation. Quarterly technical progress report No. 1, 1 Jul-1 Oct 1964 (Pd-on-alumina catalyst), 2853 (AD-606999)
Zinc electrode investigation. Quarterly technical progress report No. 3, 1 Jan-1 Apr 1965, 2863 (AD-614119)
Zinc electrodes in alkaline medium, 1464
Zinc electrode for an electrochemical power source (Patent), 3480
Zinc electrodes for secondary batteries (Patent; Cd additive improves Zn adherence), 3299
Zinc fibers and needles and galvanic cell anodes made therefrom (Patent), 3866
Zinc plate shape change inhibition (Patent; frame near electrode saturated with $Fe(OH)_2$), 1006
Zinc powder for batteries (Patent), 3679

NICKEL-ZINC BATTERIES/BATTERY CHARGERS
Diode control research. Quarterly technical progress report No. 1, 1 Jun-1 Sep 1966, 2844 (AD-489882)

NICKEL-ZINC BATTERIES/BATTERY CHARGING
Accumulator battery apparatus and method (Patent; prevents dendrite buildup by causing vibrations and turbulence in electrolyte), 3293
Apparatus and method for charging a zinc electrode (Patent; bubbling of air to prevent dendrite formation and slope change), 3650
Oxygen evolution during recharging of positive nickel oxide sinter electrodes, 2363
Performance characteristics of nickel--zinc cells (Study of charge-discharge cycles and battery seprators), 2492
Rechargeable electrochemical cells (Additive to suppress dendritic growth on Zn; patent), 2261
Secondary alkaline batteries (Patent; Zn anode, addition of polycationic polymers enables charging without Zn deposition), 1000

NICKEL-ZINC BATTERIES/BATTERY SEPARATORS
Advances in component technology for nickel-zinc cells (300 Ah, approaching 1000 deep cycles and $50/kWh; electrode testing in Ni/$H_2$ cells), 3464
Electrochemical cell electrode separator and method of making it and fuel cell containing same (Patent; asbestos, teflon, ethylene-propylene copolymer), 3324
Factors influence flexibility, resistivity, and zinc dendrite penetration rate of inorganic separators for alkaline batteries, 3224 (N-75-17807)
Factors influencing flexibility, resistivity, zinc dendrite penetration rate of inorganic separators for alkaline batteries, 3244 (NASA-TM-X-3199)
Long life, rechargeable nickel-zinc battery. Final report, 3222 (N-74-34539)
Method of making separators for alkaline batteries (Patent), 3555
Nickel-zinc. Practical high-energy secondary battery, 2427
Performance characteristics of nickel--zinc cells (Study of charge-discharge cycles and battery seprators), 2492
Rechargeable battery which combats shape change of the zinc anode (By proper fabrication of separator; patent) 857
Separators for alkaline batteries (Patent; 180 cycles, mid-life voltage = 1.55 V), 3966
Separators for alkaline batteries (Patent; natural or synthetic cellulosic materials, styrene, nylon, glass fiber, Teflon, etc.), 3384
Separators for alkaline batteries (Patent), 3561
Separators for electrochemical cells (Patent), 4338

NICKEL-ZINC BATTERIES/CATHODES
Activation of nickel battery plates (Patent; electrolytic process), 3871
Activation of nickel battery plates (Patent; electrolytic process), 3557
Active mass of the nickel oxide electrode for an alkaline storage battery (Patent; preparation), 4354

Active substance for the nickel oxide electrode of an alkaline storage battery (Patent; preparation of active material), 4355
Analysis of charge-discharge characteristics of nickel oxide electrodes by infrared spectroscopy, 4606
Applications of nickel. Annual report (Ni production and consumption; possibility for substitutions in event of shortage), 3037 (AD-846999)
Battery electrode support (Patent), 3589
Battery electrode supports (Patent), 3590
Behavior of nickel oxide electrodes of alkaline cells in concentrated solutions of nickel salts, 4387
Cathodes for alkaline batteries (Patent), 3926
Characteristics in charged or discharged condition of pressed-type nickel positive electrodes made by using polystyrene as a binder (Comparison with polyethylene), 4053
Charge, discharge, and self-discharge characteristics of thin film nickel oxide electrodes, 2905 (AD-671685)
Coated nickel electrodes (Preparation by anodization of an active form of Ni), 4419
Commutator bar-free nickel oxide electrode for an alkaline nickel-zinc battery (Patent), 3508
Determination of carbonate impurities in nickel hydroxide, 4069
Development and fabrication of large vented nickel-zinc cells. Final report (300 Ah), 712 (N-76-28642)
Effect of the increase of porosity on the current distribution in nickel hydroxide electrodes containing Raney nickel, 4001
Effect of lithium hydroxide additions on the electrochemical behavior of nickel(II) hydroxide thin-layer electrodes, 4101
Effect of cobalt on the characteristics of lamellar structure nickel oxide electrodes operating in a zincate electrolyte, 4285 (AD/A-005060)
Electrochemical processes on nickel oxide, 2902 (AD-667607)
Electrochemical precipitation of $Ni(OH)_2$ into porous electrodes, 4559
Electrochemical properties of nickel hydroxide electrodes, 4363
Electrodes for alkaline batteries (Patent; preparation), 3613
Electrophoretic method of preparation of electrodes from nickel(II) hydroxide, 3780
Forming process in nickel positive electrodes, 4622
Information about nickel hydroxide electrode (Chemical reactions), 4571
Infrared spectroscopic study of the properties of a nickel oxide electrode. I. Effect of charging conditions on the ir spectra of a nickel oxide electrode in charged and discharged states, 4092
Investigation toward the development of carbonyl nickel powder suitable for the manufacture of sintered nickel plaques for use in alkaline storage batteries, 2873 (AD-622916)
Manufacture of a dry-charged nickel oxide electrode by chemical oxidation ($KOH$--$K_2S_2O_8$ solution), 4083
Method for making nickel and cadmium electrodes for batteries (Patent), 3375
Method for making a nickel positive electrode for an alkaline battery (Patent; suspension of nickel hydroxide, cobalt hydroxide, and graphite entrained in polyvinylidene fluoride binder), 3353
Method of manufacturing positive nickel hydroxide electrodes (Patent), 3473
Method to produce a protective oxide on the surface of positive nickel electrodes for galvanic cells (Patent), 3428
Methods for determining the structural and stoichiometric changes of $Ni(OH)_2$ electrodes during polarization in alkaline electrolyte, 4565
Modulation-spectroscopic investigations on nickel electrodes (Structure of semiconducting passive layers), 4360
Nickel cathode for alkaline batteries (Patent), 3705
Nickel cathodes for alkaline cells (Patent; fabrication), 3708
Nickel cathodes for alkaline batteries (Patent), 3598
Nickel electrodes for alkali batteries (Patent; preparation), 3902
Nickel electrodes for alkaline batteries (Patent), 3704
Nickel electrodes for alkaline cells (Patent), 3663
Nickel electrode for alkaline batteries (Patent; preparation by polarizing Ni sponge in aqueous metal nitrate solution), 3619
Nickel electrode for an alkaline battery (Patent; fabrication), 4327
Nickel hydroxide electrode (Chemical preparation;patent), 3680
Nickel hydroxide cathodes for storage batteries (Patent; fabrication), 3755
Nickel hydroxide cathodes for storage batteries (Patent; fabrication), 3756
Nickel hydroxide electrode research. Interim technical report No. 1, 1 January 1969-2 February 1970 (Effects of cation additions to active material), 3056 (AD-866147)
Nickel hydroxide electrode (Patent), 4334
Nickel or cadmium electrodes for alkaline cells (Patent; chemical preparation), 3588
Novel nickel electrode for electric vehicles, 3168 (CONF-711166-)
Oxidation of powder-metallurgical electrodes by potassium hypochlorite, 4076
Oxidation of hydrogen on a porous nickel electrode, 2860 (AD-612497)
Oxidation of sintered nickel bases with ozone (Chemical preparation), 4434
Polarization studies on sintered plate electrodes containing various amounts of $Ni(OH)_2$, 4579
Porous nickel plates for electrodes (Method for fabrication), 3965
Porous nickel alkaline-battery electrodes made from woven cotton cloth (Fabrication and testing, porous structure derived from woven cotton cloth), 4349
Porous nickel for alkaline battery and fuel cell electrodes: production by roll-compaction (Roll-compaction of carbonyl nickel powders), 4506
Potassium distribution in nickel oxide electrodes, 4577
Powder-metallurgy electrode of an alkaline storage battery (Patent), 3853
Production of porous membranes for batteries and fuel cells, 4620
Production of porous nickel for alkaline-battery and fuel-cell electrodes: practical and economic considerations, 4611
Production of porous nickel electrodes for gas-tight batteries, 4604
Products of oxidation of nickel with ozone (Chemical preparation of nickel oxide electrode active mass), 4436
Protective coatings on positive nickel electrodes (Patent), 4170
Rational degree of filling of pores of powder-metallurgical nickel oxide electrode by the active media, 4118
Relations of the structural characteristics of the powder metallurgical nickel oxide electrode, 4063
Removal of nitrates from sintered nickel storage-battery plaques impregnated with nickel salts (Patent), 4247
Sealed type alkaline storage battery (Patent; improved Ni hydroxide cathode containing $Ba(OH)_2$), 3565
Selected articles (Effects of ultrasonics), 4689 (AD-655021)
Self-discharge of nickel oxide electrodes, 4213
Self-discharge mechanism of a powder-metallurgy nickel oxide electrode in concentrated potassium hydroxide solutions, 4135
Self-discharge of a nickel oxide electrode, 4417
Sintered nickel matrix cathode (Performance), 4734
Sintered type alkaline storage battery. XV. Effect of lithium ion on the formation of active material from nickel plaque at various temperatures, 4087
Stable nickel oxyhydroxide ($NiOOH$) (Patent; chemical preparation), 3499
Storage of charged nickel hydroxide electrodes, 3072 (AD-891776)
Structure of a double electric layer and features of the electrode processes on a sodium nickelate single crystal, 4136
Study of electrodes and electrode reactions. II. The relation of the energy necessary to remove an oxygen molecule from charged nickel oxide electrodes in vacua and solutions of potassium hydroxide, 2876 (AD-627216)
Study of electrodes and electrode reactions. I. The energy necessary to remove an oxygen molecule from a charged nickel oxide electrode in a vacuum, 2877 (AD-627248)
Thermal decomposition of nickel ammine complexes for producing the positive active mass in sintered electrodes (Fabrication), 4350
Thermogalvanic potentials. II. Nickel in neutral subgate solution, 4769
Use of hydrogen-absorbing electrode in alkaline battery (For protection against electrochemical damage due to battery reversal; patent), 3386
Use of stereometric metallography for determination of structural characteristics of porous nickel bodies for alkaline storage cell plates, 4463

NICKEL-ZINC BATTERIES/CHEMICAL RADIATION EFFECTS
Effects of gamma radiation on the behavior of nickel and cadmium electrodes, 4454

NICKEL-ZINC BATTERIES/CHEMICAL REACTION KINETICS
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 13, 1 Dec 1968-1 Mar 1969, 1886 (AD-850474)
Kinetics and mechanism of deposition of zinc from zincate in concentrated alkali hydroxide solutions, 2178

NICKEL-ZINC BATTERIES/COMPARATIVE EVALUATIONS
Metals: key to battery-powered auto, 4490
New assault on battery vehicles, 5103
Study of electric automobile traction with reference to silver batteries, 2673

NICKEL-ZINC BATTERIES/CORROSION INHIBITORS
Zinc--alkaline battery containing carbazole as a zinc corrosion inhibitor (Patent), 1001

NICKEL-ZINC BATTERIES/COST
Develop nickel-zinc battery suitable for electric vehicle propulsion. Task A: design and cost study, 639 (ANL-K-77-3558-1)
Electric vehicle propulsion batteries: design and cost study for nickel/zinc battery manufacture. Task A

(25 kWh, 700 pounds, 245 Ah at 100+ V, 4.77 ft³), 638 (ANL-K-77-3542-1)
NICKEL-ZINC BATTERIES/DESIGN
Alkaline battery cell (Patent), 946
Alkaline battery (Patent; Zn/1,2,3-trihydroxybenzene/activated C-Ni), 964
Alkaline cell with zinc anode (Patent), 1022
Battery BB-674( )/U, nickel--zinc secondary. Final report, Apr 1970-May 1971, 404 (AD-733422)
Battery with rechargeable zinc electrodes (Patent; Zn dendrite growth prevented by auxiliary porous frame between cathode and anode), 954
Cell with circulating electrolyte (Patent; primarily for Zn/air batteries, but adaptable to other types), 841
Chemoelectric battery (Patent; Fe, Cd, or Zn with hydroxide of Ni, Fe, or Co and/or oxides of Pb or Ag, gas release feature), 809
Design and cost study of a zinc/nickel oxide battery for electric vehicle propulsion. Final report (6.4 V, 310 Ah, 1.98 kWh), 637 (ANL-K-76-3543-1)
Design and cost study of nickel-zinc batteries for electric vehicle. Final report (24 kWh battery of 48 325-Ah cells, 35 Wh/lb), 636 (ANL-K-76-3541-1)
Develop nickel-zinc battery suitable for electric vehicle propulsion. Task A: design and cost study, 639 (ANL-K-77-3558-1)
Development of lower cost nickel-zinc batteries. Report No. 1 (final), February 1969-May 1970 (9.5 Ah/in.³), 528 (AD-873119)
Development and fabrication of large vented nickel-zinc cells. Final report (300 Ah), 712 (N-76-28642)
Electric vehicle propulsion batteries: design and cost study for nickel/zinc battery manufacture. Task A (25 kWh, 700 pounds, 245 Ah at 100+ V, 4.77 ft³), 638 (ANL-K-77-3542-1)
Evaluation of Ni-Fe and Ni-Zn batteries. Semiannual report No. 1, 1 November 1967-30 April 1968, 493 (AD-840290)
Evaluation of Ni-Fe and Ni-Zn batteries. Report No. 2 (final), 1 November 1967-30 January 1969 (Effects of design modifications on output), 1891 (AD-852691)
High energy sealed nickel--zinc batteries. Semi-annual report, 1 Mar-1 Sep 1972, 425 (AD-755550)
Manufacturing methods and technology measure for nickel--zinc secondary batteries. Quarterly report No. 4, 1 Apr-30 Jun 1972 (KOH electrolyte), 538 (AD-902749L)
Modular battery construction (Patent), 1161
Nickel--zinc alkaline cell (Patent), 1063
Nickel-zinc alkaline storage battery (Patent), 854
Rechargeable nickel-zinc cell with an auxiliary electrode, 1121
Rechargeable battery which combats shape change of the zinc anode (By proper fabrication of separator; patent), 857
Rechargeable nickel-zinc battery (Patent; improved zinc electrode construction), 782
Researchers study new batteries, 2155
Sealed nickel--zinc rechargeable batteries. Semi-annual report 1 Apr-30 Sep 1971, 405 (AD-734927)
Sealed nickel--zinc rechargeable batteries. Final report, 31 Mar 1971-30 Mar 1972 (30 Wh/lb), 1817 (AD-748896)
Storage cell with dissoluble negative line electrodes (Patent; means the vibrate anodes during charging), 925
Storage cell with dissoluble negative line electrodes (Patent; means for vibrating anodes and stirring Zn oxide deposit on bottom of battery), 926
Zinc alkaline secondary battery (Patent; safe battery because of smooth gas removal at anode), 1032
Zinc alkaline secondary batteries (Patent; auxiliary anode and polycationic polymer prevent Zn dendrite formation and H generation), 998
Zinc-nickel oxide secondary battery (Rotating shutter--separator to stir electrolyte), 1099
NICKEL-ZINC BATTERIES/ECONOMICS
Economic impacts of electric cars in St. Louis and Philadelphia, 5019 (TEC-75/006c)
NICKEL-ZINC BATTERIES/ELECTROCHEMISTRY
Battery zinc electrode kinetics investigation. Annual report No. 2, 15 Dec 1970--15 Dec 1971 (KOH electrolyte), 2945 (AD-736460)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Final report, Dec 1965-Sep 1969, 1897 (AD-862506)
Texture of a zinc oxide residue formed during the anodic oxidation of porous zinc in an alkaline solution, 2228
NICKEL-ZINC BATTERIES/ELECTRODES
Advances in component technology for nickel-zinc cells (300 Ah, approaching 1000 deep cycles and $50/kWh; electrode testing in Ni/$H_2$ cells), 3464
Alkaline battery (Patent; improvement consisting in welding their conductive plates to electrodes), 3493
Apparatus and method for producing rechargeable zinc electrodes (Patent; Raney Ni or NiO aux. electrode for occasional additional discharge results in improved cycle life), 2199
Comparison of potential step and triangular voltage sweep methods of double layer capacitance measurements. III. Porous zinc electrodes, 2949 (AD-742219)
Development of improved zinc electrodes for secondary batteries. Final report, July 1968-July 1969, 3203 (N-69-40063)
Electrode plate for alkaline batteries (Patent; fabrication method), 3713
Electrode plate of alkaline storage battery (Patent; preparation of Ni or Cd electrode), 3591
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Final report, Dec 1965-Sep 1969, 1897 (AD-862506)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical report No. 5, 1 Dec 1966-1 Mar 1967 (Effects of cycling and of circulating the electrolyte), 2997 (AD-809279)
Electrodes for alkaline zinc storage batteries (G.D.R. patent), 3094 (AD-909496L)
Evolutionary developments in nickel-zinc cell technology, 2213
Formation of electrodes for alkaline batteries (Patent), 3542
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Hydrating a battery plaque impregnated with a metal nitrate in a hydroxide solution and subsequent recovery of the nitrate by-product as crystals (Patent; preparation), 4249
Method of producing electrodes (Patent), 3400
Methods of producing electrodes for alkaline batteries (Patent; oxidative pretreatment of nickel plaque before impregnation), 3287
Nickel-base electrodes for alkaline batteries (Patent; preparation procedure), 3750
Patent; preparation of Ni oxide, Ni hydroxide, and Fe oxide electrodes, 3762
Preparation of highly porous nickel substrates for sintered electrodes of storage batteries, 4428
Scientific research on improving the characteristics of iron and nickel oxide electrodes, 3792
Sealed nickel-zinc cells (Nonsintered Ni electrodes, inorganic separators), 1346
Sintered electrode plate for alkaline storage battery (Patent; fabrication), 3600
Storage-battery electrodes (Patent; preparation), 4694
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730
Zinc electrode shape change in secondary cells, 4269
NICKEL-ZINC BATTERIES/ELECTROLYTES
Electrochemical generator with a zinc electrode (Patent), 3888
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical report No. 5, 1 Dec 1966-1 Mar 1967 (Effects of cycling and of circulating the electrolyte), 2997 (AD-809279)
Electrolyte for zinc--anode batteries (Patent; $H_2SO_4$ with N-decylpyridinium chloride), 3715
Secondary alkaline batteries (Patent; Zn anode, addition of polycationic polymers enables charging without Zn deposition), 1000
Secondary battery with indate ion in the electrolyte (Patent), 1330
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
NICKEL-ZINC BATTERIES/FABRICATION
Alkaline cell (Patent; Zn anode and alkaline electrolyte) 1036
Flat alkaline cell construction and method for assembling the same (Patent), 1031
Manufacturing methods and technology measure for nickel--zinc secondary batteries. Quarterly report No. 6, 1 Oct-31 Dec 1972, 546 (AD-908970L)
Manufacturing methods and technology measure for nickel--zinc secondary batteries. Quarterly report No. 8, 1 Apr-30 Jun 1973, 553 (AD-913197L)
Manufacturing methods and technology measure for nickel--zinc secondary batteries. Quarterly report No. 3, 1 Jan-31 Mar 1972, 536 (AD-900475L)
Manufacturing methods and technology measure for nickel--zinc secondary batteries. Quarterly report No. 7, 1 Jan-31 Mar 1973, 1958 (AD-911406L)
Manufacturing methods and technology measure for nickel--zinc secondary batteries. Quarterly report No. 5, 1 Jul-30 Sep 1972, 1942 (AD-906676L)
New nickel-zinc storage battery, 2607 (AD-610270)
Nickel--zinc cells with non-sintered electrodes, 2343
Nickel--zinc battery (Patent), 974
Nickel-zinc storage battery (Patent), 1146
Sealed nickel-zinc cells (Nonsintered Ni electrodes, inorganic separators), 1346
Sealed nickel--zinc storage battery (Patent), 1064
Secondary battery with indate ion in the electrolyte (Patent), 1330
Zinc alkaline storage battery (Patent; Ni/KOH, KF/$ZnF_2$), 1026
Zinc alkaline battery (Patent; Ni/KOH/$ZnF_2$), 1028
NICKEL-ZINC BATTERIES/FAILURES
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 2, 15 Aug-15 Nov 1964, 1730 (AD-608666)
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 3, 15 Nov 1964-15 Feb 1965, 1732 (AD-611850)
NICKEL-ZINC BATTERIES/GASES
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981

NICKEL-ZINC BATTERIES/LEAKS
Leak rates in sealed cells, 2334
NICKEL-ZINC BATTERIES/LIFETIME
Apparatus and method for producing rechargeable zinc electrodes (Patent; Raney Ni or NiO aux. electrode for occasional additional discharge results in improved cycle life), 2199
NICKEL-ZINC BATTERIES/MANUFACTURING
Electric vehicle propulsion batteries: design and cost study for nickel/zinc battery manufacture. Task A (25 kWh, 700 pounds, 245 Ah at 100+ V, 4.77 $ft^3$), 638 (ANL-K-77-3542-1)
NICKEL-ZINC BATTERIES/MATERIALS
Applications of nickel. Annual report (Ni production and consumption; possibility for substitutions in event of shortage), 3037 (AD-846999)
NICKEL-ZINC BATTERIES/PERFORMANCE
Alkaline cell with zinc anode (Patent), 1022
Batteries for electric vehicles, 2039 (CONF-711166-)
Characteristics of conventional design nickel--zinc batteries for hybrid vehicle operation. Research and development technical report, 426 (AD-756431)
Design work on lithium-sulfur battery (and others), 647 (CONF-691143-)
Electrical characteristics of nickel--zinc secondary cells, 2451
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical report No. 5, 1 Dec 1966-1 Mar 1967 (Effects of cycling and of circulating the electrolyte), 2997 (AD-809279)
Evolutionary developments in nickel-zinc cell technology, 2213
Gravity field effects in zinc anode discharge in alkaline media, 2617
High energy sealed nickel--zinc batteries. Semi-annual report, 1 Mar-1 Sep 1972, 425 (AD-755550)
High energy sealed nickel--zinc batteries. First annual report, 1 Mar 1972--1 Oct 1973 (KOH), 1830 (AD-772944)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report. No. 9, 1 Dec 1967-1 Mar 1968, 3019 (AD-829092)
New nickel-zinc storage battery, 2607 (AD-610270)
Nickel--zinc cells for sustained high rate discharge applications, 1355
Nickel--zinc cells with non-sintered electrodes, 2343
Nickel--zinc secondary batteries, 2491
Nickel--zinc cells. Part 1 (Comparison of Ni/KOH/Zn cells with other alkaline cells), 2538
Nickel--zinc alkaline cell (Patent), 1063
Performance characteristics of nickel--zinc cells (Study of charge-discharge cycles and battery seprators), 2492
Performance characteristics of nickel--zinc batteries, 1498
Rechargeable nickel-zinc cell with an auxiliary electrode, 1121
Sea water battery (Patent; Zn/KOH/Ni hydroxide oxide 1.5 V, 2.09 $W/cm^3$), 2256
Sealed, rechargeable nickel--zinc cells (Progress report on development), 1301
Sealed nickel-zinc cells (Nonsintered Ni electrodes, inorganic separators), 1346
Sealed nickel--zinc rechargeable batteries. Final report, 31 Mar 1971-30 Mar 1972 (30 Wh/lb), 1817 (AD-748896)
Secondary batteries for electric vehicles, 4854 (ANL-76-8)
Space technology applicable to hybrid vehicle batteries, 1401
Super batteries for load leveling and electric vehicles, 799
NICKEL-ZINC BATTERIES/PERFORMANCE TESTING
Bipolar NiO(OH)--$K_3BO_3$--Zn accumulator, 1302
Electric vehicle performance with alternate batteries, 5064
Evaluation tests of a nickel--zinc aircraft storage battery developed by Eagle-Picher Industries, Inc., 1914 (AD-901266L)
Evaluation of Ni-Fe and Ni-Zn batteries. Report No. 2 (final), 1 November 1967-30 January 1969 (Effects of design modifications on output), 1891 (AD-852691)
High energy nickel-zinc battery for electric vehicles, 5045
Manufacturing methods and technology measure for nickel--zinc secondary batteries. Quarterly report No. 7, 1 Jan-31 Mar 1973, 1958 (AD-911406L)
performance of nickel--zinc cells at various temperatures and charge rates, 2539
Researchers study new batteries, 2155
NICKEL-ZINC BATTERIES/PLANNING
Nickel--zinc storage batteries as energy sources for electric vehicles (45 Wh/kg, 2.7-T vans), 5085
Space technology applicable to hybrid vehicle batteries, 1397
NICKEL-ZINC BATTERIES/PLATES
Current distribution in storage battery plates with tubular components, 4608
NICKEL-ZINC BATTERIES/PRODUCTION
Design and cost study of a zinc/nickel oxide battery for electric vehicle propulsion. Final report (6.4 V, 310 Ah, 1.98 kWh), 637 (ANL-K-76-3543-1)
Design and cost study of nickel-zinc batteries for electric vehicle. Final report (24 kWh battery of 48 325-Ah cells, 35 Wh/lb), 636 (ANL-K-76-3541-1)
Develop nickel-zinc battery suitable for electric vehicle propulsion. Task A: design and cost study, 639 (ANL-K-77-3558-1)
NICKEL-ZINC BATTERIES/SEALS
Battery having deformations in a metal layer (Patent; avoids wrinkles occurring during fabrication), 864
NICKEL-ZINC BATTERIES/SERVICE LIFE
Nickel-zinc. Practical high-energy secondary battery, 2427
NICKEL-ZINC BATTERIES/SPECIFICATIONS
Batteries for the hybrid heat engine/electric vehicle, 5200
NICKEL-ZINC BATTERIES/STORAGE
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981
NICKEL-ZINC BATTERIES/SUPPORTS
Carbonyl nickel powder (Chemical preparation of B type), 3868
NICKEL-ZINC BATTERIES/TESTING
Battery BB-674( )/U, nickel--zinc secondary. Final report, Apr 1970-May 1971, 404 (AD-733422)
Manufacturing methods and technology measure for nickel--zinc secondary batteries. Quarterly report No. 6, 1 Oct-31 Dec 1972, 546 (AD-908970L)
Manufacturing methods and technology measure for nickel--zinc secondary batteries. Quarterly report No. 3, 1 Jan-31 Mar 1972, 536 (AD-900475L)
Manufacturing methods and technology measure for nickel--zinc secondary batteries. Quarterly report No. 4, 1 Apr-30 Jun 1972 (KOH electrolyte), 538 (AD-902749L)
Manufacturing methods and technology measure for nickel--zinc secondary batteries. Quarterly report No. 5, 1 Jul-30 Sep 1972, 1942 (AD-906676L)
NICKEL-ZINC BATTERIES/USES
Another chance for electrics, 5117
Batteries for ground transportation systems, 5193
Development of the electric vehicle at Nissan Motor Co., Ltd., 4896 (CONF-711166-)
Electric automobiles (citations from the NTIS data base). Report for 1964-Jun 1976, 4994 (NTIS/PS-76/0560)
Impact of advanced batteries on electric power generation, 5138
NIOBATES/ELECTRIC CONDUCTIVITY
New solid conductors of $Na^+$ and $K^+$ ions ($NaTaWO_6$; $NaTa_2O_5F$; $NaSbO_3$; Na and K niobates), 3433
NIOBIUM SELENIDES/CHEMICAL REACTIONS
Chemistry of $TiS_3$ and $NbSe_3$ cathodes (Nonaqueous Li batteries), 3407
NIOBIUM SULFIDES/CHEMICAL PROPERTIES
Transition metal sulfides as cathodes for secondary Li batteries. I. Niobium sulfides, 3784
NUCLEAR ENERGY/BIBLIOGRAPHIES
Applied research programs abstract bulletin, flight vehicle power and materials. Volume II, Part I. Abstracts 2-122 through 2-207, 24 (AD-609098)
NUCLEAR PHYSICS/RESEARCH PROGRAMS
Independent research, 1975. Final report (Naval Surface Weapons Center, Silver Spring, Md.), 69 (AD-A-015337)
NUCLEAR POWER
Better energy conversion devices are needed (Brief discussions), 1569
NUCLEAR POWER/DIRECT ENERGY CONVERSION
Some aspects of the application of nuclear energy to small portable and automotive power supplies, 72 (ANL-6483)
NUCLEAR POWER/MEETING
8th intersociety energy conversion engineering conference held at Philadelphia, Pennsylvania, August 13-17, 1973, 178
NUCLEAR POWER/PLANNING
Power: problems and progress, 132
NUCLEAR REACTORS
See REACTORS

O

OCEANOGRAPHY/POWER SUPPLIES
Energy sources for marine technology, 5077
OFF-PEAK ENERGY STORAGE
Can lead-acid batteries shave utility peaks, 5056
OFF-PEAK ENERGY STORAGE/COMPARATIVE EVALUATIONS
Potential for energy storage systems on U.S. electric utility systems (Pumped storage, compresed air, batteries, thermal, flywheels, hydrogen), 5008 (PB-251490)
OFF-PEAK ENERGY STORAGE/COMPRESSED AIR
Energy storage for the electric power industry, 82 (LA-UR-74-918)
Lithium/sulfur batteries for off-peak energy storage: a preliminary comparison of energy storage and peak power generation systems, 4856 (ANL-7958)
OFF-PEAK ENERGY STORAGE/COST
Batteries for utility load leveling (Typical spec: 50, 000 Ah, 10 Wh/lb, 2000 cycles, 100 MWh, >80 percent efficiency), 4953 (CONF-760469-3)
OFF-PEAK ENERGY STORAGE/DEMONSTRATION PLANTS
Engineering study of a 20 MW lead-acid battery energy

storage demonstration plant. Final report for the period ending October 1976, 663 (CONS/1205-1)
OFF-PEAK ENERGY STORAGE/ECONOMICS
Economic study of electrical peaking alternatives, 5084
Economy of operation of electrochemical storage devices as compared to conventional peak power generators, 5051
Potential for rechargeable storage batteries in electric power systems, 5131
Potential for energy storage systems on U.S. electric utility systems (Pumped storage, compresed air, batteries, thermal, flywheels, hydrogen), 5008 (PB-251490)
Storage batteries: the case and the candidates, 843
OFF-PEAK ENERGY STORAGE/ELECTRIC BATTERIES
Applications and prospect of energy storage batteries (Goals, current developments, and prospects), 655 (CONF-760416-2)
Batteries for peaking generation, 4950 (CONF-740341-P1)
Batteries for energy storage, 5140
Batteries for utility load leveling (Typical spec: 50, 000 Ah, 10 Wh/lb, 2000 cycles, 100 MWh, >80 percent efficiency), 4953 (CONF-760469-3)
Batteries for the '80s: the materials of energy storage, 831
Battery energy storage for utility load leveling and electric vehicles: a review of advanced secondary batteries, 143
Computer study of battery energy storage and power conversion equipment operation (Operation at substation), 5065
Conceptual design of a Battery Energy Storage Test (BEST) facility, 3185 (EPRI-255(TR2))
Development program for solid electrolyte batteries. Interim report, 729 (PB-248326)
Economic study of electrical peaking alternatives, 5084
Electrochemical sources of power: batteries (Book chapter), 155
Energy from electrochemical reactions (Review, no references), 5135
Energy storage for the electric power industry, 82 (LA-UR-74-918)
Focus on standby supplies, 5111
Heat removal from large batteries for load leveling, 5133
High power electrochemical systems (Developments in high-specific-power, high-specific-energy systems), 2390
High-temperature batteries, 610 (ANL-76-8)
Liquid metal electrodes in secondary batteries (Review of developments in batteries of various types), 3175 (CONF-760503-10)
Lithium batteries. Vol. I. 1964-1974 (citations from the NTIS data base). Report for 1964-1974, 106 (NTIS/PS-76/0542)
Lithium batteries. Vol. II. 1975-May 1976 (citations from the NTIS data base). Report for 1975-May 1976, 107 (NTIS/PS-76/0543)
Lithium batteries (citations from the Engineering Index data base). Report for 1970-May 1976, 108 (NTIS/PS-76/0544)
Lithium/sulfur batteries for off-peak energy storage: a preliminary comparison of energy storage and peak power generation systems, 4856 (ANL-7958)
Meeting future peak electrical energy demands by means of electrochemical storage systems, 5121
National Battery Energy Storage Test (BEST) facility: conceptual design and cost estimate, 3184 (EPRI-255(TR1))
Peaking power batteries for electric utilities, 5086
Prospects for applying electrochemical energy storage in future electric power systems, 5167
Recent developments in advanced secondary batteries, 1115
Review of battery research and development, 1248
Secondary batteries for load leveling (Technical and cost criteria), 4853 (ANL-76-8)
Storage batteries: the case and the candidates, 2158
Storage batteries: the case and the candidates, 843
Stored energy: the state of the art, 5035
OFF-PEAK ENERGY STORAGE/ELECTRONIC EQUIPMENT
Peak load levelling system, 5101
OFF-PEAK ENERGY STORAGE/FEASIBILITY STUDIES
Economic study of electrical peaking alternatives, 5084
OFF-PEAK ENERGY STORAGE/FLYWHEELS
Energy storage for the electric power industry, 82 (LA-UR-74-918)
OFF-PEAK ENERGY STORAGE/FUEL CELLS
Economic study of electrical peaking alternatives, 5084
Energy from electrochemical reactions (Review, no references), 5135
OFF-PEAK ENERGY STORAGE/HYDROGEN FUEL CELLS
Studies on the bipolar liquid metal electrode, 3159 (ANL-76-8)
OFF-PEAK ENERGY STORAGE/HYDROGEN STORAGE
Energy storage for the electric power industry, 82 (LA-UR-74-918)
Lithium/sulfur batteries for off-peak energy storage: a preliminary comparison of energy storage and peak power generation systems, 4856 (ANL-7958)
OFF-PEAK ENERGY STORAGE/INVERTERS
Power conversion equipment for storage batteries, 5012 (PB-251490)
OFF-PEAK ENERGY STORAGE/LEAD-ACID BATTERIES
Batteries for energy storage, 890
Battery systems for peaking power generation, 5132
Capital cost credits for battery energy storage: comments on workshop results and discussions, 2105 (PB-251490)
Case for lead-acid storage battery peaking systems, 2214
Design and cost study for state-of-the-art lead acid load leveling and peaking batteries. Final report (2500 cycles, 10 MW, 100 MWh), 675 (EPRI-EM-375)
Economic analysis, 5011 (PB-251490)
Engineering study of a 20 MW lead-acid battery energy storage demonstration plant. Final report for the period ending October 1976, 663 (CONS/1205-1)
Executive summary study of lead-acid battery systems for peaking power. Final report for the period ending October 1976, 664 (CONS/2114-1)
Heat removal from large batteries for load leveling, 5133
Lead-acid battery, 608 (ANL-76-8)
Lead-acid storage batteries for load leveling, 120 (PB-251490)
Lead-acid battery load leveling configuration: Gould presentation, 734 (PB-251490)
Lead batteries (citations from the NTIS data base). Report for 1964-May 1976, 109 (NTIS/PS-76/0549)
Near-term energy storage technologies: the lead-acid battery. A compilation of workshop papers presented on November 18-19, 1975 (November 18-19, 1975, Palo Alto, CA), 730 (PB-251490)
New lead-acid battery design proposed for utility peaking and load leveling applications, 732 (PB-251490)
Removal of arsine and stibine by lead-acid battery flash arrestors, 2047 (EPRI-EM-448-SR)
Report on an engineering study of a 20-MW, 200-MWh lead-acid battery energy storage demonstration plant, 5009 (PB-251490)
State-of-the-art design study of a lead-acid load leveling battery: the ESB concept, 733 (PB-251490)
Storage of electric energy, 1108
Study of the auxiliaries for lead-acid battery systems for peaking power. Final report for the period ending October 1976, 3180 (CONS/2114-3)
Study of the manufacturing costs of lead-acid batteries for peaking power. Final report for the period ending Oct. 1976, 665 (CONS/2114-2)
Technical analysis, 5010 (PB-251490)
OFF-PEAK ENERGY STORAGE/LITHIUM-CHLORINE BATTERIES
Activity coefficients of dilute solutions of lithium in liquid aluminum-tin alloys: electromotive force measurements and interpretation, 3341
Corrosion and related problems in high-temperature cells, 1257
Studies on the lithium alloys--chlorine secondary battery, 2278
Studies on the negative alloy electrode, 3157 (ANL-76-8)
Studies on the alkali metal alloy-chlorine secondary battery, 3360
OFF-PEAK ENERGY STORAGE/LITHIUM-COPPER CHLORIDE BATTERIES
Activity coefficients of dilute solutions of lithium in liquid aluminum-tin alloys: electromotive force measurements and interpretation, 3341
OFF-PEAK ENERGY STORAGE/LITHIUM-SULFUR BATTERIES
Activity coefficients of dilute solutions of lithium in liquid aluminum-tin alloys: electromotive force measurements and interpretation, 3341
Batteries for energy storage, 890
Battery research sponsored by the U.S. Energy Research and Development Administration, 4952 (CONF-760112-1)
Cathode composition for electrochemical cell (Patent; Li/LiCl-KCl/FeS-$Cu_2S$), 3445
Ceramics in lithium alloy/metal sulfide batteries, 3171 (CONF-751194-)
Characterization of porous Li-Al alloy electrodes, 2032 (ANL-76-8)
Chemical investigations of lithium--sulfur cells, 1090
Comparison of U.S. and European high-temperature battery programs, 611 (ANL-76-8)
Corrosion and related problems in high-temperature cells, 1257
Cost estimate for the commercial manufacture of lithium/iron sulfide cells for load-leveling, 618 (ANL-76-12)
Current status of the Atomics International lithium-iron sulfide battery development, 614 (ANL-76-8)
Design and testing of lithium/iron sulfide batteries for electric vehicle propulsion, 657 (CONF-760866-2)
Design and performance of Li-Al/iron sulfide cells for utility energy storage and electric vehicles, 656 (CONF-760617-3)
Design work on lithium-sulfur battery (and others), 647 (CONF-691143-)
Development of lithium/metal sulfide batteries at Argonne National Laboratory: summary report for 1974, 606 (ANL-75-20)
Development of prototype lithium/sulfur cells for application to load-leveling devices in electric utilities, 1246
Development of high-performance iron sulfide electrodes with porous current collector structures, 3790
Development of lithium/metal sulfide batteries at Argonne National Laboratory: summary report for 1975, 620 (ANL-76-45(Rev.))
Development of a compact, high-capacity $FeS_2$ electrode, 3463
Development of uncharged Li-Al/FeS cells, 612 (ANL-76-8)
Development of uncharged Li-Al/FeS/sub x/ cells, 892
Development status of lithium-silicon-iron sulfide load-

leveling batteries ($Li_5Si/LiCl-KCl/FeS$ or $FeS_2$, 400°C), 893
Development of lithium-metal sulfide batteries for load leveling. Progress report, 3262 (PB-253164)
Development of lithium/metal sulfide batteries at Argonne National Laboratory: summary report, 1976 (Li-Al/LiCl-KCl/FeSorFeS$_2$, 400 to 450°C), 624 (ANL-77-18)
Development of lithium-metal sulfide batteries for load leveling, 671 (EPRI-116)
Development of lithium-metal sulfide batteries for load leveling. Progress report No. 3, July 1, 1975-September 30, 1976 (25 to 1000 Wh, >1000 cycles), 676 (EPRI-EM-460)
Effects of metal additives on the performance characteristics of lithium-aluminum alloy electrodes, 3176 (CONF-770531-4)
Electrochemical cell assembled in discharged state (Patent; 3 to 13Ah), 881
Electrochemistry of lithium/metal sulfide and calcium/metal sulfide cells using molten salt electrolytes, 2044 (CONF-770531-1)
Electrode structure for electrical energy storage device, 3334
Engineering evaluation of solid transition-metal sulfide electrodes for use in high energy-density batteries, 3465
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period January-June 1974, 635 (ANL-8109)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period July-December 1974, 605 (ANL-75-1)
High-performance batteries for off-peak energy storage. Progress report, July-December 1973, 632 (ANL-8057)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-June 1975, 607 (ANL-75-36)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, July-December 1975, 617 (ANL-76-9)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-March 1976 (Li-Al/LiCl-KCl/FeS or $FeS_2$; some work on $CaAl_2$, $Ca_2Si$, and Mg anodes and FeS, $Fe_3O_4$ and $FeS_2$ cathodes; ANL), 619 (ANL-76-35)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, April-June 1976, 621 (ANL-76-81)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period July-September 1976 (Li-Al/Kcl-LiCl/Fes or $FeS_2$; tests of $Li/TiS_2$, $Na/FeS_2$, and $CaMg_2$/FeS cells), 622 (ANL-76-98)
High-performance batteries for stationary energy storage and electric-vehicle propulsion. Progress report, October-December 1976, 623 (ANL-77-17)
High-performance batteries for stationary energy storage and electric-vehicle propulsion. Progress report, January-March 1977, 625 (ANL-77-35)
Impact of advanced batteries on electric power generation, 5138
Instrumentation for automatic cycling of lithium-aluminum/iron sulfide secondary cells, 3163 (ANL-76-119)
Interelectrode separator for electrochemical cell, 3494
Lithium/metal - sulfur advanced batteries, 677 (ERDA-76-136)
Lithium power may put electric car in your future, 5114
Lithium requirements for high-energy lithium-aluminum/iron sulfide batteries for load-leveling and electric-vehicle applications, 3173 (CONF-760112-3)
Lithium-silicon electrodes for the lithium-iron sulfide battery, 3158 (ANL-76-8)
Lithium/sulfur secondary cells, 2385
Materials corrosion in molten-salt lithium-sulfur cells, 1262
Materials development in the lithium-aluminum/iron sulfide battery program at Argonne National Laboratory, 3152 (ANL-76-8)
Metallic sulfide additives for positive electrode material within a secondary electrochemical cell (Patent; Fe sulfide electrode with sulfide additives of Co, Ni, Cu, Ce, Mn), 3366
Method of preparing electrodes with porous current collector structures and solid reactants for secondary electrochemical cells (Patent; Li-Al-Si/LiF-LiCl-KCl/$FeS_2$), 3457
Method of preparing a negative electrode including lithium alloy for use within a secondary electrochemical cell (Patent), 3478
Method of preparing an electrode material of lithium-aluminum alloy (Patent), 3429
Method of preparing a negative electrode including lithium alloy for use within a secondary electrochemical cell (Patent; Li-Al/KCl-LiCl/FeS), 3309
Method of preparing an electrochemical cell in uncharged state (Patent; cathode of Li sulfide, transition metal, and electrolytic salt), 811
Modeling approaches for molten-salt lithium/sulfide batteries, 616 (ANL-76-8)
Performance of lithium/iron sulfide cells, 1236
Performance characteristics of solid lithium-aluminum alloy electrodes, 3371
Rechargeable lithium--sulfur battery executive summary progress report through 1973, 724 (PB-237672)
Rechargeable lithium/iron sulfide battery, 3785
Review of electrode designs and fabrication techniques for lithium-aluminium/iron sulfide cells, 3466
Uncharged positive electrode composition (Patent), 3310

OFF-PEAK ENERGY STORAGE/LITHIUM-WATER-AIR BATTERIES
Activity coefficients of dilute solutions of lithium in liquid aluminum-tin alloys: electromotive force measurements and interpretation, 3341

OFF-PEAK ENERGY STORAGE/METAL-GAS BATTERIES
Batteries for energy storage, 890
Heat removal from large batteries for load leveling, 5133
Studies on the alkali metal alloy-chlorine secondary battery, 3360

OFF-PEAK ENERGY STORAGE/METAL-NONMETAL BATTERIES
Calcium alloy as active material in secondary electrochemical cell ( Patent; Ca alloy/halide/oxides, sulfides), 3354
Calcium/iron sulfide secondary cells, 3177 (CONF-770531-5)
Characteristics of a tellurium-lithium/aluminum battery, 1396
Characteristics of a tellurium-lithium/aluminum battery, 1400
Compartmented electrode structure (Patent application), 3452
Electrical energy storage and intercalation chemistry, 865
Electrochemistry of lithium/metal sulfide and calcium/metal sulfide cells using molten salt electrolytes, 2044 (CONF-770531-1)
Electrode structure for electrical energy storage device, 3334
Engineering evaluation of solid transition-metal sulfide electrodes for use in high energy-density batteries, 3191 (LBL-5186)
Engineering evaluation of solid transition-metal sulfide electrodes for use in high energy-density batteries, 3465
High-energy battery program at Argonne National Laboratory (Li--Al/LiCl--KCl/$FeS_2$), 634 (ANL-8064)
High-performance batteries for off-peak energy storage. Progress report for the period January-June 1973 (Li--Al/LiCl--KCl/S--As--C), 630 (ANL-8038)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-March 1976 (Li-Al/LiCl-KCl/FeS or $FeS_2$; some work on $CaAl_2$, $Ca_2Si$, and Mg anodes and FeS, $Fe_3O_4$ and $FeS_2$ cathodes; ANL), 619 (ANL-76-35)
Improvements of electrolyte and seal technology for sodium-sulfur and sodium antimony trichloride load leveling batteries. Final report, 3187 (EPRI-EM-413(6-77))
Method of preparing porous, active material for use in electrodes of secondary electrochemical cells (Patent application; carbonaceous matrices contain embedded active material), 3455
Porous carbonaceous electrode structure and method for secondary electrochemical cell (Patent), 3311
Rechargeable calcium high-temperature cells, 2031 (ANL-76-8)
Secondary battery or cell with composite electrode (Patent; separate portions of electrode optimized for charging and discharging), 3365
Sodium chloride battery development program for load leveling. Interim report, 1 Apr-31 Dec 1974, 726 (PB-243872/9ST)

OFF-PEAK ENERGY STORAGE/NICKEL-ZINC BATTERIES
Zinc-nickel oxide secondary battery, 1099

OFF-PEAK ENERGY STORAGE/PLANNING
Report on an engineering study of a 20-MW, 200-MWh lead-acid battery energy storage demonstration plant, 5009 (PB-251490)

OFF-PEAK ENERGY STORAGE/PUMPED STORAGE
Economic study of electrical peaking alternatives, 5084
Energy storage for the electric power industry, 82 (LA-UR-74-918)
Lithium/sulfur batteries for off-peak energy storage: a preliminary comparison of energy storage and peak power generation systems, 4856 (ANL-7958)

OFF-PEAK ENERGY STORAGE/REDOX FUEL CELLS
Batteries for energy storage, 890
Electrically rechargeable redox flow cells, 1247
Meeting future peak electrical energy demands by means of electrochemical storage systems, 5121

OFF-PEAK ENERGY STORAGE/SIMULATION
Computer study of battery energy storage and power conversion equipment operation (Operation at substation), 5065

OFF-PEAK ENERGY STORAGE/SODIUM-SULFUR BATTERIES
Anodic evolution of sulphur from sodium polysulphide melts. I. Voltammetric measurements on planar carbon electrodes, 2142
Batteries for energy storage, 890
Ceramics in the sodium-sulfur battery, 3172 (CONF-751194-)
Characteristics of a sodium-sulfur cell for bulk energy storage, 2296
Comparison of U.S. and European high-temperature battery programs, 611 (ANL-76-8)
Corrosion and related problems in high-temperature cells, 1257

Current status and prospects of the Zn-air and Na-S batteries in France, 609 (ANL-76-8)
Development program for solid electrolyte batteries. Final report, 1 January 1973-30 June 1974, 672 (EPRI-127-1)
Development program for solid electrolyte batteries. Final report, 1 January 1973-30 June 1974, 3254 (PB-238691)
Development of sodium/sulfur - cells, 895
Development of sodium-sulfur batteries for utility application. Annual report, 674 (EPRI-EM-266)
Development program for solid electrolyte batteries. Final report, 736 (PB-260719)
Engineering evaluation of solid transition-metal sulfide electrodes for use in high energy-density batteries, 3465
Heat removal from large batteries for load leveling, 5133
Impact of advanced batteries on electric power generation, 5138
Improvements of electrolyte and seal technology for sodium-sulfur and sodium antimony trichloride load leveling batteries. Final report, 3187 (EPRI-EM-413(6-77))
Metallic sulfide additives for positive electrode material within a secondary electrochemical cell (Patent; Fe sulfide electrode with sulfide additives of Co, Ni, Cu, Ce, Mn), 3366
Secondary battery or cell with dual electrode (Patent; alkali metal/S, usually Na/S), 842
Secondary battery or cell with composite electrode (Patent; separate portions of electrode optimized for charging and discharging), 3365
Sodium-sulfur battery development. Final report, 1 April 1973-30 April 1974, 673 (EPRI-128-0-0)
Sodium-sulfur test cell utilizing a β-alumina flat-plat separator, 1094
Sodium/sulfur battery: a progress report, 613 (ANL-76-8)
Sodium-sulfur battery development for bulk power storage. Interim report, 2104 (PB-246000)
Sodium-sulphur battery system. Annual report, May 19, 1975-May 19, 1976 (Dow Chemical U.S.A.), 668 (COO-2565-4)
Sodium-sulfur battery, 1128
Some studies on sodium/sulfur cells, 3358
Substructure and properties of sodium β-alumina solid electrolytes. Interim report, 3258 (PB-244648)
OFF-PEAK ENERGY STORAGE/SUPERCONDUCTING MAGNETS
Energy storage for the electric power industry, 82 (LA-UR-74-918)
OFF-PEAK ENERGY STORAGE/ZINC-CHLORINE BATTERIES
Batteries for energy storage, 890
Engineering design and cost analysis of chlorine storage concepts for a zinc-chlorine load-leveling battery. Final report, 737 (PB-262016)
Evaluation of a 1-kWh zinc chloride battery system. Interim report, 2107 (PB-260683)
Impact of advanced batteries on electric power generation, 5138
Super batteries for load leveling and electric vehicles, 799
OFF-PEAK ENERGY STORAGE/ZINC-MANGANESE BATTERIES
Storage of electric energy, 1108
OFFSHORE DRILLING/ELECTRIC BATTERIES
Recent improvements in high performance secondary batteries for use on offshore platforms, 1105
OFFSHORE DRILLING/NICKEL-CADMIUM BATTERIES
Recent improvements in high performance secondary batteries for use on offshore platforms, 1105
OFFSHORE OPERATIONS/POWER SUPPLIES
Capsulating energy systems for small submersibles, 2464
OFFSHORE PLATFORMS/NICKEL-CADMIUM BATTERIES
Submersible power supplies, 1057
OFFSHORE PLATFORMS/POWER SUPPLIES
Recent improvements in high performance secondary batteries for use on offshore platforms, 2238
OFFSHORE SITES
Role of battery related systems in offshore engineering, 5119
ORGANIC POLYMERS/CHEMICAL RADIATION EFFECTS
Battery separator for alkaline storage batteries (Patent), 4329
OXYGEN/CHEMICAL ANALYSIS
Ionic superconductors, 3776
OXYGEN/REDUCTION
Mechanism of reduction of oxygen at air electrode, 237
Reduction of oxtgen on nickel-cobalt oxides. II. Correlation between crystal structure and activity of $Co_2NiO_4$ and related oxides, 4141
Reduction of oxygen on nickel-cobalt oxides. I. The influence of composition and preparation method on the activity of nickel-cobalt oxides, 4142
OXYGEN EFFECT (RADIOBIOLOGY)
See OXYGEN
OXYGEN ISOTOPES/ISOTOPE SEPARATION
Ionic superconductors, 3776

PLASMA/RESEARCH PROGRAMS
Research group activity report for the period 1 Jan 1968-31 Mar 1969, 64 (AD-914449)
POTASSIUM ALLOYS/ELECTRIC CONDUCTIVITY
Electrical resistivity of K-Hg and Na-Hg systems and diffusivity of K-Hg system at high temperatures, 1532
POTASSIUM CHLORIDES/PHASE DIAGRAMS
Phase diagram of system LiCl-KCl-$CaCrO_4$, 4447
POTASSIUM CHLORIDES/THERMODYNAMIC PROPERTIES
Structure and anodic discharge behavior of lithium-boron alloys in the licl-kcl eutectic melt., 3447
POTASSIUM COMPOUNDS/ELECTRIC CONDUCTIVITY
New solid conductors of $Na^+$ and $K^+$ ions ($NaTaWO_6$; $NaTa_2O_5F$; $NaSbO_3$; Na and K niobates), 3433
POTASSIUM FLUORIDES/ELECTRIC CONDUCTIVITY
Electrical conductivity measurements in anhydrous hydrogen fluoride, 4339
POTASSIUM HYDROXIDES/CORROSIVE EFFECTS
Corrosion in alkali hydroxide solutions of electrolytic zinc powder containing codeposited lead, 3448
Corrosion of pure and amalgamated zinc in concentrated alkali hydroxide solutions, 3905
POTASSIUM NITRATES/ELECTRIC CONDUCTIVITY
Electrical conductivity measurements in anhydrous hydrogen fluoride, 4339
POTASSIUM NITRATES/ELECTROLYSIS
Composition gradient during electrolysis in mixtures analogous to molten salt battery electrolytes, 2045 (CONF-770814-5)
POTASSIUM PERCHLORATES/SURFACE PROPERTIES
Surface analysis of pyrotechnic material, 3190 (GEPP-324)
POWER CONDITIONING CIRCUITS/COMPARATIVE EVALUATIONS
ac/dc power conditioning and control equipment for advanced conversion and storage technology. Final report, 3186 (EPRI-EM-271)
POWER CONDITIONING CIRCUITS/MEETINGS
Proceedings, 20th Annual Power Sources Conference, 24-26 May 1966, Fort Monmouth, NJ, 39 (AD-696425)
POWER CONDITIONING CIRCUITS/PERFORMANCE TESTING
ac/dc power conditioning and control equipment for advanced conversion and storage technology. Final report, 3186 (EPRI-EM-271)
POWER GENERATION
Comeback for Reddy Kilowatt (Descriptive review article on alternative means of power generation), 185
POWER GENERATION/COMPARATIVE EVALUATIONS
High-intensity tactical power sources for the 1990 Army. Final report, 522 (AD-865063)
POWER GENERATION/ECONOMICS
Economy of operation of electrochemical storage devices as compared to conventional peak power generators, 5051
POWER GENERATION/ELECTRICAL EQUIPMENT
Homegrown energy: power for the home and homestead, 145
POWER GENERATION/ELECTRIC-POWERED VEHICLES
Energy requirements for electric cars and their impact on electric power generation and distribution systems, 5168
POWER GENERATION/MEETINGS
Transactions of the seventh world energy conference, Moscow, 1968. Volume 13. Section C4. New sources and methods of producing electricity., 211
POWER GENERATION/PLANNING
Power: problems and progress, 132

POWER GENERATION/RESEARCH PROGRAMS
Research Institute of L'Hydro-Quebec, 200
Research Institute of L'Hydro-Quebec, 1409
POWER GENERATION/REVIEWS
Lightweight, extremely high-power electrical sources, 98 (NP-11716)
POWER PLANTS

PRIMARY BATTERIES/ANODES
Anodic behavior of lithium in aqueous lithium hydroxide solutions (Lithium-water battery), 766 (UCRL-78156)
PRIMARY BATTERIES/BATTERY CHARGERS
Doubling dry cell life, 4818
PRIMARY BATTERIES/BATTERY CHARGING
Don't toss that battery yet: dry cells are rechargeable, 2570
Feasibility of recharging FAA in-service dry cell batteries. Final report, 1734 (AD-620018)
Reactivating dry cell (Method useful for cells subjected to heavy discharge for brief time), 2700
Recharging of Leclanche dry cells, 2605
Recharging of Leclanche dry cells, 2608
Some problems associated with charging of dry batteries, 2656
PRIMARY BATTERIES/BIBLIOGRAPHIES
Guided missile batteries: an annotated bibliography (243 references), 15 (AD-478826)
PRIMARY BATTERIES/CATHODES
Discharge characteristic and performance of lithium-silver tungstate and lithium-silver molybdate organic solvent batteries, 2144
Experimental optimization of $Li/SOCl_2$ primary cells with respect to the electrolyte and the cathode compositions, 3393
Role of porosity in the modern technology of batteries, 4376
Sodium-water primary cell with a rotating cathode, 851
PRIMARY BATTERIES/CHEMICAL REACTIONS
Anodic behavior of lithium in aqueous lithium hydroxide solutions (Lithium-water battery), 766 (UCRL-78156)
Materials balance in primary batteries. 4. Lithium batteries with organic electrolytes, 2162
PRIMARY BATTERIES/COMPUTER-AIDED DESIGN
Materials balance in primary batteries. III. Computer aided design for standard size lithium-thionyl chloride high power cells, 874
PRIMARY BATTERIES/DESIGN
Base for leakproof electrochemical cells and method of forming the same (Patent; dry cell), 1191
Battery whose battery chamber contains a liquid-absorbing material, activated by electrolyte charging, and method of introducing the liquid-absorbing material (Patent), 997
Deep sea pressure compensated expendable energy source (Patent), 883
Dry batteries. Modern energy sources with an ever broader range of applications, 900
Electrochemical cell (Patent; alkali metal/$C_xF$), 903
Flat alkaline cell with positive and negative terminal connections and a third terminal connection for an auxiliary electrode (Patent), 852
Lithium iodine battery having improved energy density (Patent), 1079
Materials balance in primary batteries. I. Lithium inorganic cells at low discharge rates, 911
Materials balance in primary batteries. II. Lithium inorganic batteries at high discharge rates, 889
Sodium-water primary cell with a rotating cathode, 851
Thermal battery (Patent), 917
Thin-film current sources on β-AgI base, 952
PRIMARY BATTERIES/ELECTRIC IMPEDANCE
Response of standard cells to alternating currents in the frequency range $10-10^5$ Hz, 2151
PRIMARY BATTERIES/ELECTRIC POTENTIAL
Dry electrochemical cell containing cupric chloride supported by γ-alumina, 944
PRIMARY BATTERIES/ELECTROCHEMISTRY
Anodic behavior of lithium in aqueous electrolytes. I. Transient passivation ($Li/H_2O$ battery), 2169
Role of porosity in the modern technology of batteries, 4376
PRIMARY BATTERIES/ELECTRODES
Corrosion of pure and amalgamated zinc in concentrated alkali hydroxide solutions, 3905
Method for the fabrication of galvanic elements sealed against external and/or internal influences by a cup-shaped container with a top made of thermoplastic materials (Patent), 3735
PRIMARY BATTERIES/ELECTROLYTES
Experimental optimization of $Li/SOCl_2$ primary cells with respect to the electrolyte and the cathode compositions, 3393
Leclanche electrolyte compositional studies for thin film batteries., 3446
New type of Leclanche battery. II. Study of an intermittent regime (Improvements when $Cl^-$ is added to $Mg(ClO_4)_2 + Mg(OH)_2$), 3458
PRIMARY BATTERIES/IMPACT TESTS
Electrical and environmental testing of lithium $V_2O_5$ cells. II. Temperature and shock studies, 2112 (SAND-75-5933)
PRIMARY BATTERIES/MATERIAL BALANCE
Materials balance in primary batteries. I. Lithium inorganic cells at low discharge rates, 911
Materials balance in primary batteries. II. Lithium inorganic batteries at high discharge rates, 889
PRIMARY BATTERIES/MATERIALS
Battery materials, 1970, 4427
PRIMARY BATTERIES/PACKAGING
Electric generators particularly dry cell batteries (Patent; protective cap ensuring that cell is not discharged accidentally before sale), 3440
PRIMARY BATTERIES/PERFORMANCE
Discharge characteristic and performance of lithium-silver tungstate and lithium-silver molybdate organic solvent batteries, 2144
Thin-film galvanic cell $Pb/PbF_2/PbF_2,CuF_2/Cu$ (Not rechargeable), 888
PRIMARY BATTERIES/PERFORMANCE TESTING
Electrical and environmental testing of lithium $V_2O_5$ cells. II. Temperature and shock studies, 2112 (SAND-75-5933)
Electrical and environmental testing of lithium $V_2O_5$ cells. I. Storage and discharge rate studies (-54°C to +71°C), 2113 (SAND-75-5934)
Investigation of lithium-thionyl chloride batteries for Navy applications, 2181
Lithium-organic electrolyte cell studies (Discharge curves of commercial cell under various storage and discharge conditions), 2111 (SAND-75-0646)
Technological progress in pacemaker design: hermetic

sealing, 2240
PRIMARY BATTERIES/RESEARCH PROGRAMS
Electrical Power Sources Division quarterly progress notes, 1 January 1976-31 March 1976, 600 (AD-B-013277)
Quarterly progress notes, 1 April 1974-30 June 1974, 564 (AD-922405)
Quarterly progress notes, 1 January 1975-31 March 1975, 598 (AD-B-004545)
Quarterly progress notes, 1 October 1975-31 December 1975, 599 (AD-B-009796)
PRIMARY BATTERIES/REVIEWS
Chemical compositions, structures, performance, and uses of batteries; (review with 108 references), 233
PRIMARY BATTERIES/SEALS
Seal for energy conversion devices (Patent), 3377
PRIMARY BATTERIES/STORAGE LIFE
Electrical and environmental testing of lithium $V_2O_5$ cells. I. Storage and discharge rate studies (-54°C to +71°C), 2113 (SAND-75-5934)
PRIMARY BATTERIES/TESTING
Storage and discharge tests of lithium-organic electrolyte cells (Li/$LiAsF_6$ + $LiBF_4$ in methyl formate/$V_2O_5$), 2110 (SAND-75-0645)
PRIMARY-SECONDARY HYBRID BATTERIES/COMPARATIVE EVALUATIONS
Economic comparison of four electric power sources for forklift trucks, 2003 (AD/A-006479)
PRIMARY-SECONDARY HYBRID BATTERIES/ELECTROLYTES
Alkaline electrolyse for galvanic cells containing hydrogen-storage electrodes (Patent), 3700
PRIMARY-SECONDARY HYBRID BATTERIES/FUEL CELLS
Development of the BB-520( )/U nickel--cadmium battery for hybrid applications. Semi-annual report Nov 1972--May 1973, 556 (AD-915855L)
PRIMARY-SECONDARY HYBRID BATTERIES/LITHIUM-WATER-AIR BATTERIES
Lithium-water-air batteries for automotive energy, 5024 (UCRL-52000-75-9)
PRIMARY-SECONDARY HYBRID BATTERIES/METAL-GAS BATTERIES
Lithium-water-air battery: a new concept for automotive propulsion (Modified lithium--water battery, mechanically rechargeable), 754 (UCID-16751)
PRIMARY-SECONDARY HYBRID BATTERIES/NICKEL-CADMIUM BATTERIES
Development of the BB-520( )/U nickel--cadmium battery for hybrid applications. Semi-annual report Nov 1972--May 1973, 556 (AD-915855L)
Development and manufacture of primary--secondary hybrid battery, 542 (AD-906599L)
Engineering evaluation of the zinc-mercuric oxide battery/nickel-cadmium battery hybrid system, 2310
Performance characteristics of magnesium--manganese dioxide/nickel--cadmium hybrid system. Technical report, 1945 (AD-908198)
Performance characteristics of magnesium-manganese dioxide/nickel-cadmium hybrid system. Technical report, 1946 (AD-908198)
Primary--secondary battery hybrid systems, 427 (AD-757296)
Primary--secondary battery hybrid systems, 2384
Primary-secondary battery hybrid systems, 2376
R and D for hybrid battery and cell studies. Interim report, 1 Apr-1 Oct 1973, 561 (AD-917663L)
Sealed nickel--cadmium cells for hybrid battery applications. Final report, 10 Jul 1972--31 Dec 1973, 242 (AD-918-041L)
PRIMARY-SECONDARY HYBRID BATTERIES/OPERATION
Alkaline aluminium--air/zinc--manganese dioxide hybrid battery (Patent), 987
PRIMARY-SECONDARY HYBRID BATTERIES/PERFORMANCE
Engineering evaluation of the zinc-mercuric oxide battery/nickel-cadmium battery hybrid system, 1999 (AD/A-001529)
Lithium-water-air battery: a new concept for automotive propulsion (Modified lithium--water battery, mechanically rechargeable), 754 (UCID-16751)
Performance characteristics of magnesium--manganese dioxide/nickel--cadmium hybrid system. Technical report, 1945 (AD-908198)
Performance characteristics of magnesium-manganese dioxide/nickel-cadmium hybrid system. Technical report, 1946 (AD-908198)
Primary--secondary battery hybrid systems, 2384
Primary-secondary battery hybrid systems, 2376
PRIMARY-SECONDARY HYBRID BATTERIES/PERFORMANCE TESTING
Engineering evaluation of the zinc-mercuric oxide battery/nickel-cadmium battery hybrid system, 2310
Simulated field tests on zinc-air batteries, 2289
PRIMARY-SECONDARY HYBRID BATTERIES/THERMOELECTRIC GENERATORS
Development of the BB-520( )/U nickel--cadmium battery for hybrid applications. Semi-annual report Nov 1972--May 1973, 556 (AD-915855L)
PRIMARY-SECONDARY HYBRID BATTERIES/ZINC-AIR BATTERIES
R and D for hybrid battery and cell studies. Interim report, 1 Apr-1 Oct 1973, 561 (AD-917663L)
PRIMARY-SECONDARY HYBRID BATTERIES/ZINC-MANGANESE BATTERIES
Alkaline aluminium--air/zinc--manganese dioxide hybrid battery (Patent), 987

Noncommunication expendable jammer investigations. Volume 1. Power sources, 1640 (AD-441993)
Quarterly progress notes, 1 Apr-30 Jun 1973, 551 (AD-912804)
Standard family of power sources for manpack equipments. Technical report, 385 (AD-687263)
RADIO EQUIPMENT POWER SUPPLIES/HYBRID SYSTEMS
60-watt liquid hydrazine fuel cell. Technical information report (For recharging storage batteries), 3025 (AD-835257)
Fuel cell-battery power sources, 1435
RADIO EQUIPMENT POWER SUPPLIES/HYDRAZINE FUEL CELLS
60/240 watt hydrazine fuel cell system (Nickel-cadmium battery recharged by hydrazine air fuel cell), 2523
Power conditioning and control module for hydrazine-air battery, type I, PP-6204( )/U (60 W), 2940 (AD-732339)
RADIO EQUIPMENT POWER SUPPLIES/LEAD-ACID BATTERIES
Batteries used with law enforcement communications equipment: chargers and charging techniques, 3249 (PB-221475)

RADIO EQUIPMENT POWER SUPPLIES/METAL-NONMETAL BATTERIES
Advanced design battery power source for aircrew survival transceivers and beacons. Interim technical report, March 1968-August 1969, 519 (AD-861947)
RADIO EQUIPMENT POWER SUPPLIES/NICKEL-CADMIUM BATTERIES
60/240 watt hydrazine fuel cell system (Nickel-cadmium battery recharged by hydrazine air fuel cell), 2523
Batteries used with law enforcement communications equipment: chargers and charging techniques, 3249 (PB-221475)
Development test and evaluation of the AN/PRC-66 uhf manpack transceiver. Final report, 11 September-3 October 1967, 1863 (AD-826132)
Development of Ni/Cd batteries with sintered electrodes, 304 (AD-495878)
Manpack vented nickel-cadmium batteries, BB-500( )/U, BB-607( )/U, and BB-610( )/U, 510 (AD-849828)
Nickel cadmium power source for acoustic transponders, 1654 (AD-456992)
Vented nickel-cadmium battery, BB-501( )/U, 504 (AD-845914)
RADIO EQUIPMENT POWER SUPPLIES/PERFORMANCE TESTING
Electrical power requirements. Final report on material test procedure, 4838 (AD-719099)
RADIO EQUIPMENT POWER SUPPLIES/PRIMARY-SECONDARY HYBRID BATTERIES
Engineering evaluation of the zinc-mercuric oxide battery/nickel-cadmium battery hybrid system, 2310
Engineering evaluation of the zinc-mercuric oxide battery/nickel-cadmium battery hybrid system, 1999 (AD/A-001529)
Performance characteristics of magnesium--manganese dioxide/nickel--cadmium hybrid system. Technical report, 1945 (AD-908198)
Performance characteristics of magnesium-manganese dioxide/nickel-cadmium hybrid system. Technical report, 1946 (AD-908198)
Primary--secondary battery hybrid systems, 427 (AD-757296)
RADIO EQUIPMENT POWER SUPPLIES/RESEARCH PROGRAMS
Project MALLARD. Communications plan and proposals for research and development. Volume IV. Technical background and constraints. Section 1, Annex A, Appendix 16, power sources. Final report on Phase 1, 58 (AD-812841L)
RADIO EQUIPMENT POWER SUPPLIES/REVIEWS
Energy sources which can be used for telecommunication purposes, 1463
RADIO EQUIPMENT POWER SUPPLIES/SOLAR CELLS
Noncommunication expendable jammer investigations. Volume 1. Power sources, 1640 (AD-441993)
RADIO EQUIPMENT POWER SUPPLIES/THERMIONIC CONVERTERS
Noncommunication expendable jammer investigations. Volume 1. Power sources, 1640 (AD-441993)
RADIO EQUIPMENT POWER SUPPLIES/THERMOELECTRIC GENERATORS
Noncommunication expendable jammer investigations. Volume 1. Power sources, 1640 (AD-441993)
RADIO EQUIPMENT POWER SUPPLIES/ZINC-AIR BATTERIES
Development test II (engineering phase) of zinc--air battery BA-536( )/U. Final report, Aug 1973--Jan 1974, 563 (AD-918965L)
Development of 24 volt, 25 ampere-hour and 60 watt, 720 watt-hour zinc/air battery systems. Technical report No. 1, 16 March 1966-16 October 1967, 367 (AD-668691)
Development of zinc/air 24 volt, 48 ampere-hour standard line battery system. Final report, 15 June 1967-29 February 1968, 374 (AD-674212)
Development of zinc/air 24 volt, 20 ampere-hour standard line battery system. Final report, 8 March-29 November 1968, 388 (AD-690856)
High rate performance of zinc--air batteries, 2489
Mechanically rechargeable zinc-air battery, 1769 (AD-693865)
Metal--air systems. 3. Primary zinc--air battery systems, 2553
Metal-air primary batteries. 1. Replaceable zinc anode radio battery, 1499
New designs for zinc--air batteries. Research and development technical report, 390 (AD-697125)
New mechanically rechargeable zinc/air battery design. Interim technical report No. 3, 1 Feb-1 May 1972, 424 (AD-753361)
Rechargeable zinc electrochemical energy conversion device (Patent), 1204
Zinc-air hybrid fuel cells. Technical information report, 487 (AD-834903)
Zinc-air hybrid fuel cells, 488 (AD-834903)
RADIOISOTOPE BATTERIES

Electrical Power Sources Division, quarterly progress notes, 1 April 1975-30 June 1975, 601 (ADB-007328)
Electrical Power Sources Division quarterly progress notes, 1 January 1976-31 March 1976, 600 (AD-B-013277)
Electrochemistry program at USAECOM, 1367
Quarterly progress notes, 1 Apr-30 Jun 1973 (Defense Research Establishment, Ottawa), 551 (AD-912804)
Quarterly progress notes, 1 Jul 1973--30 Sep 1973 (Defence Research Establishment, Ottawa), 557 (AD-915962)
Quarterly progress notes, 1 July 1973-30 September 1973, 65 (AD-915962)
Quarterly progress notes, 1 April 1974-30 June 1974, 564 (AD-922405)
Quarterly progress notes, 1 July 1974-30 September 1974 (Power supplies for military applications and for satellites), 597 (AD-B-002753)
Quarterly progress notes, 1 January 1975-31 March 1975, 598 (AD-B-004545)
Quarterly progress notes, 1 October 1975-31 December 1975, 599 (AD-B-009796)
Research Institute of L'Hydro-Quebec, 200
Research Institute of L'Hydro-Quebec, 1409
Some aspects of Japanese energy-conversion research and development, 48 (AD-739325)
Spacecraft power: guidance and control division (Neutron yield from (d,n) reactions; fuel cells with liquid amalgam electrodes), 696 (N-71-10258)
RESEARCH PROGRAMS/HIGH-TEMPERATURE FUEL CELLS

Batteries: today and tomorrow, 131
RESEARCH PROGRAMS/HYBRID ELECTRIC-POWERED VEHICLES
Battery-flywheel power system for an urban automobile, 4963 (CONF-770430-P4(Draft))
Development of the electric vehicle at Nissan Motor Co., Ltd., 4896 (CONF-711166-)
RESEARCH PROGRAMS/HYDROGEN
Research group activity report for the period 1 Jan 1968-31 Mar 1969, 64 (AD-914449)
RESEARCH PROGRAMS/IRON-AIR BATTERIES
Development of an iron-air battery system for electric vehicles. Progress report, August 1, 1976-August 31, 1976 (Westinghouse Electric Corp. Research and Development Lab., Pittsburgh, PA), 753 (TID-27211)
RESEARCH PROGRAMS/ISRAEL
Energy research at Technion, 716 (NP-20116)
RESEARCH PROGRAMS/LASERS
Independent research, 1975. Final report (Naval Surface Weapons Center, Silver Spring, Md.), 69 (AD-A-015337)
Review 1969 (Defence Research Board, Ottawa), 523 (AD-868205)
RESEARCH PROGRAMS/LAWRENCE LIVERMORE LABORATORY
Energy and technology review, 765 (UCRL-52000-76-8)
RESEARCH PROGRAMS/LEAD-ACID BATTERIES
Batteries: today and tomorrow, 131
Electrical Power Sources Division. Quarterly progress notes, 1 October 1974-31 December 1974, 740 (PD-18289)
High performance electric commercial vehicles for city use, 899
Quarterly progress notes, 1 April 1974-30 June 1974, 564 (AD-922405)
Quarterly progress notes, 1 January 1975-31 March 1975, 598 (AD-B-004545)
Quarterly progress notes, 1 October 1975-31 December 1975, 599 (AD-B-009796)
Recent progress in secondary batteries (U.S. and Europe), 1576
Storage battery research (Gould Storage Battery Co., Depew, N.Y.), 1612
RESEARCH PROGRAMS/LITHIUM-SULFUR BATTERIES
Aerolyte battery program. Summary report, December 1967-May 1968, 741 (RN-NC-0018)
Battery research sponsored by the U.S. Energy Research and Development Administration, 4952 (CONF-760112-1)
Comparison of U.S. and European high-temperature battery programs, 611 (ANL-76-8)
Development of high-energy batteries for electric vehicles. Progress report for the period July 1970-June 1971 (ANL), 749 (TID-26731)
Development of lithium/metal sulfide batteries at Argonne National Laboratory: summary report for 1975, 620 (ANL-76-45(Rev.))
Development of high-specific-energy batteries for electric vehicles. Progress report, August 1972-January 1973, 628 (ANL-7998)
Development of lithium/metal sulfide batteries at Argonne National Laboratory: summary report, 1976 (Li-Al/LiCl-KCl/FeSorFeS$_2$, 400 to 450°C), 624 (ANL-77-18)
Development of lithium-metal sulfide batteries for load leveling. Progress report No. 3, July 1, 1975-September 30, 1976 (25 to 1000 Wh, >1000 cycles), 676 (EPRI-EM-460)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period January-June 1974 (Li--Al/LiCl--KCl/FeS$_2$; ANL), 635 (ANL-8109)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-June 1975 (Li-Al/KCl-LiCl/Fe sulfide, 42 kWh), 607 (ANL-75-36)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, July-December 1975 (Li-Al/LiCl-KCl/FeS or FeS$_2$), 617 (ANL-76-9)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-March 1976 (Li-Al/LiCl-KCl/FeS or FeS$_2$; some work on CaAl$_2$, Ca$_2$Si, and Mg anodes and FeS, Fe$_3$O$_4$ and FeS$_2$ cathodes; ANL), 619 (ANL-76-35)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, April-June 1976 (Li-Al/LiCl-KCl/FeS or FeS$_2$, operate at 400 to 450 C; some work on Na/FeS$_2$ and CaMg$_2$/CaCl$_2$-LiCl$_2$KCl/FeS cells), 621 (ANL-76-81)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period July-September 1976 (Li-Al/Kcl-LiCl/Fes or FeS$_2$; tests of Li/TiS$_2$, Na/FeS$_2$, and CaMg$_2$/FeS cells), 622 (ANL-76-98)
High-performance batteries for stationary energy storage and electric-vehicle propulsion. Progress report, October-December 1976 (Li--Al/LiCl--KCl/FeS or FeS$_2$, operate at 400 to 450 C), 623 (ANL-77-17)
High-performance batteries for stationary energy storage and electric-vehicle propulsion. Progress report, January-March 1977 (Li-Al/LiCl-KCl/FeS or FeS$_2$), 625 (ANL-77-35)
RESEARCH PROGRAMS/LITHIUM-WATER-AIR BATTERIES
Lithium-water-air battery project: progress during the month of February 1977 (LLL), 760 (UCID-17426-77-2)
Lithium-water-air battery project: progress during the month of March 1977 (LLL), 761 (UCID-17426-77-3)
Lithium-water-air battery project: progress during the month of April 1977, 762 (UCID-17426-77-4)
Lithium-water-air battery project: progress during the month of May 1976, 756 (UCID-17426-76-5)
Lithium-water-air battery project: progress during the month of June 1976, 757 (UCID-17426-76-6)
Lithium-water-air battery project: progress during the month of August 1976, 759 (UCID-17426-76-8)
Lithium-water-air battery project: progress during the month of March 1976, 3267 (UCID-17426-76-3)
Lithium-water-air battery project: progress during the month of April 1976, 3268 (UCID-17426-76-4)
Lithium-water-air battery project: progress during the month of October 1976, 3269 (UCID-17426-76-10)
Lithium-water-air battery project: progress during the month of July 1976, 758 (UCID-17426-76-7)
Lithium-water-air battery project: progress during the months of May-July, 763 (UCID-17426-77-5.6.7)
Summary of the lithium-air battery research program (LLL-LMSC), 755 (UCID-17425)
RESEARCH PROGRAMS/MATERIALS
Basic and applied research in materials. Annual technical report, 1 Jun 1975-30 Jun 1976 (Materials Research Center, Northwestern Univ.), 3138 (AD-A-034074)
RESEARCH PROGRAMS/MATHEMATICS
Independent research, 1975. Final report (Naval Surface Weapons Center, Silver Spring, Md.), 69 (AD-A-015337)
RESEARCH PROGRAMS/METAL-GAS BATTERIES
Batteries: today and tomorrow, 131
Studies in fundamental chemistry of fuel cell reactions. Semiannual progress report, 1 July-31 December 1968, 689 (N-69-25397)
RESEARCH PROGRAMS/METALLURGY
Independent research, 1975. Final report (Naval Surface Weapons Center, Silver Spring, Md.), 69 (AD-A-015337)
RESEARCH PROGRAMS/METAL-NONMETAL BATTERIES
Development of high-specific-energy batteries for electric vehicles. Progress report, August 1972-January 1973, 628 (ANL-7998)
High-energy battery program at Argonne National Laboratory (Li--Al/LiCl--KCl/FeS$_2$), 634 (ANL-8064)
High-performance batteries for off-peak energy storage. Progress report for the period January-June 1973 (Li--Al/LiCl--KCl/S--As--C), 630 (ANL-8038)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, January-March 1976 (Li-Al/LiCl-KCl/FeS or FeS$_2$; some work on CaAl$_2$, Ca$_2$Si, and Mg anodes and FeS, Fe$_3$O$_4$ and FeS$_2$ cathodes; ANL), 619 (ANL-76-35)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report, April-June 1976 (Li-Al/LiCl-KCl/FeS or FeS$_2$, operate at 400 to 450 C; some work on Na/FeS$_2$ and CaMg$_2$/CaCl$_2$-LiCl$_2$KCl/FeS cells), 621 (ANL-76-81)
High-performance batteries for off-peak energy storage and electric-vehicle propulsion. Progress report for the period July-September 1976 (Li-Al/Kcl-LiCl/Fes or FeS$_2$; tests of Li/TiS$_2$, Na/FeS$_2$, and CaMg$_2$/FeS cells), 622 (ANL-76-98)
Lithium/chalcogen secondary cells for components in electric vehicular-propulsion generating systems. Interim technical summary report No. 4, November 23, 1970-May 22, 1971 (ANL), 627 (ANL-7863)
Lithium/chalogen secondary cells for components in electric vehicular-propulsion generating systems. Interim technical summary report No. 5, May 23, 1971-November 11, 1971, 629 (ANL-7999)
Lithium/selenium secondary cells for components in electric vehicular-propulsion generating systems. Interim technical summary report No. 2, November 23, 1969-May 22, 1970 (ANL), 626 (ANL-7745)
Lithium-water-air battery project: progress during the month of May 1976 (Study of Li/Br analog), 756 (UCID-17426-76-5)
Lithium-water-air battery project: progress during the month of October 1976 (Characterization of Li/I$_2$ and Li/Br$_2$ batteries), 3269 (UCID-17426-76-10)
RESEARCH PROGRAMS/MHD GENERATORS
Project MALLARD. Communications plan and proposals for research and development. Volume IV. Technical background and constraints. Section 1, Annex A, Appendix 16, power sources. Final report on Phase 1, 58 (AD-812841L)
RCA's role in direct energy conversion (Solar cells, MHD, batteries, and thermionics), 679 (N-64-19376)
RESEARCH PROGRAMS/NICKEL-CADMIUM BATTERIES
Battery research (Institute for Defense Analyses, Arlington, VA), 251 (AD-428659)
Electrical Power Sources Division. Quarterly progress notes, 1 October 1974-31 December 1974, 740 (PD-18289)
Laboratory investigations and research toward the improvement of sintered-plate alkaline storage batteries. Final report, 301 (AD-493498)
Laboratory investigations and research toward the development of nickel-cadmium alkaline storage batteries. Quarterly progress report No. 2, 331 (AD-622907)
Quarterly progress notes, 1 April 1974-30 June 1974, 564 (AD-922405)
Quarterly progress notes, 1 January 1975-31 March 1975,

598 (AD-B-004545)
Quarterly progress notes, 1 October 1975-31 December 1975, 599 (AD-B-009796)
Recent progress in secondary batteries (U.S. and Europe), 1576
Spacecraft power: guidance and control division, 696 (N-71-10258)
RESEARCH PROGRAMS/NICKEL-HYDROGEN BATTERIES
GSFC's position on the nickel-hydrogen system, 775 (X-711-77-28)
RESEARCH PROGRAMS/NUCLEAR PHYSICS
Independent research, 1975. Final report (Naval Surface Weapons Center, Silver Spring, Md.), 69 (AD-A-015337)
RESEARCH PROGRAMS/PLASMA
Research group activity report for the period 1 Jan 1968-31 Mar 1969, 64 (AD-914449)
RESEARCH PROGRAMS/POWER GENERATION
Research Institute of L'Hydro-Quebec, 200
Research Institute of L'Hydro-Quebec, 1409
RESEARCH PROGRAMS/POWER SUPPLIES
Electrical power sources communications and special equipment for Canadian forces; batteries for Canadian satellites. Quarterly progress notes, 1 Apr-30 Jun 1973, 550 (AD-912804)
Electrical power sources communications and special equipment for Canadian forces; batteries for Canadian satellites. Quarterly progress notes, 1 Jul-30 Sep 1973, 558 (AD-915962)
Quarterly progress notes, 1 July 1974-30 September 1974 (Power supplies for military applications and for satellites), 597 (AD-B-002753)
RESEARCH PROGRAMS/POWER TRANSMISSION
Research Institute of L'Hydro-Quebec, 200
Research Institute of L'Hydro-Quebec, 1409
RESEARCH PROGRAMS/PRIMARY BATTERIES
Electrical Power Sources Division quarterly progress notes, 1 January 1976-31 March 1976, 600 (AD-B-013277)
Quarterly progress notes, 1 April 1974-30 June 1974, 564 (AD-922405)
Quarterly progress notes, 1 January 1975-31 March 1975, 598 (AD-B-004545)
Quarterly progress notes, 1 October 1975-31 December 1975, 599 (AD-B-009796)
RESEARCH PROGRAMS/PROTECTIVE CLOTHING
Review 1969 (Defence Research Board, Ottawa), 523 (AD-868205)
RESEARCH PROGRAMS/RADIO EQUIPMENT POWER SUPPLIES
Project MALLARD. Communications plan and proposals for research and development. Volume IV. Technical background and constraints. Section 1, Annex A, Appendix 16, power sources. Final report on Phase 1, 58 (AD-812841L)
RESEARCH PROGRAMS/SILVER-ZINC BATTERIES
Recent progress in secondary batteries (U.S. and Europe), 1576
RESEARCH PROGRAMS/SODIUM-SULFUR BATTERIES
Comparison of U.S. and European high-temperature battery programs, 611 (ANL-76-8)
Development program for solid electrolyte batteries. Final report, 736 (PB-260719)
Research and development in the glass fiber sodium-sulfur battery. Semiannual technical report, 577 (AD-A-008849)
Research and development in the glass fiber sodium-sulfur battery. Semi-annual technical report (Dow Chemical, U.S.A., Walnut Creek, Calif.), 593 (AD-A-037215)
Research and development of the glass fiber sodium (Dow Chemical U.S.A., Walnut Creek, Calif.), 594 (AD-A-037216)
Research development in the glass fiber sodium-sulfur battery. Semi-annual report 1 Jul-31 Dec 1975 (Dow Chemical U.S.A., Walnut Creek, Calif.), 590 (AD-A-026359)
Sodium/sulfur advanced batteries, 80 (ERDA-76-136)
Sodium-sulphur battery system. Annual report, May 19, 1975-May 19, 1976 (Dow Chemical U.S.A.), 668 (COO-2565-4)
RESEARCH PROGRAMS/SOLAR CELL ARRAYS
Nimbus-D solar-conversion power supply subsystem. Quarterly technical report, 15 Dec 1968-15 Mar 1969, 4981 (N-69-32305)
RESEARCH PROGRAMS/SOLAR CELLS
Project MALLARD. Communications plan and proposals for research and development. Volume IV. Technical background and constraints. Section 1, Annex A, Appendix 16, power sources. Final report on Phase 1, 58 (AD-812841L)
RCA's role in direct energy conversion (Solar cells, MHD, batteries, and thermionics), 679 (N-64-19376)
RESEARCH PROGRAMS/SPACECRAFT POWER SUPPLIES
Electric power systems for space: a progress report, 2187
Spacecraft power: guidance and control division, 696 (N-71-10258)
RESEARCH PROGRAMS/SUPERCONDUCTING CABLES
Electric power systems: C-3 energy storage, transmission and distribution, electric power apparatus and systems, 751 (TID-26756)
RESEARCH PROGRAMS/SUPERCONDUCTIVITY
Research group activity report for the period 1 Jan 1968-31 Mar 1969, 64 (AD-914449)
RESEARCH PROGRAMS/THERMAL BATTERIES
Electrical power sources communications and special equipment for Canadian forces; batteries for Canadian satellites. Quarterly progress notes, 1 Jul-30 Sep 1973, 558 (AD-915962)
RESEARCH PROGRAMS/THERMIONIC CONVERTERS
Project MALLARD. Communications plan and proposals for research and development. Volume IV. Technical background and constraints. Section 1, Annex A, Appendix 16, power sources. Final report on Phase 1, 58 (AD-812841L)
RCA's role in direct energy conversion (Solar cells, MHD, batteries, and thermionics), 679 (N-64-19376)
RESEARCH PROGRAMS/THERMOELECTRIC GENERATORS
Independent research, 1975. Final report (Naval Surface Weapons Center, Silver Spring, Md.), 69 (AD-A-015337)
RESEARCH PROGRAMS/THERMONUCLEAR REACTIONS
Research group activity report for the period 1 Jan 1968-31 Mar 1969, 64 (AD-914449)
RESEARCH PROGRAMS/US ERDA
Battery development makes good progress, 125
Overview of ERDA battery program, 4969 (ERDA-76-136)
RESEARCH PROGRAMS/WIND TURBINES
Development of an electrical generator and electrolysis cell for a wind energy conversion system. Final report, 1 Jul 1973-1 Jul 1975, 727 (PB-243909)
REVIEWS/BATTERY CHARGERS
Automatic-type battery chargers insure longer battery life, 4812
Developments in alternator systems for vehicles, 4479
REVIEWS/BATTERY SEPARATORS
Development of separators for heavy-duty batteries, 3774
REVIEWS/CADMIUM
Cadmium: a materials survey, 2917 (AD-680443)
REVIEWS/CADMIUM-AIR BATTERIES
Characteristics of metal-air systems (67 references; 10 different anodes described), 1366
REVIEWS/DIRECT ENERGY CONVERSION
Electric power generation, 96 (NASA-SP-5015)
Energie-direktumwandlung. (Direct energy conversion). (Book in German), 241
Present state of direct energy conversion, 219
Prospects and scientific problems of application of the methods of direct energy conversion from chemical fuels into electricity, 174
REVIEWS/ELECTRIC BATTERIES
Airborne batteries. Special bibliography, 12 (AD-462695)
Anniversary issue on storage batteries, 235
Applied electrochemistry (Book in Russian), 167
Background material for the study of the national space power program (1964). Volume I. Electrochemical papers, 11 (AD-452617)
Batteries for energy conversion, 195
Batteries. Volume 1. Manganese dioxide (Book), 166
Batteries, 1545
Battery energy storage for utility load leveling and electric vehicles: a review of advanced secondary batteries, 143
Battery systems for electric cars (Brief summaries of present status of batteries with possible vehicular application), 2037 (CONF-691143-)
Battery technology. Packaging more muscle into less space, 2201
Candidate batteries for electric vehicles, 1363
Cells with organic solvents as sources of high energy density (Emphasis on Li batteries), 198
Developments in storage batteries in the past 10 years, 2499
Development of electrochemical power sources for electric vehicles, 4930 (CONF-740215-P1)
DOD research program for electrochemical science with applications to energy storage and conversion, 16 (AD-482433)
DOD Research program for electrochemical science with applications to energy storage and conversion (State-of-the-art), 25 (AD-635503)
DOD research program for electrochemical science with applications to energy storage and conversion, 17 (AD-482433)
Electric batteries according to recent patents, 227
Electric engine and its generators (Overview), 4847 (AD-912002L)
Electrochemical sources of pulse power, 59 (AD-814508)
Electrochemical storage and disposition of energy, 67 (AD-919015)
Electrochemical sources of electric power, 1616
Electrochemical power sources in ocean engineering, 2029 (AED-CONF-76-203-006)
Engineering application and current capabilities of secondary batteries and fuel cells, 61 (AD-855955L)
Fuel cells and batteries, 228
Fuel for thought (electrochemical energy) (Review with 15 references), 139
German electrical equipment (Mid-1940's), 239
High-temperature batteries (Recent developments in compact, powerful cells for electric-powered vehicles, etc.), 1443
It is still possible to invent an electrochemical generator, 1428
Lithium batteries: an overview. Technical note, 581 (AD-A-016643)

Molten salt batteries and fuel cells (156 references), 1369
New batteries are coming (Developmental projects; no refs), 1088
New electrochemical sources of energy, 442 (AD-779175)
New high-temperature batteries for storage and transportation of energy, 165
Organic-electrolyte, high-energy-density batteries: a status report, 351 (AD-644285)
Physics opportunities in electrochemical energy conversion, 1264
Primary and secondary galvanic cells: history and state-of-the-art summary, 29 (AD-671685)
Primary energy sources and conversion systems, 207
Problems concerning the application and developments of electrochemical power sources, 164
Prospects and scientific problems of the application of methods of direct electrical power acquisition from chemical fuels, 53 (AD-776734)
Prospects and scientific problems of application of the methods of direct energy conversion from chemical fuels into electricity, 174
Recent developments in nonconventional batteries based on nonaqueous electrolytes (Inorganic salts in organic solvents or ionic solids, cathodes containing Li or β alumina, high specific energy), 1254
Recent developments in advanced secondary batteries, 1115
Recent progress in batteries, 1416
Recent trends in the storage battery industry of Japan, 1319
Research and development in the field of batteries, 5095
Research trends in batteries and fuel cells with regard to future energy supplies (55 references), 141
Review of candidate batteries for electric vehicles (206 references), 5058
Review of the state of the art and future trends in electrochemical battery systems. I. The more common systems, 2 (AD-209301)
Review of the state of the art and future trends in electrochemical battery systems. II. Some new developments (Emphasis on dry and reserve cells (30 to 90 Wh/lb)), 3 (AD-209301)
Review of battery systems for electric vehicles, 5244
Secondary batteries with nonaqueous electrolytes. Present state and long-term outlook, 1106
Small-sized sources of current (Book), 51 (AD-746549)
Solid electrolyte electrochemical generators, 144
Solid electrolyte batteries (Early developments), 377 (AD-661199)
Solid electrolyte galvanic cells, 1450
Solid state batteries (Conduction mechanisms of solid crystalline compounds), 1233
Solid state battery systems (Ag/$RbAg_4I_5$/$RbI_3$ and Li/LiI(doped)/$PbI_2$), 183
Spaceborne sources of electric power, 177
Special purpose batteries (Li-based cells), 1249
State of development of modern electrochemical power sources. Technical importance and applications, 172
Static power sources, contemporary state and problems, 197
Storage batteries of tomorrow, 434 (AD-771753)
Storage batteries and rechargeable cell technology (Book), 163
Storage batteries, 148
Storage batteries. A general treatise on the physics and chemistry of secondary batteries and their engineering applications (Book), 234
Storage of high-grade energy (No references), 161
Study of standby fuel cell power systems. Final report, 30 Jun-30 Sep 1965, 14 (AD-477113L)
Survey of battery types and guide to their selection, 2598
Survey of electrochemical batteries (Aid to selecting optimum battery), 2597
Survey of power sources, 229
Utilization of energy. Storing energy: smoothing out the demand, 1220

Performance of 3rd electrode cells in OAO, 2377
Performance characteristics of reconditioned batteries on the CTS, 2122 (X-711-77-28)
Qualification of NiCad battery, LMSC 1614653-1, 1842 (AD-800981)
Reconditioning of RCA STATCOM batteries in orbit, 2121 (X-711-77-28)
Report of qualification test for battery, nickel--cadmium, special purpose S-3 satellite, Boeing part number 10-70428-1, Eagle-Picher part number SAR-8088,

1959 (AD-911407L)
Secondary batteries for energy storage in space, 1562
Selection of cells for the U.K. 3 flight satellite battery, 1853 (AD-809237)
Simulated orbital life tests for spacecraft cells. Part II. Automatically acquired data, review, and recommendations. Special technical report, 1813 (AD-748251)
Simulated orbital life tests for spacecraft cells. Part I. Procedures and manually acquired data. Special technical report, 1800 (AD-736471)
Simulation of a synchronous orbit environment for spacecraft batteries, 2325
Spacecraft nickel--cadmium battery cycle life assessment, 2382
Study of nickel--cadmium batteries for use in applications satellites. Phase 1, 2072 (N-74-15773)
Study of nickel--cadmium batteries for use in applications satellites, Phase 2. Evaluation of charge storage of charged Ni--Cd VO 23S batteries, 2076 (N-74-16812)
Study of nickel--cadmium batteries for use in applications satellites, Phase 2. Evaluation of electrical impedance as a function of the frequency at various temperatures and charge states of Ni--Cd VO 23S batteries, 2077 (N-74-16813)
Study of nickel--cadmium batteries for use in applications satellites, Phase 3, 2078 (N-74-16814)
Study of the effect of temperature and depth of discharge on the performance and cycle life of hermetically sealed nickel-cadmium cells, 1859 (AD-820467)
Test station for Ni-Cd batteries with stabistor charge control, 1882 (AD-845341)
Two kilowatt long life battery. Interim technical report No. 3, 15 Sep 1972-15 Sep 1973, 562 (AD-917874L)
Two kilowatt long life battery. Interim technical report, 15 May 1971-15 Sep 1972 (For satellites, solar cell charger), 541 (AD-906407L)
Two-kilowatt long-life battery. Final technical documentary report, 1 January 1969-31 July 1970 (50 to 100 Ah), 531 (AD-876484)
Two-kilowatt long-life battery. Interim technical report No. 1, 15 June 1970-15 May 1971, 534 (AD-885799)
Well regulated battery-solar cell charging, 4660

SATELLITES/NICKEL-HYDROGEN BATTERIES
Absorption and desorption rates of $H_2$ and $D_2$ for $LaNi_5$, $LaCo_5$, $LaNi_2Co_3$, and FeTi. Interim report, 3143 (AD-A-039518)
Cycle life test and thermal vacuum test results in nickel-hydrogen cells, 2133 (X-711-77-28)
Design and testing of cells and complete batteries, 1096
Electric power systems for space: a progress report, 2187
GSFC's position on the nickel-hydrogen system (Cyclic voltametry measurements on Ni/Cd cells), 775 (X-711-77-28)
Hydrogen--nickel regenerative fuel cells, 450 (AD-784902)
Hydrogen-nickel regenerative fuel cells, 1839 (AD-784902)
Nickel--hydrogen secondary cell for synchronous orbit application, 1353
Nickel-hydrogen battery system, 1242
Nickel-hydrogen battery development for synchronous satellites, 1243
Nickel-hydrogen battery system development, 1101
Nickel hydrogen energy storage for satellites. Final report, 1 Jul 1973-31 Oct 1974, 572 (AD/A-006427)
Nickel hydrogen energy storage for satellites. Supplement to final report, Dec 1974-Feb 1975, 2010 (AD-A-012303)
Nickel-hydrogen storage battery for use on navigation technology Satellite-2, 897
Sealed nickel--hydrogen secondary cell, 2209
Sealed nickel-hydrogen secondary cell, 2210
Spacecraft integration and problem area studies on nickel hydrogen cells, 1244

SATELLITES/POWER SUPPLIES
Satellite auxiliary power systems, 83 (LMSD-445616)

SATELLITES/SILICON SOLAR CELLS
Selection of cells for the U.K. 3 flight satellite battery, 1853 (AD-809237)

SATELLITES/SILVER-CADMIUM BATTERIES
Analysis of the operating parameters of secondary batteries in an orbiting space vehicle application, 2535
Cadmium silver (II) oxide secondary batteries, 368 (AD-671685)
Cell equalization techniques. Quarterly technical progress report No. 3, 1 Aug-1 Nov 1965, 2823 (AD-474282)
Charge control devices. 5. Charge control of Ag--Cd cells and Ag--Zn cells, 4594
Comparison of silver-cadmium and nickel-cadmium batteries for use on satellites, 1741 (AD-631700)
Cycle life testing of sealed, rechargeable silver-cadmium cells. Final report, September 1968-June 1969, 1768 (AD-693844)
Development of manufacturing methods and techniques for the production of improved alkaline batteries. Final technical report, 1 April 1965-30 June 1966, 453 (AD-802279)
Evaluation of secondary batteries, 2600
Evaluation of silver-cadmium batteries. Final report, 1680 (AD-469615)
Sealed cadmium--silver oxide batteries, 2614
Sealed silver-cadmium battery, 1549
Silver oxide batteries: present and future, 369 (AD-671685)

SATELLITES/SILVER-ZINC BATTERIES
Analysis of type I-C batteries, 1698 (AD-480240)
Battery system of the Aeros satellite, 1260
Charge control devices. 5. Charge control of Ag--Cd cells and Ag--Zn cells, 4594
Diode control research. Quarterly progress report No. 5, 1 June-1 September 1967 (Stabistor diodes for control of battery charging), 3009 (AD-821811)
Evaluation of secondary batteries, 2600
Evaluation program for secondary spacecraft cells. Annual report No. 10; report on cycle life test, 1838 (AD-781835)
Evaluation program for secondary spacecraft cells. Acceptance test of McDonnell-Douglas, Astropower Division 5.0 ampere-hour silver-zinc cells, 1901 (AD-869422)
Failure mechanisms in sealed batteries. Final technical report, 1 July 1966-30 April 1969, 1620 (AD-85592)
Failure mechanisms in sealed batteries. Part IV. Semiannual technical report No. 4, 1 January-30 June 1968, 1884 (AD-848981)
Failure mechanisms in sealed batteries. Semiannual technical report No. 5, 1 July-31 December 1968, 1887 (AD-851056)
High energy density long life secondary silver--zinc batteries, 1423
Nonleaking battery terminals, 4268
Performance with stable separators, 4528
Sealed silver oxide zinc cells for orbiting and planetary missions, 2378
Versatile silver oxide--zinc battery for synchronous orbit and planetary missions, 1303

SATELLITES/SOLAR CELL ARRAYS
Electric power for state-of-the-art communications satellites, 2339

SHELTERS/POWER SUPPLIES
Improvised power supplies. Final report, June 1964, 4827 (AD-445845)

SILICON ALLOYS/ELECTROMOTIVE FORCE
Thermodynamic properties of the lithium-silicon system, 3356

SILICON ALLOYS/PHASE DIAGRAMS
Thermodynamic properties of the lithium-silicon system, 3356

SILICON ALLOYS/THERMODYNAMIC PROPERTIES
Thermodynamic properties of the lithium-silicon system, 3356

SILICON SOLAR CELLS/PERFORMANCE
Design and performance of the Telesat power subsystem, 2294

SILICON SOLAR CELLS/PERFORMANCE TESTING
Selection of cells for the U.K. 3 flight satellite battery, 1853 (AD-809237)

SILVER/ELECTROCHEMISTRY
Anodic behavior of silver in alkaline solutions, 3525

SILVER/FABRICATION
Production of positive plates for silver oxide-zinc batteries, 4665

SILVER COMPOUNDS/IONIC CONDUCTIVITY
Solid-state ionics - solids with high ionic conductivity in the systems silver iodide--silver oxyacid salts, 4242

SILVER COMPOUNDS/PHASE DIAGRAMS
Solid-state ionics - solids with high ionic conductivity in the systems silver iodide--silver oxyacid salts, 4242

SILVER FLUORIDES/SOLUBILITY
Composition of nonaqueous solutions of potential use in high energy density batteries. Final report, 15 Nov 1969-14 Nov 1972 (Solubility equilibria of $CuF_2$, $NiF_2$, $ZnF_2$, $CdF_2$, $AgF_2$), 432 (AD-763140)

SILVER IODIDES/CRYSTAL STRUCTURE
Neutron scattering studies of solid electrolytes, 3165 (BNL-21367)

SILVER IODIDES/THERMODYNAMIC PROPERTIES
Thermodynamic properties of solid electrolyte $RbAg_4I_5$, 4465

SILVER NITRATES/ELECTROLYSIS
Composition gradient during electrolysis in mixtures

analogous to molten salt battery electrolytes, 2045 (CONF-770814-5)
SILVER OXIDES/DECOMPOSITION
Decomposition of AgO in alkaline solutions, 4456
SILVER OXIDES/ENTHALPY
Study of the silver(I) oxide-silver(II) oxide electrode (25 C), 4732
SILVER OXIDES/ENTROPY
Study of the silver(I) oxide-silver(II) oxide electrode (25 C), 4732
SILVER OXIDES/EROSION
Use of a hydrovibroabrasive erosion method to study the surface strength of silver oxide electrodes of chemical current sources, 4081
SILVER OXIDES/FREE ENERGY
Study of the silver(I) oxide-silver(II) oxide electrode (25 C), 4732
SILVER OXIDES/PYROLYSIS
Studies on the stability of oxides of silver, 4626
SILVER OXIDES/QUANTITATIVE CHEMICAL ANALYSIS
Method for the quantitative analysis of the silver oxide cathode. Final report, 2866 (AD-618479)
SILVER OXIDES/SPECIFIC HEAT
Silver oxides. II. Specific heats of silver oxide and silver peroxide (20 to 99 C), 4806
SILVER OXIDES/STABILITY
Studies on the stability of oxides of silver, 2875 (AD-626229)
SILVER PHOSPHATES/IONIC CONDUCTIVITY
Solid-state ionics - solids with high ionic conductivity in the systems silver iodide--silver oxyacid salts, 4242
SILVER PHOSPHATES/PHASE DIAGRAMS
Solid-state ionics - solids with high ionic conductivity in the systems silver iodide--silver oxyacid salts, 4242
SILVER-CADMIUM BATTERIES/ANODES
Analysis of porous alkaline cadmium electrodes. I. Anodic high rate transients, 4095
Analysis of porous alkaline cadmium electrodes. II. Potential recovery transients after a period of discharge (Influence of porosity), 4096
Analysis of porous alkaline cadmium electrodes. III. Application of charge porosity diagrams in electrode design, 4097
Analysis of porous alkaline cd-electrodes. IV. Optimization of current efficiency, 3547
Anodes for alkaline storage batteries (Patent; 165 mAh/g, 700 mAh/cm$^3$), 3608
Anodic passivation by ''CdO'' studied by ESR (Aqueous KoH), 3570
Cadmium anodes for alkaline batteries (Patent; fabrication method for improved mechanical strength), 3670
Cadmium anodes for alkaline cells (Patent), 3671
Cadmium anode for alkaline storage batteries (Patent; fabrication), 3618
Cadmium-containing active material for negative electrodes of alkaline storage batteries (Patent; chemical preparation), 4343
Cadmium electrodes (Preparation;patent), 3666
Cadmium paste electrodes for alkaline cells (Patent), 3643
Change of the electrolyte concentration in metalloceramic cadmium electrodes of alkaline storage battery, 4034
Charging behavior of cadmium hydroxide electrodes at low temperatures, 4563
Commutator bar-free cadmium electrode for an alkaline battery (Patent), 3507
Current distribution and pH gradients in a model of a battery plate, 4418
Cyclic charge-discharge behaviour of sintered plate and planar cadmium electrodes, 3449
Effects of gamma radiation on the behavior of nickel and cadmium electrodes, 4454
Effects of charge rate and cycling on the morphology of Cd and Cd(OH)$_2$ in sintered plate electrodes, 3392
Efficiency of a cadmium electrode in a silver--cadmium battery with different degrees of charge, 4347
Electrochemically active cadmium composition for battery elements (Patent), 3575
Electrochemical engineering of battery systems. Final report, 10 Nov 1971-9 Nov 1972 (Changes in diffusely reflected light from electrode monitor battery performance), 1970 (AD-914248)
Electrochemical engineering of battery systems. Final report, 10 Nov 1971-9 Nov 1972 (Monitoring by changes in diffusely reflected light from electrodes), 3105 (AD-914248)
Electrode phenomena of cadmium in alkaline battery: discharge mechanism, 4695
Formation of porous metal plates by electrolytic reduction, 4680
Forming a high surface area metallic cadmium powder and an electrode therefrom (Patent), 3580
Improvement of the technology of sintered cadmium [battery] electrodes, 4067
Intrinsic charging rate capability of the cadmium anode (Cd/AgCl cells in Cd chloride solution capable of fast charging), 2476
Investigations into the mechanism of capacity loss by porous cadmium electrodes during cycling, 3830
Mechanisms of self-discharge of negative of alkaline accumulators, 4751
Method for making nickel and cadmium electrodes for batteries (Patent), 3375
Morphology and capacity of a cadmium electrode, 4198
Nickel or cadmium electrodes for alkaline cells (Patent; chemical preparation), 3588
Oxygen reduction on porous cadmium electrodes of alkaline accumulators, 3402
Paste type cadmium anodes for alkaline batteries (Patent; CdS base, mixed with $H_2O$, $H_2O$-miscible organic solvent, and binder), 3645
Porous cadmium metal for alkaline storage batteries (Patent; Cd powder + urea heated and washed), 3606
Potentiostatic study of a porous cadmium electrode, 3807
Preparation and structure of electrodeposited sponge cadmium electrodes, 4488
Processes occurring during the storage of a porous cadmium electrode in the charged state, 4112
Producing porous metal structures for battery electrodes (Patent; Zn, Cd), 4254
Production of a cadmium electrode for the alkaline storage battery (Patent), 3998
Reasons for the poisoning effect of small quantities of some impurities on the cathode reduction process for metal oxides and hydroxides in an alkali solution, 4134
Rechargeable cell having improved cadmium negative electrode and method of producing same (Patent), 3649
Rechargeable cell having improved cadmium negative electrode and method of producing same (Patent), 3582
Trial preparation of negative plates of pressed-type alkaline storage battery (CdO, Cd(O)$_2$, polyethylene and polyethylene oxide), 4540
Use of nickel hydroxide in pressed plate electrodes (Patent), 3686
SILVER-CADMIUM BATTERIES/BATTERY CHARGERS
Automatic battery formation cycler and controller. Research and development report, 2812 (AD-467988)
Battery chargers and hand crank generators, 4553
Cell equalization techniques, 1664 (AD-461856)
Cell equalization techniques. Quarterly technical progress report No. 3, 1 Aug-1 Nov 1965 (Stabistor for charge control), 2823 (AD-474282)
Cell equalization techniques. Final technical report, Feb 1965-Feb 1966 (Charge control of Ni/Cd cells by stabistor composed of forward-biased diodes), 2837 (AD-482052)
Charging equipment, mobile (CEM). Final report Oct 1972-Nov 1974, 3139 (AD-A-036071)
Diode control research. Quarterly technical progress report No. 2, 1 September-1 December 1966 (Solid-state charge control system), 2988 (AD-805146)
Diode control research. Quarterly technical progress report No. 3, 1 December 1966-1 March 1967, 2998 (AD-810831)
Diode control research. Quarterly technical progress report No. 8, 1 May-1 June 1968, 3036 (AD-845340)
Diode control research. Final report, May 1966-15 July 1969 (Method for fast evaluation of cells for use in stabistor diode-controlled batteries capable of high-rate charging), 3054 (AD-861077)
Diode control research. Quarterly technical progress report No. 1, 1 Jun-1 Sep 1966, 2844 (AD-489882)
Method and device for charging and heating at low temperature a sealed storage cell battery (Patent), 3294
Solid-state circuit development, 1666 (AD-462251)
Transistorized converter for automatic charging of silver-cadmium storage batteries, 4399
SILVER-CADMIUM BATTERIES/BATTERY CHARGING
Anodic polarization of sintered silver electrode in alkaline solution: efficiency of charging, 2586
Automatic battery charging system, 4629
Charge control devices. 5. Charge control of Ag--Cd cells and Ag--Zn cells, 4594
Charge of the cadmium electrode of a current source having an alkaline electrolyte (Recommended current density, temperature, additives), 2235
Charging behavior of cadmium hydroxide electrodes at low temperatures, 4563
Charging silver oxide electrode with periodically varying current, 2589
Charging silver oxide electrode with periodically varying current. II, 2549
Charging silver oxide electrode with periodically varying current. IV, 2505
Charging silver oxide electrode with periodically varying current. III, 4500
Constant-potential and constant-current charging of silver-cadmium cells, 1681 (AD-469933)
Constant-potential and constant-current charging of silver-cadmium cells, 2542
Crystallographic changes during oxidation (charging) of the silver electrode. Part I. Initial oxidation of an industrial sintered plaque, 2903 (AD-671050)
Crystallographic changes during oxidation (charging) of the silver electrode. Part II. Oxidation following five charge-discharge cycles at a low rate, 2909 (AD-671771)
Diode control research. Quarterly progress report No. 6, 1 September-1 December 1967 (Stabistor charge control), 1862 (AD-825660)
Effect of the charge time on the life of a silver

battery electrode, 4433
Heat generation in sealed batteries, 2520
Intrinsic charging rate capability of the cadmium anode (Cd/AgCl cells in Cd chloride solution capable of fast charging), 2476
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Quarterly technical progress report No. 6, 1 September-30 November 1966, 1851 (AD-805540)
Method of using a sealed storage battery, 1828 (AD-770721)
Microstructure of sintered silver electrodes. IV. Formation of AgO during charges (KOH electrolyte), 2938 (AD-728894)
Optimization of charging conditions of storage battery silver electrode and calculation of capacity loss during continuous use, 3805
Reduction of the capacity of silver electrodes operating in forced discharge systems, 4438
SILVER-CADMIUM BATTERIES/BATTERY SEPARATORS
Batteries for undersea applications, 1465
Interaction of a silver oxide electrode with a regenerated cellulose separator film in silver-cadmium storage batteries, 3845
Investigation of interaction between silver oxide electrode and hydrated cellulose film separator in silver-cadmium accumulators, 3546
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Quarterly progress report No. 1, Jun-30 Sep 1965, 2821 (AD-473358)
New type of inorganic separator for alkaline silver batteries, 3831
Reaction of the silver electrode with the regenerated cellulose film in charged silver--cadmium batteries, 2313
Sealed cadmium--silver oxide batteries, 1559
Separator development and enhanced overcharge, 1538
Separator for alkaline cells (Patent; preparation), 3935
Separators for alkaline batteries, 4675
Separators for electrochemical cells (Patent), 4338
Silver batteries. 3. Electrodeposited inorganic separator for Ag--Cd batteries (Films of $Ca(OH)_2$ or $Mg(OH)_2$), 4589
Silver deposition on battery separators, 4562
Testing of silver cadmium cells. Final report (Life cycling capability; most probable cause of failure; new type of inorganic separator), 2060 (N-70-38614)
SILVER-CADMIUM BATTERIES/BIBLIOGRAPHIES
Annotated bibliography of the thermal properties of primary and secondary cells, 62 (AD-871108)
Silver cells. A bibliography with abstracts. Search period covered: 1964-August 1975, 105 (NTIS/PS-75/649)
Silver cells (citations from the NTIS data base). Report for 1964-Sep 76, 111 (NTIS/PS-76/0879)
Silver cells (citations from the Engineering Index data base). Report for 1970-Sep 76, 112 (NTIS/PS-76/0880)
SILVER-CADMIUM BATTERIES/CATHODES
Active material electrode and cell comprising improved battery-grade divalent silver oxide (Patent; additive of Hg, Se, Te, or Hg combined with Pb or Sn), 4243
Additive for an alkaline battery using divalent silver oxide positive active material (Patent), 3865
Analysis of porous electrodes with sparingly soluble reactants. III. Short time transients, 3390
Analysis of porous electrodes with sparingly soluble reactants. IV. Application to particulate bed electrode: Ag/AgCl system, 3391
Anodic behavior of silver in alkaline solutions, 3525
Cathode for a silver battery (Patent), 3628
Coulogravimetric study of sintered silver electrode in 1 molar potassium hydroxide (Slope changes in weight change/Coulomb curves), 4548
Crystallographic changes during oxidation (charging) of the silver electrode. Part I. Initial oxidation of an industrial sintered plaque, 2903 (AD-671050)
Crystallographic changes during oxidation (charging) of the silver electrode. Part II. Oxidation following five charge-discharge cycles at a low rate, 2909 (AD-671771)
Cycling characteristics of silver electrode in alkaline solutions, 4596
Decomposition of silver oxide in alkaline solutions. Technical report No. 2 (Aqueous KOH), 2851 (AD-603306)
Decomposition of AgO in alkaline solutions, 4456
Effect of the substrate on the anodic behavior of silver oxide electrode, 4110
Effect of zincate ions on the course of cathodic processes on the silver oxide electrode, 4111
Effect of the discharge temperature on operational and structural characteristics of a silver oxide electrode (-10 to +90°), 4430
Effect of the charge time on the life of a silver battery electrode, 4433
Electrolytic cell for x-ray diffraction studies of electrode phenomena, 2852 (AD-605707)
Feasibility of microscopy for investigating the silver oxide electrode, 2900 (AD-664993)
Hermetically-sealed nickel-cadmium and silver-cadmium storage batteries, 4685
Increase and stabilization of silver electrode capacity, 4410
Influence of sinter temperature on capacity of silver electrodes, 4556
Interaction of a silver oxide electrode with a regenerated cellulose separator film in silver-cadmium storage batteries, 3845
Investigation of interaction between silver oxide electrode and hydrated cellulose film separator in silver-cadmium accumulators, 3546
Kinetics of oxygen liberation at a silver oxide electrode, 3803
Life capability of the silver electrode in alkaline electrochemical cells (Ag-$H_2$), 3235 (N-76-28648)
Low temperature cycling behavior of the silver electrode. Technical report No. 3, 2854 (AD-609876)
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Quarterly progress report No. 1, Jun-30 Sep 1965, 2821 (AD-473358)
Microstructure of sintered silver electrodes. I and II (Higher electrode capacity maintained at higher current densities), 4460
Optimization of charging conditions of storage battery silver electrode and calculation of capacity loss during continuous use, 3805
Oxides on the silver electrode. Part 2. X-ray diffraction studies of the working silver electrode. Final report, 2862 (AD-614058)
Preparation and electrochemical properties of dislocation-free (100) faces of monocrystal silver electrodes, 4544
Processes at the silver oxide electrode of an alkali current source (State-of-the-art review (1975)), 3798
Production of dry process divalent silver oxide electrodes by continuous rolling. Quarterly report No. 9, December 1969-February 1970, 3061 (AD-878841)
Reaction of the silver electrode with the regenerated cellulose film in charged silver--cadmium batteries, 2313
Reduction of the silver oxide electrode in CsOH solutions (Comparison with KOH), 4003
Reduction of the capacity of silver electrodes operating in forced discharge systems, 4438
Relating structural variables of porous electrodes (Method gives specific surface area), 1089
Reproducible and stable silver-silver oxide electrode, 4744
Review of fundamental investigations of silver oxide electrodes, 2831 (AD-478632)
Scanning electron-microscopy studies of silver oxide electrodes, 4093
Scanning electron microscope investigations on silver oxide electrodes (Morphological changes in sintered powder metallurgy electrodes due to oxidation during cycling), 4024
Scanning electron microscope investigations on silver oxide electrodes, 4025
Sealed silver oxide storage battery (Patent; Ag/Zn yielded 400 mAh/g), 3673
Self-discharge kinetics of silver oxide electrodes in alkaline batteries, 4078
Silver electrodes for chemical sources of electric power (Patent), 3942
Silver electrode for battery (Patent; fabrication), 3914
Silver oxide battery electrode (Patent; preparation by electrochemical oxidation of Ag powder), 3739
Silver oxide electrode (Electrochemistry), 4725
Silver/silver-oxide electrode. II. Influence of a superimposed sinusoidal potential on the anodising of silver, 3839
Silver/silver-oxide electrode. III. Anodising of silver with asymmetric sinusoidal current, 3840
Stabilization of the capacity of a silver--cadmium battery during prolonged cycling by adding magnesium oxide to the silver electrode, 2232
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730
Studies on the stability of oxides of silver, 2875 (AD-626229)
Studies on silver oxide. I. Analytical techniques. II. Thermal decomposition of $Ag_2O$. III. Charging efficiency studies, 2993 (AD-806861)
Studies on the silver/silver oxide electrode, 3837
Study of the discharge of porous Ag/$Ag_2O$ electrodes in concentrated potassium hydroxide electrolyte. Doctoral thesis, 2941 (AD-732349)
Study of the silver(I) oxide-silver(II) oxide electrode, 4732
Trends in usage of silver. Annual report, 3023 (AD-832582)
Use of a hydrovibroabrasive erosion method to study the surface strength of silver oxide electrodes of chemical current sources, 4081
Use of hydrogen-absorbing electrode in alkaline battery (For protection against electrochemical damage due to battery reversal; patent), 3386
SILVER-CADMIUM BATTERIES/CHEMICAL RADIATION EFFECTS
Effects of gamma radiation on the behavior of nickel and cadmium electrodes, 4454
SILVER-CADMIUM BATTERIES/CHEMICAL REACTION KINETICS
Kinetics of oxygen liberation at a silver oxide electrode, 3803
Self-discharge kinetics of silver--cadmium storage batteries, 2223
SILVER-CADMIUM BATTERIES/CHEMICAL REACTIONS
Evaluation of the discharge capacity of silver--cadmium batteries by a calculation method, 2314

Investigation of interaction between silver oxide electrode and hydrated cellulose film separator in silver-cadmium accumulators, 3546
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Quarterly progress report No. 3, 1 Dec 1965-28 Feb 1966, 1699 (AD-480501)
Processes at the silver oxide electrode of an alkali current source (State-of-the-art review (1975)), 3798
Reaction of the silver electrode with the regenerated cellulose film in charged silver--cadmium batteries, 2313
SILVER-CADMIUM BATTERIES/COMPARATIVE EVALUATIONS
Cadmium silver (II) oxide secondary batteries (Comparison with nickel--cadmium cell), 368 (AD-671685)
Comparison of silver-cadmium and nickel-cadmium batteries for use on satellites, 1741 (AD-631700)
Operating characteristics of storage batteries for use on ground support equipment, 1684 (AD-470655)
Study of electric automobile traction with reference to silver batteries, 2673
SILVER-CADMIUM BATTERIES/CONTAINERS
Selection and utilization of batteries for deep submergence vehicles (Characteristics, design of container system, tests to 2700 psi), 2517
SILVER-CADMIUM BATTERIES/DESIGN
Chemoelectric battery (Patent; Fe, Cd, or Zn with hydroxide of Ni, Fe, or Co and/or oxides of Pb or Ag, gas release feature), 809
Design, fabrication of prototypes, and testing of sealed, rechargeable silver-cadmium cells. Final report, February 1967-October 1968, 382 (AD-683466)
Design, fabrication, and testing of sealed, rechargeable silver-cadmium cells. Quarterly progress report No. 2, 1 Oct-31 Dec 1963 (4.5 to 66 Ah), 320 (AD-610763)
Design, fabrication, and testing of vented, rechargeable silver-cadmium cells. Quarterly progress report No. 2, 1 Oct-30 Dec 1963, 256 (AD-434061)
Design, fabrication and testing of vented, rechargeable silver-cadmium cells. Quarterly progress report No. 3, 1 Jan-31 Mar 1964 (4.6 to 69.0 Ah), 315 (AD-601583)
Design, fabrication, and testing of sealed, rechargeable silver-cadmium cells. Quarterly progress report No. 3, 1 Jan-31 Mar 1964 (Neoprene O ring for vent seal), 2796 (AD-449231)
Design, fabrication, and testing of vented, rechargeable silver-cadmium cells. Final report, May 1966-August 1967 (7, 15, 22, and 31 A-hr), 363 (AD-664777)
Design, fabrication of prototypes, and testing of sealed rechargeable silver-cadmium cells. Interim quarterly report No. 2, June 1965-March 1968, 373 (AD-672502)
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Technical report No. 8 (final), June 1965-August 1969, 518 (AD-860708)
Modular battery construction (Patent), 1161
Sealed cadmium--silver oxide batteries, 1559
Standard alkaline cells and secondary batteries (Review of characteristics of battery families), 366 (AD-668654)
Standard line alkaline secondary batteries, 319 (AD-610010)
SILVER-CADMIUM BATTERIES/ELECTRIC POTENTIAL
Calculating the characteristics of a silver--cadmium storage battery, 2218
Nickel-cadmium, silver-cadmium, and silver-zinc batteries, 694 (N-70-29061)
SILVER-CADMIUM BATTERIES/ELECTROCHEMISTRY
Controlled potential reactions of cadmium and silver in alkaline solution, 2645
Electro-chemical properties of cadmium in alkaline solutions, 2664 (AD-682564)
Electrode phenomena of cadmium in alkaline battery: discharge mechanism, 4695
Rechargeable alkaline electrolyte cells, and methods of restoring the electrical capacity of such cells (Patent; resistance connected across electrodes), 2397
Silver deposition on battery separators, 4562
Thermodynamic study of silver--zinc and silver--cadmium storage batteries, 2307
SILVER-CADMIUM BATTERIES/ELECTRODES
Controlled potential reactions of cadmium and silver in alkaline solution, 2645
Design, fabrication of prototypes and testing of vented, rechargeable silver-cadmium cells. Interim quarterly report (12 Ah, development of pasted Ag and pressed Cd and CdO electrodes), 2883 (AD-640387)
Diffusion-bonded battery electrode plaques (Patent), 3552
Dissolution and passivation of metals in alkaline solutions in the presence of surfactants, 4137
Effect of cationic impurities on the silver-silver oxide electrode: the silver-copper-iron-palladium system, 1996 (AD-921643)
Electrode plate for alkaline batteries (Patent; fabrication method), 3713
Electrode plate of alkaline storage battery (Patent; preparation of Ni or Cd electrode), 3591
Formation of electrodes for alkaline batteries (Patent), 3542
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
High-rate batteries (Effects of plate porosity on efficiency; study included Zn, Cd, Pb, $Ag_2O$, and AgO), 2890 (AD-645942)
High-rate battery electrodes (Performance of plates produced by electrolytic reduction), 4550
Method of producing electrodes (Patent), 3400
Methods of producing electrodes for alkaline batteries (Patent; oxidative pretreatment of nickel plaque *before impregnation*), 3287
Microstructure of sintered silver electrodes. IV. Formation of AgO during charges (KOH electrolyte), 2938 (AD-728894)
Oxidation of organic components in a hermetic storage battery and the stability of its characteristics (Accumulation of Cd on electrodes during cycling), 3815
Self-discharge of silver--cadmium storage batteries (Especially during storage at elevated temperature), 2221
Studies on the stability of oxides of silver, 4626
SILVER-CADMIUM BATTERIES/ELECTROLYTES
Influence of membrane transport characteristics on electrolyte concentration and consequent plate performance, 1898 (AD-862540)
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Quarterly progress report No. 1, Jun-30 Sep 1965, 2821 (AD-473358)
Reduction of the silver oxide electrode in CsOH solutions (Comparison with KOH), 4003
Removal of calcium impurity from the electrolyte of an alkaline storage battery with a cadmium anode (Patent), 3854
SILVER-CADMIUM BATTERIES/ELECTROMOTIVE FORCE
Interaction of a silver oxide electrode with a regenerated cellulose separator film in silver-cadmium storage batteries, 3845
SILVER-CADMIUM BATTERIES/FABRICATION
Design, fabrication of prototypes, and testing of sealed, rechargeable silver-cadmium cells. Final report, February 1967-October 1968, 382 (AD-683466)
Design, fabrication, and testing of vented, rechargeable silver-cadmium cells. Quarterly progress report No. 2, 1 Oct-30 Dec 1963, 256 (AD-434061)
Design, fabrication and testing of vented, rechargeable silver-cadmium cells. Quarterly progress report No. 3, 1 Jan-31 Mar 1964 (4.6 to 69.0 Ah), 315 (AD-601583)
Design, fabrication of prototypes, and testing of sealed rechargeable silver-cadmium cells. Interim quarterly report No. 2, June 1965-March 1968, 373 (AD-672502)
Development of manufacturing methods and techniques for the production of improved alkaline batteries. Final technical report, 1 April 1965-30 June 1966 (Approximately 15 Ah, operate down to -30°F), 453 (AD-802279)
Development of manufacturing methods and techniques for the *production of improved alkaline batteries*. Interim engineering progress report, 1 Apr-30 Jun 1965, 288 (AD-472261)
Sealed cadmium--silver oxide batteries, 2614
Standard family of cells and battery assemblies (Cd/AgO), 1526
SILVER-CADMIUM BATTERIES/FAILURES
Alkaline battery evaluation. Report for Apr 1962-15 Oct 1964, 1672 (AD-465888)
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 2, 15 Aug-15 Nov 1964, 1730 (AD-608666)
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 3, 15 Nov 1964-15 Feb 1965, 1732 (AD-611850)
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 5, 15 May-15 Aug 1965, 1690 (AD-472416)
SILVER-CADMIUM BATTERIES/FORECASTING
General state of advancement of battery technology, 2629
Progress in electric battery industry, 231
SILVER-CADMIUM BATTERIES/GASES
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Quarterly technical progress report No. 2, 1 Sep-30 Nov 1965 ($Q_2$ recombination on Cd), 1693 (AD-476516)
SILVER-CADMIUM BATTERIES/HEATING
Heat generation in sealed batteries, 2520
Heat generation in sealed batteries, 2477
Heat liberation during the operation of silver--zinc and silver--cadmium storage batteries, 2277
SILVER-CADMIUM BATTERIES/MASS TRANSFER
Factor affecting transport of silver in silver-alkaline battery, 2588
SILVER-CADMIUM BATTERIES/MATERIALS
Technical and microeconomic analysis of cadmium and its compounds. Final report on Task 1, 3257 (PB-244625)
Trends in usage of silver. Annual report, 3023 (AD-832582)
SILVER-CADMIUM BATTERIES/MEETINGS
Space power systems: energy storage (6th Esro Summer School, Noordwijk, Netherlands, 1968), 86 (N-70-26430)
SILVER-CADMIUM BATTERIES/MONITORING
Automatic battery formation cycler and controller. Research and development report, 2812 (AD-467988)
MEL research and development phase report (Voltage monitor and switching circuit for satellite power supplies), 2786 (AD-428945)
SILVER-CADMIUM BATTERIES/NONDESTRUCTIVE TESTING
Battery workshop, 2054 (N-67-26364)
SILVER-CADMIUM BATTERIES/OPERATION
Batteries for biotelemetry and other applications, 1477
Modern cells and batteries used in communications

equipment, 2713
Operation of storage batteries used at very low temperatures (Patent; electrolyte concentration greater than 7N), 2398
SILVER-CADMIUM BATTERIES/PERFORMANCE
Analysis of the operating parameters of secondary batteries in an orbiting space vehicle application, 2535
Batteries for undersea applications, 1465
Behavior of silver--cadmium batteries at negative temperatures, 2315
Design, fabrication, and testing of vented, rechargeable silver-cadmium cells, 1736 (AD-624407)
Design, fabrication, and testing of sealed, rechargeable silver-cadmium cells. Semiannual progress report, 6 December 1964-6 June 1965, 1737 (AD-624410)
Diode control research. Quarterly progress report No. 6, 1 September-1 December 1967 (Stabistor charge control), 1862 (AD-825660)
Effect of silicate additives on the electrical and operational characteristics of silver--cadmium storage batteries, 2222
Effect of concentration of carbonates in the electrolyte on electrical characteristics of silver-cadmium batteries, 2465
Electrochemical engineering of battery systems. Final report, 10 Nov 1971-9 Nov 1972 (Changes in diffusely reflected light from electrode monitor battery performance), 1970 (AD-914248)
Hermetically-sealed nickel-cadmium and silver-cadmium storage batteries, 4685
Latest battery improvements and mathematical techniques for their selection, 2582
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Quarterly technical progress report No. 5, 1 June-31 Aug 1966 (Two-level cells with third electrode), 454 (AD-802355)
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Quarterly technical progress report No. 7, 1 December 1966-28 February 1967 (22 Ah, -30 to +130°), 1854 (AD-811439)
Rechargeable cell having improved cadmium negative electrode and method of producing same (Patent), 3649
Sealed cadmium--silver oxide batteries, 2614
Sealed cadmium--silver oxide batteries, 1572
Sealed cadmium--silver oxide batteries, 1559
Sealed cells and auxiliary electrodes, 1488
Sealed silver-cadmium battery, 1549
Sealed silver-cadmium battery (Advantages of sealed over vented Ag-Cd cells), 2633
Self-discharge of silver--cadmium storage batteries (Especially during storage at elevated temperature), 2221
Separator development and enhanced overcharge, 1538
Silver oxide batteries: present and future, 369 (AD-671685)
Stabilization of the capacity of a silver--cadmium battery during prolonged cycling by adding magnesium oxide to the silver electrode, 2232
Studies of available energies in Ni-Cd, Ag-Zn, and Ag-Cd batteries, 1759 (AD-671685)
SILVER-CADMIUM BATTERIES/PERFORMANCE TESTING
Alkaline battery evaluation. Final report, 30 Jun 1960-15 Mar 1964 (12- and 20-Ah Ni/Cd, 25-Ah Ag/Zn, and 20-Ah Ag/Cd cells), 1724 (AD-602676)
Battery, Yardney Silvercel HR-85: environmental evaluation, 1844 (AD-801655)
Cell capacities and life cycling capabilities versus storage time and temperature [for] sealed silver secondary cells, 1902 (AD-870855)
Cycle life testing of sealed, rechargeable silver-cadmium cells. Final report, September 1968-June 1969, 1768 (AD-693844)
Cycle life test. Evaluation program for secondary spacecraft cells. Annual report, 2096 (N-76-26687)
Design, fabrication, and testing of vented, rechargeable silver-cadmium cells. Final report, May 1966-August 1967 (7, 15, 22, and 31 A-hr), 363 (AD-664777)
Diode control research. Final report, May 1966-15 July 1969 (Method for fast evaluation of cells for use in stabistor diode-controlled batteries capable of high-rate charging), 3054 (AD-861077)
Evaluation of secondary batteries, 2600
Evaluation program for secondary spacecraft cells. Annual report No. 8, 1802 (AD-738880)
Evaluation program for secondary spacecraft cells. Annual report No. 7, 1786 (AD-718854)
Evaluation of the discharge capacity of silver--cadmium batteries by a calculation method, 2314
Evaluation program for secondary spacecraft cells. Fifth annual report of cycle life test, 1890 (AD-852580)
Evaluation of silver-cadmium batteries. Final report (12 Ah), 1680 (AD-469615)
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Quarterly progress report No. 4, 1 Mar-31 May 1966, 1707 (AD-485873)
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Quarterly technical progress report No. 6, 1 September-30 November 1966, 1851 (AD-805540)
Service evaluation of silver-cadmium batteries. Report No. 1 (final), Jul 1964-Jul 1965 (34 Ah), 1709 (AD-487671)
Service life of Ag-Cd batteries on geostationary orbit determination de la duree de vie des accumulaterus argent-cadmium en orbite geostationnaire. Final report, 2093 (N-76-20642)
Testing of silver cadmium cells. Final report (Life cycling capability; most probable cause of failure; new type of inorganic separator), 2060 (N-70-38614)
TM research program. High-g tests of components, 1735 (AD-622405)
SILVER-CADMIUM BATTERIES/PHYSICAL RADIATION EFFECTS
Alkaline battery evaluation. Report for Apr 1962-15 Oct 1964, 1672 (AD-465888)
SILVER-CADMIUM BATTERIES/PLANNING
Standard line of secondary batteries (6, 12, and 24 V, 3. to 220 Ah), 265 (AD-452481)
SILVER-CADMIUM BATTERIES/PLATES
Influence of membrane transport characteristics on electrolyte concentration and consequent plate performance, 1898 (AD-862540)
SILVER-CADMIUM BATTERIES/POWER CONDITIONING CIRCUITS
Maintenance-free silver-cadmium batteries for aircraft emergency applications. Technical report No. 8 (final), June 1965-August 1969, 518 (AD-860708)
SILVER-CADMIUM BATTERIES/REVIEWS
Applied electrochemistry (Book in Russian), 167
Chemical compositions, structures, performance, and uses of batteries; (review with 108 references), 233
Development of silver--zinc and silver--cadmium batteries, 1111
SILVER-CADMIUM BATTERIES/STORAGE
Effect of silicate additives on the electrical and operational characteristics of silver--cadmium storage batteries, 2222
Interaction of a silver oxide electrode with a regenerated cellulose separator film in silver-cadmium storage batteries, 3845
Processes occurring during the storage of a porous cadmium electrode in the charged state, 4112
Processes during storage of charged silver-cadmium (Ag-Cd) batteries (Changes of electrical characteristic of components after storage at 20° to 50°), 2415 (AD/A-000246)
SILVER-CADMIUM BATTERIES/SWITCHING CIRCUITS
Solid-state circuit development, 1666 (AD-462251)
SILVER-CADMIUM BATTERIES/TEMPERATURE EFFECTS
Sealed secondary cells for space power systems (Ambient temperature effects on charge and discharge characteristics), 2564
SILVER-CADMIUM BATTERIES/TESTING
Acceptance testing of sealed, rechargeable silver-cadmium cells. Final report (Seven-day storage at -20 and +160°F), 1765 (AD-691354)
Acceptance testing of vented, rechargeable silver-cadmium cells. Final report, September 1968-January 1969 (Seven-day storage at -20 and +160°F), 1766 (AD-691355)
Cycle life testing of vented, rechargeable silver--cadmium cells. Final report, Sep 1968--Jun 1969, 1772 (AD-697863)
Design, fabrication of prototypes, and testing of sealed, rechargeable silver-cadmium cells. Final report, February 1967-October 1968, 382 (AD-683466)
Design, fabrication, and testing of vented, rechargeable silver-cadmium cells. Quarterly progress report No. 2, 1 Oct-30 Dec 1963, 256 (AD-434061)
Design, fabrication and testing of vented, rechargeable silver-cadmium cells. Quarterly progress report No. 3, 1 Jan-31 Mar 1964 (4.6 to 69.0 Ah), 315 (AD-601583)
Design, fabrication of prototypes, and testing of sealed rechargeable silver-cadmium cells. Interim quarterly report No. 2, June 1965-March 1968, 373 (AD-672502)
Selection and utilization of batteries for deep submergence vehicles (Characteristics, design of container system, tests to 2700 psi), 2517
SILVER-CADMIUM BATTERIES/THERMODYNAMIC PROPERTIES
Accurate calculations of thermodynamic characteristics of silver-cadmium and silver-zinc storage batteries (E, dE/dT, ΔH°, ΔG°), 2262
SILVER-CADMIUM BATTERIES/USES
Alkaline batteries for marine purposes, 5348
Power for underwater vehicles and systems, 5315
SILVER-CADMIUM BATTERIES/VENTS
Design, fabrication, and testing of sealed, rechargeable silver-cadmium cells. Quarterly progress report No. 3, 1 Jan-31 Mar 1964 (Neoprene O ring for vent seal), 2796 (AD-449231)
SILVER-CADMIUM BATTERIES/WASTE MANAGEMENT
Technical and microeconomic analysis of cadmium and its compounds. Final report on Task 1, 3257 (PB-244625)
SILVER-ZINC BATTERIES
Power sources for compact communications and electronic equipment (Brief history of development), 1593
Special purpose batteries (Review), 1603
SILVER-ZINC BATTERIES/ANODES
Accumulator battery apparatus and method (Patent; prevents dendrite buildup by causing vibrations and turbulence in electrolyte), 3293
Alkaline cell (Patent; Zn anode and alkaline electrolyte) 1036
Alkaline cells with anodes made from zinc fibers and needles (Patent), 3915
Alkaline cells with anodes made from zinc fibers and

needles (Patent; process for preparing fibers and needles), 3917
Amalgamation of zinc powders (Patent), 3665
Anode collectors for zinc alkaline batteries (Patent; fabrication as coated Fe nets), 3752
Anode for galvanic cells (Patent; gas-permeable matrix of cross-linked polyacrylamide saturated with electrolyte and incorporating Zn particles), 3604
Anodes for alkaline batteries (Patent; gel-like anode for alk. batteries using air, O, $Ag_2O$, HgO, or $MnO_2$ cathodes and Fe or Zn anodes), 3678
Anodic behavior of zinc electrodes in potassium hydroxide electrolytes. Technical report, 2928 (AD-706596)
Anodic behavior of zinc in flowing electrolyte systems, 3781
Anodic behavior of zinc in potassium hydroxide solution, 4457
Anodic dissolution of zinc electrodes with porous active material in voltaic cells with alkaline electrolyte, 2509
Apparatus and method for charging a zinc electrode (Patent; bubbling of air to prevent dendrite formation and slope change), 3650
Battery zinc electrode kinetics investigation. Annual report No. 2, 15 Dec 1970--15 Dec 1971 (KOH electrolyte), 2945 (AD-736460)
Chronopotentiometric measurements of zinc electrodeposition kinetics from concentrated KOH solutions, 3115 (AD/A-004071)
Comparison of amalgamated and non-amalgamated zinc electrodes, 4425
Control experiments on active material migration in zinc electrodes. Technical report, 2944 (AD-736016)
Controlled current deposition of zinc from alkaline solution, 4467
Corrosion of zinc electrode in silver-zinc-alkali cell, 4733
Corrosion in alkali hydroxide solutions of electrolytic zinc powder containing codeposited lead, 3448
Corrosion of pure and amalgamated zinc in concentrated alkali hydroxide solutions, 3905
Coulogravimetric investigation of zinc electrode in potassium hydroxide, 4492
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 4, 1 Apr-30 Jun 1964 (12 Ah), 266 (AD-453792)
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 6, 1 Oct-31 Dec 1964, 273 (AD-464470)
Development of sintered zinc battery electrodes. Progress report (0.075 to 225 ma/$cm^2$), 3060 (AD-878215)
Development of zinc electrodes and inorganic separators for large size silver-zinc batteries. Final technical report, 4 Mar 1974-31 Oct 1975 (40 and 850Ah), 3130 (AD-A-022467)
Double layer capacitance of zinc electrodes in KOH solutions, 4496
Dry-charged zinc electrode for pasted type silver--zinc cells and storage batteries (Anodes of improved quality;patent), 3748
Effect of surfactant additions to zinc plate on cycle life performance of secondary silver oxide-zinc cells (25-Ah cells), 2524
Elastomer-bonded zinc dust electrodes used for high-rate secondary zinc-silver oxide batteries., 3766
Electrochemical generator with a zinc electrode (Patent), 3888
Electrochemical behavior of zinc in alkaline media, 4462
Electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 4, 1 Sep-1 Dec 1966, 2987 (AD-804559)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 10, 1 Mar-1 Jun 1968 (Amalgamated and nonamalgamated zinc in KOH), 3024 (AD-834995)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 12, 1 Sep-1 Dec 1968, 3039 (AD-847067)
Electrode passivation studies. Quarterly report No. 2, 1 Mar-31 May 1966, 2838 (AD-484216)
Engineering analysis of shape change in zinc secondary electrodes. I. Theoretical (Zn-$Ag_2O$ secondary cell), 3372
Engineering analysis of shape change in zinc secondary electrodes. II. Experimental (Zn-$Ag_2O$), 3373
Engineering analysis of shape change in zinc secondary electrodes. Final report Nov 73-Nov 75, 3133 (AD-A-026551)
Evolution of polarization curves of monocrystalline zinc electrodes as function of crystallographic orientation, 4728
Formation of porous metal plates by electrolytic reduction, 4680
Fundamental studies connected with electro-chemical energy storage. Final report (Adsorption of dendrite inhibitors on Zn), 708 (N-75-30647)
Gel-type zinc anode for alkaline batteries (Patent), 3584
Influence of sulfur-containing additives on characteristics of cast zinc anodes in alkaline cells, 4499
Influence of the porous structure of a zinc electrode on its electrical characteristics, 4391
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 13, 1 Dec 1968-1 Mar 1969, 1886 (AD-850474)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 6, 1 Mar-1 Jun 1967 (Solubility of ZnO in KOH), 3005 (AD-816527)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 8, 1 Sep-1 Dec 1967, 3014 (AD-824687)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report. No. 9, 1 Dec 1967-1 Mar 1968, 3019 (AD-829092)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 1, 1 Dec 1965-1 Mar 1966, 1697 (AD-480149)
Investigation of the transport and reaction process occurring within silver oxide-zinc batteries. Quarterly technical progress report No. 2, 1 Apr-1 Jul 1965, 2809 (AD-466909)
Investigation of the transport and reaction process occurring within silver oxide-zinc batteries. Quarterly technical progress report No. 3, 1 Jul-1 Oct 1965, 2820 (AD-472627)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 3, 1 Jun-1 Sep 1966, 2842 (AD-488605)
Investigation of recrystallization of zinc oxide in zincate solution using isotope tracing method (44 references), 4638
Kinetic study of the zinc electrode by modified techniques, 4424
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 2, 281 (AD-471972)
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 7, 31 May-31 Aug 1949 (Cd/Pb oxides), 284 (AD-471979)
Laminated silver oxide battery (Patent; Zn or ZnO anode, fabrication), 1024
Long life zinc silver-oxide cells (Improved Zn electrode structures and inorganic separators), 2283
Long-life stable zinc electrodes for alkaline secondary battery. Quarterly technical progress report No. 1, 1 December 1966-28 February 1967, 2895 (AD-655285)
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly report No. 3, 1 June-3 August 1967, 3018 (AD-828224)
Long-life stable zinc electrodes for alkaline secondary battery. Quarterly report No. 4, 1 September-30 November 1967 (Teflonated anodes), 3026 (AD-835961)
Long-life stable zinc electrode for alkaline secondary battery. Quarterly report No. 5, 1 December 1967-29 February 1968 (5 Ah), 3028 (AD-837262)
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly technical progress report No. 6, 1 March-30 May 1968, 3038 (AD-847053)
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly technical progress report No. 7, 1 June-31 August 1968, 3042 (AD-849523)
Long-life stable zinc electrodes for alkaline secondary batteries. Report No. 8 (final), December 1966-February 1969, 3049 (AD-857500)
Macrokinetics of the processes at the zinc electrode of an alkali current source, 3800
Method for preparing electrodes for an electrochemical storage cell (Patent), 3405
Negative electrode for electrochemical generator (Patent) 3676
Point of passivation of a zinc electrode in alkali, 3302
Producing porous metal structures for battery electrodes (Patent; Zn, Cd), 4254
Rate of hydrogen evolution of zinc electrodes in alkaline solutions, 4635
Rechargeable zinc electrodes (Patent; fabrication), 3532
Rechargeable electric accumulator cell with at least one zinc electrode (Patent; means to vibrate anode and/or separator to prevent dendrite formation), 3308
Silver-zinc electrodes and separator research. Quarterly technical progress report No. 2, 1 Oct 1966-1 Jan 1967 (Effects of additives on cycle life performance), 2990 (AD-805413)
Silver-zinc electrodes and separator research. Quarterly technical progress report No. 3, 1 Jan-1 Apr 1967 (Effects of additives on anode cycle life), 3000 (AD-813526)
Silver-zinc electrodes and separator research. Annual technical report No. 1 (Additives to prolong plate cycle life), 3006 (AD-819967)
Silver-zinc electrodes and separator research. Quarterly technical progress report No. 5, 1 Jul-1 Oct 1967 (Effects of $Ca(OH)_2$, carbowax, and Pb on cycle life), 3010 (AD-822335)

Silver-zinc electrodes and separator research. Quarterly technical progress report No. 7, 1 Jan-1 Apr 1968, 3022 (AD-832212)
Silver-Zinc electrodes and separator research. Quarterly progress report No. 9, 1 Jul-1 Oct 1968 (25 Ah), 3035 (AD-842501)
Silver-zinc electrodes and separator research. Technical report, 30 Jun 1967-30 Jun 1969, 3051 (AD-860365)
Sintered zinc electrode (Patent; fabrication), 4323
Stable zinc electrodes (Maintenance of Zn electrode shape), 4527
Storage battery with zinc electrodes containing titanium dioxide (Patent; anode preparation), 3707
Storage cell with dissoluble negative line electrodes (Patent; means the vibrate anodes during charging), 925
Storage cell with dissoluble negative line electrodes (Patent; means for vibrating anodes and stirring Zn oxide deposit on bottom of battery), 926
Studies in fundamental chemistry of fuel cell reactions. Semiannual progress report, 1 January-30 June 1968 (Dendritic deposition of zinc from alkaline solution), 688 (N-69-25396)
Studies in fundamental chemistry of fuel cell reactions. Semiannual progress report, 1 July-31 December 1968 (Formation mechanisms of zinc dendrites), 689 (N-69-25397)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 April-30 June 1969 (Dendritic deposition of zinc from alkaline solution), 3206 (N-70-10779)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 April-30 June 1969 (Dendritic deposition of zinc from alkaline solution), 3207 (N-70-16379)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 July-30 September 1969 (Dendritic deposition of zinc from alkaline solution), 3209 (N-70-25705)
Texture of a zinc oxide residue formed during the anodic oxidation of porous zinc in an alkaline solution, 2228
Zinc--alkaline battery containing carbazole as a zinc corrosion inhibitor (Patent), 1001
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981
Zinc anodes for secondary batteries (Patent; fabrication, polyethyleneimine to prevent electrodeposition of Zn on anode), 3675
Zinc anodic mixes for alkaline batteries (Patent), 3638
Zinc as a secondary battery electrode (Review of attempts to improve cycling behavior), 4405
Zinc-container electrode (Patent; design and performance), 3667
Zinc-container electrode (Patent; support with chemically active mass on each side), 3668
Zinc-containing electrode (Patent; preparation by electrodeposition), 4030
Zinc electrodes for rechargeable batteries (Patent; preparation), 3742
Zinc electrodes for rechargeable batteries (Patent; synthetic latex coating to prevent dendrite formation), 3585
Zinc electrode investigation. Quarterly technical progress report No. 4, 1 Apr-1 Jul 1965 (Recombining gases formed during overcharge), 2810 (AD-467031)
Zinc electrode investigation. Quarterly technical progress report No. 5, 1 Jul-1 Oct 1965, 2818 (AD-471222)
Zinc electrode investigation. Quarterly technical progress report No. 6, 1 Oct 1965-1 Jan 1966, 2829 (AD-476991)
Zinc electrode investigation. Quarterly technical progress report No. 7, 1 Jan-1 Apr 1966, 2836 (AD-480735)
Zinc electrode investigation, 2843 (AD-489498)
Zinc electrode investigation. Quarterly technical progress report No. 1, 1 Jul-1 Oct 1964 (Pd-on-alumina catalyst), 2853 (AD-606999)
Zinc electrode investigation. Quarterly technical progress report No. 2, 1 Oct 1964-1 Jan 1965 (Effects of catalysts, pressure, and impurities), 2856 (AD-609984)
Zinc electrode investigation. Quarterly technical progress report No. 3, 1 Jan-1 Apr 1965, 2863 (AD-614119)
Zinc electrodes in alkaline medium, 1464
Zinc electrode for an electrochemical power source (Patent), 3480
Zinc electrode containing an additive to reduce gassing at the zinc electrode in a heat-sterilized silver-zinc alkaline battery (Patent; HgS or HgS-PbS), 4259
Zinc electrodes for secondary batteries (Patent; Cd additive improves Zn adherence), 3299
Zinc fibers and needles and galvanic cell anodes made therefrom (Patent), 3866
Zinc plate shape change inhibition (Patent; frame near electrode saturated with $Fe(OH)_2$), 1006
Zinc powder for batteries (Patent), 3679

SILVER-ZINC BATTERIES/BATTERY CHARGERS

Automatic charge cut-off for silver-zinc storage batteries (Patent), 4824
Battery chargers and hand crank generators, 4553
Battery charger PP-4126( )/U. Final report, 1 Jul 1971-Jun 1974, 3120 (AD-A-013364)
Cell equalization techniques, 1664 (AD-461856)
Charger/analyzer for battery maintenance, 4051
Charging equipment, mobile (CEM). Final report Oct 1972-Nov 1974, 3139 (AD-A-036071)
Diode control research. Quarterly technical progress report No. 2, 1 September-1 December 1966 (Solid-state charge control system), 2988 (AD-805146)
Diode control research. Quarterly technical progress report No. 3, 1 December 1966-1 March 1967, 2998 (AD-810831)
Diode control research. Quarterly progress report No. 5, 1 June-1 September 1967 (Stabistor diodes for control of battery charging), 3009 (AD-821811)
Diode control research. Quarterly technical progress report No. 4, 1 March-1 June 1967 (Stabistor diode charge control system), 3011 (AD-822337)
Diode control research. Final report, May 1966-15 July 1969 (Method for fast evaluation of cells for use in stabistor diode-controlled batteries capable of high-rate charging), 3054 (AD-861077)
Diode control research. Quarterly technical progress report No. 1, 1 Jun-1 Sep 1966, 2844 (AD-489882)
Electric storage batteries according to recent patents, 4649
Multichannel engine powered battery charger. Final report (6, 12, and 24 V at up to 2.5 A), 2816 (AD-470065)
Portable military charger for zinc--silver oxide batteries, 4520
Portable military charger for zinc-silver oxide batteries, 2912 (AD-673717)
Portable military charger for zinc-silver oxide batteries (6V, 60Ah), 4538
Rapid charger for maintenance-free batteries. Final report, 3103 (AD-913957L)
Rapid charger for maintenance-free batteries. Semi-annual report, 1 May-31 Dec 1971, 3098 (AD-911508)
Rapid charger for maintenance-free batteries. Semi-annual report 1 May-31 Dec 71, 3099 (AD-911508)

SILVER-ZINC BATTERIES/BATTERY CHARGING

Accumulator battery apparatus and method (Patent; prevents dendrite buildup by causing vibrations and turbulence in electrolyte), 3293
Anodic polarization of sintered silver electrode in alkaline solution: efficiency of charging, 2586
Apparatus and method for charging a zinc electrode (Patent; bubbling of air to prevent dendrite formation and slope change), 3650
Changing the discharge capacity of a silver oxide electrode by charging with periodically interrupted current, 2889 (AD-644616)
Charge control devices. 5. Charge control of Ag--Cd cells and Ag--Zn cells, 4594
Charging silver oxide electrode with periodically varying current, 2589
Charging silver oxide electrode with periodically varying current. II, 2549
Charging silver oxide electrode with periodically varying current. IV, 2505
Charging silver oxide electrode with periodically varying current. III, 4500
Charging the silver-zinc secondary battery system. Part I. Formation characteristics, 1767 (AD-691710)
Crystallographic changes during oxidation (charging) of the silver electrode. Part I. Initial oxidation of an industrial sintered plaque, 2903 (AD-671050)
Crystallographic changes during oxidation (charging) of the silver electrode. Part II. Oxidation following five charge-discharge cycles at a low rate, 2909 (AD-671771)
Diode control research. Quarterly progress report No. 6, 1 September-1 December 1967 (Stabistor charge control), 1862 (AD-825660)
Diode control research. Quarterly technical progress report No. 7 (Stabistor-protected 12-Ah Ni-Cd and 25-Ah Ag-Zr batteries), 1867 (AD-832025)
Effect of the design parameters on the capacitive characteristics of the silver zinc storage batteries when charged by asymmetrical alternating current, 2439
Effect of the charge time on the life of a silver battery electrode, 4433
Effect of the design parameters on the capacitive characteristics of the silver-zinc storage batteries when charged by asymmetrical alternating current, 2441
Effects of constant-current reversals during charge of the silver oxide electrode, 1758 (AD-670733)
Evaluation of high-rate charging of DSRV batteries. Final report (KOH electrolyte), 1953 (AD-910187L)
Fluctuation of the voltage of batteries during charging with an asymmetrical alternating current, 1820 (AD-756557)
Heat generation in sealed batteries, 2520
Improvement of certain operational characteristics of silver--zinc storage batteries (By charging with asymmetrical ac), 1812 (AD-742887)
Increasing the discharge capacity of a silver oxide electrode by charging with 60-cycle asymmetric ac, 1756 (AD-663551)
Influence of circuit element parameters on capacitance

characteristics of silver--zinc storage batteries during charging with asymetric alternating current, 1821 (AD-756955)
Microstructure of sintered silver electrodes. IV. Formation of AgO during charges (KOH electrolyte), 2938 (AD-728894)
Optimization of charging conditions of storage battery silver electrode and calculation of capacity loss during continuous use, 3805
Reduction of the capacity of silver electrodes operating in forced discharge systems, 4438
Secondary alkaline batteries (Patent; Zn anode, addition of polycationic polymers enables charging without Zn deposition), 1000
Theoretical evaluation of hot spot temperature of silver-zinc batteries, 2521

SILVER-ZINC BATTERIES/BATTERY SEPARATORS
Applied research investigation of sealed silver-zinc batteries. Quarterly technical progress report No. 3, 1 Nov 1963-1 Feb 1964, 2788 (AD-430588)
Applied research investigation of sealed silver-zinc batteries (LiOH in electrolyte), 2805 (AD-463102)
Batteries for undersea applications, 1465
Battery separator mechanisms: literature survey report, 2884 (AD-642779)
Battery separator (Patent), 4251
Changes in cellulose-base separators during use in silver-zinc electric batteries, 4340
Characterization of cellophane as an ionic barrier, 2791 (AD-437997)
Characteristics of separators for alkaline silver oxide-zinc secondary batteries. Screening methods, 2795 (AD-447301)
Development of the sealed zinc-silver oxide secondary battery system. Final technical report No. 8, 1 July 1963-30 June 1965, 343 (AD-635776)
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 4, 1 Apr-30 Jun 1964 (12 Ah), 266 (AD-453792)
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 6, 1 Oct-31 Dec 1964, 273 (AD-464470)
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 1, 1 Jul-30 Sep 1963 (Pressure increase during discharged stand; evaluation of several materials as separators), 253 (AD-432195)
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 3, 1 Jan-31 Mar 1964, 261 (AD-444798)
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 2, 1 Oct-30 Dec 1963 (12 Ah), 311 (AD-600395)
Development of zinc electrodes and inorganic separators for large size silver-zinc batteries. Final technical report, 4 Mar 1974-31 Oct 1975 (40 and 850Ah), 3130 (AD-A-022467)
Development of an improved separator material for alkaline silver-zinc batteries. Preliminary study Dec 75-May 76 (Polymeric films), 3141 (AD-A-038754)
Development of modified polyolefin membranes for reverse osmosis, 4440
Electrochemical cell electrode separator and method of making it and fuel cell containing same (Patent; asbestos, teflon, ethylene-propylene copolymer), 3324
Evaluation of improved separator material in large silver--zinc cells for use in submersible vehicles. Final report, 1 Aug 1972--31 Jan 1974, 2973 (AD-774674)
Evaluation of improved separator material in large silver zinc cells. Final report, 3107 (AD-917948L)
Evaluation program for secondary spacecraft cells. Acceptance test of McDonnell-Douglas, Astropower Division 5.0 ampere-hour silver-zinc cells, 1901 (AD-869422)
Evaluation of inorganic/organic separators. Final report, 3237 (N-77-10639)
Fabrication and test of inorganic/organic separators. Final report, Nov 1972-Jan 1974, 3220 (N-74-26511)
Factors influence flexibility, resistivity, and zinc dendrite penetration rate of inorganic separators for alkaline batteries, 3224 (N-75-17807)
Factors influencing flexibility, resistivity, zinc dendrite penetration rate of inorganic separators for alkaline batteries, 3244 (NASA-TM-X-3199)
Flexible, porous battery separator (Patent), 4317
Functional aspects of separators for silver--zinc alkaline storage batteries (Graft copolymer separators prepared by radiation-initiated grafting of carboxylic acids), 4202
Heat sterilizable battery, 1489
In-house battery separator investigation (Method for screening possible separator materials; Aeronautical Systems Div., Wright-Patterson AFB), 2787 (AD-430044)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 2, 1 Mar-1 Jun 1966, 1702 (AD-484279)
Ion-conducting polymeric and polymer-inorganic separator membranes for the current sources of a silver--zinc electrochemical system, 4133
Long life zinc silver-oxide cells (Improved Zn electrode structures and inorganic separators), 2283
Manufacturing methods for high performance grafted-polyethylene battery separators. Final report, 1 Dec 1970-30 Jan 1972, 2956 (AD-745571)
Measurement of zincate permeation in a polyethylene battery separator with controlled external hydrodynamic conditions, 4186
Measurement of zincate diffusion through membrane, 4634
Method of making separators for alkaline batteries (Patent), 3555
Performance with stable separators, 4528
Progress in development of heat-sterilizable Ag-Zn battery, 1469
Rechargeable battery which combats shape change of the zinc anode (By proper fabrication of separator; patent) 857
Sealed zinc-silver oxide batteries. Part 3, 4625
Sealed zinc--silver oxide batteries. I (Development studies on electrodes and separators), 1530
Sealed zinc--silver oxide batteries. III (Fabrication and testing of separators), 4631
Selection of separator materials, 2908 (AD-671685)
Separator for silver--zinc electric button-type cell, 3746
Separator films made from low-substituted carboxymethylcellulose, 4114
Separators for alkaline batteries, 4675
Separators for silver peroxide-zinc alkaline battery, 4748
Separators for high-rate, nonreserve zinc-silver oxide batteries. Semiannual report No. 1, 20 February-July 1967 (Evaluation of several materials and production methods), 2897 (AD-659465)
Separators for high-rate, nonreserve zinc-silver oxide batteries. Final report, 20 February-19 November 1967, 2901 (AD-665631)
Separators for alkaline batteries (Patent; natural or synthetic cellulosic materials, styrene, nylon, glass fiber, Teflon, etc.), 3384
Separators for electrochemical cells (Patent), 4338
Silver--zinc electrodes and separator research. Quarterly technical progress report No. 1, 1 Jul-1 Oct 1966, 2982 (AD-801010)
Silver deposition on battery separators, 4562
Silver migration and transport mechanism studies in silver oxide-zinc batteries. Final report, 2858 (AD-610563)
Silver-zinc cells with electrolytically deposited calcium hydroxide separators (Separation deposited on cathode; performance), 4532
Silver-zinc electrodes and separator research. Quarterly technical progress report No. 6, 1 Oct 1967-1 Jan 1968 (Phenolic membrane with methacrylic acid graft), 3017 (AD-826328)
Silver-zinc electrodes and separator research, 3031 (AD-839883)
Silver-Zinc electrodes and separator research. Quarterly progress report No. 9, 1 Jul-1 Oct 1968 (25 Ah), 3035 (AD-842501)
Silver-zinc electrodes and separator research. Quarterly technical progress report No. 10, 1 Oct 1968-1 Jan 1969, 3041 (AD-847742)
Silver-zinc electrodes and separator research. Technical report, 30 Jun 1967-30 Jun 1969, 3051 (AD-860365)
Structure and function of an inorganic--organic separator for electrochemical cells, 3243 (NASA-TM-X-3080)
Substituted aliphatic polybenzimidazoles as membrane separator materials, 4469
Transport processes in zinc-silver oxide battery separators, 3468
Use of ion exchange membranes as separators in batteries, 4582

SILVER-ZINC BATTERIES/BIBLIOGRAPHIES
Annotated bibliography of the thermal properties of primary and secondary cells, 62 (AD-871108)
Silver cells. A bibliography with abstracts. Search period covered: 1964-August 1975, 105 (NTIS/PS-75/649)
Silver cells (citations from the NTIS data base). Report for 1964-Sep 76, 111 (NTIS/PS-76/0879)
Silver cells (citations from the Engineering Index data base). Report for 1970-Sep 76, 112 (NTIS/PS-76/0880)

SILVER-ZINC BATTERIES/CATHODES
Active material electrode and cell comprising improved battery-grade divalent silver oxide (Patent; additive of Hg, Se, Te, or Hg combined with Pb or Sn), 4243
Additive for an alkaline battery using divalent silver oxide positive active material (Patent), 3865
Alkaline battery cathode (Patent; Zn amalgam/KOH/$Ag_2O$), 3759
Analysis of porous electrodes with sparingly soluble reactants. III. Short time transients, 3390
Analysis of porous electrodes with sparingly soluble reactants. IV. Application to particulate bed electrode: Ag/AgCl system, 3391
Anodic behavior of silver in alkaline solutions, 3525
Cathode for a silver battery (Patent), 3628
Changes in microstructure of sintered silver electrode after repeated cycling at low current, 4483
Changing the discharge capacity of a silver oxide electrode by charging with periodically interrupted current, 2889 (AD-644616)
Controlled potential reactions of cadmium and silver in alkaline solution, 2645

Coulogravimetric study of sintered silver electrode in 1 molar potassium hydroxide (Slope changes in weight change/Coulomb curves), 4548
Crystallographic changes during oxidation (charging) of the silver electrode. Part I. Initial oxidation of an industrial sintered plaque, 2903 (AD-671050)
Crystallographic changes during oxidation (charging) of the silver electrode. Part II. Oxidation following five charge-discharge cycles at a low rate, 2909 (AD-671771)
Cycling characteristics of silver electrode in alkaline solutions, 4596
Decomposition of silver oxide in alkaline solutions. Technical report No. 2 (Aqueous KOH), 2851 (AD-603306)
Decomposition of AgO in alkaline solutions, 4456
Dry process electrodes for Zn--AgO batteries (Fabrication and properties), 4630
Dry process divalent silver oxide electrodes (Mechanical strength of dry process electrodes), 2882 (AD-640053)
Dry process divalent silver oxide electrodes (Fabrication method), 2872 (AD-622698)
Effect of the substrate on the anodic behavior of silver oxide electrode, 4110
Effect of zincate ions on the course of cathodic processes on the silver oxide electrode, 4111
Effect of the discharge temperature on operational and structural characteristics of a silver oxide electrode (-10 to +90°), 4430
Effect of the charge time on the life of a silver battery electrode, 4433
Effects of constant-current reversals during charge of the silver oxide electrode, 1758 (AD-670733)
Electrolytic cell for x-ray diffraction studies of electrode phenomena, 2852 (AD-605707)
Feasibility of microscopy for investigating the silver oxide electrode, 2900 (AD-664993)
High energy batteries. Final report, 472 (AD-823304)
Increase and stabilization of silver electrode capacity, 4410
Increasing the discharge capacity of a silver oxide electrode by charging with 60-cycle asymmetric ac, 1756 (AD-663551)
Influence of sinter temperature on capacity of silver electrodes, 4556
Investigation of the transport and reaction process occurring within silver oxide-zinc batteries. Quarterly technical progress report No. 2, 1 Apr-1 Jul 1965, 2809 (AD-466909)
Investigation of the transport and reaction process occurring within silver oxide-zinc batteries. Quarterly technical progress report No. 3, 1 Jul-1 Oct 1965, 2820 (AD-472627)
Kinetics of decomposition of the active material in silver oxide electrodes of chemical sources of current, 4346
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 2, 281 (AD-471972)
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 7, 31 May-31 Aug 1949 (Cd/Pb oxides), 284 (AD-471979)
Life capability of the silver electrode in alkaline electrochemical cells (Ag-$H_2$), 3235 (N-76-28648)
Method for the quantitative analysis of the silver oxide cathode. Final report, 2866 (AD-618479)
Method of manufacturing positive electrodes for silver-zinc batteries, 4617 (AD-620123)
Microstructure of sintered silver electrodes. IV. Formation of AgO during charges (KOH electrolyte), 2938 (AD-728894)
Microstructure of sintered silver electrodes. I and II (Higher electrode capacity maintained at higher current densities), 4460
Optimization of charging conditions of storage battery silver electrode and calculation of capacity loss during continuous use, 3805
Oxides on the silver electrode. Part 2. X-ray diffraction studies of the working silver electrode. Final report, 2862 (AD-614058)
Preparation and electrochemical properties of dislocation-free (100) faces of monocrystal silver electrodes, 4544
Processes at the silver oxide electrode of an alkali current source (State-of-the-art review (1975)), 3798
Production of a silver--silver oxide electrode for the silver--zinc storage battery (Patent), 3999
Production of dry process divalent silver oxide electrodes by continuous rolling. Quarterly report No. 9, December 1969-February 1970, 3061 (AD-878841)
Production of positive plates for silver oxide-zinc batteries, 4665
Reduction of the silver oxide electrode in CsOH solutions (Comparison with KOH), 4003
Reduction of the capacity of silver electrodes operating in forced discharge systems, 4438
Relating structural variables of porous electrodes (Method gives specific surface area), 1089
Reproducible and stable silver-silver oxide electrode, 4744
Review of fundamental investigations of silver oxide electrodes, 2831 (AD-478632)
Scanning electron-microscopy studies of silver oxide electrodes, 4093
Scanning electron microscope investigations on silver oxide electrodes (Morphological changes in sintered powder metallurgy electrodes due to oxidation during cycling), 4024
Scanning electron microscope investigations on silver oxide electrodes, 4025
Sealed silver oxide storage battery (Patent; Ag/Zn yielded 400 mAh/g), 3673
Silver electrodes for chemical sources of electric power (Patent), 3942
Silver electrode for battery (Patent; fabrication), 3914
Silver migration and transport mechanism studies in silver oxide-zinc batteries. Quarterly technical progress report No. 1, 1 Dec 1963-1 Mar 1964, 2789 (AD-432346)
Silver oxide battery electrode (Patent; preparation by electrochemical oxidation of Ag powder), 3739
Silver oxide cell (Patent; amorphous C added to cathodes to eliminate second voltage level), 951
Silver oxide electrode (Electrochemistry), 4725
Silver/silver-oxide electrode. II. Influence of a superimposed sinusoidal potential on the anodising of silver, 3839
Silver/silver-oxide electrode. III. Anodising of silver with asymmetric sinusoidal current, 3840
Silver-zinc cells with electrolytically deposited calcium hydroxide separators (Separation deposited on cathode; performance), 4532
Studies on the stability of oxides of silver, 2875 (AD-626229)
Studies on silver oxide. I. Analytical techniques. II. Thermal decomposition of AgO. III. Charging efficiency studies, 2993 (AD-806861)
Studies on the silver/silver oxide electrode, 3837
Study of the discharge of porous Ag/$Ag_2O$ electrodes in concentrated potassium hydroxide electrolyte. Doctoral thesis, 2941 (AD-732349)
Study of the silver(I) oxide-silver(II) oxide electrode, 4732
Trends in usage of silver. Annual report, 3023 (AD-832582)
Use of a hydrovibroabrasive erosion method to study the surface strength of silver oxide electrodes of chemical current sources, 4081
Use of hydrogen-absorbing electrode in alkaline battery (For protection against electrochemical damage due to battery reversal; patent), 3386

SILVER-ZINC BATTERIES/CHEMICAL REACTION KINETICS
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 6, 1 Oct-31 Dec 1964, 273 (AD-464470)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 13, 1 Dec 1968-1 Mar 1969, 1886 (AD-850474)
Kinetics and mechanism of deposition of zinc from zincate in concentrated alkali hydroxide solutions, 2178

SILVER-ZINC BATTERIES/CHEMICAL REACTIONS
Development of the sealed zinc-silver oxide secondary battery system. Final technical report No. 8, 1 July 1963-30 June 1965, 343 (AD-635776)
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 3, 1 Jan-31 Mar 1964, 261 (AD-444798)
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 2, 1 Oct-30 Dec 1963 (12 Ah), 311 (AD-600395)
Hermetically sealed silver-zinc batteries operating in the silver (I) oxide ($Ag_2O$) phase, 1256
Investigation of the transport and reaction process occurring within silver oxide-zinc batteries. Quarterly technical progress report No. 3, 1 Jul-1 Oct 1965, 2820 (AD-472627)
Processes at the silver oxide electrode of an alkali current source (State-of-the-art review (1975)), 3798
Sealed silver-zinc batteries (Pressure rise due to gas build-up), 1539
Self-discharge of silver-zinc batteries filled with electrolyte, 2414 (AD/A-001498)

SILVER-ZINC BATTERIES/COMPARATIVE EVALUATIONS
Battery power for electric vehicles. 2. Novel high-energy power sources, 1223
Evaluation tests of a nickel--zinc aircraft storage battery developed by Eagle-Picher Industries, Inc., 1914 (AD-901266L)
Lightweight laser designator battery evaluation tests. Final report, 2017 (AD-A-019511)
Operating characteristics of storage batteries for use on ground support equipment, 1684 (AD-470655)
Study of electric automobile traction with reference to silver batteries, 2673
Survey of continuous sources of electrical power for under-ice propulsion of small submersibles. Part I. Conventional secondary batteries (300 and 800 Ah), 2024 (AD-A-035996)

SILVER-ZINC BATTERIES/CONTAINERS
Selection and utilization of batteries for deep submergence vehicles (Characteristics, design of container system, tests to 2700 psi), 2517

Use of polyamides in the accumulator industry, 4388
SILVER-ZINC BATTERIES/CORROSION INHIBITORS
Zinc--alkaline battery containing carbazole as a zinc corrosion inhibitor (Patent), 1001
SILVER-ZINC BATTERIES/DESIGN
Battery power by linear foot (Tapes coated with Ag oxide and saturated with KOH), 1534
Biosatellite fuel cell/battery power system, 691 (N-70-11022)
Cell with circulating electrolyte (Patent; primarily for Zn/air batteries, but adaptable to other types), 841
Chemoelectric battery (Patent; Fe, Cd, or Zn with hydroxide of Ni, Fe, or Co and/or oxides of Pb or Ag, gas release feature), 809
Design, Development, qualification, and testing of battery BA-494( )/U. Final report, Mar 1964-Jan 1965, 1655 (AD-457141)
Design, testing, and flight performance of the Mariner Mars 1969 spacecraft batteries, 2456
Design of standard line of vented silver-zinc batteries. Quarterly report No. 1, 10 January-9 April 1967, 357 (AD-656623)
Design of standard line of vented silver-zinc batteries. Quarterly report No. 3, 10 July-31 October 1967, 479 (AD-827683)
Design of standard line of vented silver-zinc batteries. Acceptance test report, 10 June 1967-29 February 1968 (SCL-6870A), 495 (AD-840560)
Design of standard line of vented silver-zinc batteries. Final report, January 1967-August 1968, 500 (AD-843503)
Design of a 25 ampere-hour, heat-sterilizable, high-impact, silver-zinc cell, 1437
Development of the HARP battery. Final report (For high-altitude research program), 364 (AD-665409)
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 5, 1 Jul-30 Sep 1964 (Factorial design), 268 (AD-457834)
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 7, 1 Jan-31 Mar 1965, 329 (AD-621583)
Divalent silver oxide-zinc cell having a unipotential discharge level (Patent), 909
Electric batteries from recent patents, 1577
Engineering the silver-zinc battery for the deep submergence rescue vehicle (Modifications to prevent grounding, method for predicting battery capacity), 891
Failure mechanisms in sealed batteries. Final technical report, 1 July 1966-30 April 1969, 1620 (AD-85592)
High energy density long life secondary silver--zinc batteries, 1423
High energy density storage system with encapsulated silver--zinc cells for deep ocean applications, 420 (AD-750719)
High energy density, long life secondary battery (silver--zinc) assembly BB-634( )/U. Final report, 31 Oct 1968-15 Oct 1971, 401 (AD-732495)
Improved silver-zinc batteries, 506 (AD-847080)
Investigation leading to the development of a silver oxide-zinc battery. Summary report No. 3 (24 V, 50h operation -65 to +125 F), 481 (AD-828612)
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 9, 278 (AD-471947)
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 1, 280 (AD-471971)
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 4 (annual), 282 (AD-471973)
Modification of three type MS 18122-1 aircraft batteries for use in type H2 helicopters, Naval Air Station, Lakehurst, NJ (Modification of MS 18122-1 Ag/Zn with Ni/Cd cells), 540 (AD-905759L)
Modular battery construction (Patent), 1161
New lightweight accumulator (Improved insoluble electrode), 1609
Pioneer Venus probe battery program, 773 (X-711-77-28)
Rechargeable battery which combats shape change of the zinc anode (By proper fabrication of separator; patent), 857
Secondary silver-zinc battery technology, 1448
Services, facilities, and materials leading to the design, development, and production of special purpose batteries. Quarterly report No. 7, 305 (AD-496061)
Silver batteries. 1. Design of sealed Ag--Zn cells, 1512
Silver oxide cell (Patent; anode with 10 percent Hg, cathode with 0.5 to 2 percent activated C, NaOH or KOH electrolyte with ZnO and halide or halooxygen salts), 1035
Silver oxide cell (Patent; amorphous C added to cathodes to eliminate second voltage level), 951
Silver-zinc missile power supply. Quarterly technical progress report No. 5, 1 July-1 October 1966 on Phase 1, 456 (AD-804558)
Silver-zinc missile power supply. Quarterly technical progress report No. 6, 1 October-31 December 1966 (169 Wh), 459 (AD-811343)
Silver-zinc missile power supply. Quarterly progress report No. 7, 1 January-31 March 1967, 461 (AD-814021)
Silver-zinc power supply. Quarterly progress report No. 8, 31 March-30 June 1967 on Phase 2B, 465 (AD-819494)
Silver-zinc missile power supply. Quarterly progress report No. 9, 30 June-30 September 1967 (95 V), 471 (AD-823190)
Silver-zinc missile power supply. Quarterly technical progress report No. 10, 1 October 1967-1 January 1968 (95 V, 200 Wh), 485 (AD-831452)
Silver-zinc electric storage cells (Patent; semipermeable membrane as separator), 1209
Silver-zinc missile power supply. Quarterly technical progress report No. 3, 1 Jan-31 Mar 1966 (90 V, 133 Wh at 8.5 kW max), 291 (AD-482897)
Silver-zinc missile power supply. Quarterly technical progress report No. 4, 1 Apr-30 Jun 1966 (750 Wh, 2 to 20 kW), 297 (AD-488983)
Silver-zinc batteries as source: primary electric power for pilotless aircraft (Improvements to extend lifetime and ameliorate altitude effects), 1586
Silver/zinc battery power for deep ocean vehicles, 5250
Standard alkaline cells and secondary batteries (Review of characteristics of battery families), 366 (AD-668654)
Standard line alkaline secondary batteries, 319 (AD-610010)
Storage battery comprising negative plates of a wedge shaped configuration, 1226
Storage battery with an intermediate plastic layer (Patent), 1552
Storage cell with dissoluble negative line electrodes (Patent; means the vibrate anodes during charging), 925
Storage cell with dissoluble negative line electrodes (Patent; means for vibrating anodes and stirring Zn oxide deposit on bottom of battery), 926
Zinc alkaline secondary battery (Patent; safe battery because of smooth gas removal at anode), 1032
Zinc alkaline secondary batteries (Patent; auxiliary anode and polycationic polymer prevent Zn dendrite formation and H generation), 998
SILVER-ZINC BATTERIES/ELECTRIC CONDUCTIVITY
Reduction of internal ohmic losses in power sources (AgO/KOH/Zn), 2533
SILVER-ZINC BATTERIES/ELECTRIC CURRENTS
Effect of high pressure on the voltage and current output of silver oxide--zinc and mercury oxide--zinc miniature batteries, 1776 (AD-705904)
SILVER-ZINC BATTERIES/ELECTRIC IMPEDANCE
Internal resistance of the lead and silver-zinc storage batteries during short circuits, 2399
Internal resistance of lead and silver-zinc storage batteries during short circuits, 2400
SILVER-ZINC BATTERIES/ELECTRIC POTENTIAL
Effect of high pressure on the voltage and current output of silver oxide--zinc and mercury oxide--zinc miniature batteries, 1776 (AD-705904)
High accuracy voltmeter evaluation. Final report, 2981 (AD-800315L)
Nickel-cadmium, silver-cadmium, and silver-zinc batteries, 694 (N-70-29061)
Silver oxide cell (Patent; amorphous C added to cathodes to eliminate second voltage level), 951
SILVER-ZINC BATTERIES/ELECTRICAL PROPERTIES
Influence of circuit element parameters on capacitance characteristics of silver--zinc storage batteries during charging with asymetric alternating current, 1821 (AD-756955)
SILVER-ZINC BATTERIES/ELECTROCHEMISTRY
Anodic dissolution of zinc electrodes with porous active material in voltaic cells with alkaline electrolyte, 2509
Battery zinc electrode kinetics investigation. Annual report No. 2, 15 Dec 1970--15 Dec 1971 (KOH electrolyte), 2945 (AD-736460)
Canadian research on secondary batteries, 2615
Chronopotentiometric measurements of zinc electrodeposition kinetics from concentrated KOH solutions, 3115 (AD/A-004071)
Controlled potential reactions of cadmium and silver in alkaline solution, 2645
Effects of silver complex ion on the electrode reaction of silver--silver oxide systems in alkaline solution, 3092 (AD-909331L)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Final report, Dec 1965-Sep 1969, 1897 (AD-862506)
Experiences obtained while storing silver-zinc storage cells using $^{65}Zn$ and $^{110}Ag$ (Migration of electrode material), 2616
Investigation on silver-zinc storage battery with radioactive $^{65}Zn$ isotope, 2621
Investigation of the transport and reaction processes occurring within silver oxide-zinc batteries. Final report, 1695 (AD-478674)
Silver deposition on battery separators, 4562
Silver distribution in silver-zinc storage batteries, 2532
Silver migration and transport mechanism studies in silver oxide-zinc batteries. Quarterly technical progress report No. 3, 1 Jun-1 Sep 1964 (Applicability of Fick's law to diffusion of $OH^-$ and zincate ions through cellophane membrane; effect of surfactants on electroplated Zn), 1726 (AD-605684)

Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 January-31 March 1970, 2061 (N-70-39718)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 July-30 September 1970, 2064 (N-71-26289)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 January-31 March 1971, 2065 (N-71-30827)
Texture of a zinc oxide residue formed during the anodic oxidation of porous zinc in an alkaline solution, 2228
Thermodynamic study of silver--zinc and silver--cadmium storage batteries, 2307
SILVER-ZINC BATTERIES/ELECTRODES
Alkaline battery (Patent; improvement consisting in welding their conductive plates to electrodes), 3493
Applied research investigation of sealed silver-zinc batteries (Study of ZnO/Ag ratio and electrolyte composition), 316 (AD-603023)
Comparison of potential step and triangular voltage sweep methods of double layer capacitance measurements. III. Porous zinc electrodes, 2949 (AD-742219)
Development of improved zinc electrodes for secondary batteries. Final report, July 1968-July 1969, 3203 (N-69-40063)
Diffusion-bonded battery electrode plaques (Patent), 3552
Dissolution and passivation of metals in alkaline solutions in the presence of surfactants, 4137
Distribution of current density on electrodes of silver-zinc storage battery during discharge, 3374
Dry process electrodes for Zn-AgO batteries, 4627
Effect of cationic impurities on the silver-silver oxide electrode: the silver-copper-iron-palladium system, 1996 (AD-921643)
Effects of KOH concentration on morphology and electrical characteristics of sintered silver electrodes, 4203
Effects of silver complex ion on the electrode reaction of silver--silver oxide systems in alkaline solution, 3092 (AD-909331L)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Final report, Dec 1965-Sep 1969, 1897 (AD-862506)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 7, 1 Jun-1 Sep 1967 (Study of cathodic Zn processes at 50°C), 3008 (AD-820273)
Electrode assembly for bipolar battery (Patent application), 3470
Electrodes for alkaline zinc storage batteries (G.D.R. patent), 3094 (AD-909496L)
Failure mechanisms in sealed batteries. Semiannual technical report No. 5, 1 July-31 December 1968, 1887 (AD-851056)
Formation of electrodes for alkaline batteries (Patent), 3542
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Heat sterilizable battery, 1489
High-rate batteries (Effects of plate porosity on efficiency; study included Zn, Cd, Pb, $Ag_2O$, and AgO), 2890 (AD-645942)
High-rate battery electrodes (Performance of plates produced by electrolytic reduction), 4550
Investigation of the transport and reaction process occurring within silver oxide-zinc batteries. Quarterly technical progress report No. 1, 1 Jan-1 Apr 1965, 2802 (AD-461102)
Investigation of electrode materials for alkaline batteries. Quarterly report, 3211 (N-70--32647)
Long-life stable zinc electrode for alkaline secondary battery. Quarterly report No. 2, 1 March-31 May 1967, 3015 (AD-824719)
Method of producing electrodes (Patent), 3400
Methods of producing electrodes for alkaline batteries (Patent; oxidative pretreatment of nickel plaque before impregnation), 3287
Nonleaking battery terminals (KOH electrolytes), 4268
Sealed zinc--silver oxide batteries. I (Development studies on electrodes and separators), 1530
Selected articles, 4689 (AD-655021)
Self-discharge of silver-zinc storage batteries, 2433
Silver batteries. 2. Improved Zn electrodes for secondary batteries, 4590
Silver-zinc electrodes and separator research. Quarterly technical progress report No. 6, 1 Oct 1967-1 Jan 1968 (Phenolic membrane with methacrylic acid graft), 3017 (AD-826328)
Silver-zinc electrodes and separator research, 3031 (AD-839883)
Silver-zinc electrodes and separator research. Quarterly technical progress report No. 10, 1 Oct 1968-1 Jan 1969, 3041 (AD-847742)
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730
Studies on the stability of oxides of silver, 4626
Zinc electrode shape change in secondary cells, 4269
SILVER-ZINC BATTERIES/ELECTROLYTES
Applied research investigation of sealed silver-zinc batteries. Quarterly technical progress report No. 3, 1 Nov 1963-1 Feb 1964, 2788 (AD-430588)
Applied research investigation of sealed silver-zinc batteries (Study of ZnO/Ag ratio and electrolyte composition), 316 (AD-603023)
Applied research investigation of sealed silver-zinc batteries (LiOH in electrolyte), 2805 (AD-463102)
Effect of lead salt additions on the properties of a zinc oxide electrode in alkaline electrolytes, 4143
Electrochemical generator with a zinc electrode (Patent), 3888
Electrolyte for zinc--anode batteries (Patent; $H_2SO_4$ with N-decylpyridinium chloride), 3715
Electrophoretic mobilities of cadmium hydroxide, nickel hydroxide, and silver oxide in NiCd and Ag--Zn battery electrolytes. Interim report, 2980 (AD-783853)
Electrophoretic mobilities of cadmium hydroxide, nickel hydroxide, and silver oxide in Ni-Cd and Ag-Zn battery electrolytes, 3453
Influence of membrane transport characteristics on electrolyte concentration and consequent plate performance, 1898 (AD-862540)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 1, 1 Dec 1965-1 Mar 1966, 1697 (AD-480149)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 2, 1 Mar-1 Jun 1966, 1702 (AD-484279)
Physical-chemical studies of KOH-ZnO electrolytes (Vapor pressure 100 to 145C, 30 to 46 percent KOH; electric conductivity 10 to 55C; ZnO solubility, 10 to 145C), 4502
Physical properties and chemical analyses of electrolytes for sealed silver-zinc batteries. Special technical report, July 1966-March 1969, 3044 (AD-853490)
Reduction of the silver oxide electrode in CsOH solutions (Comparison with KOH), 4003
Research and development directed toward the development of gas generators. Final report for Jul 1961-May 1963, 2867 (AD-620212)
Secondary alkaline batteries (Patent; Zn anode, addition of polycationic polymers enables charging without Zn deposition), 1000
Silver migration and transport mechanism studies in silver oxide-zinc batteries. Quarterly progress report No. 2, 1 Mar-1 Jun 1964 (Effect of surfactants in electrolyte), 1722 (AD-601471)
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
SILVER-ZINC BATTERIES/ELECTROMOTIVE FORCE
Thermal coefficients of emf of the Ag(I) and Ag(II) oxide-zinc-45% KOH systems (25 to 65 C), 2634
SILVER-ZINC BATTERIES/ELECTRONIC CIRCUITS
Development of single-cell protectors for sealed silver-zinc cells. Phase 1. Final report, Apr 1975-Apr 1976, 3236 (N-76-32651)
SILVER-ZINC BATTERIES/FABRICATION
Alkaline cell (Patent; Zn anode and alkaline electrolyte) 1036
Battery system of the Aeros satellite, 1260
Construction of 850 and 4,000 ampere-hour silver--zinc cells using inorganic separator. Final report, Jul 1972--Oct 1973, 699 (N-74-17798)
Development and fabrication of sealed silver--zinc cells, Phase 1. Final report, 698 (N-74-17791)
Electric batteries from recent patents, 1577
Fabrication and testing of sealed silver-zinc cells. Final report, 2099 (N-76-27673)
Flat alkaline cell construction and method for assembling the same (Patent), 1031
Hermetic standby silver--zinc storage battery (Electrochemical absorber of H based on NiO(OH) system) 1112
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 10, 279 (AD-471950)
Manufacture and use of storage batteries, 1614
Possibilities for increasing the technical level and specific weight and volumetric electrical rating characteristics of chemical sources of current, 1460 (AD-777665)
Progress in development of heat-sterilizable Ag-Zn battery, 1469
Standard line rechargeable battery, silver-zinc BB519/U. Final report Jul 1973-Jan 1975 (25 Ah), 586 (AD-A-020365)
Study of oxygen gas production phenomenon during stand and discharge in silver-zinc batteries. Final report, 703 (N-74-34545)
SILVER-ZINC BATTERIES/FAILURES
Alkaline battery evaluation. Report for Apr 1962-15 Oct 1964, 1672 (AD-465888)
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 1, 15 May-15 Aug 1964, 1642 (AD-447480)
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 2, 15 Aug-15 Nov 1964, 1730 (AD-608666)
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 3, 15 Nov 1964-15 Feb 1965, 1732 (AD-611850)
Alkaline cell evaluation and analysis. Quarterly technical progress report No. 5, 15 May-15 Aug 1965,

1690 (AD-472416)
Failure mechanisms in sealed batteries. Semiannual technical summary report No. 1, 30 June-31 December 1966, 1855 (AD-813731)
Failure mechanisms in sealed batteries. Final technical report, 1 July 1966-30 April 1969, 1620 (AD-85592)
Failure mechanisms in sealed batteries. Semiannual technical report No. 3, July-31 December 1967, 1866 (AD-831437)
Failure mechanisms in sealed batteries. Part IV. Semiannual technical report No. 4, 1 January-30 June 1968, 1884 (AD-848981)
Failure mechanisms and analyses of sealed batteries. Technical report, 1 February 1968-30 April 1969, 1896 (AD-859690)
SILVER-ZINC BATTERIES/FORECASTING
General state of advancement of battery technology, 2629
Progress in electric battery industry, 231
SILVER-ZINC BATTERIES/GASES
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 1, 1 Jul-30 Sep 1963 (Pressure increase during discharged stand; evaluation of several materials as separators), 253 (AD-432195)
Sealed silver-zinc batteries (Pressure rise due to gas build-up), 1539
Sealing of silver oxide-zinc storage cells (Pressure control by means of miniature hybrid fuel cells), 3242 (NASA-CR-94104)
Study of oxygen gas production phenomenon during stand and discharge in silver-zinc batteries. Final report, 703 (N-74-34545)
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981
SILVER-ZINC BATTERIES/HAZARDS
Hazards associated with silver-zinc batteries (Tests conducted on 33-, 300-, and 350-A-h primary batteries), 2291
SILVER-ZINC BATTERIES/HEATERS
Activator investigation for a silver oxide-zinc battery. Summary report No. 2 (Radioisotope heat source for use between -65° and +125°F), 3012 (AD-824307)
SILVER-ZINC BATTERIES/HEATING
Chemical heating for automatically activated batteries, 1528
Heat dissipation of primary and secondary batteries (30-Ah Ni--Cd, 360-Ah Ag--Zn), 2584
Heat generation in sealed batteries, 2520
Heat generation in sealed batteries, 2477
Heat liberation during the operation of silver--zinc and silver--cadmium storage batteries, 2277
Theoretical evaluation of hot spot temperature of silver-zinc batteries, 2521
SILVER-ZINC BATTERIES/HYBRID SYSTEMS
Spacelab power supply systems (7 kw continuous 12 kw peak fuel cell with Ag--Zn battery), 994
SILVER-ZINC BATTERIES/IMPEDANCE
Impedance of silver oxide-zinc cells. (Transient voltage characteristics after storage up to 10 months), 2176
SILVER-ZINC BATTERIES/LIFETIME
Applied research investigation of sealed silver-zinc batteries (Study of ZnO/Ag ratio and electrolyte composition), 316 (AD-603023)
Silver migration and transport mechanism studies in silver oxide-zinc batteries. Quarterly progress report No. 2, 1 Mar-1 Jun 1964 (Effect of surfactants in electrolyte), 1722 (AD-601471)
SILVER-ZINC BATTERIES/MAINTENANCE
Silver--zinc battery maintenance and casualty protection. Final report, 1954 (AD-910631L)
SILVER-ZINC BATTERIES/MASS TRANSFER
Factor affecting transport of silver in silver-alkaline battery, 2588
SILVER-ZINC BATTERIES/MATERIALS
Battery materials, 1970, 4427
Trends in usage of silver. Annual report, 3023 (AD-832582)
SILVER-ZINC BATTERIES/MATHEMATICAL MODELS
Silver zinc secondary battery reliability, 2543
SILVER-ZINC BATTERIES/MEETINGS
Power sources conference (22nd annual) held 14-16 May 1968. Proceedings, 41 (AD-696427)
Space power systems: energy storage (6th Esro Summer School, Noordwijk, Netherlands, 1968), 86 (N-70-26430)
Zinc-silver oxide batteries, 199
SILVER-ZINC BATTERIES/NONDESTRUCTIVE TESTING
Battery workshop, 2054 (N-67-26364)
Design, Development, qualification, and testing of battery BA-494( )/U. Final report, Mar 1964-Jan 1965, 1655 (AD-457141)
SILVER-ZINC BATTERIES/OPERATION
850 and 4000 A.h. secondary silver--zinc cells. Engineering report (final) (Activation of cells), 1825 (AD-761186)
Aircraft storage batteries, 2637
Batteries for biotelemetry and other applications, 1477
Electrochemical energy sources, 2618
Low-temperature operation of batteries. Final report, 15 May 1962-14 Jul 1964, 1648 (AD-451940)
Modern cells and batteries used in communications equipment, 2713
Silver--zinc battery maintenance and casualty protection. Final report, 1954 (AD-910631L)
Silver-zinc accumulator (High output, small size), 2694
SILVER-ZINC BATTERIES/OPTIMIZATION
Biosatellite fuel cell/battery power system., 1424
SILVER-ZINC BATTERIES/PERFORMANCE
Analysis of type I-C batteries (Equations interrelating, current, temperature, voltage, and Ah), 1698 (AD-480240)
Batteries for undersea applications, 1465
Battery assembly, missile electrical power subsystem, GAM-87A, 1621 (AD-355102)
Characteristics of lead acid and silver--zinc batteries in the deep ocean environment (Pressure-compensated batteries), 2354
Design, testing, and flight performance of the Mariner Mars 1969 spacecraft batteries, 2456
Development of stable zinc electrodes and inorganic separators for use in submarine type silver--zinc cells. Interim report 15 Mar 1973--15 Mar 1974, 1994 (AD-919148L)
Development of silver--zinc cell with inorganic separator, 1397
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 2, 1 Oct-30 Dec 1963 (12 Ah), 311 (AD-600395)
Diode control research. Quarterly progress report No. 6, 1 September-1 December 1967 (Stabistor charge control), 1862 (AD-825660)
Effect of alternating current on the properties of silver--zinc storage batteries (Discharge capacity), 2292
Effect of surfactant additions to zinc plate on cycle life performance of secondary silver oxide-zinc cells (25-Ah cells), 2524
Effect of high pressure on the voltage and current output of silver oxide-zinc and mercury oxide-zinc miniature batteries, 2475
Effect of the design parameters on the capacitive characteristics of the silver zinc storage batteries when charged by asymmetrical alternating current, 2439
Engineering evaluation of zinc--silver oxide battery BB-622B/U used with radar set AN/PPS-5. Technical report, 1775 (AD-700959)
Evaluation of the silver-zinc battery as a power source for the infrared weaponsight under extreme cold weather operating conditions (6V, 28 Ah), 1649 (AD-453083)
Evaluation of first silver zinc batteries used in deep submergence (40 Wh/lb), 2429
Fast-charge power supply (Quickly chargeable (<5 s) battery for fuzes for cannons or rockets), 468 (AD-821594)
Gravity field effects in zinc anode discharge in alkaline media, 2617
Heat sterilizable battery, 1489
Hermetic standby silver--zinc storage battery (Electrochemical absorber of H based on NiO(OH) system) 1112
Hermetically sealed silver-zinc storage battery operating in the silver(I) oxide ($Ag_2O$) phase, 2341
High energy density, long life zinc--silver oxide secondary battery BB-534( )/U (engineering evaluation), 1778 (AD-708866)
Improved Army silver--zinc batteries (Improvements in uncharged long-life type), 1473
Improved Army silver-zinc batteries (Activation time reduced to 72 hours), 380 (AD-681203)
Investigation on silver-zinc storage battery with radioactive $^{65}Zn$ isotope, 2621
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 2, 1 Mar-1 Jun 1966, 1702 (AD-484279)
Latest battery improvements and mathematical techniques for their selection, 2582
Long life zinc silver-oxide cells (Improved Zn electrode structures and inorganic separators), 2283
One watt 30-day plus power sources. Research paper (Comparison of silver-zinc batteries, zinc-air batteries, hydrogen fuel cells, and solar cells), 1762 (AD-675936)
Rechargeable pile type silver zinc battery investigations for use in high power airborne applications (2 A/in.$^2$, 4 MW), 2248
Review of battery systems for electrically powered vehicles, 2527
Sealed silver oxide zinc cells for orbiting and planetary missions, 2378
Sealed zinc-silver oxide batteries. Part 1 (Development of high-performance cells), 1527
Sealed zinc-silver oxide batteries. Part 2, 2574
Sealed zinc--silver oxide secondary batteries, 1571
Sealed zinc--silver oxide batteries (Development), 1560
Self-discharge of silver-zinc storage batteries, 2433
Silver--zinc battery power for deep ocean vehicles (35 to 120 kW-hr), 2353
Silver oxide batteries: present and future, 369 (AD-671685)
Silver-zinc electrodes and separator research. Quarterly technical progress report No. 2, 1 Oct 1966-1 Jan 1967 (Effects of additives on cycle life performance), 2990 (AD-805413)

Silver-zinc storage battery (Characteristics of batteries made in Czechoslovakia), 2566 (AD-622423)
Silver-zinc battery characteristic report (Effects of partial charges, shorts, improper filling, contaminated electrolytes, etc.), 2021 (AD-A-027770)
Standard army cell performance (Development and testing), 1472
Standard Agena program load sharing characteristics between IH, IC, ID, and VI cells and capacity testing on IH cells. Final report, 1710 (AD-488119)
Studies of available energies in Ni-Cd, Ag-Zn, and Ag-Cd batteries, 1759 (AD-671685)

SILVER-ZINC BATTERIES/PERFORMANCE TESTING
Alkaline battery evaluation. Final report, 30 Jun 1960-15 Mar 1964 (12- and 20-Ah Ni/Cd, 25-Ah Ag/Zn, and 20-Ah Ag/Cd cells), 1724 (AD-602676)
Apollo entry and post landing battery. Quarterly test report, 1659 (AD-458119)
Battery, silver-zinc (Eagle-Picher number 1525 and number 1525R) life and performance evaluation, 1848 (AD-802386)
Battery, Yardney Silvercel HR-85: environmental evaluation, 1844 (AD-801655)
Cell capacities and life cycling capabilities versus storage time and temperature [for] sealed silver secondary cells, 1902 (AD-870855)
Charge-discharge characteristics of silver oxide-zinc alkaline storage battery, 2447
Cycle life test. Evaluation program for secondary spacecraft cells. Annual report, 2096 (N-76-26687)
Design of standard line of vented silver-zinc batteries. Quarterly report No. 2, 10 April-9 July 1967 (Conformity to specifications), 1757 (AD-663793)
Development of the sealed zinc-silver oxide secondary battery system. Quarterly progress report No. 4, 1 Apr-30 Jun 1964 (12 Ah), 266 (AD-453792)
Diode control research. Final report, May 1966-15 July 1969 (Method for fast evaluation of cells for use in stabistor diode-controlled batteries capable of high-rate charging), 3054 (AD-861077)
Engineering evaluation of aircraft batteries. Research and development technical report, 1796 (AD-733289)
Evaluation of secondary batteries, 2600
Evaluation program for secondary spacecraft cells. Annual report No. 10; report on cycle life test, 1838 (AD-781835)
Evaluation program for secondary spacecraft cells. Acceptance test of McDonnell--Douglas Astropower Division 40.0 ampere-hour silver--zinc cells, 1798 (AD-734694)
Evaluation program for secondary spacecraft cells. Annual report No. 8, 1802 (AD-738880)
Evaluation program for secondary spacecraft cells. Annual report No. 7, 1786 (AD-718854)
Evaluation program for secondary spacecraft cells. Acceptance test of McDonnell-Douglas, Astropower Division 5.0 ampere-hour silver-zinc cells, 1901 (AD-869422)
Evaluation program for secondary spacecraft cells. Fifth annual report of cycle life test, 1890 (AD-852580)
Evaluation program for secondary spacecraft cells. Acceptance test of McDonnell Douglas, Astropower Division 5.0 ampere-hour silver-zinc cells, 1895 (AD-859323)
Evaluation of foreign S-12 silver-zinc cells, 1755 (AD-662737)
Fabrication and test of inorganic/organic separators. Final report, Nov 1972-Jan 1974, 3220 (N-74-26511)
Fabrication and testing of sealed silver-zinc cells. Final report, 2099 (N-76-27673)
Final technical report for BA 494 /U, 2023 (AD-A-035722)
High energy density long life secondary silver--zinc batteries, 1423
High energy density, long life Zn-AgO secondary battery BB-534( )/U (Assembly of four 9.0-A, 4-cell blocks into 24-v batteries), 1425
Initial report of evaluation of sealed silver oxide-zinc batteries, 1639 (AD-441821)
Progress in development of heat-sterilizable Ag-Zn battery, 1469
Qual. testing of Martin Co. battery, part No. PS940300011-001, 1646 (AD-448883)
Qualification of 28V-5 amp. hr. battery, 1650 (AD-454328)
Qualification testing of United Technology Center battery UTC P/N 4T4506, Yardney P/N 61403, 1651 (AD-454684)
Sealed zinc-silver oxide batteries, 2601
Sealed zinc-silver oxide batteries, 1555
Sealed zinc--silver oxide batteries. II, 2578
Sealed zinc-silver batteries (Problems, current status, research areas, forecast), 372 (AD-671685)
Standard deviation and acceptance sampling of silver--zinc storage batteries. Final report (Statistically sound method for battery accpetance), 1957 (AD-910972L)
The electrical performance of Ag/Zn batteries for the Venus multi-probe mission, 2090 (N-75-32588)

SILVER-ZINC BATTERIES/PHYSICAL RADIATION EFFECTS
Alkaline battery evaluation. Report for Apr 1962-15 Oct 1964, 1672 (AD-465888)

SILVER-ZINC BATTERIES/PLANNING
Standard line of secondary batteries (6, 12, and 24 V, 3.5 to 220 Ah), 265 (AD-452481)

SILVER-ZINC BATTERIES/PLATES
Influence of membrane transport characteristics on electrolyte concentration and consequent plate performance, 1898 (AD-862540)
Laboratory investigation and engineering design leading towards the development of a lightweight secondary or primary cell type battery for one-shot application. Quarterly report No. 9, 278 (AD-471947)

SILVER-ZINC BATTERIES/PRESSURE CONTROL
Sealing of silver oxide-zinc storage cells. Final report (Use of miniature fuel cells to control pressure in sealed silver oxide-zinc batteries), 3197 (N-69-12309)
Sealing of silver oxide-zinc storage cells (Pressure control by means of miniature hybrid fuel cells), 3242 (NASA-CR-94104)
Sealing of silver oxide-zinc storage cells. Quarterly report, June 23-September 23, 1967 (Miniature hybrid fuel cells for pressure control), 3192 (N-68-11839)
Sealing of silver oxide-zinc storage cells. Quarterly report, 23 September-23 December 1967 (Micro fuel cells for pressure control), 3193 (N-68-16346)
Sealing of silver oxide-zinc storage cells. Quarterly report, 23 December 1967-23 March 1968 (Miniature hybrid fuel cells for pressure control), 3195 (N-68-27645)

SILVER-ZINC BATTERIES/PRODUCTION
Possibilities for increasing the technical level and specific weight and volumetric electrical rating characteristics of chemical sources of current, 438 (AD-777665)

SILVER-ZINC BATTERIES/RADIATION EFFECTS
Nuclear radiation effects test on thermal and silver-zinc batteries (Neutrons and γ rays), 1624 (AD-373708)

SILVER-ZINC BATTERIES/RELIABILITY
LM descent stage battery sample cells manufactured by Eagle-Picher, 1909 (AD-900508L)
Reliability problem of the multi-element chemical power sources, 2404
Silver zinc secondary battery reliability, 2543

SILVER-ZINC BATTERIES/RESEARCH PROGRAMS
Recent progress in secondary batteries (U.S. and Europe), 1576

SILVER-ZINC BATTERIES/REVIEWS
Applied electrochemistry (Book in Russian), 167
Chemical compositions, structures, performance, and uses of batteries; (review with 108 references), 233
Development of silver--zinc and silver--cadmium batteries, 1111
Primary and secondary galvanic cells: history and state-of-the-art summary, 29 (AD-671685)
Secondary silver-zinc battery technology, 1448
Zinc--silver oxide batteries, 46 (AD-717497)

SILVER-ZINC BATTERIES/SEALS
Alkaline battery seal and protective coating comprising a fatty acidamide (Patent), 3484
Battery having deformations in a metal layer (Patent; avoids wrinkles occurring during fabrication), 864
Nonleaking battery terminals (KOH electrolytes), 4268
Weapon system 107A-1. Mark 3 advanced re-entry vehicle program. Chemical energy sources. Final summary report, 312 (AD-600634)

SILVER-ZINC BATTERIES/SPECIFICATIONS
Battery, 28 volt, remotely activated, hermetically sealed, dual section, 1644 (AD-448165)
Battery, spacecraft storage, silver oxide-zinc, 29 volt, 257 (AD-435366)
Battery, spacecraft, pyrotechnic, silver oxide-zinc, 267 (AD-457647)
Battery, spacecraft storage, silver oxide-zinc, 29 volt, 269 (AD-458178)
Battery rechargeable, manually activated, 264 (AD-446604)

SILVER-ZINC BATTERIES/STORAGE
Self-discharge processes during the prolonged storage of silver--zinc current sources, 2312
Self-discharge of silver-zinc batteries filled with electrolyte, 2414 (AD/A-001498)
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981

SILVER-ZINC BATTERIES/TESTING
BuAer test silver-zinc aircraft battery (Can start jet aircraft engines several times on one charge), 2685
Charged wet storage test of zinc silver-oxide cells, 2284
Construction of 850 and 4,000 ampere-hour silver--zinc cells using inorganic separator. Final report, Jul 1972--Oct 1973, 699 (N-74-17798)
Design, testing, and flight performance of the Mariner Mars 1969 spacecraft batteries, 2456
Design of standard line of vented silver-zinc batteries. Quarterly report No. 3, 10 July-31 October 1967, 479 (AD-827683)
Heat sterilizable battery, 1489
Reduction of internal ohmic losses in power sources (AgO/KOH/Zn), 2533
Report of the development testing of ESB model 264 batteries, 1658 (AD-457722)
Sealed silver oxide zinc cells for orbiting and planetary missions, 2378
Selection and utilization of batteries for deep submergence vehicles (Characteristics, design of container system, tests to 2700 psi), 2517
State of charge determination for aerospace batteries.

Final report, Oct 1973-Aug 1975, 2016 (AD-A-019480)
Versatile silver oxide--zinc battery for synchronous orbit and planetary missions, 1303
SILVER-ZINC BATTERIES/THERMODYNAMIC PROPERTIES
Accurate calculations of thermodynamic characteristics of silver-cadmium and silver-zinc storage batteries (E, dE/dT, $\Delta H^o$, $\Delta G^o$), 2262
Thermal properties and behavior of nickel-cadmium and silver-zinc cells and their components, 1874 (AD-834300)
SILVER-ZINC BATTERIES/USES
Battery-power passenger cars, and van powered by fuel cell, 5287
Electric car: world survey, 5130
Investigation of power sources for manpack equipment. Final technical report for 24 Feb-24 Aug 1964 (10, 25, and 100 W), 4831 (AD-610104)
NEMO provides new look at ocean depths, 5229
NEMO provides new look at ocean depths, 5230
Portable, self-contained digital thermometer. Report for Feb-Sep 1969, 407 (AD-735662)
Power for underwater vehicles and systems, 5315
Promise and potential of electric automobiles, 5278
Rivals of piston engine vie for automotive market, 5289
Some deep sea vehicle personnel hulls and energy storage subsystems, 4837 (AD-717950)
SILVER-ZINC BATTERIES/VENTS
Pressure vent-sealed primary and secondary alkaline cells (Patent; thermoplastic, polyamides, silicone, etc.), 3320
SKYLAB/NICKEL-CADMIUM BATTERIES
Experimental investigation and model development of the skylab ATM secondary nickel--cadmium batteries, 2102 (NASA-CR-120749)
Nickel--cadmium batteries for Apollo telescope mount, 2101 (NASA-CR-120747)
Nickel-cadmium battery performance prediction models. Apollo telescope mount application, 2349
SNAP 8 REACTOR/SPACECRAFT POWER SUPPLIES
Auxiliary power generating system for a large space laboratory (Solar cells, batteries, and SNAP-8 systems), 4975 (N-64-28373)
SNAP BATTERIES
(Radioisotope batteries for Systems for Nuclear Auxiliary Power.)
SNAP BATTERIES/COST
Nuclear power systems for spacecraft (Weights, sizes, and costs of nuclear and nonnuclear spacecraft power systems with references to mission duration), 201
SNAP BATTERIES/WEIGHT
Nuclear power systems for spacecraft (Weights, sizes, and costs of nuclear and nonnuclear spacecraft power systems with references to mission duration), 201
SNAP REACTORS
(Systems for Nuclear Auxiliary Power. See also specific Snap Reactors, e.g. S10 Reactor.)
Comparative evaluation of power system types of undersea applications (Batteries, fuel cells, radioisotope batteries, and reactors), 1392
Computer analysis of space power systems for mission analysis, 210
SNAP REACTORS/ECONOMICS
Economic selection of undersea powerplants, 2495
SNAP REACTORS/PERFORMANCE
Research and investigation on satellite attitude control. Part III. Power sources, 1677 (AD-469206)
SNAP REACTORS/USES
Energy sources for marine technology, 5077
SODIUM/ABSORPTION SPECTROSCOPY
Determination of sodium and magnesium in β-aluminate materials by atomic absorption spectrophotometry, 4072
SODIUM ALLOYS/ELECTRIC CONDUCTIVITY
Electrical resistivity of K-Hg and Na-Hg systems and diffusivity of K-Hg system at high temperatures, 1532
SODIUM CHLORIDES/CHEMICAL REACTIONS
Structure of aluminum chloride--sodium chloride melts. Scientific report, 411 (AD-739353)
SODIUM COMPOUNDS/ELECTRIC CONDUCTIVITY
New solid conductors of $Na^+$ and $K^+$ ions ($NaTaWO_6$; $NaTa_2O_5F$; $NaSbO_3$; Na and K niobates), 3433
SODIUM FLUORIDES/ELECTRIC CONDUCTIVITY
Electrical conductivity measurements in anhydrous hydrogen fluoride, 4339
SODIUM HYDROXIDES/DENSITY
Viscosity, density, and electrical conductivity of aqueous NaOH solutions at low temperatures, 4451
SODIUM HYDROXIDES/ELECTRIC CONDUCTIVITY
Viscosity, density, and electrical conductivity of aqueous NaOH solutions at low temperatures, 4451
SODIUM HYDROXIDES/VISCOSITY
Viscosity, density, and electrical conductivity of aqueous NaOH solutions at low temperatures, 4451
SODIUM OXIDES/CHEMICAL PREPARATION
Growth of monocrystals of the gallium analog of β''-$Al_2O_3$ by $Na_2O$ evaporation, 3314
SODIUM OXIDES/DECOMPOSITION
Comparison of the thermal stability of a β- and β''-alumina at high pressures (5 to 50 kb, room temperature to 1400°C), 3325
SODIUM OXIDES/IONIC CONDUCTIVITY
Substructure and properties of sodium beta alumina solid electrolytes, 3149 (ANL-76-8)
Substructure and properties of sodium beta-alumina solid electrolytes. Interim report, June 1, 1975-May 31, 1976, 3188 (EPRI-EM-494)
SODIUM OXIDES/MICROSTRUCTURE
Substructure and properties of sodium beta alumina solid electrolytes, 3149 (ANL-76-8)
Substructure and properties of sodium beta-alumina solid electrolytes. Interim report, June 1, 1975-May 31, 1976, 3188 (EPRI-EM-494)
SODIUM OXIDES/SINTERING
Sintering processes and heat treatment schedules for conductive, lithia-stabilized β''-$al_2o_3$, 3330
SODIUM OXIDES/STABILITY
Comparison of the thermal stability of a β- and β''-alumina at high pressures (5 to 50 kb, room temperature to 1400°C), 3325
SODIUM SULFIDES/MELTING POINTS
Phase equilibrium diagram of the system sodium polysulfide ($Na_2S_4$)--sulfur, 2252
SODIUM SULFIDES/PHASE DIAGRAMS
Phase equilibrium diagram of the system $Na_2S_4$--S (73 to 100 percent S), 3874
Phase equilibrium diagram of the system sodium polysulfide ($Na_2S_4$)--sulfur, 2252
SODIUM-SULFUR BATTERIES
Energy conversion and storage technology: the sodium-sulfur battery, 1232
SODIUM-SULFUR BATTERIES/ANODES
Development program for solid electrolyte batteries. Final report, 1 January 1973-30 June 1974, 672 (EPRI-127-1)
Investigation into the immobilization of the sodium electrode in the sodium-sulfur battery, 3329
Research and development concerning the sodium-sulfur battery. Subproject: development of unconventional processes for the production of the β alumina solid electrolyte and development of the sodium electrode, 3164 (BMFT-FB-T-76-40)
Sodium as an electrical conductor: an annotated bibliography, 2999 (AD-812898)
Sodium borate glass compositions and batteries containing same (Patent), 3975
SODIUM-SULFUR BATTERIES/BATTERY CHARGING
Model for degradation of ceramic electrolytes in Na-S batteries, 3767
Process for recharging secondary batteries (Vapor transport of S during recharging improved by maintaining temperature gradient in cathodic reaction zone; patent), 2164
SODIUM-SULFUR BATTERIES/BATTERY SEPARATORS
Ceramics in advanced batteries, 3170 (CONF-751194-)
Determination of sodium and magnesium in β-aluminate materials by atomic absorption spectrophotometry, 4072
Phase equilibrium diagram of the system $Na_2S_4$--S, 3874
Reaction of the gallium analog of β''-alumina with water (Work to shed light on deterioration of b-alumina separators used in Na/S batteries), 3326
Separator for controlling alkali metal ion flow in an electrode-active material or electrolyte (Patent), 4166
Sintered alumina with good ion permeability properties (Patent), 4189
Sintering of β-aluminium oxide, 4079
Sodium borate--sodium halide glass (Patent), 3620
Sodium-sulfur cell with improved separator (Patent), 913
SODIUM-SULFUR BATTERIES/CATHODES
Alkali metal/sulfur cell with gas fuel cell electrode (Patent), 937
Alkali metal, sulfur battery or cell with single phase sulfur electrode (Patent; additive to cathodic reactant to improve charge/discharge capacity), 3338
Anodic evolution of sulphur from sodium polysulphide melts. I. Voltammetric measurements on planar carbon electrodes, 2142
Cathode cell casing portion, a cell casing, and a hermetically sealed sodium-sulfur cell (Patent), 3427
Ceramics in advanced batteries, 3170 (CONF-751194-)
Ceramics in the sodium-sulfur battery (Properties, requirements, fabrication, performance), 3172 (CONF-751194-)
Development program for solid electrolyte batteries. Final report, 1 January 1973-30 June 1974, 672 (EPRI-127-1)
Development of a compact, high-capacity $FeS_2$ electrode, 4139
Distribution of potential and electrochemical reaction rate in molten polysulphide electrodes, 4016
Electrical conductivity increasing agent for positive electrode mix of sodium--sulfur fuel cells (Patent; C cloth of 1.2 percent graphitization, 300 W/kg), 3753
Engineering evaluation of solid transition-metal sulfide electrodes for use in high energy-density batteries, 3191 (LBL-5186)
Engineering evaluation of solid transition-metal sulfide electrodes for use in high energy-density batteries, 3465
Improvements of electrolyte and seal technology for sodium-sulfur and sodium antimony trichloride load leveling batteries. Final report, 3187 (EPRI-EM-413(6-77))
Metallic sulfide additives for positive electrode material within a secondary electrochemical cell (Patent; Fe sulfide electrode with sulfide additives of Co, Ni, Cu, Ce, Mn), 3366
Review of the kinetics of the sulfur electrode in molten

sodium polysulfide, 3155 (ANL-76-8)
Secondary battery or cell with dual electrode (Patent; alkali metal/S, usually Na/S), 842
Secondary battery with separate charge and discharge zones (Patent; alkali metal/sulfur), 832
Secondary battery or cell (Patent; additive to cathodic reactant to improve charge/discharge capacity), 3337
Sodium--sulfur storage battery (Patent), 3616
Sodium sulphur cells (Carbon tube with solid metal core and liquid metal interface; patent), 3380
Sulfur-sulfide electrode in molten salts. I. *Chronopotentiometric behavior in lithium chloride-potassium chloride eutectic*, 3482
Transient response of the sulfur/polysulfide electrode based on a varying concentration model, 3328
SODIUM-SULFUR BATTERIES/CHEMICAL REACTION KINETICS
Review of the kinetics of the sulfur electrode in molten sodium polysulfide, 3155 (ANL-76-8)
SODIUM-SULFUR BATTERIES/CHEMICAL REACTIONS
High-temperature batteries, 610 (ANL-76-8)
Phase equilibrium diagram of the system sodium polysulfide ($Na_2S_x$)--sulfur (Study of build-up of Na sulfides at β-alumina--S interface), 2252
SODIUM-SULFUR BATTERIES/COMPARATIVE EVALUATIONS
Batteries for electrocars, 2173
Battery power for electric vehicles. 2. Novel high-energy power sources, 1223
Metals: key to battery-powered auto, 4490
Na/S cell as a source of motive power for electric vehicles, 817
New assault on battery vehicles, 5103
SODIUM-SULFUR BATTERIES/CONTAINERS
Battery casing and hermetically sealed sodium-sulfur battery (Patent), 4029
Cathode cell casing portion, a cell casing, and a hermetically sealed sodium-sulfur cell (Patent), 3427
Development of sodium/sulfur - cells (MgO-dope β-alumina tubular electrolyte), 895
Polarization and corrosion experiments on sodium-sulphur cells, 2245
SODIUM-SULFUR BATTERIES/COOLING
Heat removal from large batteries for load leveling, 5133
SODIUM-SULFUR BATTERIES/CORROSION
Case for electric and fuel-cell powered vehicles, 5139
Corrosion and related problems in high-temperature cells, 1257
Polarization and corrosion experiments on sodium-sulphur cells, 2245
SODIUM-SULFUR BATTERIES/CORROSION PROTECTION
Electrochemical storage cell or battery (Patent; wall corrosion minimized by screening electrode in cathode chamber), 789
SODIUM-SULFUR BATTERIES/DESIGN
Advanced battery design, 1012
Alkali metal/sulfur cell with gas fuel cell electrode (Patent), 937
Alkali metal/sulfur cell (Patent), 835
Alkali metal-sulfur cells (Patent; tubular form), 3298
Analysis of the sodium-sulfur battery in tractive power applications, 650 (CONF-711166-)
Application of the Ford sodium-sulfur battery in electric vehicles, 127
Cell casing with a hermetical mechanical seal and a hermetically sealed sodium-sulfur cell (Patent), 1048
Chemical generation of electrical energy (Patent), 931
*Current status and prospects of the Zn-air and Na-S batteries in France*, 609 (ANL-76-8)
Description of promising sodium-sulfur battery operating at 300C, 1501
Development of Na/S battery for electric vehicles, 1491
Development of sodium--sulfur secondary battery, 1492
Development program for solid electrolyte batteries. Interim report, 729 (PB-248326)
Development of sodium-sulfur batteries for utility application. Annual report, 674 (EPRI-EM-266)
Dow sodium--sulfur battery (Na/glass/S, 100 W-hr/lb), 1349
Electric cars: hope springs eternal (Problems in design and engineering of power sources), 5273
Electric cells (Patent; liquid cathode and anode, sodium contained in reservoir except for small amount needed for reaction as safety feature), 790
Electrochemical cells having a liquid alkali metal electrode (Patent; capillary means to draw liquid metal over one face of solid electrolyte), 907
Electrochemical cells having a liquid alkali metal electrode and solid electrolyte (Patent; reservoir above solid electrolyte tube to hold increasing volume of cathodic reactant), 876
Electrochemical storage cell or battery (Patent; wall corrosion minimized by screening electrode in cathode chamber), 789
Energy conversion devices with improved electrode shapes (Patent), 849
*Expansion chamber arrangement in sodium-sulfur cells* (Patent), 1137
Investigation of high temperature battery systems. Final report, 1 Jul 1974-31 Aug 1975 (10A for 2h, 100 cycles, 110 W/kg and 110 Wh/kg), 585 (AD-A-020164)
Modular electrochemical cell (Li or Na/LiF--LiCl--KCl/S, As, C mixture; patent), 960
Na/S-batteries as an energy source for electrical vehicles, 76 (CONF-741151-)
New design for the high-performance sodium-sulfur battery, 822
Patent, 1275
Patent; battery comprising double vessel with thermal insulating layer, 1182
Patent; concentric tubes, 1193
Patent; design of Na--S battery with no S--metal corrosion problem, 927
Patent; Na reservoir separated from β-alumina cup for improved safety, 1014
Research and development on the glass fiber sodium--sulfur battery. Semi-annual technical report, 445 (AD-782059)
Secondary battery or cell with dual electrode (Patent; alkali metal/S, usually Na/S), 842
Secondary battery with separate charge and discharge zones (Patent; alkali metal/sulfur), 832
Sodium--sulfur battery (Patent; stainless steel wire gauge to ensure Na contact with β--$Al_2O_3$ electrolyte), 1196
Sodium--sulfur battery (Patent; liquid Na and S, solid β-alumina, gas-tight, 350°), 1169
Sodium--sulfur battery (Patent; large number of anodic and cathodic chambers), 1188
Sodium--sulfur battery (Patent), 982
Sodium--sulfur cell (Patent; alumina electrolyte with $Na_2O$ and CaO), 996
Sodium-mixture of metal halides, sulfur battery (Patent; Na/sodium haloaluminate/sulfur + mixed halides with dispersed C powder), 838
*Sodium-sulfur batteries* (Configuration and calculated operation), 1343
Sodium/sulphur batteries for rail traction (Development studies), 1092
Sodium sulfur storage battery (Patent), 1173
Sodium-sulfur cell with improved separator (Patent), 913
Sodium sulfur battery or cell with improved ampere-hour capacity, 862
Sodium/sulfur battery: a progress report (Fabrication of β''-$Al_2O_3$ elctrolyte), 613 (ANL-76-8)
Sodium-sulphur battery cells (Patent), 845
*Sodium/sulfur battery development in the United Kingdom* (Sulfur contained in electrolyte tube), 896
Sodium-sulfur storage battery (Patent), 795
Sodium-sulfur battery or cell with external storage (Of electrolyte; patent), 778
Sodium-sulfur type electric cell (Patent; cathode may also be P or Se, capable of complete recharging), 780
Sodium-sulfur electric batteries with ceramic spacer in sulfur compartment (Patent; spacer placed adjacent materials subject to electrochemical attack), 3280
Solid electrolyte battery (Uses compressed inert gas to maintain constant anode area, hence steady power output), 1165
Solid electrolyte battery (Steady power output by using compressed inert gas to maintain constant anode area), 1166
Solid-electrolyte battery, particularly for the storage of electrical energy (Patent; also relevant to fuel cells), 776
Some UK progress in sodium-sulfur technology, 823
Sulfur--sodium battery (Patent), 1144
Tubular sodium-sulfur battery (patent), 885
SODIUM-SULFUR BATTERIES/ECONOMICS
Electric cars: hope springs eternal (Problems in design and engineering of power sources), 5273
SODIUM-SULFUR BATTERIES/ELECTRIC CONDUCTORS
Ceramics in the sodium-sulfur battery (Properties, requirements, fabrication, performance), 3172 (CONF-751194-)
SODIUM-SULFUR BATTERIES/ELECTRIC POTENTIAL
Inorganic electrolyte based, room temperature, lithium/chlorine, sodium/chlorine, lithium/sulfur, sodium/sulfur, and lithium/cupric fluoride cells, 1358
SODIUM-SULFUR BATTERIES/ELECTROCHEMISTRY
Anodic evolution of sulphur from sodium polysulphide melts. I. Voltammetric measurements on planar *carbon electrodes*, 2142
Sodium-sulfur battery, 1128
SODIUM-SULFUR BATTERIES/ELECTRODES
Ford/ERDA sodium-sulfur battery development, Phase I. Final report, June 15, 1975-March 31, 1976, 752 (TID-27055)
Method of preparing electrodes with porous current collector structures and solid reactants for secondary electrochemical cells (Patent), 3657
Performance of shaped graphite electrodes in sodium sulfur cells, 3160 (ANL-76-8)
*Porous carbonaceous electrode structure and method for* secondary electrochemical cell (Patent), 3311
Research on electrodes and electrolyte for the Ford sodium--sulfur battery. Quarterly report, 30 Jun--30 Sep 1973, 3217 (N-74-19713)
Research on electrodes and electrolyte for the Ford sodium--sulfur battery. Quarterly report, 1 Jan-31 Mar 1974, 3251 (PB-234561)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Quarterly report covering the period January 1, 1974 to March 31, 19754, 723 (PB-234561)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Quarterly report covering the period January 1, 1974 to March 31, 19754, 3252 (PB-

234561)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Quarterly report, June 30, 1973-September 30, 1973, 3247 (NSF/RA/N-73-109)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Annual report, 30 June 1973-29 June 1974, 3253 (PB-235484)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Annual report, 30 Jun 1974-29 Jun 1975, 3255 (PB-244289)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Semiannual report, 30 Jun-30 Dec 1975, 3261 (PB-252827)
Research on electrodes and electrolyte for Ford sodium-sulfur battery. Appendix a. List of research contributors. Report for 30 Jun 1974-29 Jun 1975, 3256 (PB-244290)
Secondary battery or cell with composite electrode (Patent; separate portions of electrode optimized for charging and discharging), 3365
Sintering processes and heat treatment schedules for conductive, lithia-stabilized $\beta''$-$al_2o_3$, 3330

SODIUM-SULFUR BATTERIES/ELECTROLYSIS
Development of sodium-sulfur batteries for utility application. Annual report, 674 (EPRI-EM-266)

SODIUM-SULFUR BATTERIES/ELECTROLYTES
β-alumina sintered matter for solid electrolyte (Chemical preparation), 3980
β-alumina solid electrolyte (Patent; preparation), 3758
β-alumina electrolyte (Patent), 3695
Alkali metal ion-conductive solid electrolyte (Patent; preparation), 3744
Alumina solid electrolyte for secondary batteries (Patent; fabrication), 3736
Beta alumina ceramic (Chemical preparation), 3877
Cell is used as energy source of wrist-watches (Patent), 3621
Ceramics in advanced batteries, 3170 (CONF-751194-)
Ceramics in the sodium-sulfur battery (Properties, requirements, fabrication, performance), 3172 (CONF-751194-)
Comparison of the thermal stability of a β- and $\beta''$-alumina at high pressures, 3325
Conductive ceramics for use in the sodium-sulfur battery ($Al_2O_3$ with 8.5 to 10% $Na_2O$ and 0.6 to 1.1% $Li_2O$), 3841
Conductivity of beta-alumina and its dependence on sodium and magnesium content, 4225
Deterioration in ceramic electrolytes for sodium-sulfur batteries, 3629
Deterioration in ceramic electrolytes for sodium--sulfur batteries (Screening test for electrolyte evaluation), 3777
Development program for solid electrolyte batteries. Final report, 1 January 1973-30 June 1974, 672 (EPRI-127-1)
Development program for solid electrolyte batteries. Final report, 1 January 1973-30 June 1974, 3254 (PB-238691)
Development of sodium/sulfur - cells (MgO-dope β-alumina tubular electrolyte), 895
Factors influencing the lifetime of pure β-alumina electrolyte (Na/S and Na/Na cells, charge transfer of 1700 A-hr/$cm^2$), 3779
Function and performance of beta alumina in sodium/sulfur cells, 3817
Hot pressed beta-alumina for sodium-sulfur batteries (Production, performance), 4047
Hot pressed beta alumina for sodium--sulfur batteries (Expected achievements: 50 W/lb, 50-W-hr/lb, 20 A-hr, 100 cycles), 4105
Improvements of electrolyte and seal technology for sodium-sulfur and sodium antimony trichloride load leveling batteries. Final report, 3187 (EPRI-EM-413(6-77))
Ionic conduction in beta-alumina. Interim technical report No. 6, 8 Feb-8 Aug 1969, 2926 (AD-702938)
Ionic superconductors (review of applications), 3776
Model for degradation of ceramic electrolytes in Na-S batteries, 3767
New solid conductors of $Na^+$ and $K^+$ ions ($NaTaWO_6$; $NaTa_2O_5F$; $NaSbO_3$; Na and K niobates), 3433
Optimization of MgO-doped β-$Al_2O_3$ with respect to electrical conductivity, 3150 (ANL-76-8)
Performance of β-alumina ceramic electrolyte in sodium-sulfur cells (30 A current capacity), 4370
Preparation and properties of beta-alumina/glass composites. Final report, 3263 (PB-255549)
Producing β-alumina electrolytes (Patent), 4314
Research and development concerning the sodium-sulfur battery. Subproject: development of unconventional processes for the production of the β alumina solid electrolyte and development of the sodium electrode, 3164 (BMFT-FB-T-76-40)
Research on electrodes and electrolyte for the Ford sodium--sulfur battery. Quarterly report, 30 Jun--30 Sep 1973, 3217 (N-74-19713)
Research on electrodes and electrolyte for the Ford sodium--sulfur battery. Quarterly report, 1 Jan-31 Mar 1974, 3251 (PB-234561)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Quarterly report, June 30, 1973-September 30, 1973, 3247 (NSF/RA/N-73-109)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Annual report, 30 June 1973-29 June 1974, 3253 (PB-235484)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Annual report, 30 Jun 1974-29 Jun 1975, 3255 (PB-244289)
Research on electrodes and electrolyte for the Ford sodium-sulfur battery. Semiannual report, 30 Jun-30 Dec 1975, 3261 (PB-252827)
Research on electrodes and electrolyte for Ford sodium-sulfur battery. Appendix a. List of research contributors. Report for 30 Jun 1974-29 Jun 1975, 3256 (PB-244290)
Sintering processes and heat treatment schedules for conductive, lithia-stabilized $\beta''$-$al_2o_3$, 3330
Sodium-sulfur battery development. Final report, 1 April 1973-30 April 1974, 673 (EPRI-128-0-0)
Sodium/sulfur battery: a progress report (Fabrication of $\beta''$-$Al_2O_3$ elctrolyte), 613 (ANL-76-8)
Solid electrolyte (Patent; β-alumina, fabrication), 3697
Solid electrolyte (Patent; improved electrolyte), 3698
Solid electrolytes and photoelectrolysis. Semiannual technical summary report, 1 Mar-31 Dec 1974 ($KSbO_3$, $NaSbO_3$), 3119 (AD-A-009145)
Solid electrolytes: alkali-ion transport in skeleton structures. Semiannual technical summary No. 2, 1 Jul-31 Dec 1975 (Compounds of for $Na_3Zr_2PSi_2O_{12}$), 3129 (AD-A-022199)
Solid electrolyte battery materials. Technical report, 3131 (AD-A-024658)
Solid electrolyte battery materials. Technical report, 3145 (AD-A-039899)
Some studies on sodium/sulfur cells (Magnesia-doped Na β-alumina electrolyte), 3358
Study of a beta-alumina electrolyte for sodium--sulfur battery, 4155
Study of a beta-alumina electrolyte for sodium--sulfur battery, 4156
Substructure and properties of sodium β-alumina solid electrolytes. Interim report, 3258 (PB-244648)
Substructure and properties of sodium beta alumina solid electrolytes, 3149 (ANL-76-8)
Substructure and properties of sodium beta alumina solid electrolytes. Interim report, June 1, 1974-May 31, 1975, 3183 (EPRI-252)
Substructure and properties of sodium beta-alumina solid electrolytes. Interim report, June 1, 1975-May 31, 1976, 3188 (EPRI-EM-494)

SODIUM-SULFUR BATTERIES/FABRICATION
Investigation of high temperature battery systems. Final technical report, 1 Jul 1972--31 Oct 1973, 701 (N-74-20708)
Investigation of high-temperature battery systems. Final technical report, 1 Jul 1972-31 Oct 1973, 436 (AD-774308)
Laboratory assessment of the sodium-sulfur battery (1.4 kWh), 2426
Sodium-sulfur battery development. Final report, 1 April 1973-30 April 1974, 673 (EPRI-128-0-0)
Sulfur--sodium storage batteries (Patent), 1292

SODIUM-SULFUR BATTERIES/FAILURES
Research and development in the glass fiber sodium-sulfur battery. Annual technical report, 2013 (AD-A-014474)

SODIUM-SULFUR BATTERIES/FEASIBILITY STUDIES
Development of electrochemical power sources for electric traction, 820

SODIUM-SULFUR BATTERIES/GEOMETRY
Sodium-sulfur test cell utilizing a β-alumina flat-plat separator, 1094

SODIUM-SULFUR BATTERIES/HEATING
Apparatus and method for maintaining batteries at operational temperature (Patent), 3924

SODIUM-SULFUR BATTERIES/MANUFACTURING
Sodium-sulfur electric cell and method of forming same (Patent), 779

SODIUM-SULFUR BATTERIES/MATERIALS
Corrosion and related problems in high-temperature cells, 1257

SODIUM-SULFUR BATTERIES/MEMBRANES
Sodium borate glass compositions and batteries containing same (Patent), 3975

SODIUM-SULFUR BATTERIES/PERFORMANCE
Analysis of the sodium-sulfur battery in tractive power applications, 650 (CONF-711166-)
Batteries and fuel cells (48 references), 2438
Batteries for energy storage, 890

Cycle-life study of sodium/beta-alumina/sulfur cell, 4267
Development of a potassium-sulfide glass fiber cell and studies on impurities in alkali metal-sulfur cells, 714 (N-77-23602)
Electrical performance of a prototype sodium--sulfur battery (15 A-h), 2380
Ford/ERDA sodium-sulfur battery development, Phase I. Final report, June 15, 1975-March 31, 1976, 752 (TID-27055)
High-temperature batteries, 610 (ANL-76-8)
Hot pressed beta alumina for sodium--sulfur batteries (Expected achievements: 50 W/lb, 50-W-hr/lb, 20 A-hr,

100 cycles), 4105
Progress in the development of the hollow fiber sodium-sulfur secondary cell (Fine glass fibers as electrolyte), 1093
Review of battery systems for electrically powered vehicles, 2527
Secondary batteries for electric vehicles, 4854 (ANL-76-8)
Sodium-sulfur battery development. Final report, 1 April 1973-30 April 1974, 673 (EPRI-128-0-0)
Some aspects of sodium--sulfur cell operation (β-alumina electrolyte), 4154
Transient response of the sulfur/polysulfide electrode based on a varying concentration model, 3328
Transportation. 2. Two for the road (220 Wh/kg and 220 W/kg), 5176
SODIUM-SULFUR BATTERIES/PERFORMANCE TESTING
Development program for solid electrolyte batteries. Final report, 1 January 1973-30 June 1974, 672 (EPRI-127-1)
Investigation of high temperature battery systems. Final report, 1 Jul 1974-31 Aug 1975 (10A for 2h, 100 cycles, 110 W/kg and 110 Wh/kg), 585 (AD-A-020164)
Sodium-sulfur battery development for bulk power storage. Interim report, 2104 (PB-246000)
Some studies on sodium/sulfur cells (Magnesia-doped Na β-alumina electrolyte), 3358
SODIUM-SULFUR BATTERIES/PLANNING
Development of the hollow fiber sodium--sulfur battery. Quarterly progress report 14 Oct 1971-14 Jan 1972 (Feasibility study), 547 (AD-909450L)
Recent development of the Ford sodium--sulfur battery, 1348
SODIUM-SULFUR BATTERIES/POLARIZATION
Polarization losses in sodium/sulfur cells, 2352
Polarization and corrosion experiments on sodium-sulphur cells, 2245
SODIUM-SULFUR BATTERIES/PRODUCTION
Sodium-sulfur battery and process for its production (Patent), 777
SODIUM-SULFUR BATTERIES/RESEARCH PROGRAMS
Comparison of U.S. and European high-temperature battery programs, 611 (ANL-76-8)
Development program for solid electrolyte batteries. Final report, 736 (PB-260719)
Research and development in the glass fiber sodium-sulfur battery. Semiannual technical report, 577 (AD-A-008849)
Research and development in the glass fiber sodium-sulfur battery. Semi-annual technical report (Dow Chemical, U.S.A., Walnut Creek, Calif.), 593 (AD-A-037215)
Research and development of the glass fiber sodium (Dow Chemical U.S.A., Walnut Creek, Calif.), 594 (AD-A-037216)
Research development in the glass fiber sodium-sulfur battery. Semi-annual report 1 Jul-31 Dec 1975 (Dow Chemical U.S.A., Walnut Creek, Calif.), 590 (AD-A-026359)
Sodium/sulfur advanced batteries, 80 (ERDA-76-136)
Sodium-sulphur battery system. Annual report, May 19, 1975-May 19, 1976 (Dow Chemical U.S.A.), 668 (COO-2565-4)
SODIUM-SULFUR BATTERIES/REVIEWS
Overview of the sodium--sulfur battery, 1104
Sodium--sulfur batteries, 140
SODIUM-SULFUR BATTERIES/SAFETY ENGINEERING
Sodium sulfur battery (Patent; minimized Na--S explosion hazard), 1004
SODIUM-SULFUR BATTERIES/SEALS
Alkali metal-sulfur cells (Patent; tubular form), 3298
Development program for solid electrolyte batteries. Final report, 1 January 1973-30 June 1974, 672 (EPRI-127-1)
Improvements of electrolyte and seal technology for sodium-sulfur and sodium antimony trichloride load leveling batteries. Final report, 3187 (EPRI-EM-413(6-77))
Insulating seal for molten salt battery (Patent), 3895
Mechanical seal for the sodium/sulfur cell (Operable at 350°C), 3161 (ANL-76-8)
Seal for energy conversion devices (Patent), 3377
SODIUM-SULFUR BATTERIES/TESTING
Development of sodium/sulfur - cells (MgO-dope β-alumina tubular electrolyte), 895
Investigation of high temperature battery systems. Final technical report, 1 Jul 1972--31 Oct 1973, 701 (N-74-20708)
Investigation of high-temperature battery systems. Final technical report, 1 Jul 1972-31 Oct 1973, 436 (AD-774308)
Laboratory assessment of the sodium-sulfur battery (1.4 kWh), 2426
Sodium-sulfur battery development. Final report, 1 April 1973-30 April 1974, 673 (EPRI-128-0-0)

Integration of large electrical space power systems (Solar/battery space station power plants combined with nuclear configurations, discussing rectified alternator current, direct energy transfer, and high voltage dc sources), 5180
Intersociety Energy Conversion Engineering Conference, 7th, San Diego, CA, Sep 25-29, 1972, proceedings, 188
Power system configurations for extended science missions on Mars, 5258
Solar array and battery electrial power subsystem for the shuttle-launched modular space station, 186
Solar-cell/battery systems research and development for post-1975 satellites and manned missions, 203
SOLAR CELL ARRAYS/CONTROL SYSTEMS
Digital techniques in future spacecraft automated power systems, 5136
Spacecraft integrated power/attitude control system, 5137
SOLAR CELL ARRAYS/DESIGN
25-kW solar array/battery design for an Earth-orbiting space station, 1341
Design and development of a low-temperature balloon battery. Phase 1 final report, 22 May-5 Aug 1968, 687 (N-69-16975)
Design and performance of the TACSAT Power Subsystem, 1420
Design and flight results of a solar array/silver zinc battery power system, 193
Design description of the power supply subsystem for the TD1/TD2 satellites, 2484
Preliminary design of the power system for the UK 3 satellite. Technical memorandum, May 1964-Feb 1965 (Battery and solar cell array), 4977 (N-66-26772)
Solar array and battery electrical power subsystem for the shuttle-launched modular space station, 2371
Solar power pack apparatus (Patent), 806
Space shuttle orbiter power system requirements and design (Comparing fuel cells, solar array/battery, and radioisotope Brayton cycle and cryogenic fueled turboalternators), 1340
System design considerations for a 25kW space station power system, 2372
SOLAR CELL ARRAYS/EFFICIENCY
Power system for a 4.1-kilowatt synchronous satellite, 2368
SOLAR CELL ARRAYS/MATHEMATICAL MODELS
Modeling, identification and control optimization of a satellite power system, 5161
SOLAR CELL ARRAYS/OPERATION
Electric power systems for space: a progress report, 2187
SOLAR CELL ARRAYS/OPTIMIZATION
Maximizing the usable energy from a spacecraft power system (Solar power system using Si cell array and Ni--Cd battery), 2405
SOLAR CELL ARRAYS/PERFORMANCE
Analysis of prime electrical power sources for space vehicles, 1643 (AD-448157)
Approach to performance assessment and management of a large solar array/battery power system, 187
Approach to performance assessment and management of a large solar array/battery power system, 2370
Candidate electrical power systems for space station, 2406
Computer simulation concept for a large solar array/battery power system, 2373
Design and performance of the TACSAT Power Subsystem, 1420
Design and flight results of a solar array/silver zinc battery power system, 193
Electric power for state-of-the-art communications satellites, 2339
Interdependence of the airlock module/orbital workshop thermal control and electrical power systems on Skylab, 2275
Large solar arrays for multi-mission lunar surface exploration, 5259
Nimbus B solar power supply. Paper, 2529
Power system of the AEROS satellite, 4989 (N-72-31043)
Satellite power-conditioning and control: summary of design possibilities, 4978 (N-68-18466)
Space applications of electrochemical generators, 5257
US Army type II geodetic satellites. Volume II. Appendix I, Sonotone battery data; Appendix II, solar panel data; Appendix III, thermal vacuum report; Appendix IV, thermal analysis; Appendix V, Bunker--Ramo random reports 4, 5, and 6. Final technical report, Nov 1964-Jun 1965, 1788 (AD-721646)
SOLAR CELL ARRAYS/PERFORMANCE TESTING
Advance deployable solar cell battery power system development, 5215
Power system evaluator operational characteristics (Solar cell battery performance test equipment and

computerized simulation programs or post-1975 satellite and space stations systems integration and design), 5181
SOLAR CELL ARRAYS/POWER CONDITIONING CIRCUITS
Electric power systems for space: a progress report, 2187
SOLAR CELL ARRAYS/RELIABILITY
Power system for a 4.1-kilowatt synchronous satellite, 2368
SOLAR CELL ARRAYS/RESEARCH PROGRAMS
Nimbus-D solar-conversion power supply subsystem. Quarterly technical report, 15 Dec 1968-15 Mar 1969, 4981 (N-69-32305)
SOLAR CELL ARRAYS/SPACECRAFT POWER SUPPLIES
Analysis of solar array/battery lock-up by computer simulation of electric power system performance, 194
Power-sharing with electric propulsion and secondary batteries. Technical report Nov 1970-Apr 1971, 49 (AD-740571)
Power supply of the ESRO research satellites Td1 and TD2, 212
Solar array regulators of Explorer satellites XII, XIV, XV, XVIII, XXI, XXVI, XXVIII, and Ariel I, 2784 (N*67-30026)
Spacecraft power (Solar cells, electric batteries, nuclear power, and radioisotope sources), 4985 (N-70-25235)
SOLAR CELL ARRAYS/SPECIFICATIONS
Session on requirements for power sources: NASA, 1419
Solar charger kit: experimental, 4988 (N-72-19066)
SOLAR CELL ARRAYS/TEMPERATURE DEPENDENCE
Approach to optimum loading of a solar array which experiences temperature changes (Taper-current battery charge system), 3198 (N-69-19806)
SOLAR CELLS

Secondary power systems for space vehicles, 2636
Selection of power sources for remote ocean oriented applications, 2216
Solar battery-photovoltaic cell power supply for equipment, 184 (AD-748694)
Standby power for railroad-highway grade crossing warning systems. Final report Jun 1975-Jun 1976, 5014 (PB-263592)
SOLAR CELLS/APOLLO PROJECT
Electrical power systems study for an independent carrier for the applications a and b experiments, 89 (N-74-70909)
SOLAR CELLS/BIBLIOGRAPHIES
Applied research programs abstract bulletin, flight vehicle power and materials. Volume II, Part I. Abstracts 2-122 through 2-207, 24 (AD-609098)
Applied research programs abstract bulletin, flight vehicle power and materials. Volume II, Part I. Abstracts 2-1 through 2-81, 22 (AD-605699)
Applied research management. Abstract bulletin, abstracts 1-1448 through 1-1552, 10 (AD-448091)
Applied research management abstract bulletin. Part I. Abstracts 1-1704 through 1-1752, 21 (AD-604746)
Space vehicle (missile) power supplies. An annotated bibliography, 28 (AD-666251)
SOLAR CELLS/COMPARATIVE EVALUATIONS
Chemical compositions, structures, performance, and uses of batteries; (review with 108 references), 233
Noncommunication expendable jammer investigations. Volume 1. Power sources, 1640 (AD-441993)
Secondary power for space flight, 1623 (AD-358628)
SOLAR CELLS/COST
Nuclear power systems for spacecraft (Weights, sizes, and costs of nuclear and nonnuclear spacecraft power systems with references to mission duration), 201
SOLAR CELLS/DESIGN
Space experiment power supplies, 4984 (N-70-24832)
SOLAR CELLS/ELECTRIC BATTERIES
Solar battery charger, 4573
SOLAR CELLS/FABRICATION
Flexible, thin-film nickel-cadmium batteries (Applicability of techniques to thin-film solar cells), 1476
SOLAR CELLS/MEETINGS
International Power Sources Symposium (7th) held in Brighton, Sussex on 15-17 Sep 1970. Conference report, 47 (AD-718833)
Performance forecast of selected static conversion devices. Meeting of Agard propulsion and energetics panel 29th, Liege, Belgium, June 12-16, 1967, 1760 (AD-671685)
Power sources. Volume 3 (39 papers; electric batteries, fuel cells, and solar cells), 205
Power sources conference (18th annual), held 19-21 May 1964. Proceedings, 36 (AD-696423)
Power sources conference (19th annual), held 18-20 May 1965. Proceedings, 38 (AD-696424)
SOLAR CELLS/NICKEL-CADMIUM BATTERIES
Calorimetric study of nickel-cadmium cells, 2596
SOLAR CELLS/PERFORMANCE
Comparison of solar-cell and battery-type power systems for spacecraft. Paper, 216
Electrical power systems for the manned orbiting laboratory (Comparison of solar cells, fuel cells, and batteries and combinations), 1738 (AD-624668)
One watt 30-day plus power sources. Research paper (Comparison of silver-zinc batteries, zinc-air batteries, hydrogen fuel cells, and solar cells), 1762 (AD-675936)
Performance forecast of selected static energy conversion devices, 4980 (N-68-28714)
Performance forecast of selected static conversion devices. Meeting of Agard propulsion and energetics panel 29th, Liege, Belgium, June 12-16, 1967, 1760 (AD-671685)
Research and investigation on satellite attitude control. Part III. Power sources, 1677 (AD-469206)
Space power supply study. Final report (Comparison of solar cell/battery, fuel cell, fuel cell/battery, solar cell/battery/fuel cell, solar cell/fuel cell and radioisotope thermoelectric generators/battery; 300 and 600 W continuous power), 1761 (AD-672772)
SOLAR CELLS/PLANNING
NASA objectives and the space power program, 767 (X-711-77-28)
SOLAR CELLS/RADIATION EFFECTS
Radiation effects on batteries: an annotated bibliography, 1708 (AD-487015)
SOLAR CELLS/RELIABILITY
Determination of reliability and electric losses in independent power supply sets, using static simulation, 2507
SOLAR CELLS/RESEARCH PROGRAMS
Project MALLARD. Communications plan and proposals for research and development. Volume IV. Technical background and constraints. Section 1, Annex A, Appendix 16, power sources. Final report on Phase 1, 58 (AD-812841L)
RCA's role in direct energy conversion (Solar cells, MHD, batteries, and thermionics), 679 (N-64-19376)

Development of uniform and predictable battery materials for nickel-cadmium aerospace cells. Quarterly report, 8 February-7 May 1969, 3205 (N-69-40923)
Development of uniform and predictable battery materials for nickel-cadmium aerospace cells. Quarterly report, 8 September-7 December 1969, 3212 (N-70-35576)
Diode control research. Quarterly technical progress report No. 4, 1 March-1 June 1967 (Stabistor diode charge control system), 3011 (AD-822337)
Diode control research. Quarterly progress report No. 6, 1 September-1 December 1967 (Stabistor charge control), 1862 (AD-825660)
Electrochemical energy sources, 2618
Engineering development and qualification of large sealed nickel-cadmium batteries for long-duration space missions, 1102
Evaluation program for secondary spacecraft cells. Initial evaluation tests of Eagle-Picher Industries, Incorporated, 3.0 ampere-hour nickel--cadmium spacecraft cells, 2071 (N-74-13763)
Evaluation program for secondary spacecraft cells: initial evaluation tests of 20.0 ampere-hour nickel--cadmium spacecraft cells manufactured by Gulton Industries, Incorporated, 2079 (N-74-17803)
Evaluation program for secondary spacecraft cells: initial evaluation tests of Gulton Industries, Incorporated, 20.0 ampere-hour nickel--cadmium spacecraft cells with auxiliary electrodes, 2069 (N-74-13761)
Evaluation program for secondary spacecraft cells: initial evaluation tests of Eagle--Picher Industries, Incorporated, 20.0-ampere-hour nickel--cadmium spacecraft cells, 1835 (AD-778671)
Evaluation program for secondary spacecraft cells. Acceptance test of Eagle-Picher Industries, Inc. 6.0 ampere-hour nickel--cadmium cells, 1791 (AD-725849)
Evaluation program for secondary spacecraft cells. Acceptance tests of Gulton Industries 100.0 ampere-hour nickel--cadmium cells, 1794 (AD-729291)
Evaluation program for secondary spacecraft cells. Acceptance test of Gulton Industries, Inc., 12 and 20 ampere-hour adhydrode cells, 1795 (AD-732712)
Evaluation program for secondary spacecraft cells. Acceptance tests of Eagle-Picher 12.0 ampere-hour nickel--cadmium cells with auxiliary electrodes. Report for 16 Mar-26 Apr 1971, 1799 (AD-735003)
Evaluation program for secondary spacecraft cells. Annual report No. 8, 1802 (AD-738880)
Evaluation program for secondary spacecraft cells. Acceptance tests of Heliotek Division, Textron, Inc. 20-0 ampere-hour nickel--cadmium cells, 1804 (AD-739740)
Evaluation program for secondary spacecraft cells. Evaluation of storage methods, open circuit versus continuous trickle charge, for Sonotone 3.5 ampere-hour sealed nickel--cadmium secondary spacecraft cells, 1805 (AD-740060)
Evaluation program for secondary spacecraft cells. Acceptance test of Eagle-Picher 100 ampere-hour nickel--cadmium cells with auxiliary electrodes, 1806 (AD-740061)
Evaluation program for secondary spacecraft cells. Acceptance tests of Eagle-Picher 20.0 ampere-hour nickel--cadmium cells with auxiliary electrodes, 1807 (AD-740105)
Evaluation program for secondary spacecraft cells. Acceptance tests of Gulton Industries 6.0 ampere-hour nickel--cadmium cells with Gulton plates, 1780 (AD-711594)
Evaluation program for secondary spacecraft cells. Acceptance test of Gulton Industries 5.0 ampere-hour nickel--cadmium spacecraft cells with cobalt additive, 1784 (AD-714161)
Evaluation of storage methods, open circuit versus continuous trickle charge, for Sonotone 3.5 ampere-hour sealed nickel--cadmium secondary spacecraft cells, 1785 (AD-715803)
Evaluation program for secondary spacecraft cells. Annual report No. 7, 1786 (AD-718854)
Evaluation program for secondary spacecraft cells. Acceptance test of 6.0 ampere-hour nickel--cadmium secondary cells (ceramic seals with nickel braze) manufactured by General Electric Company, 1787 (AD-720770)
Evaluation program for secondary spacecraft cells. Acceptance test of General Electric Company 6.0 ampere-hour nickel--cadmium cells w/ signal and recombination electrodes, 1790 (AD-725848)
Evaluation program for secondary spacecraft cells. Initial evaluation tests of General Electric Company standard and teflonated negative electrode 20.0 ampere-hour, nickel-cadmium spacecraft cells with auxiliary electrodes, 2082 (N-74-31530)
Evaluation program for secondary spacecraft cells: acceptance test of General Electric Company 12 ampere-hour auxiliary electrode nickel-cadmium cells, 1770 (AD-694010)
Evaluation program for secondary spacecraft cells. Acceptance test of Sonotone Corporation 3.5 ampere-hour nickel-cadmium cells, 1873 (AD-834213)
Evaluation program for secondary spacecraft cells. Fourth annual report of cycle life test, 1875 (AD-834600)
Evaluation program for secondary spacecraft cells. Acceptance test of Gulton Industries, Inc. 6.0 ampere-hour adhydrode nickel-cadmium cells, 1877 (AD-837084)
Evaluation program for secondary spacecraft cells. General performance test of Gulton Industries, Inc. 20 ampere-hour adhydrode nickel-cadmium cells, 1880 (AD-840860)
Evaluation program for secondary spacecraft cells. Fifth annual report of cycle life test, 1890 (AD-852580)
Experimental investigation of cooling a high rate nickel--cadmium battery with an interceli planar heat pipe. Technical report, Sep-Dec 1970, 2943 (AD-735736)
Heat transfer in sealed nickel-cadmium spacecraft cells and batteries. Special technical report, March-December 1968, 1889 (AD-851880)
High energy density sintered plate type sealed nickel cadmium battery cells. I. The positive electrode/plaque relationships, 4058
High-energy-density sintered plate-type nickel-cadmium battery cells. Part I. The positive electrode/plaque relationship. Interim report, December 1972-December 1973, 565 (AD/A-000103)
Nickel-cadmium cells. Final report, 30 Mar. 1972-30 May 1973, 710 (N-76-13598)
Nickel-cadmium cell composite reliability model, 2183
Power system evaluator operational characteristics, 2454
Rate of discharge of accelerated life tests of nickel--cadmium cells. Special technical report, 1815 (AD-748253)
Research into fundamental phenomena associated with spacecraft electrochemical devices: calorimetry of nickel-cadmium cells. Progress report, 1 July-30 September 1968, 2057 (N-69-39418)
Research into fundamental phenomena associated with spacecraft-electrochemical devices and calorimetry of nickel-cadmium cells. Progress report, 1 October 1968-31 August 1969, 2058 (N-69-40947)
Sealed cells and auxiliary electrodes, 1488
Short test and charge retention test methods for nickel--cadmium spacecraft cells, 2103 (NASA-CR-143189)
Sinter of uniform, predictable, blemish-free nickel plaque for large aerospace nickel cadmium cells, 3225 (N-75-18717)
Space environmental testing of ceramic-sealed Ni-Cd secondary batteries, 2513
Stabistor-protected 12-Ah Ni-Cd and 25-Ah Ag-Zr batteries, 1867 (AD-832025)
Studies of available energies in Ni-Cd, Ag-Zn, and Ag-Cd batteries, 1759 (AD-671685)
Study of degradation of plates for nickel--cadmium spacecraft cells. Interim report, 3216 (N-74-16808)
Study of degradation of plates for nickel-cadmium spacecraft cells. Final report, 3223 (N-75-15164)
Study of process variables associated with manufacturing hermetically-sealed nickel--cadmium cells. Final report, 702 (N-74-26501)
Temperature and temperature gradients for accelerated life tests of nickel--cadmium cells. Technical report, 1814 (AD-748252)
Testing of NiCd cells over geostationary orbit type cycling period, 2100 (N-77-10661)
Thermal and mechanical design of nickel cadmium aerospace batteries, 1436
Thermal conductivity of sealed nickel--cadmium cells. Technical report, 1801 (AD-737519)
Two year flight performance of the Lockheed type XI nickel--cadmium battery, 2488

SPACE VEHICLES/NICKEL-HYDROGEN BATTERIES
Rechargeable metal oxide-hydrogen cells. Research and development technical report (approx. 1 Ah), 592 (AD-A-036280)

SPACE VEHICLES/POWER SUPPLIES
Applied research programs abstract bulletin, flight vehicle power and materials. Volume II, Part I. Abstracts 2-122 through 2-207, 24 (AD-609098)
Applied research programs abstract bulletin, flight vehicle power and materials. Volume II, Part I. Abstracts 2-1 through 2-81, 22 (AD-605699)

Applied research management abstract bulletin. Part I. Abstracts 1-1704 through 1-1752, 21 (AD-604746)
Proceedings, 16th Annual Power Sources Conference, 22-24 May 1962, Fort Monmouth, NJ, 33 (AD-696421)
Secondary power for space flight, 1623 (AD-358628)
SPACE VEHICLES/SILVER-CADMIUM BATTERIES
Alkaline battery evaluation. Report for Apr 1962-15 Oct 1964, 1672 (AD-465888)
Alkaline battery evaluation. Final report, 30 Jun 1960-15 Mar 1964 (12- and 20-Ah Ni/Cd, 25-Ah Ag/Zn, and 20-Ah Ag/Cd cells), 1724 (AD-602676)
Cell equalization techniques, 1664 (AD-461856)
Diode control research. Quarterly technical progress report No. 8, 1 May-1 June 1968 (For battery voltage sensor), 3036 (AD-845340)
Evaluation program for secondary spacecraft cells. Annual report No. 8, 1802 (AD-738880)
Evaluation program for secondary spacecraft cells. Annual report No. 7, 1786 (AD-718854)
Evaluation program for secondary spacecraft cells. Fifth annual report of cycle life test, 1890 (AD-852580)
Sealed cells and auxiliary electrodes, 1488
SPACE VEHICLES/SILVER-ZINC BATTERIES
Alkaline battery evaluation. Report for Apr 1962-15 Oct 1964, 1672 (AD-465888)
Alkaline battery evaluation. Final report, 30 Jun 1960-15 Mar 1964 (12- and 20-Ah Ni/Cd, 25-Ah Ag/Zn, and 20-Ah Ag/Cd cells), 1724 (AD-602676)
Battery, spacecraft storage, silver oxide-zinc, 29 volt, 257 (AD-435366)
Battery, spacecraft, pyrotechnic, silver oxide-zinc, 267 (AD-457647)
Battery, spacecraft storage, silver oxide-zinc, 29 volt, 269 (AD-458178)
Battery rechargeable, manually activated, 264 (AD-446604)
Cell equalization techniques, 1664 (AD-461856)
Design, testing, and flight performance of the Mariner Mars 1969 spacecraft batteries, 2456
Design of a 25 ampere-hour, heat-sterilizable, high-impact, silver-zinc cell, 1437
Development of silver--zinc cell with inorganic separator, 1397
Diode control research. Quarterly technical progress report No. 4, 1 March-1 June 1967 (Stabistor diode charge control system), 3011 (AD-822337)
Electrochemical energy sources, 2618
Evaluation program for secondary spacecraft cells. Acceptance test of McDonnell--Douglas Astropower Division 40.0 ampere-hour silver--zinc cells, 1798 (AD-734694)
Evaluation program for secondary spacecraft cells. Annual report No. 8, 1802 (AD-738880)
Evaluation program for secondary spacecraft cells. Annual report No. 7, 1786 (AD-718854)
Evaluation program for secondary spacecraft cells. Fifth annual report of cycle life test, 1890 (AD-852580)
Heat sterilizable battery, 1489
LM descent stage battery sample cells manufactured by Eagle-Picher, 1909 (AD-900508L)
Nonleaking battery terminals, 4268
Progress in development of heat-sterilizable Ag-Zn battery, 1469
Qual. testing of Martin Co. battery, part No. PS940300011-001, 1646 (AD-448883)
Sealed silver oxide zinc cells for orbiting and planetary missions, 2378
Sealed zinc-silver oxide batteries, 2601
Sealed zinc-silver oxide batteries, 1555
Sealed zinc-silver oxide batteries. Part 2, 2574
Sealed zinc--silver oxide batteries, 1560
Sealed zinc--silver oxide batteries. II, 2578
Sealed zinc-silver batteries, 372 (AD-671685)
Selection of separator materials, 2908 (AD-671685)
Stabistor-protected 12-Ah Ni-Cd and 25-Ah Ag-Zr batteries, 1867 (AD-832025)
Substituted aliphatic polybenzimidazoles as membrane separator materials, 4469
The electrical performance of Ag/Zn batteries for the Venus multi-probe mission, 2090 (N-75-32588)
Versatile silver oxide--zinc battery for synchronous orbit and planetary missions, 1303
SPACE VEHICLES/ZINC-AIR BATTERIES
Zinc-oxygen battery system, 2575
SPACECRAFT POWER SUPPLIES
Intersociety Energy Conversion Engineering Conference, 7th, San Diego, CA, Sep 25-29, 1972, proceedings, 188
Power systems (Comparison of various spacecraft power supplies), 214
Prime power systems. Part 6, 4987 (N-71-19649)
SPACECRAFT POWER SUPPLIES/BIBLIOGRAPHIES
Auxiliary power systems for spacecraft: annotated bibliography. Literature search 1963-Apr 1966 (978 references), 19 (AD-485587)
SPACECRAFT POWER SUPPLIES/BRAYTON CYCLE POWER SYSTEMS
Electric power generation in space, 4979 (N-68-19128)
Survey of electric power plants for space application, 5275
SPACECRAFT POWER SUPPLIES/COMPARATIVE EVALUATIONS
Analysis of prime electrical power sources for space vehicles, 1643 (AD-448157)
Candidate electrical power systems for space station, 2406
Electrical power systems for the manned orbiting laboratory (Comparison of solar cells, fuel cells, and batteries and combinations), 1738 (AD-624668)
Research and investigation on satellite attitude control. Part III. Power sources. Technical report, 13 (AD-469206)
Space power supply study. Final report (Comparison of solar cell/battery, fuel cell, fuel cell/battery, solar cell/battery/fuel cell, solar cell/fuel cell and radioisotope thermoelectric generators/battery; 300 and 600 W continuous power), 1761 (AD-672772)
SPACECRAFT POWER SUPPLIES/COMPUTER CALCULATIONS
Computer analysis of space power systems for mission analysis, 210
SPACECRAFT POWER SUPPLIES/CONTROL SYSTEMS
Design and test of the SAS-A power system. Technical memo, 395 (AD-716771)
SPACECRAFT POWER SUPPLIES/DESIGN
Design and test of the SAS-A power system. Technical memo, 395 (AD-716771)
Development of a power module using third electrode battery charge control (150 to 250 W, two 6-Ah batteries), 1265
Electrical power system design for a Jupiter solar electric propulsion mission, 2518
Space experiment power supplies, 4984 (N-70-24832)
SPACECRAFT POWER SUPPLIES/ELECTRIC BATTERIES
Advance deployable solar cell battery power system development, 5215
Auxiliary power generating system for a large space laboratory (Solar cells, batteries, and SNAP-8 systems) 4975 (N-64-28373)
Background material for the study of the national space power program (1964). Volume I. Electrochemical papers, 11 (AD-452617)
Battery research, 251 (AD-428659)
Cell equalization techniques. Final report, 1625 (AD-427070)
Comparison of solar-cell and battery-type power systems for spacecraft. Paper, 216
Electric power generation in space, 4979 (N-68-19128)
Electrochemical space power sources, 4983 (N-70-16227)
Energy supply and energy transformers in satellites and spacecraft, 170
Heat sterilizable impact resistant cell development. Quarterly report, 1 January-31 March 1969, 3200 (N-69-36048)
Integration of large electrical space power systems (Solar/battery space station power plants combined with nuclear configurations, discussing rectified alternator current, direct energy transfer, and high voltage dc sources), 5180
Interdependence of the airlock module/orbital workshop thermal control and electrical power systems on Skylab, 2275
Nuclear power systems for spacecraft (Weights, sizes, and costs of nuclear and nonnuclear spacecraft power systems with references to mission duration), 201
Operation and service manual for Blockhouse Power Backup Battery Rack 52E230049 and External Power Control and Monitor Backup Battery Rack 52E230058, 1894 (AD-856788)
Optimum design of a space vehicle storage system, 1573
Performance forecast of selected static energy conversion devices, 4980 (N-68-28714)
Power sources for satellites and space vehicles, 5321
Power system of the AEROS satellite, 4989 (N-72-31043)
Power systems for an unmanned lunar roving vehicle, 5290
Power system evaluator operational characteristics (Solar cell battery performance test equipment and computerized simulation programs or post-1975 satellite and space stations systems integration and design), 5181
Power systems for the Apollo Applications Program, 1454
Preliminary design of the power system for the UK 3 satellite. Technical memorandum, May 1964-Feb 1965 (Battery and solar cell array), 4977 (N-66-26772)
Research and investigation on satellite attitude control. Part III. Power sources, 1677 (AD-469206)
Review of batteries and fuel cells for space power systems, 2546
Secondary power (Secondary power sources for space applications including solar arrays, static and dynamic thermal systems, batteries, and fuel cells), 5242
Secondary aerospace batteries and battery materials: a bibliography, 1969-1974, 93 (N-76-19549)
Secondary aerospace batteries and battery materials: a bibliography, 1969 - 1974, 94 (N-77-16437)
Secondary power systems for space vehicles, 2636
Session on requirements for power sources: NASA, 1419
Solar array regulators of Explorer satellites XII, XIV, XV, XVIII, XXI, XXVI, XXVIII, and Ariel I, 2784 (N+67-30026)
Solar charger kit: experimental, 4988 (N-72-19066)
Space power systems: energy storage, 86 (N-70-26430)
Where will electric power come from in space ships (Brief review), 5324
SPACECRAFT POWER SUPPLIES/ELECTROCHEMICAL CELLS
Electronchemical auxiliary power sources for missiles and space flight, 1568
SPACECRAFT POWER SUPPLIES/ENERGY CONVERSION
Electric power generation (Batteries, solar cells,

thermoelectric and MHD generators, fuel cells, and thermionic converters for space vehicles), 4976 (N-64-32767)
SPACECRAFT POWER SUPPLIES/ENERGY SOURCES
America in space, the first decade: spacecraft power, 4986 (N-71-10585)
SPACECRAFT POWER SUPPLIES/ENERGY STORAGE
Energy storage for satellites, 5319
Spacecraft integrated power/attitude control system, 5137
SPACECRAFT POWER SUPPLIES/FUEL CELLS
America in space, the first decade: spacecraft power, 4986 (N-71-10585)
Background material for the study of the national space power program (1964). Volume I. Electrochemical papers, 11 (AD-452617)

Research and investigation on satellite attitude control. Part III. Power sources, 1677 (AD-469206)
Review of batteries and fuel cells for space power systems, 2546
Secondary power (Secondary power sources for space applications including solar arrays, static and dynamic thermal systems, batteries, and fuel cells), 5242
Session on requirements for power sources: NASA, 1419
Spacelab power supply systems (7 kw continuous 12 kw peak fuel cell with Ag—Zn battery), 994
SPACECRAFT POWER SUPPLIES/HIGH-TEMPERATURE FUEL CELLS
Special purpose batteries, 1249
SPACECRAFT POWER SUPPLIES/HYBRID SYSTEMS
Biosatellite fuel cell/battery power system, 691 (N-70-11022)
SPACECRAFT POWER SUPPLIES/HYDROGEN FUEL CELLS
Biosatellite fuel cell/battery power system., 1424
Power systems for the Apollo Applications Program, 1454
Special purpose batteries, 1249
SPACECRAFT POWER SUPPLIES/MEETINGS
Space power systems. Part II, 43 (AD-698653)
SPACECRAFT POWER SUPPLIES/METAL-GAS BATTERIES
Electrical resistivity of K-Hg and Na-Hg systems and diffusivity of K-Hg system at high temperatures, 1532
High energy density silver-hydrogen cells for space and terrestrial applications, 2350
Study of multiple reserve electrochemical power sources. Final report (Li/CuS, Li/Se, metal/$O_2$ cells), 686 (N-69-13030)
SPACECRAFT POWER SUPPLIES/METAL-METAL OXIDE BATTERIES
Mercury cell battery investigation. Final report, 16 Dec 1962-15 Dec 1963, 252 (AD-430404)
SPACECRAFT POWER SUPPLIES/METAL-NONMETAL BATTERIES
Building batteries for space, 1507
Lithium anode limited cycle battery investigation. Quarterly technical progress report No. 6, 298 (AD-489624)
Study of multiple reserve electrochemical power sources. Final report (Li/CuS, Li/Se, metal/$O_2$ cells), 686 (N-69-13030)
SPACECRAFT POWER SUPPLIES/MHD GENERATORS
Research and investigation on satellite attitude control. Part III. Power sources, 1677 (AD-469206)
SPACECRAFT POWER SUPPLIES/NICKEL-CADMIUM BATTERIES
100 ampere-hour nickel-cadmium battery development program. Volume 1. Final report, 704 (N-75-14266)
100 ampere-hour nickel-cadmium battery development program. Volume 2, 705 (N-75-14267)
A study of short test and charge retention test methods for nickel-cadmium spacecraft cells. Final report, 2088 (N-75-27566)
Accelerated test program for sealed nickel-cadmium spacecraft batteries/cells. Interim report, 2097 (N-76-26688)
An evaluation of potentially useful separator materials for nickel-cadmium (Ni-Cd) satellite batteries. Final report, 3229 (N-75-32597)
Application of nickel-cadmium batteries in deep discharge synchronous orbit applications, 2182
Assuring reliability in aerospace batteries, 1531
Battery cell design priorities for geosynchronous orbit communications satellite, 2119 (X-711-77-28)
Battery design for aerospace power supplies, 393 (AD-709273)
Cycle life test. Evaluation program for secondary spacecraft cells. Annual report, 2096 (N-76-26687)
Design and test of the SAS-A power system. Technical memo, 395 (AD-716771)
Development of uniform and predictable battery materials for nickel-cadmium aerospace cells. Interim annual report, 8 August 1968-7 July 1969, 3210 (N-70-28473)
Electrochemical impregnation of sintered nickel structures with cadmium using constant current step and alternating-current pulse techniques. Interim report, Jan 1971-Jun 1974, 3121 (AD-A-013931/1ST)
Evaluation program for secondary spacecraft cells. Acceptance test of Sonotone Corporation 20 ampere-hour nickel--cadmium cells (Effect of mechanical pressure on cell plates), 1782 (AD-711847)
Evaluation program for secondary spacecraft cells. General performance test of Svenska Ackumulator Aktiebolaget Jungner of Sweden 4.0 ampere-hour nickel-cadmium cells, 1881 (AD-845234)
Evaluation program for secondary spacecraft cells: initial evaluation tests of General Electric Company 12.0 ampere-hour nickel-cadmium spacecraft cells for the International Ultraviolet Explorer, 2098 (N-76-26693)
Evaluation program for secondary spacecraft cells. Acceptance test of General Electric Company 12 ampere-hour auxiliary electrode nickel-cadmium cells, 2055 (N-69-37830)
Evaluation program for secondary spacecraft cells. Evaluation of storage methods, open circuit versus continuous trickle charge, Sonotone 3.5 ampere-hour sealed nickel-cadmium secondary spacecraft cells, 2056 (N-69-38275)
Evaluation program for secondary spacecraft cells. Evaluation of storage methods, open circuit versus continuous trickle charge, Sonotone 3.5 ampere-hour sealed nickel-cadmium secondary spacecraft cells, 2063 (N-71-13426)
General Electric 20-ampere hour nickel-cadmium battery. Interim test report, 2087 (N-75-25290)
MEL research and development phase report, 2786 (AD-428945)
Method and apparatus for reconditioning nickel-cadmium batteries (Patent application), 3238 (N-77-12511)
Nickel-cadmium, silver-cadmium, and silver-zinc batteries, 694 (N-70-29061)
Sealed secondary cells for space power systems, 2564
Space-rated nickel/cadmium batteries and their charge control, 2059 (N-70-30138)
Thermal analysis of hermetically sealed nickel-cadmium cells for space applications, 2563
Viking Lander spacecraft battery. Final report, 713 (N-77-20557)
SPACECRAFT POWER SUPPLIES/NICKEL-HYDROGEN BATTERIES
Evaluation of a nickel-hydrogen battery for space application. Final report, 2094 (N-76-20643)
Ligtweight nickel hydrogen cell, 3430
SPACECRAFT POWER SUPPLIES/PLANNING
NASA objectives and the space power program, 767 (X-711-77-28)
SPACECRAFT POWER SUPPLIES/RADIOISOTOPE BATTERIES
Energy supply and energy transformers in satellites and spacecraft, 170
Where will electric power come from in space ships (Brief review), 5324

Power sources for satellites and space vehicles, 5321
Power systems for the Apollo applications program (Fuel cell/battery and solar array/battery systems), 209
Power systems for permanent lunar stations (Nuclear energy, solar cells, and electrochemical power cells), 189
Research and investigation on satellite attitude control. Part III. Power sources, 1677 (AD-469206)
Secondary power (Secondary power sources for space applications including solar arrays, static and dynamic thermal systems, batteries, and fuel cells), 5242
Secondary power systems for space vehicles, 2636
Solar-cell/battery systems research and development for post-1975 satellites and manned missions, 203
US Army type II geodetic satellites. Volume II. Appendix I, Sonotone battery data; Appendix II, solar panel data; Appendix III, thermal vacuum report; Appendix IV, thermal analysis; Appendix V, Bunker--Ramo random reports 4, 5, and 6. Final technical report, Nov 1964-Jun 1965, 1788 (AD-721646)
SPACECRAFT POWER SUPPLIES/SOLAR ENERGY CONVERSION
Nimbus-D solar-conversion power supply subsystem. Quarterly technical report, 15 Dec 1968-15 Mar 1969, 4981 (N-69-32305)
SPACECRAFT POWER SUPPLIES/SPACE POWER REACTORS
Energy supply and energy transformers in satellites and spacecraft, 170
Session on requirements for power sources: NASA, 1419
SPACECRAFT POWER SUPPLIES/THERMIONIC CONVERTERS
Electric power generation in space, 4979 (N-68-19128)
Research and investigation on satellite attitude control. Part III. Power sources, 1677 (AD-469206)
Secondary power systems for space vehicles, 2636
SPACECRAFT POWER SUPPLIES/THERMOELECTRIC GENERATORS
Low-temperature fuel batteries on the Moon, 222
Secondary power systems for space vehicles, 2636
Session on requirements for power sources: NASA, 1419
Where will electric power come from in space ships (Brief review), 5324
SPACECRAFT POWER SUPPLIES/WEIGHT
Equipment weight prediction methods - electrical, 259 (AD-442315L)
STEAM TURBINES/COMPARATIVE EVALUATIONS
Economy of operation of electrochemical storage devices as compared to conventional peak power generators, 5051
STEAM TURBINES/TOPPING CYCLES
Electrochemical heat engines for direct electric power generation and energy storage, 5088
STEELS/WETTABILITY
Wettability of the casing and electrolyte leakage in airtight nickel-cadmium storage batteries, 2389 (AD/A-005065)
STIRLING ENGINES
General Motors looks to future, 5288
STIRLING ENGINES/MEETINGS
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
STIRLING ENGINES/PERFORMANCE
University of Florida solar electric car, 2780
STRONTIUM FLUORIDES/ELECTRIC CONDUCTIVITY
Electrical conductivity measurements in anhydrous hydrogen fluoride, 4339
SUBMARINES/ELECTRIC BATTERIES
Battery monitoring system on bottom, 3275
Battery wedge for submarines or other installations, 3146 (AD-D-003275)
Device for separating electrolyte carried by hydrogen during recharging of a storage battery (Patent), 2265
Evaluation of Gould-National Battery Company type ODX-77 SARGO II submarine main storage battery cells by the service life test. Technical report, 1939 (AD-906360L)
Evaluation of Gould type TLX-39B, Guppy I mod C (black oxide) submarine main storage battery cells by the '23-1' float-charge procedure. Final report, 1979 (AD-916361L)
Evaluation of high-rate charging of DSRV batteries. Final report, 1953 (AD-910187L)
Evaluation of 'Daramic' polyethylene separators using Gould type TPX-61-E, Guppy 1, lead--antimony submarine main storage battery cells on a service life test. Technical report, 3076 (AD-900702L)
Investigation of submarine main storage battery cell air lift tube deposits. Final report, Dec 1971-Oct 1972, 1968 (AD-913676L)
Manufacture and use of storage batteries, 1614
Recent advances in fuel cells and their application to new hybrid systems, 5276
Submarine storage batteries. Relation of current and voltage during the gassing phase of charge, 1714 (AD-491500)
SUBMARINES/FUEL CELLS

Recent advances in fuel cells and their application to new hybrid systems, 5276
SUBMARINES/IRON-NICKEL BATTERIES
Development of alkaline battery, 306 (AD-499435)
SUBMARINES/LEAD-ACID BATTERIES
Microstructural comparison of positive float and trickle discharge operations on the positive electrodes of submarine storage batteries with lead-calcium alloy grids. Master's thesis, 3110 (AD-A032298)
NEMO provides new look at ocean depths, 5229
Power for underwater vehicles and systems, 5315
Selection and utilization of batteries for deep submergence vehicles, 2517
Some deep sea vehicle personnel hulls and energy storage subsystems, 4837 (AD-717950)
Study of methods of removing stibine from submarine storage battery ventilation gas, 1720 (AD-499599)
Study of the cyclic performance of submarine type lead-acid storage batteries by examination of the positive plate structures, 3137 (AD-A-033764)
Survey of continuous sources of electrical power for under-ice propulsion of small submersibles. Part I. Conventional secondary batteries, 2024 (AD-A-035996)
Techniques for the use of phosphoric acid additive in the lead-calcium grid battery. Progress report No. 3, 2799 (AD-456245)
Vehicle storage battery cell (Patent; resilient plate supports), 830
SUBMARINES/LITHIUM-SULFUR BATTERIES
Lithium/sulfur batteries for marine application (Li-Al/$FeS_2$ with LiF-LiCl-KCl electrolyte), 159
SUBMARINES/METAL-METAL BATTERIES
Evaluation of OZX-47, SARGO I, lead--antimony submarine main storage battery cells. Final report, 1956 (AD-910857L)
SUBMARINES/NICKEL-CADMIUM BATTERIES
Power for underwater vehicles and systems, 5315
SUBMARINES/PERFORMANCE
Engineering the silver-zinc battery for the deep submergence rescue vehicle, 891
SUBMARINES/PRIMARY BATTERIES
Investigation of lithium-thionyl chloride batteries for Navy applications, 2181
SUBMARINES/SILVER-CADMIUM BATTERIES
Batteries for undersea applications, 1465
Power for underwater vehicles and systems, 5315
Selection and utilization of batteries for deep submergence vehicles, 2517
SUBMARINES/SILVER-ZINC BATTERIES
Batteries for undersea applications, 1465
Construction of 850 and 4,000 ampere-hour silver--zinc cells using inorganic separator. Final report, Jul 1972--Oct 1973, 699 (N-74-17798)
Development of stable zinc electrodes and inorganic separators for use in submarine type silver--zinc cells. Interim report 15 Mar 1973--15 Mar 1974, 1994 (AD-919148L)
Engineering the silver-zinc battery for the deep submergence rescue vehicle, 891
Evaluation of improved separator material in large silver--zinc cells for use in submersible vehicles. Final report, 1 Aug 1972--31 Jan 1974, 2973 (AD-774674)
Evaluation of improved separator material in large silver zinc cells. Final report, 3107 (AD-917948L)
Evaluation of first silver zinc batteries used in deep submergence, 2429
Long life zinc silver-oxide cells, 2283
NEMO provides new look at ocean depths, 5229
Power for underwater vehicles and systems, 5315
Selection and utilization of batteries for deep submergence vehicles, 2517
Silver--zinc battery maintenance and casualty protection. Final report, 1954 (AD-910631L)
Silver--zinc battery power for deep ocean vehicles (35 to 120 kW-hr), 2353
Silver/zinc battery power for deep ocean vehicles, 5250
Some deep sea vehicle personnel hulls and energy storage subsystems, 4837 (AD-717950)
Standard deviation and acceptance sampling of silver--zinc storage batteries. Final report (Statistically sound method for battery accpetance), 1957 (AD-910972L)
Survey of continuous sources of electrical power for under-ice propulsion of small submersibles. Part I. Conventional secondary batteries, 2024 (AD-A-035996)
SUBMARINES/ZINC-AIR BATTERIES
Future look at small manned submersible energy storage systems, 1315
SULFUR/PHASE DIAGRAMS
Equilibrium phases in the lithium--sulfur system, 1318
Phase equilibrium diagram of the system sodium polysulfide ($Na_2S_4$)--sulfur, 2252
Phase equilibria in lithium--chalcogen systems, 4226
SULFURIC ACID/CORROSIVE EFFECTS
Effect of grid cast structure on the anodic corrosion of lead (Pb--0.09 Ca, Pb--0.46 Ag, Pb--6 Sb, Pb--11.6 Sb, Pb--6 Sb--0.2 Ag--0.2 As--0.5 Sn), 4234
Effect of copper on anodic corrosion rate in $H_2SO_4$, mechanical properties, and fluidity of lead and lead antimony alloys, 4236
SUPERCONDUCTING CABLES/RESEARCH PROGRAMS
Electric power systems: C-3 energy storage, transmission and distribution, electric power apparatus and systems, 751 (TID-26756)
SUPERCONDUCTING MAGNETS/ENERGY STORAGE
Ac/dc power conditioning and control equipment for advanced conversion and storage technology. Key phase report No. 1, 3259 (PB-247217)
SUPERCONDUCTING MAGNETS/REVIEWS
Utilization of energy. Storing energy: smoothing out the demand, 1220
SUPERCONDUCTING MOTORS/USES
Superconducting motors and lithium-water batteries for torpedo propulsion. Technical note, 4851 (AD-A-031704)
SUPERCONDUCTIVITY/RESEARCH PROGRAMS
Research group activity report for the period 1 Jan 1968-31 Mar 1969, 64 (AD-914449)
SYNTHETIC FUELS
See also HYDROGEN FUELS
SYNTHETIC FUELS/MEETINGS
Symposium on non-fossil chemical fuels. Vol. 16, No. 4, 1371
Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
SYNTHETIC FUELS/REVIEWS
Synthetic fuels. Where we stand today (Review), 160

T

TANKS/DESIGN
Forming tank for lead-acid battery plates (Patent), 4161
TANTALATES/ELECTRIC CONDUCTIVITY
New solid conductors of $Na^+$ and $K^+$ ions ($NaTaWO_6$; $NaTa_2O_5F$; $NaSbO_3$; Na and K niobates), 3433
TANTALUM COMPOUNDS/ELECTRIC CONDUCTIVITY
New solid conductors of $Na^+$ and $K^+$ ions ($NaTaWO_6$; $NaTa_2O_5F$; $NaSbO_3$; Na and K niobates), 3433
TANTALUM OXIDES/FABRICATION
Metal oxide fabrics (Patent; continuation of US Patent 3,385,915; for use as fuel cell or battery separators), 4237
TELEMETRY/ELECTRIC BATTERIES
Batteries: for biotelemetry and other applications, 1751 (AD-654703)
TELEPHONES/LEAD-ACID BATTERIES
Big change in product calls for innovative cushioning, packaging, 4145
TELEPHONES/POWER SUPPLIES
Improvement of lead-acid battery maintenance, 2202
TETRACHLOROBENZOQUINONE
See CHLORANIL
THALLIUM ALLOYS/CORROSION
Magnesium and magnesium alloys as anodes in electrochemical alkaline-electrolyte power sources, 3852
THALLIUM IODIDES/ELECTRICAL PROPERTIES
Basic research on ceramic materials for energy storage and conversion systems. Progress report, December 1, 1975-November 30, 1976, 3182 (COO-2564-2)
THERMAL BATTERIES
Methods for chemical analysis of thermal battery components, 3189 (GEPP-299)
THERMAL BATTERIES/ANODES
Thermal battery (Patent), 3471
THERMAL BATTERIES/BIBLIOGRAPHIES
Guided missile batteries: an annotated bibliography (243 references), 15 (AD-478826)
THERMAL BATTERIES/DESIGN
Thermal battery (Ca anode with $Ca(OH)_2$ coating, depolarizer--binder--electrolyte pellet; patent), 943
Thermal battery (Patent; solid metal halide electrolytes with enhanced electrical conductance after a phase transition), 1291
THERMAL BATTERIES/ELECTROLYTES
Improved thermal battery (Patent; Ca anodes), 3472
Phase diagram of system LiCl-KCl-$CaCrO_4$, 4447
THERMAL BATTERIES/MATERIALS
Surface analysis of pyrotechnic material, 3190 (GEPP-324)
Synthesis of calcium chromate, 81 (GEPP-226)
THERMAL BATTERIES/PERFORMANCE
Sixty-minute thermal battery (Ca/LiCl-KCl-$Ca(OH)_2$, $CaCrO_4$/Fe, lifetime of type XP60 batteries), 2108 (SAND-75-0454)
Solid electroyte thermal battery (Ag/AgI,$CdI_2$/C, $RbI_3$, 100 mA/$cm^2$), 2355
THERMAL BATTERIES/RADIATION EFFECTS
Nuclear radiation effects test on thermal and silver-zinc batteries (Neutrons and $\gamma$ rays), 1624 (AD-373708)
THERMAL BATTERIES/RESEARCH PROGRAMS
Electrical power sources communications and special equipment for Canadian forces; batteries for Canadian satellites. Quarterly progress notes, 1 Jul-30 Sep 1973, 558 (AD-915962)
THERMAL BATTERIES/USES
Improvised power supplies. Final report, June 1964 (For civil defense shelters), 4827 (AD-445845)
THERMAL POWER PLANTS/LEAD-ACID BATTERIES
Recommended practice for installation design and installation of large stationary generating station and substation lead storage batteries, 1261
THERMAL POWER PLANTS/OFF-PEAK ENERGY STORAGE
Recommended practice for installation design and installation of large stationary generating station and substation lead storage batteries, 1261

THERMIONIC CONVERSION
Intersociety Energy Conversion Engineering Conference, 7th, San Diego, CA, Sep 25-29, 1972, proceedings, 188
THERMIONIC CONVERSION/REVIEWS
Primary energy sources and conversion systems, 207
THERMIONIC CONVERTERS
Advanced electrical power generation and distribution concepts for military facilties, 433 (AD-765476)
Batteries of the future, 1427
Defense Research Institute briefing on current sources (stromkallor). Edited translation, 57 (AD-806927)
Electric power generation in space, 4979 (N-68-19128)
Energy sources of future, 226
Proceedings of the 16th Annual Power Sources Conference, Fort Monmouth, NJ, May 22-24, 1962, 85 (N-63-14123)
Secondary power systems for space vehicles, 2636
THERMIONIC CONVERTERS/BIBLIOGRAPHIES
Applied research programs abstract bulletin, flight vehicle power and materials. Volume II, Part I. Abstracts 2-122 through 2-207, 24 (AD-609098)
Applied research programs abstract bulletin, flight vehicle power and materials. Volume II, Part I. Abstracts 2-1 through 2-81, 22 (AD-605699)
Applied research management. Abstract bulletin, abstracts 1-1448 through 1-1552, 10 (AD-448091)
Applied research management abstract bulletin. Part I. Abstracts 1-1704 through 1-1752, 21 (AD-604746)
Direct energy conversion literature abstracts, 26 (AD-635584)
Direct energy conversion literature abstracts, 8 (AD-430693)
Space vehicle (missile) power supplies. An annotated bibliography, 28 (AD-666251)
THERMIONIC CONVERTERS/COMPARATIVE EVALUATIONS
Noncommunication expendable jammer investigations. Volume 1. Power sources, 1640 (AD-441993)
Power sources for remote-area counterinsurgency. Survey and recommendations, 1627 (AD-430689)
THERMIONIC CONVERTERS/EFFICIENCY
Electrolytic and electronic processes, 181
THERMIONIC CONVERTERS/MEETINGS
Power sources conference (18th annual), held 19-21 May 1964. Proceedings, 36 (AD-696423)
Power sources conference (19th annual), held 18-20 May 1965. Proceedings, 38 (AD-696424)
Power sources conference (21st annual) held 16-18 May 1967. Proceedings, 40 (AD-696426)
Proceedings, 16th Annual Power Sources Conference, 22-24 May 1962, Fort Monmouth, NJ, 33 (AD-696421)
Proceedings, 18th Annual Power Sources Conference, 19-21 May 1964, Fort Monmouth, NJ, 35 (AD-696423)
Proceedings, 20th Annual Power Sources Conference, 24-26 May 1966, Fort Monmouth, NJ, 39 (AD-696425)
THERMIONIC CONVERTERS/PERFORMANCE
Investigation of electrical power sources for missile-borne applications (1 to 10 kW), 1662 (AD-459406)
Research and investigation on satellite attitude control. Part III. Power sources, 1677 (AD-469206)
THERMIONIC CONVERTERS/RESEARCH PROGRAMS
Project MALLARD. Communications plan and proposals for research and development. Volume IV. Technical background and constraints. Section 1, Annex A, Appendix 16, power sources. Final report on Phase 1, 58 (AD-812841L)
RCA's role in direct energy conversion (Solar cells, MHD, batteries, and thermionics), 679 (N-64-19376)
THERMIONIC CONVERTERS/REVIEWS
Spaceborne sources of electric power, 177
Survey of power sources, 229
THERMIONIC CONVERTERS/SPACECRAFT POWER SUPPLIES
Electric power generation (Batteries, solar cells, thermoelectric and MHD generators, fuel cells, and thermionic converters for space vehicles), 4976 (N-64-32767)
Power systems, 213
Spaceborne sources of electric power (Book, in Russian), 176
Survey of electric power plants for space application, 1486
THERMIONIC CONVERTERS/USES
Investigation of power sources for manpack equipment. Final technical report for 24 Feb-24 Aug 1964 (10, 25, and 100 W), 4831 (AD-610104)
Noncommunication expendable jammer investigations. Volume 1. Power sources (Radar jamming), 4826 (AD-441993)
THERMODYNAMIC CYCLES/EFFICIENCY
Electrochemical heat engines for direct electric power generation and energy storage, 4972 (LA-UR-75-1360)
THERMOELECTRIC CONVERSION

Space vehicle (missile) power supplies. An annotated bibliography, 28 (AD-666251)
THERMOELECTRIC GENERATORS/COMPARATIVE EVALUATIONS
Noncommunication expendable jammer investigations. Volume 1. Power sources, 1640 (AD-441993)
THERMOELECTRIC GENERATORS/COST
Calculation and cost optimization of certain solar generator thermobattery parameters, 3214 (N-73-25104)
THERMOELECTRIC GENERATORS/EFFICIENCY
Low-temperature fuel batteries on the Moon, 222
THERMOELECTRIC GENERATORS/MEETING
8th intersociety energy conversion engineering conference held at Philadelphia, Pennsylvania, August 13-17, 1973, 178
THERMOELECTRIC GENERATORS/MEETINGS
International symposium (5th) of the Joint Services Electrical Power Sources Committee, 1966, 56 (AD-801852)
Power sources conference (18th annual), held 19-21 May 1964. Proceedings, 36 (AD-696423)
Power sources conference (19th annual), held 18-20 May 1965. Proceedings, 38 (AD-696424)
Power sources conference (21st annual) held 16-18 May 1967. Proceedings, 40 (AD-696426)
Power sources conference (23rd annual) held 20-22 May 1969. Proceedings, 42 (AD-696428)
THERMOELECTRIC GENERATORS/OPERATION
Electric power systems for space: a progress report, 2187
THERMOELECTRIC GENERATORS/PERFORMANCE
Batteries: for biotelemetry and other applications, 1751 (AD-654703)
Development of the BB-520( )/U nickel--cadmium battery for hybrid applications. Semi-annual report Nov 1972--May 1973, 556 (AD-915855L)
Investigation of electrical power sources for missile-borne applications (1 to 10 kW), 1662 (AD-459406)
Thermoelectric silent battery charger (Gasoline, diesel, JP-4, JP-5, or fuel oil; 10A, 28V), 2911 (AD-673119)
Thermoelectric power conversion feasibility. Quarterly progress report No. 3, 26 Dec 1964-25 Mar 1965 (Propane heated 5W unit for charging storage batteries) 2819 (AD-472340)
THERMOELECTRIC GENERATORS/PERFORMANCE TESTING
Thermoelectric silent battery charger, 4531
THERMOELECTRIC GENERATORS/POWER CONDITIONING CIRCUITS
Low-voltage conversion from primary and secondary sources, 4518
THERMOELECTRIC GENERATORS/RADIOISOTOPE HEAT SOURCES
Batteries for biotelemetry and other applications, 1477
THERMOELECTRIC GENERATORS/RELIABILITY
Determination of reliability and electric losses in independent power supply sets, using static simulation, 2507
THERMOELECTRIC GENERATORS/RESEARCH PROGRAMS
Independent research, 1975. Final report (Naval Surface Weapons Center, Silver Spring, Md.), 69 (AD-A-015337)
THERMOELECTRIC GENERATORS/REVIEWS
Batteries for energy conversion, 195
Primary energy sources and conversion systems, 207
Small-sized sources of current (Book), 51 (AD-746549)
Spaceborne sources of electric power, 177
Survey of power sources, 229
THERMOELECTRIC GENERATORS/SEALS
Seal for energy conversion devices (Patent), 3377
THERMOELECTRIC GENERATORS/SPACECRAFT POWER SUPPLIES

VEHICLES/ALTERNATORS
Developments in alternator systems for vehicles, 4479
VEHICLES/BATTERY CHARGERS
Application of charging systems to farm, construction, and industrial machinery, 4426
Road shock energy converter for charging vehicle batteries (Patent), 3288
VEHICLES/ELECTRIC BATTERIES
Energy conversion and storage technology: the sodium-sulfur battery, 1232
Engineer design test of water-activated storage battery. Letter report No. 1 (final), Aug 1971-Sep 1973, 1969 (AD-913912L)
Heating device for vehicle storage batteries (Patent), 4244
Quarterly progress notes, 1 Apr-30 Jun 1973, 551 (AD-912804)
Recent patents on electric batteries, 4758
Semiconductor charging device for auxiliary batteries on short distance transport vehicles, 4516
Storage batteries (operation, tecnical servicing, and repair) (Handbook for battery repair and organization of personnel), 1811 (AD-742012)
Test methodology research investigation of maintenance performance in arctic environment investigation. Final report, 10 Jan-28 Feb 1972, 1933 (AD-905683L)
Tests of battery heating and battery box design, 1669 (AD-462782)
VEHICLES/FUEL CELLS
Quarterly progress notes, 1 Apr-30 Jun 1973, 551 (AD-912804)
VEHICLES/LEAD-ACID BATTERIES
Battery plate forming apparatus (Patent; design of $H_2SO_4$-holding tank for proper forming of plates by charge--discharge cycles), 3677

Development of the 12TN 24 volt storage battery. Final report, May 1972--Feb 1974, 560 (AD-917525L)
Electric equipment of motor cycles, 2667
VEHICLES/METAL-GAS BATTERIES
Studies on the lithium alloys--chlorine secondary battery, 1351
VEHICLES/NICKEL-CADMIUM BATTERIES
Arctic troop tests of type 6TNC nickel-cadmium batteries. Final report, 1852 (AD-806478)
VIKING SPACE PROBES/NICKEL-CADMIUM BATTERIES
Viking battery ground and flight test results, 2127 (X-711-77-28)
Viking orbiter battery design and performance, 2128 (X-711-77-28)
VOLTAGE REGULATORS/CALIBRATION
Temperature influences battery life and performance (Importance of setting for proper battery charging), 2138
VOLTAGE REGULATORS/ELECTRONIC CIRCUITS
Storage-battery life can be stretched (Methods for charging 60-cell batteries using M-G sets), 4781
VOLTAIC CELLS
See ELECTRIC BATTERIES
VOLTMETERS
Tunnel-diode detects battery voltage levels, 4613
VOLTMETERS/ELECTRONIC CIRCUITS
Automotive battery voltage indicator for 12 volts, 3363
VOLTMETERS/PERFORMANCE
High accuracy voltmeter evaluation. Final report (For testing silver--zinc batteries), 2981 (AD-800315L)

W

WASTE WATER/WASTE PROCESSING
168th national meeting of the American Chemical Society, Fuel Chemistry Division, Atlantic City, New Jersey, September 8-13, 1974. Volume 19, No. 5, 1266
WEATHER/MODIFICATIONS
RANN utilization experience (case studies 22 through 31). Final report, 738 (PB-263682)
WELDING
(All endothermic processes for material joining.)
WELDING/POWER SUPPLIES
Spot welding using storage batteries as an energy source, 5054
WIND POWER

Tenth intersociety energy conversion engineering conference, Newark, Delaware, August 18-22, 1975, 142
WIND TURBINES/ENERGY STORAGE
Batteries for storage of wind-generated energy, 2074 (N-74-16757)
Energy storage using high-pressure electrolysis and methods for reconversion, 2073 (N-74-16757)
WIND TURBINES/RESEARCH PROGRAMS
Development of an electrical generator and electrolysis cell for a wind energy conversion system. Final report, 1 Jul 1973-1 Jul 1975, 727 (PB-243909)
WIND TURBINES/REVIEWS
Survey of power sources, 229

Y

YTTRIUM OXIDES/MICROSTRUCTURE
Influence of the chemical reaction of the solid electrolyte material with liquid sodium on the electromotive force of solid electrolyte cells, 3273 (ZfK-292)
YTTRIUM OXIDES/SINTERING
Influence of the chemical reaction of the solid electrolyte material with liquid sodium on the electromotive force of solid electrolyte cells, 3273 (ZfK-292)

Z

ZINC/CHEMICAL REACTIONS
Effects of mercury on the surfaces of polycrystalline copper, tin and zinc, 4194
ZINC/CORROSION
Corrosion of pure and amalgamated zinc in concentrated alkali hydroxide solutions, 3905
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 10, 1 Mar-1 Jun 1968 (Amalgamated and nonamalgamated zinc in KOH), 3024 (AD-834995)
Zinc--air cell with neutral electrolyte, 4152
ZINC/ELECTROCHEMICAL CORROSION
Corrosion in alkali hydroxide solutions of electrolytic zinc powder containing codeposited lead, 3448
ZINC/ELECTRODEPOSITION
Controlled current deposition of zinc from alkaline solution, 4467
ZINC/THERMODYNAMIC PROPERTIES
Corrosion in alkali hydroxide solutions of electrolytic zinc powder containing codeposited lead, 3448
ZINC ALLOYS/CORROSION
Magnesium and magnesium alloys as anodes in electrochemical alkaline-electrolyte power sources, 3852
ZINC ALLOYS/FABRICATION
Lead base alloy for use in a storage battery grid (Patent; 0.5 to 2% Zr and Sr), 3281
ZINC CHLORIDES/ELECTRICAL PROPERTIES
Zinc chlorine molten salt cell, 873
ZINC FLUORIDES/SOLUBILITY
Composition of nonaqueous solutions of potential use in high energy density batteries. Final report, 15 Nov 1969-14 Nov 1972 (Solubility equilibria of $CuF_2$, $NiF_2$, $ZnF_2$, $CdF_2$, $AgF_2$), 432 (AD-763140)
ZINC IODIDES/ELECTRICAL PROPERTIES
Basic research on ceramic materials for energy storage and conversion systems. Progress report, December 1, 1975-November 30, 1976, 3182 (COO-2564-2)
ZINC-AIR BATTERIES
European scientific notes, Volume 25, No. 10 (Brief articles), 402 (AD-733063)
Mechanically rechargeable zinc-air battery, 2498
R and d for hybrid battery and cell studies. Final report, 1 Apr 1973-15 Apr 1975 (Li-organic;Zm-HgO; $MgMnO_2$), 580 (AD-A-015520)
ZINC-AIR BATTERIES/ANODES
25- and 48-ampere hour anode/electrolyte composite production program. Final report, Jan 1968-Feb 1969, 2923 (AD-696790)
Accumulator battery apparatus and method (Patent; prevents dendrite buildup by causing vibrations and turbulence in electrolyte), 3293
Amalgamation of zinc powders (Patent), 3665
Anode collectors for zinc alkaline batteries (Patent; fabrication as coated Fe nets), 3752
Anodes for alkaline batteries (Patent; gel-like anode for alk. batteries using air, O, $Ag_2O$, HgO, or $MnO_2$ cathodes and Fe or Zn anodes), 3678
Anodic behavior of zinc in silicate-containing alkaline solutions, 4055
Anodic behavior of the zinc electrode in alkaline solution. I. Discharge behavior of the zinc-bed electrode, 3804
Anodic behavior of zinc in potassium hydroxide solution, 4457
Capacities of zinc-potassium hydroxide interfaces, 4461
Comparison of amalgamated and non-amalgamated zinc electrodes, 4425
Corrosion in alkali hydroxide solutions of electrolytic zinc powder containing codeposited lead, 3448
Corrosion of pure and amalgamated zinc in concentrated alkali hydroxide solutions, 3905
Coulogravimetric investigation of zinc electrode in potassium hydroxide, 4492
Development of sintered zinc battery electrodes. Progress report (0.075 to 225 ma/$cm^2$), 3060 (AD-878215)
Double layer capacitance of zinc electrodes in KOH solutions, 4496
Electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 4, 1 Sep-1 Dec 1966, 2987 (AD-804559)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 12, 1 Sep-1 Dec 1968, 3039 (AD-847067)
Electrode passivation studies. Quarterly report No. 2, 1 Mar-31 May 1966, 2838 (AD-484216)
Electrodes for zinc--air batteries (Cathodes with unmetallized C and effect on Zn anode of peroxide generated by cathodes), 4530
Estimation of the self-discharge of the zinc electrode in an oxygen--zinc battery with circulated electrolyte, 4045
Evaluation of metal-air electrochemical energy storage system for vehicle propulsion. Semiannual report, 27 May-27 November 1969, 3057 (AD-866639)
Evolution of polarization curves of monocrystalline zinc electrodes as function of crystallographic orientation, 4728
Formation of porous metal plates by electrolytic reduction, 4680
Formation of electrodes for alkaline batteries (Patent), 3542
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Fundamental studies connected with electro-chemical energy storage. Final report (Adsorption of dendrite inhibitors on Zn), 708 (N-75-30647)
High quality zinc anodes (Quality assurance procedures), 4473
High-rate battery electrodes (Performance of plates produced by electrolytic reduction), 4550

Influence of sulfur-containing additives on characteristics of cast zinc anodes in alkaline cells, 4499
Influence of the porous structure of a zinc electrode on its electrical characteristics, 4391
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 8, 1 Sep-1 Dec 1967, 3014 (AD-824687)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report. No. 9, 1 Dec 1967-1 Mar 1968, 3019 (AD-829092)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 1, 1 Dec 1965-1 Mar 1966, 1697 (AD-480149)
Kinetic study of the zinc electrode by modified techniques, 4424
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly report No. 3, 1 June-3 August 1967, 3018 (AD-828224)
Long-life stable zinc electrodes for alkaline secondary batteries. Report No. 8 (final), December 1966-February 1969, 3049 (AD-857500)
Method for preparing electrodes for an electrochemical storage cell (Patent), 3405
Method of producing electrodes (Patent), 3400
Negative electrode for electrochemical generator (Patent), 3676
Point of passivation of a zinc electrode in alkali, 3302
Producing porous metal structures for battery electrodes (Patent; Zn, Cd), 4254
Quality assurance program for zinc anode-electrolyte composites, 2922 (AD-695610)
Rechargeable zinc electrodes (Patent; fabrication), 3532
Rechargeable metal-air cell. Quarterly report No. 2, 1 August-31 October 1967, 480 (AD-828589)
Rechargeable cell having moving tape and rotating electrodes (Patent), 1378
Replaceable zinc anodes (Recent progress in development and performance), 4529
Replaceable zinc anodes (3-p progress report), 2919 (AD-681189)
Sealed zinc--oxygen cells. Technical report, 448 (AD-783490)
Storage cell with dissoluble negative line electrodes (Patent; means the vibrate anodes during charging), 925
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730
Zinc--air cell with neutral electrolyte (Behavior of air cathode and Zn anode), 4152
Zinc-air system (Prevention of Zn corrosion, determination of best membranes), 1316
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981
Zinc-containing electrode (Patent; preparation by electrodeposition), 4030
Zinc electrodes for rechargeable batteries (Patent; preparation), 3742
Zinc electrodes for rechargeable zinc/air cells, 4193
Zinc electrode investigation. Quarterly technical progress report No. 4, 1 Apr-1 Jul 1965 (Recombining gases formed during overcharge), 2810 (AD-467031)
Zinc electrode investigation. Quarterly technical progress report No. 5, 1 Jul-1 Oct 1965, 2818 (AD-471222)
Zinc electrode investigation. Quarterly technical progress report No. 6, 1 Oct 1965-1 Jan 1966, 2829 (AD-476991)
Zinc electrode investigation, 2843 (AD-489498)
Zinc electrode investigation. Quarterly technical progress report No. 1, 1 Jul-1 Oct 1964 (Pd-on-alumina catalyst), 2853 (AD-606999)
Zinc electrodes in alkaline medium, 1464
Zinc electrode for an electrochemical power source (Patent), 3480
Zinc electrodes for secondary batteries (Patent; Cd additive improves Zn adherence), 3299

ZINC-AIR BATTERIES/BATTERY CHARGING
Accumulator battery apparatus and method (Patent; prevents dendrite buildup by causing vibrations and turbulence in electrolyte), 3293
Charge-discharge behavior of the C.G.E. circulating zinc-air vehicle battery, 5046

ZINC-AIR BATTERIES/BATTERY SEPARATORS
Electrochemical cell electrode separator and method of making it and fuel cell containing same (Patent; asbestos, teflon, ethylene-propylene copolymer), 3324
Ion exchanger membranes as separators in alkaline zinc--air batteries, 4229
Oxygen-air gas-diffusion electrodes of the hydrophobic type made of carbon as electrochemical power sources, operating with fluid fuels or solid fuels dispersed in the electrolyte, 3379
Rechargeable battery which combats shape change of the zinc anode (By proper fabrication of separator; patent), 857
Zinc-air system (Prevention of Zn corrosion, determination of best membranes), 1316

ZINC-AIR BATTERIES/CATALYSTS
Low cost oxygen electrodes. Research and development technical report (Mixed transition metal oxide catalysts), 2933 (AD-715707)
Method of manufacturing fuel cell electrodes (Patent; silver oxide and activated carbon catalyst), 3475

ZINC-AIR BATTERIES/CATHODES
Air electrodes for mechanically rechargeable zinc-air batteries, 4408
Air electrode (Patent; preparation), 3595
Carbon-air electrode for metal-air batteries and fuel cells (Ag impregnated activated carbon on nickel plated iron screen), 4223
Carbon-based oxygen electrodes for metal-air batteries. II. Operation in bicells with magnesium or zinc anodes (Mechanically rechargeable over 25 times), 1905 (AD-890113)
Carbon-based oxygen electrodes for metal-air batteries. I. Experimental electrodes, 3071 (AD-887653)
Cathode for the reduction of oxygen and a rechargeable cell comprising said cathode (Patent), 3684
Cathode for a zinc--air battery with forced circulation (Fabrication of electrode containing carbon black, Ag-containing activated carbon, and poly (tetrafluoroethylene)), 3882
Charge-discharge cycling of DREO air electrodes (Sintered Ni surface containing Ag, Hg, and teflon), 3122 (AD-A-016721)
Development and test of zinc air batteries for motor vehicles, 4146
Effect of the inert component on mass transfer in the gas phase of a porous electrode. II. Oxygen electrode (C hydrophobized electrode), 3819
Electrodes for zinc--air batteries (Cathodes with unmetallized C and effect on Zn anode of peroxide generated by cathodes), 4530
Electrodes including mixed transition metal oxides (Patent), 3539
Fuel cell electrode (Patent), 4028
Fuel cells, 4131
Fuel cells with liquid fuel. I. Oxygen electrode (Structure, electrochemical properties, preparation), 4144
Gas diffusion of electrodes for air cells (Patent), 3690
Gas diffusion electrode for a battery (Patent), 3382
Gas electrodes for electrochemical cells (Patent; fabrication), 3878
Influence of certain additives to activated carbon on its properties as hydrogen electrode material, 4644
Low-cost oxygen electrodes. Research and development technical report, 2932 (AD-715707)
Low temperature electrochemical system. Semiannual technical report No. 1, 1 Jul-31 Dec 1971 (Factors influencing performance of air electrode), 2950 (AD-742720)
Low temperature electrochemical systems. Annual technical report No. 1, 1 Jul 1971-30 Jun 1972 (Study of air cathode behavior at low temperatures), 2961 (AD-749270)
Low temperature electrochemical systems. Final report, 2972 (AD-773053)
Metal/air cells and air cathodes for use therein (Patent) 3477
Method of manufacturing fuel cell electrodes (Patent; silver oxide and activated carbon catalyst), 3475
Oxygen electrode based on sintered nickel plaque impregnated with manganese dioxide, 3087 (AD-906063)
Oxygen electrodes (Patent; 2-phase La--Sr cobaltites, fabrication), 3763
Oxygen electrode. I (Isotopic investigation of electrode mechanisms), 4731
Porous oxygen or air electrode for use in zinc--air batteries, 3078 (AD-901918L)
Properties, construction, and technical applications of oxygen-diffusion electrodes, 4545
Quinones as rechargeable and regenerable battery cathode and materials, 4368
Semiconductor electrode depolarizer (Patent; Ag--CuO electrode), 3543
Use of palladium-catalyzed air cathodes in a secondary zinc-air cell, 4252
Use of palladium-catalyzed air cathodes in a secondary zinc-air cell (Degradation study), 2394
Zinc--air cell with neutral electrolyte (Behavior of air cathode and Zn anode), 4152
Zinc-air batteries (Air electrode preparation), 2494
Zinc/air or zinc/oxygen cells (Patent; improved aging by enclosing cathode in sheath), 4176

ZINC-AIR BATTERIES/CHEMICAL REACTION KINETICS
Kinetics and mechanism of deposition of zinc from zincate in concentrated alkali hydroxide solutions, 2178

ZINC-AIR BATTERIES/COMPARATIVE EVALUATIONS
Battery power for electric vehicles. 2. Novel high-energy power sources, 1223
Electrochemical power sources for vehicle propulsion, 5186

ZINC-AIR BATTERIES/COOLING
Zinc/air high-energy-density rechargeable energy storage system. Final report, 6 January-6 September 1966 (10 kWh, 83 Wh/lb), 470 (AD-822515)

ZINC-AIR BATTERIES/DESIGN
Advanced battery design, 1012

Advanced primary zinc--air batteries (Mechanically rechargeable), 1457
Advanced secondary-battery development for vehicle propulsion, 1490
Air depolarization cell or battery (Patent), 808
Alkaline air--zinc storage battery (Patent), 1228
Alkaline battery element (Patent), 1136
Alkaline zinc--air storage battery, 535 (AD-894970L)
Alkaline zinc-air storage battery (Patent; avoids dendrite formation by use $Zn^{2+}$-free electrolyte during charging), 1414
Apparatus and method for connecting cells of a battery with forced circulation (Patent), 916
BA-525( )/U and BA-526( )/U mechanically rechargeable zinc/air batteries. Final report, 555 (AD-914149L)
BA-528( )/U mechanically rechargeable zinc--air battery. Final report, 419 (AD-749779)
Cell with circulating electrolyte (Patent; primarily for Zn/air batteries, but adaptable to other types), 841
Cylindrical cell containing pressurized oxygen for $Zn/O_2$ battery, 412 (AD-740234)
Design considerations for zinc-air batteries, 1461
Development of battery, BA 536( )/U 150 amp hour (advanced development engineering design type), 414 (AD-743214)
Development of 24 volt, 25 ampere-hour and 60 watt, 720 watt-hour zinc/air battery systems. Technical report No. 1, 16 March 1966-16 October 1967, 367 (AD-668691)
Development of zinc/air 24 volt, 48 ampere-hour standard line battery system. Final report, 15 June 1967-29 February 1968 (14.8 lb., 0 to 125°F, 10A, 600 hours operation), 374 (AD-674212)
Development of zinc/air 24 volt, 20 ampere-hour standard line battery system. Final report, 8 March-29 November 1968 (Long lifetime, operable over wide temperature range), 388 (AD-690856)
Economic and technical aspects of the C.G.E. Zn-air vehicle battery (Zn powder; rechargeable electrically in or outside of vehicle), 1098
Electric cars: hope springs eternal (Problems in design and engineering of power sources), 5273
Electric-powered farm equipment (Prototype configuration), 1483
Electrically rechargeable zinc--air tape battery, 1364
Experimental vehicular zinc-air battery with replaceable anodes, 1394
Experimental vehicular zinc-air battery with replaceable anodes (35 kWh, 10 W/lb at 30 mph, 28 kWh and 27 W/lb at 55 mph), 1398
Forced-flow electrochemical battery (KOH electrolyte with Zr in suspension; patent), 853
Future look at small manned submersible energy storage systems (Zn-KOH/O, 100% O, 100 psia, 66°, 2 Ah/in.$^2$, 1.7 Wh/in.$^2$, activated by steam injection, refuelable), 1315
Generating electrical output by electrochemical oxidation (Patent; system with 2 filters, one heated), 1075
Limiting factors for zinc--air batteries at low and elevated temperatures. Technical report (Recommendations for improved design), 1808 (AD-741340)
Metal--air primary batteries. 3. Metal--air standard family (Replaceable anode), 1500
Metal--air primary battery Army standard family (Mechanically rechargeable), 1474
Metal-air primary batteries. 1. Replaceable zinc anode radio battery, 1499
Method and device for feeding cells of an electrochemical battery of forced circulation type (Patent), 934
Method and apparatus for electrochemically producing an electric current (Patent), 962
Method and device for connecting elements of a forced flow electrochemical storage cell (Patent: KOH electrolyte containing Zn powder), 850
New designs for zinc--air batteries. Research and development technical report, 390 (AD-697125)
New mechanically rechargeable zinc/air battery design. Interim technical report No. 3, 1 Feb-1 May 1972, 424 (AD-753361)
New mechanically rechargeable zinc/air battery design. Final report, 431 (AD-762573)
New mechanically rechargeable zinc-air batteries. Final report, 15 Apr 1973-30 Apr 1975, 579 (AD-A-015018)
Process for producing electric current by the electrochemical oxidation of an active anodic metal, especially zinc (Anodic metal suspended in circulating electrolyte, metal repeatedly recovered by contact with more electronegative metal; patent), 847
Rechargeable zinc electrochemical energy conversion device (Patent), 1204
Rechargeable battery (Patent), 1289
Rechargeable battery (Patent), 1290
Rechargeable metal-air cell. Quarterly report No. 1, 1 May-31 July 1967, 475 (AD-824467)
Rechargeable battery which combats shape change of the zinc anode (By proper fabrication of separator; patent), 857
Rechargeable cell having moving tape and rotating electrodes (Patent), 1378
Research and development of a dc--dc converter. Final report, 1 Jun 1971--31 Jul 1972. (Includes supplement) 539 (AD-903861L)
Secondary zinc--oxygen batteries. Final report, Jun 1972--Jun 1973, 700 (N-74-17805)
Secondary zinc--oxygen batteries. Final report (R and D) 421 (AD-751751)
Secondary zinc-oxygen batteries (6v, 25 A-hr; selection of materials), 670 (ECOM-0272-F-72)
Secondary alkaline battery (Patent), 983
Secondary, rechargeable metal/air cell (Patent; 50 to 60 Wh/lb, 100 cycles), 1324
Storage cell with dissoluble negative line electrodes (Patent; means the vibrate anodes during charging), 925
System and method for operation of a metal-air secondary battery (Patent), 915
Zinc--air fuel cell (Patent), 1046
Zinc-air alkaline battery (Patent; ZnO-free electrolyte, or one for charging and another for operation), 1390
Zinc-air hybrid fuel cells. Technical information report, 487 (AD-834903)
Zinc/air high energy density rechargeable energy storage system. Interim report, 6 January-6 May 1966 (10 kWh, 80 Wh/lb), 348 (AD-639609)
Zinc-air hybrid fuel cells (24 V, 20 and 48 Ah, 1000 h operation, mechanically rechargeable), 488 (AD-834903)

ZINC-AIR BATTERIES/ECONOMICS
Current status and prospects of the Zn-air and Na-S batteries in France, 609 (ANL-76-8)
Electric cars: hope springs eternal (Problems in design and engineering of power sources), 5273

ZINC-AIR BATTERIES/ELECTROCHEMISTRY
High rate performance of zinc--air batteries, 2489
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 January-31 March 1970, 2061 (N-70-39718)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 April-30 June 1970, 2062 (N-70-41390)
Use of palladium-catalyzed air cathodes in a secondary zinc-air cell (Degradation study), 2394

ZINC-AIR BATTERIES/ELECTRODES
Development of improved zinc electrodes for secondary batteries. Final report, July 1968-July 1969, 3203 (N-69-40063)
Electrodes for alkaline zinc storage batteries (G.D.R. patent), 3094 (AD-909496L)
Low temperature electrochemical systems. Semiannual technical report No. 2, 1 Jul-31 Dec 1972 (Tyco Labs., Inc., Waltham, MA), 2965 (AD-758171)
New mechanically rechargeable zinc/air battery design. Interim technical report No. 2, 1 Nov 1971-1 Feb 1972, 1816 (AD-748455)
Oxygen reduction in alkaline solutions at porous nickel electrodes which have been activated with several precious metals, 3088 (AD-907721L)
Secondary zinc-oxygen batteries (6v, 25 A-hr; selection of materials), 670 (ECOM-0272-F-72)
Study of Ag--Ni catalyzed bifunctional and Ag-amalgam-catalyzed monofunctional O electrodes for zinc--oxygen batteries, 3097 (AD-911460L)
Use of third electrodes in a secondary zinc-air battery, 4390
Zinc-air generators, 4477
Zinc electrode investigation. Quarterly technical progress report No. 7, 1 Jan-1 Apr 1966, 2835 (AD-480735)
Zinc-oxygen batteries (Poly(tetrafluoroethylene) (I)/Ag or poly(phenylene oxide)/Ag electrodes), 1370

ZINC-AIR BATTERIES/ELECTROLYTES
25- and 48-ampere hour anode/electrolyte composite production program. Final report, Jan 1968-Feb 1969, 2923 (AD-696790)
Alkaline electrolyte solutions containing indium and vanadium for air--zinc type secondary batteries (Patent; prevention of dendrite growth), 3672
Potassium silicate electrolyte for cells with negative zinc electrode (Increased lifetime;patent), 3986
Recovery of zinc and potassium hydroxide from spent electrolytes (Patent), 2208
Zinc-air alkaline battery (Patent; ZnO-free electrolyte, or one for charging and another for operation), 1390
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627

ZINC-AIR BATTERIES/FABRICATION
Development of battery, BA 536( )/U 150 amp hour (advanced development engineering design type), 414 (AD-743214)
Fabrication and initial testing of an experimental zinc-oxygen battery for electric vehicles, 1395
Fabrication and initial testing of an experimental zinc-oxygen battery for electric vehicles, 1399
Method of manufacturing a metal--air battery (Patent), 1147
New mechanically rechargeable zinc/air battery design. Final report, 431 (AD-762573)
Secondary zinc--oxygen batteries. Final report, Jun 1972--Jun 1973, 700 (N-74-17805)
Secondary zinc-oxygen batteries (6v, 25 A-hr; selection of materials), 670 (ECOM-0272-F-72)
Zinc alkaline storage battery (Patent, KOH electrolyte with KF), 1027
Zinc electrode for alkaline battery (Patent; portable gel-free alk.--air battery using Zn anode containing Zn amalgam granules), 1009

ZINC-AIR BATTERIES/FAILURES
Secondary zinc--air cell investigations. Technical report, 413 (AD-741342)
ZINC-AIR BATTERIES/GASES
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981
ZINC-AIR BATTERIES/MATERIALS
Battery XIV materials compatibility study: an annotated bibliography (191 references), 2825 (AD-474461)
ZINC-AIR BATTERIES/MEETINGS
Metal-air batteries symposium: compendium of papers presented for publication (Interagency Advanced Power Group, 11 Sep 1968), 32 (AD-684898)
Power sources conference (22nd annual) held 14-16 May 1968. Proceedings, 41 (AD-696427)
Power sources conference (23rd annual) held 20-22 May 1969. Proceedings, 42 (AD-696428)
ZINC-AIR BATTERIES/OPERATION
Limiting factors for zinc--air batteries at low and elevated temperatures. Technical report (Recommendations for improved design), 1808 (AD-741340)
Lunar rover battery and high energy density couples for propulsion ($Zn/O_2$), 6204
Metal--air (oxygen) batteries, 1822 (AD-757438)
Selection of a power supply for electric heart stimulators and study of the characteristics of the ''Krona VTs'' battery, 2186
Zinc/air high-energy-density rechargeable energy storage system. Final report, 6 January-6 September 1966 (10 kWh, 83 Wh/lb), 470 (AD-822515)
ZINC-AIR BATTERIES/OPTIMIZATION
Optimizing of a zinc/potassium hydroxide/oxygen cell with a silver cathode (300 to 600 mm D overpressure, 20° to 70°, 2 to 7 N concentration), 2231
ZINC-AIR BATTERIES/PASSIVATION
Effect of silicate ion addition on the dissolution of zinc in alkaline solution, 2175
ZINC-AIR BATTERIES/PERFORMANCE
Air-zinc accumulator (>100 Wh/kg), 2463
Application considerations for new air-zinc battery, 2526
BA-530( )/U mechanically rechargeable zinc--air battery. Final report, May 1970-Feb 1973, 549 (AD-910396L)
Batteries and fuel cells (48 references), 2438
Batteries for electric vehicles, 2039 (CONF-711166-)
Battery development in Japan, 4855 (ANL-76-8)
C.G.E. circulating zinc/air battery: a practical vehicle power source, 2168
Capabilities of mechanically rechargeable zinc air batteries, 2374
Capabilities of mechanically rechargeable zinc--air batteries (Rate of discharge, ambient temperature), 1823 (AD-757440)
Current status and prospects of the Zn-air and Na-S batteries in France, 609 (ANL-76-8)
Design and performance of zinc--air battery for electric cars, 1495
Design work on lithium-sulfur battery (and others), 647 (CONF-691143-)
Development of Cd--air and Zn--air cells, 1344
Development of zinc/air 24 volt, 48 ampere-hour standard line battery system. Final report, 15 June 1967-29 February 1968 (14.8 lb., 0 to 125°F, 10A, 600 hours operation), 374 (AD-674212)
Gravity field effects in zinc anode discharge in alkaline media, 2617
High rate performance of zinc--air batteries, 2489
Leesona zinc-air battery, 1481
Limiting factors for zinc--air batteries at low and elevated temperatures. Technical report (Recommendations for improved design), 1808 (AD-741340)
Low temperature electrochemical systems. Annual technical report No. 1, 1 Jul 1971-30 Jun 1972 (Study of air cathode behavior at low temperatures), 2961 (AD-749270)
Mechanically rechargeable zinc-air battery (100 W-hr/lb), 1769 (AD-693865)
Metal--air systems. 3. Primary zinc--air battery systems, 2553
Metal--air systems. 2. Metal--air battery systems, 2554
Metal--air (oxygen) batteries, 2383
Metal--gas rechargeable batteries, 1352
Metal-air primary batteries. 1. Replaceable zinc anode radio battery, 1499
Metal-air cells, 381 (AD-683461)
New batteries use zinc-air couple, 2440
New mechanically rechargeable zinc/air battery design. Interim technical report No. 1, 1 Jul-1 Nov 1971, 417 (AD-748434)
New mechanically rechargeable zinc/air battery design. Interim technical report No. 2, 1 Nov 1971-1 Feb 1972, 1816 (AD-748455)
Performance and applications of reversible zinc--air and zinc/oxygen generators, 2225
Progress in metal/air batteries, 370 (AD-671685)
R and D for hybrid battery and cell studies. Interim report, 1 Apr-1 Oct 1973, 561 (AD-917663L)
Rechargeable metal-air cell. Quarterly report No. 3, 1 November 1967-31 January 1968, 491 (AD-839644)
Sealed zinc--oxygen cells. Technical report, 448 (AD-783490)
Secondary batteries for electric vehicles, 4854 (ANL-76-8)
Selection of a power supply for electric heart stimulators and study of the characteristics of the ''Krona VTs'' battery, 2186
Small size liquid fuel air and zinc air primary cells, 1487
Zinc--air (oxygen) cell studies. Technical report (Prevention of zinc penetration through separator), 435 (AD-772903)
Zinc-air batteries (Air electrode preparation), 2494
Zinc-air battery R and D shows promise, 2567
Zinc-air batteries (Development for use in Renault R10), 652 (CONF-711166-)
Zinc-air traction batteries for light-weight vehicles, 5199
Zinc electrodes for rechargeable zinc/air cells, 4193
Zinc-oxygen battery system, 2575
Zn/air batteries for cars produce 60 to >100 Wh/lb, 5255
ZINC-AIR BATTERIES/PERFORMANCE TESTING
Development test II (engineering phase) of zinc--air battery BA-536( )/U. Final report, Aug 1973--Jan 1974, 563 (AD-918965L)
Dual battery electric powerplant, 5224
Evaluation of metal-air electrochemical energy storage system for vehicle propulsion. Final report, May 1969-November 1970, 1904 (AD-880899)
Experimental vehicular zinc-air battery with replaceable anodes, 1394
New mechanically rechargeable zinc-air batteries. Final report, 15 Apr 1973-30 Apr 1975, 579 (AD-A-015018)
Service test of zinc--air battery, BA-536( )/U. Final report, Jan-Mar 1973 and Jul-Oct 1973, 1995 (AD-919263L)
Simulated field tests on zinc-air batteries, 2289
ZINC-AIR BATTERIES/PLANNING
Metal-air systems. 4. Secondary metal--air system (Tens of kilowatt-hours capacity), 1513
ZINC-AIR BATTERIES/REVIEWS
Characteristics of metal-air systems (67 references; 10 different anodes described), 1366
Zinc--air batteries for traction and propulsion, 5197
Zinc-air battery systems, 1433
ZINC-AIR BATTERIES/SEALS
Alkaline battery seal and protective coating comprising a fatty acidamide (Patent), 3484
ZINC-AIR BATTERIES/STORAGE
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981
ZINC-AIR BATTERIES/TESTING
Advanced primary zinc--air batteries (Mechanically rechargeable), 1457
Analysis and manufacture of zinc--air (oxygen) battery bank, 2338
BA-525( )/U and BA-526( )/U mechanically rechargeable zinc/air batteries. Final report, 555 (AD-914149L)
Development and test of zinc air batteries for motor vehicles, 4146
Fabrication and initial testing of an experimental zinc-oxygen battery for electric vehicles, 1395
Fabrication and initial testing of an experimental zinc-oxygen battery for electric vehicles, 1399
Field testing of zinc--air batteries (Mechanically rechargeable), 2490
Secondary zinc--oxygen batteries. Final report, Jun 1972--Jun 1973, 700 (N-74-17805)
Secondary zinc-oxygen batteries (6v, 25 A-hr; selection of materials), 670 (ECOM-0272-F-72)
ZINC-AIR BATTERIES/USES
Electric automobiles (citations from the Engineering Index data base). Report for 1970-Jun 1976, 4995 (NTIS/PS-76/0561)
System design implications of electric and hybrid vehicles, 5261
Urban car for the 1980's, 4920 (CONF-711166-)
Zinc-air batteries in vehicular applications, 4941 (CONF-740215-P2)
Zinc-air generators, 4477
ZINC-AIR BATTERIES/WASTE PROCESSING
Recovery of zinc and potassium hydroxide from spent electrolytes (Patent), 2208
ZINC-CHLORINE BATTERIES/ANODES
Anode collectors for zinc alkaline batteries (Patent; fabrication as coated Fe nets), 3752
Anodic behavior of zinc in potassium hydroxide solution, 4457
Comparison of amalgamated and non-amalgamated zinc electrodes, 4425
Corrosion in alkali hydroxide solutions of electrolytic zinc powder containing codeposited lead, 3448
Coulogravimetric investigation of zinc electrode in potassium hydroxide, 4492
Double layer capacitance of zinc electrodes in KOH solutions, 4496
Electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 4, 1 Sep-1 Dec 1966, 2987 (AD-804559)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 12, 1 Sep-1 Dec 1968, 3039 (AD-847067)
Electrode passivation studies. Quarterly report No. 2,

1 Mar-31 May 1966, 2838 (AD-484216)
Electrodes for use in zinc-halogen electrolytic cells and (or) batteries (Patent), 4307
Evolution of polarization curves of monocrystalline zinc electrodes as function of crystallographic orientation, 4728
Formation of porous metal plates by electrolytic reduction, 4680
Formation of electrodes for alkaline batteries (Patent), 3542
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Fundamental studies connected with electro-chemical energy storage. Final report (Adsorption of dendrite inhibitors on Zn), 708 (N-75-30647)
High-rate battery electrodes (Performance of plates produced by electrolytic reduction), 4550
Influence of sulfur-containing additives on characteristics of cast zinc anodes in alkaline cells, 4499
Influence of the porous structure of a zinc electrode on its electrical characteristics, 4391
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 8, 1 Sep-1 Dec 1967, 3014 (AD-824687)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report. No. 9, 1 Dec 1967-1 Mar 1968, 3019 (AD-829092)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 1, 1 Dec 1965-1 Mar 1966, 1697 (AD-480149)
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly report No. 3, 1 June-3 August 1967, 3018 (AD-828224)
Long-life stable zinc electrodes for alkaline secondary batteries. Report No. 8 (final), December 1966-February 1969, 3049 (AD-857500)
Method for preparing electrodes for an electrochemical storage cell (Patent), 3405
Method of producing electrodes (Patent), 3400
Producing porous metal structures for battery electrodes (Patent; Zn, Cd), 4254
Rechargeable zinc electrodes (Patent; fabrication), 3532
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981
Zinc-containing electrode (Patent; preparation by electrodeposition), 4030
Zinc electrode investigation. Quarterly technical progress report No. 4, 1 Apr-1 Jul 1965 (Recombining gases formed during overcharge), 2810 (AD-467031)
Zinc electrode investigation. Quarterly technical progress report No. 5, 1 Jul-1 Oct 1965, 2818 (AD-471222)
Zinc electrode investigation. Quarterly technical progress report No. 6, 1 Oct 1965-1 Jan 1966, 2829 (AD-476991)
Zinc electrode investigation, 2843 (AD-489498)
Zinc electrode investigation. Quarterly technical progress report No. 1, 1 Jul-1 Oct 1964 (Pd-on-alumina catalyst), 2853 (AD-606999)
Zinc electrodes in alkaline medium, 1464
Zinc electrodes for secondary batteries (Patent; Cd additive improves Zn adherence), 3299

ZINC-CHLORINE BATTERIES/BATTERY CHARGING
System for improving charge efficiency of a zinc-chloride battery (Patent; system to improve charging efficiency by reducing chlorine concentration in flowing electrolyte), 815

ZINC-CHLORINE BATTERIES/BATTERY SEPARATORS
Rechargeable battery which combats shape change of the zinc anode (By proper fabrication of separator; patent), 857

ZINC-CHLORINE BATTERIES/CATHODES
Chlorine electrodes in the zinc--chlorine battery system (50 V, 1 kWh), 4208
Engineering design and cost analysis of chlorine storage concepts for a zinc-chlorine load-leveling battery. Final report, 737 (PB-262016)
Halogen storage by means of hydrates; patent, 3451
Impurity effects in high current density $Cl_2$ electrodes, 4541
Influence of certain additives to activated carbon on its properties as hydrogen electrode material, 4644
New reversible chlorine electrode (Employs certain properties of iodine), 4792

ZINC-CHLORINE BATTERIES/CHEMICAL REACTION KINETICS
Kinetics and mechanism of deposition of zinc from zincate in concentrated alkali hydroxide solutions, 2178

ZINC-CHLORINE BATTERIES/COMPARATIVE EVALUATIONS
Batteries for electrocars, 2173
Battery power for electric vehicles. 2. Novel high-energy power sources, 1223

ZINC-CHLORINE BATTERIES/DESIGN
Advanced battery design, 1012
Apparatus for circulating electrolyte around multi-section batteries (Patent), 792
Batteries for practical electric cars, 5166
Batteries comprising vented electrodes (Patent; bipolar electrodes, circulating electrolyte), 924
Control of generation of chlorine feed from chlorine hydrate for use in a metal chlorine electric energy storage device (Patent), 797
Enclosed electrical energy storage device with halogen absorbing means (Patent; halogen oxidant), 1081
Engineering design and cost analysis of chlorine storage concepts for a zinc-chlorine load-leveling battery. Final report, 737 (PB-262016)
Metal halogen hydrate battery system (Patent; improved halogen hydrate forming and storage system), 833
Rechargeable zinc-chlorine battery (Patent; C--metal cathode semipermeable ion-selective separator foils), 1041
Rechargeable battery which combats shape change of the zinc anode (By proper fabrication of separator; patent) 857
Regulating the generation of chlorine from chlorine hydrate for metal--chlorine batteries (Patent), 1068
Secondary zinc--halogen battery (Patent), 1037
Secondary electrochemical cell having non-consumable silicon cathode (Patent; $Zn/ZnBr_2/Si$ is preferred embodiment, but other constituents may be used), 844
System for improving charge efficiency of a zinc-chloride battery (Patent; system to improve charging efficiency by reducing chlorine concentration in flowing electrolyte), 815
Zinc--chlorine secondary battery (Patent; $ZnCl_2$ electrolyte), 1040
Zinc--halogen electric cell (Patent; reservoir for halogen solvent, 1 to 10 atm), 1021

ZINC-CHLORINE BATTERIES/ECONOMICS
Batteries for storage of wind-generated energy, 2075 (N-74-16784)
Economic impacts of electric cars in St. Louis and Philadelphia, 5019 (TEC-75/006c)

ZINC-CHLORINE BATTERIES/ELECTROCHEMISTRY
Diffusion of lithium in lithium--zinc alloy, 2279

ZINC-CHLORINE BATTERIES/ELECTRODES
Batteries comprising vented electrodes and method of using same (Patent), 3506
Chlorine electrodes in the zinc-chlorine battery system (Up to 60 kW-hr), 4207
Development of improved zinc electrodes for secondary batteries. Final report, July 1968-July 1969, 3203 (N-69-40063)
Diffusion of lithium in lithium--zinc alloy, 2279
Electrode for a zinc--halogen battery (Patent; fabrication), 3689
Electrodes for alkaline zinc storage batteries (G.D.R. patent), 3094 (AD-909496L)
Halogen hydrates (Patent; halogen storage by means of hydrates), 3513

ZINC-CHLORINE BATTERIES/ELECTROLYTES
Chlorine electrodes in the zinc-chlorine battery system (Up to 60 kW-hr), 4207
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627

ZINC-CHLORINE BATTERIES/FEASIBILITY STUDIES
Zinc chlorine molten salt cell, 873

ZINC-CHLORINE BATTERIES/FLOW REGULATORS
Mass flow rate control of chlorine content of electrolyte for high energy density battery (Patent), 3623

ZINC-CHLORINE BATTERIES/GASES
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981

ZINC-CHLORINE BATTERIES/OPERATION
Ev power sources: waiting for a superbattery, 1170

ZINC-CHLORINE BATTERIES/PERFORMANCE
Batteries for practical electric cars, 5166
Gravity field effects in zinc anode discharge in alkaline media, 2617
Performance of zinc chloride batteries, 75 (CONF-740215-P1)
Zinc--chloride battery: the missing link to a practical electric car (50 Wh/lb, 100,000 mile life), 5165

ZINC-CHLORINE BATTERIES/PERFORMANCE TESTING
Evaluation of a 1-kWh zinc chloride battery system. Interim report, 2107 (PB-260683)

ZINC-CHLORINE BATTERIES/PLANNING
Batteries for energy storage, 890
Super batteries for load leveling and electric vehicles, 799

ZINC-CHLORINE BATTERIES/POLARIZATION
Diffusion of lithium in lithium--zinc alloy, 2279

ZINC-CHLORINE BATTERIES/SAFETY
Safety shell for retention and detoxication of chlorine released from metal--chlorine batteries, 3729

ZINC-CHLORINE BATTERIES/STORAGE
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981

ZINC-CHLORINE BATTERIES/USES
Another chance for electrics, 5117
Impact of advanced batteries on electric power generation, 5138

ZINC-MANGANESE BATTERIES/ANODES

Alkaline cell (Patent; Zn anode and alkaline electrolyte), 1036
Alkaline cells with anodes made from zinc fibers and needles (Patent; process for preparing fibers and needles), 3917
Amalgamation of zinc powders (Patent), 3665
Anode for galvanic cells (Patent; gas-permeable matrix of cross-linked polyacrylamide saturated with electrolyte and incorporating Zn particles), 3604
Anodes for alkaline batteries (Patent; gel-like anode for alk. batteries using air, O, $Ag_2O$, HgO, or $MnO_2$ cathodes and Fe or Zn anodes), 3678
Anodic behavior of zinc electrodes in potassium hydroxide electrolytes. Technical report, 2928 (AD-706596)
Anodic behavior of zinc in flowing electrolyte systems, 3781
Anodic behavior of zinc in potassium hydroxide solution, 4457
Battery zinc electrode kinetics investigation. Annual report No. 2, 15 Dec 1970--15 Dec 1971 (KOH electrolyte), 2945 (AD-736460)
Comparison of amalgamated and non-amalgamated zinc electrodes, 4425
Corrosion in alkali hydroxide solutions of electrolytic zinc powder containing codeposited lead, 3448
Coulogravimetric investigation of zinc electrode in potassium hydroxide, 4492
Double layer capacitance of zinc electrodes in KOH solutions, 4496
Electrochemical generator with a zinc electrode (Patent), 3888
Electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 4, 1 Sep-1 Dec 1966, 2987 (AD-804559)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 10, 1 Mar-1 Jun 1968 (Amalgamated and nonamalgamated zinc in KOH), 3024 (AD-834995)
Electrode migration and reaction processes occurring within alkaline-zinc batteries. Quarterly technical progress report No. 12, 1 Sep-1 Dec 1968, 3039 (AD-847067)
Electrode passivation studies. Quarterly report No. 2, 1 Mar-31 May 1966, 2838 (AD-484216)
Evolution of polarization curves of monocrystalline zinc electrodes as function of crystallographic orientation, 4728
Formation of porous metal plates by electrolytic reduction, 4680
Forming rechargeable electrodes utilizing an unsintered fluorocarbon binder (Patent; fabrication), 4309
Fundamental studies connected with electro-chemical energy storage. Final report (Adsorption of dendrite inhibitors on Zn), 708 (N-75-30647)
Gel-type zinc anode for alkaline batteries (Patent), 3584
Hermetically sealed alkaline galvanic element of zinc-manganese system (Patent), 4823 (AD-758917)
High-rate battery electrodes (Performance of plates produced by electrolytic reduction), 4550
Influence of sulfur-containing additives on characteristics of cast zinc anodes in alkaline cells, 4499
Influence of the porous structure of a zinc electrode on its electrical characteristics, 4391
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 13, 1 Dec 1968-1 Mar 1969, 1886 (AD-850474)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 6, 1 Mar-1 Jun 1967 (Solubility of ZnO in KOH), 3005 (AD-816527)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 8, 1 Sep-1 Dec 1967, 3014 (AD-824687)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report. No. 9, 1 Dec 1967-1 Mar 1968, 3019 (AD-829092)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 1, 1 Dec 1965-1 Mar 1966, 1697 (AD-480149)
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 3, 1 Jun-1 Sep 1966, 2842 (AD-488605)
Long-life stable zinc electrode for alkaline secondary battery. Quarterly report No. 2, 1 March-31 May 1967, 3015 (AD-824719)
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly report No. 3, 1 June-3 August 1967, 3018 (AD-828224)
Long-life stable zinc electrodes for alkaline secondary battery. Quarterly report No. 4, 1 September-30 November 1967 (Teflonated anodes), 3026 (AD-835961)
Long-life stable zinc electrode for alkaline secondary battery. Quarterly report No. 5, 1 December 1967-29 February 1968 (5 Ah), 3028 (AD-837262)
Long-life stable zinc electrodes for alkaline secondary batteries. Quarterly technical progress report No. 6, 1 March-30 May 1968, 3038 (AD-847053)
Long-life stable zinc electrodes for alkaline secondary batteries. Report No. 8 (final), December 1966-February 1969, 3049 (AD-857500)
Macrokinetics of the processes at the zinc electrode of an alkali current source, 3800
Manganese dioxide (Patent; chemical preparation), 3929
Method for preparing electrodes for an electrochemical storage cell (Patent), 3405
Method of producing electrodes (Patent), 3400
New process for the production of synthetic battery grade manganese dioxide (Chloride process), 4106
Producing porous metal structures for battery electrodes (Patent; Zn, Cd), 4254
Rechargeable zinc electrodes (Patent; fabrication), 3532
Strain electrometry and corrosion. IV (Film properties and strain potential), 4730
Studies in fundamental chemistry of fuel cell reactions. Semiannual progress report, 1 January-30 June 1968 (Dendritic deposition of zinc from alkaline solution), 688 (N-69-25396)
Studies in fundamental chemistry of fuel cell reactions. Semiannual progress report, 1 July-31 December 1968 (Formation mechanisms of zinc dendrites), 689 (N-69-25397)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 April-30 June 1969 (Dendritic deposition of zinc from alkaline solution), 3206 (N-70-10779)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 April-30 June 1969 (Dendritic deposition of zinc from alkaline solution), 3207 (N-70-16379)
Studies in fundamental chemistry of fuel cell reactions. Quarterly report, 1 July-30 September 1969 (Dendritic deposition of zinc from alkaline solution), 3209 (N-70-25705)
Texture of a zinc oxide residue formed during the anodic oxidation of porous zinc in an alkaline solution, 2228
Use of ion-exchange compounds in chemical current sources, 2301
Zinc--alkaline battery containing carbazole as a zinc corrosion inhibitor (Patent), 1001
Zinc alkaline battery (Patent), 1019
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981
Zinc anodes for secondary batteries (Patent; fabrication, polyethyleneimine to prevent electrodeposition of Zn on anode), 3675
Zinc anodic mixes for alkaline batteries (Patent), 3638
Zinc as a secondary battery electrode (Review of attempts to improve cycling behavior), 4405
Zinc-containing electrode (Patent; preparation by electrodeposition), 4030
Zinc electrodes for rechargeable batteries (Patent; synthetic latex coating to prevent dendrite formation), 3585
Zinc electrode investigation. Quarterly technical progress report No. 4, 1 Apr-1 Jul 1965 (Recombining gases formed during overcharge), 2810 (AD-467031)
Zinc electrode investigation. Quarterly technical progress report No. 5, 1 Jul-1 Oct 1965, 2818 (AD-471222)
Zinc electrode investigation. Quarterly technical progress report No. 6, 1 Oct 1965-1 Jan 1966, 2829 (AD-476991)
Zinc electrode investigation, 2843 (AD-489498)
Zinc electrode investigation. Quarterly technical progress report No. 1, 1 Jul-1 Oct 1964 (Pd-on-alumina catalyst), 2853 (AD-606999)
Zinc electrode investigation. Quarterly technical progress report No. 3, 1 Jan-1 Apr 1965, 2863 (AD-614119)
Zinc electrodes in alkaline medium, 1464
Zinc electrodes for secondary batteries (Patent; Cd additive improves Zn adherence), 3299
Zinc plate shape change inhibition (Patent; frame near electrode saturated with $Fe(OH)_2$), 1006
Zinc powder for batteries (Patent), 3679

ZINC-MANGANESE BATTERIES/BATTERY CHARGING
Reversibility on charge and discharge of manganese dioxide electrode in alkaline electrolyte, 2445

ZINC-MANGANESE BATTERIES/BATTERY SEPARATORS
Factors influencing flexibility, resistivity, zinc dendrite penetration rate of inorganic separators for alkaline batteries, 3244 (NASA-TM-X-3199)
Method of making separators for alkaline batteries (Patent), 3555
Rechargeable battery which combats shape change of the zinc anode (By proper fabrication of separator; patent) 857
Separators for alkaline batteries (Patent; natural or synthetic cellulosic materials, styrene, nylon, glass fiber, Teflon, etc.), 3384
Separators for electrochemical cells (Patent), 4338

ZINC-MANGANESE BATTERIES/CATHODES
Alkaline manganese battery (Patent), 3614
Alkaline manganese dioxide electrode. I (Kinetics of cathodic reduction processes), 4546

Anodic oxidation of manganese oxides in alkaline electrolytes, 4515
Application of intermittent discharges to electrochemical determination of depolarizing capacity of manganese dioxide, 4663
Cathodic reduction of manganese dioxide in alkaline electrolyte, 4652
Cathodic reduction of manganese dioxide in alkaline electrolyte, 4719
Change of potential of manganese dioxide electrodes on standing, 4745
Current distribution in porous manganese dioxide electrodes, 4668
Effect of heat treatment of various kinds of manganese dioxide on their adsorption and depolarization properties, 4662
Electric conductivity of Braunstein powder under compression, 4044
Electrochemistry of manganese dioxide and production and properties of electrolytic manganese dioxide (EMD), 4109
Electrochemistry of $\beta$-$MnO_2$ and $\gamma$-$MnO_2$ in alkaline electrolyte, 3838
Electrode kinetics of manganese dioxide electrodes in alkaline solution, 2515
Electrode potentials and related properties of some potassium-containing $\alpha$-manganese dioxides, 4423
Electrolytic synthesis of battery-grade manganese dioxide, 4677
Extraction of battery-grade manganese dioxide from low-grade manganese ores, 4187
Influence of active surface on cathodic reduction of $MnO_2$, 4686
Ion-exchange property of manganese dioxide, 4721
Manganese dioxide electrode in alkaline electrolyte-electron-proton mechanism for discharge process from $MnO_2$ to $MnO_{1.5}$, 4570
Manganese dioxide electrode. III. Relationship between activities and stoichiometry for compositions near to $MnO_2$, 3425
Manganese dioxide electrode at potentials at and close to the open circuit potential of the electrode, 3940
Molybdenum trioxide doped manganese dioxide electrode. I and II, 3414
Overpotential of manganese dioxide electrode. II, 4741
Polarization of manganese dioxide electrode, 4683
Pore dimensions and surface capacity of manganese dioxide, 4698
Potential of manganese dioxide electrode and surface composition of oxide (Effect of heating), 4729
Rechargeability of manganese dioxide electrode (KOH solution), 4510
Relation of conditions of electrodeposition of manganese dioxide to discharge characteristics (Influence of temperature, current density, and impurities in preparation of electrodeposited electrodes), 4735
Reversibility on charge and discharge of manganese dioxide electrode in alkaline electrolyte, 2445
Use of hydrogen-absorbing electrode in alkaline battery (For protection against electrochemical damage due to battery reversal; patent), 3386
Zinc-container electrode (Patent; design and performance), 3667

ZINC-MANGANESE BATTERIES/CHEMICAL REACTION KINETICS
Cathodic reduction of manganese dioxide in alkaline electrolyte, 4719
Electrode kinetics of manganese dioxide electrodes in alkaline solution, 2515
Investigation of the electrode migration and reaction process occurring in alkaline-zinc batteries. Quarterly technical progress report No. 13, 1 Dec 1968-1 Mar 1969, 1886 (AD-850474)
Kinetics and mechanism of deposition of zinc from zincate in concentrated alkali hydroxide solutions, 2178

ZINC-MANGANESE BATTERIES/CHEMICAL REACTIONS
Alkaline manganese dioxide electrode. II, 2512

ZINC-MANGANESE BATTERIES/CORROSION INHIBITORS
Zinc--alkaline battery containing carbazole as a zinc corrosion inhibitor (Patent), 1001

ZINC-MANGANESE BATTERIES/CORROSION PROTECTION
Zinc alkaline battery (Patent), 1019

ZINC-MANGANESE BATTERIES/DESIGN
Alkaline cell with double collector positive, negative, and third terminal connections (Patent), 846
Alkaline manganese dioxide battery (Patent; large-capacity battery with stacked plates), 1003
Dry batteries. Modern energy sources with an ever broader range of applications, 900
Hermetically sealed alkaline galvanic element of zinc manganese system (USSR patent), 430 (AD-758917)
Manganese storage battery (Patent; carbon plates treated with $MnO_2$), 793
Rechargeable battery which combats shape change of the zinc anode (By proper fabrication of separator; patent) 857
Storage of electric energy, 1108
Zinc alkaline secondary battery (Patent; safe battery because of smooth gas removal at anode), 1032
Zinc alkaline secondary batteries (Patent; auxiliary anode and polycationic polymer prevent Zn dendrite formation and H generation), 998

ZINC-MANGANESE BATTERIES/ELECTROCHEMISTRY
Battery zinc electrode kinetics investigation. Annual report No. 2, 15 Dec 1970--15 Dec 1971 (KOH electrolyte), 2945 (AD-736460)
Texture of a zinc oxide residue formed during the anodic oxidation of porous zinc in an alkaline solution, 2228

ZINC-MANGANESE BATTERIES/ELECTRODES
Comparison of potential step and triangular voltage sweep methods of double layer capacitance measurements. III. Porous zinc electrodes, 2949 (AD-742219)
Development of improved zinc electrodes for secondary batteries. Final report, July 1968-July 1969, 3203 (N-69-40063)
Electrodes for alkaline zinc storage batteries (G.D.R. patent), 3094 (AD-909496L)
Zinc electrode shape change in secondary cells, 4269

ZINC-MANGANESE BATTERIES/ELECTROLYTES
Electrochemical generator with a zinc electrode (Patent), 3888
Electrolyte for zinc--anode batteries (Patent; $H_2SO_4$ with N-decylpyridinium chloride), 3715
Use of ion-exchange compounds in chemical current sources, 2301
Zinc alkaline secondary batteries (Patent; dendrite growth suppressed by In and Tl), 3627

ZINC-MANGANESE BATTERIES/FABRICATION
Alkaline cell (Patent; Zn anode and alkaline electrolyte) 1036
Alkaline manganese dioxide battery (Patent; contains water-repelling agent for improved performance), 1050
Alkaline manganese secondary battery (Patent; alkaline earth hydroxide between anode and cathode), 1007
Alkaline manganese secondary battery (Patent; anode with alkaline earth hydroxide added to Zn), 1008
Alkaline manganese battery (Patent), 3614
Flat alkaline cell construction and method for assembling the same (Patent), 1031

ZINC-MANGANESE BATTERIES/GASES
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981

ZINC-MANGANESE BATTERIES/GASKETS
Alkaline cells (Patent; halogenated butyl rubber with blended styrenic and phenolic resins), 3568

ZINC-MANGANESE BATTERIES/OPERATION
Alkaline aluminium--air/zinc--manganese dioxide hybrid battery (Patent), 987

ZINC-MANGANESE BATTERIES/PERFORMANCE
Alkaline manganese-zinc battery (Patent; 2000 Ah, 100 Wh/kg), 1053
Use of ion-exchange compounds in chemical current sources, 2301

ZINC-MANGANESE BATTERIES/REVIEWS
Batteries. Volume 1. Manganese dioxide (Book), 166

ZINC-MANGANESE BATTERIES/SEALS
Alkaline battery seal and protective coating comprising a fatty acidamide (Patent), 3484
Battery having deformations in a metal layer (Patent; avoids wrinkles occurring during fabrication), 864

ZINC-MANGANESE BATTERIES/STORAGE
Zinc anode battery (Patent; coating of 2,6-di-tert-butyl-p-cresol to extend shelf life and inhibit H evolution), 981

ZINC-MANGANESE BATTERIES/VENTS
Pressure vent-sealed primary and secondary alkaline cells (Patent; thermoplastic, polyamides, silicone, etc.), 3320

ZIRCONIUM OXIDES/FABRICATION
Metal oxide fabrics (Patent; continuation of US Patent 3, 385,915; for use as fuel cell or battery separators), 4237

# REPORT NUMBER INDEX

The numbers assigned to all reports cited in the publication appear in the first column of the index. The citation numbers are included in the second column. Cross reference information and/or availability are included as appropriate. Abbreviations used in the availability column are elaborated at the end of the index.

## Abbreviations Used in Availability Column

AT Liquid Metal Fast Breeder Reactor applied technology is available to domestic requesters within the United States from the Technical Information Center, P. O. Box 62, Oak Ridge, Tennessee 37830.
Information regarding subscription purchase will be sent on request.
Foreign requesters should address inquiries to the above address.

Dep. DOE reports so designated are maintained in the organizations listed on the inside front cover.

EM Inquiries regarding the availability of blueline prints of DOE engineering drawings which were formerly available for sale by NTIS should be addressed to Technical Information Center, P. O. Box 62, Oak Ridge, Tennessee 37830.

GJO Available from DOE Grand Junction Office, P. O. Box 2567, Grand Junction, Colorado 81501.

GPO For sale by the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

LMEC Available *only to requesters within the United States* from the Liquid Metal Engineering Center, P. O. Box 1449, Canoga Park, California 91304.

NTIS For sale by the National Technical Information Service (NTIS), U. S. Department of Commerce, Springfield, Virginia 22161. Price given is the domestic price for paper copy; foreign purchasers add $2.50 per report copy. Some recent NTIS availability statements will include pricing codes as opposed to prices. These codes are related to actual prices in the table below.

RSO Available *only to requesters within the United States* from the Reactor Standards Office, Oak Ridge National Laboratory, P. O. Box X, Oak Ridge, Tennessee 37830.

TIC Available from the Technical Information Center, P. O. Box 62, Oak Ridge, Tennessee 37830.

## NTIS NORTH AMERICAN PRICE CODES

Issue 4

October 1977

Most NTIS products and services are now announced by price codes and, therefore, without specific prices in NTIS journals, newsletters and indexes.

The current dollar equivalent for each code is shown in the schedule below. Orders must list the accession number(s) and be accompanied by the total dollar amount from the current schedule.

ISSUE 4 prices will be valid through March 31, 1978. After that date, source clients who have not received the latest schedule may contact the Input Branch, 703-557-4690 for the next issue.

### NORTH AMERICAN CONTINENT PRICE SCHEDULE

Customers in Canada, U.S., and Mexico please use this price schedule; other addressees write for Folder PR-360-4.
